

PLANTRONICS PORTFOLIO

HEADSET RANGE

WHY USE A HEADSET?

Whether talking business on the telephone, interacting with a PC or chatting to friends via the internet, Plantronics headset solutions combine advanced technology and practical design to enable people to communicate more freely – whatever they are doing and wherever they are.

- **A better way to work:** Our headsets enable workers to be hands-free, to multi-task in comfort and our wireless headsets provide you with the extra advantage of being able to move around the office whilst continuing the call
- **Specialist support:** for contact centres, comfortable and durable headsets with the best sound, protection and technology are paramount for call clarity and ergonomic health and safety
- **Hands free on the move:** need to make a call whilst out and about? Using a Bluetooth headset means this can be done easily and in comfort, ensuring you are connected at all times
- **Make the most of multi-media:** whether listening to favourite tunes, or chatting over the internet, headsets provide better sound clarity – hear and be heard clearly
- **Virtual surround sound:** maximise the enjoyment of PC gaming with quality headsets that provide noise-cancelling and surround bass sound enabling ultimate player involvement and performance

WHY PLANTRONICS?

Plantronics invented the first lightweight headset more than 40 years ago, and almost immediately launched a revolution in personal communications.

From the beginning, when we were first specified for NASA's historic moon mission, we have defined what headset quality, comfort and reliability mean – setting the standards against which all others are measured. Today, we still make the most advanced headsets, using strong, flexible, but lightweight materials, along with the very latest refinements in acoustics, ergonomics and technology. Our innovative designs give you the freedom of hands-free convenience, and a crystal-clear conversation in any environment.

Personal communications are a vital part of all our lives. So whether you're at work, on the move, or at home, you can trust in the best.

MAKE THE RIGHT CHOICE

TCO'07 Headsets is a global labelling certification for headsets. It demonstrates that Plantronics products have passed independent research and testing across users, manufacturers, researchers and industry experts.

TCO approved headsets have fulfilled the following criteria:

✓ Ergonomics ✓ Emissions ✓ Ecology ✓ Energy

Plantronics has a 100% pass rate and more TCO certifications than any other headset manufacturer.

