TERMS AND CONDITIONS

"Vendor":
Outwater Plastics Industries, Inc. & Architectural Products by Outwater, LLC

PRICES:
All prices are subject to change without notice. No deduction will be allowed at settlement. Minimum order is $25.00 (Merchandise only). Orders less than this minimum will be billed as $25.00 plus shipping charges and tax, if applicable.

NOTE:
Orders are accepted with the understanding that they will be billed at the price in effect on the day of shipment.

PAYMENT TERMS:

N30
To establish N30 terms, we must be supplied with your company's Dun & Bradstreet number (DUNS Number). Concerns not rated favorably with Dun & Bradstreet, not rated at all with Dun & Bradstreet or inactive accounts, are required to furnish, on company letterhead, four (4) trade references, the name of their bank and account number, their Federal I.D. number or CRA-issued business number, and the date and state/province their business was incorporated.
Please note: If supplying trade references, please allow 2-3 weeks for processing.

Credit Card
We accept major credit cards (Visa, MasterCard, American Express and Discover.)
Please note: When authorizing us to charge your card in an amount over $500.00, we require a signed credit card authorization form, which we will fax or email to you for your signature. Order processing will not begin until this authorization is returned to us.

C.O.D.
C.O.D. orders are no longer accepted.

Prepayment
Customers not wishing to use a credit card or set up N30 terms, may prepay orders. Please speak with your sales representative when placing your order. We accept company checks and certified / bank checks. Order processing will not begin until we receive payment. Non-certified checks (company or personal) may take an additional five business days after receipt before order processing will begin.

Other Terms
Large orders, Custom or Special Order items may require certified funds and/or a deposit, regardless of existing credit terms. If applicable, this will be discussed at time of order. If a deposit is required, order processing will not begin until deposit is received by us. Should deposit be sent in the form of a non-certified check, it may take an additional five business days after receipt before order processing will begin.

WARRANTY:
All merchandise is produced to standard and commercial tolerances. Vendor warrants product to be free from defects in workmanship and material. When Vendor has determined that a product is defective, it will be replaced. At Vendor's discretion, a credit may be offered instead of replacement. Vendor liability is limited to the cost of the defective product. No other warranty is expressed or implied.

LIABILITY:
The customer shall test and verify the suitability of the product for intended use. No warranty for intended use is made. The customer assumes all risk and liability. Vendor's only obligation is replacement or credit for product proven defective. Vendor shall not be liable for any loss or damage from the use or inability to use the product.

TECHNICAL ADVICE:
Any technical advice furnished or recommended by Vendor or any representative of Vendor concerning any use or application of any product is believed to be reliable but the company makes no warranty of results obtained. The customer shall test for and verify suitability for intended use.

FREE SAMPLE POLICY:
Reasonable sample quantities are available at no charge for many of the products within this catalog; to test their suitability for your intended use or application. Most samples are shipped free of charge via standard U.S. mail or UPS ground. Other shipping options are available, at customer's expense. Please discuss with our sales representatives.

MERCHANDISE RETURN POLICY:
Merchandise may not be returned for credit without prior authorization from our Customer Service department. Please have your order number available when contacting us.

- You may return most items purchased for a partial refund within 30 days of purchase. A restocking fee will apply and shipping charges will not be refunded. Restocking fees as follows:
  - 20% restocking fee applies to most stock items. Some dropship items will be subject to a higher restocking fee. Where applicable, fees are stated within our catalog.
  - 40% restocking fee applies on items that have been cut for shipping purposes. Custom or Special order items may not be returned.
- Refund will only be issued in the original form of payment.
- Customer is responsible for the shipping cost of items returned. Be mindful of packaging as any damage during return shipment is the responsibility of the customer.
- Returned material must be received in original condition.
- Any products cut, altered, modified or installed by the customer may not be returned.
- We reserve the right to refuse unauthorized returns. Unauthorized returns will be returned to the customer at their expense.

DAMAGE/LOSS:
- Upon receiving your shipment, please inspect the packages carefully for signs of damage. Check contents for damaged or missing items.
- Damage and/or loss claims must be reported within 48 hours from time of receipt!
- We utilize small parcel carriers [UPS and Federal Express] and many LTL freight carriers [such as YRC, New Penn and UPS Freight] when shipping our products. Specific instructions will vary depending on the carrier.
- If Damage/Loss is suspected, please do the following:
  - Inspect your shipment as soon as it arrives.
  - If your merchandise has arrived via LTL freight carrier, all damages/loss must be notated on the delivery receipt at time of delivery. Please take digital photographs and email to: customerservice@outwaterplastics.com.
  - Please keep all merchandise and packing material for possible inspection by the carrier.
  - Contact our Customer Service Department immediately! It is best to get in touch with us right away. Be advised that claims made after 48 hours of receipt will not be honored.

DEFECTIVE MERCHANDISE POLICY:
Every item that we sell meets our highest standards for quality and performance.
If a defect in merchandise is suspected, please proceed as follows:
- Inspect merchandise for quality before altered or installed.
- Upon the finding of parts which may be defective, contact our Customer Service Department immediately! We will request digital images, a sample of the material, or a combination of both material and images to be sent to our Customer Service Department for evaluation.
- Upon review of the samples/images we will determine if replacement or refund is appropriate. Return of the defective merchandise will also be determined at this time and if deemed necessary an RMA (Return Merchandise Authorization) will be issued.
- The responsibility of Outwater Plastics and Architectural Products ends here. Any loss incurred for labor, transportation or any other expenses are not covered.

PICK UP ORDERS:
Orders placed for pick up must be picked up within 2 weeks from the date placed, or the date material becomes available. Orders not picked up within 2 weeks will be cancelled. To secure material for a longer time period; arrangements may be made for non-refundable prepayment and pick up by a specified date.

SHIPPING TERMS:
Shipments are F.O.B. shipping point.

SHIPPING TERMS IN CANADA:
- All transport (shipping) fees are F.O.B. shipping point.
- Brokerage Fees (Entry, Duties and GST):
  - Will be paid by shipper for shipments that meet all of the following conditions:
    (1) shipment departs from our Bogota, NJ warehouse,
    (2) shipment is transported via UPS Ground Service and
    (3) shipping fees are pre-paid and added to the order total.
  - Are the responsibility of the purchaser for all shipments that have any one of the following conditions:
    (1) shipment departs from a warehouse location other than Bogota, NJ,
    (2) shipment is being transported by a carrier other than UPS,
    (3) shipment is being transported through a UPS service level other than Ground or
    (4) shipping fees are not being pre-paid and added to the order total.

Family

"While others take care of their investors, we take care of our customers." Family owned and operated since 1972, Architectural Products by Outwater, LLC began as a brick and mortar company serving those in the architectural and interior design industries. Having 300,000 square feet of distribution and warehousing facilities in New Jersey and Arizona enables Outwater to provide reasonable shipping costs and lead times for customers throughout the country. Outwater strives to provide innovative and exciting products for our clients. This desire led to our partnership with ORAC Décor®, another family owned business with an enthusiasm for all things beautiful and elegant. For over 50 years, ORAC Décor® has developed and manufactured traditional, modern and unique high-quality 3D ornaments resulting in a complete collection for the design professional.

Award Winning Designs

reddot design award
product design

ORAC Décor's breathtaking line of architectural mouldings brings new meaning to interior design and features many award-winning products. In 2014, ORAC Décor's Wave Profile for Indirect Lighting won the internationally acclaimed Red Dot Award for Product Design, and in 2016 the new SX171 Baseboard Moulding was the winner of the Smart Design on Intirio. ORAC Décor® remains Europe's #1 choice for interior design and this award-winning, designer collection is available in North America exclusively through Architectural Products by Outwater, LLC.

Our Designers

Ulf Moritz
Xavier Donck
Orio Tonini
Pierre Daems
Jacques Vergracht

ORAC Décor® has teamed up with many of the industry's top European designers and architects to develop new and innovative profiles. Working with these designers allows ORAC Décor® to stay up to date on the latest design trends and create truly inspired profiles that fit an array of different styles.

Collaborating with these world-renowned designers and architects resulted in a collection of unique profiles and 3D wall decor that the industry has never seen before. ORAC Décor's new MODERN Collection of profiles and high-quality 3D ornaments breaks away from traditional style mouldings and features a "less is more" theme employed by designers and architects like Ulf Moritz, Xavier Donck, Orio Tonini, Pierre Daems and Jaques Vergracht.

Incorporating their ideas into the clean-cut lines and styles of this collection has enabled ORAC Décor® to open up a whole new era of architectural mouldings and designs that will continue to grow.

Materials

As a pioneer, ORAC Decor® has introduced synthetic technology for the production of their decorative elements. Synthetic materials have more advantages than traditional plaster, wood or MDF solutions.

ORAC's synthetic materials are not only lightweight, easy to handle, sturdy and durable but also completely recyclable. Boasting product quality that is second-to-none, ORAC's decorative mouldings and ornaments are primed and ready for painting/finishing.

PUROTOUCH®
A high-quality, high-density polyurethane that allows fine details.

DUROPOLYMER®
An extruded and impact-resistant polymer based on a high-density polystyrene.

DUROFOAM®
An extruded lightweight polymer based on a medium-density polystyrene blend.

FLEX
A wide range of cornice mouldings, panel mouldings and baseboards are also available in a flexible version.

Technical

ORAC Décor® strives to produce the highest quality products for its customers and provides any information needed for a smooth installation. Technical drawings can be downloaded by visiting www.oracdecorusa.com, where you can also find videos that show various methods of installation for the complete ORAC Décor® line of products.

Steel Molds

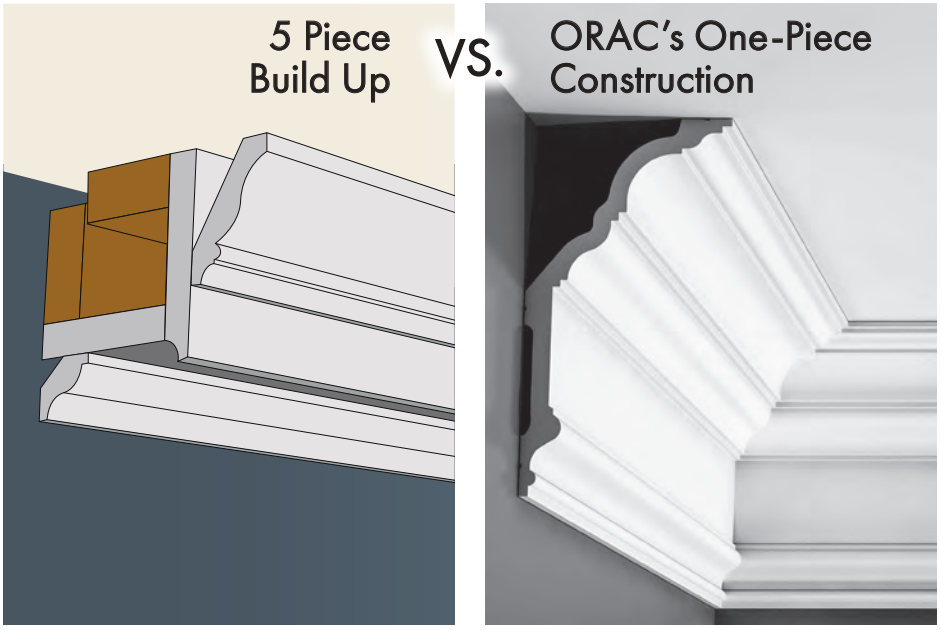
the benefits of

ORAC Décor® has become a leader in the industry through innovation and creative design. Part of what makes ORAC Décor® so unique is the use of steel molds to produce the high level of defined, rich detail that ORAC Décor® is known for. The use of steel molds also enhances all of ORAC Décor's exclusive materials, formulated specifically to create long lasting, beautiful products.

This process provides crisp, sharp details and unlike rubber molds, steel molds do not warp or degrade during production ensuring that each and every ORAC Decor® moulding is identical.

Build Up

ORAC Décor's standard mouldings and new MODERN Collection feature large, one-piece profiles that provide an effortless installation. These mouldings feature one-piece construction, and eliminate the need for build-up and the possibility of post construction separation or cracks. ORAC Décor's mouldings are incredibly lightweight, easy to work with, and can be installed with everyday woodworking tools.
The large profiles are more cost effective than traditional build-ups, saving time and labor during installation and will enhance any pre-existing architecture with ease.



FLEX PANELS

Our wall panels **W108 ZIGZAG**, **W109 VALLEY** and **W110 HILL** are now offered in a flexible version.

