PREFACE

In the two years covered by this report enrolment in the regular schools has dropped, but there has at the same time been a great new volume of technical training in the armed services and under the War Emergency Training Program, also a diversified educational program under the direction of the Canadian Legion Educational Services and the Directorates of Education in the Navy, Army and Air Force. None of these special wartime educational activities is covered by this report.

This is the third biennial report under the title "Elementary and Secondary Education in Canada", continuing the records concerning schools which were formerly published in the "Annual Survey of Education in Canada". Like its two predecessors this edition is more restricted in length, due to wartime conditions, than would normally be the case.

The several statistical series have in the main been continued except for the tabulations of grade enrolment by age. A Dominion-Provincial Conference on School Statistics in December, 1942, advised against continuation of this series, due to the growing tendency in some provinces to promote by age instead of by examination.

S. A. CUDMORE,
Dominion Statistician.

SECTION I

DIRECTORY OF EDUCATION ORGANIZATIONS IN CANADA, 1943-44

This list attempts to classify organizations in the field of education on the basis of their nature or function rather than on the basis of the area they serve. Those concerned with areas smaller than provinces are not as a rule included. Under one or two of the headings, only national organizations are included. Names of officers are as in the early part of the year 1944.

GENERAL ASSOCIATIONS OF EDUCATIONISTS

The Canada and Newfoundland Education Association.—Founded in 1892 as Dominion Education Association, later known as Canadian Education Association. Primarily a medium of exchanges among officials of provincial Departments of Education, although membership is open to educators of other categories. Newfoundland affiliated with the Association at its biennial convention in 1938. Secretary, C. E. Phillips, Ontario College of Education, Toronto. **The Canadian Council for Educational Research** was established in 1938-39 on the initiative of the Association together with the Canadian Teachers' Federation with financial support from both, as well as the Carnegie Corporation of New York. Chairman of the Council is M. E. LaZerte, University of Alberta. First grants in aid of research were given in October, 1939.

Ontario Educational Association.—Founded in 1861. Annual meetings held Easter week. General Secretary, H. P. Sutton, 263 Briar Hill Ave., Toronto. Secretaries of the four Departments are: Public School Department, E. H. Stephenson, 81 Waverleigh Blvd., Toronto; Supervising and Training Department, N. R. Wrightman, 39 Oakland Ave., Welland; College and Secondary Department, G. E. Evans, 37 Dundurn Cres., Toronto; Ontario Trustees' and Ratepayers' Association (see School Trustees' Organizations). Official publication, *The Canadian School Journal*, monthly.

Manitoba Educational Association.—Founded 1909. Membership about 2,000. Hon. Secretary, L. E. Walker, 95 Lenore St., Winnipeg. Annual conventions are held at Easter.

GOVERNMENT DEPARTMENTS OF EDUCATION

Only the "Departments of Education" are listed here. In addition some of the other provincial Departments administer schools or colleges of a special kind, especially the Departments of Agriculture. Vocational education in New Brunswick is administered by a special Vocational Education Board, various schools of Quebec by Boards reporting to the Department of the Provincial Secretary, etc.

ENROLMENT AND ATTENDANCE

Notes Concerning Tables 1-8

Table 1.—Annual Enrolment.—The conception of a year's school enrolment may seem simple enough to allow of no room for ambiguity, but actually there are several difficulties in the way of a comparable table as between provinces, and in Table 1 there are instances of discontinuity of comparability within a province. One of the most obvious cases of the latter kind is in Ontario where in 1933 the practice of calculating annual enrolment for the calendar year rather than the school year was discontinued, thereby eliminating some forty-odd thousand duplicates. A similar change was made in some other provinces at earlier dates. A further shortcoming of the Ontario figures since 1933, from the standpoint of comparability, lies in the fact that they represent enrolment in the month of May whereas for other provinces annual enrolment means the number of pupils who at any time during the school year appeared on the register.

There is difference between provinces in the practice regarding pupils who move from one school to another in the course of a school year. In some provinces they are counted in the annual enrolment of both schools, whereas in others a systematic attempt is made to have them recorded only once. At the Dominion-provincial conference on school statistics in 1936, the representatives of British Columbia, Manitoba and New Brunswick spoke of the care taken in their Departments to avoid duplication in this way. Manitoba and British Columbia use transfer cards. When a pupil moves to a new school he takes with him a record of his year's attendance to date and it is reported by the school where he finishes the year. When this system was introduced in Manitoba, in 1932, the year's enrolment fell about 1,600, while the average daily attendance for the same year increased about 2,100.