THE HEADSET SELECTION GUIDE

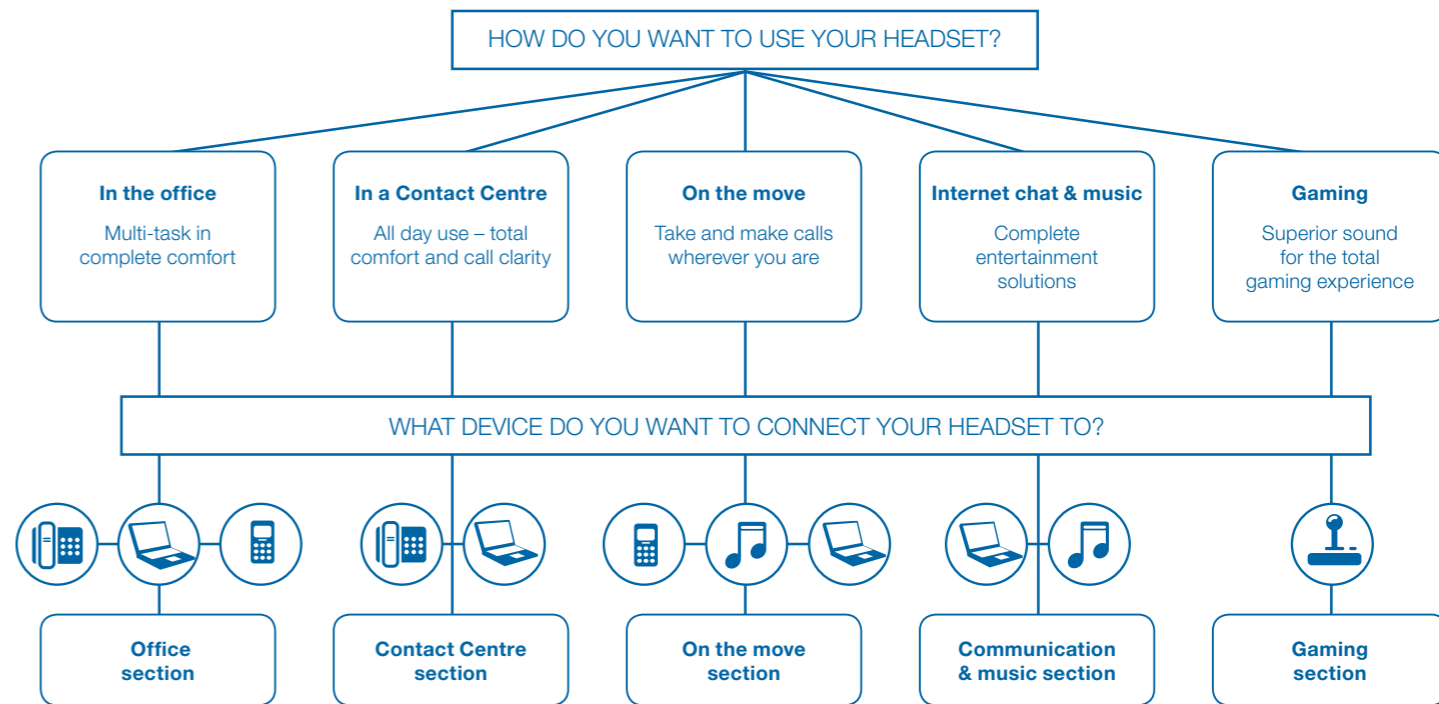

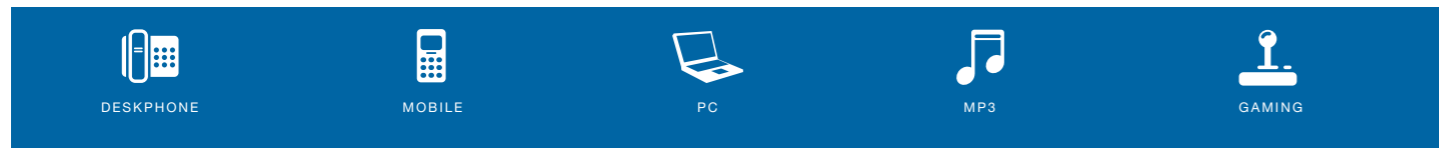

People communicate in increasingly diverse ways. So there are subtle as well as obvious differences in our headsets; allowing individuals and organisations the freedom and choice to work, talk, listen and play exactly as they want.

Plantronics has an extensive portfolio of headsets to fit every need. This page is designed to help find the right headset.

Use the flowchart opposite to:

- Identify how and where the headset is to be used
- Choose what device the headset is to connect to – mobile, desk phone, PC or laptop
- Use the icons as a reference and then turn to the appropriate section

COMPATIBILITY KEY:

A BETTER WAY TO WORK

With Plantronics office headsets that connect to your desk phone, laptop and mobile you can find a better more comfortable way to work.

Using a headset for conversations means you are no longer restricted by a handset – enabling you to multi-task more easily. Continue typing whilst talking and be free to reach for a document without interrupting your call.

With our wireless models you experience even more freedom. With up to 100 metre range and noise-cancelling technology you can stay connected as you move around the office to confer with colleagues or to find some privacy for that important call.

PLANTRONICS CS70N™

Stylish & discreet wireless office headset, with great comfort

The Plantronics CS70N allows you to multi-task more easily – whether you're using your PC whilst on a teleconference, finding some private/quiet space for that important call, or simply stretching your legs whilst on a long teleconference. Stylish and discreet, with excellent sound quality and wireless range, it's the perfect combination.

Key features:

- A more efficient way to work – a better way for busy executives and managers to multi-task easily
- You'll hardly notice you're wearing it – light, comfortable and incredibly discreet
- Freedom to move – 50 metres range in a typical office means you no longer need to be tied to your desk when on the phone
- Excellent sound quality – DECT™ wireless technology combined with a noise-cancelling microphone ensures you can hear and be heard clearly

Accessories

Recommended:

- Electronic Hookswitch (APS-1, APA-2, APT-3, APC-4, APP-5), HL10 – to answer/end calls when away from your desk (phone manufacturer dependent)

Optional:

- OLI (on phone visual indicator)

PLANTRONICS VOYAGER™ 510 USB

Ultimate headset solution for mobile phone and PC

IP telephony offers a massive opportunity to cut communication costs, as well as providing increasingly sophisticated functionality. Using your PC to talk and collaborate will soon be as normal as using it to type.

