Symbol Key:

Native to Ohio or adjacent states including selections and hybrids of plants indigenous thereto.

Attracts brightly colored butterflies

Attracts or feeds animals and/or song birds

Hummingbird nectar source

Deer resistant (we're not claiming deer proof; if they're hungry enough, they'll eat anything)

Good for cut flowers or foliage

Fragrant foliage and/or flowers

Part or all of this plant is poisonous

The people who make it all happen:

Our Customers

Thank you for choosing us to supply your perennial material. If not for you, we would sadly be working for our competition.

Elton Smith	Owner
Ken & Linda Smith	Production managers, sales
Amy Sieg	Office manager, in-house sales
Natalie Geuy	IPM Coordinator, Propagation manager
Matt Gray	Plant Maintenance Foreman
Mike Bodine	Potting Foreman
Jared Knutson	Delivery Driver
Michael Meadors	Shipping Coordinator
Allen Imbody	Delivery Driver

A note about advising customers on successfully overwintering perennials:

Some of the perennials we offer require well-drained soils to survive the winter. Unfortunately a lot of Midwest gardens have heavy clay soils that drain very slowly. Plant roots require oxygen to survive and soggy soils drown the roots, leading to decay and death. Using raised garden beds along with amending your soil with 1/2" pine bark chips or compost/organic matter greatly improves overwintering success!

On the cover, some of our top selling perennials in 2023:

Left to right, top to bottom: *Heuchera* 'Caramel', *Leucanthemum* 'Becky', *Polygonatum odoratum* 'Variegatum', *Isotoma fluviatilis*, *Allium* 'Millenium', and *Hosta* 'Patriot'

New Plants for 2024

These are plants that haven't been listed before. We either trialed a small number of the selection and are confident in our ability to provide a quality product, or we grow a related cultivar and want to give you more choices. We have selected many of these new plants due to your requests. Thank you!

Delosperma 'Banana Blast'

Geranium 'Mary Anne' with 'Kelly Anne'

Heuchera 'Black Forest Cake'

Hosta 'When I Dream'

Monarda 'Pink Frosting'

Trial Plants for 2024

These are plants we are testing in small numbers, paying close attention to vigor, disease resistance, and performance in the nursery. But most importantly: do the plants do what "they" claim they do. These plants will not be listed in the catalog. If they meet our standards, they will become available for sale and possibly added to our crop schedule for 2025.

Terms and Conditions of Sale

Issued January 1st, 2024

This is a wholesale price list only.

This catalog cancels all previous quotations.

DELIVERY:

All delivery of nursery stock is conducted in our vehicles by a member of our staff. Our driver will provide assistance with unloading; however, customers are requested to provide sufficient help to expedite it.

GENERAL DELIVERY SCHEDULE:

Tuesday & Wednesday - Central Ohio (Columbus, Delaware, Marysville, etc.) and Northeast Ohio (Akron, Cleveland, Medina, etc.); orders should be placed no later than Monday at noon

Thursday - Southwest Ohio (Cincy, Dayton, etc); orders should be placed by Tuesday, 5 pm

Friday - Northwest Ohio/Southern Michigan (Detroit, Toledo, etc.), Indianapolis, and Chicago; orders should be placed by Wednesday, 5pm

FREIGHT CHARGES:

	Distance from SGI	Minimum or Rate Charge	Minimum Order
Area 1	0-14 miles	\$40.00 or 5% of invoice	\$500
Area 2	15-39 miles	\$60.00 or 6% of invoice	\$750
Area 3	40-99 miles	\$120.00 or 9% of invoice	\$1,000
Area 4	100-149 miles	\$150.00 or 10% of invoice	\$1,500
Area 5	150-249 miles	\$210.00 or 10% of invoice	\$2,000
Area 6	250-449 miles	\$460.00 or 10% of invoice	\$4,500

For all other areas please call for a freight quote.

Freight Charges are subject to change without notice based on the fluctuating conditions of the current market.

FUEL SURCHARGE:

For 2024, we will be suspending the fuel surcharge on all shipments. The fuel surcharge will be re-instated if the EIA Midwest average for diesel fuel rises above \$4.30. Our pricing is based on the U.S. Energy Information Administration Index (EIA). We will review this data on a weekly basis.

If re-instated, the fuel surcharge will remain independent from our base rates shown above and will be shown as a separate line item on your invoice. The fuel surcharge amount will be charged on a mileage basis, using the OOIDA fuel surcharge calculator.

We deeply appreciate your understanding and partnership with us in helping to share the dilemma of fuel cost increases. We hope that by sharing this burden together, we can continue to supply you and your customers with the high quality plants and service you've come to expect from Smith's Gardens.

