BULL SALE

APRIL 2 & 3, 2020 • 11:00 AM • COLUMBUS, MONTANA

*Selling the
Top End of
850+ Bulls*

MIDLAND BULL TEST

A NOTE FROM STEVE

Dear Friends –

With excitement, anticipation, and humility, the Williams and McDonnell families personally invite you to join us for the Midland Bull Test sales April 2-3, 2020. The Final Sort Sale has become the source for bulls that sift themselves to the top! The paper, genomics, and EPDs do not walk the walk for the bulls. The bulls must perform and be in the top end for ADG, WDA, and adjusted 365 weights. They also need to be structurally sound, pass a fertility exam, and have a manageable disposition. These days in agriculture, the margins can be thin and we take it one step further for the cattleman by measuring efficiency. One doesn't simply select on low intake, one can select for balance between DMI and gain to find the best of both worlds.....and achieve more profitability. We don't encourage selection based on low intake alone, we encourage selecting for balance between DMI and gain (Efficiency Ratio) to attain the best of both worlds.

The amount of data that one can accumulate on an individual animal can be mind boggling, however, one cannot over emphasize the need for balance. The consequences of single trait selection can quickly rear its ugly head. Midland strives to identify the bulls that have balance across the board and cover the bases as indicated in the MBT index. This Index also determines the sale order at Midland.

Measuring actual performance with measured efficiency is the indicator of progress or not. The commercial cattleman is always at the forefront of Midland's mindset with testing bulls. Developing them on a high roughage ration coupled with moderate gains to enable them to become skeletally sound for years of breeding service.

Each sort that leads up to the Final Sort starts with the consignor making the best mating selections for their program and their customers. This is followed by the in-herd performance and selecting the top end of those bull calves being sent to Midland to perform on a level playing field. Bulls are continually sifted for structure, feet, and disposition. All these criteria are considered along with the bull's actual performance and determine the "Final Sort" Sale. Cattlemen can be assured that these bulls are the cream of the crop out of 150 plus herds!

We extend a personal invitation to partake in the Midland Bull Test Event and enjoy the top notch entertainment by Kyle Shobe and "the Walk 'Em Boys" and great food and camaraderie with like-minded people. This portion takes place in the evenings of April 1 and 2 (see page 1 for details).

To our previous buyers and consignors, we appreciate your friendship and trust in developing and selling bulls. To new customers, we welcome you! Enjoy the Final Sort!

Steve Williams

SALE INFORMATION

Sale Order – Determined by Midland Bull Test Index (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER efficiency ratio) and Estimated Sale Value. We do expect small changes in sale order. They will be posted online with current version on the bottom. Sale orders will be posted online prior to sale and available sale day.

Terms Are Cash – All purchases need to be settled on the day of the sale. When making settlement, please leave specific instructions for transfer and shipping. Each animal will be sold to the highest bidder with the auctioneer settling any dispute as to bids.

Announcements made from the auction block take precedence over any printed material. Livestock will be cared for following the sale at the buyer's risk and responsibility.

Certificate of Registry – A transferred certificate of registry will be furnished to the Buyer for each animal after settlement has been made.

Health – All cattle will be sold according to the health regulations of the State of Montana. Buyers must be aware of any variations between the laws of the states.

All bulls have tested BVD-PI negative and are tested negative for known genetic defects as detected by pedigree per respective Associations as of 3/6/20. Furthermore, bulls sold into states that require trich test will be trich tested after sale and trucking arrangements will be made in short order.

Canadian Buyers – Estimated health inspection costs for first bull purchase is \$650. Each additional bull is \$200 per bull. Midland will split this cost equally with buyer for health inspection and testing.

Fertility Tested & Guaranteed – Complete semen and scrotal evaluations on all bulls are performed by Bryan Roe, DVM, Shepherd, MT. **Scrotal measurements for Group 1 (G1) were taken mid-February. Group 2 (G2) were taken the first week of March. All are published as actual size.** For projected sale date size, add 1 to 1.5 cm per month. These bulls sell guaranteed to be breeders via natural service.

Efficiency Test – Bulls are denoted as G1 (Group1) or G2 (Group 2). RFI is given in this catalog.