Table 2.—Average Daily Attendance.—This seems to constitute a more reliable basis of comparison than the annual enrolment of Table 1. Average daily attendance is usually calculated for each school separately, but for New Brunswick the figures represent the result of dividing aggregate pupil-days of attendance by the average number of days that the schools of the province were open. It has to be done this way by reason of the provincial figures of average daily attendance being calculated for the two terms of each school year separately and not for the year as a whole.

Table 3.—Regularity of Attendance.—The conferences of 1920 and 1936 on school statistics both recommended the method of showing regularity of attendance that is used in this table. A compilation of the kind is still not available for Quebec and Ontario. Any method of demonstrating regularity of attendance is unsatisfactory, so far as a comparison between provinces is concerned, to the extent that different methods are followed in arriving at the annual provincial enrolments. See note above *re* Table 1.

Table 4.—This table shows separately for city, town, village and rural schools, the information for a single year that is shown in summary fashion in Table 3.

Table 5.—Using the same twenty-day intervals as Tables 3 and 4, Table 5 shows how many days classrooms were open in the school year. It is a useful supplement to Table 4, indicating how much of the lower attendance was due to schools not being open.

Table 6.—Pupils per teacher on the average day.—This is a new compilation, and is available only for half of the provinces. Table 6 in the Annual Survey of Education for 1936 showed in the same way the annual enrolment per teacher, though not for men and women teachers separately.

Tables 7 and 8.—Pupils by counties or census divisions and larger cities.—The main purpose of these tables is to make certain school statistics available for the main sub-provincial areas that are used in compiling data in the decennial (and quinquennial) census. They are of value in tracing movements of population in inter-censal years.

Note re Quebec.—The figures for Quebec in Tables 1 and 2 include private schools; those for other provinces do not.

Note re earlier years.—Blanks in these tables indicate that the information has not been obtained. In the 1936-38 edition of this Survey figures in Tables 1 and 2 were shown for years as far back as 1867.

AGE AND GRADE OF PUPILS

Notes Concerning Tables 9-10

Table 9.—Age of Pupils.—A resolution of the 1936 conference on school statistics reads as follows: "This conference recommends that there should be a record of the ages, by single years, of all children enrolled in the schools each year; and further that this record should show the ages of pupils as at June 30, or in the case of those who dropped out of school before the end of the school year, their age at date of leaving." Table 9 presents the data thus called for, showing ages separately for urban and rural schools, and for boys and girls. The information is comparatively complete for all provinces except Quebec, where ages are grouped and separate figures are not available for rural and urban pupils. The Ontario record is incomplete, as compared with other provinces, to the extent that the enrolment classified is not the full enrolment of the year as explained in the comment on Table 1. In comparing the rural and urban figures it should of course be remembered that many rural children attend urban schools, especially at the high school level.

Table 10.—Grades of Pupils.—This table classifies pupils by grade in the same way that Table 9 does by ages, *i.e.*, boys and girls, rural and urban separately. It is subject to similar shortcomings except that the Quebec figures are not grouped. In Quebec Catholic schools the divisions are called "years" rather than "grades."

No attempt is made in the table to indicate where the elementary grades end and the secondary begin. The practice in this respect is in transition, with the former 8-4 division less clearly defined and the 6-3-3 tending to replace it.

Classification of age by grade.—In previous editions of this report a cross-classification of ages by grades, for boys and girls separately, and for urban and rural schools separately, has been shown for all provinces except Quebec. At the Dominion-Provincial Conference of 1942 on School Statistics, however, the representatives of some of the Departments of Education advised that the practice of promoting by examination was being replaced by promotion by age. To the extent that this is done the age-grade classification loses significance. It was accordingly decided to discontinue the practice of including the age-grade classification in the Dominion-wide compilations. It may still be obtained for some of the Departments in provincial reports.

SECONDARY EDUCATION

Notes Concerning Tables 11-17

Though the introduction of junior high or intermediate schools leads to the conception of Grades 7 and 8 as secondary, the tables of this section are concerned mainly with Grades 9 and up.