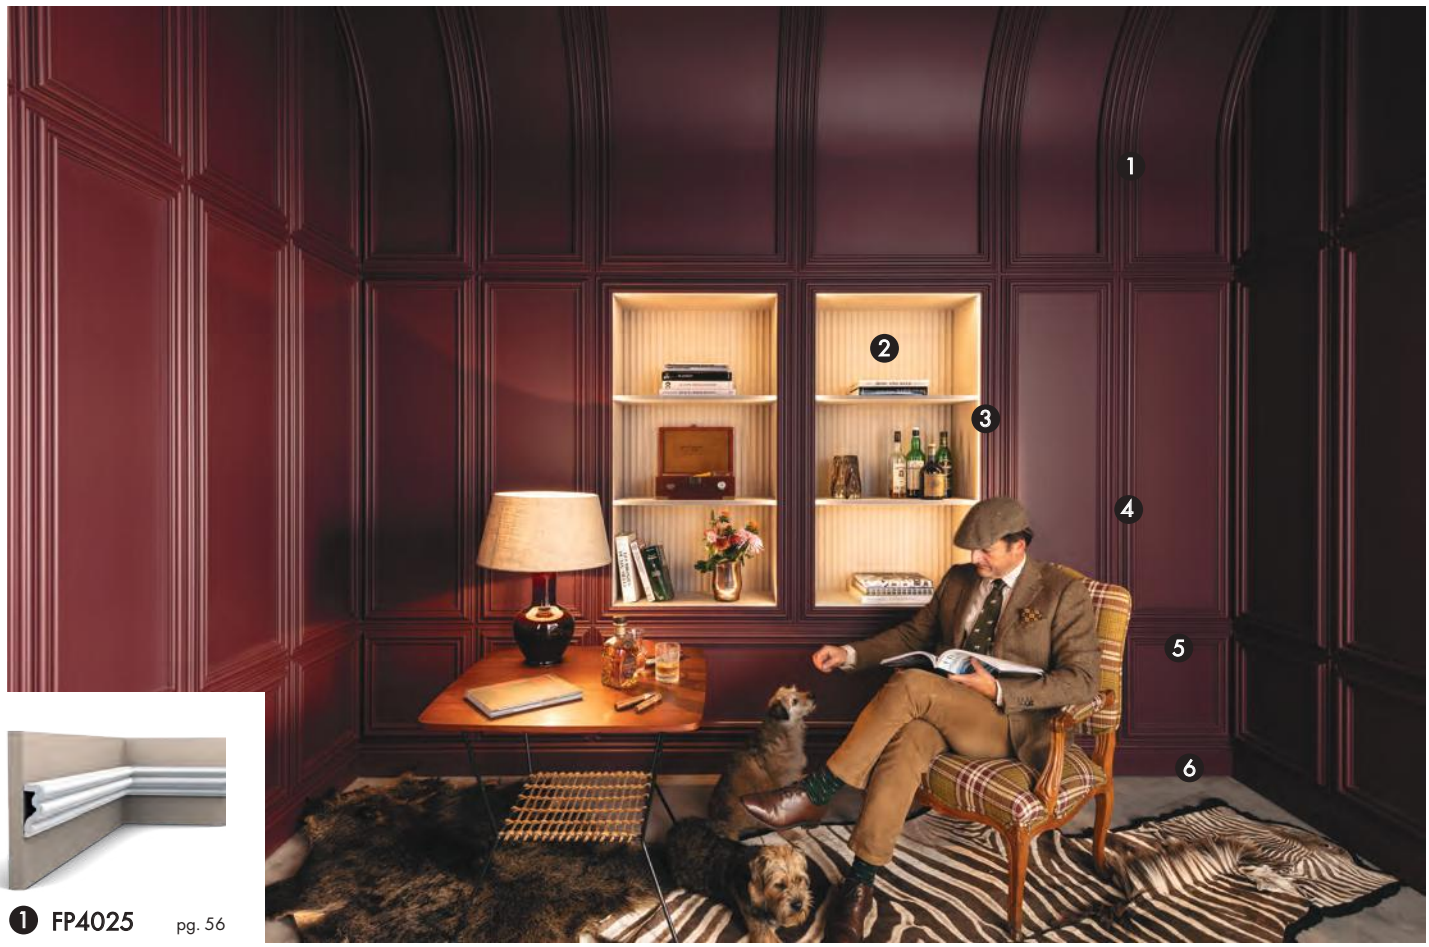
Introducing

The Heritage Collection

History with a modern twist

Imagine yourself in an nineteenth century manor home, living in a space full of large intricate cornice mouldings that emphasize the height of your rooms. A space where rich hues and ornate wainscoting come together in perfect harmony.



1 FP4025 pg. 56

2 W109 pg. 75

Reign over your wall decoration. These authentic designs with precise details immediately conjure up depth and structure for your wall.

This innovative paneling system consists of primed, prefabricated wall panels W120 and W121 and insert options W122 and W123. It is an economical solution for wall depth creation and allows for fast, effortless installation. Unlike traditional wood millwork, there is no mitering necessary, which eliminates cracks and cuts down on labor costs, too.

Specially Created Profiles for the Heritage Collection

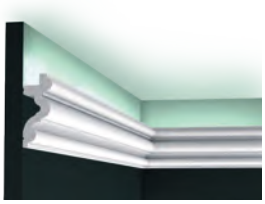
Create a special space with character. Use a separate frame with an identical design to create your own made-to-measure panels.

P4025

Our P4025 customizable framing profile allows you to create any sized panel to complete your design. This panel profile is also available in flexible form (FP4025) which is ideal for vaulted ceilings or curved walls.

SX138

SX138 baseboard is the perfect foundation for building the Heritage wall system and elegantly ties the room together. Like all ORAC baseboards, the SX138 is impact resistant and impervious to moisture.



C324

C324 is designed to house LED lighting strips to illuminate recessed bookcases, bars, and niches.

C323

C323 is the top cap for the Heritage paneling system. This creates a seamless connection between the crown moulding and paneling.

Indirect Lighting

Indirect lighting creates a warm atmosphere and adds depth to a room by producing subtle lighting effects. Our innovative profiles for indirect lighting are specially designed to incorporate compact LEDs and disperse light evenly. They can direct light upward or downward and are offered in a variety of shapes and sizes to fit seamlessly into any interior.

Curtain Mouldings

Make your curtain hardware disappear

The innovative, new curtain mouldings featured in the MODERN Collection are the perfect addition to your space. These state-of-the-art mouldings were designed to be attached to the ceiling and allows adjustable space for curtain rods and drapes to be hidden behind. It is also possible to use these new curtain mouldings to hide lighting and other hardware. When installed these mouldings also offer an uninterrupted perimeter around the room and are a beautiful transition from wall to ceiling. These mouldings can also be used with other products from the ORAC Décor® line for a seamless, modern design.

designer's edge MILLWORK

2 Distinctive Mouldings

Value and Design come together to create a line of millwork designed to give all your projects a distinctive finish... a designers finish.

Polyurethane DEM Mouldings

DEM Mouldings and Millwork encompass a full decorative array of premium quality polyurethane cornice and panel mouldings, medallions, niches, stair brackets, pilasters and other ornamental products that are guaranteed to satisfy all decorative requirements without compromise. DEM is impervious to adverse climate and weather conditions, and, because of its dimensional stability, will not alter over time. Produced in exclusive molds that yield ornate and sharply defined details, perfect dimensions, and extremely consistent quality, DEM is lightweight, impact resistant and easy to install and finish using traditional woodworking techniques and tools.

Polystyrene High Density RPS Mouldings

RPS 100% Recycled High Density Mouldings, which are impervious to adverse climate and weather conditions, offer an economical decorative and design medium that are manufactured from renewable polystyrene resources. Introduced as a cost effective alternative to more costly polymer mouldings and millwork, RPS Mouldings will aesthetically satisfy all decorative requirements without having to compromise for lesser quality mouldings. The polystyrene compound from which RPS Mouldings are manufactured, not only produces a durable, impact resistant surface, making them ideally suited for use in highly trafficked environments, RPS Mouldings can be easily cut, nailed, glued, finished and installed using the same woodworking techniques and tools as wood and MDF mouldings & millwork.

The "Original" Hybrid Formula

MP-25-ADH is a high performance, one component, permanently flexible, easy to use, multi-purpose fast cure modified acrylic latex sealant. MP-25-ADH cures rapidly when exposed to atmospheric moisture to form a durable bond.

- *Use as adhesive or filler*
- *Eco-friendly, low VOC's*
- *Fast cure* • *Paintable* • *Non-yellowing*

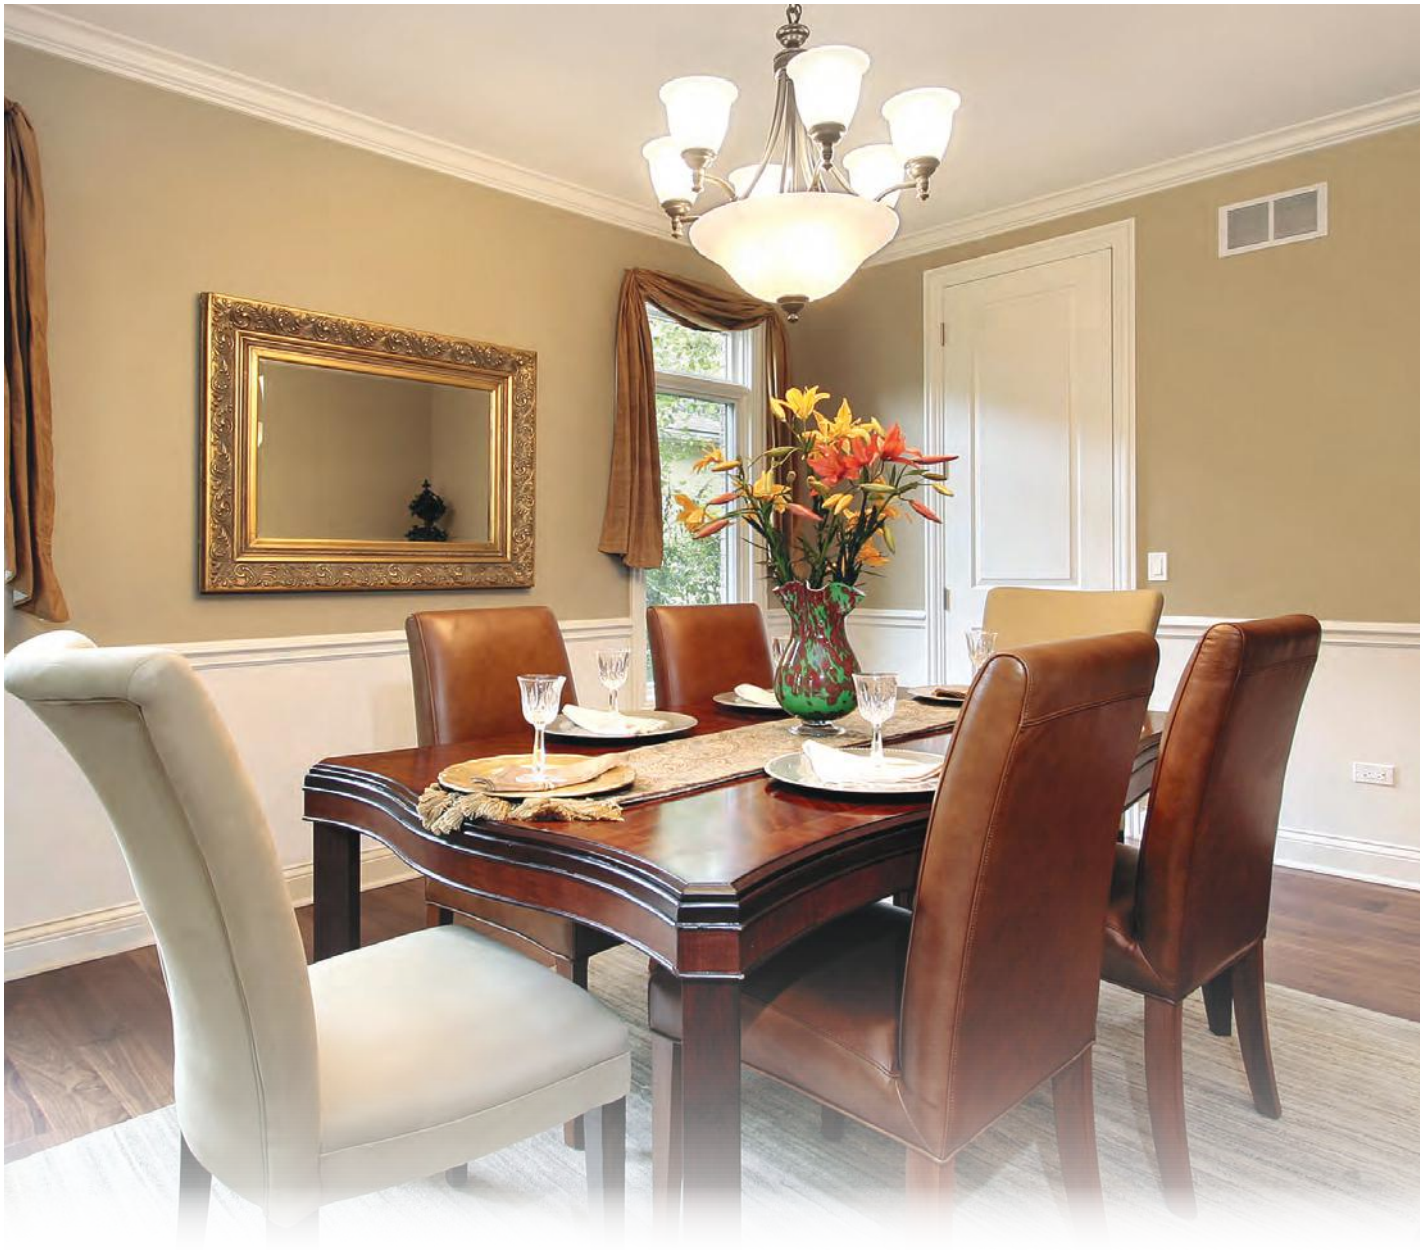
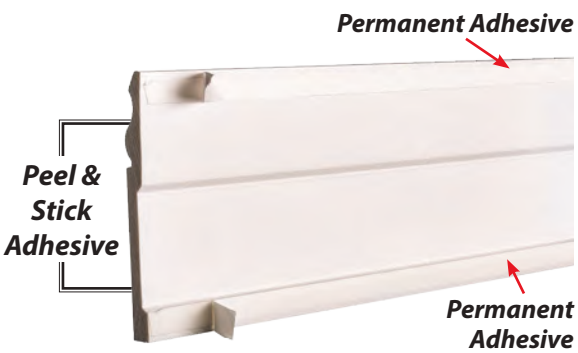
New



