Beer Systems, Bar Equipment

Towers, Faucets, Handles, Medallions, Shanks, Drip Trays, Chillers, Glycol, Trunk Lines and Tubing, Line Labels, Tools, Installation Simplifiers, Visual Dispensers, Bar Guns, Ice Chests, Conversion and Leg Stands, Cold Plates, Couplers/Taps, Picnic Pumps, Picnic Coolers, Special Events, Branded Displays, Kegerators, Fridge Kits, Keg Accessories, FOB Stops, Gas and Electric Pumps, CO$_2$ Tanks & Detector/Alarm, Regulators, Compressors, Gas Blenders, Fittings, Cleaners, Under Bar, Cocktail Stations, Glasswashers, Mug Frosters, Back Bar Refrigeration, Back Bar Storage, Glass Display Units, Bar Accessories, Installer Checklist

Remote Beer System, Part A
Back Room Components

Diagram is continued on next page

Gas Blend Line #2: 60% CO$_2$ & 40% Nitrogen used for lagers and ales.

In-Place Cleaning System: Save beer & increase profits by cleaning your own lines when a keg empties.

Secondary Regulator Panel: Regulates gas pressure to each products specification.

Gas Blend Line #1: 25% CO$_2$ & 75% Nitrogen used for stouts.

Evaporator Unit: Creates refrigerated air for walk-in cooler.

Coupler: Dispense head for tapping kegs.

Blends CO$_2$ & Nitrogen.

Tail Line: Exposed product lines in walk-in not touching glycol lines.

High Pressure Braided Line: Gas source tranfer for pressure over 50 lbs.

Keg Stacker: Saves space while allowing two kegs in series to be tapped.

Glycol Coolant Lines: Transfer source for glycol.

Beer Hose: Transfer source for beer.

Kegs: Contains beer under pressure.

Power Pack: A Glycol bath (70% Water/30% POLAR FLO Glycol) is refrigerated to maintain product temperature from walk-in cooler to tower. Capable of up to 500ft.

N$_2$ Cylinder: Storage for N$_2$.

High Pressure Regulators: Regulates the CO$_2$ and N$_2$ for the gas blend.

Profit Maximizer: Detects empty keg, closing beer line keeping it filled. Eliminates wasted beer and lost profits.

Walk-in Cooler

Diagram is courtesy of Micro Matic USA, Inc.

CO$_2$ Cylinder: Storage for CO$_2$.

50 Litre Cleaning Bottle: One bottle contains cleaning chemicals and one contains rinse water for the "In-Place Cleaning System".

The following aspects need consideration:
- Total length of the run(s)
- Location and layout of the beer line chase-way(s)
- Net vertical lift or drop (distance from bottom of keg to beer faucet)
- Number of dispensing stations, the type of beer tower(s), and the number of faucets on each tower
- Number of kegs to be stored in the walk-in cooler
- Line chiller location and if a line chiller leg set, stand or wall rack is required
- Method of counter pressure: beer pumps or blended N$_2$/CO$_2$
- Type of primary CO$_2$ storage: tank or bulk
- If keg taps are required or supplied by others

To design your remote draft beer system, knowledge of your basic requirements is necessary. Our sales people are eager to discuss the various options to fit your needs and budget. Please feel free to contact us with any questions.

Beer Systems, Bar Equipment

Remote Beer System, Part B

An installer checklist can be found on the last four pages of this section to help build a complete beer dispensing system.
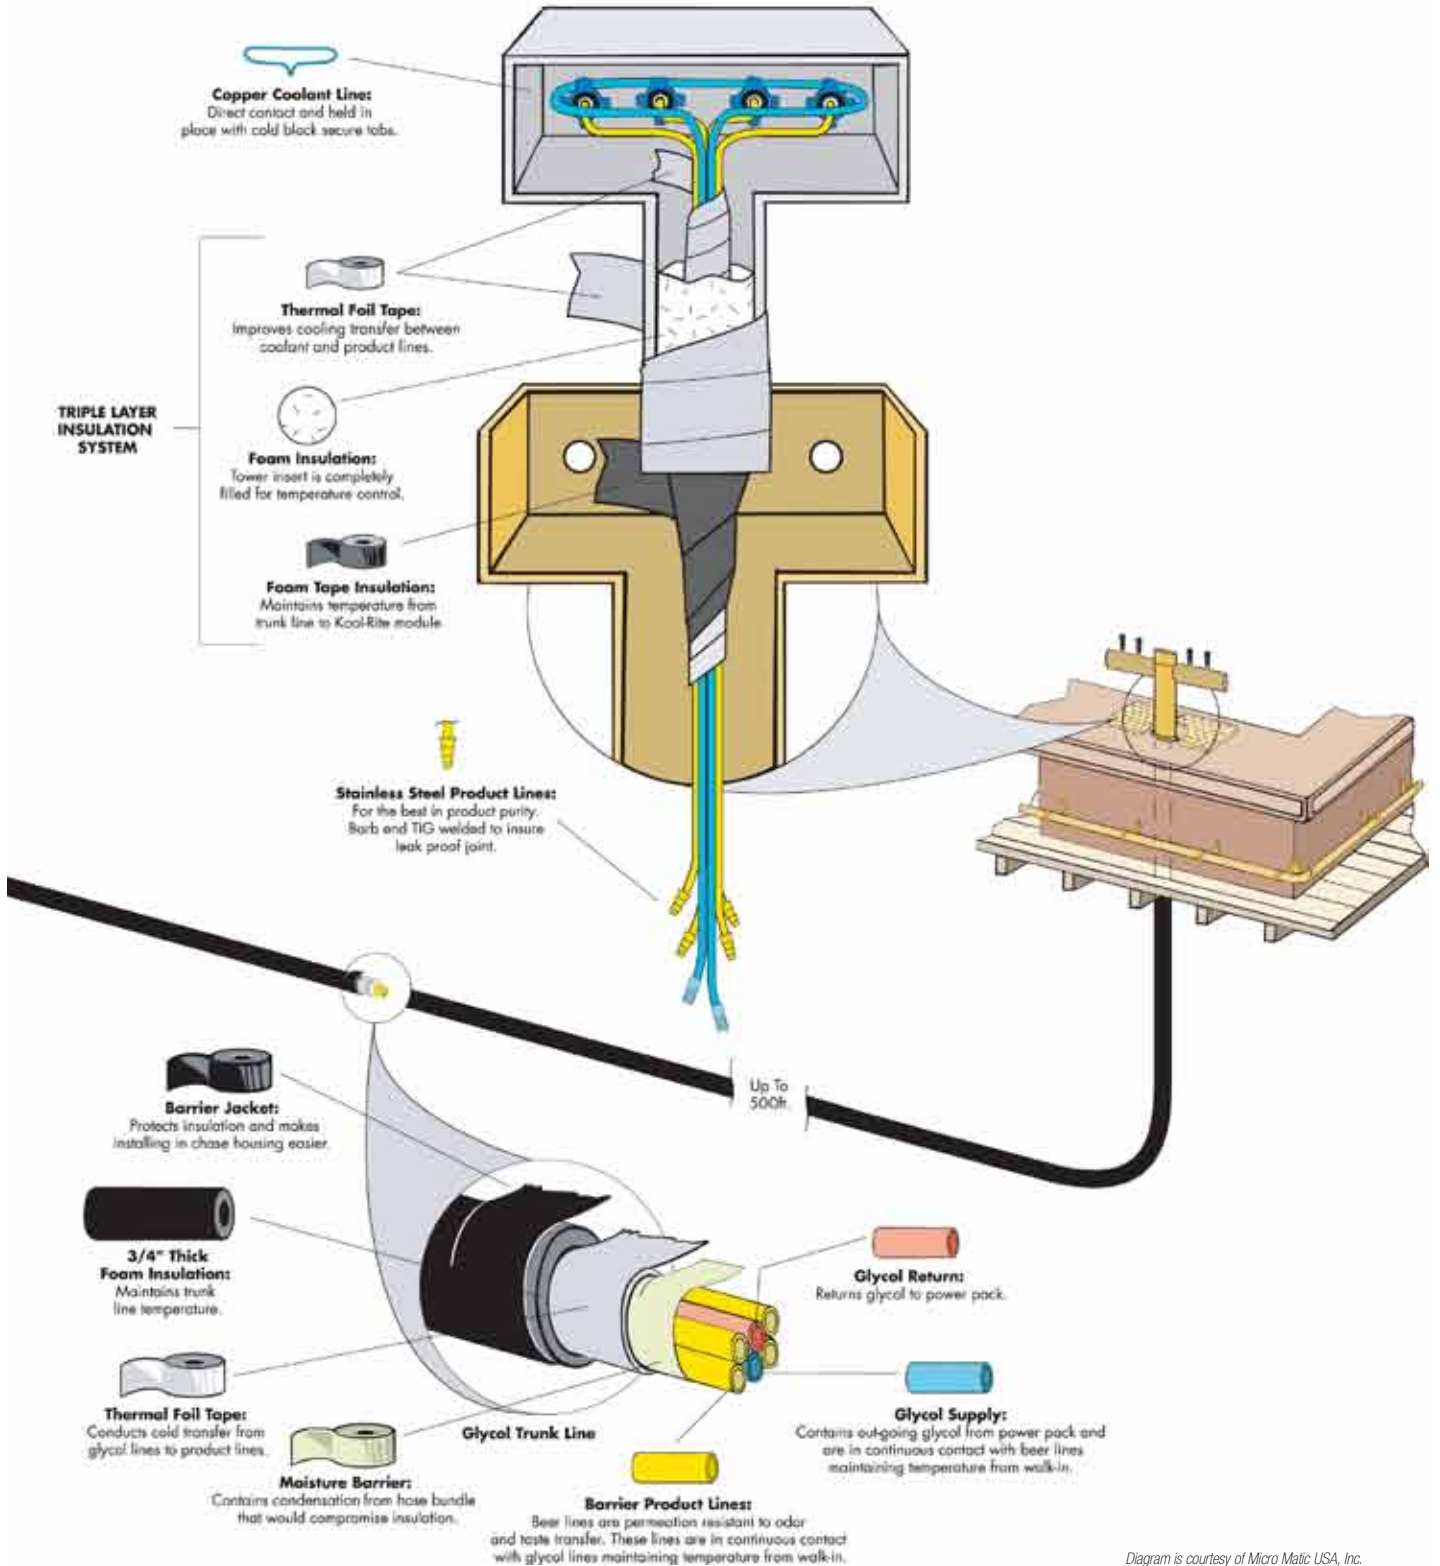