The Plantronics Voyager 510 USB has a plug-and-play USB voice adapter and multipoint technology, so you can switch seamlessly between your PC and mobile phone. A noise-cancelling microphone and WindSmart™ ensures excellent sound quality.

Key features:

- **Easy to set up** – no need to load any Bluetooth drivers. PerSonoCall™ software provides greatly enhanced usability
- **Simple VoIP solution** – call notification and call answer/end from the headset with most major softphones
- **Always available** – when the six-hour talktime is exhausted, a compact USB travel charger ensures you can charge anytime, any place
- **Covers all your needs** – seamlessly share this Bluetooth headset between a mobile phone and a PC/laptop

OFFICE: TECHNOLOGY

Great technology makes for great sound

Microphone technology

Noise-cancelling (CS70N, CS60, SupraPlus, S12, CS60 USB, SupraPlus Wideband & Stereo, SupraPlus Wideband USB, Voyager 510 USB, Voyager 510 System, T10, C65)

Plantronics noise-cancelling microphones reduce the background noise and so enhance the accuracy of the sounds being transmitted. They are ideal for noisy environments.

WindSmart™ (Voyager 510 USB, Voyager 510 System)

Plantronics WindSmart technology uses a specially designed material over the microphone to diffuse wind noise, so that even in windy environments – such as the car with the air-conditioning running, or on the street – you can enjoy crisp, clear conversations. It is combined with noise-cancelling microphones to offer the best possible audio in any environment.

Enhanced usability

Multipoint (Voyager 510 USB, Voyager 510 System)

Most wireless devices use point-to-point, which means they can only be connected to one device at a time – for example a mobile phone and a Bluetooth headset might be connected through point-to-point. Or a PDA device might be paired with a computer. When a headset has Multipoint capability it can receive information from more than one device at the same time. So, for example – with the Plantronics Voyager™ 510 USB you can answer and make calls from either your PC Softphone or your mobile handset (Mobile device must be Bluetooth enabled).

PerSonoCall™ (CS60 USB, Voyager 510 USB, DA45)

PerSonoCall is a small software application that provides integration between most popular softphone applications and CS60 USB/ Voyager 510 USB. It provides hookswitch control and ringer alert between the softphone application and the wireless headset, allowing PC calls to be answered wirelessly from the headset or direct from the headset on the DA45.

Quick Call (SupraPlus, SupraPlus Wideband & Stereo)

Quick Call allows a user to quickly answer a call without the need to place the headset onto the head.

Quick Disconnect (SupraPlus, SupraPlus Wideband & Stereo)

Quick Disconnect cable enables the caller to be placed on hold whilst allowing users to leave their desk without removing the headset.

Other technologies

Bluetooth® (Voyager 510 USB, Voyager 510 System)

Bluetooth wireless technology provides a way for devices to communicate with each other using short-range radio frequency instead of wires. Any two Bluetooth devices can communicate as long as they both have Bluetooth turned on, they are within range, and they have been paired – a quick “handshake” that connects the two devices. Bluetooth range is up to 10m. Obstructions, such as walls or other electronic devices, can cause interference or shorten the effective range. For optimal performance, place your headset and phone on the same side of your body.

DECT™ (CS70N, CS60, CS60 USB, C65)

DECT (Digital Enhanced Cordless Telecommunications) is a wireless radio access technology for cordless telephones, wireless offices and even wireless telephone lines to the home. DECT has been designed and specified to work with other types of network including PSTN, ISDN and GSM. It is a trademark of ETSI (European Telecommunications Standards Institute).

VoIP (CS60 USB, Voyager 510 USB, SupraPlus Wideband)

VoIP (Voice over Internet Protocol) is the transmission of voice over IP-based networks (data networks). VoIP offers many advantages over normal telephony including enhanced features, lower cost and greater integration.

Wideband (SupraPlus Wideband, Stereo & USB)

Wideband audio gives richer communication with natural sound and enhanced audio clarity when used with wideband enabled IP hardphones and softphone systems.

BEST IN CLASS

Plantronics has been developing Contact Centre headset solutions for more than 40 years. We understand that workers who use the phone as their main work tool need to hear and be heard clearly to ensure maximum productivity and customer satisfaction. Our solutions are designed for comfort and built to last.

