PRINTRONIX VALUE COMMITMENT

- *Exceptional Service*
- *On-time Deliveries*
- *World Class Quality*
- *Value You Can Depend Upon!*
- *All at a Competitive Price*

ABOUT PRINTRONIX

Printronix is a leader in business-critical printing solutions, offering the most-trusted selection of ultra-reliable printers, services, supplies and parts for environments demanding top reliability and low printing costs. The company offers the two most-trusted brand names in industrial, back office and supply chain printing, Printronix and TallyGenicom, known throughout manufacturing, distribution, retail, banking, healthcare, government and other enterprises across the globe. The combined brand portfolios include the highest-quality line matrix and service management solutions. Printronix was founded in 1974 and is headquartered in Irvine, Calif.

THE GENUINE PRINTRONIX ADVANTAGE

Since supplies used in a printer are a critical element of the printing system, their design, specification and selection are of utmost importance. Printronix, with its years of experience in the design of printers and their applications, promises that you will receive the exact materials required to maximize the performance of your Printronix printer.

Genuine Printronix Supplies provide superior quality. They are manufactured to our demanding specifications and quality is checked and controlled from raw materials to delivery to your door.

Satisfaction is guaranteed. If any Printronix supply item does not meet your expectations or the demands of your application, it is replaced or your purchase price is refunded.

Say “Yes” to Printronix / TallyGenicom Original cartridge ribbons

Printronix has been manufacturing printers for over 40 years, and is the expert on both the manufacturing of the printers and its ribbons. The value of a printing solution is measured by the quality and reliability of its output. Having a quality output depends on both the printer and the consumables quality.

You may save money initially but when it comes to print quality, then no other ribbon can match the Genuine Line Matrix Printer ribbons produced by Printronix.

What are the Benefits of using Original Supplies?

- Ribbons backed-up by the Manufacturer Warranty – Printronix stays behind its brands
- Longer Lasting Ink = Provide page yield expected & contribute to a lower cost of ownership
- Less IT Interventions = Reduce downtime
- Embedded Microchip = Provide integrated control over the ribbon life print quality & operating costs
- Easy, fast & clean change of the ribbons
- Backward compatibility with older Line Matrix printers

Genuine Printronix / TallyGenicom Ribbons deliver better and more consistent print quality along with a lower total cost of ownership

Serial Dot Matrix Printers

S809/S828 SERIAL DOT MATRIX PRINTERS

	Max print speed	Print head	Emulation Support
S809	900* cps / 300lpm@80 Chars/line *High Speed Draft @10 cpi	24-pin	Epson ESP/P LQ, IBM Proprinter XL24, IBM 2391
S828	800* cps / 330lpm@80 Chars/line *DP mode @10 cpi	18-pin	Epson FX, IBM Proprinter III XL, IBM 2381, ANSI 3.64

- Primary Forms Path: Front primary – Up to 8-part
- Secondary Forms Path: Front secondary – Up to 8-part
- Tractors: 6-pin
- Standard interfaces: Parallel, Serial (RS-232),
- USB 2.0, 10/100BaseT Ethernet
- MTBF: 20.000 hours
- Auto forms thickness adjust
- Acoustics: 54 dBA – **50% quieter than leading competitors**
- Remote Printer Management Utility

S809: Reliable, industry leading 24-pin price/performance built to be the toughest, fastest and quietest in its class.

The Printronix S809 Serial Matrix Printer combines 900 cps print speed performance with best in class printhead life, workload capacity, and reliability. S809 meets & exceeds output requirements while maintaining the lowest possible cost of ownership. In addition, the extended life ribbon delivers 25% more yield than most competitive offerings. S809 boosts ease of use through a high-function, multi-lingual operator interface, and minimizes user intervention through fully automated & customizable forms handling.

S828: The ultra rugged, IBM compatible, desktop print solution built to excel in the most rigorous industrial environments; Optional: IPDS

The Printronix S828 sets a new standard for the ultimate in rugged desktop reliability and builds upon the workhorse tradition of Printronix industrial printers delivering maximum uptime, low cost of ownership, and reliable operation across a wide range of environments. S828 is the highly functional & durable metal construction designed to outlast any other printer in this category. For IBM environments, the S828 offers genuine IBM IPDS for absolute compatibility and functionality.

Line Matrix Printers

LINE MATRIX PRINTERS

- *Printronix invented the concept of line matrix printing in 1974, and has enhanced its line matrix printers through six generations of technological developments.*
- *Typically, 5-6 times less expensive than the operating costs associated with laser, Printronix line matrix delivers significant cost savings in all high volume applications.*
- *Printronix line matrix printers are used for text, barcode and graphics printing within a wide range of business critical applications.*

TYPICAL LINE MATRIX PRINT APPLICATIONS

Typical Text Printing Applications	Typical Bar Code Printing Applications
Data processing reports	Shipping Labels
Invoices	Receiving Labels
Packing slips	Work in process labels & tags
Pick Lists	Asset Labels
Inventory reports	Wide range of bar coded labels & tags
Parts listings	Broadcast labels (large labels)
Multi-part forms	Assembly documents
Bank/Customer Statements	Bills of Lading

Go back to Table of Content

Dual branding for Line Matrix printers

In an effort to rationalize our product lines and offer the best of both brands to users, as well as to respond to requests from customers, effective April 1, 2019, our P8000 and 6800 Line Matrix Printer Series will be dual branded and include as standard the full suite of Printronix and TallyGenicom printer emulations and languages*.
Part Numbers & Pricing for the P8000 and 6800 will remain the same.

*PTX/TG Bundle Firmware V3.66B

PRINTER SETUP AND BOX CONTENT

With the new printers, the desired Printronix or TallyGenicom emulation can be selected during installation, and at any time later.