Table 11.—Retrospect of Enrolment.—The trend of secondary school enrolment as shown in this table may be compared with the trend in total enrolment, elementary and secondary, shown in Table 1. With a few exceptions, necessary to retain comparability over the years, figures of Table 11 are for the same schools as are detailed in Table 12.

Table 12.—Size and Types of Schools.—The purpose of this table is primarily to show the distribution of high school pupils in the several provinces according to size or type of school.

Under Quebec are included more than the publicly-controlled schools, for in the Catholic System, strictly speaking, all of the secondary schools (i.e., classical colleges, affiliated girls' schools, and unaffiliated classical schools for boys) are outside of the provincially-controlled group of "primary" schools. The complementary course in the latter is secondary as that term is understood in other provinces, but is not called secondary within Quebec where the term designates the set of schools preparing students for matriculation to university professional courses, as opposed to the "primary" schools which give the general training required for teachers' certificates, admission to technical schools, etc. In the Protestant Schools of Quebec and in the provincial school systems of all other provinces both these types of training are given in the high school grades of the one set of schools. The Normal Schools are also included in Quebec as their courses last from two to four years, and provide general training the equivalent of the complementary course in the primary schools, plus teachers' professional training.

Tables 13-17.—Subjects of Study.—The substance of the resolution of the 1936 conference on school statistics regarding subjects of study was as follows: "Resolved that it is desirable to have a biennial compilation on non-compulsory subjects studied in each Grade above Grade 6, with particular reference to technical and vocational subjects, foreign languages, art, music and others whose place on the curriculum tends most to change." As much as is available in the way of statistical compilation pertinent to this resolution is presented in Tables 13-17. Only for Manitoba are there data for all Grades from 7 up, separately for boys and girls, and for rural and urban schools.

Subjects are indicated as of the grade in which usually taken; though two years of work in a subject may frequently be taken, for instance, in any two of the three grades 10, 11 and 12.

English and Health are obligatory studies in all Grades, 9-12. Social Studies in three of these Grades.

TEACHERS' SALARIES

Notes Concerning Tables 18-24

The resolutions of the 1936 conference on school statistics concerning the statistics of teachers might be summarized as follows: "Resolved that the most satisfactory method of recording teachers' salaries, experience, and tenure is in frequency tables; this information, as well as a record of teachers' certificates, to be shown separately for schools in city, town and rural communities." Tables 18-24 are constructed in conformity with these requirements, with data for the school year 1941-42 for all provinces except Quebec.

The data for each province are presented separately for four categories of schools: (1) city; (2) town and village; (3) rural, more than one room; (4) one-room rural. Because provincial practices vary in the matter of urban incorporation, the types of community represented by the first three categories, the second and third particularly, differ somewhat as between provinces.

In addition to salary tables for the four categories indicated there are tables for thirteen of the larger individual cities, showing salaries separately for elementary and secondary schools.

For 1942 the compilations on teachers do not include information on certificates, experience and tenure, such as appeared in the last edition of this survey. For 1941 and 1943, however, this information may be obtained in mimeographed form from the Dominion Bureau of Statistics, in the bulletin entitled "Teachers Salaries and Qualifications in Eight Provinces."

SCHOOL FINANCE

Notes Concerning Tables 25-27

Financial records of the provincial schools in Canada are neither equally complete nor entirely comparable in any two provinces. Hence it is quite impossible to construct a uniform set of tables for all provinces. A record of assets and liabilities is available only for four provinces (Table 27), a record of expenditures only in five (Table 26). The closest approach to a comparable statement is in the case of receipts, or more accurately, on school support. Table 25 gives data that will permit of a reasonably accurate comparison of school costs as between provinces. (In the Annual Survey of Education for 1934 and 1935 figures were included in all three of these tables for years as far back as 1914. In the present survey only the years since 1929 are included.)

Table 25.—School Support.—The columns of this table show the following: (1) Provincial government grants to the school boards, also their contributions to teachers' salaries where these are paid directly to the teachers and do not pass through the hands of the boards; (2) School taxes raised within the school administrative units, which are variously called districts, sections, or municipalities (the final column of the table shows the number of these); (3) School Board revenue from counties, affecting three provinces only; (4) Tuition fees, which in the school administrative units of most provinces are collected only from non-resident pupils. Though there should be entries under this head in all provinces, they are on record only in four. There are other small amounts, such as receipts from rental of school property, that are not shown in the table for any of the provinces.