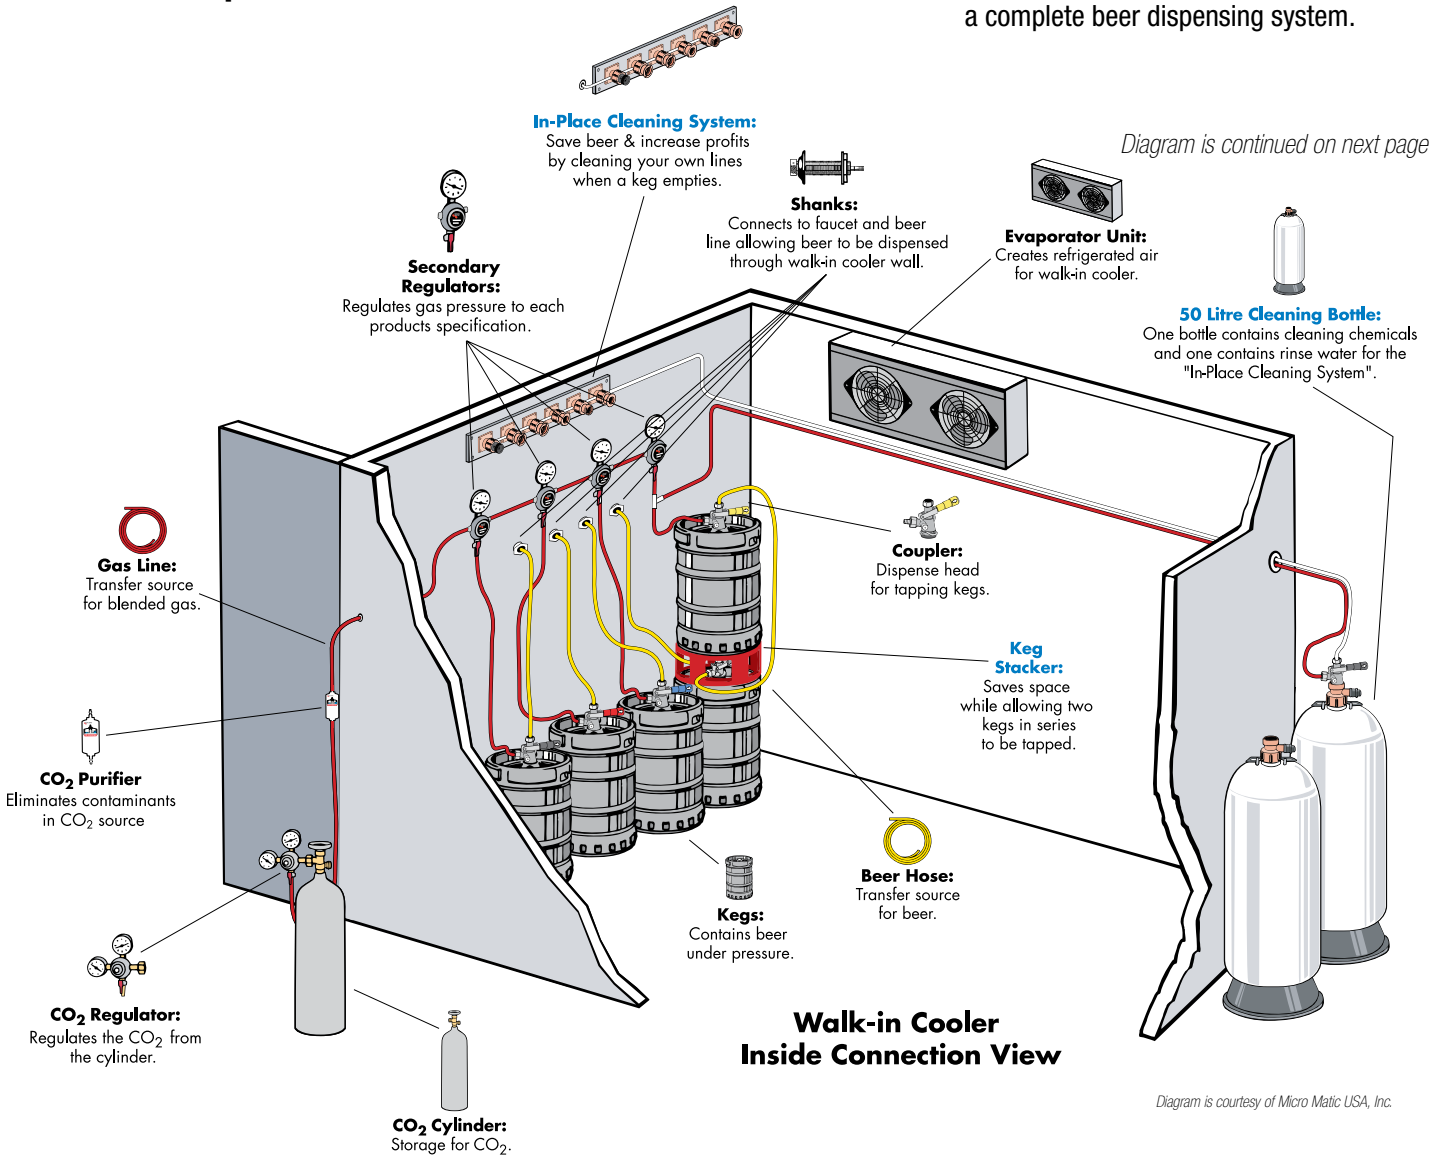

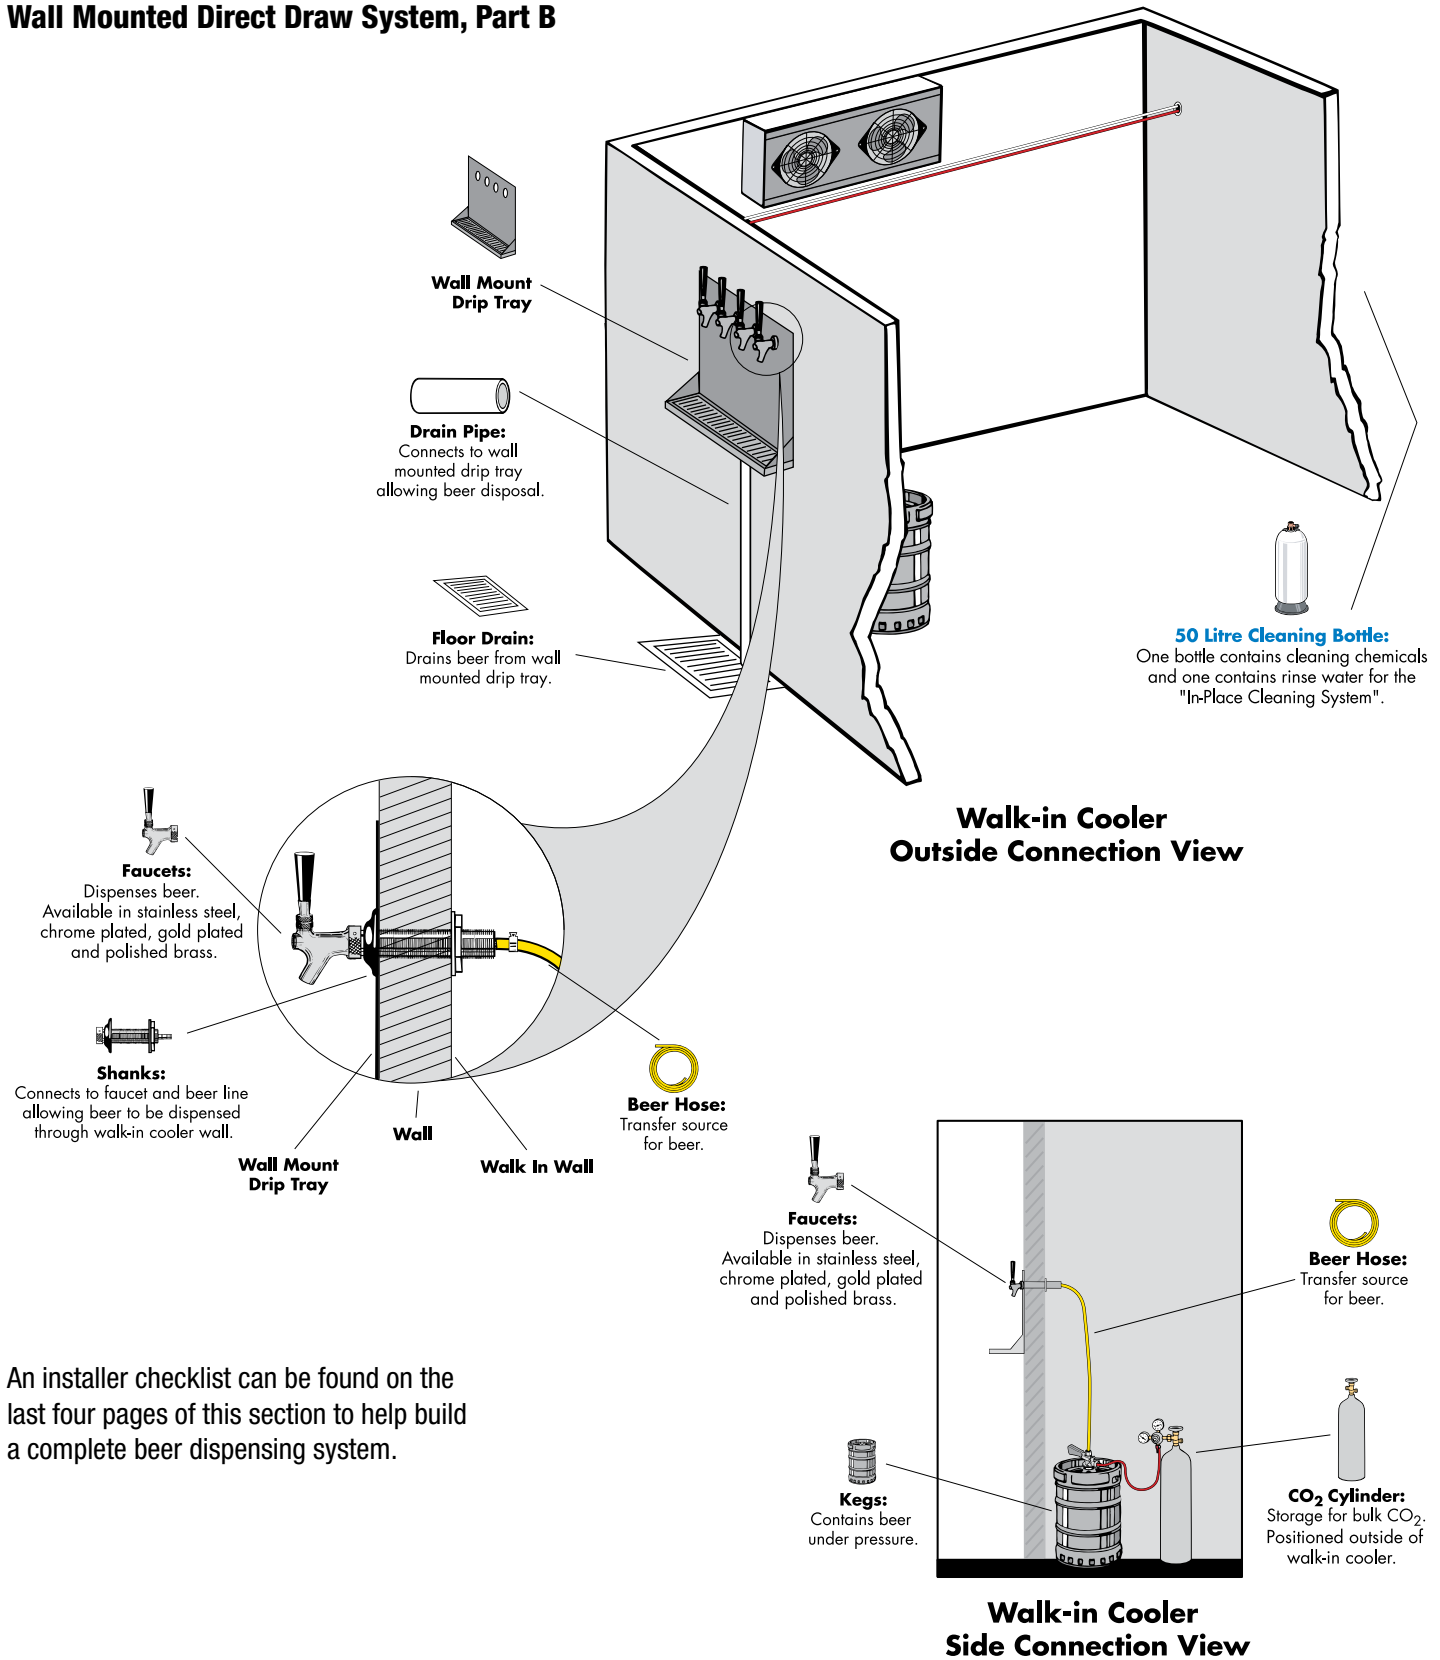

Copper Coolant Line:
Direct contact and held in place with cold block secure tabs.

TRIPLE LAYER INSULATION SYSTEM

Thermal Foil Tape:
Improves cooling transfer between coolant and product lines.

Foam Insulation:
Tower insert is completely filled for temperature control.

Foam Tape Insulation:
Maintains temperature from trunk line to Kool-Rite module.

Stainless Steel Product Lines:
For the best in product purity. Barb and TIG welded to insure leak proof joint.

Up To 500ft.

Barrier Jacket:
Protects insulation and makes installing in chase housing easier.

3/4" Thick Foam Insulation:
Maintains trunk line temperature.

Thermal Foil Tape:
Conducts cold transfer from glycol lines to product lines.

Moisture Barrier:
Contains condensation from hose bundle that would compromise insulation.

Glycol Trunk Line

Barrier Product Lines:
Beer lines are permeation resistant to odor and taste transfer. These lines are in continuous contact with glycol lines maintaining temperature from walk-in.

Glycol Return:
Returns glycol to power pack.

Glycol Supply:
Contains out-going glycol from power pack and are in continuous contact with beer lines maintaining temperature from walk-in.

Wall Mounted Direct Draw System, Part A
Back Room Components

An installer checklist can be found on the last four pages of this section to help build a complete beer dispensing system.

In-Place Cleaning System:
Save beer & increase profits by cleaning your own lines when a keg empties.

Shanks:
Connects to faucet and beer line allowing beer to be dispensed through walk-in cooler wall.

Evaporator Unit:
Creates refrigerated air for walk-in cooler.

Secondary Regulators:
Regulates gas pressure to each products specification.

50 Litre Cleaning Bottle:
One bottle contains cleaning chemicals and one contains rinse water for the "In-Place Cleaning System".

Gas Line:
Transfer source for blended gas.

Coupler:
Dispense head for tapping kegs.

Keg Stacker:
Saves space while allowing two kegs in series to be tapped.

CO_2 Purifier
Eliminates contaminants in CO_2 source

Beer Hose:
Transfer source for beer.

Kegs:
Contains beer under pressure.

CO_2 Regulator:
Regulates the CO_2 from the cylinder.

**Walk-in Cooler
Inside Connection View**

CO_2 Cylinder:
Storage for CO_2.

Lancer Breeze

Ice cooled beer dispenser requires no refrigeration and no electricity. It has a small footprint, can be placed on any countertop, front bar or back bar — ideal for small restaurants. Ice lasts for 8 hours depending on use. Casual drink temperature is 36°F. There are no moving parts. Uses a special tap to create creamy foam. 2 year warranty.

Requires a drain for the water from melted ice, CO_2 bottle, CO_2 regulator, keg coupler and hoses. Weight: 63 lbs. Ice capacity: 22 lbs.

Beer Systems, Bar Equipment

Under Bar and Wall Mount Dispensers

All dispensers have an attached drip tray. Air cooled under bar dispensers have a 3" OD brass tube 6" long attached to the bottom of the box for easy hook up to the flex pipe. Wall mount boxes are offset 1/2" from the top of the tray so when mounted the tray will be flush mounted to the wall.

8 and 10 faucet dispensers have 2 tubes for pass thru air flow. Box and drip tray are 16 gauge SS with attached 14 gauge SS bracket that wraps around and under the box. Faucets and 6' of tubing are included.

Part Number	Description
BB103614-03	Underbar 14" Space-Mizer dispenser 3 faucets air cooled
BB103614-03CK	Underbar 14" Space-Mizer dispenser 3 faucets glycol cooled
BB103614-04	Underbar 14" Space-Mizer dispenser 4 faucets air cooled

Faucet Parts and Accessories

Part #	Description
BB101342	Euro flow control adapter connects to std US shank
4332	Coupling nut with knurl for standard faucet
4350	Spanner wrench no grip
4350S	Spanner wrench with black grip
70104	Ball washer
70105	Knob lever collar, chrome plated
70106	Knob lever collar, gold plated
70107	Faucet O-ring (body gasket)
70108	Friction washer
70109	Chrome faucet coupling nut
70110	Valve shaft seat
70380	Spanner wrench with red handle
01-2953	Faucet coupling nut
4350S	Spanner wrench with black grip
4353N-1	Faucet coupling nut
70103-04	Shaft assembly with seat for faucet
70166-01	Friction bonnet
81-0681	C spanner Grundy
BB101254-25	Stout faucet creamer plate .25mm
BB101254-BD	Stout faucet diaphragm
BB101254DS	Stout faucet creamer plate .30mm
BB101254FS	Stout faucet flow straightener
BB101254OR	Stout faucet BS 013 O-ring
BB101259-KIT	Stout faucet nozzle kit
BB101725	Euro faucet wrench
BB101727	6 in 1 Perlick combination wrench
BB700405	Metal slide-on faucet lock
BB700407	Black faucet lock Celli (US)
BB700415	Perlick faucet lock
BB700420	Stout faucet lock - padlock not included
BF1000SC-Kit	Retro kit - convert standard faucet to self closing

Part #	Description
C109	Adapter to connect faucet and quick disconnect
C119	Chrome faucet coupling nut
C123	Wrench, faucet
C130	Faucet plug seals shank when faucet is removed
CP101550	Beer faucet spout plug, box of 100
C187	Wrench, faucet
C201.20	Faucet shaft assembly (CP brass)
C201.40	Faucet friction washer
C201.50	Faucet friction ring
C226	Beer faucet spout extension
C227	Beer faucet SS spout extension converts US faucet to European faucet
C230	Stainless steel faucet lever
C239	Wrap around faucet lock
C245	Brass faucet lever
C257.04	Stout faucet sliding cap
C257.05	Stout faucet O-ring 17 x 25 (sliding cap)
C257.14	Stout faucet O-ring 10 x 2 (for nozzle)
C257.15	Stout faucet jet disk (restrictor plate)
C257.16	Stout faucet regulation core
C284	Brass insert for plastic knobs
C419	Brass faucet coupling nut
CP101525	Faucet hygiene plug
C696	Tap handle bolt 1-1/2" long
D4740-W	Wrench set for draft towers, side and center access, 1-1/16 x 1"
FT8612	Wrench, probe and beer hex nut
M34	Faucet body back gasket

Drip Trays

Part Number	Description
Lancer Flooded Tower Stainless Steel Drip Trays - resin filled	
23-1586	Lancer tower drip tray 16" L x 14" D
23-1581	Lancer tower drip tray 21.5" L x 14" D
23-1582	Lancer tower drip tray 30" L x 14" D
23-1585	Lancer tower drip tray 35.5" L x 14" D
23-1587	Lancer tower drip tray 43.5" L x 14" D
23-1600	Lancer tower drip tray 55.5" L x 14" D
23-1601	Lancer tower drip tray 71.5" L x 14" D
Stainless Steel European Drip Trays - with drain, no tower hole	
BB700060	Euro drip tray 15.75" L x 15.75" D
BB700061	Euro drip tray 19.75" L x 15.75" D
BB700063	Euro drip tray 27.5" L x 15.75" D
Stainless Steel European Drip Trays - with drain, with tower hole	
BB700060-1	Euro drip tray 1 tower hole 15.75" x 1-3/16" x 15.75"
BB700060-2	Euro drip tray 2 tower holes 15.75" x 1-3/16" x 15.75"
BB700061-1	Euro drip tray 1 tower hole 19.75" x 1-3/16" x 15.75"
BB700061-2	Euro drip tray 2 tower holes 19.75" x 1-3/16" x 15.75"
BB700061-3	Euro drip tray 3 tower holes 19.75" x 1-3/16" x 15.75"
BB700063-1	Euro drip tray 1 tower hole 27.5" x 1-3/16" x 15.75"
BB700063-2	Euro drip tray 2 tower holes 27.5" x 1-3/16" x 15.75"
BB700063-3	Euro drip tray 3 tower holes 27.5" x 1-3/16" x 15.75"
Stainless Steel Countertop Drip Trays - 5.5" depth	
30-11592	Surface mount drip tray 8" L x 5.5" D x .75" H
30-11593	Surface mount drip tray 15" L x 5.5" D x .75" H
30-11594	Surface mount drip tray 24" L x 5.5" D x .75" H
30-11595	Surface mount drip tray 30" L x 5.5" D x .75" H
30-11596	Surface mount drip tray 36" L x 5.5" D x .75" H
30-11597	Surface mount drip tray 48" L x 5.5" D x .75" H
30-11598	Surface mount drip tray 60" L x 5.5" D x .75" H
Stainless Steel Countertop Drip Trays - 8" depth	
30-11599	Surface mount drip tray 8" L x 8" D x .75" H
30-11600	Surface mount drip tray 15" L x 8" D x .75" H
30-11601	Surface mount drip tray 24" L x 8" D x .75" H
30-11602	Surface mount drip tray 30" L x 8" D x .75" H
30-11603	Surface mount drip tray 36" L x 8" D x .75" H
30-11604	Surface mount drip tray 48" L x 8" D x .75" H
30-11605	Surface mount drip tray 60" L x 8" D x .75" H
Clamp-on Drip Trays	
BB701694	Clamp-on chrome plated tower bracket with 5 holes and drip tray
BB701695	Clamp-on chrome plated tower bracket with drip tray 1 hole
BB701701C	Chrome plated bracket with 10" drip tray for 2/3 faucet Euro tower
BB701702C	Chrome plated bracket w 10" drip tray, 5 holes for 3" column tower
30-11608	Clamp on tower base and drip tray

Other sizes, styles and finishes are available. If you don't find what you're looking for, please call customer service for assistance.
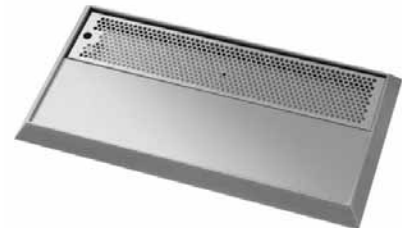

Flooded tower drip tray

Euro drip tray

European drip trays can be ordered with 1 to 4 tower holes, depending on the length of the tray.

