Large-Capacity Battery Included

A large-capacity 5,400 mAh battery comes included, to give you around 6 hours of continuous shooting in PH mode.

Triple Manual Rings

Focus, zoom and iris rings are positioned on the lens barrel. This provides an operation to enable the kind of speedy and intuitive camera work.

XLR Mic/Line Input

The AG-AC90 comes standard with 2-channel XLR audio input terminals for external mic or line recording use. It also has a 48 V phantom power supply.

29.8 mm Wide-Angle 12x Zoom

The zoom lens combines F1.5 (at the widest angle) high speed and 29.8 mm (35 mm equivalent) wide-angle with high-powered 12x optical zooming. A Nano Surface Coating minimizes ghosts and flaring.

Panasonic's new AG-AC90 AVCCAM combines the high image quality, advanced functions and easy operation that professionals demand in a stylish, easy-to-handle design. The high-speed F1.5 lens extends from 29.8mm (35mm equivalent) wide-angle to 12x optical zoom. Other professional operating features include Triple Manual Rings (focus, zoom and iris), XLR Microphone/Audio Inputs, and remote terminals to provide the system capabilities that professional applications require.

Shooting Angles, Image Quality, Mobility, Operating Ease – No Compromises in This

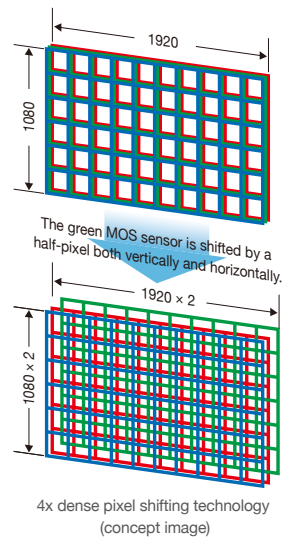

29.8mm Wide Angle to 12x Zoom Lens

This high-powered zoom lens covers from news gathering to image production field. It goes from 29.8 mm (35 mm equivalent) wide-angle to 12x zoom. Panasonic's unique Nano Surface Coating minimizes ghosts and flaring, and the high-speed F1.5 (at the widest angle) enables extremely clear image rendering.

High-Sensitivity BSI Type 3MOS Sensors

Three (RGB) 1/4.7 type MOS image sensors have an effective pixel count of 2,680,000 pixels. In addition to high BSI (backside illumination) sensitivity and excellent 3MOS color reproduction, 4x dense pixel shifting technology achieves high resolution. This lets you record high-quality Full-HD (1920x1080) images even in dim lighting. The image processing circuit, which is tuned for professional use, produces highly natural gradation and detail.

Three Manual Rings – Zoom, Focus, Iris

The lens barrel is equipped with manual rings for focus, zoom and iris operation to enable the kind of speedy, intuitive camera work.

5-Axis Hybrid Hand-Shake Correction

The AG-AC90 features 5-Axis Hybrid OIS (Optical Image Stabilizer/hand-shake correction). This powerful image stabilizer combines the advantages of both optical and electronic systems to ensure stable handheld shooting.

Intelligent Zoom and Digital Zoom

Intelligent Zoom gives you seamless zooming up to 25x magnification while minimizing decreases in resolution. And a 2x/5x/10x Digital Zoom is also featured. Combining the optical zoom and Intelligent Zoom, this provides an ultra-telephoto range up to 250x.

Focus Assist and Push AF

The Focus Assist (Focus in Red) button shows when your subject is in focus by outlining subject edges in red on the LCD monitor. And Push AF activates the AF function while in Manual mode with the press of a button (allocated to a User button). This provides handy support for manual focusing.

The AVCCAM Series Makes Video Packaging and Internet Distribution*1 Smooth and Easy.

The tapeless design means lower total costs, and unlike tape, AVCHD files require no digitizing*2 and can be directly and quickly transferred*3 to storage in a Windows PC or Mac. This makes it easier to use motion images in new IT applications*4 like content production, internet distribution*1 and source material archiving. AVCHD's direct editing also saves time and effort in TV program production. And AVCHD means lower costs for both media and equipment maintenance.

*1: To distribute AVCHD files on the web, you may need to use a video distributing service that is operated by other web publishers supporting AVCHD. For real-time web distribution, a real-time video encoder that is supplied by other manufacturers may be required.

*2: Editing may require conversion to an intermediate codec, depending on the editing software. The conversion speed varies depending on the hardware specifications of the Windows PC or Mac, the software used for converting, and the file format being converted.

*3: Maximum speed: 22 MB/s (Using a Class 10 SDHC Memory Card. Speed depends on the hardware specifications of the Windows PC or Mac.) Some computers may not recognize the SDXC/SDHC Memory Card. If that occurs, use an SDXC/SDHC Memory Card Reader.