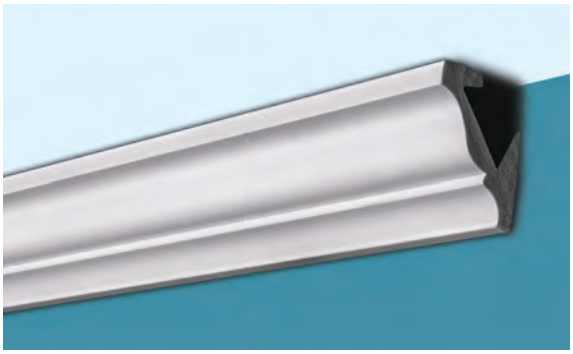
High Impact Peel & Stick Mouldings With Pre-Mitered Inside & Outside Corners.

- **Peel & Stick –** Fast, easy installation without glue or nails
- **Moisture Resistant –** Great for bathrooms, kitchens, and basements
- **High Impact –** Polymer material is as hard as oak
- **Paintable –** Smooth surface is ready to paint without priming
- **Eco-friendly –** Made from 100% recycled polystyrene

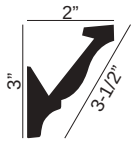
See Pages 82-83 For Our Coordinating One-Piece Panel Frames



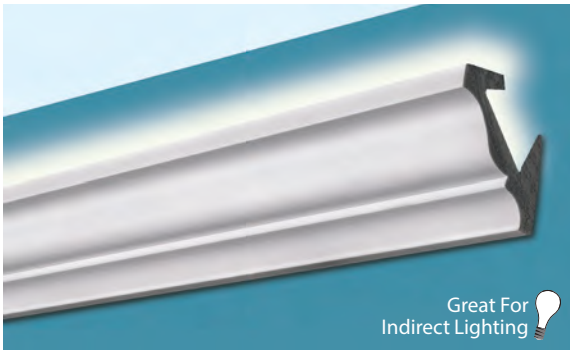
Crown Moulding



TFM-49-A
Length: 96″

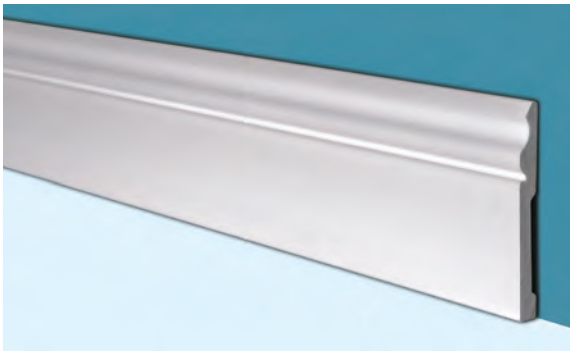


1″ permanent adhesive strip on the bottom back of the moulding.



Baseboard Moulding

TFM-4475-A • Length: 96″



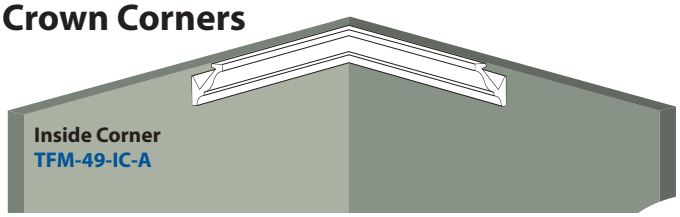
1/2″ permanent adhesive strips on the back of the moulding.

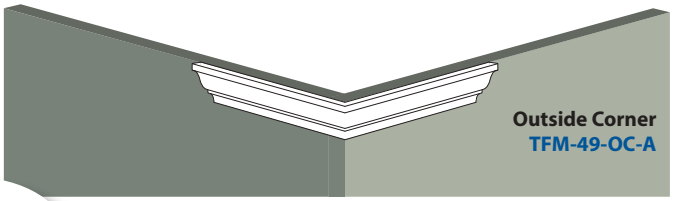
Pre-Mitered Inside & Outside Corners

Both corners come in two pieces that are 15-3/4″ long and cut at 45 degrees

Assembly Required

Crown Corners





Free tube of filler:

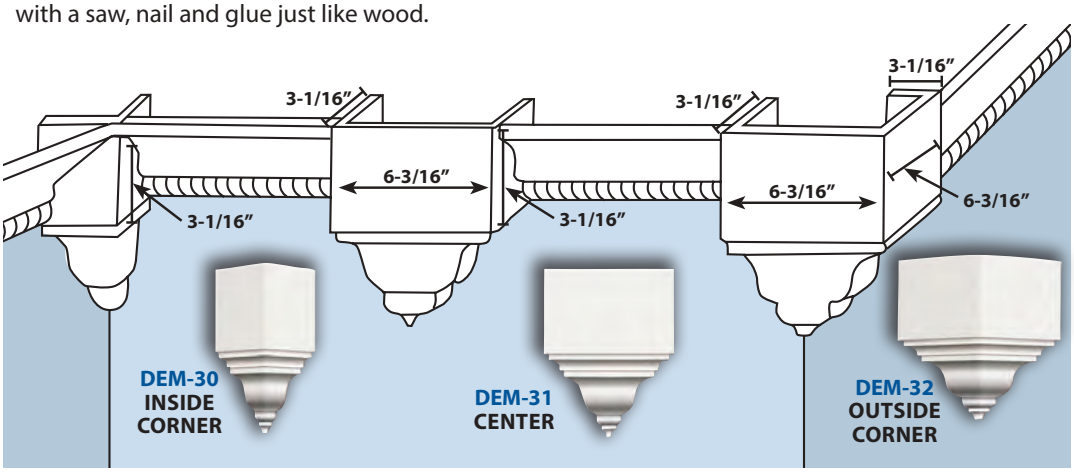
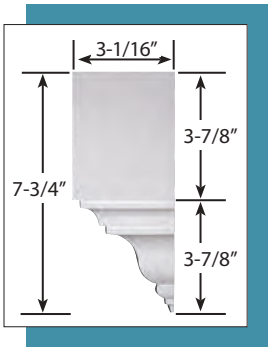
HIGH DENSITY POLYURETHANE

Our corner and center blocks allow you to install cornice mouldings quickly and easily with no need for mitering. Adding these architectural embellishments will highlight the beauty and visual appeal that crown moulding offers.

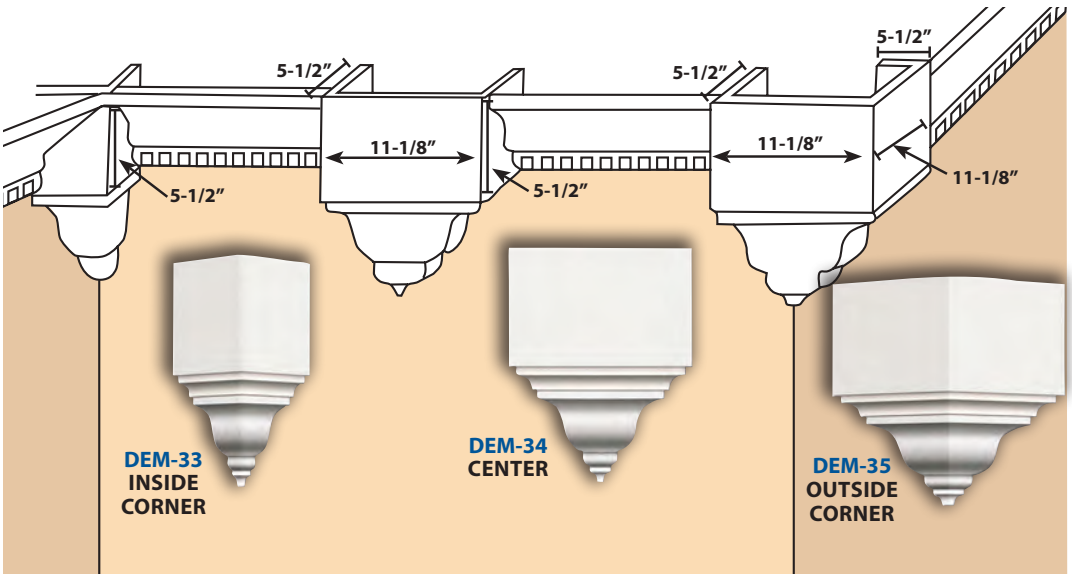
- **One piece pre-assembled, Corners & Centers.**
  No need to construct your own center and outside corner, we've done the work for you, saving valuable time.
- Primed and ready for paint.
- Lightweight and easy to install, corners and centers can be cut with a saw, nail and glue just like wood.

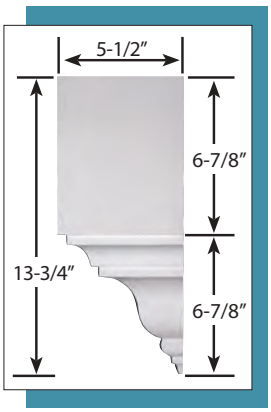




Crown Moulding cannot exceed 3-3/16" height and 3" projection

Many great crown options can be found on pages 89-90





Crown Moulding cannot exceed 6-3/4" height and 5-1/2" projection

Many great crown options can be found on pages 89-90

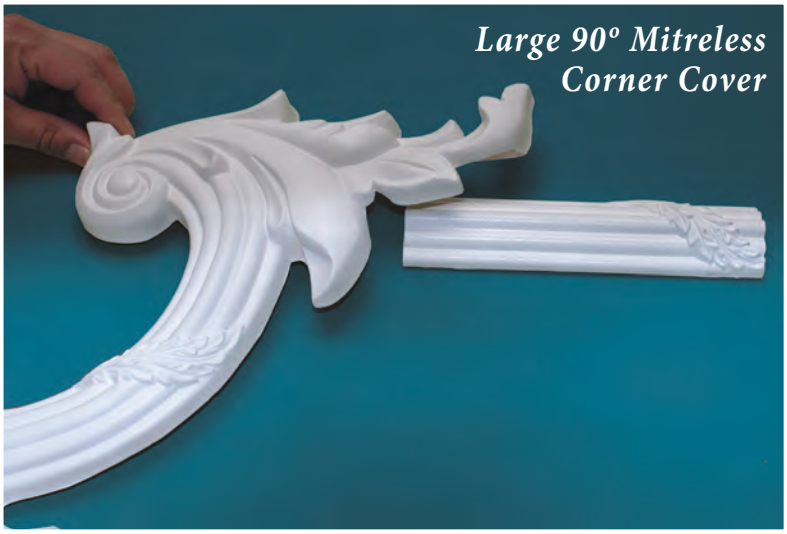
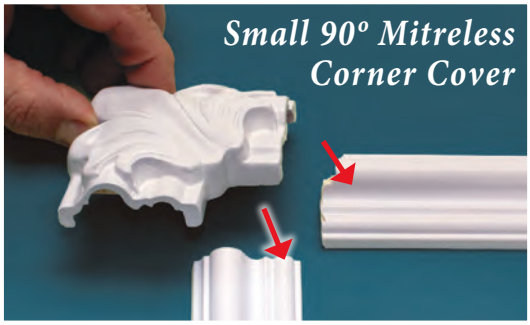
Mitreless Cover & Butt Joint Corner

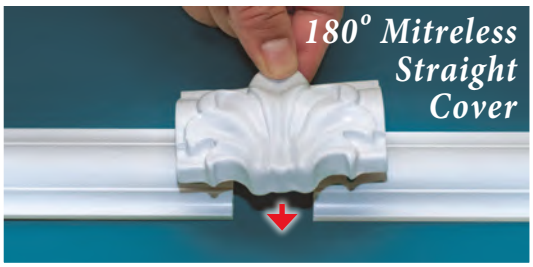
The 90˚ Mitreless Corner Cover & 180˚ Mitreless Straight Cover

These products are decorative and designed to eliminate mitering and butt joints. The covers will hide any imperfections on moulding edges and save time on installation.





