## **1.0 Introduction to Omnixx Force**

Welcome to the new Omnixx<sup>®1</sup> Force client! Demands in the new world of law enforcement, criminal justice and public safety require instant access to state, local and national information. Instant access to critical information is essential for a rapid, effective response.

Datamaxx solutions operate on a variety of hardware and platforms, and are designed specifically to meet the mission-critical needs of criminal justice professionals. Users can access, query, and collect data – all within a secured environment – using Omnixx Force, a solution that complies with current FBI CJIS security and encryption standards. And best of all, Omnixx Force works on any device!

Data Sources accessible from Omnixx Force include:

- The National Crime Information Center (NCIC)
- The International Justice and Public Safety Network (Nlets)
- State and Local Hot Files
- Wanted Persons
- Missing Persons
- Stolen Vehicles
- Stolen Articles
- Stolen & Recovered Guns
- Stolen Boats
- Driver's Licenses
- Vehicle Registrations
- Corrections
- Jail Management Systems
- Probation and Parole
- Juvenile Justice
- Courts
- Clerk of Courts
- Prosecutors and Public Defenders
- And more ...

<sup>&</sup>lt;sup>1</sup> "Omnixx" is a registered trademark of Datamaxx Technologies, Inc. All rights reserved.

### 1.1 Omnixx Force Features

Omnixx Force is HTML5-based and can run on Windows, iOS, and Android devices using a modern browser that supports the HTML5 standard. Omnixx Force is a zero-footprint Java-free application that provides access to law enforcement networks and databases such as Nlets, FBI NCIC, and state data sources. It also has automatic updates and is supported 24x7, 365 days a year. Omnixx Force allows end-users to send and receive transactions over dedicated law enforcement networks and is the most robust CJIS full-functioning client available. Due to its mission critical information, Omnixx Force provides a high level of dependability without extensive maintenance.

While it is possible to run Omnixx Force on several different platforms, the scope of this manual will focus solely on the Windows<sup>®</sup> operating system.

## 1.2 Opening Omnixx Force

To start the Omnixx Force application, you must first access the Omnixx Force Login screen. In order to do this, open your web browser located on your device and type the URL (web address) into the browser's Address bar. If you do not have the URL, contact your system administrator.

Figure 1.2.1 Omnixx Force Log In Screen

On the Omnixx Force Login screen, the user is prompted to enter his/her User ID and the device identifier. After all the information is entered correctly, select the **Next** button to begin the logon process.

**Note:** Omnixx terminates *automatically* if the user's unsuccessful login attempts exceed the number of login attempts specified by the system administrator.

Selecting the **Next** button displays the Omnixx Force Log In Security screen. The security credentials were previously defined in your Security Profile and saved in the Omnixx system database during your initial login to Omnixx.

#### Logon Accepted

Once you have entered the information correctly, selecting the **Log In** button displays the Logon Accepted message. This message *automatically* fades from the Omnixx Force User Interface without user intervention.

The Omnixx Force User Interface is displayed upon proper logon providing transaction forms the user is authorized to access, transaction counts, Profile information, user certifications, system notices and alerts, and the version number of the Omnixx Force software you are currently running. Your menu options may vary depending on your access authorization.

## **Getting Familiar with the Omnixx** 2.0 **Force User Interface**

There are several elements of the Omnixx Force User Interface that you should be familiar with before using Omnixx Force. These elements include Title bar, Tabs, Side Menu, Display Area, Command Line, and Status bar. The following chapter describes all six (6) of these components and their functions.

#### 2.1 Elements of the Omnixx Force User Interface

The Elements of the Omnixx Force User Interface are shown in the figure below. These elements are listed and described in the subsections below.

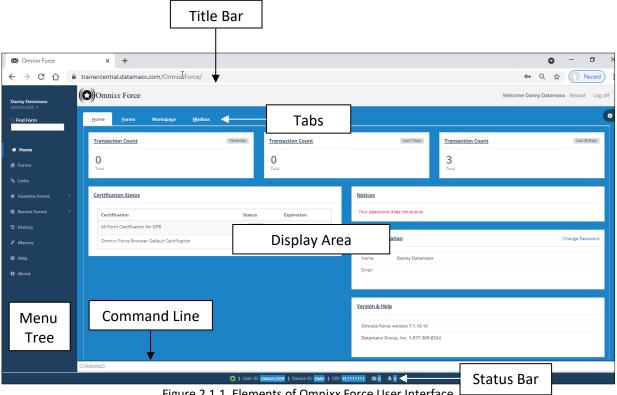

Figure 2.1.1 Elements of Omnixx Force User Interface

#### 2.1.1 **Title Bar**

The Omnixx Force User Interface has the application **Title** at the top center of the screen.