1/3 Revenue Sharing Semen Interest – Some breeders have elected to retain semen interest in their bulls. The buyer will have full possession and full salvage value. The seller, if he/she desires to collect semen, will do so in the off-breeding season at the seller's expense and the buyer's convenience. If the buyer opts to participate in semen sales, then buyer and seller will work out a mutual agreement. Over the years it has been Midland's experience that most sellers do not exercise this option on bulls going into commercial herds.

Delivery – Cattle purchased in our sale will be delivered to CENTRAL locations, such as stockyards, in the lower 48 states. Please see page 6 for our delivery policy, map and costs.

Everyone attending the sale does so at their own risk. The owners and Midland assume no liability, legal or otherwise, for any accidents which may occur.

Semen Collection

ORIGen 406/ 348-2345 \$500 collection certificate on the high selling bull in each breed

World West 406/ 628-7510

Terms & Conditions – All sales are being conducted under the American Angus Association Suggested Sale Terms and Conditions (2/21/14) regardless of breed of sale bull. At Midland, we equally value and appreciate our consignors and buyers; and we are cognizant of the risk incurred by both. With a commitment to mitigate and minimize risk for both parties, Midland has implemented a modified bull guarantee. All guarantees will be serviced through Fleming & Long Insurance Agency. Buyers who desire to guarantee bulls (insure), must initiate coverage at check-out following the sale. Midland Bull Test is offering to pay 50% of the cost of a 12 month policy covering Full Mortality and Accident Only Infertility. The total cost of coverage is 10% of the purchase price, to be split between Midland Bull Test and the buyer (a minimum of \$150 premium: minimum \$75 to Midland, \$75 to buyer). We think that it is a very fair and complete coverage and it will be the only loss of use breeding guarantee offered by Midland Bull Test. Special consideration for bulls standing at a collection facility.

SPECIAL PRESENTATION PRIOR TO ANGUS SALE

Feeder Calf Marketing ABC's

Ginette Gottswiller

Director Commercial Programs and AngusLink for American Angus Association

YOU'VE DONE THE WORK.

Get paid for it.

You've invested in good genetics.
You've kept all the records.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves. From age and source verification to cattle care and handling, you choose which programs make the most sense for you.

Group Age & Source: Verifies the group age and source of the cattle

Angus-Sired Genetics: Verifies calves are sired by 100% registered Angus bulls

Non-Hormone Treated Cattle: Verifies cattle have never received hormones

NeverEver³: No antibiotics, no hormones, no animal by-products ever

Cattle Care & Handling: Documents proper management, demonstrates quality commitment

Calf Management: Documents preventative health program

Genetic Merit ScorecardSM: Measures the genetic merit of calves for feedlot performance and carcass merit.

**Optional, not part of the PVP claims*

Easy and affordable, our customer service representatives walk you through the process.

GrowSafe Quick Facts

FREQUENTLY ASKED QUESTIONS

What are the benefits of selecting for low residual feed intake (RFI) animals*:

- Reduction of overall feed intake by up to 12% while maintaining the same level of production
- Reduction in the maintenance requirements of the herd by 9-10%
- Improvements in the feed conversion rates of calves of from 9-15%
- Reduction of manure NPK production by 17% and greenhouse gas emissions such as methane, by 30%

What does this mean for a cow herd?

By selecting for RFI, or introducing several low RFI bulls into your herd, feed-related savings will continue to increase. Several years of genetic selection will improve the baseline feed efficiency of the ranch and savings will continue to transfer to the cow herd as replacement heifers are retained.

What is Residual Feed Intake (RFI)?

Residual feed intake (RFI) is a measure of feed efficiency that is calculated as the difference between an animal's actual feed intake and its expected feed intake. RFI is independent of body weight and size. Differences in the trait cannot be detected by physically looking at an animal, it requires accurate and simultaneous measurement of an animal's feed intake and body weight. Animals with low RFI values are more efficient than those with high RFI values.

What is the heritability of RFI?

RFI is a moderately heritable trait (26-58%), and when used as a selection tool, will result in progeny that consume less feed for the same level of production. RFI is independent of growth, body size and other performance traits, meaning that selection for animals with low RFI will lead to reduced feed intake and improved feed efficiency without compromising body size or growth.

