

# CLASSIC & YOUNGTIMER SHOCK ABSORBERS

CATALOGUE 2017-2018

# KONI CLASSIC SHOCK ABSORBER PROGRAM

## KONI RACING - HOW IT ALL STARTED

KONI was founded in 1857 by A. de Koning. Of course the business did not start with making shock absorbers, but with making leather equipment for horses.

Just before the Second World War the company started to work on shock absorbers. These were friction type shock absorbers. After the Second World War, the production of the telescopic shock absorbers started. In the early fifties, KONI decided to play a more prominent role in motor sport in order to enlarge the company's reputation. Of course motor sport was an excellent way to prove to the world that the shock absorbers manufactured in Oud-Beijerland were of very high quality.

The first event that KONI participated in, was the Tulpenrally in 1955, a Dutch organised rally with international status by that time. As a reward for using KONI stickers on their cars, the drivers could have their KONI dampers for next to nothing. The KONI dampers proved to be ideal for rally purposes. What's more, they stood out head and shoulders above their competitors.

KONI CLASSIC

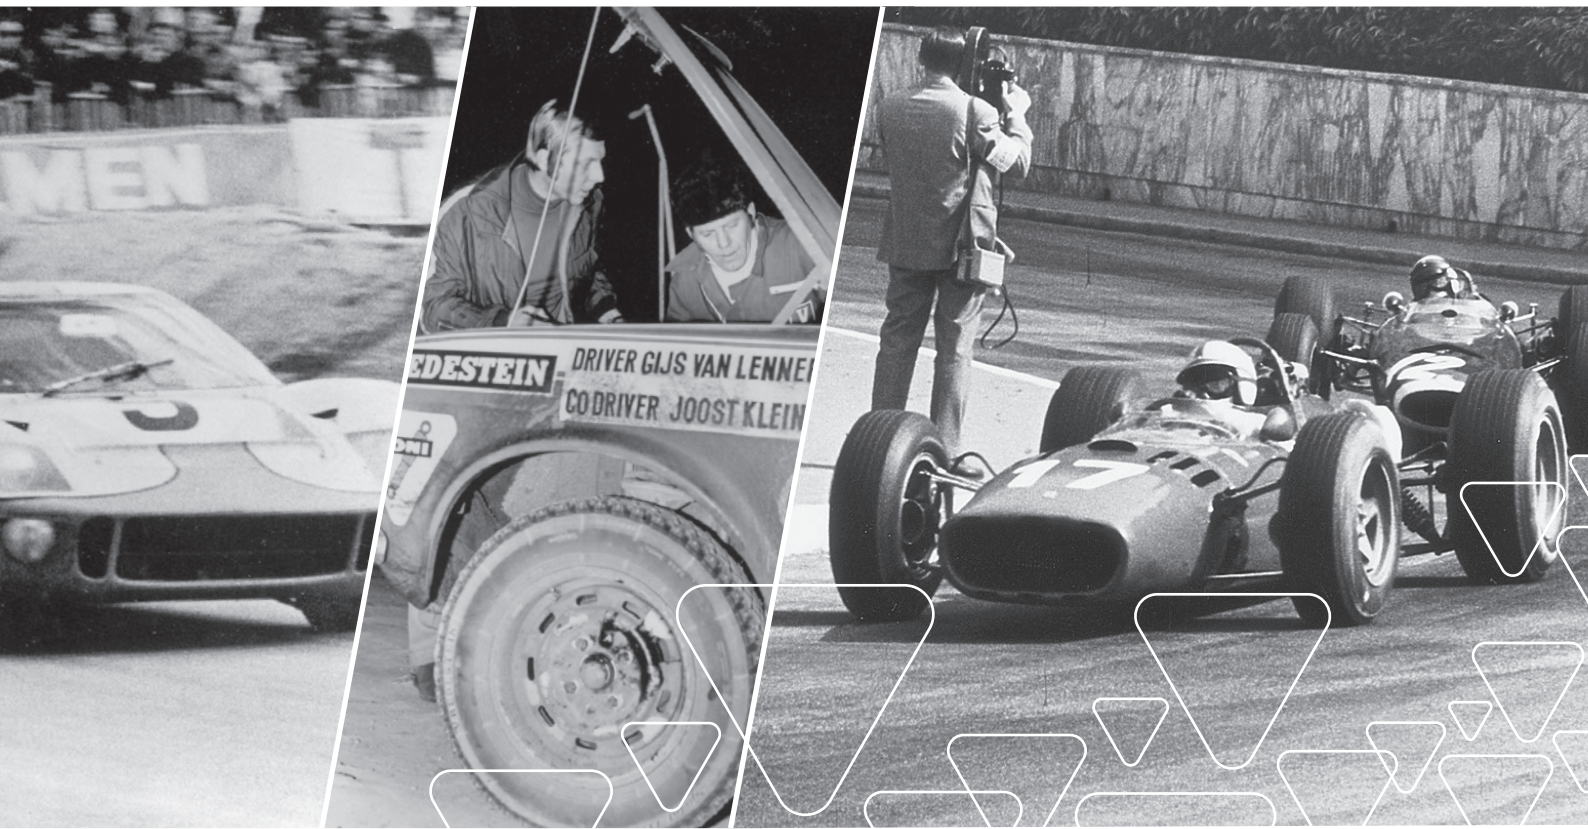

TABLE OF CONTENTS

KONI SPORT

## THE FIRST STEPS AT THE RACETRACKS

After starting with rally, KONI switched to the racing scene. In 1956 KONI entered the Formula 1. On the famous Nordschleife it assisted the Ferrari team in solving their suspension problems.

Until that time, F1 still used the lever arm type shock absorbers. The KONI shock absorbers offered better damping characteristics and the possibility to mount the spring around the damper, which made it more compact. Officially the first Grand Prix that KONI participated in was in 1958 with Ferrari. The Belgian driver Gendebien made his appearance on the Monza track with KONI and took sixth place.

After the start with Ferrari the business went fast and already in 1971 KONI reached its first World Championship win as Tyrrell Ford won the driver's (Jackie Stewart) and constructor's championship.

# CLASSIC & SPORT

---

## KONI CLASSIC

Today's technology in yesterday's cars. Highly evolved damper technology for classics in any stage of their life, with the same superior quality which KONI offers to modern cars. KONI Classic combines a vintage look with safety and road holding.

- Broad application range
- Rebound adjustable
- Black or red with "Classic Wing" logo

- 
- 1 | Modern damper technology
  - 2 | Better handling & classic looks
  - 3 | Superior driving comfort

## KONI SPORT

Looking for a high-speed feeling? KONI supplies the same high-quality parts to sport tuners as they do to the professionals out on the racetrack. The KONI SPORT represents the ultimate in shock absorber technology. This means better road holding, optimum chassis feedback and unlimited performance. It all makes for an unparalleled driving experience.

