MIDLAND BULL TEST

APRIL 1 & 2, 2021 • 11:00 AM • COLUMBUS, MONTANA

A NOTE FROM STEVE

With the world turned upside down in 2020, we learned many valuable lessons. Our appreciation for simpler times and old-fashioned ways grew. This longing for what once was, has built great anticipation for the Final Sort Sale at Midland Bull Test 2021. The Williams and McDonell families cordially invite you to, FINALLY, join us in person for our usual festivities- we are so excited to see you for the banquets with social hour and celebratory live music.

We share much of the same in the lives we choose to love. We value the practical, the progressive, the strong foundation. We are cattlemen.

Here is where Midland is different.

We know that genetic potential does not guarantee production. We know we can learn, and PROVE more at Midland Bull Test. This is where you come to ensure you have the best, of the best. At Midland we have top end genetics from progressive minded consignors, AND we also have efficiency backed by unmatched performance data. This knowledge makes choosing a bull for your operation simple. We do the arduous and disheartening work to cut good bulls through testing, for both natural and sometimes unfortunate flaws because part of being the best means cutting those good bulls that fell deficient in the details to only offer the GREAT bulls. The "FINAL Sort" is based on this thorough criterion. It represents the numerous sorts these bulls triumph to be offered on sale day. We, YOU, the critical and prudent cattleman can rest assured that they are getting what they need for today's market.

Steve Williams

SALE INFORMATION

Sale Order – Determined by Midland Bull Test Index (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER efficiency ratio) and Estimated Sale Value. We do expect small changes in sale order. They will be posted online with current version on the bottom. Sale orders will be posted online prior to sale and available sale day.

Terms Are Cash – All purchases need to be settled on the day of the sale. When making settlement, please leave specific instructions for transfer and shipping. Each animal will be sold to the highest bidder with the auctioneer settling any dispute as to bids.

Announcements made from the auction block take precedence over any printed material. Livestock will be cared for following the sale at the buyer's risk and responsibility.

Certificate of Registry – A transferred certificate of registry will be furnished to the Buyer for each animal after settlement has been made.

Health – All cattle will be sold according to the health regulations of the State of Montana. Buyers must be aware of any variations between the laws of the states.

All bulls have tested BVD-PI negative and are tested negative for known genetic defects as detected by pedigree per respective Associations as of 3/1/21. Furthermore, bulls sold into states that require trich test will be trich tested after sale and trucking arrangements will be made in short order.

Canadian Buyers – Estimated health inspection costs for first bull purchase is \$650. Each additional bull is \$200 per bull. Midland will split this cost equally with buyer for health inspection and testing.

Fertility Tested & Guaranteed – Complete semen and scrotal evaluations on all bulls are performed by Bryan Roe, DVM, Shepherd, MT. **Scrotal measurements for Group 1 (G1) were taken mid-February. Group 2 (G2) were taken the first week of March. All are published as actual size.** For projected sale date size, add 1 to 1.5 cm per month. These bulls sell guaranteed to be breeders via natural service.

Efficiency Test – A collection of data that identifies ratio of the optimum balance between intake and gain. See page 9 for more information.

1/3 Revenue Sharing Semen Interest – Some breeders have elected to retain semen interest in their bulls. The buyer will have full possession and full salvage value. The seller, if he/she desires to collect semen, will do so in the off-breeding season at the seller's expense and the buyer's convenience. If the buyer opts to participate in semen sales, then buyer and seller will work out a mutual agreement. Over the years it has been Midland's experience that most sellers do not exercise this option on bulls going into commercial herds.

Delivery – Cattle purchased in our sale will be delivered to CENTRAL locations, such as stockyards, in the lower 48 states. Please see page 6 for our delivery policy, map and costs.

Everyone attending the sale does so at their own risk. The owners and Midland assume no liability, legal or otherwise, for any accidents which may occur.