Omnixx Force

Figure 2.1.1.1 Omnixx Force Title Bar

Welcome Danny Datamaxx Reload Log off

### 2.1.2 Tabs

The Omnixx Force **Tabs**, located under the Title bar, consists of four (4) items: *Home, Forms, Workspace*, and *Mailbox*. Each item is discussed in the following subsections.

#### 2.1.2.1 Home

Omnixx Force Home screen is the first screen on the User Interface. It displays the user's name and certifications, user profile, and the version of Omnixx Force currently running.

Omnixx Force also provides the user with the transaction forms he/she is authorized to access, transaction counts, system notices and alerts.

Figure 2.1.2.3.3 Multiple Forms Opened in Workspace

The remainder of this section provides an overview of the features when working with transaction forms in the Workspace tab.

Note: Workspaces are not available on mobile devices.

As described above, when you turn ON the "Use Workspace" option, transaction forms will be opened in the workspace tab instead of individual tabs.

• Turning the "Use Workspace" option ON or OFF requires a user to re-logon, since this option is rendered when the application starts up. Users will receive the following prompt, and will then be taken to the logon screen.

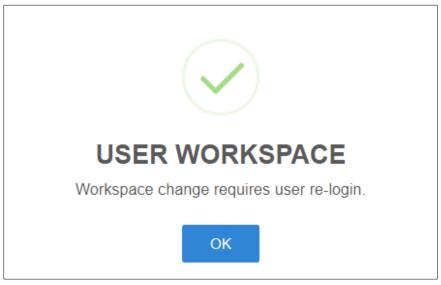

Figure 2.1.2.3.4 User Workspace Re-Login Message

• Upon logon, you will see the "Workspace" tab, and it will be populated with the transaction forms from the last active workspace.

• **Workspace Selection List** – This will contain a list of Workspaces you have previously saved. You may select one from the list for the transaction forms saved in that workspace to display.

Figure 2.1.2.3.1.2 Workspaces Selection List

#### <u>Notes</u>:

- You will be prompted to save your current workspace before switching to the one you selected.
- Each user may have a maximum of 5 workspaces.
- Workspaces must contain at least one transaction form in order to be saved.

<u>Add Workspace</u> – Select the Add button to *add* a new workspace. You will be prompted to enter a name for the new workspace. Enter the name for the workspace and then select the Add button. A new empty workspace is created with the name you entered. Open at least one transaction form before saving the workspace.

ADD WORKSPACE	×
Enter New Workspace Name:	
After adding, please add at least one form before saving.	
Cancel Add	

Figure 2.1.2.3.1.3 Add Workspace Dialog Box

 <u>Delete Workspace</u> – Select the Delete button to *remove* a previously saved workspace. When selected, a prompt will be displayed containing a list of workspaces eligible for deletion. Note that you cannot delete a currently active workspace, so it will not be in the list. Make a selection from the list, and then select the Delete button to permanently *delete* the workspace.

DELETE WORKSPACE
Select the Workspace to Delete: DMAX1 Workspace V
You cannot delete the current workspace, so it is not in the list above.
Cancel Delete

Figure 2.1.2.3.1.4 Delete Workspace Confirmation Dialog Box

• <u>Save Workspace</u> – Position the transaction forms in the workspace and then select the **Save** button. This will *save* the position of the forms in the workspaces along with any values you have already entered. It will also mark the current workspace as the last active workspace, and it will be restored the next time the user logon. Users can also save a workspace with no currently open forms. *Users can save up to 10 Workspaces.* 

- <u>**Close All Forms**</u> This function closes all forms currently open in your workspace.
- <u>Workspace Forms Bar</u> This bar contains a list of forms currently displayed in the workspace. Each item in the Forms bar represents an open transaction form. You can select the item to minimize/restore each form.
- **Minimize All** Select this button to minimize all transaction forms in the workspace.

#### 2.1.2.3.2 Workspace Window

Transaction forms are displayed as child windows within the Workspace tab. You can use the buttons on the Forms title bar to control the window.