- Big handling improvements
- Superb ride quality
- External rebound adjustment on most cars
- Best KONI shock for all lowering springs

- 
- 1 | Allows lowering up to 40 mm
  - 2 | Adjustable damping
  - 3 | Superior handling

# TUNING & RACING

---

## KONI STR.T

Unsurpassed price/performance ratio thanks to customized synthesis of quality, technical know how and impressive performance. Perfect road holding and optimum handling thanks to a perfect factory-matched setup based on our long-standing motorsport experience. Individually tailored for every day driving pleasure.

- 100% Performance
- Ideal comfort / road-holding balance
- Improved handling

- 
- 1 | Allows lowering up to 40 mm
  - 2 | Perfect match
  - 3 | 100% street legal

## KONI RACING DAMPERS

The design and operation of KONI racing dampers are a unique proof of KONI's reputation as the leader in the field of damper technology.

They are specifically designed for competition purposes and offer full adjustability while fitted on the car. Their precision adjustment mechanisms allow maximum control over the damping forces generated, especially in the low speed damping range. Please contact your KONI Reseller or Distributor for more information

- Control over the suspension is instant and precise, decisive and smooth
- Period correct & FIA approved
- Stunning price / quality ratio
- Rebuildable

- 
- 1 | Maximum control over the damping forces
  - 2 | Dampers of apparent simplicity
  - 3 | Up to eight pre-programmed damping curves

# LEADING TECHNOLOGY

KONI enhances the look and feel of any car. The state-of-the-art range of shocks and sport kits in this catalogue gives an overview of the many possibilities for customization and personalization. Quite simply, KONI makes driving more individual and more fun. And the car not only looks better—it drives better.

## DISPOSAL INSTRUCTIONS

### GENERAL REMARKS

Appropriate protective measures should be taken when removing oil and gas from discarded and defective shock absorbers.

### PROCEDURE

1. Secure the shock absorber in a horizontal position.
2. Fully extend the piston rod before drilling.
3. Drill a hole with a diameter of about 5 mm at 3 cm from the bottom of the shock absorber to a depth of about 2 cm (see fig. A). Caution: Gas and oil will be expelled from the shock absorber. Take appropriate precautions to control the oil stream.
4. Drill a second hole of about 5 mm at 6 cm from the top of the shock absorber to a depth of about 2 cm, in order to allow all of the oil to flow out (see fig. B).
5. By moving the piston rod in and out, pump out all of the oil (see fig. C).