Drip Trays

Part Number	Description
Stainless Steel Countertop Drip Trays with Plastic Insert	
BB700800	Stainless steel drip tray with plastic grid no drain 5-3/8" x 3/4" x 10-3/8"
BB700810	Stainless steel drip tray with plastic grid no drain 5-3/8" x 3/4" x 15"
BB700815	Stainless steel drip tray with plastic grid no drain 5-3/8" x 3/4" x 20"
BB700820	Stainless steel drip tray with plastic grid no drain 5-3/8" x 3/4" x 24"
BB701900	Stainless steel drip tray with plastic grid with drain 5-3/8" x 3/4" x 10-3/8"
BB701910	Stainless steel drip tray with plastic grid with drain 5-3/8" x 3/4" x 15"
BB701915	Stainless steel drip tray with plastic grid with drain 5-3/8" x 3/4" x 20"
BB701920	Stainless steel drip tray with plastic grid with drain 5-3/8" x 3/4" x 24"
Brass Countertop Drip Trays with Plastic Insert	
BB700800B	Brass drip tray with black plastic grid no drain 5-3/8" x 3/4" x 8"
BB700810B	Brass drip tray with black plastic grid no drain 5-3/8" x 3/4" x 15"
BB701900-BR-P	Brass drip tray with black plastic grid with drain 5-3/8" x 3/4" x 8"
BB701912-BR-P	Brass drip tray with black plastic grid with drain 5-3/8" x 3/4" x 15"
BB701920-BR-P	Brass drip tray with black plastic grid with drain 5-3/8" x 3/4" x 24"
Stainless Steel Countertop Drip Trays with Stainless Steel Insert	
BB700795	Stainless steel drip tray with SS insert no drain 5-3/8" x 3/4" x 5"
BB700802	Stainless steel drip tray with SS insert no drain 5-3/8" x 3/4" x 10-3/8"
BB700812	Stainless steel drip tray with SS insert no drain 5-3/8" x 3/4" x 15"
BB700817	Stainless steel drip tray with SS insert no drain 5-3/8" x 3/4" x 20"
BB700822	Stainless steel drip tray with SS insert no drain 5-3/8" x 3/4" x 24"
BB700832	Stainless steel drip tray with SS insert no drain 5-3/8" x 3/4" x 30"
BB701902	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 10-3/8"
BB701912	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 15"
BB701917	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 20"
BB701922	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 24"
BB701932	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 30-1/4"
BB701937	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 33"
BB701942	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 36"
BB701947	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 39"
BB701952	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 45-1/4"
BB701962	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 51"
BB701967	Stainless steel drip tray with SS insert with drain 5-3/8" x 3/4" x 57"
BB701312	Stainless steel drip tray with SS insert with drain 7" x 7/8" x 12"
BB701316	Stainless steel drip tray with SS insert with drain 7" x 7/8" x 16"

Drip Trays

Part Number	Description
Stainless Steel European Drip Trays - with rinser, no tower hole	
BB700070	Euro rinser drip tray 15.75" L x 15.75" D
BB700071	Euro rinser drip tray 19.75" L x 15.75" D
BB700072	Euro rinser drip tray 23.38" L x 15.75" D
BB700073	Euro rinser drip tray 27.5" L x 15.75" D
BB700076	Euro rinser drip tray 39.5" L x 15.75" D
BB700077	Euro rinser drip tray 46.88" L x 15.75" D
Stainless Steel European Drip Trays - with rinser, with tower hole(s)	
BB700070-1	Euro rinser drip tray 1 tower hole 15.75" x 1-3/16" x 15.75"
BB700070-2	Euro rinser drip tray 2 tower holes 15.75" x 1-3/16" x 15.75"
BB700071-1	Euro rinser drip tray 1 tower hole 19.75" x 1-3/16" x 15.75"
BB700071-2	Euro rinser drip tray 2 tower holes 19.75" x 1-3/16" x 15.75"
BB700071-3	Euro rinser drip tray 3 tower holes 19.75" x 1-3/16" x 15.75"
BB700072-1	Euro rinser drip tray 1 tower hole 23.38" x 1-3/16" x 15.75"
BB700073-1	Euro rinser drip tray 1 tower hole 27.5" x 1-3/16" x 15.75"
BB700073-2	Euro rinser drip tray 2 tower holes 27.5" x 1-3/16" x 15.75"
BB700073-3	Euro rinser drip tray 3 tower holes 27.5" x 1-3/16" x 15.75"
BB700073-4	Euro rinser drip tray 4 tower holes 27.5" x 1-3/16" x 15.75"
BB700076-1	Euro rinser drip tray 1 tower hole 39.5" x 1-3/16" x 15.75"
BB700076-2	Euro rinser drip tray 2 tower holes 39.5" x 1-3/16" x 15.75"
BB700076-3	Euro rinser drip tray 3 tower holes 39.5" x 1-3/16" x 15.75"
BB700076-4	Euro rinser drip tray 4 tower holes 39.5" x 1-3/16" x 15.75"
Stainless Steel Cut-out Drip Trays - with rinser and cut-out	
BB701110-SPRAY	4-1/2" cutout radius, side rinser, 7-1/2" x 7/8" x 15"
BB701125-SPRAY	6-1/4" cutout radius, side rinser, 9" x 7/8" x 18"
BB701150-SPRAY	8-1/4" cutout radius, side rinser, 10" x 7/8" x 19.75"
Stainless Steel Countertop Drip Trays - with rinser	
BB701890-SPRAY	Surface mount drip tray with center rinser 8" x 7/8" x 8"
BB701907-SPRAY	Surface mount drip tray with center rinser 7" x 7/8" x 12"
BB701916-SPRAY	Surface mount drip tray with center rinser 7" x 7/8" x 16"
BB701917-SPRAY	Surface mount drip tray with side rinser 7" x 7/8" x 20"
BB701922-SPRAY	Surface mount drip tray with side rinser 7" x 7/8" x 24"
BB701932-SPRAY	Surface mount drip tray with side rinser 7" x 7/8" x 30"
BB701942-SPRAY	Surface mount drip tray with side rinser 7" x 7/8" x 36"
BB701952-SPRAY	Surface mount drip tray with side rinser 7" x 7/8" x 45"
BB701962-SPRAY	Surface mount drip tray with side rinser 7" x 7/8" x 51"
Stainless Steel Undercountertop Drip Tray - with rinser	
BB101177	Undercounter mount with glass rinser
Rinser Assemblies	
BB101179	Glass rinser assembly

Lancer Glycol Chillers

The Siberian Elite can be located in ambient temperatures, allowing valuable walk-in space to be kept free for product storage. The Siberian Elite's improved technology reduces compressor cycle times by up to 15%, minimizing compressor wear, ensuring a longer life and energy savings. Easy access to the unit via the hinged, removable lid.

Features
- Rotationally molded inner and outer polyethylene tank offering long life and corrosion resistance
- Tank insulated with environmentally responsible, water blown non-CFC polyurethane insulation
- Air tight design of tank and lid, keeping condensation to a minimum to eliminate dilution of glycol solution
- Tank molded legs allow for easy cleaning under the unit once installed
- Easy installation and service
- Single phase power requirement (220V/60Hz) to operate both refrigeration and pump(s)
- IP56 Electrical connection
- Semi-submersible single phase pumps

Options
- Single or dual pump options available
- 60 gal/min or 120 gal/min pump as standard. Other options available. POA.
- Refrigeration capacities available in 1-3/4 HP and 2-1/4 HP @ 14oFSST
- Manifolds complete with back check valves
- Glycol percentage check kit (refractometer)

Polaris Beer Superchiller™ compact high performance design is an ideal option for smaller venues.

Features
- Designed to operate in high ambient conditions up to 104°F ambient
- Long lasting stainless steel construction
- Easy to install and service with its fully insulated and sealed tank, a removeable access panel, and fully insulated circulation pump
- On-board electronics will shut the unit down should it overheat, freeze up or develop a glycol leak
- Optional 6" castors

Polaris Beer Superchiller

Vin Service Glycol Power Packs

ABS offers a powerful tried and true line of Glycol Power Packs from Vin Service that are used the world over. From 35' to 250' you can always depend on our glycol power packs to offer outstanding performance for a cold pour every time.

Rest assured that the Glycol Power Pack line from ABS are ETL approved. This gives you piece of mind that our products have been independently tested and meet global safety standards.

EXTENDED WARRANTY - Ask your ABS sales rep about our 4 year compressor extended warranty.

The Flat is a great small power pack rated for 35' and perfect for the Craft Brewer who may only have one or two lines on tap. It's also the perfect deck for wine dispensing and icing towers.

The Super Flat is by far our best selling power pack. It's tough and affordable making it the right choice to fit your budget. You can also use the Super Flat for wine dispensing and icing towers.

The GD Series has established itself as the work horses out in the field. The removable lid makes it easily accessible for maintenance. Single and double pump options.

Lancer Chiller Plates

Flash chillers ensure your customers will receive an
ICE COLD beer, glass after glass. They reduce foam waste,
retain beer gases, increase customer satisfaction and profit.
Suitable for high and low volume, and cider. There are no
moving parts, no need for service, and can be installed in small
spaces in any position, or retro-fitted in an existing system.

316 grade stainless steel product coils and casing. Aluminum
cold plate. Temperature probe housing. 3/8" stainess steel
barbed beer connections. 1/2'' barbed glycol line connections.

Beer/Soda Centrifugal Chilling Pumps

Magnetically coupled and semisubmersible pumps for recirculating chilled water or water/glycol in beer coolers and carbonated water in soft drinks coolers. Produces heads up to 24m. Fluid temperature: -4˚ to +185˚ F.

HPR

Application: continuous recirculation of carbonated water, aggressive chemicals, chilled water, pure or precious liquids in high pressure systems

• Manufactured from food grade thermoplastics
• Magnetic coupling provides an energy efficient thermal shield, minimizing heat transfer to the pumped fluid
• Temperature stability and product purity ensured
• Leak free continuous operation, low condensation
• Nitrile 'O' rings standard, other materials available
• Zero maintenance, long life
• PPS pump head

GP

Application: cost effective high head, continuous low flow for the transfer and recirculation of water and glycol solutions

• Magnetic couplings provide an energy efficient thermal shield, minimising heat transfer to the pumped fluids
• Variable pump body orientation, IPX5 motor enclosure
• Adaptable mounting foot positions
• Compatible with standard fittings
• Deep groove ball bearings

SPC

Application: continuous operation in, chillers, coolers, vending and general water applications

• Low maintenance and long life
• Available with plugs and leads to suit application
• Agitator propeller fitted as standard
• SPC 51 is top mounted with keyhole mounting plate and has IPX4 motor housing

Propylene Glycol

Proplylene glycol is a colorless, odorless, biodegradable heat transfer liquid commonly used as an anti-freeze or coolant. The products on this page are non-toxic, food quality (not food grade*) and can be used in chillers, refrigeration and other mechanical systems where food is processed, but not where it will come in direct contact with food.

NEW!

Glycol Manifolds

Lancer glycol manifolds allow you to dispense one product to multiple faucets and are available in 2 - 4 outlet versions. Manifolds can be mounted inside or out of the walk in cooler on either Nycel or stainless steel backing boards.

- All 304 grade stainless steel construction
- Check valves fitted to prevent water siphon
- 1/2" barbed glycol supply and return lines
- Fully insulated, temperature resistant brackets
- Option: 1 or 2 pump supply
- Option: 2, 4, 6, 8, 10 and 12 point supply and return manifolds

Dual Core Wine Trunk Line

First trunk line in the wine industry with dedicated cooling lines for white wine, and separated by 1/2" insulation to two more lines for ambient controlled red wine. All lines are wrapped with mylar foil tape, 3/4" foam insulation and then covered by a durable taped protective jacket. FDA approved.

3/4" foam insulation

1/4" barrier tubing

Dedicated 3/8" cooling lines for white wine

NEW!
Part #	Description
BT040122	2+(2+2) dual core taped 1/4" ID x 3/4" OD barrier trunk line for wine
BT060133	3+(3+2) dual core taped 1/4" ID x 3/4" OD barrier trunk line for wine

Mylar foil tape

Durable taped jacket

1/2" insulation to separate lines between white and red wine

Glycol Power Pack Trunk Line

Use to connect glycol power pack to trunk line. Kit contains:
- 3/8" ID color coded glycol tubes (red + blue)
- Moisture barrier wrap
- Foil wrap
- 3/4" wall insulation

Part #	Description
BT020200	2 glycol lines, 3/4" insulation
BT020400	4 glycol lines, 3/4" insulation

Single Line Barrier Tubing

Bev-Seal Ultra® barrier tubing with Glas-Flex™ liner allows changeovers from even the most pungent flavors with simple flushing procedures. Dual-Barrier construction: flushable Glas-Flex™ inner liner is surrounded by a seamless extruded barrier layer in a coextruded polyolefin tube.

XX indicates the trace color and number to be imprinted: use 00 for unnumbered hose, 01=blue, 02=black, 03=red, 04=green, 05=yellow, 06=orange, 07=brown, 08=white, 09=pink, 10=purple, 11=blue, 12=black, 13=red, 14=green.

Bev-Seal Ultra
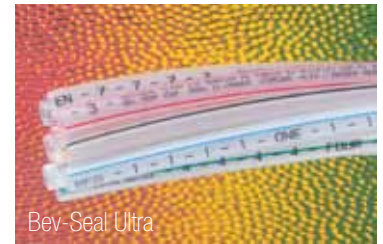

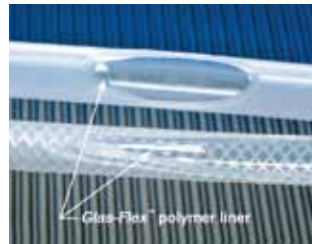

Part Number	Tube ID" x OD"	Std. Package	Clamp	Additional Information
235-05620-xx	3/16 x 5/16	500' spool	8.7	Glas-Flex liner
235-06620-xx	1/4 x 3/8	500' spool	10.0	Glas-Flex liner
235-07620-00	5/16 x 7/16	500' spool	11.3	Glas-Flex liner
235-08620-xx	3/8 x 1/2	500' spool	14.0	Glas-Flex liner
235-10620-xx	1/2 x 5/8	500' wrapped coil	17.0	Glas-Flex liner

Single Line Braided Barrier Hose

Bev-Seal Ultra

Bev-Seal Ultra® barrier tubing with Glas-Flex™ liner allows changeovers with simple flushing procedures. Dual-Barrier construction: flushable Glas-Flex™ inner liner is surrounded by a seamless extruded barrier layer in a polyolefin core tube, reinforced with polyester yarn and protected by a smooth EVA (ethylene vinyl acetate) cover. XX indicates the imprinted number (see above).

Part Number	Tube ID" x OD"	Std. Package	Clamp	Additional Information
175-04500-xx	1/4 x 7/16	500' boxed spool	11.3	Yarn reinforced
175-06300-xx	3/8 x 1/2	300' boxed spool	14.5	Yarn reinforced

Single Line Wire-Reinforced Braided Barrier Hose

Bev-Steel® Ultra barrier tubing with Glas-Flex™ liner allows changeovers from even the most pungent flavors with simple flushing procedures. All of the features of the Series 175 hose plus the superior protection and physical strength of a stainless steel wire mesh reinforcement layer. The wire mesh provides protection against rodent attack, while the Dual-Barrier construction prevents permeation of aromas that would attract rodents and other pests.

Bev-Steel Ultra

Beer Systems, Bar Equipment

Solid Color Single Line Braided Barrier Tubing

Reinforced Bevlex® Plus 180 hoses are ideal for pressure lines, while providing good kink resistance. They are recommended for use on filtered water and carbonated water lines where algae growth can be a concern, thus assuring good taste protection properties and pressure performance. Construction: Glas-Flex™ (PET) liner, polyester yarn reinforcement, opaque EVA blue/black (-BLU) or silver (-SIL) jacket.

Bevlex Plus 180

180-08300-SIL	1/2 x 3/4	300' boxed spool	19.8	Yarn reinforced

Braided Non-Barrier Polyethylene Hose

Bev-Flex® Series 172 polyester-reinforced polyethylene beverage hose provides low odor and taste, excellent stress crack resistance and exceptional flexibility. Polyester reinforcement provides pressure performance and kink-resistance exceeding that of simple tubing. Smooth EVA (ethylene vinyl acetate) cover.

Bev-Flex

Replace X with tracer yarn color: white (0), red (1) and blue (2).

Reinforced PVC CO$_2$ Vent Hose

Ideal for venting excess carbon dioxide gas from bulk storage systems. The core and jacket are a proprietary PVC blend that has excellent low temperature operating properties that resists cracking at -109°F (-78°C). Heavy walled construction resists crushing and kinking, providing ease of handling during use.

375 Series
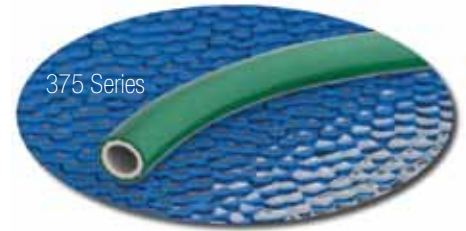

Part Number	Hose ID" x OD"	Std. Package	Clamp
375-08X300	1/2 x 3/4	300' coil	22.6

Barrier Protected UV Resistant CO$_2$ Supply Hoses

Bev-Seal® Series 176 barrier hose is ideal for pressure regulated CO$_2$ supply lines up to 300 PSI WP @ RT. It is recommended for supplying regulated CO$_2$ gas to carbonators. It provides excellent barrier protection from environmental contamination. In addition to the exclusive custom formulated outer jacket compounds, the cover jacket is co-extruded with a unique Duo-Ex white over black combination that provides the optimum in UV and weather resistance.

Part Number	Hose ID" x OD"	Std. Package	Clamp
176-04502-NCW	1/4 x 1/2	500' boxed spool	13.3
176-06302-NCW	3/8 x 9/16	300' boxed spool	15.7

Accuflex Beverage Transfer Products for Handling CO2

The following beverage hoses are approved for CO$_2$ transfer to beverage equipment.
- Bev-Flex® Series 172 polyester-reinforced polyethylene hose
- Bevlex® Series 170 polyester-reinforced polyethylene hose
- Bevlex® Plus 180 reinforced hose
- Bev-Seal Ultra® Series 175 barrier hose
- Bev-Steel® Ultra Series 178 wire-reinforced barrier hose
- CLEARBRAID® Series K3150 reinforced PVC hose

Colored PVC Drain / General Purpose Tubing

General purpose, industrial grade PVC tube provides lightweight flexibility, kink resistance and economy.

Sani-Clean AM™ Drain Tubing

Proprietary anti-microbial additive discourages fungal growth on the inner and outer surfaces. Translucent metallic gray color looks sanitary while allowing visual inspection while in service. Ideal for ice machines, dispensing equipment, condensate drains, and wherever protection from microorganisms is needed.