PRODUCT AVAILABILITY:

Plants listed will be available for the 2024 season; however, not all of the plants listed will all be available at all times. Please call ahead or check our website to confirm availability.

GUARANTEE:

We guarantee our plants to be healthy, and to the best of our knowledge, true to name. We will replace or refund the price paid for any plants that prove to be otherwise. It is agreed that the original price paid shall be the maximum damages to which the purchaser is entitled. We will not be held responsible for any other expenses, losses, or inconveniences which the purchaser may sustain as a result thereof. Legal jargon aside, if you are not satisfied with our products, we appreciate knowing just that. Please allow us the opportunity to fix it.

TERMS:

Net 30 days on approved credit. All new accounts are paid in cash or credit card. A 3% service fee is applied to all credit card payments. We will not accept personal checks from new customers until credit is approved. Past due accounts will be assessed a 4% service charge per month.

LOCATION:

We are located at 7520 Home Rd., Delaware, Ohio; west of the Scioto River, between Rt. 745 and Jerome Rd. in southern Delaware County. (See map on page iv) Plan to visit us anytime you are in the area.

HOURS:

March – November

Monday – Friday 8:00 am – 4:30 pm

Saturday Closed

April – July: We are probably working but call ahead to be sure. Arrangements can be made for someone to be there.

Sunday Closed

December - February

Closed for the winter but please call if you have any questions. Again, arrangements can be made for someone to be there.

Live availability and online ordering also available on OrderEase

Thank you Growing Colors, Terra Nova Nursery, and Walters Gardens for the use of your photographs!

RETAIL PRICING and BAR CODES:

We offer retail pricing of material with or without a bar code and SKU. Please call for more details. Taking advantage of this service during the winter months can save a lot of time pricing during the season. Let us make your life a little bit easier! There is a \$250.00 annual set-up fee for all labels with pricing, UPC, sku's, etc. Any pricing received after March 15th will be subject to a late fee of an additional \$150.

LABELS and SIGNAGE:

Every plant that leaves our nursery receives a full color adhesive label complete with locally specific horticultural data. Because we generate our labels in house, they can include your logo, retail prices, bar codes, SKUs, and much more. Our labels can be quickly modified to accommodate your preferences. If you would like additional labels with your order(s) to use for signage, let us know. Labels shown below are actual size.

Your Garden Center **Trevi Fountain Lungwort**
 123 Perennial Lane, Blooming, OH 43123 *Pulmonaria 'Trevi Fountain' pp #13,047*
 740-881-6147

Part Shade to Shade
 Attracts Hummingbirds
 Deer Resistant

12" tall by with an 18" spread
 Thick leaves with silver spots
 Sprays of flowers in early spring

Lungworts are shade loving perennials with long, thin, leathery foliage and a mounding habit. Trevi Fountain has dark green, fuzzy foliage that is heavily spotted with silver. The plants produce abundant clusters of cobalt-blue flowers that mature to pink. This Lungwort has great substance and is still our favorite.

Blue Star Creeper
Isotoma fluviatilis

This little creeping perennial forms a flat carpet of tiny green leaves, smothered with starchy, soft-blue flowers. Works great between stepping stones, around ponds, or as a lawn substitute. Blue Star Creeper is a low maintenance plant that blooms from spring to fall and is very tolerant of heavy foot traffic.

What's New for 2024

What a busy year it was in 2023! We are thrilled to share that sales soared by 20% thanks to your patronage. We are grateful for your continued support and loyalty.

We are proud to have had our most experienced staff ever, with more returning employees than ever before. Our team has worked tirelessly to ensure that we continue to provide you with the highest quality products and services. And we are poised to pick up right where we left off in 2024.

As we move forward into 2024, we are excited to announce that we will be expanding our perennial offerings to meet customer demand. Our dedicated team, led by Linda and Amy, has been working diligently to create an expanded selection of over 150 new varieties (plus an additional 100 trial varieties) of *Anemone*, *Astilbe*, *Baptisia*, *Campanula*, *Delosperma*, *Echinacea*, *Geranium*, *Hemerocallis*, *Hosta*, *Nepeta*, *Papaver*, *Scabiosa*, and *Sempervivum*.

We are also pleased to introduce a new line of one-gallon Spring Grasses, which will be available this spring. After many years without them, we have decided to bring them back, and we are confident that you will love the interesting new varieties that we have in store for you.

In response to customer requests, we will be expanding our selection of quart perennials. We will be devoting more heated greenhouse space to their production to provide you with more choices in early spring.

