# CHOOSE THE RIGHT EBC PADS FOR YOUR MOTORCYCLE OR ATV

EBC Brakes® offer an extensive range of pad compounds for every style of riding and the guide below will help you get the best value for money and offset the chances of any damage to your new rotors.

Numerous lightweight composite rotor materials are now on the world markets that are expensive and using the wrong pads will simply SHRED these rotors. EBC has tested popular offerings and found no frictional/brake performance advantage at all in using these rotors. Also friction levels were found to be extremely low and brakes ineffective in the wet. We do not recommend the use of any EBC pads in connection with composite rotors of any kind and no warranty exists in their use.

Also certain Classic and heavier bikes feature 6 or 7mm thick rotor blades and EBC make those with what we call a "Billet Steel". This steel is LESS HARD than OEM discs and the use of V-Pads™ is the perfect solution for those. Inside each box is a warning note for consumers, at the bottom of this page also is a list of EBC rotors made in BILLET STEEL that demand the use of V-Pads™ only to avoid rotor galling.

# EBC NEW V Pads™

**New for  
2013**

- **Life of sintered pad - feel of an organic pad**
- **Zero brake noise**
- **Zero rotor galling, gentle on rotors**

Another world first debut of a SEMI-SINTERED™ pad compound. This new material uses a 30% weight percentage of copper in a high density matrix that combines the best of both worlds. Longer life, similar to sintered and great brake “feel” with lower heat transfer and less rotor abrasion. The new V-Pads™ are available for ALL Cruisers and Big Twins and for rear applications on numerous Sportbikes where extended wear life may be an advantage.

**How to order** - select regular part number from application listings in the appropriate column.

## NEW VLD Limited Edition Chrome Pads

- **Life of sintered pad - feel of an organic pad**
- **Zero brake noise**
- **Zero rotor galling, gentle on rotors**

Using the exact same compound as V-Pads™ above, a limited range of pads for the cruiser market is now available with polished chrome backing plates. Bonding of friction material onto backing plates could not be achieved without the NUCAP of Canada NRS system featuring a hook pattern which EBC Brakes applies to its backing plates under licence from NUCAP.

# CX Extreme® MOTO-X BRAKE ROTORS

- Heat treated and tempered stainless steel
- Lightest weight profile with new Vee design
- Great looks for modern motocross machines
- Balanced front and rear designs

A new ultra lightweight performance brake rotor to provide superb visual appeal for riders wishing to replace or upgrade their original brake rotors. The new Vee-Notch™ design offers a self cleaning high pressure contact pad-to-rotor brake enhancement.

The rotors are available for all modern fitments as shown on the chart below.

To order simply change the "D" or "C" suffix of a standard rotor to the suffix "CX".

## EBC Vee-Rotors™ - Front

- Fully floating design
- Lightest weight rotor profile
- Features patented SD system hardware
- Black hubs as standard
- Colour options

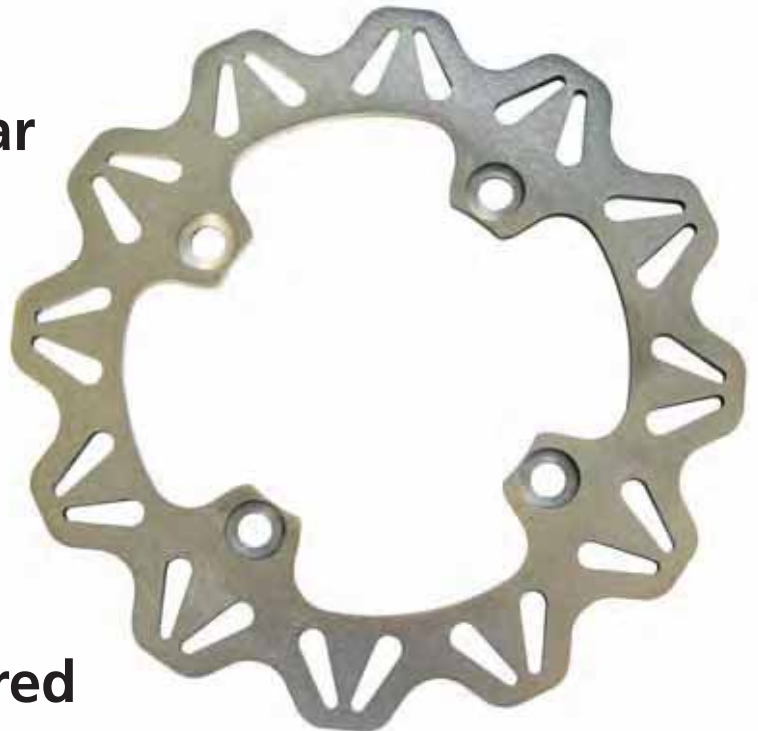

In line with the ongoing trend for riders to customize machines rather than simply replace parts, the new Vee-Rotors™ from EBC Brakes® offer an exciting new lightweight rotor program with an exciting range of colour options. The standard offering of hub colour is BLACK.