Sani-Clean

Part Number	Tube ID" x OD"	Std. Package	Clamp
218-0610x100	3/8 x 5/8	100' payout carton	17.0

218-1620x100	1 x 1-1/4	100' boxed carton	33.1

Tigerflex™ Drain Hose

Tigerflex has smooth bore flexible PVC to minimize internal flow restrictions, with rigid PVC helix reinforcement to provide exceptional kink resistance and a very tight bend radius for difficult installations. Tigerflex is generally used on ice maker and beverage dispenser drains.

Insulated Tigerflex is ideal for under-the-counter and fountain head areas because it keeps condensation from forming on the drain hose and then dripping on the floor. Antimicrobial insulation inhibits the growth of bacteria and other micro-organisms. Snug fitting insulation minimizes air entrapment beneath the insulation and condensation that might otherwise form. Insulated hoses are furnished in nominal 72" lengths.

Service Temperature: -4° to 150° F.

Tigerflex with anti-microbial insulation

Tigerflex without insulation

Part Number	Hose ID" x OD"	Std. Package	Clamp	Additional Information

NEW!

Line Labels and Clips

Line markers clamp onto tubing and identify each line, which helps prevent mistakes when connecting new pumps, tubing, and BIB boxes. Line marker decals have 5 decals per sheet: line marker, pump, rack and two Flojet end caps. Labels for all major soft drink and beer brands, Air, CO_2 Gas, Nitrogen, Carb Water, Soda Water, Water, and blank (create your own label) are available.

A complimentary Flavor Identification Label Packet is included with each new BIB rack! Each kit contains 10 line maker clips for the 3/8" BIB syrup inlet tubes, 1 line marker clip for the 1/4" braided CO_2 line and an assortment of 10 popular flavor label sheets.

Backflow Preventing TRU-GAP Kits NEW!

When you cannot connect directly to your drain system and need to allow proper air gap, Tru-Gap is the perfect solution. It's designed for draining beverage dispensers, ice maker, filtration system and many other uses.

- Multiple installation configurations for different applications
- Can be connected by solvent weld glue to standard 2" PVC pipe
- Optional PVC reducer fittings can be adapted to smaller or larger piping easily
- Includes built in hook for floor grates & drains
- Helps prevents backed-up and potentially contaminated water from entering your system
- Ideal for a number of applications such as dish washers, beverage machines, eye-wash stations, ice machines, filtration systems, buffet tables, and many more applications
- Included pipe mount secures pipes and prevents them from wobbling or sagging also provides a clean and professional appearance
- Tested and fully compliant to the ASTM D2665-07 standard

Drain body and tubing support mount are (PVC) ASTM D2665, hardware is stainless steel.

Installation: TRU-GAP can be connected by solvent weld to a standard 2" PVC DWV pipe, and with PVC reducer fittings can be adapted to smaller or larger piping.

Beer Systems, Bar Equipment
Mark 4 Post-Mix Bar Guns

Wunder-Bar Mark 4 bar guns have the following features for ease of service and greater reliability.

- Locking hat plugs allow for service to one valve cavity at a time. Plugs stay put, even under pressure.

- Optional shut-off screw extensions allow the shut-off screws to be turned off/on with finger and thumb. Includes cover guard. Order with or without this feature.

Cover guard removed   Cover guard in place

- Manifold end of flex-hose assembly now includes a welded stainless steel bushing, not plastic. Optional barrier tubing prevents flavor cross-over from pungent beverage syrups.

- Replace stem seal O-ring from the top of the handle, not the bottom, even under pressure. Retainer plate is removed, then O-ring.

- New shut-off screw includes soft-tip for positive shut-off

  Black and white shut-off screws should be finger tightened only - **Tools may cause damage -** Turning screws past the "On" and "Off" positions may cause damage to the input module and cause leaking

Old   New

- All handle heels now include split heel design.

14 button

12 button

10 button

- NEW Kwik Klip stays put. Won't pull out.

Old
New

- Sanitary drip tray design catches any nozzle drip and provides sanitary air-gap from nozzle. Nozzle stays clean. New drip tray is NSF listed.

Mark 4 Bar Guns

The Wunder-Bar Mechanical Flex-Hose bar dispenser is available in 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, and 14 button models. All models can be configured for many combinations of carbonated, non-carbonated, non-carbonated pre-mix and energy drink products at any time. All of these combinations are field-convertible and
can be modified without shutting off the dispenser. All seven, eight, and nine button dispensers have all the necessary valves and product tubes already installed into the dispenser, making the upgrade to up to ten buttons as easy as adding buttons on the handle and input modules and input fittings at the manifold.

Bar guns are available with permanent connections, quick disconnect or flow-regulated manifolds, optional barrier tubing, and in five colors. These units are field convertible from carbonated to non-carbonated and wine. Precision machined diffusers provide better carbonation, minimal brix stratification, faster flow rate and minimal foaming.

All Wunder-Bar post-mix type flex-hose dispensers include two water meter adjustment screws which allow 2:1 ratio products to be brixed independently from 4:1 or 5:1 ratios. No more sacrificing flow rates to obtain a 2:1 brix!

Bar guns include quick disconnect manifold, stainless steel input fittings, hose hanger and mounting hardware.

Buttons and Butterfly Plates

The buttons and button plates can be removed while the dispenser is under pressure. After the button plate has been removed, buttons can be changed, as can the configuration of the dispenser. By removing the butterfly retainer and screws and lifting out the butterfly plates, various standard configurations and endless special configurations can be created. The butterfly plates' balls fit into indentations in the O-ring retainers located in the handle recess. The half moon cut out area of the butterfly plates are where the retainer and retainer screws are located when attaching the plates to the handle. When replacing butterfly plates, be careful not to overtighten the retainer screws.
Over-tightening the retainer screws can cause the butterfly plates to bind.

Butterfly plate configurations are detailed in the Replacement Parts section of this catalog.

Mark 4 Bar Guns

MARK 4 dispenser model numbers will begin with the M4 designation, followed by a dash. There will be no more dashes, unless the model includes NSF designation.

For example, an M410620KSM3 is a... MARK4, 10 button, 6 carbonated, 2 non-carbonated, zero pre-mix non-carbonated, black(K), Series 2.5 (S), metering screw manifold (M), 3 ft. hose length.

The following charts explain model numbers. Underlined letters must be filled in with the desired options...

The model number will not be affected if shut-off screw extensions are requested. Upon request they are included at no charge.

4 barrier lines are standard. Upon request 8 barrier lines are available at no cost, and are not part of the model number.

New dispensers ordered without instructions will include the new sanitary drip tray and hanger. However, old style drip cups and hangers are available upon request at no cost, and are not reflected in the model number.

Post-Mix and Energy Drink Dispensers Model Numbers

M4	a	b	c	d	e	f	g	h	(N)
Mark **4** dispenser	Total # of buttons	Number of carbonated products	Number of non-carb products	Number of pre-mix non-carb products	Color: **K**= Black **R**= Red **B**= Blue **G**= Green **C**= Cabana blue	Type: **S**= std 2.5 **2**= Series II **3**= Series III (large soda/ water tubing)	Manifold: **M**=metering screws **F**= flow reg. **FM**=flow reg + metering screws	Hose length: **3**= 3 ft. **4**= 4 ft. **5**= 5 ft. **6**= 6 ft.	Applies to NSF listed only (with plastic sheathing)

Post-Mix Juice Dispensers* Model Numbers

| M4	a	JD	e	f	h	(N)
Mark **4** dispenser	Total # of buttons	**J**uice **D**ispenser	Color: **K**= Black **R**= Red **B**= Blue **G**= Green **C**= Cabana blue	Type: **S**= std 2.5 **2**= Series II **3**= Series III (large tubing)	Hose length: **3**= 3 ft. **4**= 4 ft. **5**= 5 ft. **6**= 6 ft.	Applies to NSF listed only (with plastic sheathing)

*Juice dispensers are only available with metering screws.

Please Note:

Mark 4 standard input module clip inserts should always be installed and kept in place on both sides of the Mark 4 standard input modules (input fitting and interconnect sides) **when the dispenser is under pressure**. (See fig. 1) These yellow clips ensure that the input module doesn't dislodge from the module frame. The clips should only be removed when servicing the manifold once the product (soda, water or syrup) has been depressurized or removed from the manifold position.

Fig.1

Also, it is important when mounting the dispenser that the manifold and the tube collector be mounted flush against the mounting surface using the (4) PM10-66 #10x2" that are provided with every dispenser in the hose hanger kit.

90° manifold block assemblies are available to assist in areas where tubing attachment or manifold/tube collector placement is difficult due to space constraints.

WBM-2-PMX-FF	2 button fast flow dispenser premix

Hose lengths - 36" standard. 48", 56", 60", 72" and 84" available optional upcharge

Add an "S" to the end of the part number to include an ice/cold plate shield on a pre-mix dispenser. Wine guns dispense bag-in-box wine. All fast flow dispensers are for non-carbonated products. Four barrier lines per gun is standard. Other configurations are available. Please contact your ABS representative if you don't find what you're seeking.

Wunder-Bar's Refurbishing Program

Effective January 1, 2014, Wunder-Bar has implemented a new program for all rebuilt/ warranty Wunder-Bar dispensers.

Wunder-Bar now offers a 4-year warranty on all new bar guns and a 1-year warranty against defective parts and workmanship on remanufactured bar guns. The repair program is offered for bar guns less than 8 years old. To find the age of your bar gun check the serial number.

Explanation of serial numbers:
Example: Serial # 01410-1052
- First two numbers (01) represent the month
- Third number (4) represents the week of the month
- Fourth and fifth numbers (10) represent the year
- Last four numbers (1052) represent the lot number

Procedure:
Contact ABS Customer Service Department to obtain a Return Material Authorization (RMA). The following information is required to process the RMA request:
- Quantity of bar guns for repair
- Number of buttons on bar gun
- Flex hose only or Flex hose with fittings and hose hanger kit
- Type of dispenser - Postmix/Juice/Premix/Wine/Energy/Fast flow (premix or postmix type)

Repair requests will be process through ABS and the customer is responsible for all freight charges. All repairs are completed by Wunder-Bar using factory authorized parts. All available upgrades will be made to deliver the best product in the industry.

LS-2123-100	Leg stand, 100 lb	21 x 23 x 15.25

Cold Plates

Cold plates are placed in an ice bin. Ice chills the cold plate which chills beverages as they pass through the circuits in the cold plate before being dispensed by a bar gun. All cold plates include 5/16" MFL x 1/4" barbed fittings for each circuit, and can be special ordered with different fittings. Other sizes are available. **Designate Pre- or Post-mix when ordering.**

Special Events Dispensing and Custom Branded Displays

Lancer's Multifill Beer System is capable of pouring up to 1,800 beers in an hour, and can meet the demands of high traffic, high capacity situations in any venue. Can be manufactured for LEFT or RIGHT hand entry of beer and glycol lines. Cup size is pre-programmed during manufacture. Standard cup size is 15 oz.

- Reduces waiting queues in peak periods
- Metered dispense via electronic flow meters gives accurate dispense regardless of pressure
- Massive reduction in waste
- Available with chillerplate or icebank
- Manufactured to suit individual venues
- Available as bench mounted or mobile units
- Quick & easy installation – saves on installation costs
- Proven reliability in use in Australia and New Zealand's premier sporting, concert and event centres

The MobiChill 50 beer cooler/flash chiller is designed for professional cooling, tapping and dispensing of chilled beer, both for home use and for outdoor parties or functions. Stainless steel product coil 5/16" OD. 115V/60Hz. R314a coolant.

- Built in air compressor means NO CO_2 and NO ice required
- Includes a drip tray and an adjustable temperature control with 7 different settings
- Chills within 2-4 minutes, pours 25-35 pints per hour
- Continuous cooling output: 4-7 gal/hr

Beer Systems, Bar Equipment

Exactap Mobile System with Tower

Only EXACTAP delivers revolutionary dispense speed with precision control. The patented exactap 'active-compensator' tap technology results in unprecedented dispense speed (0.5 L in under 3 seconds) and singular control and data collection features resulting in a perfect pour every time!

- Faster pours mean more transactions, 20%-55% increased beer sales
- Increased keg yield, 8%-24% more servings from every keg
- Eliminates pre-pouring, up to 67% reduction in labor
- Programmable in-glass presentation with digital foam control
- Metered dispense, UK weights and measures approved
- Data storage/retrieval, inventory control and management
- POS system integration
- Smart System Diagnostics
- On-Top LCD interface

Beer Systems, Bar Equipment

Refrigerator Conversion Kits

Enjoy cold, fresh draft beer at home and save money too! A glass of draft beer is about half the cost of cans or bottles. Our Kegerator Kits are ideal for the home bar, patio, college activities or custom installations. The kits make an excellent alternative to the more expensive Keg Refrigerator or Kegerators.

Door Mount Conversion Kits provide straight-forward beer dispensing: beer shank and faucet is mounted over or through faucet drip tray directly into the door of a refrigerated cabinet or the wall of a cold room. For wall mounted installations, keep wall thickness to a minimum so that the shank does not warm up in the un-insulated space. Mounting the shank and beer faucet on the door of a refrigerator typically ensures adequate cooling for beer in the beer line.

RCK-SG

Cleaning kits and cleaners are shown on pages 109-114

Part Number	Description
RCK-LC-S	Standard Kit: chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, dual gauge CO_2, durable 6" x 4" stainless steel drip tray with 2" tall backsplash without drain, instructions
RCK-LC-SG	Premium Kit: chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, dual gauge CO_2, stainless steel 6" x 6" x 11" high backsplash with 1 hole, 1 qt cleaning bottle, faucet attachment, faucet wrench, faucet brush, 4 oz line cleaner, instructions
RCK-LC-V	Value Kit: chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, single gauge CO_2, instructions
RCK-S	Standard Kit: chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, dual gauge CO_2, durable 6" x 4" stainless steel drip tray with 2" tall backsplash and no drain (no hassle with drain hoses and bottles), the backsplash has keyhole shaped mounting holes that allow easy removal for cleaning, 5# aluminum CO_2 cylinder, instructions
RCK-SG	Premium Kit: chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, dual gauge CO_2, stainless steel 6" x 6" x 11" high backsplash with 1 hole, 1 qt cleaning bottle, faucet attachment, faucet wrench, faucet brush, 4 oz line cleaner, 5# aluminum CO_2 cylinder, instructions
RCK-V	Value Kit: chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, single gauge CO_2, 5# aluminum CO_2 cylinder, instructions
RK-1	Basic Kit: chrome faucet, faucet knob, brass shank, door spacer, hoses with fittings, instructions
RK-1S	Basic Kit: SS faucet, faucet knob, SS shank, door spacer, hoses with fittings, instructions
RK-SU	Basic Refrigerator Conversion Kit:, chrome faucet, faucet knob, shank, door spacer, hoses with fittings, D System for North American beers, instructions

BB702603	Keg storage stacker
BB702604	Keg dolly
BB702710	20L insulated keg jacket
BB702718	58L insulated keg jacket
BB702785	Insulated keg wrap, long enough to wrap 4-58L kegs
C785	Keg cooler jacket, canvas

FOB Stop/Foam On Beer Detector

A FOB stop prevents unwanted foam when a new keg is tapped, and keeps the line primed when the keg empties. It eliminates waste, provides better beer presentation, reduces microbiological contamination, and saves time in keg changes. The FOB-Stop can be mounted directly on a keg coupler or on a wall mount bracket.

Part Number	Description
MP551025	Plastic FOB
MP551028	Stainless steel FOB
MP551035	TruPour SS FOB detector, 3/8" barb fittings
MP551050	Tecflo Classic FOB detector

Beer and Wine Pumps

Whether installed on a long or short draw system, beer pumps are a cost effective means of moving beer. They also increase the pressure in the product line which prevents the gas in the beer from breaking out, thus preserving the quality of the drink.

LF521402

166-257-16
average lifespan
35,000 gallons

FSP0002A

FRV0001A flow reversal valve fits into a Flojet G56 beer pump allowing beer line cleaners to run cleaning solution in both directions. Running solution in alternating directions enhances cleaning efficiency.

G56-1202E   FRV0001A

Part Number	Description
G56-1202E	Flojet air/CO_2 driven beer pump, straight outlet, 5 gpm flow rate, ave. lifetime 70,000 gallons
G56-1162	Flojet air/CO_2 driven beer pump, elbow outlet, 5 gpm flow rate, ave. lifetime 70,000 gallons
FRV0001A	Flow reversal valve for G56 beer pump
166-257-00	SHURflo Beer Ace II, air/CO2 driven beer pump, no fittings
166-257-16	SHURflo Beer Ace II, air/CO_2 driven beer pump, 3/8" plastic barb liquid ports,1/4" plastic barb elbow gas inlet w check valve
166-257-32	SHURflo Beer Ace II, air/CO2 driven beer pump, 3/8" plastic barb liquid in, 3/8" John Guest adapter liquid out, 5/16" straight John Guest adapter with check valve gas inlet, 1/4" plastic barb elbow gas outlet
166-257-37	SHURflo Beer Ace II, air/CO2 driven beer pump, 1/2" plastic barb elbow liquid in, 3/8" straight plastic barb liquid out, 3/8" straight plastic no check valve gas inlet
166-257-39	SHURflo Beer Ace II, air/CO2 driven beer pump, 3/8" SS barb elbow liquid in, 3/8" SS barb elbow liquid out, 3/8" plastic elbow with check valve gas inlet, 1/4" plastic barb elbow gas outlet
166-257-40	SHURflo Beer Ace II, air/CO2 driven beer pump, 3/8" SS barb elbow liquid in, 3/8" SS straight barb liquid out, 3/8" plastic barb elbow with check valve gas inlet
166-257-41	SHURflo Beer Ace II, air/CO2 driven beer pump, 3/8" SS barb elbow liquid in, 3/8" SS barb elbow liquid out, 1/4" plastic elbow with check valve gas inlet, 1/4" plastic barb elbow gas outlet
FSP0002A	Flojet beer and wine bag-in-box pump, electric, If inlet exceeds 30 PSI pump requires 30 PSI water pressure regulator
LF521402	Flojet high speed motor, electric, 40 psi switch
LF521002	Flojet high speed motor, electric, no switch
LF521B02	Flojet high speed motor, electric, 40 psi switch, comes with 3/8" (9.5 mm) John Guest port fitting

Flow Meters

Flow meters enable you to measure the amount of beer poured and compare it to the amount of beer your staff served in the sales report to detect waste or theft. The inline Flowmeter is to be used with a flow monitor.

