TONER, DRUMS AND WASTE TONER

About MicroSpareparts

MicroSpareParts offers a wide assortment of low-cost quality spare parts and a large selection of cost-competitive supplies in high quality.

From conception to end result, all MicroSpareparts products go through a series of comprehensive tests, as well as an ongoing evaluation for each step of the development process. In this way, we ensure that our MicroSpareparts customers get thoroughly tested products of high quality, with the same high standard as the equivalent OEM products.

As an integrated part of the research & development process, we select the most suited raw materials, and we run all test programs using only real printers and copiers. We test MicroSpareparts products under normal temperature conditions as well as in climatic chambers under extreme temperatures and changing humidity.

As a manufacturer, we invest many resources in the research & development of MicroSpareparts products. This means i.a. that we can frequently introduce new products to the market. It also means that our customers can benefit from knowledge and support from our technical team and sales specialists, providing them with effective and immediate support.

MicroSpareparts is the right choice when price is important and quality is a top priority.