You can choose your headset from the widest portfolio in the business. Changeable hygienic voice tubes or noise-cancelling microphones, the latest sound protection technology of our audio processing units or the ultimate wireless systems to enable team supervision and flexible assistance on the move – all backed by our industry leading warranty and customer support.

PLANTRONICS SUPRAPLUS® WIRELESS

Total wireless freedom and all-day comfort

Wireless headsets improve customer satisfaction, training processes and productivity by allowing supervisors and agents to move freely and stay connected, resulting in clearly improved metrics. That's the promise of the Plantronics SupraPlus Wireless, the first wireless headset specifically designed for Contact Centres.

Key features:

- **Excellent sound quality** – with unrivalled noise-cancelling microphone
- **Freedom to roam** – you can move up to 100 metres from your desk without missing a call
- **Choice of wearing styles** – available in monaural and binaural versions
- **Multi-tasking made easy** – simultaneously write or type notes, access papers, or even just relax and enjoy your coffee, whilst talking business
- **One system, many users** – with QuickPair™, hot-desk or shift workers can keep their own personal headset and use it at any desk where there is a base

PLANTRONICS ENCOREPRO™

Designed for performance – built to last

The Plantronics EncorePro takes a different approach to headset design. Every component has been designed and produced with one aim – the best performance. The microphone is designed to sit in exactly the right place for optimum audio clarity, and the low slung design ensures it can not be seen by the wearer. The slim speaker has a wideband frequency response for clearer and more intelligible conversations. We've made no compromise on reliability, durability, comfort or audio quality – EncorePro, designed for performance, built to last.

Key features:

- **Enhanced noise-cancelling, and wideband audio** – give you clearer conversations with your customers enabling you to offer a better service
- **Distinctive and unique design** – provide high performance and a stylish look
- **Slim and discreet construction** – ensures comfort and allows you to fully focus on the customer
- **VoIP ready** – through the use of enhanced echo control and wideband audio, allows you to preserve your investment through future phone system upgrades
- **Seven axes of adjustability** – ensure you can wear the headset in the most comfortable and effective position
- **Plantronics heritage in reliability and durability** – continues with the EncorePro ensuring the agent is always available

PLANTRONICS SUPRAPLUS® HARD OF HEARING

All the features of SupraPlus with added compatibility with hearing aids

The SupraPlus Plantronics Hard of Hearing series offers all the benefits of the standard SupraPlus: comfort, reliability and durability, and adds in compatibility with hearing aids set to the 'T' position. The receive volume levels are the same as a standard SupraPlus, and the same reliable acoustic shock protection is fitted. The SupraPlus hard of hearing series has been designed to comply with European standards for telephony and hearing aids.

Key features:

- Compatible with hearing aids – set to the T position
- Complies with ETS 300 381 – (inductive coupling of telephone earphones to hearing aids)
- Monaural or binaural – make your choice dependant on your preferences
- Single cable binaural – for complete comfort and convenience

PLANTRONICS VISTAPLUS™ DIGITAL AUDIO PROCESSOR

Premium acoustic protection

The Plantronics VistaPlus DM15 audio processor uses Digital Signal Processing (DSP) to deliver unsurpassed acoustic protection and sound quality. SoundGuard® DIGITAL™ technology reduces sudden, loud sounds and monitors and controls daily personal noise exposure to maximise comfort and safety – helping businesses comply with the latest EU noise at work legislation.

Key features:

- **Protection against sudden sounds** – removes sudden unwanted noises such as fax or DTMF tones, and feedback
- **Keeps headset sound exposure level** – to below legislative limits (85 or 80dB)
- **Maintains volume** – at the user chosen level regardless of incoming call volume
- **Digital Signal Processing (DSP)** – frequency response shaping maximises speech intelligibility whilst phone line noise is reduced

Enhancements:

- SupraPlus digital headset
- EncorePro headset

Optional accessories:

- Agent training cable

PLANTRONICS VISTA™ AUDIO PROCESSOR

Enhanced intelligibility through superior audio performance

Plantronics Vista audio processors offer a superior audio performance compared to direct connect headsets. They maintain volume at a user selectable level, and reduce line noise levels. All these features add up to great sound quality that helps your agents hear the customer more clearly and be heard more clearly themselves. The MX10 offers the flexibility of connection to both your telephone and your PC based UC application simultaneously.