The aim of these four columns, when totalled in the fifth, is to show the approximate amount of money there has been to spend in support of the schools from current sources each year. The sixth column shows the debenture indebtedness against schools in each year, for the seven provinces for which a record is available. The annual increase in the sum shown in this column gives some indication of the net amount that was spent each year by school boards over and above the current revenue that is shown in the preceding column. Payments from sinking funds, of which there is no record, would alter the picture somewhat as between individual years. The whole does not make an entirely satisfactory statement but is the best substitute obtainable.

The sums shown in the first column, as government grants, do not in all cases correspond with what appear under this term in provincial reports, but this is because the aim has been to give the term as nearly as possible a uniform significance in all provinces. It does not include, of course, sums spent by the provincial Departments of Education for administration, inspection, teacher training, special schools of various kinds, etc.

Table 26.—Expenditures of School Boards.—In the five provinces included in this table the practice of paying provincial assistance directly to teachers is not followed as in the other provinces, and consequently the figures of Table 25 may be considered as an approximate statement of school board revenues, against the expenditures shown in Table 26. As the footnotes indicate, there is some variation between provinces in what is included in the different columns, but the classification seems to be worth something to indicate general proportions.

Table 27.—Assets and Liabilities.—For three of the provinces not represented in this table (New Brunswick, Ontario and British Columbia), while there is no available statement of assets there is the record of debenture debt shown in Table 25.

25.—Support of the Publicly-Controlled Schools in the Provinces of Canada since 1929

NOTE.—This table takes no account of expenditures of the provincial Departments of Education other than their grants to school boards and payments to teachers.

¹ The Ontario figures include the Township Grant towards the salary of rural public school teachers. In the rural municipalities of Manitoba about three-fifths of the school support is equalized by a uniform school rate levied over the whole municipality. In the greater part of rural Alberta school support since 1936 has been equalized in some 40-odd school divisions.

² In Ontario, from 1929 and 1930 nothing is included for Continuation Schools.

³ Larger "school divisions" are now established in Alberta to perform most of the administrative duties formerly performed by the rural school districts, though the districts retain their identity for certain purposes.

SPECIAL SCHOOLS AND CLASSES

Notes Concerning Tables 28-34

The tables on the next few pages show the enrolment in special schools or classes, conducted by provincial Departments and local education authorities, which are in the main supplementary to the ordinary publicly-controlled schools with which the preceding tables are concerned. These schools and classes serve children who are not able to take advantage, or at least not full advantage, of instruction in the ordinary schools.

Tables 28 and 29.—Schools for the Blind and Deaf.—Most of the schools for blind and deaf children are conducted by provincial governments. In Quebec they are subsidized by the Province but conducted by other organizations. Not all of the provinces possess schools of both kinds, but where they are lacking, the blind and deaf children are sent to the schools of a neighbouring province at public expense. In the Prairie Provinces the provincial governments pay the cost of maintenance, while in the Maritimes the cost is met locally. Obviously, most of the children reside in the schools.

Table 30.—Special or Auxiliary Classes.—These are part of local school systems, rather than provincial institutions, but local school authorities are assisted by Departments of Education in their organization and maintenance. The classes are designed to provide special learning facilities for children who are below normal in physical or mental development. They were started earlier in Ontario than elsewhere, and have been most generally organized there, but they have now been organized, for mentally-retarded children at least, in the larger cities of all provinces.

Table 31.—Schools for Mentally-Defective Children.—These, too, are residential institutions, provided and supported similarly to schools for the blind and deaf. Most of them come under the jurisdiction of provincial Health or Welfare Departments rather than Departments of Education.

Table 32.—Reformative and Corrective Institutions.—These are institutions in which juvenile delinquents are detained for varying periods, usually not more than a year or so. Particular emphasis is usually given to vocational training and guidance, with a view to placement in useful occupations, but academic studies have a place in the program. A few of the institutions are administered through Departments of Education, but a majority through other provincial Departments.

Table 33.—Correspondence Courses.—Conducted by the Department of Education in each case. The table showing their enrolment indicates the nature of the courses offered. Most of them are a development of comparatively recent years.