## EBC Vee-Rotors™ - Rear

- Heat treated stainless steel
- Lightest weight rotor profile
- Matching design to Vee-Rotor™ fronts

To compliment the front floating rotors in the Vee-Rotor™ range, these British made heat treated and tempered stainless steel brake rotors are available for most popular bikes.

## Heat Treated & Tempered

This product is fully stainless steel heat treated and tempered back to the optimum hardness.

**BEWARE** - of companies merely stating their product is stainless steel. Some of these are not hardened and of those that are, some are hardened to the excess and can exhibit cracks through over hardness between the holes and edges. EBC has worked long and hard on choosing the exact correct hardness and temper procedure for their brake rotors.

# NEW STREET BIKE ROTOR PROGRAMMES FOR 2013

## Colour Options for EBC Vee-Rotors™

- Option of five hub colours
- Features patented SD system hardware
- Black hubs are standard
- Colour options - see below

Although the standard hub colour for the Vee-Rotor™ programme is BLACK, these colours are available by special order options. Historically, red and blue anodized alloy fades badly over a period of 1-2 years in the sunlight. The special colour application process that we have devised for our Vee-Rotors™ uses a "FIX" process that seals the colour and minimizes colour loss.

# NEW STREET BIKE ROTOR PROGRAMMES FOR 2013

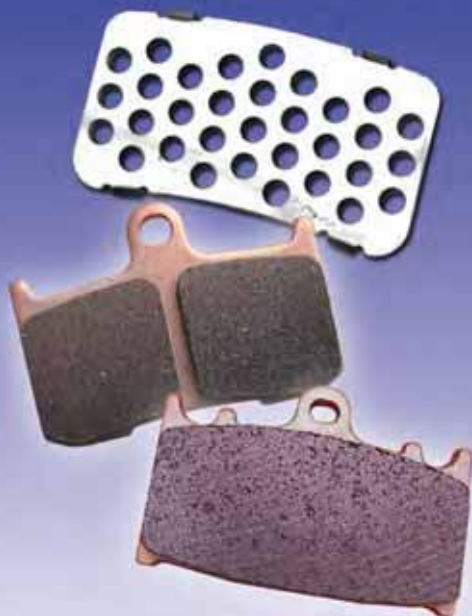

## How To Order

Five new colour options exist for the new Vee-Rotor™ range as described above. To specify your chosen hub colour, add the suffix letters after the part number, e.g. MD1003XC as a standard brake rotor becomes VR (Vee-Rotor™), followed by the part number (in this case 1003) and the hub colour selection, BLU for blue etc. In this case the new number will be VR1003BLU.

Please note optional hub colours are not available for any other EBC rotor programs except the new Vee-Rotor™ series.

## GPFA Full Race Pads EPFA Trackday Pads

- **MORE** stability
- **FASTER** bed-in
- **MORE** bite
- **STAINLESS** radiator plates
- **Better** heat cycling
- **LONGER** life
- **REDUCED** rotor damage

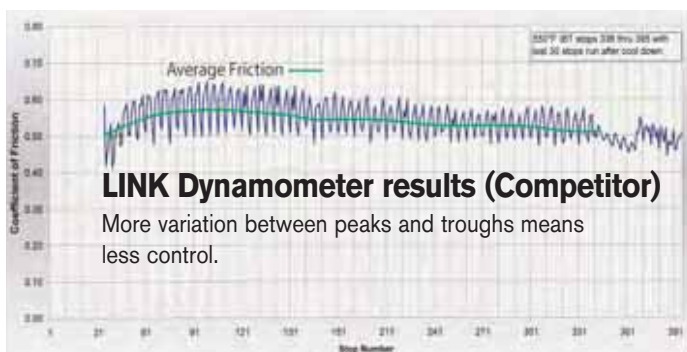

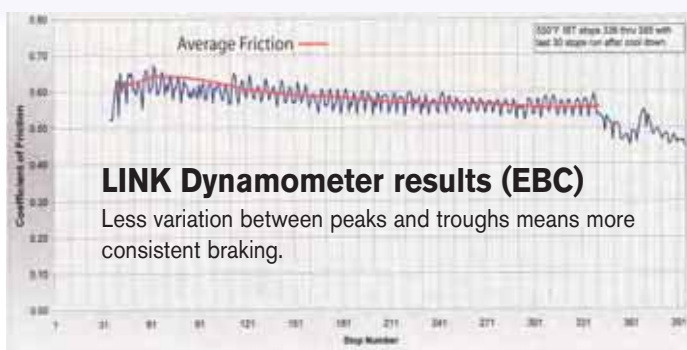

Two great choices for high end pad requirements from EBC.