Our corners allow for miscuts up to 1/4"



The 90º Butt Joint Corner & 180˚ Straight Butt Joint

When two ends of material are joined by butting them together using adhesive and caulk or other type of filler. These items need to have a tight fit and may require sanding, build up and caulking.

All dimensions are approximate.

Achieve Radii Never Before Possible- Available In 6 Ft. to 12 Ft. Lengths in even 1 Ft. Increments

IMPORTANT NOTES:

1. Material should be removed from box and stored flat when received. Allow it to come to room temperature 24 hours prior to installation.
2. For best results, the use of construction type adhesive in addition to pneumatic pin nailing is recommended. Use of tape or clamps may be helpful in securing the material in position while adhesives bond.
3. "Made-To-Fit" mouldings can be cut, shaped or sanded using normal woodworking equipment.
4. The use of water based stain such as Miniwax works well. Apply with brush or rag and wipe off. Additional coats may be applied if necessary to match wood. Be sure to allow first coat to dry completely before applying more stain. Finish with clear coat after staining.
5. All paints work well. Best results are seen when a primer coat is applied. When using Alkyd Enamels or Oil based Enamels a water base or Latex undercoat is required. Never paint before installation. The material is flexible and the paint may crack during installation.

***PLEASE NOTE: Flexible Mouldings May Shrink Up To 2% During Manufacturing (slightly more on larger profiles) in Size Compared To Rigid Mouldings.**

FLEXIBLE MOULDINGS ARE A NON-STOCK ITEM & HAVE A 3 WEEK LEAD TIME. EACH PIECE IS CUSTOM MADE, AND DEPENDING ON APPLICATION, RADIUS INFORMATION AND OR TEMPLATES MAY BE REQUIRED.

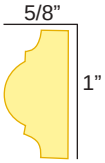
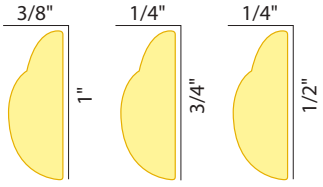
Must be purchased in full length pieces

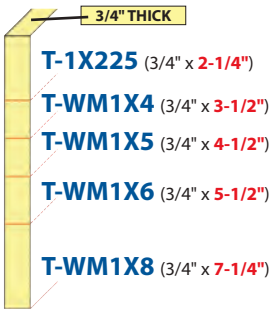
DEM-303F - Flexible - 93"
Must be purchased in full length pieces



Max Radius 8"
Design Repeat: 7/8"

DE-903 (1"W x 3/8" Thick)
DE-904 (3/4"W x 1/4" Thick)
DE-905 (1/2"W x 1/4" Thick)

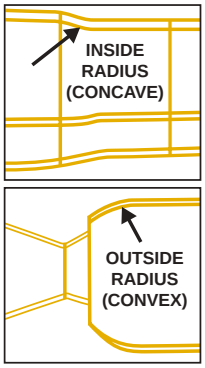




*** BECAUSE EACH PIECE IS MADE TO ORDER, THESE MOULDINGS ARE NON-RETURNABLE.**

Concave (Inside) / Convex (Outside) Radius Applications:

Although radius information may not be required for this application, profiles can not achieve a tighter radius than 3 times the width of the moulding. Example: A 3" wide moulding can achieve a radius of no tighter than 9". Attempting to do so may result in cracking.



Casing Applications:

Half Round:
When ordering half circle radius casing, measure the distance across the opening at the widest point. This is the diameter of the circle (see diagram). The radius (height) dimension should be one half the length of the diameter. Specify the radius on your order.

Eyebrow:
When ordering arches or arcs (also called eyebrows or sectionals), measure the height and width of the arch (see diagram). Specify these dimensions when ordering. Templates must be furnished when ordering elliptical and oval casings.

Elliptical:
Template required.

THE RESIN ARTISAN COLLECTION

The Resin Artisan Collection is an exquisite line of ornamentation products born of a hybrid technology. Hardwood Maples & Resins are combined to achieve the most intricate & crisp detailing available.

These products are as easy to work with as wood while having several advantages over wood alone. The hybrid technology allows for consistent density without knots, warping or cupping. All standard woodworking tools & glues can be used just as with wood.

The non-porous resin absorbs stains evenly, resulting in a beautifully uniform finish & color.

Experience the exquisite detailing & easy to work with material of The Resin Artisan Collection.

- *Hybrid Technology*
- *Consistency of Material & Finish*
- *Ease of Use*
- *Unparalleled Detailing*
- *Over 1300 Castings/Designs*
- *Endless Applications*

FRIEZE & CROWN MOULDINGS

- *The Design & Detail of these mouldings are made from a mixture of polymers, contoured onto a Hardwood substrate.*
- *Can be painted with any quality latex or oil based product. When staining, use a non-penetrating gel stain.*
- *Mouldings are available in 5 ft. and 10 ft. lengths.*

Wood Mouldings

No two trees grow alike. That is why Outwater carefully selects wood without knots, voids, or mineral streaks when producing mouldings. Our high-end decorative series reflects the skill and craftsmanship unmatched by anyone in the industry. These solid wood mouldings are pre-sanded and ready for stain. To ensure you receive the best quality, each piece is inspected before and after carving. Explore our beautiful collection of Wood Moulding.

THE WOOD PLUS COLLECTION

Mouldings are available in 8 FT. lengths

The design & detail of these mouldings is made from a mixture of polymers, contoured onto a soft wood substrate similar to pine.

- *Installs with standard woodworking tools.*
- *Can be painted/stained, using a non-penetrating gel stain.*

CARVED PIERCED MOULDINGS

2 Ft. Lengths, Available In Hard Maple, Red Oak, And Cherry.

Our carved wood pierced mouldings have an innovative dowel system for creating a continuous run of multiple pieces. Apply wood glue to both ends of the dowels (sold separately). Insert into pre-drilled holes on either end of the two pieces to be joined. Space pieces proportionate to the design repeat. All pieces are sanded and unfinished - ready for staining or painting. The dowels blend into the pattern for a consistent, uninterrupted look. Holes on either side of the moulding can be plugged by gluing the dowels in place, then cut to fit and sand flush for a continuous look.

New

Custom Polyurethane Faux Beams

Textures Available

Rough Sawn

This pebbled, rough sawn texture resembles board lumber cut from an old sawmill. Rough and refined at the same time.

Hand Hewn

Distinguished by a distressed texture, this vintage look imitates reclaimed wood from the 1800's.

Pecky Cypress

This wood is amazing, textural & organic. It's full of oblong holes, like a stretched long sponge. It's truly beautiful.

Knotty Pine

Knotty pine refers to pine wood boards that have many visible knots yet elegant by nature.

Sand Blasted

Heavily sandblasted texture reveals swirling grain patterns that give a weathered, vintage look that dignifies any room.

River Wood

Replicated salvaged submerged wood from the Great Lakes, the quality of this water logged wood was enhanced during its long stay underwater. Exquisite and classic.

3-Sided Beams

Commonly used in rooms to give the look of real, structural beams. They are available in a variety of widths, lengths, and finishes.

2-Sided Beams

Great for undersills, oversills, corners and more.

Box Beams

Ideal for applications where all 4 sides of the beam can be viewed, such as cross beams in a room with cathedral ceilings and rooms with balconies. Box beams are available with or without end caps.

Larger Sizes & Extra Long Beams

Unless specified beams are built to the outside dimensions. The planks used to create custom beams are 24" x 48" polyurethane sheets with square edges that are 1" thick. We hide the seams so there is never one visible from the outside no matter the size of the beam. When covering an existing item, the beam would be built to the inside dimensions of the item being covered. For custom quoting please contact our sales representatives.

*Our **Rustic Beams** allow you to bring back that "Old World Style" and to any room with their rustic warmth and charm. These beams are lightweight and easy to install.*

***Rustic Beams** were fallen logs, hewn into shape using a broad axe. Forging ahead and settling the new frontier, early settlers did not have access to mills and machinery. They shaped the beams used in their homes and business by hand, using their axes and small tools. This resulted in a beam with rugged texture and character.*

VENEER WALL PANELS

• 4' x 8' Sheets • Flat Cut Profile • Brown Paper Backer

- *Flexible fluted wall panels allow for graceful curves or flat surface applications.*
- *This decorative surface can be used for walls, ceilings, wainscoting, pole wraps, bar fronts, drawer fronts, and tambour doors.*
- *The natural tone, grain, and texture of wood tambour provides a sense of warmth and contemporary style.*

- *Each wood slat is hand-selected to ensure you receive the best quality wall panel.*
- *Ready to stain, paint or clear coat.*
- *Much easier to work with than most wood wall cladding. To install, simply apply construction adhesive to the back of the tambour sheet and mount it onto your surface.*
- *Can be trimmed with fine tooth saw or cut length-wise with utility knife.*

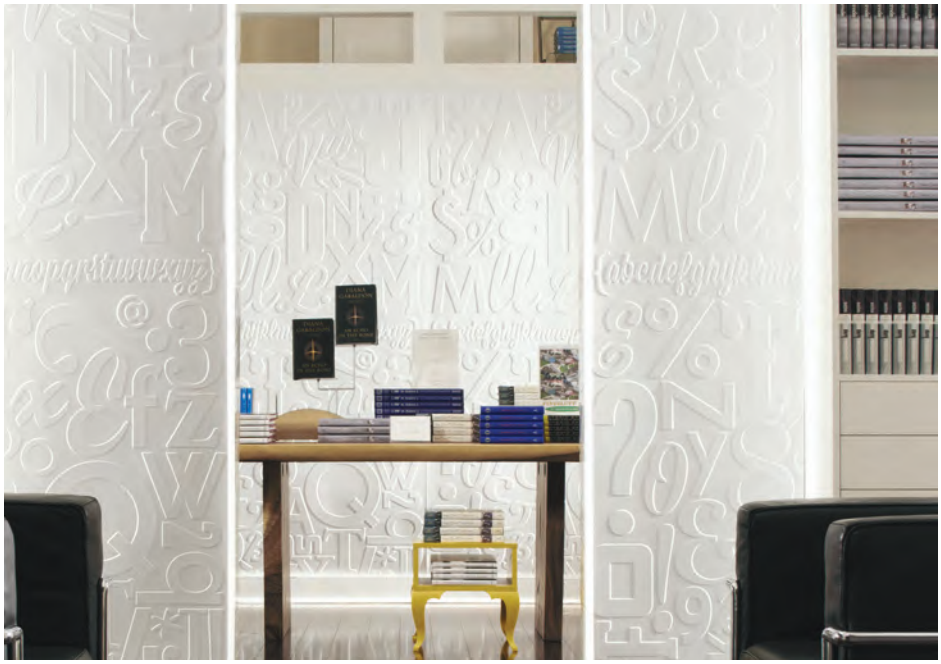
INTRODUCING FlexLam

What is FlexLam?

FlexLam is a collection of decorative thermoplastic wall panels and ceiling tiles. Available in multiple sizes that offer design flexibility. FlexLam collections include Flat Sheets, 3D Wall Panels, Custom Digital Printing, Wainscoting and Ceiling Tiles. FlexLam can be used as flat panels in close to 50 different finishes, but are generally made with 3-dimensional patterns, making hundreds of pattern and finish combinations possible. The panels are lightweight, Class A fire-rated, and are impact, scratch, and abrasion resistant. They can be installed over most substrates and offer a great labor-saving, low maintenance design solution. The BIO (built-in-overlap) allows for most pattern to have less visible seams.

Why choose FlexLam?

- *Lightweight & flexible*
- *Easy to install*
- *Impact, abrasion, & chemical resistant properties*
- *Class A Fire Rated*
- *Hundreds of design combinations*
- *Custom options also available*
- *Economical packaged shipping to any job site*
- *Made in USA*



Create Your Formula

FlexLam offers hundreds of design and finish combinations suitable for any environment. Here's how to create your formula for success.