### ENVIRONMENTAL PROTECTION

The hydraulic oil drained from the shock absorbers should be collected and disposed of in accordance with the appropriate legislation. Information on where to dispose of the oil and other parts can be obtained from local authorities

## CONSTRUCTION & OPERATION

All hydraulic shock absorbers work on the principle of converting kinetic energy (movement) into thermal energy (heat). For that purpose, fluid in the shock absorber is forced to flow through restricted outlets and valve systems, thus generating hydraulic resistance. A telescopic shock absorber (damper) can be compressed and extended; the so called bump stroke and rebound stroke. Telescopic shock absorbers can be subdivided into:

Bi-tube, or twin-tube dampers, available in hydraulic and gas-hydraulic configuration.

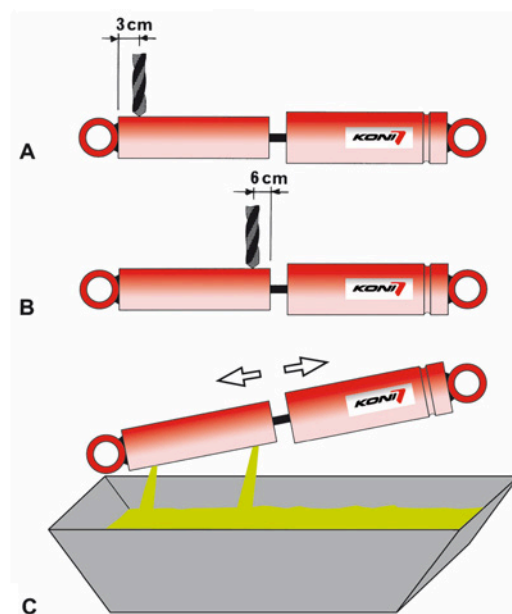

**BI-TUBE SHOCK ABSORBER (FIG. A.)**

**MONO-TUBE SHOCK ABSORBER (FIG. B.)**

Mono-tube dampers, also called high pressure gas shocks.

## ADJUSTMENT PROCEDURES

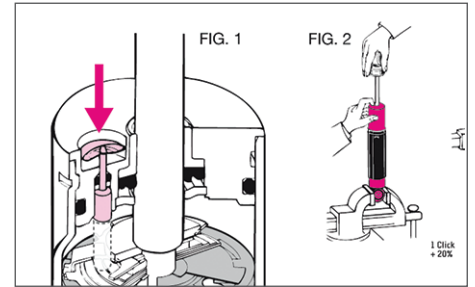

### SERIES 8010, 8041, 8210, 8241, 8610, 8641, 8710, 8741, 8742\*

1. Take the adjustment knob which is supplied and fit it to the top of the damper.
2. To adjust the damping force, the knob has to be turned in the direction of the arrow for increased damping and in the opposite direction for decreased damping. If you feel resistance do not use force, as the damper is in its end position.
3. After adjustment, remove the adjusting knob in order to prevent possible damage to the hood.

### SERIES 26, 30\*

1. Remove the plastic dust cover to expose the adjusting knob (fig. 2)
2. Depress the knob fully, and hold it in that position while adjusting (fig. 1 & 2).
3. The adjusting device has been provided with a number of distinct stops (clicks), each of which marks an adjustment position (fig.4).
4. To increase rebound damping, turn the piston rod one or more clicks to the right (clockwise), and release the adjusting knob. **DO NOT USE FORCE!** Make sure that the adjusting knob springs fully back into position.

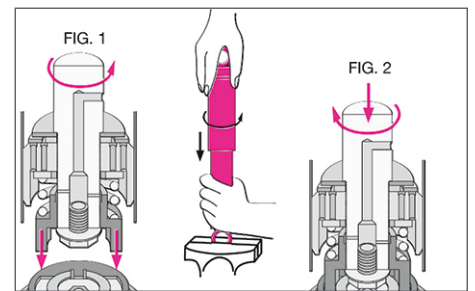

NOTE: 26 Series range limited to 2 clicks, 30 Series range limited to 3 clicks.

### SERIES 76, 80, 82, 84, 86, 87, 88, 90, 92, 8040, 8240\*

1. Fully compress the shock absorber, at the same time turning the dust cover or piston rod slowly to the left (counterclockwise) until the cams of the adjusting nut engage in the recesses of the foot valve assembly (fig.1).

NOTE: Some shock absorbers include a bump rubber concealed under the dust cover and this must be removed prior to adjusting. Do not forget to reinstall.

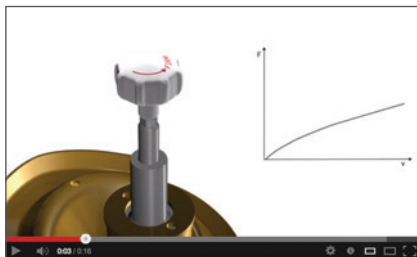

2. Keeping the shock absorber compressed, make 1 full turn (360°) to the right (clockwise). The total range is about 5 half turns (fig. 2).
3. Extend the shock absorber vertically for at least 1 cm without turning in order to disengage the adjusting mechanism. The dust cap or piston rod may now be turned freely.