Semen Collection

ORIGen 406/ 348-2345 \$500 collection certificate on the high selling bull in each breed

World West 406/ 628-7510

Terms & Conditions – All sales are being conducted under the American Angus Association Suggested Sale Terms and Conditions (2/21/14) regardless of breed of sale bull. At Midland, we equally value and appreciate our consignors and buyers; and we are cognizant of the risk incurred by both. With a commitment to mitigate and minimize risk for both parties, Midland has implemented a modified bull guarantee. All guarantees will be serviced through Fleming & Long Insurance Agency. Buyers who desire to guarantee bulls (insure), must initiate coverage at check-out following the sale. Midland Bull Test is offering to pay 50% of the cost of a 12 month policy covering Full Mortality and Accident Only Infertility. The total cost of coverage is 10% of the purchase price, to be split between Midland Bull Test and the buyer (a minimum of \$150 premium: minimum \$75 to Midland, \$75 to buyer). We think that it is a very fair and complete coverage and it will be the only loss of use breeding guarantee offered by Midland Bull Test. Special consideration for bulls standing at a collection facility.

No One Offers You More Because No One Has More to Offer!

Bid Live Online cci.live

“Gavel’s Down, The Best in Online Marketing”

(516) 366-0734 CCI.live.schedule@cci.live

**Sale Day Phones
406/ 322-5597
Midland Office**

**Phone bids on
Sale Day Only
406/ 322-9911
406/ 322-9044**

STEP 1 - CREATE AN ACCOUNT and REQUESTING BIDDING CREDENTIALS

You must CREATE A NEW ACCOUNT and then request for bidding credentials at cci.live. Once you are approved the first time, you do not need to go through the process for each sale. Please DO NOT wait until sale day to request bidding credentials, some sales require approval more than one day ahead of time. When you create an account, please use a valid email address. If in the future, if you forget your bidders password, you can reset it immediately through the email on your account.

STEP 2 - GET A BUYER NUMBER

Once you are an approved bidder at CCI, you simply go to the SALE SCHEDULE PAGE and click on the auction name that you are interested in, then click BID ONLINE and click GET BUYER NUMBER. You will instantly be assigned a buyer number, for that auction.

STEP 3 - Always refresh your screen if you are going in and out of service and if you “leave” your computer or the app for over 15 minutes. The computer may log you out if you have not been active for a period of time. It’s always a good idea to refresh your screen right before the sale starts.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.

GrowSafe Quick Facts

FREQUENTLY ASKED QUESTIONS

What are the benefits of selecting for low residual feed intake (RFI) animals*:

- Reduction of overall feed intake by up to 12% while maintaining the same level of production
- Reduction in the maintenance requirements of the herd by 9-10%
- Improvements in the feed conversion rates of calves of from 9-15%
- Reduction of manure NPK production by 17% and greenhouse gas emissions such as methane, by 30%

What does this mean for a cow herd?

By selecting for RFI, or introducing several low RFI bulls into your herd, feed-related savings will continue to increase. Several years of genetic selection will improve the baseline feed efficiency of the ranch and savings will continue to transfer to the cow herd as replacement heifers are retained.

What is Residual Feed Intake (RFI)?

Residual feed intake (RFI) is a measure of feed efficiency that is calculated as the difference between an animal's actual feed intake and its expected feed intake. RFI is independent of body weight and size. Differences in the trait cannot be detected by physically looking at an animal, it requires accurate and simultaneous measurement of an animal's feed intake and body weight. Animals with low RFI values are more efficient than those with high RFI values.

What is the heritability of RFI?

RFI is a moderately heritable trait (26-58%), and when used as a selection tool, will result in progeny that consume less feed for the same level of production. RFI is independent of growth, body size and other performance traits, meaning that selection for animals with low RFI will lead to reduced feed intake and improved feed efficiency without compromising body size or growth.

Does selection for low RFI animals, that eat less, result in reduced performance and average daily gain (ADG)?

No, selection for RFI does not result in cattle with reduced performance and ADG. Efficient and inefficient cattle can have both high and low ADGs. To prevent a decline in performance, it is important to select for low RFI animals with sufficient ADG. GrowSafe does not recommend single trait selection.