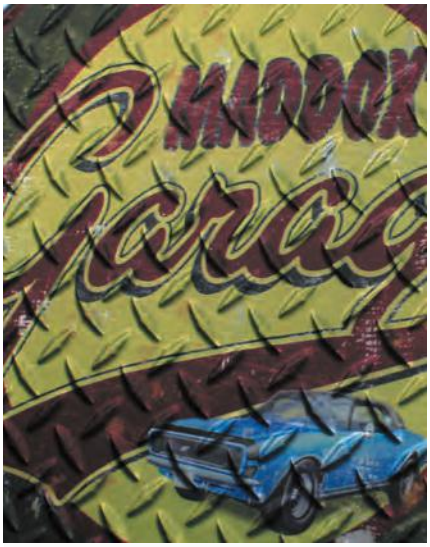
Flat Sheets p. 172

Non-textured 4' x 8' sheets available in 45+ finishes

MAX & 3D Wall Panels p. 174

Textured 4' x 8' & 4' x 10' sheets available in 45+ finishes and 60+ styles

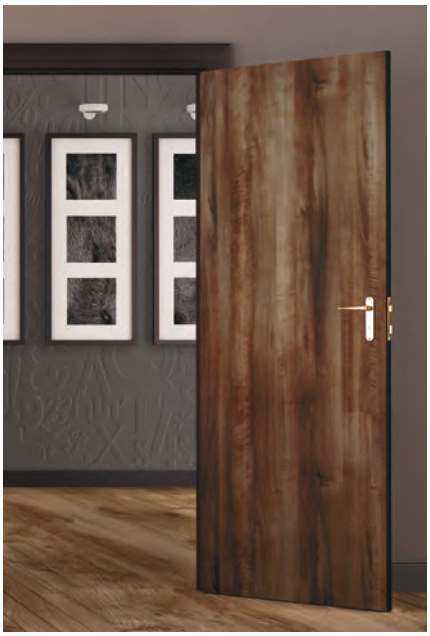


Custom Digital Printing p. 195

Custom images and logos printed directly onto FlexLam Flat Sheets & 3D Wall Panels

Wainscoting p. 198

30"-32" x 48" panels available in 45+ finishes and 6 styles



Door Skins p. 200

48" x 84" adhesive backed panels available in 11 finishes

Ceiling Tiles p. 254

2' x 2' & 2' x 4' tiles available in 45+ finishes and 45+ styles

FlexLam FLAT SHEETS (NON-TEXTURED)

Sheet Size: 4' x 8'

Thickness: .030"

Features:

- *Can be die cut to almost any shape needed (furniture parts, mouldings, tables, etc.)*
- *Can be bent to fit curved surfaces – from soft curves to column wraps*
- *Can be flat-laminated or profile-wrapped to various substrates*
- *Available in all FlexLam Finishes on pages 184-185*

Great for a variety of applications:

- *Exhibits and displays*
- *Door and drawer fascias*
- *Store fixtures*
- *Cabinets, counters & shelving*
- *Moulding and framing*
- *Ceiling and wall panels*
- *RV/auto/marine*

New

FlexLam MAX Wall Panels

Unique, Deeply Textured, 3-D designs

FEATURES

- LIGHTWEIGHT
- EASY-TO-INSTALL
- IMPACT RESISTANT
- ABRASION RESISTANT
- CHEMICAL RESISTANT
- STAIN RESISTANT
- CLASS A FIRE RATED
- COLOR-THROUGH MATERIAL
  Perfect for High Traffic Areas

Strikingly Beautiful, Deeply Textured, and Durable Decorative Surfacing Solutions

FlexLam MAX offers deeply textured 4' x 8' wall panels in a thicker .045" material that is color-through for superior scratch and impact resistance. These are our boldest 3-dimensional patterns to date and provide even greater depth to walls.

With six contemporary designs, FlexLam MAX will make any space the envy of everyone. All designs come with our BIO (Built-In-Overlap) system that makes installation easy and creates a less visible seam.

Combine these patterns with five new finishes to create a unique, modern look for any space.

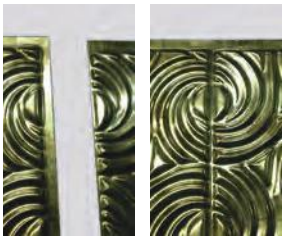
FlexLam Fabrication & Installations

B

BIO (BUILT-IN-OVERLAP)



Our BIO has flat edges on two adjoining sides of the FlexLam Wall panel. By orienting all sheets in the same direction and overlapping the panels, the seams are less noticeable. The placement of the sheet is also more flexible so that slight imperfections in the substrate will not affect the finished look.

When overlapping four FlexLam Wall panels, it is necessary to a 1/2" notch in panels 2 and 3 to avoid a bulge where the panels meet.

BB

BEAD + BUTTON

Certain FlexLam patterns that do not have a BIO may have a Bead + Button feature. To install, overlap two or more sheets or tiles on the Bead + Button perimeter which will join at the pre-determined connection points.

FlexLam Trim

Available in 4' & 8' Lengths

FlexLam trim is available to join and finish FlexLam Structures. Edge J-Trim, Divider Trim, Inside Corners and Outside Corners and can be easily cut to size.
The Edge J-Trim simply slides onto the cut edge of the panel. Most installations use decorative wood or metal mouldings, but if these elements are not used, FlexLam Trim will finish the edges nicely.

CUSTOM PROGRAM

Two Options:

Digital printing

High-quality, full color images are placed directly onto flat or textured substrates via a direct-to-substrate ink jet printer. Company logos are a popular choice for this application in corporate buildings and retail settings.

Custom Cooling

Incorporates one-of-a-kind designs and logos into the material yielding a functional, durable and affordable branded surface for walls and ceilings. Minimums may apply.

INTRODUCING MetLam

What is MetLam?

MetLam is a collection of high-pressure laminates (HPL) with real aluminum, pebbled aluminum, mill aluminum, and copper steel surfaces. Available with or without a phenolic backing, these metallic sheets are easy to work with and can bend to fit curved applications. MetLam enhances the look of real metals with embossing, hand painting, etching, and other innovative techniques.

Features:

- *Real metal surface with high abrasion and chemical resistance*
- *Suitable for vertical and light-duty horizontal applications*
- *Can bend to fit curved surfaces*
- *Can be applied directly to drywall*
- *Ships with clear protective film for ease of handling*
- *UV stable (varies with installation location)*
- *Scratch and chemical resistant properties*

Create Your Formula

Metlam HPL offers a variety of high quality design solutions featuring innovative techniques to enhance the look of metals. Here's how to create your formula for success.

COLLECTION: ARTFUL METALS

Sheet Size: 4' x 8' | *Thickness: .032"*

This collection of 15 unique metal finishes range from bright colorful patinas to rich oxidized coppers on either mill satin aluminum or pebble aluminum.

Pebble Aluminum:

An unbacked aluminum with a stipple-like coating that creates a smooth pebbled texture

Mill Satin Aluminum:

An unbacked aluminum with a satin finish

Unbacked Metal Laminates have a thicker layer of metal than laminates with phenolic paper backing. This means that when formed, the metal may maintain its shape and are stronger against impacts, chemicals, stains, and abrasions.

Features:

- *No counterbalancing required*
- *Adheres directly to most substrates, including drywall*
- *Can be bent or curved*
- *High impact & abrasion resistant*
- *Chemical resistant*
- *Stain resistant*
- *Custom or stock imagery*

COLLECTION: UNIQUE ART

Sheet Size: 4' x 8' | *Thickness: .035"*

As the name implies, Unique Art Laminates are unique works of art that offer rich colors and metals in their design. They are hand painted by artists using techniques that allow for repeatability. Protected with a high-quality lacquer process to ensure durability, these laminates can be used in both low and high-traffic areas. Since each sheet is hand painted, it should be noted that slight differences can be seen from sheet to sheet.

COLLECTION: DIVINE ELEMENTS

Sheet Size: 4' x 8' | *Thickness: .032"*

A Metlam Collection Inspired by Nature and Mythology

The Divine Elements Collection combines qualities from water and rare earth elements to celebrate the unique relationship between nature's raw power and human curiosity to bring inspiration to each day. Our new HPL finishes range from Rose Gold and Gun Metal to the iridescent Polished Smoke and classic Brushed Aluminum. The patterns draw inspiration from the natural world, including: ***Mill Diamond, Waterfall, Aqua, Neptune*** *and* ***Titan*** *patterns. Together, these pattern and finish combinations are destined to create a legendary design like no other.*

GRAPHIC WALL PANELS

Sheet Sizes:

4' x 8'
Thickness:
.045" (Fire Rated) & .060"
or
4' x 10'
Thickness: .120"

Material: FRP
(Fiberglass Reinforced Plastic Panels)

Our Graphic Wall Panels are suitable for use as wall coverings, wainscoting, elevator walls, bar fronts, signage and POP displays. Our Graphic Wall Panels are a translucent panel that pass sanitary codes and is easy to clean. It is suitable for wet environments such as commercial kitchens and baths. With its second surface imaging, and the addition of a white backer, this substrate resists scratching and is highly durable, making it the perfect wall protection in high traffic areas.

Custom Art

Bamboo Rings, Green

A Unbacked Translucent Panels

Unbacked translucent panels are imaged only.

Part #	Size
LTP48-045*	4′ x 8′.045″TH
LTP48-060*	4′ x 8′.060″TH
LTP410-120*	4′ x 10′.120″TH

Add pattern code to end of part number
ex: LTP410-120-ASPEN

B Backed Translucent Panels

Backed translucent panels are panels with an added white backer.

Part #	Size
LTP48-045*	4′ x 8′.045″TH
LTP48-060*	4′ x 8′.060″TH
LTP410-120*	4′ x 10′.120″TH

If adding backer add WB to end of Part Number
ex: Example LTP410-120-ASPEN-WB

Variation

No two planks will look alike!

Our complex color variation, along with our mixed widths contributes to a beautiful, large scale design. The deep graining in each board was cast from reclaimed old barn wood lumber.

How To Measure

Measure the Height x Length of the area you wish to cover.

Example:
H: 4 Ft. x L: 9 Ft. = Total of 36 Square Feet

There are 36 square feet in a box you will need ONE Box

Specifications

- Size: 6" & 8" W x 46-1/2" L x 3/8" Thick
- Material: Urethane Composite / Acrylic Finish
- UV Stabilized For Interior Use

Easy To Install

Installs at a fraction of the time, cost & labor of an actual wood installation, yet has all the benefits & appeal that only wood can bring to a space. Attaches to sheet rock, concrete, wood or brick with standard woodworking tools. Simply mark a level line for your first row. Begin with several drops of construction adhesive & pin into place with small nails or staples. Continue to the end of the row & trim as needed. Start the next row with a staggered plank to avoid seams aligning. Trim as needed around outlets and switches. This process will continue until you have completed the project. We recommend F26, PL Premium or equivalent adhesive for best results.

WHITE WASHED

Plank It Wallscapes collection gives you the beautifully random character of real barn wood. Our planks are quickly being recognized as the most realistic reproduction on the market.

Full Box

Our sun weathered planks naturally created the perfect color palette in harmony with each other. No two planks will look alike in color or graining.

The Deep Graining In Each Board Was Cast From Reclaimed Old Barn Wood Lumber.

- Material: Urethane Composite / Acrylic Finish
- UV Stabilized For Interior Use
- Lightweight: Easy to handle & install
- Attaches to sheet rock, concrete, wood or brick with standard woodworking tools.
- Create a feature wall or do an entire room.
- Won't warp, crack/check, rot or harbor insects
- Easy to clean, non-toxic planks are environmentally friendly.
- Add value, interest and current style to any space.
- Replicated to exacting details from actual weathered wood planks.
- No arsenic, lead, odors or pesticide residue.
- Class "A" Fire Rated

WOOD WALLSCAPES

Pine Planks
With Peel & Stick Adhesive

Why Choose Wood Wallscapes?

Create a stunning accent wall with modern rustic charm surrounding yourself with the rich warmth of natural wood. Our wood wallscapes can quickly & easily transform the look and feel of a room. Harvested from sustainable pine forests, our panels have a clean, minimalist appeal with natural wood texture & characteristics. Available in 9 inviting finishes, choose one finish or mix and match for added depth & charm. Three strong peel and stick adhesive strips eliminate the need for messy glues or nails, making installation quick, simple and DIY friendly. Bring the beauty of nature to your interior spaces with the natural warmth, texture and comfort that only wood creates.

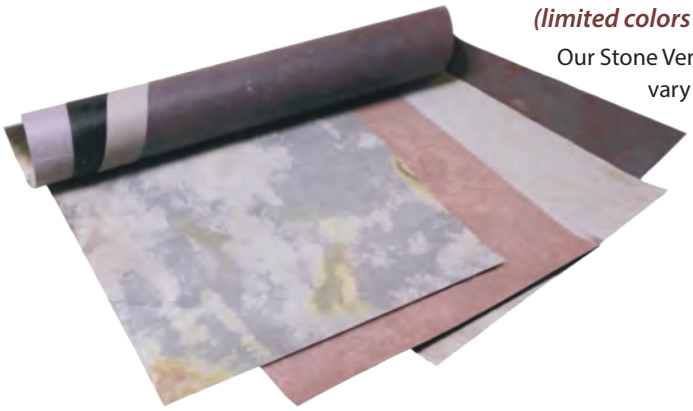
2′ x 4′ or 4′ x 8′ x 1MM - 2MM Thick

(limited colors on 4′ x 8′ sheets)



The colors may vary from the actual product shown.

Our Stone Veneer Sheets are made from natural stones. This means each sheet will vary as every piece consists of a thin layer of real stone and no two stones are exactly the same. The flexible Stone Veneer Sheets are backed by a polymer composite, which gives the sheet their flexibility and strength while keeping the weight to a minimum.

Product Features

- Can be applied over: concrete, ceramic, wood, metal, plywood, fiberglass, backer board, tile, dry wall, painted surfaces, MDF, Masonite®, door skin, cabinetry and many other substrates as well
- Lightweight
- Flexible
- UV resistant
- Weather resistant

Applications

- Architectural
- Interior & Exterior
- Doors & Cabinets
- Furniture
- Trim & Backsplashes
- Marine & RV
- Kitchens
- Bathrooms
- Flooring

For additional Backlighting, see page 305

Wood over wood laminate is composed of two wood veneer faces permanently bonded with the grain of the face running perpendicular to the grain of the back. The result is a dimensionally stable product which minimizes the wood veneer's tendency to expand and contract across the grain.