Key features:

- **Maintains volume** – at the user chosen level regardless of incoming call volume
- **Outbound noise reduction** – enhances the performance of all PLT headsets to reduce the background noise a caller hears
- **Incoming noise reduction** – lowers incoming noise to enhance the agents listening comfort
- **Connection to two audio channels simultaneously** – switch between, or mix together audio from your PC based UC application and your desk telephone (MX10 only)

Enhancements:

- EncorePro headset
- SupraPlus headset

Optional accessories:

- Agent training cable
- AC adapter UK
- AC adapter EURO

PLANTRONICS DIGITAL BUNDLE

Enhanced intelligibility and premium acoustic protection

The combination of Plantronics VistaPlus® and Plantronics SupraPlus DIGITAL offers the best of both worlds for Contact Centres. The VistaPlus adapts its characteristics to match each SupraPlus Digital headset ensuring enhanced intelligibility for agents which allows them to hear customers more clearly and be more productive. The matched characteristics also enhance the acoustic protection offered to the agent making the digital bundle the premium solution for Contact Centres who do not want to compromise on audio quality and acoustic protection.

Key features:

- Digital Signal Processing (DSP) – frequency response shaping maximises speech intelligibility
- Protection against sudden sounds – removes sudden unwanted noises such as fax or DTMF tones, and feedback
- Keeps headset sound exposure level – to below legislative limits (85 or 80dB)
- Maintains volume – at the user chosen level regardless of incoming call volume

PLANTRONICS DA55 USB AUDIO PROCESSOR

Enhanced intelligibility and audio performance on IP softphones

Plantronics DA55 USB audio processors offer a superior audio performance for IP softphones. They maintain volume at a user selectable level, reduce line noise levels and remove echo. All these features add up to great sound quality that helps your agents hear the customer more clearly and be heard more clearly themselves. To ensure your upgrade to IP softphones goes smoothly, the DA55 support both Plantronics H and P type of headsets, allowing you to maintain your investment in Plantronics high quality headsets.

Key features:

- **Maintains volume** – at the user chosen level regardless of incoming call volume
- **Outbound noise reduction** – enhances the performance of all PLT headsets to reduce the background noise a caller hears
- **Incoming noise reduction** – lowers incoming noise to enhance the agents listening comfort
- **Echo suppression** – for improved VoIP call quality

CONTACT CENTRE: TECHNOLOGY

Great technology for improved performance

Microphone technology

Noise-cancelling (EncorePro, SupraPlus, DuoPro, TriStar, Supra, DuoSet, SupraPlus Wireless)

Plantronics noise-cancelling microphones reduce the background noise and so enhance the accuracy of the sounds being transmitted. They are ideal for noisy environments.

Enhanced usability

QuickPair (SupraPlus Wireless)

The QuickPair feature allows different wireless headsets to be quickly and easily paired to a single base using a simple button press. This feature is ideal in multi-shift or hot desking environments where users share a base, but not a headset.

Call Clarity™ (Vista M12/MX10)

Call Clarity enhances transmit and receive quality so that the phone user doesn't have to adjust the volume to compensate for the differences on the incoming call volumes.

Call Clarity DIGITAL™ (VistaPlus)

Call Clarity DIGITAL uses digital signal processing to enhance, transmit and receive quality so that the phone user doesn't have to adjust the volume to compensate for the differences on the incoming call volumes.

SoundGuard® DIGITAL™ (VistaPlus)

SoundGuard DIGITAL offers two types of protection to combat the effects of short-term acoustic incidents and long-term daily personal noise exposure helping customers comply with the Noise at Work legislation.

Quick Disconnect (Vista M12, EncorePro, SupraPlus, DuoPro, Mirage, TriStar, Supra, DuoSet, DA Series)

Quick Disconnect cable enables the caller to be placed on hold whilst allowing users to leave their desk without removing the headset.

Other technology

DECT™ (SupraPlus Wireless)

DECT (Digital Enhanced Cordless Telecommunications) is a wireless radio access technology for cordless telephones, wireless offices and even wireless telephone lines to the home. DECT has been designed and specified to work with other types of network including PSTN, ISDN and GSM. It is a trademark of ETSI (European Telecommunications Standards Institute).