Does selection for low RFI animals, that eat less, result in reduced performance and average daily gain (ADG)?

No, selection for RFI does not result in cattle with reduced performance and ADG. Efficient and inefficient cattle can have both high and low ADGs. To prevent a decline in performance, it is important to select for low RFI animals with sufficient ADG. GrowSafe does not recommend single trait selection.

How is RFI calculated?

RFI is calculated as the difference between an animal's actual feed intake and their expected feed intake. An animal's expected feed intake depends on its body size and growth rate. The calculation for expected feed intake is comprised of data from the entire contemporary group using the animals' dry matter intake, mid-test metabolic body weight and average daily gain data. The GrowSafe data analysts use the data captured automatically and continuously by the Feed Intake technology to determine each individual animal's actual feed intake, which is compared to their expected feed intake. Concurrently, the highly accurate partial body weights collected from the GrowSafe Beef® technology are used to determine each individual animal's average daily gain and body weight.

Example:

	Expected Intake	Actual Intake
Animal A	8.5	10
Animal B	10	9.5

• Animal A: $RFI = 10 - 8.5 = 1.5$

• Animal B: $RFI = 9.5 - 10 = -0.5$

Animal B is more efficient because it has a lower RFI value and because it eats less than expected for its size and level of production.

We dedicate these pages to our Customers and Employees, Family and Friends

You are very appreciated!

Thanks to the dedication, trust and support of our customers, Midland continues to grow. We are privileged to work with great consignors bringing great bulls to develop. We thank you, the consignors for great cattle and vision. Buyers, we appreciate the confidence you place in the Midland Bulls and the loyalty to our program.

We tremendously value the crew we have and how hard they work. We ask a great deal of them and appreciate their dedication, commitment and contribution to the program here at Midland.

To name a few, we are extremely grateful to . . .

KIDS: GUY, GRAYSON AND TENLEY – your willingness to jump in and help between school and activities is appreciated. It is fun to watch your individual personalities and interests develop.

LEO AND SAM: Thanks for the help, advice, counsel over the years and all the life lessons taught. This is appreciated more than you will ever know.

GRANDMA DOELY – Her monster cookies make everyday better and keep the crew well ‘treated’. ♥Thank you for spoiling us and any one of our kids that shows up off the bus!

MATT HAALAND – He’s always burning somewhere, whether it’s feeding time for the bulls, unloading trucks, or maintaining equipment. We are always thankful when he lends a hand with working bulls too.

DAVID MEJIA – David joined the outside crew this year. Rain or shine, he helps keep the bulls healthy, pens bedded, and jumps in where needed.

MELISSA KRAMER – Whew! Any given day can consist of outside work, crunching numbers, phone calls with consignors and associations, getting new systems up and running and answering all our questions. If in doubt, ask Melissa!

SUZI SMITH – humor and laughter are NEVER left out when Suzi’s around. New to the crew this year, she has jumped in with both feet to every task – inside or out. She’s learned the ropes quickly and we are grateful to have her on board!

MARI BETH CHAMBERLIN – facing each day with a smile while juggling phone calls, gathering data from consignors, shuffling papers, and just generally keeping the office rolling keeps Mari running!

JILLANN KNUTSON – bookkeeping continues to keep Jillann on her toes, and she continues to keep us on track! She adds a laugh to any day she is here.

BOB CHAMBERLIN – He jumps in to fill in when we need an extra hand outside, provided we have coffee in the thermos. Most jobs aren’t complete without Bob’s jokes and fun.

LISA DAVIS – always bringing along great four legged help, Lisa is one to be counted on. Her help is always appreciated in the pens!

LEVI KRAMER AND GUY WILLIAMS – our after school crew picks up the pieces that are left at the end of the day. They may get some thankless jobs from time to time but are appreciated whenever we can snag em.

ROGER AND WENDY DOELY – Always braving the elements outside to lend a very helping hand, these two help make the sales a success and step in to help whenever needed.

DR. BRIAN ROE AND DAEL HOUSEHOLDER – Elite Bovine Veterinary Services – From BSE testing to multitudes of Health Certificate requests, these guys are always on the ball to keep us going.

DR. KERLEY AND GROWSAFE (KEVIN AND ROBIN) – keeping our GrowSafe Systems in operation and evaluating all our data is much appreciated.