How is RFI calculated?

RFI is calculated as the difference between an animal's actual feed intake and their expected feed intake. An animal's expected feed intake depends on its body size and growth rate. The calculation for expected feed intake is comprised of data from the entire contemporary group using the animals' dry matter intake, mid-test metabolic body weight and average daily gain data. The GrowSafe data analysts use the data captured automatically and continuously by the Feed Intake technology to determine each individual animal's actual feed intake, which is compared to their expected feed intake. Concurrently, the highly accurate partial body weights collected from the GrowSafe Beef® technology are used to determine each individual animal's average daily gain and body weight.

Example:

	Expected Intake	Actual Intake
Animal A	8.5	10
Animal B	10	9.5

- Animal A: $RFI = 10 - 8.5 = 1.5$
- Animal B: $RFI = 9.5 - 10 = -0.5$

Animal B is more efficient because it has a lower RFI value and because it eats less than expected for its size and level of production.

We dedicate these pages to our Customers and Employees, Family and Friends

You are very appreciated!

The struggle of 2020 has brought much growth and excitement for this year's gathering. At Midland Bull Test, there is a deep history of faithful dedication to YOU, the honorable people in the ag industry. We are standing strong to our roots while reaching out our branches for leading innovations in cattle.

We have conquered a plethora of changes that have given us confidence and strength in those roots, and ignited our engagement for the future.

With the perseverance of our valued customers, family, friends, and team we are stronger than ever.

Our sincerest gratitude to:

LEO, SAM AND GRANDMA DOELY- Thank you for your sacrifice to provide our enormous family a place to call home filled with love. Your strength and support (and cookies!) carry us through the challenges and we are forever in debt to you for all our greatest blessings. We are so proud of how much the kids learn from your continued hard work and connection here as they grow.

MATT- A man of solid commitment. He is here at sunrise, through rain, snow or scorching heat to make sure the bulls get fed. He is so reliable, independent and trustworthy in any role. We are so proud to work with him and even more proud to call him our friend.

JILLANN- This gal has so much stamina! She happily withstands a variety of futile hours behind the desk handling the money. She knows the in and outs behind the scene, and helps keep the office on task. While juggling the fires here, she is also a such a productive mother and wife at home.

MARI BETH- Our favorite role of Mari's is how plentiful she stocks the candy dish! She also makes sure all the dogs are equally as spoiled. She is so flexible and is always open and willing to change roles and processes to make things flow better. She models such excellent care of our customers and we are so thankful for her smiling face during the busy season.

SUZI- Thank you for giving all you had to tackle new things. And yes...so many new things. You stuck through the mud to get our catalog into production. We are grateful for your commitment to standardization and remediating all the rugged tasks you encountered in your time here. May God bless you in your new journeys; just as he blessed us with you. Suzi- Thank you!!

SHEILA- What a breath of fresh air! She has an infectious positive attitude. She executes everyday with so much organization. We are grateful for how she motivates our crew, always finishes on time and makes sense of the messy things. She has a plethora of experience that can't be priced in these busy times.

LISA- A pillar of strength and compassion at MBT. There is no task too big- she tackles the most difficult jobs while still focusing on all the little details that make a big difference around here. She has a history with Midland and we are so fortunate to have her expertise back . She provides great strength in keeping our outside tasks well corresponded to our office tasks.

DYLAN- Thank you for coming aboard this year. It is dirty exhausting work and you continue to press forward with many gains as the new guy.

LINDSEY (WALLY)- Asking more of someone with a full plate is not an easy task. What a relief to have such a motivated individual willing to share her knowledge and expertise to perfect processes and grow abilities in our office.

SALE DAY STARS-

It takes a village and we are so grateful for the best line-up on sale day. We truly look forward to working with you yearly!

TANNER and crew for prepping bulls leading up to sale.

ROGER AND WENDY for always keeping us on your schedule.

BOB- we enjoy your laughter and appreciate your extra hand.