Figure 2.1.2.4.1.2 Filtered Messages

#### 2.1.2.4.2 Sent Messages

The user's Mailbox (Sent) displays transaction messages *sent* through the Omnixx Force message switch. The Sent tab shows <u>all</u> responses for each Sent Message and provides a Source filter for each message source.

The Sent message functionality also allows ordered printing of responses – helpful in some states where Criminal History responses are received across multiple responses, not necessarily in order (e.g. Page 3 is received before Page2).

x filter (4:59:13
14:59:13

#### Show Sources

The Hide Sources button removes the sources from the Message Display area.

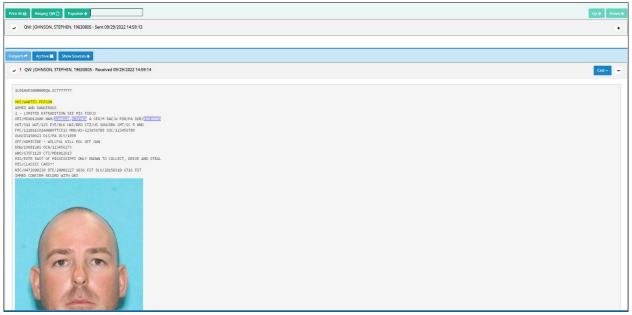

Figure 2.1.2.4.2.2 Message Display

Selecting the **Show Sources** button displays the sources of the *sent* messages. Users can select a Source to filter the responses to show only those responses from the selected Source.

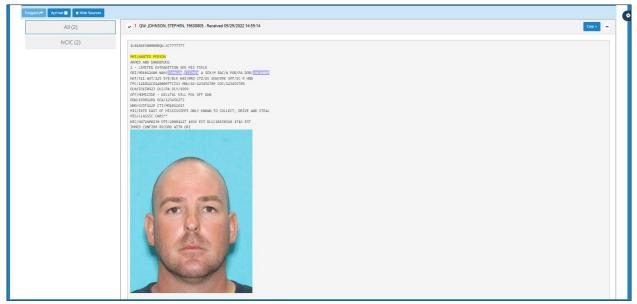

Figure 2.1.2.4.2.3 Show Sources

#### Hide Sources

The Hide Sources button removes the source (switch) from the Message Display area.

### 2.1.3 Side Menu

The **Side Menu** displays features and functions that the user is authorized to access dependent upon his/her certification(s). Selecting a Side Menu item opens a separate tab in the Omnixx Force User Interface Display Area.

*Note:* Your side menu may differ from what is shown below.

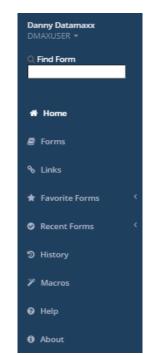

Figure 2.1.3.1 Omnixx Force Side Menu

#### 2.1.3.1 User Menu

A drop-down menu is available located directly below the username. Select the drop-down arrow to display the menu items.

Figure 2.1.3.1.1 User Menu

#### 2.1.3.1.1 Options

The **Options** menu item displays the user options which are easily toggled on or off. The option menu is accessed by selecting <sup>•</sup> located along the right-side of the Menu bar.

•	OPTIONS Toggle on/off below.	
	Nightview	OFF
	Play Sound	ON
	Popup Incoming Messages	
	Close On Transmit	OFF
	Show Top Navbar	
	Show Side Menu	
	Use Workspace	
	Auto Print	OFF
	Session ORI	OFF
	Large Fonts On Forms	OFF
	Print Subject	ON

Figure 2.1.3.1.1.1 Options Menu

- *Nightview* Omnixx Force users have the ability to switch the User Interface to "nightview" that is dimmer than the daytime view. This is a safety feature all law enforcement personnel may use at night to keep their units or surrounding area dark.
- *Play Sound* Any "hit" response from a query will play a tone. Different tones for different types of response "hit" messages are possible.
- *Popup* Any incoming messages will appear in a popup box to alert the user.
- *Close* Activating this feature closes the transaction form upon transmission.
- Show Top Navbar Selecting this feature displays the navigation (Menu) bar along the top of the Omnixx Force User Interface.
- Show Side Menu Selecting this feature displays the Side Menu along the left side of the Omnixx Force User Interface.