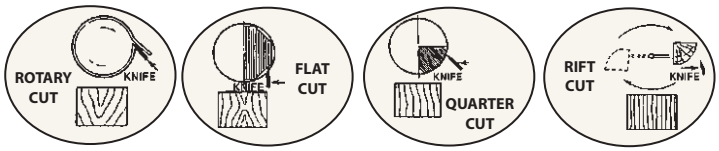
New WOW48WO-RC	White Oak	Rift

TYPES OF VENEER CUTS

The manner in which veneers are cut is an important factor in producing the various visual effects obtained. Two logs of the same species, but with their veneers cut differently, will have entirely different visual characteristics even though their colors are similar.



Other Types Of Veneer Matches Available

Random Matching

Slip Matching

Please Note: Do not apply to sheet rock or drywall. Any exterior surface plastic laminate or melamine board. Apply 2 coats of contact adhesive to porous substrates.

4' x 8' Sheets

Nature's Best Exotic Species...

Mother nature loves our Natural Wood Veneers. These reconstituted veneers are cut exclusively from rapidly renewable trees, promoting sustainability and forest preservation.

In addition to being green, Natural Wood Veneers provides enhanced consistency in grain and color...great for large projects requiring sequences of 100 sheets or more.

Natural Wood Veneer is backed with 10 mil paper to create a strong curvable sheet.

- ASTM E-84 Class "A" fire-rated
- Comes standard on 10 mil paper

USES	
Millwork	Cabinetry
Interior Design	Elevators & Staircases
Furniture & Fixtures	Woodworking

Shown: Zebrawood

Benefits...

- **No bleed through:** Helps prevent moisture bleed through, protecting both your adhesion to the substrate and your stain + finish coats.
- **No movement:** "Stress-relieved" through a tenderizing process that breaks up the wood fiber, crating a relaxed sheet that will lay flat.
- **No sequence breaks:** Remarkable consistent...sheet #1 will look like sheet #600.
- **No cracking:** Extremely curvable, allowing for use in tight radius applications.
- **No bubbles:** When applied properly, our veneers are constructed to minimize substrate imperfections from showing through.
- **No waiting:** Arrives sanded, trimmed, inspected and ready to use.
- **No waste:** 100% usable, minimizing product cost, freight and storage.

ANAGLYPTA® WALL COVERINGS & BORDERS

Add texture and interest to bring an exciting, unique look into any room with our new Anaglypta® Wall Coverings, Borders and Dados. These highly embossed, extraordinarily durable coverings hide your old, uneven or otherwise unsightly walls and ceilings with a supremely versatile surface. Virtually indestructible, our new wall coverings and borders respond magnificently to a wide variety of different decorative techniques including painting, marbleizing, scumbling and glazing. The truly classical designs and physical endurance is matched only by its aesthetic longevity and ease of installation.

ANAGLYPTA® SUPADURABLE

20-1/2" High x 33 Ft. Long Rolls

Anaglypta® Supadurable has a deep, pronounced emboss with great resilience to heavy wear. The toughness of the relief makes it suitable for high traffic areas, such as hallways and stairways, public places or wherever good looks and low maintenance are a high priority. The inherent qualities are due to the combination of virgin pulp, from managed forests, mixed with cotton fibers making it a natural product. All are suitable for walls and many of designs can be used on ceilings in keeping with the Victorian Style.

ANAGLYPTA® LUXURY VINYL WALL COVERINGS

20-1/2 In. High x 33 Ft. Long Rolls

Combines a warm, tough and luxurious appearance. Anaglypta® Luxury Vinyl is washable when painted with latex semigloss which also highlights the relief in the design. Its modern manufacturing method also stops the emboss from becoming permanently crushed during hanging or use. Being flat backed, it is easy to hang on ceilings & walls.

ANAGLYPTA® ORIGINAL

20-1/2" High x 33 Ft. Long Rolls

Anaglypta® Original remains unsurpassed, still made in the traditional manner by bonding two pieces of paper together. Only now, it is made from recycled paper and a quantity of virgin pulp, from managed forests, to give it strength. Easy to handle, hard-wearing and versatile, Anaglypta Original is suitable for walls and ceilings. There are many different patterns and styles to choose from; some dating back to the early twentieth century.

FlexLam LITE CEILING TILES

New

2' x 2' Lay-In Patterns | Thickness: .013"

Bringing lightweight ceiling solutions to beautiful new heights! FlexLam Lite is our newest value-conscious ceiling solution. The original FlexLam Structures line has long been coveted as a durable, beautiful, and affordable option for designers and architects. With FlexLam Lite, we've successfully combined many FlexLam Lay-In Ceiling Tile patterns with 18 of our most popular finishes into one sleek .013" thick package. This product line is ultra-lightweight, ultra-thin, easy-to-install, and even more cost-effective than our traditional FlexLam line.

The Advantage of FlexLam Lite

- *Same flexibility, durability, and versatility as FlexLam Structures*
- *Thinner and easier to cut and fabricate*
- *Our most cost-effective solution for ceilings*

Looking For A Drop-Out Ceiling Solution?

Our FlexLam Lite finishes in Gloss and Matte White are available as a Drop-Out Ceiling Tile, and are specifically designed to fall out when exposed to heat from a developing fire. Provide a sleek, seamless look for commercial ceilings by hiding fire sprinklers.

- *Protect fire sprinklers from accidental knocks and tampering, both of which can result in water damage*
- *Make sprinkler system design and position easier and more cost-effective, as they completely eliminate the need to lower the sprinkler*

FlexLam Lite Ceiling Tiles are not recommended for ceiling installations where temperatures exceed 120° F

Create Your Formula

FlexLam Lite offers hundreds of design and finish combinations suitable for any environment. Here's how to create your formula for success.

FlexLam CEILINGS

Considered the fifth wall in interior design, FlexLam's wide variety of ceiling tile styles and sizes can add dimension, texture, and visual interest to any room. Available in 2x2 and 2x4 sizes, for laying into suspended ceiling grid, or as a direct glue-up application, these tiles have the power to define a space.

Features:

- *Compatible with 15/16" grid systems*
- *Lightweight & easy to install*
- *Waterproof*
- *Easy to clean*
- *Fire retardant*
- *High impact & abrasion resistant properties*

Shown: Gloss White + Corrugated in Acoustic PCT22L-PERF-COR-WH

Index

G GLUE UP *(2x2 Ceiling Tiles)*
Designed with an overlap system (see BIO) to make installation easy, fast and forgiving. These tiles can be used on ceilings and walls.

G GLUE UP *(2x4 Ceiling Tiles)*
Designed with an overlap system (see BIO) to make installation easy, fast and forgiving. These tiles can be used on ceilings and walls.

L LAY-IN NON-TEGULAR *(2x2 Ceiling Tiles)*
Designed to fit most suspension grid ceiling systems and produces no sag. It is recommended that a standard mineral tile (old or new) be used on top of our lay-in tiles to hold them in place.

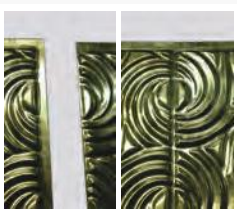
L LAY-IN NON-TEGULAR *(2x4 Ceiling Tiles)*
Designed to fit most suspension grid ceiling systems and produces no sag. It is recommended that a standard mineral tile (old or new) be used on top of our lay-in tiles to hold them in place.

T TEGULAR *(2x2 Ceiling Tiles)*
The embossed part of the design is lower than the suspension grid and the 4 edges are flat to fit nicely into the grid.

A ACOUSTIC *(Perforated 2x2 Lay-In Ceiling Tiles)*
2' x 2' Lay-In tiles, perforated to increase sound absorption and offer acoustic qualities, as well as all other 2' x 2' Lay-In tile features.
Available only in Gloss Black and Gloss White

M MINERAL FIBER *(2x2 Lay-In Ceiling Tiles)*
Flexible mineral fiber ceiling tiles replace standard mineral fiber ceilings with a long-lasting solution. These thermoplastic ceiling tiles have a durable, waterproof surface that is easy to clean. Available in 2' x 2' for lay-in ceiling applications, this revolutionary tile is flat with tegular/revealed edges that allow the panel to drop below the grid.

BIO *(Built-In-Overlap)*



Our BIO has flat edges on two adjoining sides of the FlexLam Ceiling Tile. By orienting all tiles in the same direction and overlapping the tiles, the seams are less noticeable. The placement of the tile is also more flexible so that slight imperfections in the substrate will not affect the finished look. When overlapping four FlexLam Ceiling Tiles, it is necessary to a 1/2" notch in tiles 2 and 3 to avoid a bulge where the panels meet.

FLEXLAM CEILING ACCESSORIES

GRIDMAX™ IS A PATENTED, SNAP-ON GRID COVER designed to make grid systems invisible. It is cost effective and doesn't rust or scratch. GridMax is sized to fit over 15/16" T-bar suspension grid systems, with other sizes available by special order. Mains, Tees and mouldings are necessary to cover the entire grid system. They are packaged together, to complete 100 square feet of ceiling, and sold separately to use as needed.

15/16" (24 MM) GRIDMAX IN PAINTABLE

APPLYING GRIDMAX OVER T-BAR SUSPENSION GRID SYSTEM

GRIDMAX IN MOONSTONE COPPER

TIN PLATED STAMPED

CEILING TILES & CORNICES

LIGHTWEIGHT • TIN FREE STEEL • 30 GAUGE • .010 THICK

Our Stamped Ceiling Panels feature an impressive mix of texture and nostalgia, with contemporary and traditional styling and finely crafted details.

- **Steel** Ceiling tiles and cornices are shipped uncoated or choose from one of our prefinished options below. Powder Coated, Lacquered, Brass, Copper, Chrome or Hand Painted Vintage.
- **Powder Coated:** Powder coating is a process of applying dry paint through an electrostatic process, then cured with heat.
- **Lacquer:** The Lacquer finish is also a powder coated process proprietary to us that allows for a baked on consistent clear finish.
- **Brass, Copper and Chrome**: Anodized finish over aluminum basemetal. Tiles come with a protective peel off PVC sheet.
- **Hand Painted:** Hand painted vintage finishing process is where the base color is applied and then a formula is manipulated to create unique antique faux finishes.

Hinging

Hinge drilling is available in the Blum®/ Salice pattern. The hinge cup diameter is 35mm with a tab distance of 5mm. (Note: If you are using face frame hinges, please let us know as the tab distance is 3mm)

Standard drilling is as follows:

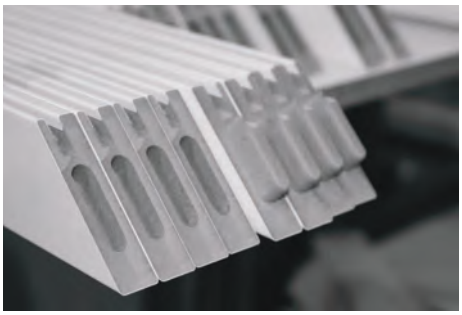
Door Height	**Hole Locations**
2 holes: 0" to 35.7"	79mm from top and bottom
3 holes: 35.75" to 50.15"	79mm / center / 79mm
4 holes: 50.19" to 70.75"	79mm / 463mm
5 holes: over 70.86"	79mm / 463mm / center

Glass Inserts

Factory installed glass inserts are available in three options:

- Clear tempered
- Frosted tempered
- Mirror with safety backing

All inserts are 1/4" and are adhered in the frames in place of the 1/4" panel, fully captive in the frame.



Sizes Available:
Doors: Min = 7"w x 8"h, Max = 32"w x 96"h and in 1/16" increments in between
Drawer Faces: Min = 8"w x 6"h, Max = 48"w x 12"h and in 1/16" increments in between

Door Design Systems

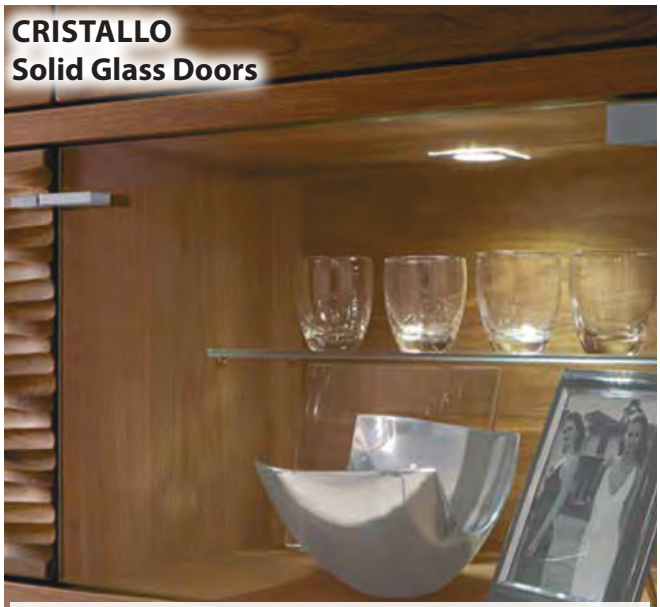
Backpainted Glass

Backpainted glass manufactured by Element® Designs is free of imperfections, completely opaque and includes an engineered backer coating for added durability and opacity. All backpainted glass is custom manufactured to size with a variety of edgework options to accommodate any application. This is an ideal product for a variety of applications such as wall panels, partitions, backsplashes, table tops, countertops and even trade show flooring.