*4: AVCHD-compatible software is required. The minimum system requirements for using the software must also be satisfied.

AVCHD Nonlinear Editing

Compatible with many existing HD editing systems, AVCHD files can be transferred at high speed by using the USB 2.0 interface to connect the AVCCAM Series or an SDXC/SDHC/SD Memory Card reader to a Windows PC or Mac. This dramatically improves productivity when compared with the time-consuming task of digitizing.

* Please see our website <<http://pro-av.panasonic.net/>> for information on the interoperation of nonlinear editing systems. Click on "Non-linear Compatibility Information." For more detailed information, please see the website of the relevant manufacturer.

Copying onto BD/DVDs with a BD/DVD Recorder*

You can easily copy AVCHD data onto the built-in HDD of a Panasonic BD/DVD recorder.* You can also copy HD images onto a BD or DVD.

*Must be compatible with AVCREC. BD/DVD recorders are not available in some areas.

HD Playback on a Monitor

Full-HD images recorded in AVCHD format can be previewed on a wide variety of professional and home HD monitors using HDMI* or AV multi output.

*Use an HDMI cable with Type A terminal (not compatible with VIERA Link).

A Host of Software to Support Production

As of October, 2012

AVCCAM Viewer*1 (for Windows/Mac, Free Download)

AVCCAM Viewer for Windows PC/Mac*2 makes it easy to preview AVCCAM files and other AVCHD motion images, still images and meta-data, with very simple operation. Files can be played from an SDXC/SDHC/SD Memory Card, BD (Blu-ray Disc™), or hard disk, and saved to a PC (hard disk) from an SDXC*3/SDHC/SD Memory Card or BD. Files can also be copied or deleted, meta-data can be displayed, and data can be written to an SDXC*3/SDHC/SD Memory Card or BD*4.

*1: AVCCAM Viewer doesn't support DV and PS mode.

*2: Copying and playing data on BD (BD-RE Ver3.0) are not supported by Mac OS X 10.4 (Tiger).

*3: Mac version doesn't support SDXC memory card.

*4: Do not insert a disc [DVD (AVCHD)] into a device that does not support the AVCHD standard. If it is inserted into such a device, the disc may not eject. Also, do not play the disc with a device that does not support the AVCHD standard.

AVCCAM Importer (for Mac, Free Download)

AVCCAM Importer is a software for Apple Final Cut Pro 7 to enable direct editing of AVCHD* ".mts" files without conversion. Since AVCCAM Importer is a plug-in component for Apple QuickTime, QuickTime Player can play AVCHD ".mts" files and other software based on QuickTime Framework can also handle AVCHD ".mts" files directly after installation of AVCCAM Importer on a Mac.

*AVCCAM Importer supports the AVCHD files produced by AVCCAM products only.

AVCCAM SD Card File Recovery (for Windows/Mac, Free Download)

The AVCCAM SD Card file recovery is software for repairing the file which was erased or formatted accidentally. It supports SDXC/SDHC/SD memory card.

*This software can only be used with AVCHD, DV and JPEG clips recorded with a Panasonic AVCCAM series camera.

*Note that it will not always be possible to repair the files using this software.

AVCCAM Restorer (for Windows, Free Download)

The AVCCAM Restorer is software for restoring inconsistencies in video data recorded on an SDXC/SDHC/SD Memory Card.

*This software can only be used with AVCHD clips recorded with a Panasonic AVCCAM series camera.

*Note that it will not always be possible to restore the data using this software.

*This software targets recorded data that has been damaged for restoration. It is not capable of performing processing to restore deleted data.

Precautions for Using the SDXC Memory Card

- The SDXC Memory Card can be used for products that display the SDXC logo mark either on the product itself, or in the User's Manual. It cannot be used with products that are only compatible with SDHC/SD Memory Cards.
- How to confirm SDXC compatibility: Confirm compatibility by looking for the SDXC logo mark on the product or in the User's Manual, or check the information provided by the product manufacturer.
- When using the SDXC Memory Card with a computer: For a computer with Windows 7 OS, use the SDXC Memory Card via an SDXC-compatible USB reader/writer, or connect the SDXC Memory Card to an SDXC-compatible product via a USB terminal. If you want to use the SDXC Memory Card in a direct slot, be sure to check the information provided by the manufacturer for the computer that you plan to use, and follow the instructions therein.
- UHS-I (Ultra-High Speed I) is a speed class for SD Memory Cards. UHS-I compatible memory cards can be used in the AG-AC160A/AC130A as SD Speed Class 10 cards.