DR. CHRIS HEDDINS - Chris keeps the bull ration balanced and provides great advice along the way.

SHERRY DOUBET – a big thanks for working with us and keeping data accurate and current in your associations and with consignors.

MOLLY GACH – American Angus Association is lucky to have you! We enjoy the weekly games of “Go Fish” for data collection and appreciate your patience, willingness and diligence.

MIKE STANEK, SAM & BRETT ENGLAND - What a great crew to work with to provide ultrasound scans and data on our bulls. Thank you for your knowledge and conversation!

CARYL & COMPANY - The task of doing our progress reports and sale catalog might seem daunting, but Caryl’s talent, ability, and willingness to work on our timelines has proven she’s up to the job. Working with our hectic schedule and timelines is more than appreciated.

TANNER JENSEN AND THE BULL CLIPPING CREW - Thanks for shaping up the boys to look their best.

BRAD FAHRMEIER AND LIVEAUCTIONS.TV – thanks for jumping on board this year. We appreciate working with you in the video pen and getting these bulls marketed to our online customer base.

Bull Mortality and Accident Infertility Insurance

Provided through Stockmens Insurance, LLC

Coverage		
The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury. The endorsement for Accident Only Infertility provides coverage in the event of permanent impotency, infertility or the bull's inability to naturally service cows as a result of an accident sustained during the policy.		
Bull Mortality and Limited Infertility Moverage	Values: Not to exceed purchase price	
Term: Renewable one-year policy term		
Testing All bulls must be tested, certified and listed in the official catalog of a herd sale		
Premium	Full Mortality	Accident Only
10% of the purchase price \$150 minimum premium per policy Midland Bull Test will pay 50% of the total premium of a 12 month policy	100% of the value of the bull in the event of death or humane destruction as a result of a life-threatening injury.	80% of the value of the bull in the event accidental and external infertility.

Value

The purchase price of the bull is considered to be the agreed value on the policy. The only exceptions are if, during the policy term, you attempt to sell the bull at auction but it does not sell, have it appraised at a lower value than the purchase price or castrate the bull.

Coverage

The coverage is available on the date of sale for those who choose to insure their bull(s). The policy will insure the bull from the date of sale for a period of one year. All claims must be immediately reported to the company. All mortality claims made to the company require a post mortem examination by a veterinarian. Accident Only: This policy is extended to indemnify YOU in the event of the ANIMAL covered by this section is proven to be PERMANENTLY INFERTILE, IMPOTENT or otherwise INCAPABLE of natural service or artificial insemination, resulting from ACCIDENTAL INJURY occurring during period of insurance, we will pay YOU the ACTUAL CASH VALUE of such ANIMAL(S) but not exceeding the sum insured stated in the DECLARATION.

SPECIAL EXCLUSIONS:

This policy does not cover losses directly or indirectly by any of the following events: Frostbite or freezing, Illness or disease, Reproductive disorders or abnormalities involving: scrotum, testis, epididymis, penis, ampulla, vesicular gland and prostate unless caused by an ACCIDENTAL INJURY.

CLAIMS

1. Claims must be reported to FLEMING & LONG AGENCY @ 406-272-1150 as soon as possible after onset.
2. Following notification to US of a possible claim, the ANIMAL must be given at least 3 months to attempt recovery unless WE agree to accept the claim before the end of such period, PERMANENT INFERTILITY, IMPOTENCY or INCAPABILITY must be total INFERTILITY, IMPOTENCY, INCAPABILITY or failure and not merely a reduction and be proved: To the satisfaction of both YOUR and OUR VETERINARIAN, and the ACCIDENTAL INJURY occurred during the policy period.

Cost

The cost of the coverage will be 10% of the hammer price per bull. Midland Bull Test has agreed to pay half (5%) of the premium. Premium is due at the time of the sale to provide coverage. The premium split will only be offered on the days of the sale. Coverage can be purchased at a later date for the full 10% premium cost.

Guarantee

This will be the only guarantee offered at the Midland Bull Test 2020.