The EPFA series is a premium long life street pad with improved fade resistance and heat cycling and improved noise characteristics making a great pad for heavy streetbikes and cruisers and also faster superbikes including intermittent track use. For exclusive track use we recommend our GPFA range.

GPFA pads are an ultra high friction race only pad and not designed for the street due to their friction level. They have been used globally for two years now by numerous professional race teams.

GPFA pads are priced identically to EPFA, range available shown below.

# CKF Clutch Kits

See application pages for availability and fitments.

CKF is the name of the new EBC carbon fibre impregnated motocross and ATV clutches and they are built tough to last longer, grip better, feel better and drive better than stock cork based units.

PLUS the high heat ability of these CKF Carbon Fibre clutch plates handles much higher stresses and temperatures encountered in racing yet feel gentle and smooth in everyday riding.

One day all motocross bikes and ATV will be built using a clutch like this but for now the only way to get the best clutch in the game is to step up to an EBC CKF plate set or go the whole hog and invest in the DRCF clutch kits which are sold as an assembly with a stack height measured to precisely reset your bike to the original sizing.

# DRC-F Clutch Kits

**The toughest off road clutch yet.**

**Tested for 12 months in the toughest moto-x applications, these new heavy duty kits are ideal for fast off road use especially on modern 4 stroke engines.**

More added for 2013, the ultimate moto-x and ATV heavy duty clutch kit designed for race use. These new kits feature carbon fibre lined clutch plates plus a full set of steel plates and heavy duty springs.

# Clutch Removal Tools

EBC Brakes® now produces a range of clutch tools to allow easy install of all EBC clutch kits. Range covers 95% of US market motorcycles and ATVs and allow positive holding of the clutch basket or centre boss to allow untightening and retightening of securing nuts.

Clutch application pages show appropriate tool and below is a list of the available 2013 programme.

# EBC Off Road PAD Options

## “TT” Series Moto-X Sport and Enduro Pads

Cool running carbon based brake pad compound for sport use in moto-x and ATV applications. For mud, sand or wet conditions requiring longer life, use our sintered range below.

## “R” Series Sintered ATV and Moto-X Replacement Pads

US made sintered copper alloy pads for sport and utility riding alike in normal off road riding.

## “MXS” Moto-X Race Pads

Ultra high friction American made sintered copper alloy pads with diamond ground surface finish for fast brake-in, these pads come complete with external hex drive slider pins and are suitable for all fast moto-x riding.

# EBC Brakes® Shoes

EBC brake shoes are made using high pressure Die cast aluminium platforms with bonded brake linings. All shoes are radius ground and edge trimmed and also feature lead in and lead out chamfers at lining ends and original equipment style brake shoe springs.

**WATER GROOVED EBC** series brake shoes are made using high pressure Die cast aluminium platforms with bonded brake linings. All shoes are radius ground and edge trimmed and also feature lead in and lead out chamfers at lining ends and original equipment style brake shoe springs.

The multiple angled liner grooves are designed to channel away dirt, dust, water and debris from the braking area to improve braking and extend shoe and drum life.

## EBC Off Road ROTOR Options

Tough heat treated carbon steel with zinc coat rust prevention, the D series rotors are a direct replacement for original parts. Add C suffix for contoured profile

### EBC OE Replacement Rotor

Part No carries "D" Suffix

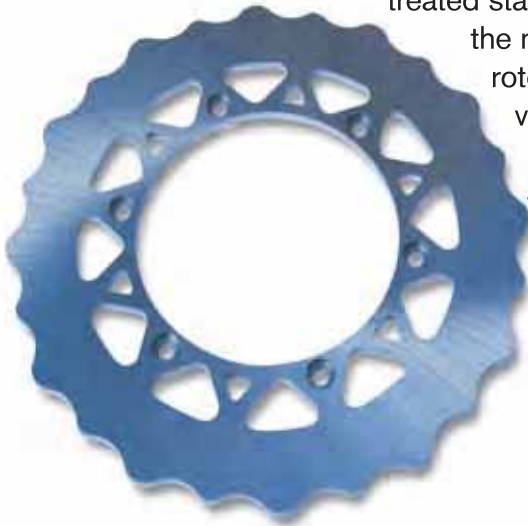

### EBC Supercross Contour Rotor

Part No carries "C" Suffix

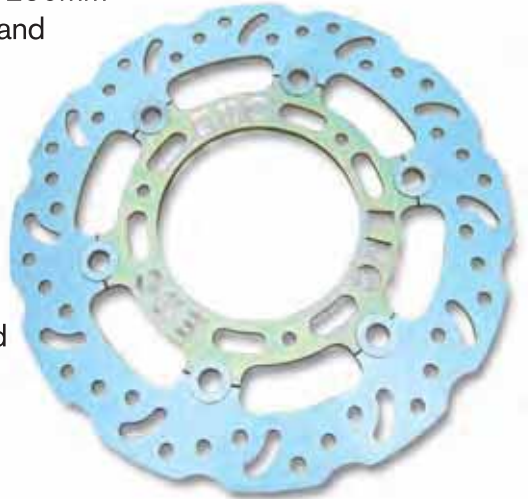

### NEW Enduro CE Series

Made from tough German mill rolled heat treated stainless steel, the new Enduro rotors have no vent holes in the pad sweep area to improve pad and disc wear in enduro riding.