On the printer, you will find both Printronix and TallyGenicom logos. It will be possible to keep both logos or only one of them, according to user preference. Please note that the starter ribbon in the printers will also be dual branded

Go back to Table of Content

Dual branding for Line Matrix printers

ORDERING INFORMATION

Current Product Numbers specific to each brand will stay unchanged:

You will be able to continue ordering a Printronix P8000 printer, with the same Product Number as today and receive the new dual branded model. In a similar way, you will be able to order a TallyGenicom 6800 printer with the same Product Number as today and receive the new dual branded model.

Box content for similar Printronix P8000 and TallyGenicom 6800 printers will be identical.

Regarding Service, the Service part numbers in the price list are going to be consolidated to common part numbers to simplify ordering.

Please note that **OpenPrint models are not affected**. These printer models and consumables will stay unchanged, and will continue to be Printronix branded only.

Go back to Table of Content

Printronix/TallyGenicom Consumables

To maximize consumables flexibility, both Printronix and TallyGenicom branded cartridges will work on the dual branded models.

However, if your customer has already Printronix printers, you will have to supply him with Printronix Consumables as the older printers do not have the new brand-agnostic firmware

For instance, if an end user has 10 Printronix branded printers and decides to purchase a new printer with TallyGenicom emulation, it's recommended for them to purchase Printronix branded ribbon so they can use the same ribbon across all 11 printers.

However, if for some reasons the end user decides to change to TallyGenicom branded ribbon, only the new printer can accept the TG ribbon and the 10 older printers as the 10 older printers do not have the new brand-agnostic firmware.

P8000 CARTRIDGE LINE MATRIX PRINTER

- Available models : Open Pedestal, Open Pedestal Zero Tear and Cabinet Models
- Standard and Extended Life Cartridge backwards compatible to P7000 Cartridge models.
- New Pedestal enclosure with smaller footprint
- Standard Ethernet, USB 2.0, and Serial Connectivity
- All P7000 Emulations supported
- 128MB DRAM / 256MB Flash Memory
- Larger icon based op panel display
- Enhanced Printer Web Page Functionality

P8000 Cartridge Printers Deliver New Designs, Enhanced Convenience and Lower Operating Cost

Printronix introduces design enhancements and improved functionality with the P8000 Cartridge Printer series to achieve the broadest flexibility, greatest compatibility and lowest ownership cost of virtually any other print technology. The series builds upon the workhorse tradition of all Printronix line matrix technology delivering maximum uptime, low cost of ownership, and reliable performance. The P8000 series is the ideal solution for buyers looking to minimize operating expense without sacrificing output reliability, regardless of operating environment.

OPENPRINT CARTRIDGE SERIES OF LINE MATRIX PRINTERS

Unlock the low cost, industrial strength advantages of LINE MATRIX TECHNOLOGY for your enterprise printing needs.

All of your industrial strength ERP and business critical software applications deserve an industrial strength printing solution. No matter what is driving your company's network. ORACLE®, SAP®, LINUX®, WINDOWS®.

You need a printing system that can stand up to the rigors of the toughest workplaces and deliver the connectivity and flexibility offered by OpenPrint. With proven high reliability, up-time performance and environmental responsibility that ***only*** *line matrix offers. All delivered by the power of OpenPrint from Printronix.*

- GRAPHICS = Prints graphics easily and with clarity. Forms can be designed and printed with enhancements such as non-gray scale logos, illustrations and graphics.

- FONTS = Prints the full range of fonts and sizes, from 6 point to poster size. Any font that is embedded into your file, whether PostScript or PDF, will reproduce with ease
- BAR CODES = Scannable and accurate. With Printronix's sure scan technology, your forms can print this essential tracking capability with guaranteed success.

- NO CODING REQUIRED = Designing and modifying business forms is quick and easy. Use any GUI form design program. Even Microsoft Word!
- HIGH DEFINITION LINE MATRIX PRINTING ACHIEVES THE HIGHEST LEVEL OF CONNECTIVITY AND PRODUCTIVITY = The industrial strength benefits of line matrix printing are no longer limited to only Windows. OpenPrint enables connectivity to any modern network environment with the addition of PostScript and PDF printing. New forms and applications can be created easily and instantly.

P7000 CARTRIDGE LINE MATRIX PRINTER

Printronix P7000 Cartridge line matrix printers transformed product innovations into the Power of Plus. Seamless integration into your current workflow will enable you to reap the benefits from the improved reliability, productivity and environmental advantages.

Compared to the previous generation of line matrix spool ribbons, the P7000 Cartridge ribbons having better print quality, better reliability and less waste, which will then result in better total cost of ownership in the long run.

All models are ENERGY STAR® qualified. The High Definition P7000 Cartridge models offer a proven plug & print alternative for expensive and unreliable laser printers.

The P7000 Cartridge printers is End of Sales since the 11/30/2013 and have been replaced by the P8000 Cartridge printers.

P8000 – P7000 CARTRIDGE SERIES CONSUMABLES

The certified Printronix Cartridge Series of Line Matrix Printers provides a flexible design, adaptable functionality and manageable savings including the lowest cost for consumables and total cost of ownership.

- LONGER LASTING INK = Fewer ribbon changes yield more productivity and contribute to a lower cost of ownership.
- LEADING EDGE RIBBON TECHNOLOGY = Less IT interventions reduce downtime, with a patented ribbon jam prevention system. The high-density ribbon yields a longer life and a darker print quality.
- EMBEDDED MICROCHIP = Provides precise, integrated control over ribbon life, print quality and operating costs. Productivity is improved by preventing interruptions of long print runs.
- CARTRIDGE RIBBON DESIGN = With the self-contained cartridge ribbon, changing ribbons is easier, cleaner and faster when compared to spool and laser printers.
- ENVIRONMENTAL ADVANTAGE = Line matrix consumables are inherently greener than serial or laser printer consumables, able to print on paper with a higher percentage of recycled content.
- EASY TO INSTALL = Quick and easy to change without requiring any special training, a cartridge ribbon virtually guides itself into the printer saving time and reducing load errors.