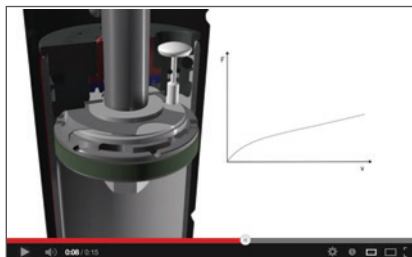

### \*WARNING:

Adjust both left and right dampers identically. Failure to do so may lead to unstable handling and uneven tire tread wear

Adjustment Bi-tube external

Adjustment Mono-tube

Adjustment Bi-tube regular

## 8211 Series

---

### Twin Tube Hydraulic Damper

This is a steel-bodied, externally double-adjustable, coilover damper which has been used on World Champion Formula1, Can-Am and virtually every other type of race car ever made. Bump and rebound damping can be adjusted independently without removing the damper from the car. Adjustable spring seats accept 2.25" or 2.50" I.D. springs. These dampers are fully rebuildable and the valving can be adapted to a wide range of applications. Recently updated to include advances in materials and manufacturing techniques, this classic shock design is the premium shock absorber for vintage race cars and restorations, as well as the ultimate non-gas alternative for many new race car applications. The 8211 series have plated steel bodies and are ideal for vintage Formula Ford applications or where special mountings are required and weight is not a concern.

# NOTES

## NOTE

- ⊗ Ammortizzatore a gas
- ☒ CLASSIC colore nero
- ☒ CLASSIC colore rosso
- ☒ Ammortizzatore regolabile esternamente tramite la manopola o il perno senza bisogno di rimuovere l'ammortizzatore dalla vettura
- + Parti aggiuntive su richiesta.
- ◆ Cartuccia speciale per montanti sigillati da imbulonare al fondo del montante dopo aver tagliato il montante originale e rimosso le parti interne. Solo per montanti originali.

### b La scanalatura superiore è standard

- M0 scanalatura superiore 7mm più alto
- M1 scanalatura superiore 10mm più alto
- M2 scanalatura superiore 15mm più alto
- M3 scanalatura superiore 20mm più alto
- M4 scanalatura superiore 25mm più alto
- M5 scanalatura superiore 30mm più alto

### b La scanalatura superiore è standard

- N1 scanalatura inferiore 7mm più bassa
- N2 scanalatura inferiore 10mm più bassa
- N3 scanalatura inferiore 15mm più bassa
- N4 scanalatura inferiore 20mm più bassa
- N5 scanalatura inferiore 25mm più bassa
- N6 scanalatura inferiore 30mm più bassa

### c La scanalatura superiore è standard

- P1 scanalatura inferiore 5mm più bassa
- P2 scanalatura inferiore 6mm più bassa
- P3 scanalatura inferiore 7mm più bassa

### c La scanalatura media è standard

- R1 distanza di 6mm tra scanalatura superiore e inferiore
- R2 distanza di 10mm tra scanalatura superiore e inferiore
- R3 distanza di 15mm tra scanalatura superiore e inferiore
- R4 distanza di 20mm tra scanalatura superiore e inferiore
- R5 distanza di 25mm tra scanalatura superiore e inferiore
- R6 scanalatura superiore 25mm più alto
- R7 scanalatura superiore 15mm più bassa

### e La scanalatura media è standard

- T1 distanza di 7mm tra scanalatura superiore e inferiore
- T2 distanza di 10mm tra scanalatura superiore e inferiore
- T3 distanza di 12mm tra scanalatura superiore e inferiore

### Per BMW Serie 3 E-30 fino ad Agosto 1988 con "M-Technik";

Se il veicolo è equipaggiato con sospensione "M" (Bilstein), sono necessari i seguenti componenti originali per montare la cartuccia KONI:

Tampone di arresto scotimento part no.	31-331-124-449
Copripolvere part no.	31-331-134-314 (31-331-124-519)
Ghiera di serraggio part no.	31-321-115-398 (McPherson housing 45 mm Ø)
Ghiera di serraggio part no.	31-321-117-376 (McPherson housing 51 mm Ø)

## NOTAS

- ⊗ Carga de gás
- ☒ CLASSIC cor preta
- ☒ CLASSIC cor vermelha
- ☒ Regulável externamente por meio de botão ou pino, sem necessidade de retirar o amortecedor do carro.
- + São necessárias peças adicionais.
- ◆ Carga especial McPherson, para bainhas cravadas e parafusadas ao fundo depois de contar a bainha e retirar dos os componentes de origem.