PARAPAN® High Gloss Solid Surface Door

PARAPAN® is a high quality, solid surface acrylic material, which is cell cast between sheets of heavy glass that yields a perfect flat mirror finish on both front and back surfaces. The numerous color options and edge detail possibilities make it an ideal choice for the most discriminating residential and commercial interiors. The solid surface composition is UV and fade resistant and will retain its vibrant color indefinitely. Any minor surface damage can be easily removed through polishing and larger scratches can be sanded away which makes PARAPAN® a durable high gloss cabinet from solution for any application.

CRISTALLO Solid Glass Doors



CRISTALLO Solid glass doors offer contemporary cabinetry or closet door solutions. The doors are ideal in closet, commercial, retail, bathroom and kitchen applications, especially where full interior cabinet visibility is desired. Exclusive supplier approved hinge adhesion procedures ensure the doors are attached properly for safety and durability.

Etched Glass

- Chemically etched glass with evenly "etched" surface
- Custom etched patterns or images using customer provided artwork and designs

Door Design Systems

Magnetic Markerboards

Magnetic markerboards are custom manufactured backpainted glass panels with an integrated magnetic backer. It is extremely durable, easy to clean and stain resistant. Magnetic markerboards can be manufactured with standard, non-standard or custom backpainted glass colors.

Cabinet Doors with Integrated AVENTOS Lift Systems

The AVENTOS program by Element® Designs will determine and include the exact AVENTOS system parts with your aluminum or PARAPAN® door order. Simply specify the AVENTOS system along with the Element Design cabinet door and receive a fully fabricated door with all borings, mounting hardware and AVENTOS parts packaged together.

Sliding Door Systems

Element® Designs can provide complete sliding door systems which include our aluminum frame or PARAPAN® panels and sliding door hardware in one easy to order kit based on your specific requirements.
All tracks will be cut to size & when possible, all hardware will be pre-installed.

Gallery

Woven Wire Grilles

Our grilles offer a creative option for fine period furniture ranging from English Country to French Provincial. For screening those areas which may compromise the aesthetics of a home or office environment, our close mesh grilles are available in a variety of designs that present an attractive fascia.

Available in electroplated metallic finishes and powder coated colors to suit any application.

Custom Cut Program

Outwater Plastics offers custom cut sizes as well as our standard sizes. If our 2′ x 6′, 3′ x 4′ and 4′ x 6′ sheets are too large for your application, let us quote it for you. We suggest measuring the routed opening that the grille will need to be placed into-deduct 1/8″ for clearance.

Example: Outer edge of routed opening measures 14″ x 28″, your measurement should be 13-7/8″ x 27-7/8″.

Please note: Custom cut orders have a tolerance of 1/16″

Custom Rosette Program

We have the capability to apply the 3 different style rosettes shown to the following wire grille patterns:

WWG-DK08 (page 279)	WWG-114F (page 280)	WWG-132F (page 283)
WWG-182P (page 279)	WWG-1214T (page 280)	WWG-613C (page 283)
WWG-186P (page 279)	WWG-5814F (page 281)	WWG-711F (page 283)
WWG-686P (page 279)	WWG-316F (page 282)	WWG-812C (page 283)
WWG-8816P (page 279)	WWG-332P (page 282)	WWG-11614P (page 284)

Available on 3′ x 4′ & 2′ x 6′ full sheets with rosettes placed on every other knuckle or on custom cut sizes.

PAINTING:

1) You *must* prime the panel before painting.
2) When painting the MDF panels, it is recommended to use a roller or spray paint. Using a paint brush is more difficult and tends to cause brush marks.
3) The MDF panels may be painted on both sides if desired, for they have smooth surfaces.

**** Opening represents air flow. The larger opening the more air flow. For example radiators may want larger openings & screen applications may want less.***

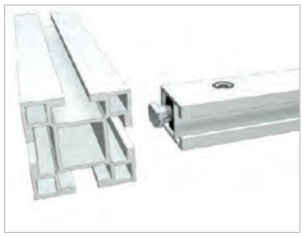
FOGA® FRAMING

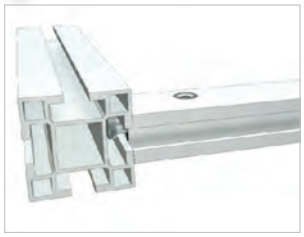
The System with profile
since 1965

FOGA SYSTEM

Highly Versatile Aluminum Framing System

This extensive line of 100 lightweight, aluminum profiles *was designed to work perfectly with Outwater's collection of laminates in order to create stunning privacy screens, office or waiting room dividers, retail store displays ad more.*





A hex key is all you need to easily assemble a wide range of custom displays

The Key to Endless Possibilities

Outwater offers design assistance and access to our design staff with over 20 years of combined experience in layouts and customization. A drawing or simple sketch are all we need to take the first step in bringing your project to life. Design assistance and quotations are provided at no charge. We can custom bend and cut profiles to your exact specification and no minimums are required for your order. With our comprehensive selection of profiles, fabricating as custom room divider or free-standing display has never been easier.

Backlighting Options

Backlight LED Laminate Kit

A multi-layered, ultra thin decorative laminate that emits light evenly

Auragami

(Flexible & Cuttable LED Sheet)

Can be folded over countertop edges, other multi-plane elements, or wrapped around columns and other curved surfaces

Quadmod

("The Original" LED Panel Sheet)

Customized lighting solutions are just a "SNAP" away with these razor-thin panels.

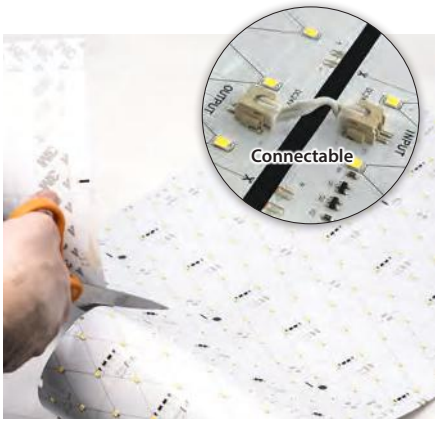
DIY: Brite Light Sheet

An optical PVC film with dot matrix designed to disperse light evenly across your acrylic panel

Nova Backlighting System

(3-D V-Groove Etched PMMA Acrylic Sheet)

A revolutionary LED lighting option that will enable you to illuminate ceilings, walls & floors



Triflex

(Flexible & Cuttable LED Sheet)

Economical way to light up signs or translucent material

BACKLIGHT LED LAMINATE KIT

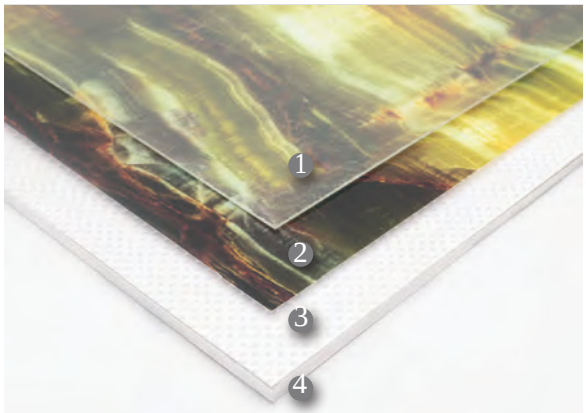
SINGLE SIDED DESIGN
From Our Idea Library

Shown: *Aspen Forest Mural*

DOUBLE SIDED DESIGN
From Our Idea Library

Shown: *Custom Aspen Forest*

Our backlighting kit is a multi-layered, ultra-thin decorative laminate that emits light evenly across its surface and has impressive impact, scratch, chemical and abrasion resistant properties. Our kit is supplied with all necessary hardware for installation.



1. FRP Panel *(.060" thick)*
2. Printed Difusser Panel *(.010" thick)*
3. Light Guide Panel *(3/16" thick, material: printed polycarbonate)*
4. Pick Your Frame!

Product Features

- *The first ultra-thin, 1/4" (6mm) backlight system with no air gap required for LEDs. This system uses a light bar and light guide panel to produce luminance across a translucent surface.*
- *A one-of-a-kind product that combines art with lighting, creating a unique focal point for any home or business.*
- *A low voltage system that comes with the necessary electrical components to simply plug into a 110-volt receptor. Can also be hardwired for permanent installations by a local electrician.*
- *Suitable for most vertical and horizontal applications.*
- *Easily fabricated with standard woodworking tools such as routers, saws and drills.*
- *Easily used to backlight your own stone, acrylic or other translucent materials with its light guide panel.*

How To Order Your Backlighting Kit

STEP 1:

Choose Your Size Kit:

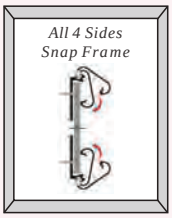
Part #	Size
LUM1648*	16″x 48″
LUM1696*	16″ x 96″
LUM2448*	24″ x 48″
LUM2496*	24″ x 96″
LUM4848*	48″ x 48″
LUM4896*	48″ x 96″

Please Specify H x W For Your Graphic Direction

STEP 2:

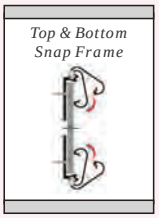
Choose your frame kit option:

Option *A



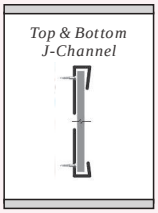
All 4 Sides

Option *B



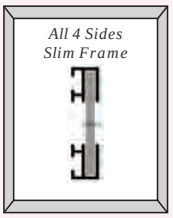
Option *C

Option *D



2 Sides

Option *S



All 4 Sides

STEP 3:

Choose your graphic:

FROM OUR IDEA LIBRARY

*Choose from our extensive idea library, where **hundreds of images** have been specifically developed to work with our products.*

Visit **outwaterphotogallery.com/laminates** for our idea library

OR CUSTOM GRAPHICS

*One of the advantages of our services is the ability to **customize the images** within our idea library or you can create your own unique artwork.*

Shown: *Custom Graphic*

STEP 4:

Remember to specify left or right side power cord placement:

Part #	Size
LUM1648*	16″ x 48″
LUM1696*	16″ x 96″
LUM2448*	24″ x 48″
LUM2496*	24″ x 96″
LUM4848*	48″ x 48″
LUM4896*	48″ x 96″

Please Specify H x W For Your Graphic Direction

For more backlighting options, see pages 309-322

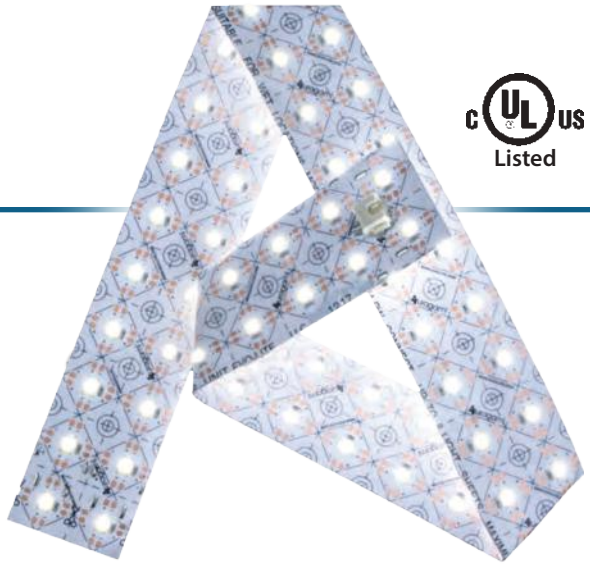
THE ART OF BACKLIGHTING

Auragami™

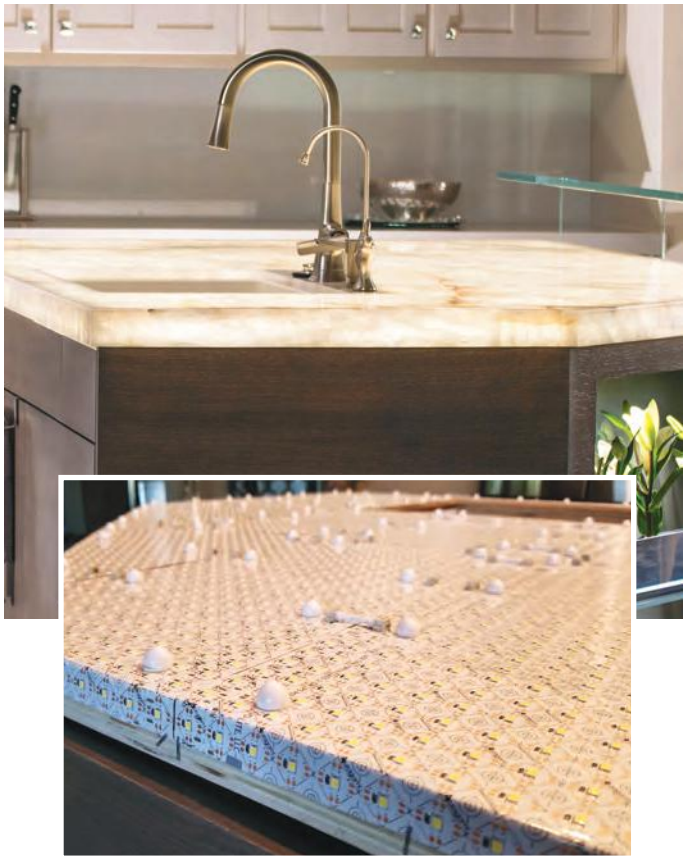
c UL us Listed



The high LED density (332 LEDs per square foot) combined with a decreased individual LED brightness, eliminates hot spots and "dotting," allowing for as little as 3/8" of clearance between the Light Sheet and the translucent material. Auragami's unique power distribution grid allows you to cut groups, or even single LEDs, from the flexible sheet while maintaining a resilient circuit to the remaining diodes. Cut lines on multiple axis (horizontal, vertical, and diagonal) to maximize customization.