Thank you to all our vets and data gathering army especially **BRYAN, DAEL, LACEY & SAM .**

Bull Mortality and Accident Infertility Insurance

Provided through Stockmens Insurance, LLC

Coverage		
<p>The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury. The endorsement for Accident Only Infertility provides coverage in the event of permanent impotency, infertility or the bull's inability to naturally service cows as a result of an accident sustained during the policy. Available in states: CA, CO, DE, ID, IL, IA, KS, MN, MT, NE, ND, OK, OR, SD, TX, UT, WI, & WY. Mortality only available in all other states.</p>		
Bull Mortality and Limited Infertility Coverage	Values: Not to exceed purchase price	
Term: Renewable one-year policy term		
Testing All bulls must be tested, certified and listed in the official catalog of a herd sale		
Premium	Full Mortality	Accident Only
<p>10% of the purchase price \$150 minimum premium per policy Midland Bull Test will pay 50% of the total premium of a 12 month policy</p>	<p>100% of the value of the bull in the event of death or humane destruction as a result of a life-threatening injury.</p>	<p>80% of the value of the bull in the event accidental and external infertility.</p>

Value

The purchase price of the bull is considered to be the agreed value on the policy. The only exceptions are if, during the policy term, you attempt to sell the bull at auction but it does not sell, have it appraised at a lower value than the purchase price or castrate the bull.

Coverage

The coverage is available on the date of sale for those who choose to insure their bull(s). The policy will insure the bull from the date of sale for a period of one year. All claims must be immediately reported to the company. All mortality claims made to the company require a post mortem examination by a veterinarian. Accident Only: This policy is extended to indemnify YOU in the event of the ANIMAL covered by this section is proven to be PERMANENTLY INFERTILE, IMPOTENT or otherwise INCAPABLE of natural service or artificial insemination, resulting from ACCIDENTAL INJURY occurring during period of insurance, we will pay YOU the ACTUAL CASH VALUE of such ANIMAL(S) but not exceeding the sum insured stated in the DECLARATION.

SPECIAL EXCLUSIONS:

This policy does not cover losses directly or indirectly by any of the following events: Frostbite or freezing, Illness or disease, Reproductive disorders or abnormalities involving: scrotum, testis, epididymis, penis, ampulla, vesicular gland and prostate unless caused by an ACCIDENTAL INJURY.

CLAIMS

1. Claims must be reported to FLEMING & LONG AGENCY @ 406-272-1150 as soon as possible after onset.
2. Following notification to US of a possible claim, the ANIMAL must be given at least 3 months to attempt recovery unless WE agree to accept the claim before the end of such period, PERMANENT INFERTILITY, IMPOTENCY or INCAPABILITY must be total INFERTILITY, IMPOTENCY, INCAPABILITY or failure and not merely a reduction and be proved: To the satisfaction of both YOUR and OUR VETERINARIAN, and the ACCIDENTAL INJURY occurred during the policy period.

Cost

The cost of the coverage will be 10% of the hammer price per bull. Midland Bull Test has agreed to pay half (5%) of the premium. Premium is due at the time of the sale to provide coverage. The premium split will only be offered on the days of the sale. Coverage can be purchased at a later date for the full 10% premium cost. Mortality only coverage is available for 8.1%.

Guarantee

This will be the only guarantee offered at the Midland Bull Test 2021.

The information contained herein is intended for informational purposes only. Insurance coverage in any particular case will depend upon the type of policy in effect, the terms, conditions and exclusions in any such policy, and the facts of each unique situation. No representation is made that any specific insurance coverage would apply in the circumstances outlined herein. Please refer to the individual policy forms for specific coverage details. Coverage is offered through Stockmens Insurance Agency LLC through General Security National Insurance Company.