### b Apolo do encaixe é standard

- M0 topo c/encaixe 7mm Altura
- M1 topo c/encaixe 10mm Altura
- M2 topo c/encaixe 15mm Altura
- M3 topo c/encaixe 20mm Altura
- M4 topo c/encaixe 25mm Altura
- M5 topo c/encaixe 30mm Altura

### b Topo de encaixe é standard

- N1 apolo do encaixe 7mm + baixo
- N2 apolo do encaixe 10mm + baixo
- N3 apolo do encaixe 15mm + baixo
- N4 apolo do encaixe 20mm + baixo
- N5 apolo do encaixe 25mm + baixo
- N6 apolo do encaixe 30mm + baixo

### c Topo do encaixe é standard

- P1 apolo do encaixe 5mm + baixo
- P2 apolo do encaixe 6mm + baixo
- P3 apolo do encaixe 7mm + baixo

### c Encaixe de melo é standard

- R1 cada encaixe tem 6mm de diferença
- R2 cada encaixe tem 10mm de diferença
- R3 cada encaixe tem 15mm de diferença
- R4 cada encaixe tem 20mm de diferença
- R5 cada encaixe tem 25mm de diferença
- R6 topo c/encaixe 25mm Altura
- R7 apoio do encaixe 15mm + baixo

### e Encaixe de melo é standard

- T1 cada encaixe tem 7mm de diferença
- T2 cada encaixe tem 10mm de diferença
- T3 cada encaixe tem 12mm de diferença

### Nota-Para a série BMW 3 E-30 com "M-Technik" até Agosto 1988.

Se equipado com (Bilstein) M-Sport, as peças originais são necessárias para substituir a carga (amortecedor) KONI:

Batenta: ref.n°.	31-331-124-449
Fole: ref.n°.	31-331-134-314 (31-331-124-519)
Porca ref.n°.	31-321.115.398 (bainha McPherson 45 mm Ø)
Porca ref.n°.	31-321.117.376 (bainha McPherson 51 mm Ø)

## ANMERKNINGER

- ⊗ Gass-fylt
- ☒ CLASSIC farge sort
- ☒ CLASSIC farge rød
- ☒ Utvendig justerbar ved hjelp av en knapp eller en tapp (sekskant.nøkkel) uten å demontere støttemperen fra bilen.
- + Tilleggsdetaljer, som braketter, er nødvendig.
- ◆ Spesiell McPherson innsats, for forseglede fjærben, skrudd fast i bunnen av fjærbenet etter at fjærbenets øvre del er kappet, og de originale støttemperdelene fjernet.

### b Nedre spor er standard

- M0 øvre spor 7mm høyere
- M1 øvre spor 10mm høyere
- M2 øvre spor 15mm høyere
- M3 øvre spor 20mm høyere
- M4 øvre spor 25mm høyere
- M5 øvre spor 30mm høyere

### b Øvre spor er standard

- N1 nedre spor 7mm lavere
- N2 nedre spor 10mm lavere
- N3 nedre spor 15mm lavere
- N4 nedre spor 20mm lavere
- N5 nedre spor 25mm lavere
- N6 nedre spor 30mm lavere

### c Øvre spor er standard

- P1 nedre spor 5mm lavere
- P2 nedre spor 6mm lavere
- P3 nedre spor 7mm lavere

### c Midtre spor er standard

- R1 øvre/nedre spor hver med 6mm avstand
- R2 øvre/nedre spor hver med 10mm avstand
- R3 øvre/nedre spor hver med 15mm avstand
- R4 øvre/nedre spor hver med 20mm avstand
- R5 øvre/nedre spor hver med 25mm avstand
- R6 øvre spor 25mm høyere
- R7 nedre spor 15mm lavere

### e Midtre spor er standard

- T1 øvre/nedre spor hver med 7mm avstand
- T2 øvre/nedre spor hver med 10mm avstand
- T3 øvre/nedre spor hver med 12mm avstand

### For BMW3 E-30 serie med "M-Teknikk" til August 1988.

Hvis bilen er i "M"-versian (Bilstein), er følgende originaldelene nødvendige for å tilpasse KONI-innsatsen:

Gummianslag: Del nr.	31'331-124-449
Støvkappe: Del nr.	31-331-134-314 (31-331-124-519)
Låserrutter: Del nr.	31-321-115-398 (McPherson hylse 45 mm Ø) eller
Låserrutter: Del nr.	31-321-117-376 (McPherson hylse 51 mm Ø)

## MERKINTÖJEN SELITYKSET

- ⊗ Kaasutäytteen
- ☒ CLASSIC musta
- ☒ CLASSIC punainen
- ☒ Säädettävissä ulkupoletta säätönupilla tai puikolla irottamatta iskunvaimentimia autosta.
- + Vaatit erillisen kiinnikesarjan.
- ◆ Erikois McPherson patruuna umpinalsiin joustintukiin, kiinnitetään puittilla pohjasta kun joustintuki on yläpäädystä katkaistu ja alkuperäiset sisäosat poistettu.

