## Delivering innovation for over 30 years.

Innovation.

Microsoft Hardware has continually raised the bar, designing revolutionary peripherals that deliver ground breaking performance, comfort and design.

1983		The Microsoft Mouse is born.
1987		The plug-compatible and comfort-focused contoured Microsoft Mouse is announced.
1995		Microsoft introduces the first computer mouse for children.
1997		Microsoft introduces the IntelliMouse Trackball with a finger-controlled scroll wheel.
1999		Microsoft introduces optical mice, the first major mouse advancement in 30 years.
2008		BlueTrack Technology™ arrives to enable use of mouse on more surfaces than ever before.
2011		Mouse 2.0 research becomes a reality with the new Microsoft Touch Mouse.
2012		Our smallest mouse ever. With four-way touch scrolling and works on virtually* any surface.

\*Except clear glass or mirrored surfaces.

# Great with 8.

Microsoft Hardware: Designed by Microsoft. Optimised for Windows.

Complete your Windows 8 experience with Microsoft Hardware – a family of products that work and play beautifully together. Our new products integrate and align with the Windows 8 for an intuitive, no compromise experience. With Microsoft touch mice you can experience fluid touch navigation on both touch and non-touch PCs. And specific features built for Windows 8, like Windows 8 shortcut keys, provide convenient access to most commonly used Windows 8 functions.

“Microsoft’s hardware team has a history of introducing small innovations that quietly change the way we use our PC.” *Computer Shopper.*

Reliability.

Our in-house reliability lab ensures nothing ships without passing a comprehensive battery of tests to simulate product storage, shipping and every-day usage conditions. During unique wear trials, mice are “run” between 85 and 215 miles to test performance\*, a distance comparable to travelling from London to Paris. Each keyboard product is required to pass millions of cycles of key pressing – more typing than any person does in a lifetime – while maintaining superior performance. The durability of mice and keyboards is also tested in multiple scenarios simulating contact with common chemicals including hand lotion and sweat. Our goal is to ensure the product stands up on day 1,000 as well as it did on day 1.

\*Microsoft Hardware Reliability Testing

## As if you were there.

Webcams are a great way to stay in touch with friends and family. The LifeCam Studio is the latest addition to the Microsoft webcam range. What sets it apart from its predecessors is Microsoft's first true 1080p HD widescreen sensor, delivering an even more detailed and clear video, so it's the closest to actually being there.

All our HD LifeCams are Skype certified. With Skype, you can share a story, celebrate a birthday, learn a language, hold a meeting, work with colleagues – just about anything you need to do together every day. It is free to start using Skype – to speak, see and instant message other people for example. You can even try out group video and screen sharing with the latest version of Skype.

### TrueColor.™

This advanced technology automatically delivers bright, colourful video under virtually all lighting conditions.

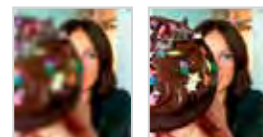

without TrueColor with TrueColor

truecolor™

### Auto Focus.

It works just like the auto-focus feature on your digital camera to keep your video sharp no matter how close an object is to the LifeCam.

without AutoFocus with AutoFocus

### ClearFrame.

Share the good times with all of your friends and family, even if they can't be there with you.

without ClearFrame with ClearFrame

## Control you can feel.

With the new **Wedge Touch Mouse**, you can comfortably navigate Windows 8 using Microsoft's touch technology – while at the same time wowing those around you with a mouse that looks and feels like no other.

Microsoft  
**Wedge Touch Mouse**

Windows 8 Windows RT      

### Microsoft Arc Touch Mouse.

Curve for comfort. Flatten to pack. Touch to scroll. With a dramatic design and easy elegance, this stylish wireless mouse features an arched back that collapses flat when not in use to conserve battery and packs easily away. Its most impressive feature is the touch-sensitive control strip which acts like a virtual scroll wheel and responds to your finger movement.

Windows 8 Windows RT   

### Microsoft Touch Mouse.

The Touch Mouse is designed specifically for the way consumers are using Windows 8. We mapped the gestures to the activities that Windows 8 customers use the most.

**One finger.** Four way scrolling at any speed.  
**Two fingers.** Show app commands, switch apps, show charms.  
**Three fingers.** Zoom in and out.

Windows 8 Windows RT   

### Microsoft Sculpt Touch Mouse.

Looking for a portable mouse that helps you get things done? Sculpt Touch Mouse saves time in long documents. The four-way touch strip lets you breeze up and down, left and right, and through windows and documents with just the swipe of your finger. It works virtually anywhere, with no cables or transceivers to connect. And it's designed to fit comfortably in either hand.