Part Number	Description
MP551060	Inline flow control 5/16" OD
FM200215	Inline Flowmeter turbine 3/16" bore
FM200222	2-line flow monitor
FM200244	4-line flow monitor
FM200288	16-line flow monitor

MP551060   FM200215   FM200222

97-0212	8' x 4' x 3/8"	Equip. mounting board, white PVC

Flooded beer manifolds are shown on page 102

CO$_2$ Regulators

740 Series regulators have a polycarbonate bonnet that won't chip, break or fade. The non-adjustable "shut-down" safety can't be removed or easily circumvented. If the regulator seat fails the safety will respond instantly, isolating the product container from potentially dangerous high pressure. The product container pressure will not exceed the factory set blow-off of 55-65 PSI.

High pressure ports have left-hand female threads to prevent their use as a lo-pressure outlet... (If replacement parts are required, contact factory). The non-removable adjusting screw will never exceed 50 PSI. An internal relief valve opens whenever delivery pressure exceeds set pressure by 15 PSI. This feature serves as a warning that the seat or diaphragm may be worn or damaged and should be replaced. Seat assembly is easily replaceable in-field... no need to remove regulator from tank.

A sintered metal flow control filter in the inlet nipple prevents dirt and other particles from damaging internal parts. Permanent quad-ring seal on the inlet nipple eliminates a source of leaks, and there's no need to use a new fiber washer each time tank is changed.

The ball-type check valve helps prevent product back-up into the regulator. Hose barb end designed for use with 5/16" ID pressure tubing.

HP regulators are LH thread. LP regulators are RH thread unless otherwise specified.

DraftMore Beer Regulators

Reduce beer foaming, reduce waste and maximize earnings from each keg of beer with DraftMore beer regulators. It makes sure that the pressure in the keg is correct according to the temperature of the beer. That means the beer will foam with a regular consistency and makes it possible to get the last drops of beer out of the keg. With a DraftMore you will serve a perfect draft beer every time!

Beer tap

Perfect!

CO2

Part Number	Description
3010	DraftMore beer regulator, auto adjusting for Bass ale, Boulder beers, Firestone Walker
3020	DraftMore beer regulator, 2.5-2.6 carb level, auto adjusting reg for most American ales, American craft ales and most European lagers
3030	DraftMore beer regulator, 2.7-2.8 carb level, auto adjusting reg for most American brewery beers

More Carbonation Testers and parts are located in Water Systems on page E-7.

Part Number	Description
7000-3A	3' High pressure hose assembly
7000-6A	6' High pressure hose assembly
7000-9A	9' High pressure hose assembly
3740-2PA	Bonnet, black, 3000 series
7700-6T	Replacement diaphragm assembly, new style
7700-3C	Replacement seat assembly, new style
600GPS	Gauge boot protector
03S07100	C133 Gorman gauge protector
RK1000-0051	Gauge guard, single body regulator
440-4PN	Guide nut tool
63	Fiber CO_2 washer
63NY	Nylon CO_2 flare washer
20W1005H02L30#	Gauge, 30 # PSIG RH thread
20W1005H02L60#	Gauge, 60 # PSIG RH thread
20W1005H02L100#	Gauge, 100 # PSIG RH thread
20W1005H02L160#	Gauge, 160 # PSIG RH thread
20W1005H02L300#	Gauge, 300 # PSIG RH thread
6603-2000	Gauge, 2000 # PSIG LH thread
5603	Gauge, 3000 # PSIG RH thread
6603	Gauge, 3000 # PSIG LH thread
440-18	Wrench, CO_2 regulator, Taprite zinc bonnet
440-19	Wrench, CO_2 regulator, Taprite poly bonnet
22-0016	Wrench, CO_2 regulator, Lancer
08-1080-00	Regulator mounting bracket for louvered rack
5201738506212	Lock washer for regulator bracket
1690-3S	Hex bolt
1690-2N-1	SS bracket for regulator mounting
REGMT-24	Regulator mount, 24", galvanized steel
PT1000	CO_2 pressure tester
2701-BCT	Beer carbonation tester with protective case
RBH-32	Economy Refractometer
440-12	Brass CO_2 inlet nipple RH thread
440-17Q	Inlet nipple quad ring
440-17R	O-ring for CO_2 nipple
740-12	CO_2 inlet nipple, O-ring seal, left hand
740-12N	Nitrogen inlet nipple 1/4" MPT left hand thread
740-13N	Nitrogen tank nut, male thread
740-16	MPT plug, 1/4" LH thread
740-19	Replacement CO_2 nut and nipple assy, LH
5460	Forged Y, (2) 1/4 FPT x 1/4 MPT
5232B	Brass cap, 1/4" SAE
1000730	Brass CO_2 nut, CGA 320
JO-11N	Regulator fitting RH thread
C296	CO_2 to nitrogen adapter
C295	Nitrogen to CO_2 adapter

Regulator Parts and Accessories

Part Number	Description
6600	Shutoff outlet for BIB, no check, 1/4" SAE male
6600C	Shutoff outlet for BIB, with check, 1/4" SAE male
CO882015	Barbed shutoff, 1/4"
CO882020	Barbed shutoff, 5/16"
CO882029	Barbed shutoff, 5/16"
CO882028	Barbed shutoff with check valve, 5/16"
8100B	Brass shutoff, 1/4 MPT x 5/16 barb, w check valve
8101B	Brass shutoff, 1/4 MPT x 5/16 barb, no check valve
8120B	Brass shutoff, 1/4 MPT x 1/4 barb, w check valve
8121B	Brass shutoff, 1/4 MPT x 1/4 barb, no check valve
8160B	Brass shutoff, 1/4 MPT x 3/8 barb, w check valve
8161B	Brass shutoff, 1/4 MPT x 3/8 barb, no check valve
5153B	Inlet fitting for secondary reg., 1/4" MPT x 1/4" SAE
5436	Outlet fitting with check valve, S 1/4" AE male
5436H	Outlet fitting with check valve, 1/4" hose barb
617BN	Brass 5/16" barb x 1/4" MPT fitting
431-P44	Fitting, 1/4" MFL, 1/4" MPT, ball check w adaptor
618L	Brass nipple 1/4 RH MPT x 1/4 LH MPT
08-0564	1/4" gas hose blue self store
08-0578	1/4" gas hose yellow self store
ST-B78C12-12F	78 series coupler with wing-nut for bulk CO_2
CO2RS-C	Cornelius 160 lb CO_2 tank mount regulator, changeover valve, bulk system gauge with manifold check valve and shutoff

CO_2 Tank Outside Storage Cabinet

Cabinet provides tank security and improved appearance. Accommodates all sizes of Chart Beverage outdoor tanks.

Features:
- 60% open surface for cross ventilation
- 2 hinged lockable doors
- Port accommodates 2" conduit connections
- Tabs for bolting unit to concrete
- Removable roof panel protects against harsh weather
- Rustproof aluminum construction
- Powder coated gray primer is ready to paint
- Options: fill valve to fill box connection, vent kit to direct discharge to the floor

Cabinet comes un-assembled in an easy-to-ship package preventing damage in transit. Can be assembled on site in about an hour using screwdriver and small adjustable wrench. 32.6"W x 32.6"D x 76.5"H

Part Number	Description
20604733	CO2 tank outside storage cabinet

Tank cabinet

CO$_2$ Cylinders

Catalina seamless aluminum alloy compressed gas cylinders are manufactured in accordance with U.S. DOT 3AL and TC 3ALM requirements and are stamped with required U.S. Department of Transportation (DOT) and Transport Canada (TC) Markings. Every cylinder is inspected and tested by a DOT and TC authorized independent inspection agency. Service pressure: 1800 psi / 124 bar.

Part Number	Description
B5	5 lb. / 2.3 kgs. cylinder, Catalina
B10	10 lb. / 4.5 kgs. cylinder, Catalina
B20	20 lb. / 9.1 kgs. cylinder, Catalina
B35	35 lb. / 15.9 kgs. cylinder, Catalina
B50	50 lb. / 22.7 kgs. cylinder, Catalina
CGA-320	Replacement valve

CO$_2$ Cylinder Parts and Accessories

Part Number	Description
H1BK	Carrying handle black, Catalina
H1RD	Carrying handle red, Catalina

Infinity™ Auto Changeover with EasyLink™ Telemetry

The Infinity™ Auto Changeover senses a depleted cylinder and automatically switches to the reserve cylinder. Within moments of the changeover, the supplier will receive an email or text notification via the EasyLink™ Telemetry system.

Features

- Remote monitoring of cylinder changeover
- Priority Select™ feature allows service personnel to designate which cylinder is considered primary
- Complete system includes automatic changeover, hoses and telemetry unit
- Installation is quick and simple

Benefits to Suppliers

- Eliminates emergency calls
- Requires no location involvement
- Increases customer loyalty
- Optimizes route planning

Benefits to Customers

- Ensures a continuous supply of gas
- Eliminates the need to change cylinders
- Eliminates the need to call for service

Ordering Instructions

Specify Infinity unit and CGA connections, and include EasyLink Telemetry monthly fee if applicable.

Note: 2-6 Cylinders may be connected in any configuration using standard pigtails. Hose assemblies are priced individually.
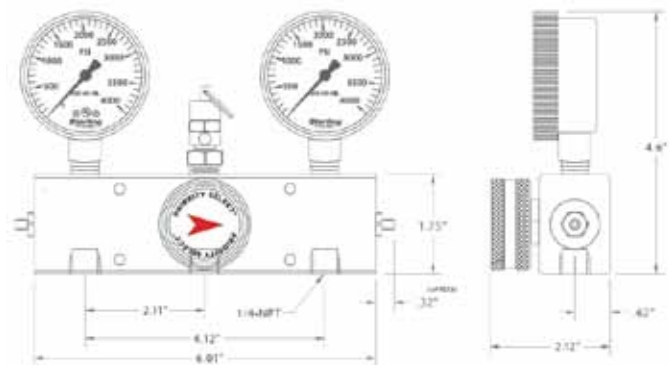

NEW!

Infinity™ Auto Changeover

Dimensions: 6"W x 4.6"H x 2"D
Gas Service: Inert
Inlet: 1/4" NPT (2)
Outlet: 1/4" NPT (1)
Safety: Self-resetting 175 psi

LogiCO2 MK9/MK10 CO_2 Detectors/Alarms

CO_2 is a colorless, odorless gas which normally exists at a concentration of .04% in the air, but above 4% concentrations has dangerous effects:
- 4% = IDHL - immediate danger to health and life
- 7% = Dizziness, vomiting, headache, reduced blood supply to the brain
- 10% = Convulsions, unconsciousness, death
- 20% = Death in a few seconds

The MK9 and MK10 are the most cost effective CO_2 detection systems currently available. Four alarm levels fulfill <u>ALL</u> U.S. CO_2 safety codes and norms. Central unit makes non-smelling invisible CO_2 gas visible and advises what to do in different alarm situations. Automatic calibration is safer and zero maintenance. Plug and play components simplify installation. System is expandable up to eight sensors. System can be connected to an existing fire alarm system that is connected to the fire department.

MK10 All-In-One Sensor
The MK10 is a a CO_2 monitor for the area CO_2 equipment is used or distributed. It has an integrated sound and light alarm and can be used as a stand-alone unit or can be linked to a central unit for digital display of values. The MK10 performs self-calibration at regular intervals, eliminating the need for service calibration.

MK9 Sensor
The MK9 sensor is a precision instrument that continuously monitors temperature and CO_2 gas concentration using infrared analysis. It has red, yellow and green LED lights and an intermittent buzzer for Low Alarm and continuous sound for High Alarm. The MK9 performs a self-calibration at regular intervals, eliminating the need for service calibration. MK9 is compatible with MK7.

MK9 CO_2 Central Unit
The multi-lingual Central Unit controls the safety system and displays measurements from up to eight MK9 or MK10 sensors. It is mounted outside the area being monitored, such as a manger's office. An information and instructional text for all Alert/Alarm and Error conditions is shown on the display. If multiple sensors are connected, each value indicates which sensor the value is from. The Central Unit has an alarm memory that remembers and reactivates any alarm after a power interruption. On the right side there is a sound mute/reset and test button. The Central Unit can be linked to an existing fire alarm system that is connected to the fire department.

LED and sound indications...
- Green - the system is active, normal safe conditions
- Yellow - Error
- Red - CO_2 concentration alarm: Low >1.5%, or High >3%
- Beeping sound indicates Low Alarm (warning) or Error
- Continuous sound indicates High Alarm (danger)

Horn/Strobe and Warning Beacon
Sensors are mounted 12" from the floor and therefore may not be visible from a distance. Horn/strobe and waterproof warning beacons are mounted high above sensors to provide greater visibility and audibility. Additional horn/strobes and beacons can be added.

Cables and Splitters
Red cables and splitters are for power and communication, blue are for warning signaling.

CO_2 leaks are costly and dangerous

MK9 Central Unit Specifications:
Operating temp: 0° to 104° F
Operating humidity: 0-95% RH
Power supply: 24V DC
Power usage: No alarm status: 21 mA
   Alarm status: 32 mA
Acoustic signal-strength: 80 dBa (1m)
Size (LxWxD): 3.5" x 6.3" x 1.5"

MK9 Sensor Specifications:
Operating temp: 0° to 104° F
Operating humidity: 0-95% RH
Power supply: 24V DC
Power usage: No alarm status: 56 mA,
   Alarm status: 68 mA
Acoustic signal-strength: 76 dBa (1m)
Automatic calibration: 60 days
Size (LxWxD): 3.5" x 6.3" x 1.5"

Horn/Strobe Specifications:
Operating temp: 23° to 122°F
Power supply: 18-24V DC
Power usage: 120 mA @ 24V DC supply
Acoustic signal-strength: 110 dB / 1 m
Flash intensity: 115 CD
Flash frequency: 65/min
Size (LxWxD): 5.3" x 4.5" x 2.4"

Includes:
MK10 CO2 Detector/Alert
Horn/strobe LED with 3 ft cable
1 Cable blue 30 ft
1 Cable red 15 ft
Stainless steel protection bar for Sensor
RJ45 1-1 spliter
Transformer 1A & Plug-UL

Optional:
Part # 0328 - MK9 CO2 Central Unit

MK10 Detector Set # 2025
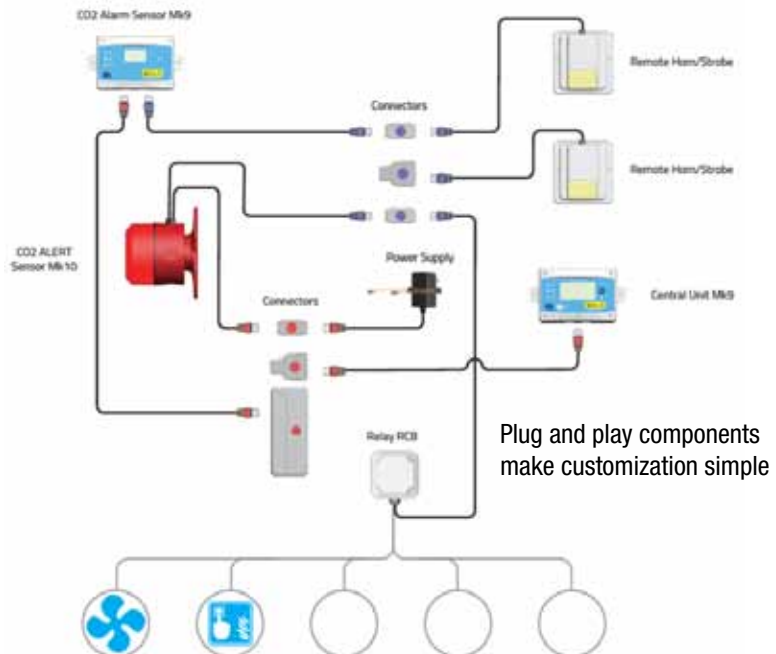

MK10 Specifications:
Operating temp: 0° to 122° F
Operating humidity: 0-95% RH
Power supply: 24V DC
Power usage: 600 mA peak,
   30 mA average
Automatic calibration: 60 days
Weight: 0.88 lbs
Size: 3.54" diameter, height 4.75"

Horn/Strobe Specifications:
Operating temp: 23° to 122°F
Power supply: 18-24V DC
Power usage: 120 mA @ 24V DC supply
Acoustic signal-strength: 110 dB / 1 m
Flash intensity: 115 CD
Flash frequency: 65/min
Size (LxWxD): 5.3" x 4.5" x 2.4"

Total distance between farthest components = less than 980 feet

ABS Air Compressor and Accessories

Oil-less air compressor with air line filter/regulator:
- Motor: 5/8 HP
- Voltage:110V/60hz
- Output: 2.6 CFM
- Maximum pressure: 100 psi
- Operating pressure: 70-100 psi
- Noise level: 62 decibels
- Tank size: 2 gallons
- Includes filter/regulator with gauge
- Dimensions: 16.5"L x 13"W x 16"H, Weight: 37 lbs.
- Shipping dimensions: 15" x 17" x 18", Shipping weight: 45 lbs.