READING THE LOT DATA

Final Test Report

- ADG - Average Daily Gain.
- ADG Rat - Average Daily Gain Ratio. 100 is average.
- 365 Wt - Current Wt - Weaning Wt)/(Date Current Weight Date - Date of Weaning)) X 160] + 205 day Wt
- YR - Yearling Ratio. Index of 365 Day Weights within class. 100 is average.
- WDA - Actual Weight Per Day of Age (Lifetime ADG).
- RFI - Residual Feed Intake / Net Feed Intake. (Actual feed intake minus expected feed intake)
- RFI EPD - See page 9
- & DMI EPD
- EFF Rat - Optimizes balance between performance and efficiency. It measures how efficiently the caloric content of feed is converted to pounds.
- Fnl Wt - Final Test Weight.
- MBT Ind - Combined ADG, Nursing Ratio, Yearling Ratio and Efficiency ratios (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER efficiency ratio)
- SCR - Scrotal Circumference measured in centimeters and semen tested by Bryan Roe, DVM, Elite Bovine Veterinary Service, Inc.

EPDs (Expected Progeny Difference)

- EPDs - The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across breeds. Each breed association calculates that breed's EPDs. See averages below.
- BW - Birth Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.
- WW - Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.
- MILK - Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
- YW - Yearling Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires Other Production, Carcass and Ultrasound EPDs vary among the breeds, see below.

EPDs (Expected Progeny Difference)

- CED/CE - Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.
- Scrotal/SC - Scrotal Circumference EPD, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.
- TM/MWW/M&G - Total Maternal, Maternal Weaning Weight EPD measures a sire's ability to transmit milk production and growth rate through his daughters. It predicts the weaning weight of a sire's daughters' calves. It is equal to his Milk EPD plus one-half his weaning weight EPD.
- CEM/MCE - Calving Ease Maternal is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
- MARB - Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)
- REA - Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

- FAT - Fat thickness EPD, expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement. (Angus, Red Angus and Simmental give ultrasound derived EPDs)
- CW/CWT - Carcass Weight EPD, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.
- \$B - Beef Value, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
- \$W - Weaned Calf Value, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves.
- TSI - Terminal Sire Index. It is the expected profit potential of terminal progeny. It incorporates growth and carcass EPDs.
- STAY - Stayability. A selection tool to improve overall cowherd efficiency through reducing replacement rate.
- HB - HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits.
- ME - Maintenance Energy - Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

Pre-Test Animal Data

- BW - Actual Birth Weight.
- WW - Actual Weaning Weight.
- 205 Wt - Weaning Weight Adjusted to 205 days.
- NR - Nursing Ratio, an index of the adjusted 205 day weight within the breeders herd only. It is an indication of the dam's maternal performance and the bull's preweaning growth.

CAB - Meets the EPD requirement of +0.54 for Marbling and +46.0 for Dollar Grid Carcass Index (\$G) to be considered Certified Angus Beef.

HD50K - A genotyping platform that replaces i50K, designed specifically for Angus breeders. Delivers GE-EPDs, indexes, parentage verification, & genomic percentile ranks.

AngusGS - Angus Genomic Selection. An advanced high density genomic testing option, designed specifically for Angus cattle including potential markers for future trait selection.

Dam of 434 is a beautiful Cowboy Up daughter, out of our prolific T515 Donor Cow. She is off to a great start, as she bred back and calved early on her 2nd calf. Low birth weight, proven cow family, in this pedigree.

This bull's dam had an almost 800 lb. adj. weaning weight. She is one of the consignor's best cows, and her calves grow fast. I expect that the new owner will really like this bull. A good option for heifers.

Selling 2/3 Interest and Full Possession

1106 is a great illustration of the power of heterosis. He had the highest ADG, 5.29lbs, of any bull in Group 1. ADG Ratio of 138, MBT Ratio of 116. Top 1% of the breed for FPI and MB. Is performance important to you?

Vista®. Easy on cattle, strong on productivity.

It's simple logic: A vaccine should move your cattle ahead. Not set 'em back with harsh side effects. That's why Vista® vaccines have earned such a strong reputation among leading cattlemen. With Vista, cattle reach their natural potential. Deliver maximum value. And keep moving forward.