P8000 - P7000 CARTRIDGE SERIES CONSUMABLES

Improvement In Consumable Cost Per Page

In comparison to the previous generation line matrix spool ribbon, cartridge ribbons having better print quality, better reliability and less waste, which will then result in better total cost of ownership in the long run. The cartridge ribbon does more with less, yielding a longer print life and a more uniform print quality. It is easier to use, cleaner and requires no special user technical skills, reducing labor costs. And compared to laser technology, line matrix offers far better environmental advantages by producing less waste.

Standard Life

STANDARD LIFE CARTRIDGE

Lowest cost per purchase for customers with a restrictive budget. Available in a single pack. This ribbon cartridge fits all P8000 and P7000 cartridge printer models

Extended Life

EXTENDED LIFE CARTRIDGE

For customers seeking a lower operating cost per page. Available in a four pack for greatest cost savings. This ribbon cartridge fits all P8000 and P7000 cartridge models, except the 500 line per minute models.

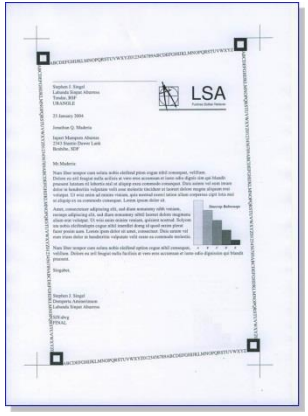
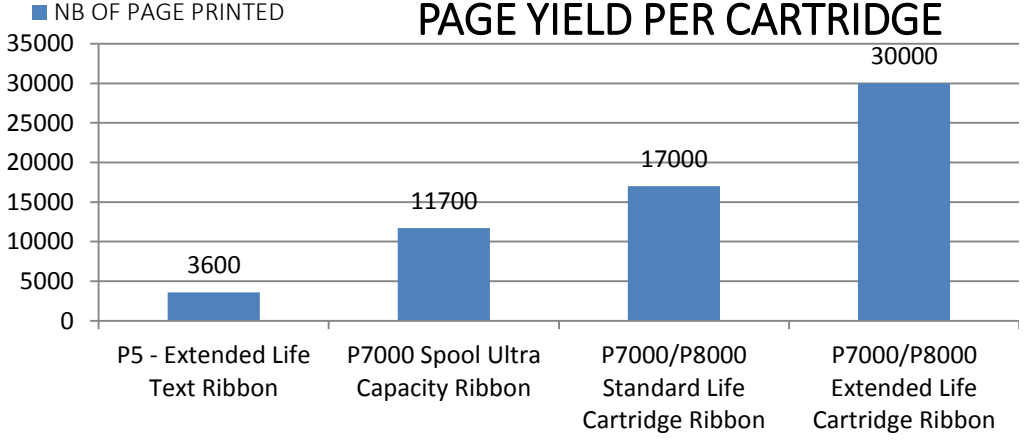
P8000 & P7000 CARTRIDGE SERIES CONSUMABLES PAGE YIELD



The page yield enables us to perform accurate comparisons across our products as well as any competitor products. Our research shows that the most likely competition for our printer is a laser printer. By rating in pages, we make it easier for users to compare and see our substantial cost advantage. Additionally, the page test protocol is a much better indicator of real life consumable yields compared with older character based ratings. The difficulty with character yield comparisons is that manufacturers use different tests, settings, applications and environments to produce a character yield. There are no published comparisons of how one manufacturer derived a character yield versus other manufacturers.

Cost Per Page Comparison and Page Yield Per Cartridge based on ISO LSA Page, 8.5” x 11”(216X279cm) letter-size, approximately 5% page coverage.



ISO/IEC 19752:2004 Information technology -- Method for the determination of toner cartridge yield for monochromatic electrophotographic printers and multi-function devices that contain printer components http://www.iso.org

P8000 - P7000 CARTRIDGE CONSUMABLES Q&A

- "What benefits does a cartridge provide over spool ribbons?"
  - *The cartridge delivers four key advantages over spool based printers:*
  - ***Clean Hands*** *- No need to touch and thread the ribbon fabric through the print mechanism.*
  - ***Easy To Install*** *- Quick and easy to change without requiring any special training, a cartridge ribbon virtually guides itself into the printer saving time and reducing load errors.*
  - ***Uniform Print Quality*** *- The new cartridge technology continually flips and rotates the ribbon to distribute wear over the entire surface resulting in more uniform print quality and improving the readability of documents and labels.*
  - ***Longer Ribbon Life*** *- In addition to print quality enhancements, the continual flipping and rotation of the ribbon allows the user to maximize the amount of ink in the ribbon fabric improving real-life performance over spool ribbons. The result is the longest ribbon life for a Printronix line matrix printer, providing more productivity and less interruptions during long print jobs.*

- "What cartridge ribbons are available for the P8000 - P7000 & OpenPrint family of line matrix printers?"
  - *The P8000 - P7000 & OpenPrint cartridge ribbon line-up provides customers choice and flexibility to manage consumable costs. Customers can chose from the following options to match their print volume and budget.*

Standard Life Cartridge – Single Pack	Lowest cost per purchase for customers with restrictive budget. Available in a single pack. This ribbon cartridge fits all P8000 - P7000 & OpenPrint printer models.
Extended Life Cartridge – Four Pack	For customers with budget flexibility and seeking the lowest operation cost. This cartridge ribbon fits all P8000 - P7000 & OpenPrint printers EXCEPT 500 line per minute models.