Flexible & Cuttable

Can be folded over countertop edges, other multi-plane elements, or wrapped around columns and other curved surfaces



ILLUMINATED SURFACES

Auragami is ideally suited for onyx, quartz and many manufactured materials into lit counter and bar tops, curved surfaces and low clearance applications.
This light sheet provides extremely uniform illumination with as little as 3/8" installation depth for countertops.

CUTTABLE

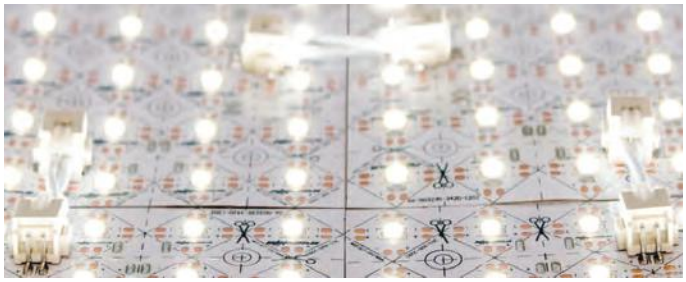
A low voltage UL Listing allows for on-site customization which can eliminate custom order lead times. Cut LEDs from any part of the sheet to avoid obstacles without interrupting power to the rest of the sheet, while maintaining UL Listing. When discrepancies occur between drawing specs and field measurements or when changes need to be made, on-site customization avoids delays!

Specs

- 24V
- IP65
- UL Listed
- Fully Dimmable
- Natural White (5300K)
- 9.25" x 19.8" Sheet Which Is Cuttable As Small As 5/8" x 5/8" Square

Connect

Auragami sheets interconnect quickly and easily with included sheet-to-sheet connection wires. Connect up to eight sheets in any arrangement while operating within Class 2 guidelines. Integrated 2-pin connection blocks eliminate the need to solder and speed installation.

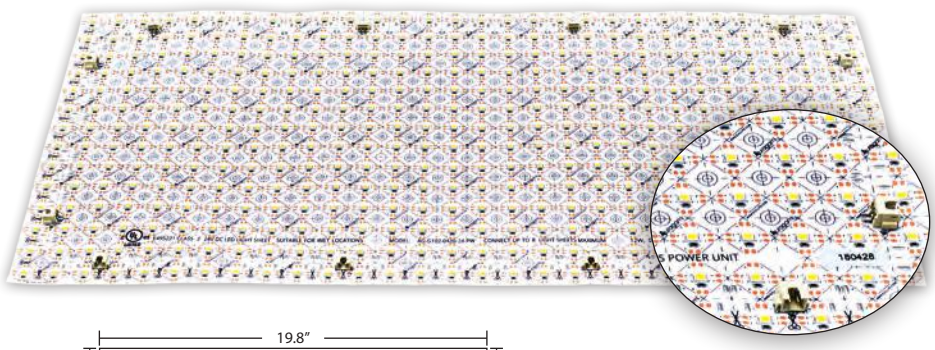


24V | Super Bright Light Output | c UL us Listed | New

Auragami Flexible LED Sheet

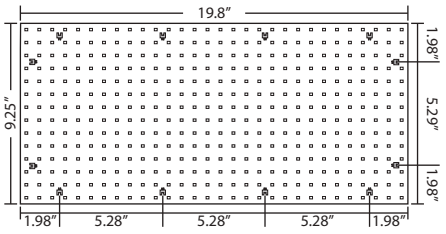
Panel Size: 9.25" x 19.8"

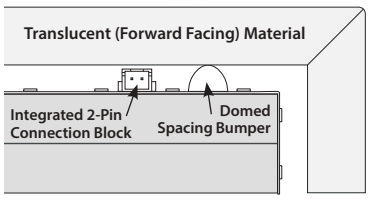
Material: Polyimide with a Conformable Coating Layer (Silicon Based)



Included with Each Sheet:

A: 2- .71" Sheet-To-Sheet Connection Wires
B: 2- 3.74" Sheet-To-Sheet Connection Wires
C: 8- Domed Spacing Bumpers with Silicone Adhesive Backing





IP65 Auragami
Provides Protection From Dust & Splashing Water, Not Submersible

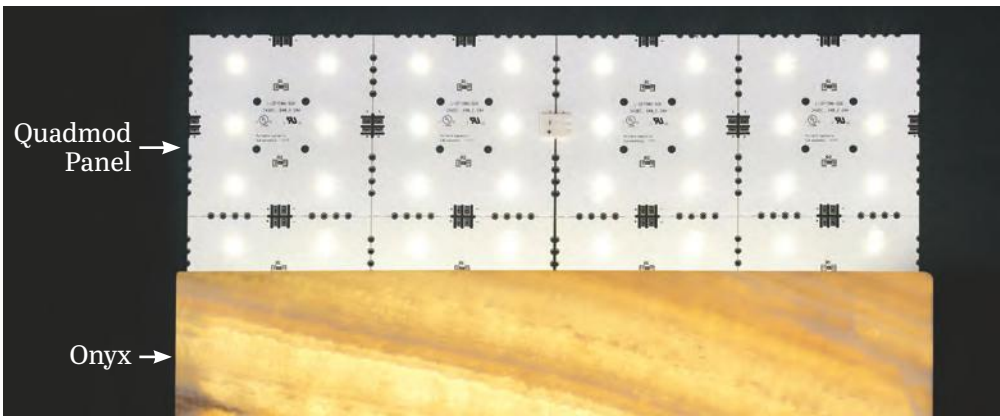
Introducing "The Original"

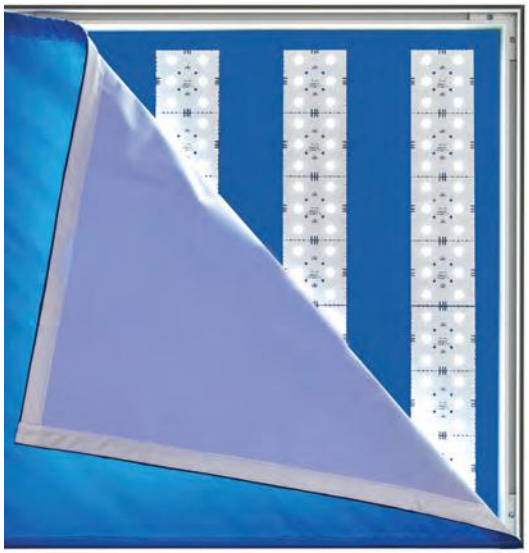
Quadmod LED Panel Light

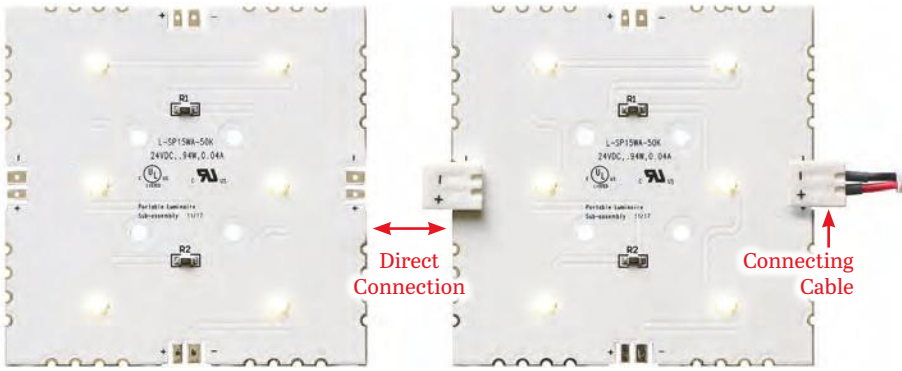
Customized lighting solutions are just a "SNAP" away with the Quadmod Panels. Sold in 12" x 12" squares, the razor-thin (1.65mm thick) panels can be snapped down to 3" x 3" squares.

Backlighting your signs or surfaces requires just 1"-2" separation between panel and surface being illuminated (depending on the substrate density) for even illumination.



24V & Fully Dimmable	Offered In 6500K	Easy to use connectors & accessories make installation fast & simple	Limited 3 Year Warranty





End-to-end connection using our simple DIY connectors and connecting cables. *(no soldering necessary)*
Can connect up to 12 panels on one power supply.

DIY: Brite Light Sheet

An inexpensive way to create Light Guide Panels

Part#: BLPS-1248

Brite Light Sheet is an optical PVC film with dot matrix designed to disperse light evenly across your acrylic panel

- **The most affordable way to create DIY backlighting**
- Sold in nominal 4 ft. x 25 ft. rolls... Can be shipped via UPS
- **Easy to install**... The Brite Light Sheet adheres to any acrylic or glass surface
- **Zero gap clearance** allows for heavy loads
- Low tack resistance enables the Brite Light Sheet to be easily removed and repositioned as desired without damage to the Light Guide Sheet
- Ideal for one sided small signs and shelving. When lit with 2 edges of LED's will illuminate evenly up to 14" in width

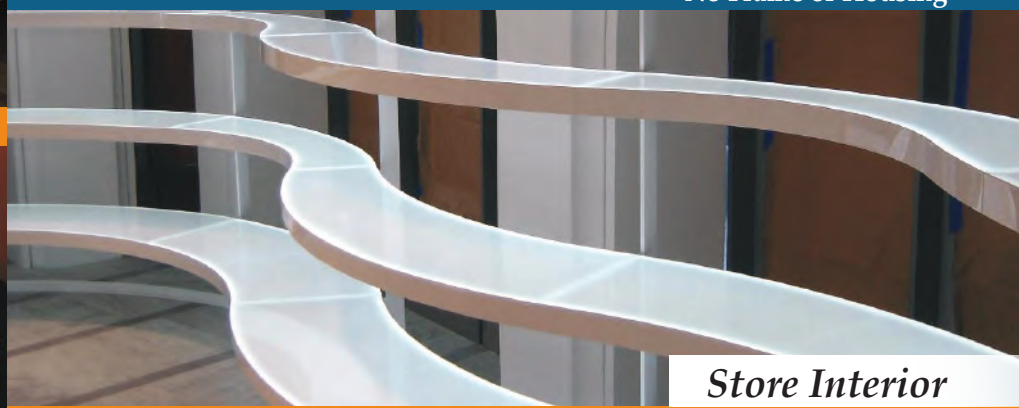
Wallscapes

Less Build Up... Save Time & Money
No Frame or Housing



Store Interior

Even Illumination... No Dark Spots
Substrate can lay directly on the Nova sheet panel

Nova Backlighting System

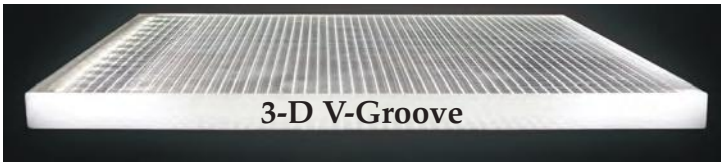
Material: Optical Grade PMMA Acrylic

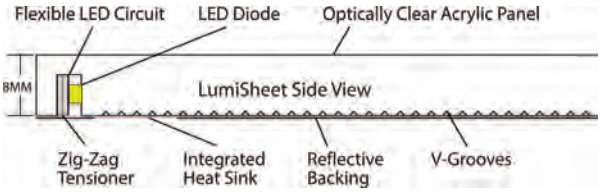
THE TECHNOLOGY

Nova sheet utilizes a patented 3-D v-groove etched grid pattern to create a bright and uniform illumination across the entire surface of the panel.

The Nova sheet utilizes superior quality 12V constant voltage LED's. The LED's are integrated into the perimeter of the panel without the use of framing materials.

The built in heat sink will ensure that the panel will last the life span, 70,000 hours!





LED LIGHT COLOR OPTIONS