Table 34.—Evening Classes.—Carried on in the ordinary schools for persons above school age. The subjects taught are mainly vocational or technical. Language courses are popular in some centres, French or other language groups studying English, and English or other language groups studying French.

PRIVATE AND INDIAN SCHOOLS

General descriptive statistics

**SECTION III.—STATISTICS OF PRIVATE AND
INDIAN SCHOOLS**

PRIVATE AND INDIAN SCHOOLS

Notes Concerning Tables 35-44

Tables 35-40.—Private Elementary and Secondary Schools.—There are numerous schools in each province doing work similar to that of the ordinary provincially-controlled schools but which are not publicly financed or administered, hence are not included in Section II of this Survey. The provincial Departments of Education do not, as a rule, obtain statistical records from these schools, and in these cases the Education Branch of the Dominion Bureau of Statistics circularizes them to complete the record of school enrolment and teachers in the Dominion. Excepting Quebec, the private schools have from about two to four per cent of elementary and secondary pupils in the different provinces. In Quebec the proportion is about ten per cent, but most of them are subsidized by the Province and provincial reports include a record of them similar to and in some cases (as of age and grade) inseparable from, the records of publicly-controlled schools. Thus their statistics for Quebec are of necessity included in Section II of this Survey rather than in the tables that follow.

Tables 41-42.—Business Colleges.—There are private schools in many fields of education other than elementary and secondary, the most numerous group working in the field of business and commercial education. A record of enrolment from this group also is collected by the Education Branch of the Dominion Bureau of Statistics.

Tables 43-44.—Indian Schools.—From the time of the formation of the Dominion, the Government of Canada has been charged with the education of the native Indian children, and has maintained a system of schools for them quite distinct from the provincially-controlled schools. They are administered by the Indian Affairs Branch, Department of Mines and Resources, at Ottawa, and the data that appear on them in the following pages are taken from the annual reports of that Branch.

The enrolment of Indian children is now about equally divided between residential and non-residential schools. In the operation of the schools, especially the boarding schools, the different churches have much to do in co-operation with the Department, though the latter bears practically all of the actual cash outlay required. The programs of studies followed are in a general way those of the Departments of Education of the provinces in which the schools are situated, but in the residential schools special attention is given to farming, gardening, care of stock, manual training and domestic instruction. Provincial school inspectors visit most of the Indian schools.

Attendance has improved steadily in recent years, and a greatly increased proportion of the children is reaching the higher school grades. Since 1919 attendance of all physically fit children between the ages of 7 and 15 has been compulsory, and in 1931 the upper age limit was raised to 16. There are about 200 Indian students, not shown in the tables, attending other schools or colleges, most of them being assisted financially by the Indian Affairs Branch.

**SECTION IV.—BIBLIOGRAPHY AND PERIODICAL
INDEX, 1941-43**

BIBLIOGRAPHY OF CANADIAN STUDIES IN EDUCATION, 1941-44

This Bibliography appeared in the last six issues of the Annual Survey of Education (1932-40) and in Part I of the first Biennial Survey, covering studies of the years 1929-41. In this edition the record is carried on into 1944. If users of the compilation find any omissions, the Education Branch of the Dominion Bureau of Statistics will welcome notification to this effect, in order that they may be entered in the next edition. The bibliography does not attempt to include text books. These are included in the annual "Catalogue of Canadian Books" published by the Toronto Public Library. Periodicals covered include the quarterly university reviews, but articles on higher education are not listed here; they are included in the bibliography that is published in the companion report, "Higher Education in Canada".

- Cahiers d'Action Catholique*, 430 est, rue Sherbrooke, Montréal.
Canadian Public Health Journal, 105 Bond St., Toronto.

Understanding the Child, 111 St. George St., Toronto.
University of Toronto Quarterly, Toronto.
Western Municipal News, 222 McDermot Ave., Winnipeg.

Articles dealing with education in some twenty-odd other periodicals can be traced in the Canadian Periodical Index, which again became available in 1938 after a lapse of several years. It is prepared in the University of Toronto Library, and published quarterly by the Public Libraries Branch of the Ontario Department of Education, under the same cover as the Ontario Library Review. An annual accumulation is also being issued.

The seventeen sections into which the bibliography is divided are in no sense clear cut and mutually exclusive, but the classification thus effected should make the list in some measure easier to use. Probably more of the studies should be entered under two or more headings, but it is difficult or impossible for the compiler to do so without having a copy or summary of the study before him, and this is not always the case.