Go back to Table of Content

P8000 - P7000 CARTRIDGE CONSUMABLES Q&A

- "What is the page yield for the P8000 - P7000 & OpenPrint per cartridge ribbons?"
  - *The Standard Life cartridge page yield is 17,000 pages, the Extended Life cartridge page yield is 30,000 pages and the Extended Life Cartridge Ribbon for OpenPrint Models is 34,000 pages.*

- "What is the page yield for the P5000 and P7000 spool ribbons?"
  - *The P5000 27M Spool Ribbon page yield is 3,600 pages and the P7000 Ultra Capacity Spool Ribbon page yield is 11,700 pages.*

- "What cartridge ribbons are available for the P7000HD and OpenPrint family of line matrix printers?"
  - *The P7000HD and OpenPrint cartridge ribbon line-up provides customers choice and flexibility to manage consumable costs. Customers can chose either Standard or Extended Life cartridges to match their print volume and budget.*
  - *The P7000HD and OpenPrint Cartridge family offers all the standard features and reliability found in the P7000 series. Additional benefits of the High Definition family are that they support a virtually limitless array of font styles, sizes and graphics. They provide all the necessary print resolution and system capabilities to easily drop into any Windows based laser print environment without any application modifications or special accommodations.*

"Why did you choose a page rating?"

- *The page yield enables us to perform accurate comparisons across our products as well as any competitor products. Our research shows that the most likely competition for our printer is a laser printer. By rating in pages, we make it easier for users to compare and see our substantial cost advantage. Additionally, the page test protocol is a much better indicator of real life consumable yields compared with older character based ratings. The difficulty with character yield comparisons is that manufacturers use different tests, settings, applications and environments to produce a character yiel comparisons of how one manufacturer derived a character yield versus other manufacturers.*

Go back to Table of Content

P8000 - P7000 CARTRIDGE CONSUMABLES Q&A

- "What is the main benefit to using genuine Printronix cartridge consumables?"

  The embedded microchip provides you precise, integrated control over ribbon life, print quality and most importantly, operating costs. Productivity is improved by preventing interruptions during longer print runs.

- "Can I view the ribbon cartridge life indication remotely?"

  Yes. PrintNet Enterprise enables the user to view ribbon life anywhere remotely via a simple web browser. Even better, PrintNet Enterprise can be set to issue your web enabled portable device an e-mail once the ribbon life is low and again when it is out.

- "Can I track ribbon usage on the P8000 - P7000 & OpenPrint cartridge?"

  Yes. The printer keeps track of the quantity and types of all cartridge ribbons used on the machine. This log can be checked at any time, and viewed remotely via PrintNet Enterprise, to determine how fast and how many ribbons your operation is consuming.

- "Does the P8000-P7000 cartridge ribbon work with the Integrated Print Management System?"

  Yes. The system provides the customer with control over ribbon life and print quality. The system default is set for high print quality. It recognizes when a new ribbon has been installed, tracks ribbon usage and alerts when the ribbon needs to be replaced. Users can set the ending darkness to meet quality needs or extended life.

- "What if I run all kinds of different jobs, will the cartridge ribbon life indication remain accurate?"

  Yes. The system uses a sophisticated algorithm that tracks usage in all the various section print patterns shift, it will use different parts of the ribbon, but this is all tracked and indication then is the life remaining in whatever is the most depleted section of the ribbon.

Go back to Table of Content

P8000 - P7000 CARTRIDGE CONSUMABLES Q&A

- "If I exchange partially used cartridge ribbons before they are depleted will the ribbon life indication remain accurate?"
  Yes. A ribbon can be removed and replaced at any time, and the system will correctly tell you the ribbon life remaining on the currently loaded ribbon.

- "What happens when the ribbon cartridge life reaches the end?"
  The life indication will continue to count down until the remaining life gets low. At this point, the system will warn of a Ribbon Life Low condition. The indicator lamp will flash, the warning message will be displayed, and optionally e-mail alerts will be issued. Printing however will continue without any interruption. Once the remaining two percent is consumed the printer will stop to prevent the print quality from degrading below the set limit. The error lamp will flash, the audible alarm will sound, the display will indicate that the ribbon needs to be replaced, and optionally an e-mail alert will be issued.

- "At what point is the cartridge ribbon low warning issued?"
  Like the darkness set point, this is fully adjustable. The factory default is to declare Ribbon Low at 2% life remaining.

- "If my ribbon cartridge life reaches zero and the printer stops, can I at least finish my printing?"
  Yes. By returning the printer to the on-line state, it will resume printing for approximately two more minutes. If still a bit more printing is needed, the printer can continue to be returned to the on-line state to gain extra minutes of operation. This process can be repeated indefinitely to extend printing as long as desired.

- "Can I program my printer to not stop if the end of ribbon life is reached?"
  Yes. Under the Advanced User section of the printer menus, you can select an option to ignore the ribbon end point. The ribbon life indication will continue to work, but no warnings will be issued and the printer will not stop once the life reaches 0%. Responsibility for insuring the proper change interval reverts back to the user.

P7000 SPOOL LINE MATRIX PRINTERS

*The **P7000 Ribbons family** offered seven models, all designed to meet the needs of offices, industrial companies, and distribution centers requiring unsurpassed impact printing. Advancing its industry leading web-enabled remote management capabilities, and coupling a host of reliability and usability enhancements, the P7000 printer represented the best line printer ever made and the ideal solution for high volume low cost printing of mission critical reports, forms and labels. The P7000 Spool Line Matrix Printers are End of Sales **since the 12/24/2010** and now in Limited Support : This is defined as products where there may be issues in sourcing spare parts and/or performing repairs. In this case, Printronix will do best efforts to support, as parts may not be readily available. Technical support will no longer be available. Consumables are still sellable (cf. to next pages).*

P7000 SPOOL LINE MATRIX RIBBON LINE UP & SPECIALTY RIBBON

Printronix has expanded our offering of highly reliable line matrix printing ribbons to give P7000 users the lowest cost per page, darkest print and longest life. These ribbons contain the necessary ingredients to be read by infrared OCR and bar code scanners, and produce sharp high-contrast bar codes and text.