General Purpose Air Line Filter/Regulator
- 1/4" NPT female in/out ports 0-150 psi gauge
- 1/8" NPT female gauge port
- Maximum pressure 150 psi
- Adjustment range 0-120 psi
- Maximum flow 15 CFM
- 5 micron filter

Automatic Condensate Drain Valve
- Timer specification: interval time 1-120 minutes, adjustable
- Supply voltage: 115V
- Valve specification: type 2/2 way direct acting
- In/out ports: 1/8" NPT female

Part Number	Description
CU012	Oil-less air compressor with filter/regulator
CU011	Oil-less air compressor with filter/regulator, auto drain valve and muffler
CU011-SC	Suitcase style compressor with auto drain and muffler
VAL039	General purpose air line filter/regulator
VAL038	Automatic condensate drain valve

Nitro-Blend Mixed Gas Dispense System

From a clean compressed internal air supply, the system utilizes gas membrane technology to produce high purity food grade nitrogen which is then blended with CO_2 to give any pre-determined gas mix.

Stored N_2 may also be used for blanketing cask ales, line cleaning and direct air for driving pumps.

Mixes nitrogen produced with CO_2 from a gas cylinder. Produces 8.0 ltr/min of N_2. This high output can dispense up to 500 pints per hour without the necessity for external nitrogen storage.

Produces nitrogen with an oxygen content down to 0.2% and can be adjusted to produce gas mixtures with nitrogen, oxygen and CO_2.

- Compact and easy to use
- Generates 99.8% draught beer-grade nitrogen on-site, eliminating the need to purchase and store mixed gas cylinders
- Dispenses up to 36+* pints per minute, 700 kegs per month*
- Correct gas mixtures of CO_2 and N_2 for all products ensure all beers are dispensed to the highest standards every time
- Blends CO_2 with nitrogen using a McDantim "TrumixTM 200" blender to produce all the gas blends you require
- Each system has a reserve back-up which ensures that you can continue to dispense in the unlikely event of any problems
- Oil-free compressor is included

Panel display: hour meter, power on/off, N_2, CO_2, fan, control valve, alarm, tank psi, compressor psi, blend supply psi, indiviual blend regulators with selector valves

Specifications: 110V, 15 amp, storage vessel nitrogen pressure 138 psi, storage vessel capacity 4.55 ft^3 main-reserve (internal) with additional port for backup supply (standard), nitrogen production 17 ft^3 per hour, nitrogen purity 99.8%, noise level under 60dba, ambient temp-operation 40-95° F, purge rate: 1 hour keg surge – 23, 5 hour keg surge – 48.

* The calculated formula for the amount of beer the Nitro-Blend unit will dispense was calculated using a 60% CO_2 blend ratio. These calculations are considered usable nitrogen in the storage tank at a pressure rating of above 80 psi.

Beer Systems, Bar Equipment

McDantim Trumix™ Gas Blenders

The McDantim Trumix™ Blending Panel is a small wall-mounted unit that is easy to install, dependable, and requires no electricity, on-going maintenance or adjustment. It can be used with all sources of clean nitrogen and CO_2 including high pressure cylinders, bulk tanks or separators.

TM100 & TM100HF are for single blend (one beer) long draw beer systems. TM200 & TM200HF are for systems that dispense more than one type of beer requiring two separate blends of CO_2 and N_2. TM300 is for triple blends.

Inlet Pressures: 55-150 psi, however, panel can be set to match any conditions (standard 55 and 70 psi). Outlet Pressures are adjustable from 0-60 psi. The maximum outlet pressure will always be 10 psi lower than the lowest inlet pressure. The panel can also be ordered with outlet pressure set to custom ranges.

MV013 (1/4") and MV042 (3/8") tee with check valve protects the blender from being filled with water when the blender is being using in conjunction with a carbonator. Trumix™ Blender warranty only covers water damage if a MV tee was installed.

Leak Detectors

The MV035 and MV039 inline leak detectors can easily determine if there is a leak and the size of the gas leak so you will know if it requires immediate attention or is hazardous to your employees.

The Bypass Leak Detector (BLIP) can tell you in seconds if your microbrewery has leaks and how big they are. One glance before you start using gas tells you whether you have a leak or not. As you repair leaks, it serves as your scorecard, letting you know how much of the problem is resolved and if all leaks are fixed. Even the smallest leak can cost hundreds of dollars per year.

MV035   MV039

Tee with check valve
Required for McDantim warranty

TM100   TM200   TM300

BLIP
Bypass Leak Detector

Part Number	Description
TM100	McDantim Trumix single blender, 15 kegs/hour
TM100HF	McDantim Trumix high flow single blender, 30 kegs/hour
TM200	McDantim Trumix double blender, 30 kegs/hour
TM200HF	McDantim Trumix high flow double blender, 60 kegs/hour
TM300	McDantim Trumix triple blender, 30 kegs/hour
MV013	1/4" tee with check valve
MV042	3/8" tee with check valve
MV044	1/4 x 1/4 x 3/8" tee with check valve
MV045	1/4 x 3/8 x 3/8" tee with check valve
MV073	1/4" check valve straight
MV020	Beer gas analyzer with adapter
MV022	Beer gas analyzer with adapter and leak sensor
MV035	Inline leak indicator, double gas
MV039	Inline leak indicator, single gas
BLIP	Bypass leak detector

Trumix blenders come with standard 1/4" female NPT fittings, hose barbs available at no additional cost. Specify size: 1/4", 5/16", or 3/8".

MV020   MV022

Oetiker Stepless Ear Clamps

Stepless ear clamps provide uniform compression and a 360° seal, ideal for securing beverage tubing to a fitting or outlet. -505R suffix means the band width is 5.0 mm and band thickness is .5 mm. -706R suffix means the band width is 7.0 mm and band thickness is .6 mm. Other sizes available, call customer service for more information.

When ordering always select the nominal size nearest to, but always larger than the outside diameter (OD) of the material to be clamped. Measurement should be determined with the connection fully assembled.

Part Number	Model	ABS Clamps	Closed-Open mm
16700983	7.0-505R		5.8 - 7
16700984	8.0-05R		6.8 - 8

7182	(3) 1/4	Tee, 2 barb x MPT, SS
C134	(3) 3/16	Tee, 2 barb x MPT, SS
7185	(2) 3/8x1/4	Tee, 2 barb x MPT, SS
7181	(2) 1/4x3/8	Tee, 2 barb x MPT, SS
7171	(3) 3/8	Tee, 2 barb x MPT, SS
7189	(2) 3/8x1/2	Tee, 2 barb x MPT, SS
7168	(3) 1/2	Tee, 2 barb x MPT, SS
7169	(2) 1/2x3/4	Tee, 2 barb x MPT, SS
1007169	(2) 1/2x3/4	Tee, 2 barb x MPT, SS

Part #	Size"	Description
4016		Knurled cap nut, 10/24 thread

Part #	Size"	Description
3160		Knurled shoulder screw

Part #	Size"	Description
7263	(2) 1/4	Adapter, compression x barb
7280	3/8 x 1/4	Adapter, compression x barb
7264	3/8 x 3/8	Adapter, compression x barb

Part #	Size"	Description
1002136	3/8 x 3/8	Adapter, compression x compression, SS

Stainless Steel Fittings

Part #	Size"	Description
7037	(2) 1/4	Adapter, compression x barb
1007037	(2) 1/4	Adapter, compression x barb
7039	5/16 x 1/4	Adapter, compression x barb
7038	1/4 x 3/8	Adapter, compression x barb
1007038	1/4 x 3/8	Adapter, compression x barb
1007039	5/16 x 1/4	Adapter, compression x barb
7040	5/16 x 3/8	Adapter, compression x barb
1007040	5/16 x 3/8	Adapter, compression x barb
7041	3/8 x 1/4	Adapter, compression x barb
1007041	3/8 x 1/4	Adapter, compression x barb
1002137	3/8 x 1/4	Adapter, compression x barb, no O-ring
7042	(2) 3/8	Adapter, compression x barb
1007042	(2) 3/8	Adapter, compression x barb

Part #	Size"	Description
7069	1/4 x 1/4	Adapter, compression x MFL
7088	5/16 x 1/4	Adapter, compression x MFL
7043	1/4 x 5/16	Adapter, compression x MFL
7060	5/16 x 3/8	Adapter, compression x MFL
7061	3/8 x 3/8	Adapter, compression x MFL
3068	3/8	Compression spacer

Part #	Size"	Description
3048		Valve plug, General Beverage
3049		Valve plug, Dole

Part #	Size"	Description
7124	3/8	Outlet straight, GB
1002310	3/8 x 1/4	Dole 3/8 inlet x 1/4 barb

Part #	Size"	Description
7128	1/4	Outlet 90° elbow, double O-rings, Dole/GB
7072	3/8	Outlet 90° elbow, double O-rings, Dole/GB
7064	1/2	Outlet 90° elbow, double O-rings, Dole/GB

Part #	Size"	Description
1002306	1/4	Port, 90° elbow, Shurflo
1002309	3/8	Port, 90° elbow, Shurflo
94-178-51	1/2	Port, 90° elbow, Shurflo

Part #	Size"	Description
7245	1/4	Port, straight, Shurflo
94-178-19	3/8	Port, straight, Shurflo
94-178-27	1/2	Port, straight, Shurflo

Part #	Size"	Description
1002307	1/4	Outlet straight, Flojet
1002308	3/8	Outlet straight, Flojet
20606-100	1/2	Outlet straight, Flojet

Part #	Size"	Description
20607-100	1/4	Outlet 90° elbow, Flojet
20608-100	3/8	Outlet 90° elbow, Flojet
3143180	3/8	Outlet 180° U-bend, Flojet
7120	1/2	Outlet 90° elbow, Flojet
7049	1/4	Outlet 90° double ring, Flojet
7048	3/8	Outlet 90° double ring, Flojet
7064	1/2	Outlet 90° double ring, Flojet

Part #	Size"	Description
PM10-9	1/4	Inlet, straight, Wunder-Bar
PM10-10	5/16	Inlet, straight, Wunder-Bar
PM10-11	3/8	Inlet, straight, Wunder-Bar

Part #	Size"	Description
PM10-47	1/4	Inlet, straight long, Wunder-Bar
PM10-12	3/8	Inlet, straight long, Wunder-Bar
PM10-57	1/2	Inlet, straight long, Wunder-Bar

Part #	Size"	Description
PM10-61	1/4	Inlet, 45°, Wunder-Bar
PM10-59	3/8	Inlet, 45°, Wunder-Bar
PM10-79	1/2	Inlet, 45°, Wunder-Bar

Part #	Size"	Description
PM10-13	1/4	Inlet, 90°, Wunder-Bar
PM10-53	3/8	Inlet, 90°, Wunder-Bar
PM10-78	3/8	Inlet, long 90° Wunder-Bar
PM10-58	1/2	Inlet, 90°, Wunder-Bar

Stainless Steel Fittings

Part #	Size"	Description
S6510-6-1/8	6mm	6mm x G1/8 straight
6550-6	6mm	6mm union elbow
6550-8	8mm	8mm union elbow
S6520-6-1/8	6mm	6mm x G1/8 elbow
S6430-6-1/8	6mm	6mm x G1/8 branch tee

Stainless Steel Fittings Kits

8012	Fittings starter kit
8025	Fittings starter kit, economy

Stainless Steel Valves

V13-S	Needle valve 1/4 MFL x 1/4 MFL
V17-S	Needle valve 1/4 MFL x 1/4 swivel nut
V6S-66	Needle valve 3/8 MFL x 3/8 MFL

Stainless Steel Manifolds

Part #	Description
7017	Manifold 8.5" long (9) 1/4 MFL
7016	Manifold 8.5" long (7) 1/4 MFL
7050	Manifold 8.5" long (7) 1/4 MFL and (2) 3/8 MFL ends
7151	Manifold 8" long (5) 3/16 barb and (2) 1/4 MFL ends
7152	Manifold 8" long (4) 3/16 barb and (2) 1/4 MFL ends
7218-1	Manifold 3.5" long (2) 5/32 barbs (2) 3/8 barbs ends
7218-3	Manifold 4.5" long (3) 5/32 barbs (2) 3/8 barbs ends
7218-5	Manifold 5.5" long (4) 5/32 barbs (2) 3/8 barbs ends
2002891	Manifold 3/8 UNF w 2 port x 3/8 UNF
2002892	Manifold 3/8 UNF w 2 port x 5/8 UNF
2002893	Manifold 3/8 UNF w 2 port x 7/16 UNF
2002894	Manifold 3/8 UNF w 3 port x 3/8 UNF
2002895	Manifold 3/8 UNF w 3 port x 5/8 UNF
2002896	Manifold 3/8 UNF w 3 port x 7/16 UNF
2002897	Manifold 3/8 UNF w 6 port x 3/8 UNF
2002898	Manifold 3/8 UNF w 6 port x 5/8 UNF
2002899	Manifold 3/8 UNF w 6 port x 7/16 UNF
2003125	Manifold 3/8 5 port w valve
2003126	Manifold 3/8 6 port w valve
2003127	Manifold 1/2 5 port w valve
2003128	Manifold 1/2 6 port w valve

Beer Fittings

Part #	Size"	Description
526A	3/16	Hose stem/nipple
526B	1/4	Hose stem/nipple
526E	5/16	Hose stem/nipple
526C	3/8	Hose stem/nipple
1014	7/16	Hose stem/nipple
526D	1/2	Hose stem/nipple
1020	7/8	Beer swivel nut, nickel
874		Coupling hex nut
80228		Beer hex nut
525	1/2	Beer wing nut
610B		Locking nut
1007997		Hex nut bulkhead
8016		Beer washer
BWK100		Beer washer kit
0017		Beer tap figure 8 washer twin probe
1001975	1/4	Bulkhead fitting MFL
C115	1/4	Tail piece with 1/4" MFL (easily change from commercial to homebrew keg)
7269	1/4	Beer stem, MFL, SS
C118	19/32 x 1/4 FFL	Corny plug adapter, male end 19/32"-18 threads, other end 1/4" FFL
457C	1/4	Cabinet fitting 1/4 MFL with nut

Part #	Size"	Description
7167	3/16	Hose stem/nipple elbow
7176	1/4	Hose stem/nipple elbow
7308	1/4	Hose stem/nipple elbow
7250	3/8	Hose stem/nipple elbow
C229	7 mm ID	Tailpiece for European faucet shank
C233	10 mm ID	Tailpiece for European faucet shank
C706		90° swivel elbow w O-ring for K & S keg couplers
C811	7 mm ID	Chrome elbow for European faucet shank
C812	10 mm ID	Chrome elbow for European faucet shank
C813	7 mm ID	SS elbow for European faucet shank
C814	10 mm ID	SS elbow for European faucet shank
C310	3/16	Gooseneck elbow for shank
4008	1/4	Barb x smooth elbow, SS
4031	3/16	Barb x smooth elbow, SS
4041	3/8	Barb x smooth elbow, SS
4090	1/2	Barb x smooth elbow, SS
9400		Beer lever
C601		Chrome keg coupler elbow
FT872		Elbow fitting for FT86 and FT86P taps, nickel
01-2953		Beer shank coupling nut chrome
C308		Shank grommet, 100 pack
C192	1/2 x 5/8	Hex beer adapter, chrome, converts 5/8" keg coupler to 1/2" BSP

Beer Systems, Bar Equipment

Beer Fittings

Part #	Size"	Description
01-2763		Gas valve 1/4" Fatlock

Part #	Size"	Description
48-3070		Beer manifold, 2 way Fatlock, SS complete
48-3071		Beer manifold, 3 way Fatlock, SS complete
48-3072		Beer manifold, 4 way Fatlock, SS complete

FC48HB   BB101663

Part #	Size"	Description
FC28HB		Stainless beer manifold, 2 MBT outlets with 3/8" bore
FC36HB		Stainless beer manifold, 3 MBT outlets with 3/8" bore
FC48HB		Stainless beer manifold, 4 MBT outlets with 3/8" bore
BB101662		Stainless beer manifold w PRV, 2 MBT outlets with 3/8" bore
BB101663		Stainless beer manifold w PRV, 3 MBT outlets with 3/8" bore
BB101664		Stainless beer manifold w PRV, 4 MBT outlets with 3/8" bore

Part #	Size"	Description
01-2773		Fatlock adapter, 5/8"
02-0134		5/8" Fatlock adaptor O-ring
02-0654		Fatlock 5/8" adapter service kit

Part #	Size"	Description
01-2778		Fatlock adapter, 3/4"
02-0662		3/4" Fatlock adaptor O-ring
02-0653		Fatlock 3/4" adapter service kit

Part #	Size"	Description
01-2774		Beer line check valve, SS, Fatlock 1/4" x 3/8"
01-2775		Beer line check valve, SS, Fatlock 3/8" x 5/8"
01-2776		Beer line check valve, SS, Fatlock 1/2"
01-2777		Beer line check valve, SS, Fatlock 3/8" x 1/2"

Part #	Size"	Description
01-2779		Fatlock flushout/flowback snap on adapter
02-0219		Fatlock flushout adaptor O-ring

Part #	Size"	Description
01-2848		FOB manifold adaptor Fatlock
01-2847		FOB barb 1/2" tail
01-2772		FOB barb 3/8" tail

Part #	Size"	Description
02-0099		Fatlock valve O-ring
02-0655		Fatlock beer valve service kit

Part #	Size"	Description
08-0563		Transfer lead, S/S, Fatlock

Part #	Size"	Description
01-2932		1/4 MPT x 1/4 barb shutoff
01-2933		1/4 MPT x 5/16 barb shutoff
01-2934		1/4 MPT x 3/8 barb shutoff

Part #	Size"	Description
88776292		Flowback block nylon

Part #	Size"	Description
66000004		Tap adaptor Fatlock shank

Complete line of brass and low-lead brass, are in Installation Products, Section H. O-Rings are in Replacement Parts, Section G

Colder Quick Couplings

Plastic couplings have two parts, body and insert, which are sold separately to provide more combination options. Coupling bodies feature a thumb latch which clicks when connected.