### Moto-X Mini Oversize Kit for 65/80/85/150 cc MX bikes

Optimum 250mm diameter and comes complete with relocation bracket. All rotors feature contoured profile as standard.

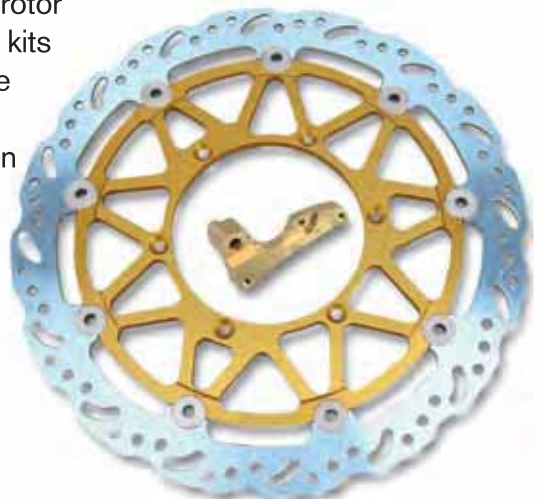

### EBC Oversize MX Disc Kits

280mm oversize disc kit complete with relocation bracket for improved brake power and control. C suffix for contoured profile with even lighter rotor weight and improved cleaning and cooling.

### EBC Supermotard Contour Rotor Kit

320mm rotor upgrade kits complete with relocation bracket.

# EBC Sportbike & Scooter Pad Range

## EBC Organic Brake Pads

FA series Kevlar® organic pads provide fingertip stopping power and are the preferred choice for many sportbike riders, having low disc attack characteristics and medium lifetime.

## EBC Double-H™ Superbike Pads

FA series, with HH suffix, denotes EBC's American made ultra high friction Double-H™ sintered copper alloy brake pads for maximum stopping power and lifetime. Fitted with stainless steel radiator plates for bikes without built in piston insulators to reduce heat transfer into hydraulics and new double compact vented technology for wider pads, reducing backplate bending.

## EBC SFA & SFAHH Scooter Pads

A new range of organic and sintered scooter pads in premium quality materials designed specifically for lighter weight motorcycles, such as scooters to give good lifetime and good initial brake response at a price point appropriate for the market.

# EBC Streetbike Disc Range

## Custom Discs for Naked Bikes

Universal for left and right with stainless steel rotor blade and polished and heat lacquered alloy center hubs. For a list of available discs in the CC suffix custom series, see buyers guide.

## Oversize Floating Disc Conversion

For use on freestyle stunt bike riding where increased control of the rear brake is essential and was pioneered by stunt stars such as Aaron Colton in the USA.

# EBC Streetbike Disc Range Contd.

## Special Application Discs and Floating Conversions

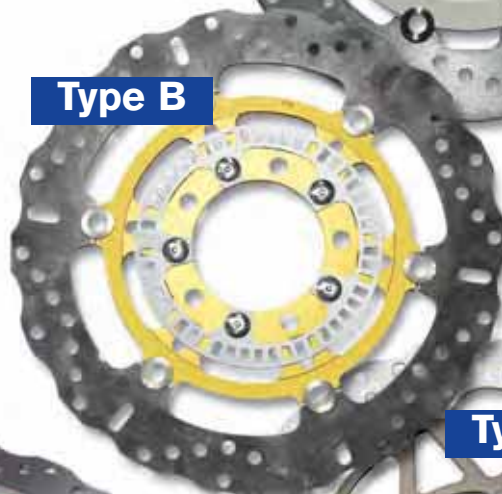

The EBC brake disc range now comprises over 1000 different designs and some of the more exotic ones are shown here, such as type A which is a floating conversion rotor for BMW classic motorcycles, also available for many early classic Japanese bikes, then type B which shows an EBC disc with ABS ring and type C which is a floating disc for a motocross bike.