- Use Workspace Selecting this feature enables "Workspace" mode, where transaction forms will be opened in a workspace. If this feature is not enabled, each transaction form will be displayed in an individual tab.
- Auto Print Selecting this feature provides a way to print without user intervention. To solve this issue, Omnixx Force uses a small Windows tray application that acts as the bridge between the browser and the printer. Omnixx Force posts messages to be printed to the Print Service, which formats the message and sends to the printer for printing. The Omnixx Force Print Service provides options to select the printer to use for Auto Print.
- Session ORI When you turn this feature ON, you will be prompted to enter an ORI, which will be used to auto populate the **ORI** field on transaction forms you open. By default, the ORI assigned to the device you use at logon is used to auto populate the **ORI** field, but this gives you a way to override it for this session (it will revert back to the default upon next logon).

SESSION ORI	×
*Session ORI	
FL1234567	
Cancel	Save

Figure 2.1.3.1.1.2 Session ORI

- Large Fonts on Forms Selecting this feature displays transaction forms in larger text (font) to allow easier readability.
- *Print Subject* Selecting this feature removes the subject line before printing.

#### 2.1.3.1.2 Unattended Printing

The **Unattended Printing** feature provides access to the Auto Print and Unattended Printing features controlled by adding the associated functions to the Omnixx Force Main Menu and a certification assigned to users that permit use of these features. Unattended Printing allows the user to *automatically* send transaction message responses to a printer without user intervention.

#### 2.1.3.1.3 Close All Forms

Selecting the **Close All Forms** menu option closes <u>all</u> open forms in a user's Omnixx Force Display Area.

#### 2.1.3.1.4 Logout

The **Logout** option in the User menu is located at the top left side of the Side Menu. By selecting this option, the Omnixx Force Log In screen is displayed *closing* the current Omnixx Force session.

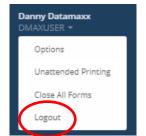

Figure 2.1.3.1.4.1 User Menu Logoff Option

#### 2.1.3.2 Find Form

The **Find Form** search box provides a user with quick access to a transaction form. Simply type in the letter in the form name or identification and a drop-down list of the transaction forms matching your search are displayed as shown in the figure below.

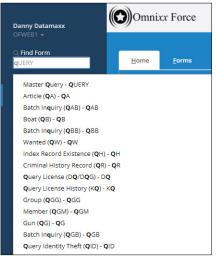

Figure 2.1.3.2.1 Find Form Search

#### 2.1.3.3 Home

The Omnixx Force Home screen is the first screen on the User Interface. It displays the user's name and certifications, user profile, and the version of Omnixx Force currently running, etc.

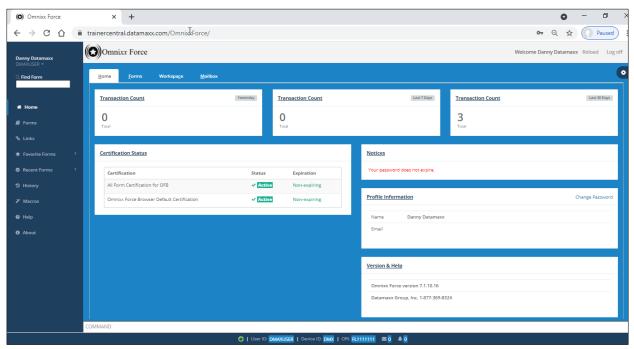

Figure 2.1.3.3.1 Omnixx Force Home Screen

#### 2.1.3.4 Forms

The Omnixx Force Forms screen displays the transaction forms the user is authorized to run. These forms are also available on the Tabs menu.

Figure 2.1.5.3 Open Transaction Form

## 2.1.6 Status Bar

The **Status bar**, located at the bottom of the screen under the Command Line, provides information regarding the number of "*unread*" messages in your Inbox, connection status, and your user, device (Mnemonic) and agency (ORI) identifications.

The number of "unread" Messages is indicated on the Status bar (envelope) and also the number of messages returning a "hit" (bell). These are capable of alerting a user audibly and visually.

O   User ID: DMAXUSER	Device ID: DMX	ORI: FL1111111	<b>2</b>	۵ 🜲
Figu	e 2.1.6.1 Omnixx Fo	rce Status Bar		

## 0

The Omnixx Force **Connection Indicator** is located on the Status bar. The purpose of this indicator is to inform the user of a successful connection to the (Message Switch). The icon for the Connection Indicator has a green circle to indicate a successful connection.

## ۲

If at any time the connection drops, the indicator changes immediately from green to red to alert the user of a connection failure.