Inline ferruleless compression terminations are for use with semi-rigid plastic tubing which must meet stated inside and outside diameters. Compression terminations (ends) are for use with copper or semi-rigid plastic tubing.
Elbows pivot to avoid kinks or unnecessary bends in the fluid lines.

Integral Terminations
eliminate a leak point and the need to purchase and assemble a separate termination

Thumb Latch
lets you make repeated, leak-free disconnects quickly and easily

Audible "Click"
assures a secure seal when the coupling is connected

Shut-off Valves
available with or without valves to automatically stop flow when disengaged

Configurations & Materials
pipe thread, panel mount, inline, elbow, acetal, polypropylene, chrome-plated brass, aluminum, and others

Body

Insert

Coupling Bodies

STOW 'N GO™ Tool Boxes

Durable Stow 'N Go™ Organizers are ideal for tools and small parts. Individual locking trays are partitioned for organization, and slide out for easy access.

135430 and 136430 Pro Racks
- Includes four ProLatch™ StowAway® organizers
- Bulk tool storage under the lid
- Graphite gray with sandstone accents

523201
- Removable dividers allow for 16-50 adjustable compartments
- 2-Sided convenience
- Bulk storage on both sides
- Lockjaw™ latches
- Porsche red w clear lids

523101
- Removable dividers allow for 15-52 adjustable compartments
- Double cover offers additional storage
- Large bulk storage area
- Lockjaw™ latches
- Porsche red w clear top

523002
- Removable dividers allow for 8-25 adjustable compartments
- Large bulk storage area
- Lockjaw™ latches
- Porche red w clear lid

532430
- 24 Fixed Compartments
- Portable Organizer
- Clear

Beer Systems, Bar Equipment

Cleaners and Cleaning Equipment

Liquid sugar below 75° F forms sugar crystals. Syrup and juice sugar crystals build up and impair the performance of beverage dispensers, bag-in-box adapters, pumps, circulating coils, valves, mixing chambers and nozzles. Micro-organisms grow in any area exposed to sugar, water and air and can flush into drinks. Over time moving parts with sugar crystal and bacteria build-up fail to work properly and affect the quality of the drink.

Without Cleaning
- Quality suffers, customers are dissatisfied, drinks are often repoured or discarded, profits decrease
- Syrup or juice concentrate can be mistakenly blamed for poor quality and good boxes of syrup or concentrate are returned or discarded
- Dispensing may be stopped depending on the severity of the problem, and service agents may not be able to respond quickly
- Brush cleaning will help but cannot reach all build-up areas

With Regular Cleaning
- Consistent quality drinks are poured and customers are satisfied, profits increase
- Sugar crystals and bacteria are removed from the entire system, including areas brush cleaning can't reach
- Flow controls and metering stems operate at optimum performance
- BevClean's inhibitor prevents growth and deposits for 60-90 days after cleaning
- Cleaning time is scheduled during off hours, service calls are reduced; replacement parts and labor costs decrease

Before and After Cleaning

Part #	Description
216578	BevClean BIB cleaner, 3 gallon box
219000	BevClean BIB cleaner, 55 gallon drum
216673	Super BevClean, 1 gallon
216701	WinterBev solution, 5 gallons
219701	WinterBev solution, 50 gallon drum

BevClean™ No Rinse Bag-in-Box System Cleaner

Cleans everything from the rack to the dispensing point, one line at a time, or up to 8 lines at a time with the BevClean manifold.

No More buckets, mixing, waiting for powders to dissolve in the correct temperature of water, waiting for the cleaner to work and then flushing, which can take up to 1 hour per line.

Simply hook the bag connector to the BevClean BIB box, open the dispensing valve until clear BevClean is detected, re-attach the syrup BIB and dispense until the line is full of syrup again. With the manifold assembly you can clean up to 8 lines simultaneously in 15-20 minutes!

BevClean works on contact, is completely safe, leaves no residuals, and inhibits growth and deposits for 60-90 days after cleaning.

WinterBev is a beverage system antifreeze (propylene glycol base) packaged in 5 gallon BIB boxes, ideal for seasonal equipment, or equipment in cold storage. Protects to -11° F. Available in stronger concentrate for extreme low temperatures.

U.S. Dept. of Health and Human Services, Public Health Service, FDA 2001 Food Code Cleaning Requirement, updated April 2004:
  4-701.10 Sanitization of Equipment and Utensils:
    "Equipment food-contact surfaces and utensils shall be sanitized."
  4-601.11(C) Cleaning of Equipment and Utensils:
    "Non-food contact surfaces of equipment shall be kept free of an accumulation of dust, dirt, food residue, and other debris."
  4-602.11 (E-4) Cleaning Frequency:
    "In equipment such as ice bins and beverage dispensing nozzles and enclosed components of equipment such as ice makers … beverage and syrup dispensing lines or tubes … and water vending equipment:
      (a) At a frequency specified by the manufacturer, or
      (b) Absent manufacturer specifications, at a frequency necessary to preclude accumulation of soil or mold."

Underbar Ice Chests

Seamless top/backsplash has 2 tubing chase holes in the backsplash. Plastic breaker strip around the ice bin liner acts as a thermal barrier and makes the stainless steel covers slide easier. Fully insulated. Order with or without a 10 circuit cold plate. Models without cold plates have a 1.5" welded tailpiece so there's no drain fitting to break or come loose. All ice bins come with adjustable stainless steel bullet feet.

Prefixes: IBA = 19" deep, IBB = 24" deep, IB = pass-thru

Locking covers for speed rails are available: SSRC-X for single, DSRC-X for double speed rail. Replace X with the length needed.

More details available. Please visit www.glastender.com

Underbar Combo Ice Bin/Bottle Well

More details available. Please visit www.glastender.com

Separate draining ice bin and bottle well compartment are combined into one insulated stainless steel unit. Seamless top/backsplash has 2 tubing chase holes in the backsplash. Plastic breaker strip around the ice bin liner acts as a thermal barrier and makes the stainless steel covers slide easier. Order with or without a 10 circuit cold plate.

Fully insulated 12" bottle well has two wire racks for ice chilled storage of 6 or 8 bottles in 19" or 24" deep ice bins. The bottle well may be located on the left, right, or both sides of the ice bin.

Please specify right (R) or left (L) when ordering.

Underbar Blender Stations

More details available. Please visit www.glastender.com

Blender stations come with a sink, faucet and wet waste strainer. Drainboard blender stations have a drainboard work surface consisting of a drain pan with separate removable perforated insert.

The integral blender shelf is 9" deep on the 24" deep models and 10" deep on the 29" models. The shelf stores the blender at the 19" high level. A grommeted cord access hole is provided in the front skirt.

Blender stations cannot have a speed rail mounted to them. Since speed rails are so common on the underbar, blender stations come in two depths to align with underbars with a speed rail: 24" (to align with 19" deep underbar) and 29" (to align with 24" deep underbar).

Underbar Drainboards

Glastender drainboards have an exclusive 1" deep sloped stainless steel drain pan with a separate removable perforated insert. The 1" high perforated insert allows air circulation beneath the glassware, and since the pan is sloped and not the insert, all glassware is stored on a level plane.

Drainboards are also available with a flat stainless steel fillerboard top in lieu of the drainboard top. Substitute an "F" for the "D" in the model number when ordering (same price). Fillerboards are manufactured to order and not returnable.

Recessed drainboards have the same drain pan with separate perforated insert, but the work surface has been lowered to allow glassware stacking. A perforated shelf is placed on top of the first level of glasses and a second layer is stacked on top (best if only one style of glassware is being stored).

Beer Systems, Bar Equipment

Underbar Corner Drainboards

More details available. Please visit www.glastender.com

Corner drainboards are used when an underbar line-up turns 90˚ or less. The direction of the turn may be toward (inside corner) or away (outside corner) from the bartender. Corner drainboards have a removable perforated insert, align with 19" or 24" deep underbars, and come with a front rail to match adjacent equipment.

Dimensional full corner drainboards are for 90˚ inside turns only. If the dimensions of each side are not the same, the longest dimension is specified second along with its location.

Clip corner drainboards have a larger chamfer than full corner drainboards, and are designed for inside or outside turns 90˚ or less.

Corner drainboards are designed to mount between two pieces of underbar, however they can be mounted between any two stable vertical surfaces. If one side does not have a vertical surface on which to mount, then a side and leg set must be ordered.

Underbar Drainboard Glassracks and Cabinets

More details available. Please visit www.glastender.com

Drainboard glassracks have a stationary or roll-out bottom shelf, adjustable or roll-out intermediate shelf, and drainboard work surface. All models are 24" deep. The 24" wide models hold 20" x 20" racks, and the 18" wide models hold the 16" round rack used with the Glastender GT18 glasswasher (racks not included). Since drainboard and glassrack shelves are solid, they can be used for non-glassrack storage. If a 19" deep drainboard glassrack is required, order a 19" deep drainboard glassrack less doors.

Drainboard cabinets are similar to glassracks, although the intermediate shelf is adjustable and available with or without doors. Models with doors come with a lock. The 12", 18" and 24" wide cabinets have one door, all others have two. Drainboard cabinets are also available with a flat stainless steel filler board in lieu of the drainboard top (substitute an "F" for the "D" in the model number), and made to order thus not returnable. Drainboard half cabinets are on 16" legs allowing cleaning underneath, and come with or without doors.

Underbar Glassracks, Drainboard Drawer Units, POS Cabinets, Add-On Cabinet Bases

More details available. Please visit www.glastender.com

Glassracks are designed to hold three racks of glassware; one on the bottom shelf and one on each of the two adjustable glass rack slides. The 24" wide models hold 20" x 20" racks (not included), and the 18" wide models hold the 16" round racks (not included) with the Glastender GT18 glasswasher.

Drainboard drawer units have a removable locking drawer and drainboard surface. This allows for more storage space without sacrificing the ability to have a speed rail. Special speed rails (listed below) are required with drawer units. 19" drainboard drawer units are made to order and not returnable.

The add-on cabinet base is installed beneath standard underbar equipment to provide additional storage and enhance the look of the bar by eliminating storage of loose items under the bar and makes plumbing less visible. The back of the cabinet provides access to plumbing. The removable stainless steel floor has radius corners for easy cleaning, and interior walls are dual panel for a smooth interior and cleaning ease.

POS cabinets have a 26" high work surface to accommodate a cash drawer and POS monitor. Left and right side splashes are standard, as well as a louvered door to ventilate the storage cabinet. The work surface has a grommeted cord access hole.

Underbar Single Bowl Sinks

More details available. Please visit www.glastender.com

Single bowl sinks are available as hand sinks and wet waste sinks. Wet sinks include a lift-out perforated plastic wet waste strainer. All sinks come with a mounted hot and cold gooseneck faucet.

Hand sink models HSA12D, HSB12D and HSB12AD include a soap dispenser (refill from above) front-skirt-mounted and C-fold paper towel dispenser. Models DHSA18, DHSB12 and DHSB18 include a soap dispenser and hinged front-access door to conceal C-fold paper towel dispenser, which are easily accessed below the door. (The access door is only opened for re-loading the paper towel dispenser.)

Specialty Wet Waste Sinks:
Model SWB12C has a cabinet base with storage space for three 1-gallon chemical containers. Model SWB18DW has a cabinet base with work surface trash chute hole and front hinged access door (stainless steel trash container, model DWC, is available as an accessory). Model SWB18DB has a drainboard work surface with recessed wet waste sink below. Models SWB24LC and SWB24RC (L or R in the model number designates the sink location) include a 12" drain board section in the work surface and an open front cabinet base with center vertical divider.

Underbar Multiple Bowl Sinks

Multiple sinks come in three different styles: two, three and four compartment. They feature an exclusive one-piece 18 gauge stainless steel top that is seamless from the front rail all the way through the backsplash.

Each style is available with or without built-in drainboards on one or both sides of the sink compartments. Drainboards, where included, are a seamless and integral part of the work surface and have a lift-out perforated insert. The seamless weld bowls are 16 gauge fabricated stainless steel. An "L" or "R" designates the location of the sink compartment as left or right when there is only one drainboard.

All sinks include one overflow tube per bowl. 19" deep models have a backsplash mounted faucet. Perforated stainless steel inserts are available to cover sinks when not in use.

Underbar Beer Drainers and Liquor Displays

More details available. Please visit www.glastender.com

Beer drainers have a 26" high, lowered work surface designed for use with an undercounter beverage dispenser. The work surface includes a drain pan with perforated insert to serve as the drip pan for the dispenser with a tubing chase notched rear deck for beverage line installation and access.

Liquor displays provide tiered liquor bottle storage at a convenient height for bartenders. Each step and rail has sound deadening

covers, and each rail includes a clear lift-off liquor identification cover, and radius interior corners for easy cleaning. The 24" deep models provide four tiers, and 29" deep models provide five. Liquor displays cannot have a speed rail mounted to them but align with underbar with a speed rail, and appearance matches a speed rail for continuity. Locking speed rail covers can be used on each row.

Slanted liquor displays are used with 20" x 20" racks. Cabinet model has a locking door and 2" casters.

Underbar Dry Waste and Wait Stations

More details available. Please visit www.glastender.com

The top lifts up on all dry waste chutes to empty the trash receptacle, and lifts off for cleaning. DWB12 mounts between two adjacent pieces of underbar. DWB15L and DWB15R include a left or right side and leg set, and mount to one side of the underbar. DWB18 is freestanding. All models are designed to house a Rubbermaid® Slim Jim™ trash receptacle.

Dry waste rail looks like a speed rail but is a chute for a 16"H (or less) trash receptacle. Dry waste rails cannot be used on cabinets, glassracks or ice cream freezers.

Ice cream freezers are fully insulated, have dipper well and faucet, 6' grounded cord and plug, and 5 year compressor warranty. 24" unit holds one 3 gallon container of ice cream, 36" holds two.

Wait stations mount to the server side of the bar die for convenient storage of common server items. Cabinet includes menu holder, welded bowl with removable plastic wash basin, intermediate shelf, and special compartment for vertical 14" or 16" round server tray storage with a hole in the bottom to prevent trays from rolling out. No plumbing required. Includes wall mounting brackets.

Underbar Drink Rails, Drain Pans and Speed Rails

More details available. Please visit www.glastender.com

Drink rails mount to the underside of the bar top and have a removable perforated insert. 30" and 36" models have one gusset, 42" and 48" rails have two gussets for added strength. 1/2" welded tailpiece drain exits from the back. Installation kit includes: 10' of clear vinyl drain tube, one 4" Ty-wrap, three #10 SS wood screws, three cable clamps and one 1/2" x 1/2" x 1/2" plastic tee.

Drop-in drain pans fit into the countertop and self rimming edges fit tightly to the work surface. Comes with the same installation kit as drink rail except there are two 1/2" elbows rather than one tee. Standard lengths are from 24" to 48". Custom sizes also available.

Drink rails and drop-in drain pans are made to order and not returnable.

Speed rails are stainless steel with radius corners, easy to clean and view bottles. Each rail has sound deadening covers and a clear lift-off liquor ID cover. Locking covers for single speed rails include built-in storage hangers when ordered with original equipment.

Underbar Modular Bar Die

More details available. Please visit www.glastender.com

Underbar equipment is mounted to and supported on the bar die. All underbar equipment is pre-assembled and mounted to the bar die at the factory, then broken down into shippable sections. Installation of the bar die is simpler than a conventional millwork bar die and has many advantages...

Benefits:
- Stainless steel from floor to the bar top on bartender side
- Floor can be sealed to the bar die to prevent moisture from seeping from the bartender side to the customer side
- Galvanized steel will not rot
- Eliminates all underbar legs for easy cleaning
- Built-in chaseways for beer, soda, plumbing and electrical lines provide a cleaner, more attractive bar
- Can be used in conjunction with removable front millwork finishing panels to provide easy access to beer, soda, plumbing and electrical lines for future modification, maintenance or repair
- Pre-engineered to exact dimensions to ensure a precise fit
- Pre-assembly from the factory lowers installation costs
- Millwork bar top and front panels can be pre-fabricated and easily attached

The total number of feet required is calculated by determining the overall outside dimension of the bar die wall. Please round to the nearest whole foot.