Digital Signal Processing (DSP technology)
(VistaPlus, DA Series)

Digital Signal Processing is a sound treatment technology which delivers up to 35% reduction in background noise, whilst maintaining crisp, clear voice transmission.

If you are planning to use your Audio headset for chatting over the Internet, or for games which rely on voice recognition, it is well worth looking for a DSP model – especially so, if you live in a lively household where there is a lot of background noise.

HANDS FREE ON THE MOVE

Today we work and live in increasingly different ways and use various devices to stay in touch whilst on the move. Whether you are in the car, at the airport or out and about – Plantronics range of stylish Bluetooth headsets offer you solutions to communicate with all your mobile devices – mobile phone, PC or PDA – and enable you to do this hands free!

For optimum call clarity our headsets include noise-cancelling technology that decreases background noise – so wherever you take your calls, our headsets will ensure you can hear and be heard more clearly.

Keep on the move with Plantronics.

MULTIPLE DEVICES

PLANTRONICS DISCOVERY™ 650

One headset for multiple Bluetooth® devices

The Plantronics Discovery 650 is the ideal headset. It can be simultaneously paired with two mobile phones – one personal, one work phone, for example.

Weighing just 9 grams, it incorporates the legendary Plantronics sound quality and features ranging from a headset pocket with call alert and auto answer, to a AAA battery charger that extends standby time to a massive 168 hours.

Key features:

- **Multipoint connectivity** – allows the user to have two active Bluetooth audio devices connected at any one time
- **Easy and convenient features** – automatic call-answer, vibrating pocket on incoming calls and battery level indicator at power-on
- **Comfortable to wear** – you'll barely notice you're wearing it, it is so comfortable, flexible and stable
- **QuickPair™** – fast and easy out of the box pairing process

What's in the box:

- Headset
- AC charger
- AAA charger
- Ear tip kit
- Optional ear loop
- Charging pocket

ON THE MOVE: TECHNOLOGY

Great technology makes for great sound

Microphone technology

Noise-cancelling microphones (Voyager 510, Voyager 520)

Plantronics noise-cancelling microphones reduce the background noise and so enhance the accuracy of the sounds being transmitted. They are ideal for noisy environments.

WindSmart® (Voyager 510)

Plantronics patent-pending WindSmart technology uses a specially designed material over the microphone to diffuse wind noise, so that even in windy environments – such as the car or the street – users can enjoy crisp, clear conversations.

AudioIQ™: (Discovery 925, Discovery 665, Voyager 855)

AudioIQ™ is a Digital Signal Processing (DSP) technology that is exclusive to Plantronics building on Plantronics' history of innovation and technology leadership. It reduces background noise by adapting the volume of what you are hearing accordingly to the sound environment you are in. So, if it's noisy, it increases the volume. If it's quiet it sets the volume accordingly.

AudioIQ also improves call-quality by cleaning up degraded far-end call quality.

To experience AudioIQ go to www.plantronics.com/AudioIQ

Enhanced usability

AcuSpeak™ (Pulsar 260)

Corded headsets featuring AcuSpeak technology are ideal for people who work in noisy environments, because the intelligent microphone selects only the human voice, cutting other sounds out of your transmission.

Audio Line Out (Pulsar 260)

Stream music from your Bluetooth stereo phone to your powered speakers for public listening.

Multipoint (Discovery 925, Discovery 650, Voyager 520, Voyager 510)

Most wireless devices use point-to-point, which means they can only be connected to one device at a time – for example a mobile phone and a Bluetooth headset might be connected through point-to-point. Or a PDA device might be paired with a computer. When a headset has Multipoint capability it can receive information from more than one device at the same time.

QuickPair (Discovery 925, Discovery 650, Discovery 665, Explorer 220A, Explorer 230, Explorer 370, Voyager 520, Voyager 855)

The QuickPair feature allows the headset to pair easily too another Bluetooth device.

Sidetone (Discovery 665, Voyager 855)

Sidetone technology gives natural feedback so that what you hear is exactly the same as what the person you are calling hears – this is especially valuable if there is background noise, as it acts as a warning that the person you are calling may not be able to hear you clearly.

Other technology

Bluetooth®

Bluetooth wireless technology provides a way for devices to communicate with each other using short-range radio frequency instead of wires. Any two Bluetooth devices can communicate as long as they both have Bluetooth turned on, they are within range, and they have been paired – a quick “handshake” that connects the two devices. Bluetooth range is up to 10m. Obstructions, such as walls or other electronic devices, can cause interference or shorten the effective range. For optimal performance, place your headset and phone on the same side of your body.