### b Alempi ura on alkuperäinen korkeus

- M0 ylempi ura 7mm korkeampi
- M1 ylempi ura 10mm korkeampi
- M2 ylempi ura 15mm korkeampi
- M3 ylempi ura 20mm korkeampi
- M4 ylempi ura 25mm korkeampi
- M5 ylempi ura 30mm korkeampi

### b Ylempi ura on alkuperäinen korkeus

- N1 alin ura 7mm alempi
- N2 alin ura 10mm alempi
- N3 alin ura 15mm alempi
- N4 alin ura 20mm alempi
- N5 alin ura 25mm alempi
- N6 alin ura 30mm alempi

### c Ylempi ura on alkuperäinen korkeus

- P1 alin ura 5mm alempi
- P2 alin ura 6mm alempi
- P3 alin ura 7mm alempi

### c Keskimäinen ura on alkuperäinen korkeus

- R1 ylä/alauran etäisyys 6mm
- R2 ylä/alauran etäisyys 10mm
- R3 ylä/alauran etäisyys 15mm
- R4 ylä/alauran etäisyys 20mm
- R5 ylä/alauran etäisyys 25mm
- R6 ylämpi ura 25mm korkeampi
- R7 alin ura 15mm alempi

### e Keskimäinen ura on alkuperäinen korkeus

- T1 ylä/alauran etäisyys 7mm
- T2 ylä/alauran etäisyys 10mm
- T3 ylä/alauran etäisyys 12mm

### Huom. BMW 3 E-30 sarja varustettuna "M-Technik" elokuu 1988 asti.

Jos auto on varustettu "M" alustalla (Bilstein), tarvitaan KONI vaimenninta asennettaessa seuraavat alkuperäisosat:

Rajoitinkumi: osa nro	31-331-124.449
Pölysuoja: osa nro	31-331-134.314 (31.331.124-519)
Lukitusmutterit: osa nro	31-321-115-398 (joustintuen kalkaisija 45 mm) tai
Lukitusmutterit: osa nro	31-321-117-376 (joustintuen halkaisija 51 mm)

# NOTES

## SIGNES

Ⓒ Amortisseur à pression de gaz

☞ CLASSIC couleur noir

☞ CLASSIC couleur rouge

☞ Réglage de l'extérieur à l'aide d'une molette. Ou d'une tige sans déposer des amortisseurs du véhicule Filetage.

+ Ferrures de montage nécessaires.

◆ Cartouche de remplacement spéciale se fixant par le fond de la jambe de force d'origine après découpe du sertissage et dépose des pièces internes.

### b La gorge du bas est standard

**M0** gorge de clip inférieure 7 mm plus bas  
**M1** gorge de clip inférieure 10 mm plus bas  
**M2** gorge de clip inférieure 15 mm plus bas  
**M3** gorge de clip inférieure 20 mm plus bas  
**M4** gorge de clip inférieure 25 mm plus bas  
**M5** gorge de clip inférieure 30 mm plus bas

### b La gorge du haut est standard

**N1** gorge de clip inférieure 7 mm plus bas  
**N2** gorge de clip inférieure 10 mm plus bas  
**N3** gorge de clip inférieure 15 mm plus bas  
**N4** gorge de clip inférieure 20 mm plus bas  
**N5** gorge de clip inférieure 25 mm plus bas

### c La gorge du haut est standard

**P1** gorge de clip inférieure 5 mm plus bas  
**P2** gorge de clip inférieure 6 mm plus bas  
**P3** gorge de clip inférieure 7 mm plus bas

### c La gorge du milieu est standard

**R1** distance entre chaque gorge 6 mm  
**R2** distance entre chaque gorge 10 mm  
**R3** distance entre chaque gorge 15 mm  
**R4** distance entre chaque gorge 20 mm  
**R5** distance entre chaque gorge 25 mm  
**R6** gorge supérieure 25 mm plus haut  
**R7** gorge de clip inférieure 15 mm plus bas

### e La gorge du milieu est standard

**T1** distance entre chaque gorge 7 mm  
**T2** distance entre chaque gorge 10 mm  
**T3** distance entre chaque gorge 12 mm

### Remarque pour BMW 3-séries E30, avec option „M-Technik“ jusqu'à août 1988.

Si le véhicule est équipé avec „M“ Sport pack (amortisseurs Bilstein) le montage du KONI nécessite les pièces d'origine suivantes :

Butée part no.	31-331-124-449
Cache-poussière part no.	31-331-134-314 (31-331-124-519)
Ecrou part no.	31-321-115-398
(pour corps McPherson Ø 45 mm) ou	
Ecrou part no.	31-321-117-376
(pour corps McPherson Ø 51 mm).	