- **P7000 & P7000ZT Ultra Capacity** – This ribbon has been the gold standard for years and continues to offer the same benefits as before. It is a workhorse solution for most report and label printing applications.

Part Number	UPC	Description	Capacity Million Chars
179499-001	89072100054	Spool RIBBON,6PK,ULTRA CAPACITY,P7 (pack of 6)	81M

NOTE: Sold in pack of 6 Ribbons

- **P7000H & P7000HD Ultra Capacity HD PLUS** – These ribbons offer the lowest total cost of printing, longest ribbon life and fewest user interventions. This ribbon is designed for higher-use customers in manufacturing,

P7000 SPOOL RIBBONS - Q & A

- "Which ribbon is right for my application?"

  The P7000 Spool Ultra Capacity ribbon is the right choice for most applications. It has been designed to give the darkest starting print, longest life, and lowest cost per page. It contains the necessary ingredients to be readable by infrared OCR and bar code scanners, and produces sharp, high contrast bar codes and text.

- "When would I require the P7000 Spool Label ribbon?"

  The ink used in the Ultra Capacity ribbons may not provide optimum images with some shiny or coated label face stocks. In these cases, Printronix recommends our specialty P7000 Spool Label ribbon, designed specifically for these applications.

- "Will the same P7000 Spool ribbon fit the pedestal and quiet cabinet models?"

  Yes. The 179499-001 - P7000 Spool is the same size and is designed for the larger P7000 Spool Ribbons.

  As part of the new pedestal design for the P7000 Spool family, the interior capacity was increased to enable it to handle the new, larger size. So unlike its predecessor, there is no longer a difference in spool sizes between the pedestal and quiet cabinet models.

- "Are the P5000 and P7000 Spool ribbons interchangeable?"

  No. The P7000 Spool ribbons are too large to physically fit in either the pedestal or quiet cabinet P5000 printers. Additionally, the new easy load hub on the P7000 Spool will not accommodate the older P5000 spool design.

- "What is the comparable cost of operation between a P5000 and P7000 Spool?"

  The P7000 Spool ribbon, unique ink formulation actually delivers more yield per unit than the P5000 ribbons. These savings are passed on to the user resulting in a decrease in the cost per page over the already economical P5000 ribbons.

Go back to Table of Content

P7000 SPOOL RIBBONS - Q & A

- **"If the cost of operation is better than the P5000, why do the P7000 Spool ribbons have a higher price?"**
  Operating cost is based on cost per volume of printing. Since the P7000 Spool ribbons yield more than any comparable P5000 ribbons, the price will be higher on a per spool basis. However, if you divide the spool price by its yield, you will see that you are saving money with the P7000 Spool.

- **"Can I buy the ribbons for the P7000 Spool from my current Printronix supplier?"**
  Yes. All existing suppliers of Genuine Printronix ribbons have access to the new P7000 Spool suite of ribbons.

- **"I do not use Genuine Printronix Supplies today. Can I continue to buy from my existing supplier?"**
  Yes. Many of these suppliers have access to Genuine Printronix Supplies. However when buying Original Printronix Supplies, the Spool ribbons are backed up by the Manufacturer

- **"Why should I use Genuine Printronix ribbons for my P7000 Spool?"**
  The number one reason is reliability. Most manufacturers of third party ribbons use excessive, inconsistent, or low quality ink. Even if the resulting print quality is found to be acceptable, the impact on the mechanism is not. These poor formulations shed their ink into the hammer bank and eventually stop it from printing. The only cure is an expensive tear down and clean up of your printer by a trained service personnel. Since this is a common problem in the field and is not a printer malfunction, these service calls are typically not covered by your service contract.

- **"Are there other brands of ribbons that will fit my P7000 Spool?"**
  The P7000 Spool ribbon is a brand new product and at the time of its introduction, we are only aware of Printronix and IBM branded ribbons that will function properly. Typically, the compatible manufacturers will wait until they see sufficient demand in the market before proceeding with making their own products.

- **"I have found a third party ribbon for my P7000 Spool which the printer identifies as "Unauthorized OEM", what does this mean?"**
  This product will work on your P7000 Spool, but the design is not suitable to prevent ink contamination and does not correctly report its characteristics to the Integrated Print Management system. Since the correct data is not provided, the ribbon life indication will not work and has been disabled. Furthermore, your service provider will be able to tell that your printer has been running Unauthorized supplies and may charge for any ink contamination related service calls. We recommend using Genuine Printronix Supplies.

P5000 SPOOL RIBBONS - Q & A

- "Why can't I run my existing ribbons on the P5220 & P5224?"

  Although they may look similar, they are in fact quite different. The 2000 LPM printer achieves its high print speed by virtue of having dual rows of hammers. It is almost like two line matrix printers stacked on top of one another. This unique geometry, coupled with high speed printing, places very special demands on the ribbon design. The Gold Series 2000 ribbon has been specially designed and patented to be optimized for this unique configuration.

- "To simplify things, could I switch the ribbons for all my printers to the Gold Series 2000?"

  The simple answer is no. This ribbon is designed to deliver superior print quality on the high speed P5220 and P5224. This superior quality is the result of a unique ribbon design, which has been patented by Printronix.

- "Why are the spools different between the P5220/P5224 and my other printers?"