Beer Systems, Bar Equipment

Underbar Parts and Accessories

Part #	Description
BO	Bottle opener
CLEG	6" leg for underbar cabinet
ULEG	16" leg for standard underbar
03000495	12" leg for extra-deep ice bin
03005473	Light, plug-in fluorescent for bar die
03001871	Cup, condiment dispenser replacement
03000484	Flanged foot, fits all equipment
06001549	Bullet foot, fits all equipment
06001557	Pilaster for GRA and GRB
06001565	Clip for pilaster, SS, for GRA and GRB
06001574	Thumbscrew, SS, for pilaster or shelf angle
03001093	Shelf angle, for DBCA or DBCB
03001915	Lock and cam, drainboard cabinet, 2 keys
03000474	Lock w 2 keys, speed rail or MBR cover
03000475	J-hook, locking speed rail cover
03000476	J-hook, for MBR24LC
03000477	J-hook, for MBR24CTLC
03001923	10/32 x 3/4" black hand screw for bargun drip cup
03000457	Repl deck faucet, 7-3/8" gooseneck, UB unit 1 bowl
03000458	Repl deck faucet, 9" gooseneck, CS models
03000460	Repl deck faucet, 10" swing, DSB models
03000463	Repl backsplash faucet, 6" swing, for BSA12, HSA12, HSA12D, SWA12, DSA & WH models
03005754	Repl backsplash faucet, 10" swing, for TSA and 2-faucet FSA models
03000465	Repl backsplash faucet, 18" dbl joint, FSA models
03000466	Repl faucet, 7-3/8" gooseneck, spout only
03000467	Repl faucet, 9" gooseneck, spout only
03000468	Repl faucet, 6" swing, spout only
03002009	Repl faucet, 10" swing, spout only
03000469	Repl faucet, 12" swing, spout only
03000470	Repl faucet, 18" dbl joint, spout only
03000471	Repl faucet, deck mt, body only
03000472	Repl faucet, backsplash mt, body only
03000473	Repl faucet, glass filler, short
03001872	Repl faucet, glass filler, 9-3/8"H for DI-IW24
04000104	Repl faucet, dipper well
03000511	Wrist handles, set of two
03000441	Overflow tube for multiple sink
03001873	Liquid soap dispenser, hand-pump
01000766	1.5" IPS drain fitting kit
02000614	Drain screen,IDU, GDU, MIB, IBM, ice bins prior 8/03
02000616	Drain screen, stamped, ice bins post 8/03
03000443	18" open glass rack shelf
03000444	24" open glass rack shelf
BSS8	Bolt-on blender shelf, 8"
BSS12	Bolt-on blender shelf, 12"
BSS14	Bolt-on blender shelf, 14"
BSS16	Bolt-on blender shelf, 16"
BSS18	Bolt-on blender shelf, 18"

Pass-Thru Cocktail Stations

More details available. Please visit www.glastender.com

Designed to eliminate wasted steps and save time, the pass-thru cocktail station allows the bartender and cocktail servers to work more efficiently, and able to serve more drinks per hour.

Front and end finish panels to match the existing decor are provided, which hold up the tray shelf and optional single or double overshelves. Laminated panels are available in stainless steel, or any standard laminate color (please specify the manufacturer, color and catalog number when ordering). If you prefer to make your own finish panels, Glastender's specification guide has the drawings and details necessary for fabrication.

Orientation determines the work flow, and is usually dictated by the position of the glasswasher. Counterclockwise: the work flow is right to left with the glasswasher on the left. Clockwise: the work flow is left to right with the glasswasher on the bartender's right.

Cocktail stations are made to order and not returnable.

Cocktail Station Accessories

"SS, not laminate panels" converts laminated front and end panels to stainless steel panels at the factory, and includes foamed-in-place insulation.

Cold plates are built-in to pass-thru ice bin liner at the factory.

Clip-on condiment dispenser clips to either side of station. Clip-on single and double speed rails clip to bartender side. Clip-on dry waste receptacle clips to server side.

Overshelves mount to the end panels, brackets included.
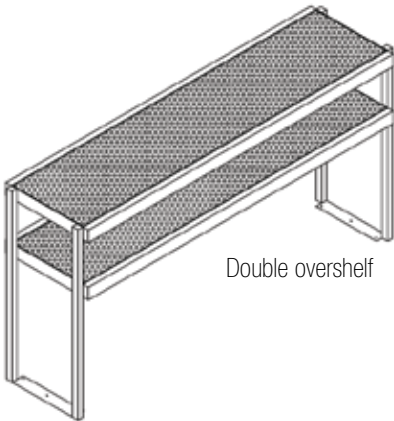

Double overshelf

Condiment dispenser

Clip-on single speed rail

Bolt-on blender shelf

GT24 and GT30 Rotary Glasswashers

More details available. Please visit www.glastender.com

A rotary glasswasher is a mechanized three-compartment sink that washes, rinses, and sanitizes glassware up to 11" high automatically. During operation 5 GPM of hot soapy water (130°-150° F) is sprayed in a thorough spray pattern across the moving glassware removing lipstick, dried-on fruit pulp and cream. The wash water is recirculated to conserve water and detergent, consuming only 1/4 GPM of hot water during operation. 3 minute cycle: 60 seconds wash and rinse.

Features:
- 90 day labor warranty
- Removable top, front and conveyor for easy cleaning
- Set of 3 curtains included
- Switch panel can be relocated in the field
- Removable side panels for easy service
- Automatic peristaltic metering pumps accurately dispense detergent, sanitizer, and rinse aid
- Heater is encased in sheath to resist caustic detergents
- Digital temperature gauge built into switch panel
- Thermostat controlled wash tank
- Sensor activated low water cut off protects heater
- Sensor alerts operator when detergent or sanitizer are low

GT-24 washes up to 13 glasses per minute (800 per hour), and GT-30 washes 21 glasses per minute (1,260 per hour).

2 GPM of 75° F fresh rinse water with sanitizer is pumped In the rinse tank in a thorough spray pattern across the moving glassware. Cool rinse water means no waiting for a glass to cool. The rotary conveyor automatically stops when the clean glass touches the glass stop arm. Removing the glass starts the conveyor. Or, if extremely busy, the glass stop arm can be put aside so starting and stopping is controlled by the conveyor switch.

Rotation selection is based on work flow. If a side mounted switch panel is required, it must be specified when ordering. Please refer to spec sheets for details.

GT18 Rotary Glasswashers

More details available. Please visit www.glastender.com

There are 10 different GT18 models to select from to optimize your glasswasher throughput. 10 glasses per minute (600 per hour) capacity. Maximum glass height is 10", including pitchers and wine carafes.

Features:
- 90 day labor warranty
- Drive wheel and glass rack lift out for easy cleaning
- Two 16" diameter polypropylene racks are included
- 15 spay nozzles for maximum soil removal
- Automatic peristaltic metering pumps accurately dispense detergent, sanitizer, and rinse aid
- Digital temperature gauge built into switch panel
- Intelligent microprocessor control delays cycle start if incoming water is below 120˚ F
- Prime switch for quick chemical priming
- Recirculation pump for wash and rinse water
- 2 minute cycle, 70 second wash and 22 second rinse

Extended GT18+2 models have the drain table extended on one side of the glasswasher to hold more than one rack. This increases overall glasswasher throughput by allowing multiple racks of glassware to be pre-loaded for washing.

78" models come with three racks, and 90" models come with four. A leg set is included under the extended drain table.

Part #	Description
01000532	Glass rack
01000533	Dish rack
01000536	Glass rack insert for stemware
01000710	Clip-on chemical rail

Mug Frosters

More details available. Please visit www.glastender.com

Reach-in mug froster allows diverse glass storage and easy rotation of inventory while matching the look of the back bar coolers. Choose from black vinyl-clad, stainless front and sides, or all stainless. Matching backsplashes are available for a complete, consistent underbar design. All models have stainless steel top, sliding doors and interior, including evaporator housing and evaporator pan. 24" and 36" models have one door, 48" have two doors. Bottom rack is included on all models.

There are two defrost cycles: *automatic* occurs every six hours without affecting normal operation, *manual* is user selected six hour defrost with automatic restart.

Integrated toe kick and curb base mounts flat on all sides to seal to the floor. Condensate drains to an automatic evaporator so no drain connection is required. Condensing unit pulls out, and evaporator housing unplugs and lifts out for easy service. 5 year compressor warranty.

Capacity (based on 10 oz. mugs and 2 layers of shelves): 24" = 105, 36" = 175, 48"= 252.

Back Bar Refrigeration

More details available. Please visit www.glastender.com

Back bar coolers are available with up to four doors, and as self-contained or remote refrigerated. Coolers have black vinyl-clad steel exterior front and sides, and 180˚ swinging door. Nine door styles are available to satisfy diverse needs and decor. Edge cap on the laminated doors and compressor compartment covers protect laminate from chipping. Coolers are available without a finished top for integrated installation below a customer supplied bar top. 2008 Energy Star approved (except glass door units).

Unique end wall refrigeration design with evaporator located above the compressor compartment frees up interior space for maximum storage capacity. Recessed compressor compartment back and 90° electrical plug enables flush wall placement. Easy to remove condenser filter can be regularly cleaned to maintain condenser coil efficiency. Automatic and manual defrost cycles prevent ice build-up from impacting operation.

Leg sockets are recessed into the base, and 1/2" thick plastic threshold scuff plate protects lower door sill. Optional leg sets employ a unique recessed cup design to enhance durability. 16 gauge galvanized steel interlocking multi-bend base provides incredible strength and rigidity.

The all stainless steel interior with radius corners is easy to keep clean and meets NSF Standard 7 for open food containers on BB and ND models. Adjustable shelves have radius corners.

Glass ice displays and lighted liquor displays add functionality as well as visual appeal to the back bar. When mounted on a cooler at the factory, the 16" glass display units (GDU) have a rear deck that raises the lighted liquor display (LLD) above the back of the GDU, and the LLD has a front light channel to help illuminate the GDU (shown below).

The following units are made to order and not returnable: remote narrow door coolers, self-contained and remote low profile coolers, self-contained and remote pass-thru coolers, and front venting coolers.

24" Deep Back Bar Storage Units

More details available. Please visit www.glastender.com

Storage units have stainless steel interiors with black vinyl-clad or stainless steel exteriors. Stainless steel or laminated tops are sold separately. Bar liquor display (BLD) features a built-in light for illuminating bottles, radius step edges for easy cleaning, and step covers to reduce bottle noise. Bar glass storage (BGS) has four shelves for maximum storage capacity and radius shelf corners for easy cleaning.

Ice Display Units

More details available. Please visit www.glastender.com

Ice display units (IDU) can be factory mounted to the top of Back Bar, Narrow Door, Low Profile, Pass-Thru, Front Venting, and Rear Feed Coolers and Dry Storage Cabinets. IDUs are 7" high with 6" deep liner, 1/2" tall perforated bottom insert, and all stainless steel construction. Insulation and a breaker strip around the ice bin provide a thermal barrier. Stainless steel front, back and sides are standard; black vinyl-clad is optional.

IDU ice display unit

Glass ice display units (GDU) have double pane glass front and back with stainless steel trim, perforated insert and insulated end panels. Units larger than 54" include a center partition. Factory installed ice displays include a special stainless steel 1.5" high (not the standard 1" high) insulated cooler top with a built-in drain pan. Field installed units include a stainless steel insulated drain pan to mount to an existing countertop.

All ice displays are made to order and not returnable.

Lighted Liquor Displays

More details available. Please visit www.glastender.com

Lighted liquor displays (LLD) have illuminated 4" high and 4" deep steps with black vinyl-clad exterior, clear acrylic step cover, on/off switch, grounded cord and plug, and removable top for easy access to fluorescent light bulbs (included).

All ice displays are made to order and not returnable.

R or L part number suffix designates power cord position.

Glass display unit lighted liquor displays are taller than standard lighted liquor displays. The first step is 9.25" high to raise the bottles above the glass display unit, and it has a front light channel to help illuminate the GDU to add visual appeal. When mounted on a cooler at the factory, the 16" deep GDU models have a 8.25" rear deck space designed to fit the 8" deep LLD.

Factory mounted LLD behind glass display unit (GDU)

Back Bar and Underbar Miscellaneous

More details available. Please visit www.glastender.com

Back bar cash register

06003690

WRACK22

BO/CC

06001404 shelf divider

Part #	Description
06001419	Lighting, plug-in fluorescent light
06001425	Lighting, GE #F6T5 fluorescent light bulb
06001431	Lighting, rope light kit for BB24, BB36
06001432	Lighting, rope light kit BB60, ND48, ND52, LPT36
06001433	Lighting, rope light kit for BB84, ND72
06001434	Lighting, rope light kit for BB108
STLK1	Light kit for 1 mullion: ST48, ST60
STLK2	Light kit for 2 mullions: ST72, ST96
BBCR	Back bar cash register recess with locking drawer, fits between two adjoining self-contained back bar low profile coolers, 24" L x 24-7/8"
WRACK18	Wine racks, 2, for 18-1/16" shelf (not included)
WRACK20	Wine racks, 2, for 20-1/8" shelf (not included)
WRACK22	Wine racks, 2, for 23-7/8" shelf (not included)
06003690	Wine rack shelf, SS, slots for 9 bottles for 24" door
06003938	Wine rack shelf, SS, slots for 7 bottles for 20" door
06000041	Keg rack, SS, KC24
06001608	Keg rack, SS, BB & ND middle
06001609	Keg rack, SS, BB middle
06001610	Keg rack, SS, ND end
06000042	Keg rack, SS, PT end
06000043	Keg rack, SS, PT middle
BO	Bottle opener
CC	Cap catcher
BO/CC	Bottle opener & cap catcher

Part #	Description

Back Bar Refrigeration Parts and Accessories

More details available. Please visit www.glastender.com

Part #	Description
06004055	Condensing unit, 1/3 HP R134a, use within 25' of 1 remote cooler with 4 doors or less
06004054	Condensing unit, 1/2 HP R134a, use within 25' of 2 remote cooler with 6 doors or less
06001541	Condensing unit field installation kit for 2 remote units on 1 condensing unit: 1 filter dryer, 1 sight glass, 2 solenoids with 120V coils, 1 pressure control
06001542	Condensing unit field installation kit for 1 remote unit on 1 condensing unit: 1 filter dryer, 1 sight glass
06001589	Condensing unit solenoid (coil required)
06001590	Condensing unit coil (solenoid required)
CROSSRR	Crossover tube assy w 100 CFM blower motor from one refrigerator to another, 30"
CROSSWR	Crossover tube assy w 100 CFM blower motor from a walk-in cooler to refrigerator, 30"
CROSSWT	Crossover tube assy w 100 CFM blower motor from a walk-in cooler to wall mount tower, 30"
SHAFTRT	Air shaft assy w 100 CFM blower motor from refrigerator to beer tower, 72"
SHAFTWT	Air shaft assy w 100 CFM blower motor from walk-in cooler to beer tower, 72"
06001446	Blower motor, 15 CFM
06001447	Blower motor, 60 CFM
06001450	Blower motor, 100 CFM
06001547	Replacement clip for mounting kick rail to leg
CLEG	Replacement leg, 6"
06001560	Caster, swivel, 2.5" high
06001561	Caster, swivel w lock, 2.5" high
06001568	Caster, swivel, 3.75" high
06001559	Caster, swivel w lock, 3.75" high
06001566	Caster, swivel, 5" high
06001567	Caster, swivel w lock, 5" high
06001557	Pilaster
06001565	Clip, SS for pilaster
06001574	Thumb screw, SS for pilaster
00000018	Nut, acorn, 8/32" natural nylon
06001404	Shelf divider
06001281	Shelf, SS, fits BGS18
06001282	Shelf, SS, fits BGS24
06001283	Shelf, SS, fits BGS30
06001284	Shelf angle for BGS
06001278	Shelving floor, SS, fits BGS18
06001279	Shelving floor, SS, fits BGS24
06001280	Shelving floor, SS, fits BGS30

Part #	Description
06001399	Shelf, vinyl-coated, 18-7/8" x 20-1/8", fits BB24, BB36, FV24, ND72 middle door, end of remote PT
06001400	Shelf, vinyl-coated w corner notch, 18-7/8" x 22-1/16", fits end doors on BB, LP, both FV48 doors
06001401	Shelf, vinyl-coated, 18-7/8" x 23-7/8", fits middle doors on BB, LP, PT and RF models
06001402	Shelf, vinyl-coated, 18-7/8" x 18-1/16", fits end doors on ND models
06001403	Shelf, vinyl-coated, 18-7/8" x 22-1/16", fits end doors on PT and RF models
06001195	Shelf, galvanized, fits DS24
06000169	Shelf, galvanized, DS48, DS72 end door
06000170	Shelf, galvanized, DS72 middle door
CBS/SS_	SS backsplash, _ specify needed length in inches
CBS/SSL	SS side splash, left, 4"
CBS/SSR	SS side splash, right, 4"
SB24	SS back upgrade for 24" cooler
SB36	SS back upgrade for 36" cooler
SB48	SS back upgrade for 48" cooler
SB52	SS back upgrade for 52" cooler
SB60	SS back upgrade for 60" cooler
SB72	SS back upgrade for 72" cooler
SB84	SS back upgrade for 84" cooler
SB96	SS back upgrade for 96" cooler
SB108	SS back upgrade for 108" cooler
02000614	Drain screen for IDU, GDU
BB800005	15CFM blower, converts back bar refrigerator into direct draw system
BB800007	12CFM blower with shroud for direct draw