## SONDERZEICHEN

Ⓒ Gasdruckdämpfer

☞ CLASSIC schwarze Farbe

☞ CLASSIC rote Farbe

☞ Mit Hilfe eines Einstellknopfes im eingebauten Zustand von außen nachstellbar.

+ Zusätzliche Anbauteile erforderlich .

◆ McPherson-Federbein-Patrone für gefaltete Federbeine. Befestigung am Boden des Original Federbeines mit Gewindebolzen. Das Federbein wird hierzu geöffnet, die Innenteile entfernt und durch eine Patrone ersetzt.

### b Untere Nut = Standard

**M0** obere Nut 7 mm höher  
**M1** obere Nut 10 mm höher  
**M2** obere Nut 15 mm höher  
**M3** obere Nut 20 mm höher  
**M4** obere Nut 25 mm höher  
**M5** obere Nut 30 mm höher

### b Obere Nut = Standard

**P2** untere Nut je 6 mm tiefer  
**P3** untere Nut je 7 mm tiefer

### c Mittlere Nut = Standard

**R1** obere/untere Nut je 6 mm Abstand  
**R2** obere/untere Nut je 10 mm Abstand  
**R3** obere/untere Nut je 15 mm Abstand  
**R4** obere/untere Nut je 20 mm Abstand  
**R5** obere/untere Nut je 25 mm Abstand  
**R6** obere Nut 25 mm höher  
**R7** untere Nut 15 mm tiefer

### e Mittlere Nut = Standard

**T1** obere/untere Nut je 7 mm Abstand  
**T2** obere/untere Nut je 10 mm Abstand  
**T3** obere/untere Nut je 12 mm Abstand

### Hinweis für BMW 3er Serie E30 bis August 1988 mit M-Technik

Bei verbauten Bilstein Dämpfer sind für den KONI-Einbau orig. BMW-Anbauteile erforderlich:

Anschlaggummi	31-331-124-449
Staubkappe	31-331-134-314 (31-331-124-510)
Verschlussmutter (Federbein Ø 45 mm außen) oder	31-321-115-398
Verschlussmutter (Federbein Ø 51 mm außen)	31-321-117 -376

## NOTAS

Ⓒ Con gas

☞ CLASSIC color negro

☞ CLASSIC color rojo

☞ Regulable exteriormente por medio de tapón. O pasador, sin tener que desmontar los amortiguadores del vehículo.

+ Piezas adicionales requeridas, coma abrazaderas.

◆ Cartucho especial Mc-Pherson para carcasas selladas, fijado al fondo después de cortar la carcasa y quitar las piezas internas originales.

### b La ranura inferior es estándar

**M0** ranura superior 7 mm más alta  
**M1** ranura superior 10 mm más alta  
**M2** ranura superior 15 mm más alta  
**M3** ranura superior 20 mm más alta  
**M4** ranura superior 25 mm más alta  
**M5** ranura superior 30 mm más alta

### b La ranura superior es estándar

**N1** ranura inferior 7 mm más baja  
**N2** ranura inferior 10 mm más baja  
**N3** ranura inferior 15 mm más baja  
**N4** ranura inferior 20 mm más baja  
**N5** ranura inferior 25 mm más baja  
**N6** ranura inferior 30 mm más baja

### c La ranura superior es estándar

**P1** ranura inferior 5 mm más baja  
**P2** ranura inferior 6 mm más baja  
**P3** ranura inferior 7 mm más baja

### c La ranura intermedia es estándar

**R1** ranura superior/inferior a 6 mm de distancia  
**R2** ranura superior/inferior a 10 mm de distancia  
**R3** ranura superior/inferior a 15 mm de distancia  
**R4** ranura superior/inferior a 20 mm de distancia  
**R5** ranura superior/inferior a 25 mm de distancia  
**R6** ranura superior 25 mm más alta  
**R7** ranura inferior 15 mm más baja

### e La ranura intermedia es estándar

**T1** ranura superior/inferior a 7 mm de distancia  
**T2** ranura superior/inferior a 10 mm de distancia  
**T3** ranura superior/inferior a 12 mm de distancia

### Nota para las series BMW E30 con „M- Technik“ hasta agosto de 1988

Si va equipado con el kit deportivo „M“ (Bilstein), se precisan las siguientes piezas originales para montar el cartucho KONI:

Gama de tope Ref.	31-331-124-449
Cubierta antipolvo Ref.	31-331-134-314 (31-331-124-519)
Tuerca de cierre Ref. (carcasa McPherson Ø 45 mm) o	31-321-115-398
Tuerca de cierre Ref. (carcasa McPherson Ø 51 mm)	31-321-117-376

## NOTES

- ⊗ Gas-charged shock absorber.
- 🔽 CLASSIC color black.
- 🔽 CLASSIC color red.
- 🔽 Externally adjustable by means of a knob or pin without removing the shock absorbers from the car.
- + Additional parts, like brackets, required.
- ◆ Special McPherson insert, for sealed struts, bolted to the bottom after cutting the housing and removal of original inner parts. To be used in original struts only.