  The P5220/P5224 hub is larger to prevent the loading of an incorrect ribbon. Superior print quality occurs only with the patented Gold Series 2000 ribbon.

- "Is there really that much variation and importance in ribbon design?"

  Yes. Although the concept is very simple, the details of the design are very critical. If the ribbon is too thick, it will produce a fuzzy image. If it is too thin, it won't supply enough ink. If the ink dries too fast, it won't last once exposed to air. If it dries too slow, it will smear. If it is too moist, it will clog the print hammers.

  If it does not have enough ink, it will run out too quickly. If the ink flows too easily, it may flow to the bottom of the ribbon. If it flows too slowly, it might not support a high enough print speed. If the ink is not dark enough, it will produce low contrast printing and poor bar codes. If it has too many or the wrong darkening agents, it will damage the printer.

  Similarly, the design of the printer introduces a whole other set of variables that effect ribbon design. How fast will the ribbon move past the hammers? How fast are the hammers striking? How close are they to each other? How big are the tips? The list of questions and complex tradeoffs goes on and on, which is why it is so valuable that Printronix engineers both the ribbon and the printer to work together. The performance yielded from the Gold Series ribbons is a great testimony to what can be achieved with total design control.

Go back to Table of Content

P5000 SPOOL RIBBONS - Q & A

- **"Why does my generic ribbon print darker than the Printronix ribbon?"**

  This is a true indication of an over-inked ribbon. Many generic ribbons contain excessive ink and appear to print darker. These ribbons will lead to expensive repairs due to ink migration onto the print hammers. When ink builds up as gummy, sticky deposits in the hammerbank, print quality deteriorates. This can result in the most costly repair in the printer. Often service contracts will not cover these repair costs. Printronix ribbons have a precisely controlled ink load and are guaranteed to prevent ink migration problems.

- **"Aren't all printer ribbons similar and made with similar inks?"**

  The selection and use of the ink formulation incorporated in any printer ribbon is dependent upon the impression method of the printer, the paper or label material upon which the data is to be printed and the eventual application and use of
  the data or graphics created. The ribbon inks used in Genuine Printronix Ribbons are formulated for consistency, quality and extended life with your applications in mind.

- **"What causes the quality and darkness of my printed output to change drastically every time I change my printer ribbon?"**

  If not properly controlled during manufacturing, the amount of ink within a new ribbon can vary not only between various suppliers, but also from batch to batch from a single vendor. These variations of ink content can produce significant inconsistencies and quality variations in your printed data and bar code applications. Ideally, ribbons should have an initial inking level of approximately 19% by weight. Below this level, useful ribbon life will be significantly reduced.
  Above this level, spreading and smearing of barcodes and characters will be observed.

- **"Why is there a Ball Shot attachment instead of a mylar leader?"**

  In a continuous drive to improve ribbon quality and reliability, we have found the mechanical security of ball shot ribbon attachment superior to previous adhesive based attachment methods. The benefit is more uptime with fewer possible interruptions. The ball-shot attachment is combined to a stitched wire that

Stitched wire giving the signal to reverse

Go back to Table of Content

P5000 SPOOL RIBBONS - Q & A

- **"Are there any specific instructions to install the ribbon with the ball-shot attachment?"**

  After removing your ribbon spools from the shrink wrap, please install the ribbon as received. DO NOT WIND THE RIBBON so all of the fabric is on one spool or you will experience ribbon reversing problems.

- **"Will static from a ribbon cause printing problems?"**

  In recent testing we have found a number of non-Printronix ribbons can generate static during the printing operation. This electronic discharge (static) can result in printer stoppage, controller logic resets, and (in the worst cases) damage to electronic components in the system's circuits. Genuine Printronix ribbons are specifically manufactured with high impact styrene spools that have been selected and tested to prevent potentially destructive static build up.

- **"How important is ribbon quality when printing bar codes?**

  Control of ink spread is most critical in any bar code application. You must ensure that the space elements between bars remains a constant width and that the code remains scanner readable without variations or errors. It is also required that the ink be uniformly dispersed along the entire length of the ribbon to eliminate variations in print density during the ribbon's productive life. Genuine Printronix ribbons are manufactured to exacting specifications and quality controlled to ensure that each ribbon you receive produces a level of density and image quality that is consistent from application to application.

- **"Can I use a mylar ribbon with my Printronix printer?"**

  Because of the highly abrasive nature of the mylar ribbon base material, the use of these ribbons is not approved or recommended for use with Printronix printer systems. Our oratory lab has found that mylar ribbons can cause excessive wear and will eventually destroy the ribbon mask of the printer in a very short period of time.

- **"Does packaging have any effect on the performance of a printer ribbon?"**

  Because of the liquid properties of inks, printer ribbons require proper protective packaging to ensure that evaporation during shipping and storage is minimized. Each Genuine Printronix ribbon is individually protected by a plastic shrink wrap. Because of the somewhat perishable nature of impact printer ribbons, a date of manufacture is provided so that proper inventory rotation can be instituted. All of the outer cartons and shipping containers of Genuine Printronix supplies are designed to protect the ribbons from physical damage and distortion during shipping and handling.

P5000 Spool Ribbons – Similar Models under with other Brands

During the past two decades, many of our competitors have recognized the inherent dependability, economy and quality that could be gained by utilizing the Genuine Printronix ribbon's configuration and spool design. They have incorporated these ribbons into their product offerings.

Because of this, Genuine Printronix Gold Series, Barcode and Extended Life Text ribbons are fully compatible with printers from other distributors and manufacturers. Even if you don't have a Printronix printer, you can still benefit from the recognized image quality and reliability of Genuine Printronix ribbons. All Genuine Printronix ribbons are designed and manufactured to provide you with maximum print quality and cost effective operation while protecting the value of your printer investment.