ULTIMATE ENTERTAINMENT

A Plantronics headset is the perfect accessory for your multimedia PC or laptop. With the growth in popularity of Internet chat and the increasing use of the PC/laptop as a total entertainment centre for music and DVD; a high quality headset will enhance your whole sound experience.

Plantronics .Audio headsets combine fantastic audio quality and superior comfort with a range of models; including wireless for total freedom and portability, binaural (2 ear pad) for total sound immersion or monaural if you want to keep one ear open.

Let Plantronics entertain you!

PLANTRONICS .AUDIO™ 310

Monaural headset with exceptional voice precision

The Plantronics .Audio 310 conveys exceptional voice precision in a monaural design that keeps you tuned to your surroundings. Experience speech-based applications such as internet telephony in crisp audio clarity.

A superior noise-cancelling microphone enhances speech accuracy. It's easy to set up and install – just plug it in and start communicating.

Key features:

- **Monaural** – wear it on left or right side, for total comfort and to keep in touch with other sounds
- **Noise-cancelling microphone** – reduces background noise and ensures crystal clear audio quality
- **Easy to connect** – no software or drivers, simply plug in the 3.5mm jacks
- **Adjustable boom** – enables you to easily move the microphone to the ideal position

PLANTRONICS .AUDIO™ 400 DSP

Digitally-enhanced USB, stereo PC headset

Excellent stereo sound in a lightweight and comfortable headset. The Plantronics .Audio 400 DSP with noise-cancelling microphone is great for speech recognition, internet telephony, and video conferencing.

Digital Signal Processing (DSP) delivers up to 35% reduction in background noise and maintains crisp, clear voice transmission.

Key features:

- **Monaural** – wear it on left or right side, for total comfort and to keep in touch with other sounds
- **Noise-cancelling microphone** – reduces background noise and ensures crystal clear audio quality
- **Easy to connect** – no software or drivers, simply plug in the 3.5mm jacks
- **Adjustable boom** – enables you to easily move the microphone to the ideal position
- **Vista compliant**

Product specifications

PLANTRONICS .AUDIO™ 440

The ultimate headset for multimedia on the go

The Plantronics .Audio 440 comes with full range stereo ear-buds and WindSmart™ omni-directional microphone, ensuring superb audio quality in all conditions.

The unique FlexGrip® design guarantees extreme comfort and a secure fit. The adjustable inline volume and mute control gives you total control when listening and speaking. The headset can be easily stored when on the move, making this an outstanding all-purpose headset.

Key features:

- **Perfect fit and stability** – feather-light ear-buds and FlexGrip design
- **Noise-cancelling microphone** – combines with WindSmart technology to ensure you are heard even in noisy environments
- **Intense audio experience** – full-range stereo for rich, full sound
- **Convenient controls** – inline volume and mute controls give you full control over your listening and speaking experience

MULTIPLE DEVICES

TRAVEL

Plantronics .Audio 920

INTERNET CHAT AND MUSIC: TECHNOLOGY

Great technology makes for great sound

Microphone technology

Noise-cancelling microphones

(.Audio 310, .Audio 325, .Audio 345, .Audio 625 USB, .Audio 645 USB, .Audio 650 USB, .Audio 355, .Audio 470 USB, .Audio 400 DSP, .Audio 480 USB, .Audio 920)

Plantronics noise-cancelling microphones reduce the background noise and so enhance the accuracy of the sounds being transmitted. They are ideal for noisy environments.

WindSmart (.Audio 440, .Audio 480 USB)

Plantronics patent-pending WindSmart technology uses a specially designed material over the microphone to diffuse wind noise, so that even in windy environments – such as the car or the street – users can enjoy crisp, clear conversations.

Enhanced usability

Multipoint (.Audio 920)

Most wireless devices use point-to-point, which means they can only be connected to one device at a time – for example a mobile phone and a Bluetooth headset might be connected through point-to-point. Or a PDA device might be paired with a computer. When a headset has Multipoint capability it can receive information from more than one device at the same time.

QuickAdjust (.Audio 310, .Audio 625 USB, .Audio 650 USB, .Audio 470 USB, .Audio 400 DSP)

Enables ideal microphone boom placement.