- ⊗ ☰ Bottom groove is standard
- M0 top groove 7 mm higher
- M1 top groove 10 mm higher
- M2 top groove 15 mm higher
- M3 top groove 20 mm higher
- M4 top groove 25 mm higher
- M5 top groove 30 mm higher

- ⊗ ☰ Top groove is standard
- N1 bottom groove 7 mm lower
- N2 bottom groove 10 mm lower
- N3 bottom groove 15 mm lower
- N4 bottom groove 20 mm lower
- N5 bottom groove 25 mm lower
- N6 bottom groove 30 mm lower

- ⊗ ☰ Top groove is standard
- P1 bottom groove 5 mm lower
- P2 bottom groove 6 mm lower
- P3 bottom groove 7 mm lower

- ⊗ ☰ Middle groove is standard
- R1 top/bottom groove each on 6 mm distance
- R2 top/bottom groove each on 10 mm distance
- R3 top/bottom groove each on 15 mm distance
- R4 top/bottom groove each on 20 mm distance
- R5 top/bottom groove each on 25 mm distance
- R6 top groove 25 mm higher
- R7 bottom groove 15 mm lower

- ⊗ ☰ Middle groove is standard
- T1 top/bottom groove each on 7 mm distance
- T2 top/bottom groove each on 10 mm distance
- T3 top/bottom groove each on 12 mm distance

## Note for BMW 3-series E30 up to August 1988 with "M-Technik"

If equipped with "M" sportpack (Bilstein), the following original parts are required to fit the KONI insert: Bumpstop part no. 31-331-124-449, Dustcover part no. 31-331-134-314 (31-331-124-510), Locking nut part no. 31-321-115-398 (McPherson housing Ø 45 mm) or Locking nut part no. 31-321-117-376 (McPherson housing Ø 51 mm).

## Axle loads

In order to choose the correct KONI STR.T KIT or KONI SPORT KIT with the correct characteristics and amount of lowering for your vehicle, maximum axle loads as indicated by the vehicle manufacturer may be of importance.

Maximum axle loads are in some countries mentioned on the vehicle documents, but can also be found in the car itself. Every vehicle carries a vehicle identification plate (metal plate or sticker), usually located in the engine compartment or on a door sill. Various information and weights are shown, needed are the fields marked with "1" and "2":

1 - Maximum front axle load      2 - Maximum rear axle load

<b>S</b>		<b>DA3</b>	<b>1.77</b>

## Important kit notes

- 1 The amount of lowering will be reduced on vehicles fitted with Original Sport Suspension /OEM
- 2 The lowering of the front axle depends on the vehicle specification and weight of the engine.
- 3 For fine tuning, please refer to the original Daimler Benz spring isolators available in different heights (8-23mm).
- 4 A TÜV certificate is necessary despite ABE for vehicles with a 'load dependant' brake power distributor.
- 5 Sedan without self-leveling, Estate/Station Wagon/Combi with self-leveling.
- 6 Additional lowering may occur on vehicles equipped with automatic transmissions.
- 7 Not for Station Wagons/Combi/Estates
- 8 Up to 8.79 please use spring seat no. 171412341A.
- 9 Excludes 4-wheel drive
- 10 As of 9.94 original Volkswagen springs seats might be necessary: 1H0412341 (big) or 357412341 A (small).
- 11 Not suitable for Serial/Original Sport Suspension (OEM)
- 12 Front springs only, torsion bars on the rear axle.
- 13 All wheel/tire combinations are allowed which have been approved by the ABE or other certified Wheel Testing Institutes (Germany, Austria, Switzerland).
- 14 If RH drive shaft diameter is bigger than 42 mm and when lowering 40 mm or more, the RH driveshaft may foul the anti-roll bar. If so you will need to fit a modified anti-roll bar or a longer steering rod from your VW/Audi dealer.
- 15 Excludes self-leveling.
- 16 Front & rear dampers are externally adjustable
- 17 Front dampers are externally adjustable
- 18 Rear dampers are externally adjustable
- 19 Rear dampers must be removed from car before they can be adjusted
- 20 excl. Cooper "S"
- 21 Front: threaded housing with adjustable spring seat
- 22 Rear: threaded housing with adjustable spring seat
- 23 Rear: ride height adjustable (adapter)
- 24 Rear: not ride height adjustable
- 25 With cars up to 5.92 the upper attachment must be replaced by BMW part number 31.331.090.467
- 26 Will be discontinued when current stock is depleted