# 3.0 Using Omnixx Force

As a user, you will probably spend most of your time using Omnixx Force entering information into transaction forms. Your host network has established the use of these forms to ensure that transactions submitted to the host network are received uniformly. Most likely, you are familiar with forms (i.e., **Gun Query, Vehicle Query, Wanted Persons**, etc.). Omnixx Force presents all of your agency's transaction forms in an easy-to-follow, fill-in-the-blank format. This chapter will familiarize you with how to navigate the forms, enter data in the correct format, transmit and receive a valid response.

Transaction forms provide the user with a simple, quick way to obtain critical information by entering specific information into forms. These forms will vary from agency to agency. The following sections provide examples of transactions (queries) which result in a "hit" response and a "no-hit" response.

The following list of transaction forms are the most commonly accessed by a user.

- Administrative
- Vehicle
- Person
- Gun
- Article
- Boat

## 3.1 "No-Hit" Response

An example of a "no-hit" response in Omnixx Force is shown below. A query transaction form is displayed by selecting the corresponding form listed in the Side Menu or select from the Forms tab.

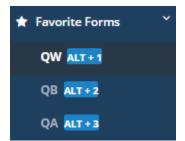

Figure 3.1.1 Select Transaction Form

In this example, the Wanted Person Query transaction form allows the user to enter specific information regarding a wanted individual.

					*

Figure 3.1.2 Wanted Person Query Transaction Form

#### Submit

Enter the information for the individual into the Wanted Person Query Transaction Form and select the **Submit** button to *transmit* the query through the Omnixx Force message switch.

Clear All

Selecting the Clear All button *clears* the data fields in the transaction form, except for fields that have been preloaded (for example, the **ORI** field).

Selecting the **Submit** button sends the query to federal, state and local databases for information. The query response message is sent to your Mailbox and can be viewed by selecting the line item and scrolling down the Display Area.

## Submit

Enter the information for the vehicle into the Wanted Person Query Transaction Form and select the **Submit** button to *transmit* the query through the Omnixx Force message switch.

## Clear All

Selecting the **Clear All** button *clears* the data fields in the transaction form, except fields that have been preloaded (for example, the **ORI** field).

Selecting the **Submit** button sends the query to federal, state and local databases for information. In the example below, the user receives a "Hit" on the wanted person query.

Figure 3.2.3 Query "Hit" Response

The user may close the transaction message or print the results via a local printer. Note the flashing red <u>!!!HIT!!!</u> message at the top of the message. An audible alert may also be present and can be turned off by selecting the **Turn Off Audio** button. Selecting the **Close** button displays the actual query response without the image.

Figure 3.3.1 Response Messages

Double-selecting the message line item you wish to view or scrolling down displays the response.

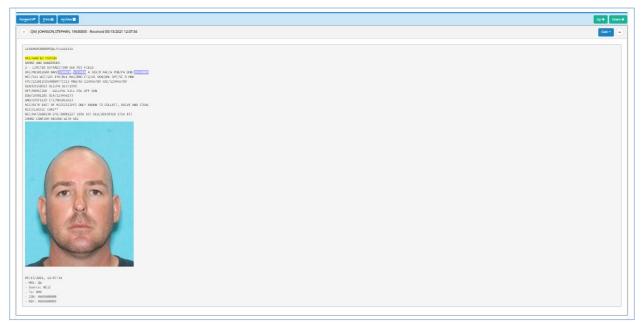

Figure 3.3.2 Display Response Message

## 3.3.1 Message Casting

This feature allows message responses to be "cast" into other transaction requests. For example, when a "hit" confirmation response is received for a wanted person, a user may select the **Cast** button located in the upper right of the message response and then select the appropriate "cast" message type.

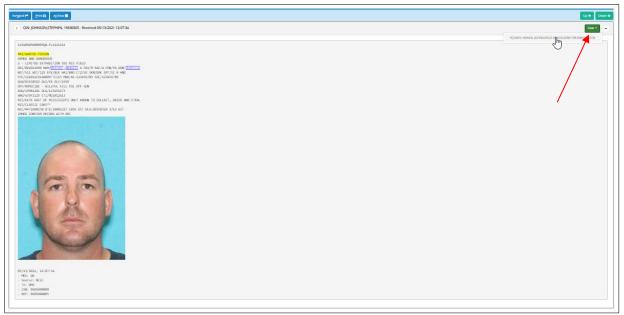

Figure 3.3.1.1 Select Message Type to Cast

Selecting the Cast message type displays the Hit Confirmation Request form. This transmits the same query to different sources for a response. Usually, this entails a different or multiple ORI(s).