The information contained herein is intended for informational purposes only. Insurance coverage in any particular case will depend upon the type of policy in effect, the terms, conditions and exclusions in any such policy, and the facts of each unique situation. No representation is made that any specific insurance coverage would apply in the circumstances outlined herein. Please refer to the individual policy forms for specific coverage details. Coverage is offered through Stockmens Insurance Agency LLC through General Security National Insurance Company.

READING THE LOT DATA

Final Test Report

- ADG - Average Daily Gain.
- ADG Rat - Average Daily Gain Ratio. 100 is average.
- 365 Wt - Current Wt - Weaning Wt)/(Date Current Weight Date - Date of Weaning)) X 160] + 205 day Wt
- YR - Yearling Ratio. Index of 365 Day Weights within class. 100 is average.
- WDA - Actual Weight Per Day of Age (Lifetime ADG).
- RFI - Residual Feed Intake / Net Feed Intake. (Actual feed intake minus expected feed intake)
- RFI EPD - See page 8
- & DMI EPD
- Efficiency - Optimizes balance between performance and efficiency. It measures how efficiently the caloric content of feed is converted to pounds.
- Ratio
- Final Wt - Final Test Weight.
- MBT Ind - Combined ADG, Nursing Ratio, Yearling Ratio and Efficiency ratios (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER efficiency ratio)
- Scrtl - Scrotal Circumference measured in centimeters and semen tested by Bryan Roe, DVM, Elite Bovine Veterinary Service, Inc.

EPDs (Expected Progeny Difference)

- CED/CE - Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.
- Scrotal/SC - Scrotal Circumference EPD, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.
- TM/MWW/M&G - Total Maternal, Maternal Weaning Weight EPD measures a sire's ability to transmit milk production and growth rate through his daughters. It predicts the weaning weight of a sire's daughters' calves. It is equal to his Milk EPD plus one-half his weaning weight EPD.
- CEM/MCE - Calving Ease Maternal is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
- Marbling - Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

Animal Information % - Breed Percentage color - Animals hide color P/H/S - Polled/Horned/Scurred.

Ear tattoo

Registration Number given by respective Associations.

GrowSafe Feed Efficiency Test

Bulls are denoted as G1 (group 1) or G2 (group 2). RFI is given here in the test data, complete efficiency test results are available at www.MidlandBullTest.com.

EPDs (Expected Progeny Difference)

- EPDs - The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across breeds. Each breed association calculates that breed's EPDs. See averages below.
- BW - Birth Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.
- WW - Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.
- Milk - Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
- Year - Yearling Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires Other Production, Carcass and Ultrasound EPDs vary among the breeds, see below.

Pre-Test Animal Data

- BW - Actual Birth Weight.
- WW - Actual Weaning Weight.
- 205 Wt - Weaning Weight Adjusted to 205 days.
- NR - Nursing Ratio, an index of the adjusted 205 day weight within the breeders herd only. It is an indication of the dam's maternal performance and the bull's preweaning growth.

CAB -Meets the EPD requirement of +0.54 for Marbling and +46.0 for Dollar Grid Carcass Index (\$G) to be considered Certified Angus Beef.

HD50K-A genotyping platform that replaces i50K, designed specifically for Angus breeders. Delivers GE-EPDs, indexes, parentage verification, & genomic percentile ranks.

AngusGS-Angus Genomic Selection. An advanced high density genomic testing option, designed specifically for Angus cattle including potential markers for future trait selection.

- REA - Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)
- Fat - Fat thickness EPD, expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement. (Angus, Red Angus and Simmental give ultrasound derived EPDs)
- CW/CWT - Carcass Weight EPD, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.
- \$B - Beef Value, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
- FPI - Feeder Profit Index, an economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the Certified Angus Beef® brand. Only 3 in 10 non-parent Angus bulls meet the Targeting the Brand genetic requirements.

Minimum Genetic Requirements

Value

Marbling EPD (Marb)	+0.54
Dollar Grid Carcass Index (\$G)	+46.0

For more information on Targeting the Brand™ visit CABcattle.com.

Lot #22 is sired by a bull we raised and sold at MBT to Krebs Ranch in 2016. We have continued to use him for the smooth made, good carcass progeny we get. #22's dam is moderate framed and comes from a cow family of good efficient feed converters.