## EBC Pro-lite Street & Race Hybrid Brake Discs (below)

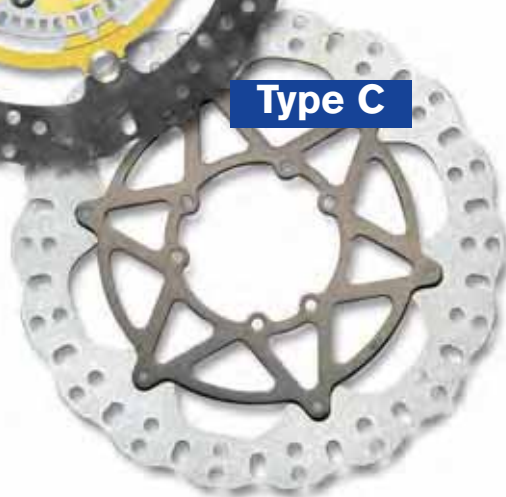

The X and XC series discs perform so well with the new stainless steel rotor blades, ultra light 6 button construction and SD system square drive technology that these rotors are now standard fitment for both road race use and street sport applications. These units are riveted together and are no longer rebuildable due to the infinite service life obtained with the SD square drive button system.

## EBC Stainless Steel Rear Brake Discs

Now made from stainless steel and available in full circle or contoured profile, suitable for performance street use or racing with new lightweight hole pattern construction.

# AMERICAN MOTORCYCLE PAD OPTIONS

## Kevlar® Organic Pads

- **Superb brake feel and modulation**
  - **Super quiet in operation**
    - **Made in the UK**

Organic pads have always been extremely popular amongst big twin and cruiser bike users, especially those using custom brake rotors due to the reduced dusting and reduced rotor galling that organic pads deliver. These quality pads 100% made in the UK have been a world market number one seller in their category with over 35 million sets sold worldwide.

### How to select your pads

Select part number from application pages E.g. **FA400**

## Semi-Sintered Pads

- **30% copper content extends life**
  - **Super quiet in operation**
    - **Made in the UK**

Combining the very best features of organic pads with the lifetime of a sintered pad, these part sintered 30% copper content organic pads extend lifetime considerably over Kevlar® organics or any other semi metallic pads significantly. On a scale of 1-10, a semi-metallic pad would last 10,000 miles, the semi-sintered pad would last 25,000 and a sintered pad probably 30,000 miles.

### How to select your pads

Select part number from application pages and suffix with letter V E.g. **FA400V**

## Extreme Pro Sintered Pads

- **Longest life of any sintered material**
  - **Super quiet in operation**
    - **Made in the USA**

Made in the USA, the EBC Extreme Pro range is a highly refined copper alloy including extra expensive ingredients to further enhance lifetime and quieten the brakes during operation. If you are looking for the ultimate in lifetime and brake performance on a big cruiser, these are the brakes to buy.

### How to select your pads

Select part number from application pages and prefix with letters EP and suffix with letters HH E.g. **EPFA400HH**

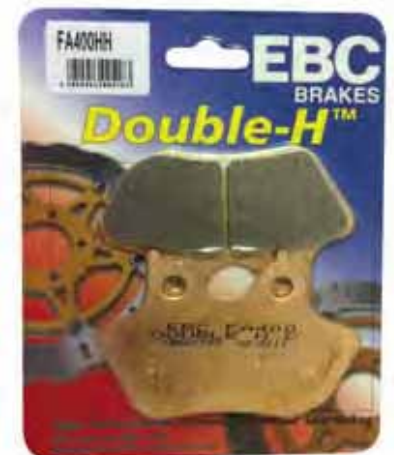

## Double-H™ Sintered Pads

- **Original equipment grade sintered pad**
  - **Super quiet in operation**
    - **Made in the USA**

Made in the USA, the EBC Double-H sintered pads are an exact equivalent of the sintered pad grade supplied in your motorcycle when it was made. Lifetime is extremely high with a high friction brake effect that gives fingertip stopping power. Best used on heat treated stainless steel discs.

### How to select your pads

Select part number from application pages and suffix with letters HH E.g. **FA400HH**

# CLUTCH KITS FOR STREET/DIRT/ATV

## STREET - 3 choices

### 1. Standard - CK Series

Almost identical to original equipment clutch plates the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

### 2. Race/Sport SRC Kevlar Series

A Kevlar paper lined plate set complete with heavy duty clutch springs (for bikes fitted with diaphragm type springs we cannot supply a heavy duty spring kit), the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC Kevlar series are longer life, higher heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series.

### 3. Race/Sport SRK Series

SRK complete kits include Kevlar® fiber lined friction plates, steel separator plates and springs to provide a streetgoing kit for high performance street and road race use much similar to the DRC program for off road. Some of the kits will now feature new **DIAPHRAGM** springs as used in many larger new bikes to provide a complete clutch rebuild kit for every sportbike possible.

## CSK CLUTCH SPRING SETS

DIAPHRAGM TYPE SPRING

Always fit new springs which get tired after miles of heat and use. EBC spring kits are 8-10% stiffer than standard and are sold in engine sets. As stated in general fitting/safety instructions, advise customers that lever will feel slightly "heavier" when uprating springs, and to test ride/acquaint themselves with this change in control.