INDEX OF CANADIAN EDUCATION PERIODICALS, 1941-1943

The following are the magazines, the major articles in which (when the articles are about education, rather than supplementary textbook material for pupils) appear in the index. Along with the name of the magazine the name and address of the editor and the abbreviation used in the index are shown. The articles included are those appearing in the editions of the magazines between September 1941 and August 1942, on pages 88-95; those on pages 96-103 between September 1942 and August 1943.

(After a lapse of several years, the Canadian Periodical Index again became available in 1938. It is prepared in the University of Toronto Library, and published quarterly by the Public Libraries Branch of the Ontario Department of Education, under the same cover as the Ontario Library Review. An annual accumulation is also being issued. Some thirty periodicals are included, some of them including articles on education, but none of the purely education periodicals indexed on these pages.)

CANADA—DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS
EDUCATION STATISTICS BRANCH

HIGHER EDUCATION IN CANADA, 1940-42

(BEING PART II OF THE BIENNIAL SURVEY OF EDUCATION
IN CANADA, 1940-42)

Published by Authority of the Hon. James A. MacKinnon, M.P.
Minister of Trade and Commerce

OTTAWA
EDMOND CLOUTIER
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1944

PREFACE

This survey presents the statistical records of Canadian universities and colleges during the first three years of war. It shows an increase in the enrolment in Science courses, maintenance of the pre-war level in Medicine and Dentistry, a decrease in Arts, Agriculture, Education and some other faculties. The net result was practically no change in the over-all number of undergraduates enrolled, but a slightly higher proportion of women than in pre-war years. There was a considerable reduction in the number of post-graduate students, which has since become more marked.

Staff members were maintained but many of the senior members, on leave of absence for the duration of the war, were replaced by less experienced teachers.

The survey appears for the second time without an analytical section preceding the tables, due to wartime conditions. It was prepared by Miss S. A. Feeley in consultation with J. E. Robbins, M.A., Ph.D., in the Education Statistics Branch of the Bureau.

S. A. CUDMORE,
Dominion Statistician.

2.—LIST OF PROFESSIONAL SCHOOLS, COLLEGES AND UNIVERSITY FACULTIES IN CANADA, SHOWING THE FULL-TIME ENROLMENT OF UNIVERSITY GRADE IN EACH BRANCH OF STUDY, 1940, 1941 AND 1942

NOTE.—This is a detailed list of the institutions or parts of institutions for which statistics are summarized in the ensuing tables. The name of each appears in the language, English or French, used in it as the main language of instruction. The figures opposite the name of each show full-time enrolment of university grade, i.e., in courses for which matriculation is prerequisite, male and female separately. No record is included of part-time students (except in Post-Graduate Arts and Science where they cannot be separated), evening classes, short courses or extension students of any kind; nor of full-time students that are in courses for which matriculation is not prerequisite, e.g., students in the high school or preparatory departments of colleges, or in diploma courses in agriculture, household science, music, etc. Students of all kinds are counted in the later tables but the more limited purpose of Table 2 is to show at what locations instruction in each branch of higher studies is available, and to indicate the approximate share of each institution in the total.

NOTE.—Figures in this table are not strictly comparable as between years because records from some institutions (different institutions in different years) have not been available for inclusion. Moreover some institutions have given the information in some years for more of their students than they were asked to report, i.e., more than their full-time students of university grade; when pre-matriculation or part-time students have been included in the reports it has not been possible to separate them in compiling the table.

†† For 1921 there is only one figure for all students from outside Canada. Distribution by countries incomplete.

NOTE.—Figures in this table represent a record of annual income for general university activities for the larger universities and many of the colleges of Canada. The institutions included represent about 80 per cent of the annual full-time enrolment. Total income and the resulting deficit or surplus does not include gifts and grants for capital expenditure.

¹ Board and lodging not included. ² Site, buildings, equipment. ³ Compiled from 1941, previous record not available.

