

Card Solutions

DocuCard

A highly durable synthetic card - the premium solution. Can be produced with a WindoWell for digital printing on card reverse. Xerox qualified 120gsm base sheet and a 178 micron synthetic card. The card itself is designed to be waterproof, tear-proof and durable making it suitable for membership cards, identification cards and loyalty cards where durability and professional looking images are a factor.

All solutions are available in customised configurations that can be supplied to you pre-printed on the face and reverse of both the card and carrier sheet.

Use your laser printer to add variable data. Alternatively select from the stocked blank options and create your applications in house.

Part Number	Format	Cards/Sheet	Colour	Surface Finishing	Thickness	Items/Unit	List Price
003R97246	A4	1	White	Uncoated	178 µm	100	£ 32.95