COIL TYPE SPRING

## DIRT/ATV - 2 choices

### 2. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

EBC only sell complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminium separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the drive case, change the oil and rebuild the clutch with a complete DRC kit which includes STEEL separator plates that not only prevent wear but increase flywheel effect of the engine and improve performance.

### 1. Full Kit - DRC Series

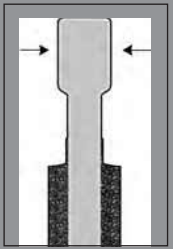

The US #1 selling off road clutch

Why are these the best???

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.
- Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevent premature driven plate wear, oil muddying and loss of stack height.
- EBC DRC kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

What makes EBC the BEST!!!

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.

CLUTCH APPLICATIONS

# EBC Coil Spring Kits

Full engine sets of heat treated and tempered spring steel coil springs with a guaranteed tension of 15% above standard. Clutch springs are an extremely important part of a motorcycle transmission system and we take very seriously the accuracy of spring tension in the EBC range of CSK kits. See application pages for part numbers.

## Spring Tension Measuring Machine

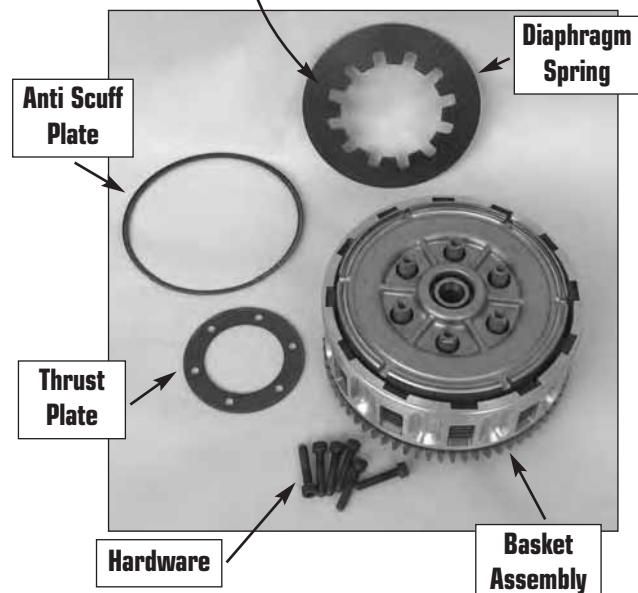

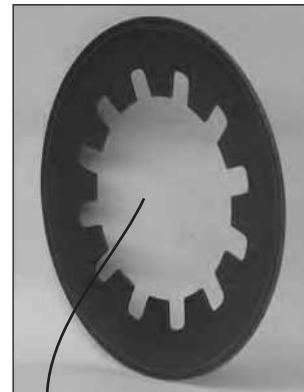

You simply cannot engineer coil springs correctly without such a device as shown here. EBC have one of these digital clutch spring tension calibration machines at each of its locations to guarantee the accuracy and consistency of spring batches. The machine is calibrated based on the nominal spring deformation and then a tight tolerance of variation is achieved within the target and then a tight tolerance of variation is achieved within the target 15% upgrade range. EBC have tested many original and aftermarket clutch springs and the variation in tension is enormous and varies so dramatically, that we took the decision to measure and calibrate every clutch spring in-house to be sure of their accuracy.

## EBC Diaphragm Clutch Springs

EBC SRK clutch kits, shown on the following pages, include the new diaphragm spring range. Full engine sets of heat treated and tempered spring steel diaphragm springs with a guaranteed 15% tension upgrade.

The picture opposite shows a typical aftermarket billet clutch and how the assembly looks. It is essential when replacing the diaphragm spring that the anti-scuff plate is in good condition. This is a rather flimsy steel pressing and can become bent or distorted in which case it must be replaced, this is a genuine part available from your main dealer only.

# CKF Clutch Kits

See application pages for availability and fitments.

CKF is the name of the new EBC carbon fibre impregnated motocross and ATV clutches and they are built tough to last longer, grip better, feel better and drive better than stock cork based units.

PLUS the high heat ability of these CKF Carbon Fiber clutch plates handles much higher stresses and temperatures encountered in racing yet feel gentle and smooth in everyday riding.

One day all motocross bikes and ATV will be built using a clutch like this but for now the only way to get the best clutch in the game is to step up to an EBC CKF plate set or go the whole hog and invest in the DRCF clutch kits which are sold as an assembly with a stack height measured to precisely reset your bike to the original sizing.

## DRC-F Clutch Kits

The toughest off road clutch yet.