COMPATIBLE PRINTER CHARTS

The printers in black (pedestal models) can only accept small spool ribbons, the printers in blue (cabinet models) can accept small & large spool ribbons.

SUPPLIES

TALLYGENICOM 6800 CARTRIDGE LINE MATRIX PRINTER

- Available Models : Open Pedestal, Enclosed Pedestal, Zero-Tear, and Cabinet Models
- Standard and Extended Life Cartridge backwards compatible to 6600 Cartridge.
- New enclosure with small footprint
- USB 2.0, Serial RS-232 Network Connectivity
- All 6600 Emulations supported
- Larger icon based op panel display
- Enhanced Printer Web Page Functionality

6800 Cartridge Printers Deliver New Designs, Enhanced Convenience and Lower Operating Cost

TallyGenicom introduces design enhancements and improved functionality with the 6800 Cartridge Printer series to achieve the broadest flexibility, greatest compatibility and lowest ownership cost of virtually any other print technology.

The series builds upon the workhorse tradition of all TallyGenicom line matrix technology delivering maximum uptime, low cost of ownership, and reliable performance. The 6800 series is the ideal solution for buyers looking to minimize operating expense without sacrificing output reliability, regardless of operating environment.

Tallygenicom 6600 CARTRIDGE LINE MATRIX PRINTER

The previous generation 6600 line matrix printers transformed product innovations into the **Power of Plus**. Seamless integration into your current workflow will enable you to reap the benefits from the improved reliability, productivity and environmental advantages.

The 6600 family was available in a choice of printing speeds, including 500, 1000, 1500 and 2000 lines per minute. All models in the 6600 family are ENERGY STAR® qualified and are fully compatible, direct replacements for earlier TallyGenicom printers. The total cost of ownership has been dramatically improved due to better print quality, better reliability and less waste.

The TG6600 Cartridge printers is End of Sales since the 11/30/2013 and have been replaced by the TG6800 Cartridge printers

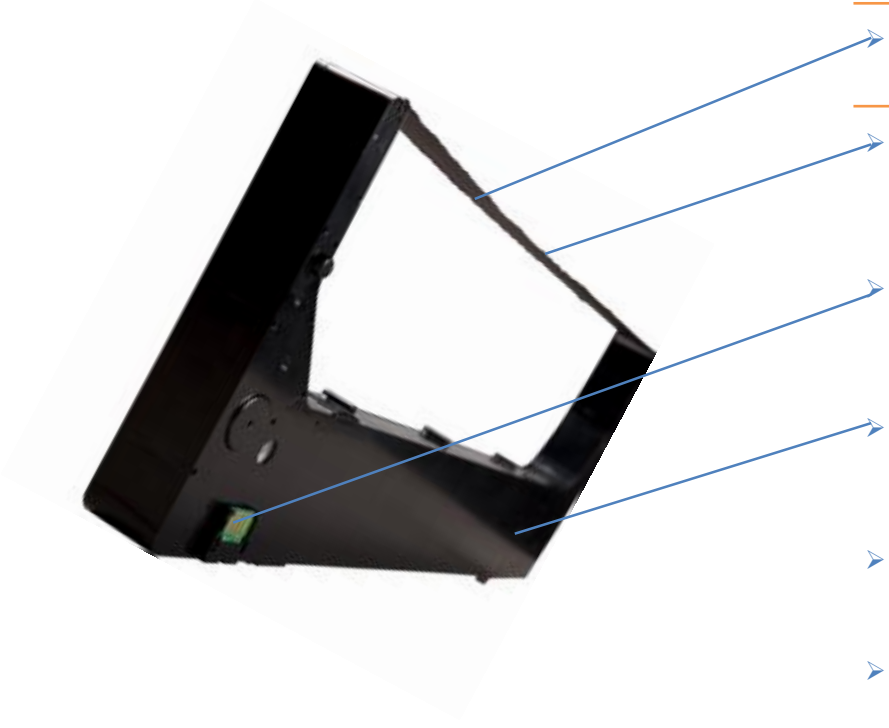
TALLYGENICOM 6600/6800 - CARTRIDGE SERIES CONSUMABLES

The certified Printronix Cartridge Series of Line Matrix Printers provides a flexible design, adaptable functionality and manageable savings including the lowest cost for consumables and total cost of ownership.



- LONGER LASTING INK = Fewer ribbon changes yield more productivity and contribute to a lower cost of ownership.
- LEADING EDGE RIBBON TECHNOLOGY = Less IT interventions reduce downtime, with a patented ribbon jam prevention system. The high-density ribbon yields a longer life and a darker print quality.
- EMBEDDED MICROCHIP = Provides precise, integrated control over ribbon life, print quality and operating costs. Productivity is improved by preventing interruptions of long print runs.
- CARTRIDGE RIBBON DESIGN = With the self-contained cartridge ribbon, changing ribbons is easier, cleaner and faster when compared to spool and laser printers.
- ENVIRONMENTAL ADVANTAGE = Line matrix consumables are inherently greener than serial or laser printer consumables, able to print on paper with a higher percentage of recycled content.
- EASY TO INSTALL = Quick and easy to change without requiring any special training, a cartridge ribbon virtually guides itself into the printer saving time and reducing load errors.

Go back to Table of Content

TALLYGENICOM 6600/6800 - CARTRIDGE SERIES CONSUMABLES

Improvement In Consumable Cost Per Page

The redesigned cartridge ribbons having better print quality, better reliability and less waste, which will then result in better total cost of ownership in the long run. Plus, a reduction in packaging produces a 20% reduction in shipping weight, resulting in lower costs and less landfill. And compared to laser technology, line matrix offers far better environmental advantages.