Mat Grandam Production 7 NR 103 4 YR 102

Lot #26's dam is a phenotypically correct average framed female. She keeps her condition quite well. Not surprising that this bull's efficiency ratio is 114. Both Lots 26 and 27 are younger calves that we brought to MBT because of their type, high NR and well above average producing dams.

A stout Resource son that was our pick when he left the farm. He was one that caught your eye every time you checked pastures. We really appreciate his Dam, she is thick, deep, and long bodied. This Gridiron daughter has good feet and legs for being 10 years old with a high milk and docility score.

#333 is a high performance son of the \$20,000 "Pay Back". He is the fourth son of our 184 cow to sell at Midland, and we feel she is our top producer. She weaned #333 at 781 lbs. at 190 days, and his MBT growth ratios are ADG-109, WDA-116, 365D-110.

Brown Pay Back 7012, sire of lot 333

 Herd sire prospect out of our elite cow family. Dam is picture perfect in every way! Grandsire is the record selling bull at Arntzen Angus Ranch. A.I.ed to him, he left us with an outstanding group of mother cows. Granddam is still in production at 16 years old. This year producing a set of twins. This bull will be a great foot and udder improver that will take a program to a new level. No creep.

Big time calving ease son of Baldridge Bronc that offers the whole package of growth and herd improving genetics. Traces back to Sitz Upward 307R on both sides of sire and dam. This is the kind to take home, just turn out, and wait to see the great calves!

This bull has exceeded my expectations in his performance at the bull test station. He is out of a proven AI bull with good EPDs. I expect him to do well with cows and heifers. I trust that he will do well for his new owner.

This bull's dam, E541 has calving interval with 347 days for the past three years. All of these breedings were A.I.

E784 is a paternal sister to 850 & 851. E784 is possibly the best first heifer and donor prospect that we have bred in a long time. She continues a lineage of six generations in this cow family.

Add length and pounds to your program. Sire produced bulls for cattlemen who demand performance & pounds. Maternal Grand-sire, Judd Ranch "Exclusive," delivers the cow power, weans off big, productive calves. In search for the new Gold standard red bull with fantastic disposition, WBRG "Mr Goldschlieger" is your bull!

Dam is a pretty fronted, long sided, nice uddered, docile female that traces back to Mytty In Focus and the Duchess cow family from Beartooth. Dam is in the top 95% for marbling. Like his brother an efficient, thick individual in a moderate package.

Selling 2/3 Interest & Full Possession

CONNEXION.COM 

Vista®. Easy on cattle, strong on productivity.

It's simple logic: A vaccine should move your cattle ahead. Not set 'em back with harsh side effects. That's why Vista® vaccines have earned such a strong reputation among leading cattlemen. With Vista, cattle reach their natural potential. Deliver maximum value. And keep moving forward.

Why Buy Bulls from Midland Bull Test?

Bulls in “The Final Sort” Sale are TOP-END Bulls. The bulls are an elite selection from the get-go and they must continue to perform on test. Only the top 70-80% consigned to MBT sell.

Performance at Midland Bull Test: The bulls are weighed twice on test and twice off test for accuracy and provide two intermediate weights. The bottom 20-30% are then culled for gain and 365 Day weight. Midland Bull Test is the only major performance program to feed a low energy ration. These bulls are developed on a high roughage ration to remain compatible with our rangeland pastures. These bulls must hold up, regardless of where they go!

Bulls at Midland Bull Test are efficiency tested! Each animal is individually tested for RFI (Residual Feed Intake). Midland Bull Test Efficiency Data is held to the highest standard and overseen by multiple third parties including Grow Safe and University of Missouri.

What does this mean to you? RFI is relevant and important to producers as it correlates the pounds of gain to the pounds of intake and therefore the increment cost of gain. As such, RFI allows producers to determine those individuals who have the capacity to gain quickly and cheaply!

Fertility is the cornerstone of any program and stressed through scrotal circumference measurements and semen evaluation.

Bulls are ultrasounded for ribeye, backfat, and marbling.

Bulls are clean for genetic defects as identified by respective breed associations. Potential carriers are tested. Bulls are screened on every level – soundness, structure, and disposition!

The information gathered and shared regarding Midland Bull Test bulls is unbiased and critical to ranchers’ profitability. The range of quality bulls compared on a level playing field at Midland Bull Test surpasses all performance programs around!