**Tested for 12 months in the toughest moto-x applications, these new heavy duty kits are ideal for fast off road use especially on modern 4 stroke engines.**

More added for 2013, the ultimate moto-x and ATV heavy duty clutch kit designed for race use. These new kits feature carbon fiber lined clutch plates plus a full set of steel plates and heavy duty springs.

# Clutch Removal Tools

More added for 2013, a range of clutch tools to allow easy install of all EBC clutch kits. Range covers 95% of US market motorcycles and ATVs and allow positive holding of the clutch basket or center boss to allow untightening and retightening of securing nuts.

Clutch application pages show appropriate tool and below is a list of the available 2013 programme.

Costing far less than OE manufacturer tools, EBC strongly recommend selling a clutch tool for every clutch sold.

Many dealers have already ordered one of each tool and loan these to customers with a deposit to gain tool loan income.

# EBC CLUTCH KITS

# EBC<sup>®</sup> HEAVY DUTY CLUTCHES & SPRINGS

EBC Clutches are totally Asbestos Free made from a cork based "anti-swell" facing impregnated with aluminium particles to reduce wear & heat fade. Kits are sold in pre-measured engine sets and should always be replaced in engine sets. **USE ONLY MANUFACTURERS Drive case oils and avoid lead or other anti-friction additives.**

**SOAK PLATES** in drive case oil before installing. EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip. Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

### CAUTION – SAFETY WARNINGS FOR CONSUMERS

The following warnings now appear on the underside of our clutch packaging. For stocks in older packaging that do not display these safety warnings, we strongly recommend you photocopy these essential points and advise customers.

Never start a motorcycle whilst in gear with clutch depressed. Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed. Hold front brake lever on when selecting gears from standstill.

Never engage gears from a standstill with engine revs above 1500 rpm. Check oil levels regularly.

When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle. Assemble the clutch as per the original manufacturers workshop manual.

# NOTES

# How To Make Precision Pilot Jets

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have to be perfectly accurate in their marked size and incremental size steps. EBC Brakes sister company A-BAX Precision Engineering Ltd in the UK has purchased the most accurate machine on the planet for this work shown below. A-BAX Precision Engineering Ltd pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.

# S&B FILTERS

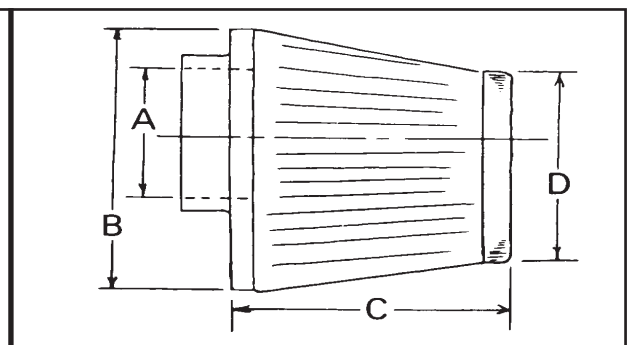

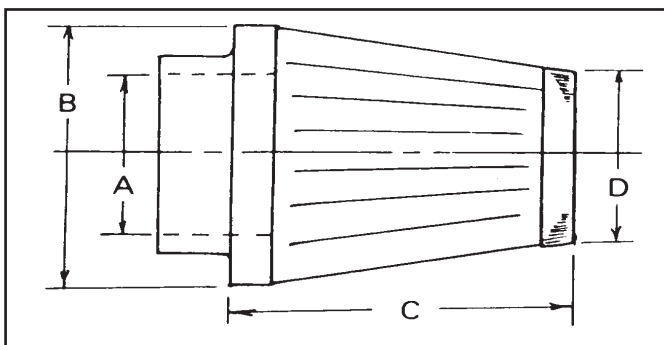

Made in the USA, S&B Custom Filters are a great choice for all types of carburetor and feature a special man made gauze called "Remay" made by Dupont® which has the benefit of perfectly uniform hole patterns. This enables the S&B filter to catch dust better than an oil soaked filter and to be run DRY. Oiled filters require regular washing and relube which plays havoc with carburetor balance. Available in parallel or cone type design, with high lustre chrome end caps.

**BC001 - Per Bottle**  
**BC012 - Case of 12**

# BAFFLE PAC

## BAFFLE-PAC-Silencer Glass. PART NO. BP001

This material is labelled and conforms to BSAU 193T2. BEWARE of distributors selling cheaper roofing felt in its place. Repackable Tailpipes as the name implies require regular cleaning and repacking with BSAU approved "SILENCER GLASS" such as Winning BAFFLE PAC. Failure to maintain tailpipes in such a way will lead to clogging of the silencer wool and raised noise output together with reduced engine performance. Freeman Automotive (nor Dealers) are responsible for noise offences due to lack of maintenance as described above. "Recommended repacking period is every 3000 miles on two-strokes or when bike becomes noisy if sooner".