Standard Life

STANDARD LIFE CARTRIDGE

Lowest cost per purchase for customers with a restrictive budget. Available in a single pack. This ribbon cartridge fits all 6800/6600 printer models.

Extended Life

EXTENDED LIFE CARTRIDGE

For customers seeking a lower operating cost per page. Available in a four pack for greatest cost savings. This ribbon cartridge fits all 6800/6600 models, except the 500 line per minute models.

TALLYGENICOM 6600/6800 CARTRIDGES - Q & A

- **"What cartridge ribbons are available for the 6800 and 6600?"**

  The 6800 and 6600 ribbon cartridge line-up provides customers choice and flexibility to manage consumable costs. Customers can chose from the following options to match their print volume and budget.

Standard Life – Single Pack	This ribbon cartridge fits all 6800 and 6600 printers models. Lowest cost per purchase for customers with restrictive budget.
Extended Life – Four Pack	This ribbon cartridge fits 6x10, 6x10Q, 6x15, 6x15Q, 6x20Q, 6x10Z and 6x15Z printer models. For customers with budget flexibility and seeking the lowest operation cost

- **"Why did you choose a page rating?"**

  Our research shows that the most likely competition for our printer is a laser printer. By rating in pages, we make it easier for users to compare and see our substantial cost advantage. Additionally, the page test protocol is a much better indicator of real life consumable yields compared with older character based ratings.

TALLYGENICOM 6600/6800 CARTRIDGES - Q & A

- "What is the page yield for the 6800 and 6600 ribbon cartridges?"
  The Standard Life cartridge page yield is 17,000 pages and the Extended Life cartridge page yield is 30,000 pages.

- "Are my 6800 and 6600 ribbon cartridges interchangeable with the earlier TallyGenicom 6200 and 6300 ribbon cartridges?"
  No, they are not interchangeable. The Standard Life and Extended Life cartridges were specifically designed for the 6800 and 6600 Series. The 6800 and 6600 ribbon cartridge have a smaller footprint than the 6200 and 6300 ribbon cartridges. It is physically impossible to install a 6200/6300 ribbon cartridge on a 6800 and 6600 printer.

- "What are the differences between 6200 / 6300 and the 6800 and 6600 cartridge?"
  LONGER LASTING INK = Fewer ribbon changes yield more productivity and contribute to a lower cost of ownership.
  REDESIGNED RIBBON SYSTEM = Less IT interventions and less downtime, delivered by a patented feature only available with genuine TallyGenicom consumables.
  EMBEDDED MICROCHIP = Gives you precise, integrated control over ribbon life, print quality and most importantly, operating costs. Prevents interruptions during longer print runs.
  NEW COMPACT CARTRIDGE DESIGN = A more efficient use of materials contributes to less shipping, packaging and storage..

- "Do the 6800 and 6600 ribbon cartridge work with the Integrated Print Management System?"
  Yes. The system provides the customer with control over ribbon life and print quality. The system default is set for high print quality. It recognizes when a new ribbon has been installed, tracks ribbon usage and alerts when the ribbon needs to be replaced. Users cam set the ending darkness to meet quality needs or extended life.

TALLYGENICOM 6600/6800 CARTRIDGES - Q & A

- "Can I view the ribbon cartridge life indication remotely?"

  Yes. On PrintNet Enterprise equipped printers ribbon life can be viewed anywhere remotely via a simple web browser. Even better, PrintNet Enterprise can be set to issue your web enabled portable device an e-mail once the ribbon life is low and again when it is out. In addition, the ribbon life can viewed via the Web Panel.

- "What if I run all kinds of different jobs, will the ribbon cartridge life indication remain accurate?"

  Yes. The system uses a sophisticated algorithm that tracks usage in all the various sections of the ribbon automatically. As print patterns shift, it will use different parts of the ribbon, but this is all tracked and properly accounted for. The net indication then is the life remaining in whatever is the most depleted section of the ribbon.

- "If I exchange partially used ribbon cartridges before they are depleted will the ribbon life indication remain accurate?"

  Yes. A ribbon can be taken off and replaced at any time, and the system will correctly tell you the ribbon life remaining on the currently loaded ribbon.

- "What happens when the ribbon cartridge life reaches the end?"

  The life indication will continue to count down until the remaining life gets low. At this point, the system will warn of a Ribbon Life Low condition. The indicator lamp will flash, the warning message will be displayed, and optionally e-mail alerts will be issued. Printing, however will continue without any interruption. Once the remaining two percent is consumed the printer will stop to prevent the print quality from degrading below the set limit. The error lamp will flash, the audible alarm will sound, the display will indicate that the ribbon needs to be replaced, and optionally an e-mail alert will be issued.

- "If my ribbon cartridge life reaches zero and the printer stops, can I at least finish my printing?"

  Yes. By returning the printer to the on-line state, it will resume printing for approximately two more minutes. If still a bit more printing is needed, the printer can continue to be returned to the on-line state to gain extra minutes of operation. This process can be repeated indefinitely to extend printing as long as desired.

TALLYGENICOM 6600/6800 CARTRIDGES - Q & A

- "At what point is the ribbon low warning issued?"

  Like the darkness set point, this is fully adjustable. The factory default is to declare Ribbon Low at 2% life remaining.

- "Can I program my printer to not stop if the end of ribbon life is reached?"

  Yes. Under the Advanced User section of the printer menus, you can select an option to ignore the ribbon end point. The ribbon life indication will continue to work, but no warnings will be issued and the printer will not stop once the life reaches 0%. Responsibility for insuring the proper change interval reverts back to the user.

- "Can I track ribbon usage on the 6800 and 6600?"

  Yes. The printer keeps track of the quantity and types of all ribbons used on the machine. This log can be checked at any time, and viewed remotely via PrintNet Enterprise, to determine how fast and how many ribbons your operation is consuming.