Other technology

Bluetooth® (.Audio 920)

Bluetooth wireless technology provides a way for devices to communicate with each other using short-range radio frequency instead of wires. Any two Bluetooth devices can communicate as long as they both have Bluetooth turned on, they are within range, and they have been paired – a quick “handshake” that connects the two devices. Bluetooth range is up to 10m. Obstructions, such as walls or other electronic devices, can cause interference or shorten the effective range. For optimal performance, place your headset and phone on the same side of your body.

Digital Signal Processing (DSP technology) (.Audio 400 DSP)

Digital Signal Processing is a technology which delivers up to 35% reduction in background noise, whilst maintaining crisp, clear voice transmission.

If you are planning to use your .Audio headset for chatting over the Internet, or for games which rely on voice recognition, it is well worth looking for a DSP model – especially so, if you live in a lively household where there is a lot of background noise.

PLAYING THE GAME

For the online gamer, a headset with superior audio clarity, and voice transmission is an absolute must. The Plantronics GameCom headset styles include surround sound technology and closed and open-ear designs for interaction inside and outside of the game.

There is a solution for everyone and features include 40mm speakers with soft, swivel mounted ear cushions, noise-cancelling microphone and virtual surround sound.

Bring your games to life with Plantronics.

PLANTRONICS GAMECOM® 367

'Closed-ear' gaming headset – full on multi-player gaming

The 'closed-ear' GameCom 367 gaming headset delivers an immersive audio experience with 40mm stereo speakers and ear pods that redistribute pressure for maximum comfort. When you're ready to fire off orders, unveil the hidden, noise-cancelling mic boom to strategise clearly with team members. Responses coming in? Adjust audio levels using inline volume and mic-mute controls.

Key features:

- **Rich stereo sound** – 40mm speakers give rich sound and resonant bass
- **Noise-cancelling microphone** – reduces background noise and ensures crystal clear audio quality
- **Concealed Microphone Boom** – stows completely into the headband when not in use – ideal when listening to music or watching DVD
- **Convenient controls** – inline volume and mute controls give you full control over your listening and speaking experience
- **The microphone boom adjusts** – ideal for placement for improved communications
- **Specially designed ear pods** – redistribute pressure for maximum comfort for the longest gaming sessions
- **Extremely comfortable** – soft foam ear pads with a sport fabric cover

GAMING: TECHNOLOGY

Great technology makes for great sound

Microphone technology

Noise-cancelling microphones

(GameCom 367, GameCom 377 and GameCom 777)

Plantronics noise-cancelling microphones reduce the background noise and so enhance the accuracy of the sounds being transmitted. They are ideal for noisy environments.

Enhanced usability

QuickAdjust

(GameCom 367, Gamecom 377 and GameCom 777)

Enables ideal microphone boom placement.

Plantronics partnership with key sound technology provider – Dolby®

Why does the Plantronics GameCom® 777 now include Dolby® technology?

- Research has shown that one of the main requirements from gamers is the inclusion of Surround Sound 5.1 on any PC Gaming headsets to ensure a realistic sound experience.
- The Plantronics GameCom 777 is the first Plantronics headset combined with Dolby Surround sound – for total immersion and pure gaming enjoyment.
- Dolby® Headphone technology creates a realistic surround sound experience for any PC game. Listeners experience every smash and explosion as if they're really happening. Adding another dimension to the playing environment, Dolby Headphone technology gives gamers a competitive advantage – making it easier to pinpoint enemies and obstacles that aren't onscreen.

The Dolby technology explained

Dolby® Pro Logic II

- Transforms high-quality stereo content into a natural and realistic surround sound listening experience.
- Enhances your listening experience without sounding processed or artificial.
- Applies Dolby expertise in matrix surround sound technology to produce a natural listening experience.
- Music mode offers three adjustable features:
 - Panorama mode** creates a seamless, wraparound surround effect.
 - Center width control** modifies the breadth of the main vocals in the centre and front speakers.
 - Dimension control** modifies the depth of the surround sound experience.

Dolby headphone technology

- Enables enjoyment of personal surround sound without disturbing others.
- Improves listening comfort and reduces “listener fatigue.”
- Allows stereo content to be heard as 5.1-channel surround (when combined with Dolby Pro Logic II).