Windows 8 Windows RT      

\*Except clear glass or mirrored surfaces.

## Engineered for precision and style.

Every day, Microsoft Hardware products enhance the way people work, play, and interact. New eye-catching solutions follow sleek modern design trends without compromising on performance and are engineered for convenience and style. Great new technology features like BlueTrack™ and Touch are designed to provide the best computing experience while fitting with your lifestyle, delivering great performance. Use your mouse while you are having a picnic or on the living room floor or even your trouser leg. There's so much more than meets the eye with these artful mice.

## Show off your style.

A number of products in our range come in a variety of colours so you can get outstanding performance while adding a splash of colour to your life.

Microsoft  
**Wireless Mobile Mouse 1000**

Microsoft  
**Wireless Mobile Mouse 3500**

BlueTrack Technology – Microsoft exclusive technology ensures you can use your mouse on almost any surface,<sup>1</sup> rough, glossy or textured.

<sup>1</sup> Except for glass or mirrored surfaces

Wood

Granite

Carpet

### Nano Transceiver

Easily snaps into the bottom of the mouse for storage or stays plugged into your PC without getting in the way.

## Contoured for comfort.

The only object you touch more than your mouse and keyboard is your pillow,<sup>1</sup> which is why ergonomically designed hardware is so important for both your comfort and your health while using your computer. The Microsoft Hardware team study the way people interact with computers to design peripherals that work seamlessly with you – not against you.

### Wireless Comfort Desktop 5000.

Delivers comfort through curved styling and wireless connectivity. The ergonomist-approved curved keyboard design encourages natural wrist posture and is easy to use. The mouse features BlueTrack Technology™ and a 2.4GHz wireless USB mini transceiver that connects wirelessly right out of the box.

Microsoft  
**Wireless Comfort Desktop 5000**

Microsoft

Microsoft  
**Sculpt Comfort Keyboard**

The **Sculpt Comfort Keyboard** is packed with ergonomic features including a contoured keyset, removable padded palm rest, and palm lift. These features are designed to encourage a more natural, relaxed positioning of the arms, hands, and wrists.

### Charm Keys.

Windows 8 specific Charm Keys are built into the Sculpt Comfort Keyboard to make operations easier. You can control search, share, devices and settings without moving your fingers away from the keyboard. The Charm keys are keys F5 through to F8.

### Natural and Comfort Range.

Microsoft is the leader in ergonomic keyboard and mouse design, with ground - breaking innovations such as the fixed ergonomic keyboard layout, padded palm rest, palm lift, curved keyboard bed, and natural arc design. These are documented to reduce muscle strain, improve wrist posture, and provide a more healthy and comfortable computing experience. **94% of users who own a Comfort Curve keyboard would recommend it.**<sup>2</sup>

# Consumer Products.

Your connection to a great PC experience.

## What to look out for:

2.4 GHz	Microsoft 2.4 GHz wireless delivers a reliable connection with up to a 30-foot range, with virtually no interference.	Bluetooth Technology	This Microsoft exclusive technology ensures you can use your mouse on almost any surface <sup>1</sup> , rough, glossy or textured.
Ergonomic	Endorsed by ergonomics professionals at Microsoft.	Bluetooth®	Experience a fast, 30-foot-range Bluetooth® connection without giving up a USB port.
Windows	Works on your Windows PC.	XBOX 360	Works on your Xbox 360 console.
Four-Way Scrolling	Breeze through documents, media files, and web pages easily by using the four-way tilt-scroll wheel.	Windows 8	Windows 8 shortcut keys provide convenient access to commonly used Windows 8 functions.
Comfort Curve	The curved shape of Microsoft ergonomic keyboards promotes a more natural hand, wrist, and forearm posture.	truecolor™	An advanced technology that automatically delivers bright, colourful video under virtually all lighting conditions.
Laser Technology	For a more responsive, more precise, smoother-tracking mouse performance compared to optical technology.	Four-Way Touch scrolling	Scroll vertically AND horizontally using the sleek touch strip. Flick up, down, and side to side to navigate around.
Spill Resistant	Designed to withstand an accidental spill.	Optical Technology	For smooth, precise mouse control.
Battery Life	Indicates the battery life in months.	Easy Audio Switching	Automatically switch from music to your audio call.
Media Keys	Easily navigate to next track, previous track, play, pause, and volume controls.	Quiet Touch Keys	Quiet Touch keys let you focus on the task at hand.
Android	Compatible with Android.	Skype Certified	Certified to provide an optimal Skype experience.
Mac	Compatible with Mac.	Zoom	This indicates the amount of digital zoom. Delivering realistic, up close and-personal video.

<sup>1</sup> Except for glass or mirrored surfaces