# EBC<sup>®</sup> BRAKE FLUID

**DOT 4** - A refined specification polyglycol fluid as fitted to most faster street bikes now produced.

**DOT 5** - Silicone fluid as used in Harley Davidson Motorcycles and many special High Performance Brake systems.

**NEW BF307** - Highly refined Dot 4 Brake fluid, ideal for Racing or High performance Road bikes. Can be used in all systems specifying Dot 3 or Dot 4 but **NOT** with (Dot 5) silicone fluids.

**EBC Brake Fluid is available in DOT 4 or DOT 5 (Silicone) Grades or new BF 307 Race Grade.**

# BRAKE CALIPER LUBE

These sachets of dedicated, high viscosity greases are perfect for all of your customers' brake service needs. Always use sparingly on caliper slider pins and rails, but do NOT get near the pad surface and do NOT use as anti-squeal as it will not help at all. Each sachet contains 5 grammes of grease.

# GALINDO/BAJA GRIPS

## 4 1/2" GALINDO Superbike Grips

Made in USA with KRATON G material. Without doubt the highest quality grip sold worldwide for street bikes. All below colours at 4.1/2" with separate spacer ring to accommodate 5" throttle units. Complete with heavy plastic bar end plugs & new high visual "Clamshell" packaging.

Colour	Part No.
Black	GX01
Red	GX02

## Oversize Brake Disc Kits

EBC offers two upgrade options with these oversize brake disc conversion kits - 160/165mm-180mm (medium power upgrade) and 160/165mm 203mm (mega power upgrade) and the option of full circle profile or new lightweight contoured profile.

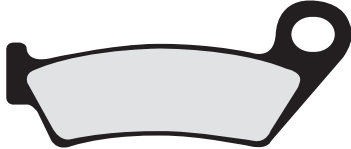

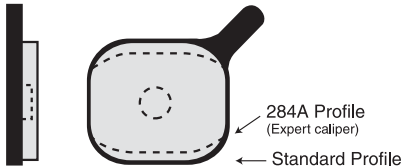

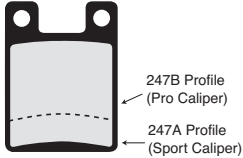

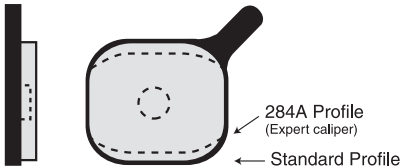

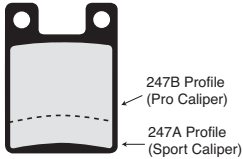

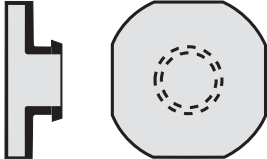

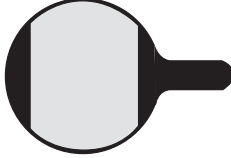

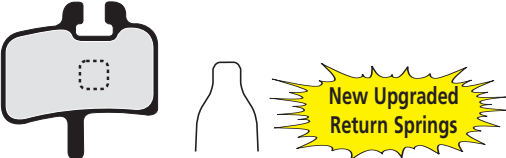

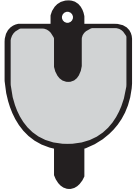

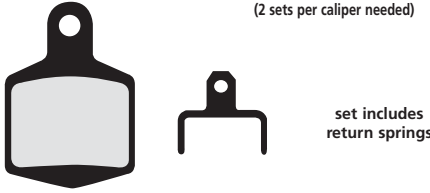

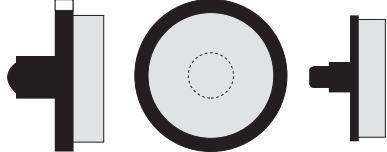

These mount on most standard 6 bolt wheel hubs and together with the bracket provided, which again fits most 50mm centre forks, your caliper is relocated outwards giving you a stronger brake and better brake feel. Easy to fit - no other changes are necessary to your caliper, cables, hydraulics or lever. All you need are two allen keys. These are premium quality heat treated stainless steel discs, diamond ground and compatible with every type of mountain bike brake pad. Kits are available to convert standard 160/165mm up to 180mm or 160/165mm to 203mm or 180mm to 203mm.

<b>Compound Selection Guide</b>								
<b>X-country - No Suffix</b>								
<b>Green</b>		Crosscountry/Trekking grade for general use.						
<b>Downhill - Suffix R</b>								
<b>Red</b>		High friction "Soft" compound for Downhill race use only.						
<b>Wet Riding - Suffix HH</b>								
<b>Gold</b>		High durability sintered metal compound for longer life in arduous conditions such as wet riding or use in mud or sand. NOT to be used for Downhill race use unless system is fitted originally with gold (sintered) brake pads to avoid brake overheating.