BIBLIOGRAPHY

In the editions for 1932-36, the "Annual Survey of Education in Canada" contained a "Bibliography of Canadian Studies in Education," including a section on "Professional and Other Higher Education," another on "Historical and Biographical Studies," etc., in which new publications relating to higher education in Canada were recorded. Since the separation of statistics of higher education from the rest of the Survey in 1936-38 the corresponding bibliographical items have been published in this report. The Education Branch of the Dominion Bureau of Statistics will welcome advice of important omissions, so they may be included in the next edition. No systematic attempt has been made to include articles appearing in the periodical press other than the several university reviews; beyond these the list includes only articles that have incidentally come to the attention of the compilers.

Annual Reports

Hereunder are listed the printed annual reports of universities received by the Education Branch. There may be others; if so, a copy would be welcomed by the compilers of this report. The annual calendars are not listed except in the case of Université Laval and the Université de Montréal where the *annuaire général* includes a record of the year's work as well as a description of courses.

Alberta, University of.—Report of the Board of Governors and the President. Annual, 30-40 pp. Obtainable from the University, Edmonton.

Baudouin, Joseph.—L'école d'hygiène sociale appliquée. Annual report on the work of this Montreal school. *Revue Trimestrielle Canadienne*. June 1939, pp. 198-216.

Dalhousie University.—President's Report. Annual. Includes a financial statement. About 30 pages. Obtainable from the University, Halifax.

Laval, L'Université.—*Annuaire général*. Includes reports of university officers. Obtainable from the University, Quebec.

Manitoba, University of.—President's Report. Annual. About 135 pages. Obtainable from the University.

McGill University.—Annual Report. Includes financial statements. About 100 pages. Obtainable from the University, Montreal.

Montréal, Université de.—*Annuaire général*. Includes several appendices on events and work of the year. Obtainable from the Secretary of the University, Montreal.

Queen's University.—Principal's Report. Annual. Contains a summary of the year's work in all Faculties or Departments, including the Registrar's and Treasurer's Reports. 120 pp. Obtainable from the University, Kingston, Ont.

Saskatchewan, University of.—President's Report. Annual. 50-100 pp. Includes financial statements. Obtainable from the University, Saskatoon.

Toronto, University of.—Annual Report of the President. A document of 160-180 pages reviewing all departments of the University's work. (In recent years it has also been printed in the Report of the Board of Governors.) University of Toronto Press, Toronto.

Toronto, University of.—Annual Report of the Board of Governors. Of recent years a document of more than 300 pages, including the President's Report on all Departments, detailed financial statement, etc. King's Printer, Toronto.

Universities Bureau of the British Empire.—The Yearbook of the Universities of the Empire. Lists the staff and gives general information concerning Canadian universities, as also for those in other parts of the British Empire. Published by G Bell and Sons, London, Eng.

Western Ontario, University of.—Report of the President. Annual, about 60 pages, mimeographed. Obtainable from the University, London, Ont.

PREFACE

Except in a few localities the work of public libraries in Canada has shown little increase during the ten years this biennial survey has been made. Well over half of the Canadian population is still without public library service, as compared with one-fourth in the United States and less than 1 p.c. in Britain. Expenditure for libraries here continues to be less than 20 cents per capita, while it approaches 30 cents in Britain and is more than 40 cents in the United States.

The total volume of public library reading is less than it was ten years ago, and has declined particularly in adult fiction during the war years. One obvious reason for the wartime decline lies in the number of readers who by joining the armed services have gone out of reach of the libraries,—to training centres, defence areas, overseas, etc. There has, moreover, been no general plan by means of which librarians could provide a compensating service to enlisted readers. Some library boards out of local resources have made special attempts to meet the library problem of training centres in or near their cities, but in the main the provision of reading material for service personnel has been left to voluntary agencies.

Children's reading shows an increase. The newer school programs of study, placing less reliance on a few text books and recommending access to a wide selection of books, doubtless have much to do with this. A special compilation is presented in Table 6 on the use of libraries by juveniles. In addition to the traffic in books recorded there, it is to be noted that a few dozen libraries make provision for story hours or classes to be conducted on the library premises, while others have members of the library staff visit the schools.

Due to special wartime circumstances this Survey appears for the second time without an analytical review of the tabular matter presented; Section I is restricted to summary tabulations. Section II lists libraries with certain data for each individually as usual and includes the new population figures from the census of 1941. The library statistics are for the calendar year 1941, thus continuing the biennial series begun in 1931.

The Survey has again been prepared in the Education Branch of the Bureau under the supervision of John E. Robbins, M.A., Ph. D.