In 2023 we had much higher demand for herbs than we anticipated. Our herb production will be expanding, to better supply your requests, and they will be available earlier than last year. The variety listings are so extensive that they have their own 47-page catalog. Please ask for a copy or see our website for that catalog.

With so much to look forward to, and all this to get excited about, I am eager to get back out to see all of you.

Happy Holidays,

....and in anticipation of Spring,

Ken, Linda, Amy, and the staff at Smith's Gardens

PERENNIALS

Acanthus 'Morning Candle'

Morning Candle Bear's Breeches

24" tall (foliage) x 24-30" wide Exposure: full sun to part shade

This hybrid Acanthus is grown for its unique foliage and bold flower spikes. Compared to *A. spinosus*, Morning Candle blooms at a younger age. Morning Candle also blooms earlier in the season than the straight species. Flowering begins in late spring to early summer. Up to 48" tall spikes of white and purple, snapdragon-like blooms are held above the foliage and continue through the summer, for up to 3 months! Glossy green, spiny leaves remain attractive throughout the growing season. Place in a protected site with good drainage.

True 1 gallon

Acanthus 'Morning Candle'

Achillea Firefly Collection

28-30" tall x 24-28" wide

Exposure: sun

Firefly Yarrow

Bred by Walters Gardens, the Firefly Collection consists of larger plants, with sturdy upright habits. Blooming in early summer, they also re-flower with dead-heading. Part of the Proven Winner program. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S.

'Firefly Peach Sky' - light peachy orange flowers age to yellow. Mature and pp# 32,404 new flowers create a blend of colors on one plant

'Firefly Sunshine' - bright yellow flowers contrast with dark gray green pp# 25,750 foliage

PW True 1 gallon

Achillea 'Firefly Peach Sky'

Achillea 'Firefly Sunshine'

Achillea 'Moonshine'

12-24" tall x 12" wide

Exposure: full sun

Moonshine Yarrow

Moonshine Yarrow has stood the test of time and is still sought after for its bright canary yellow flowers and disease-free gray-green foliage. The flat topped flowers are held above the foliage, attracting butterflies. Plants will re-flower if dead-headed. They will perform best in full sun with poor to average soil and low to average water. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S. Also an excellent dried flower.

True 1 gallon

Achillea 'Moonshine'

Achillea New Vintage Violet ('Balviolet')

pp# 31,364

12-14" tall x 12" wide

Exposure: sun

New Vintage Violet Yarrow

Bred by Darwin Perennials, New Vintage Violet is a tidy, compact plant with no gap between the foliage and flowers. Blooming in early summer, it also re-flowers very well with dead-heading. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S.

True 1 gallon

Achillea New Vintage Violet

Achillea 'Strawberry Seduction'

Achillea millefolium 'Strawberry Seduction'

pp# 18,401

24" tall x 24" wide

Exposure: full sun

Strawberry Seduction Yarrow

Strawberry Seduction has large flowers that open strawberry red, maturing to buff yellow on strong, sturdy stems. Flowering begins in early summer, continuing for weeks. Deadheading will enhance the plants appearance and encourage more buds to form. Site in full sun and moist, well-drained soil for best growth. From Blooms of Bressingham®. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S.

True 1 gallon

Achillea 'Apricot Delight'

Achillea millefolium Tutti Frutti Series

30" tall x 24" wide

Exposure: full sun

Yarrow

This series was selected for its uniform, large blooms and sturdy growth habit. Flowering begins in early summer and continues for weeks. With deadheading, light re-blooming may occur. Site in full sun and moist, well-drained soil for best growth. From Blooms of Bressingham®. Achillea is native to Europe and Asia and was originally introduced to America in colonial times and has since naturalized throughout the U.S.

'Apricot Delight' - blooms in shades of pink, beginning light apricot and maturing to rose red

pp# 18,738

'Pink Grapefruit' - pinky-salmon flowers with tiny white eyes

pp# 20,741

'Pomegranate' - brilliant, neon red blooms

pp# 20,763

Quart Sold in flats of 10

True 1 gallon

Achillea 'Pink Grapefruit'

Achillea 'Pomegranate'

Aconitum carmichaelii 'Arendsii'

Autumn-flowering Monkshood

24-36" tall x 12-18" wide

Exposure: sun

This hybrid monkshood features dense panicles of hooded, deep azure blue flowers in the fall. Rigid stems are covered in glossy, plastic looking leaves that look great all season. Arendsii stems are unusually thick and do not need support. Flowering in September, they combine well with fall blooming Anemones. All parts of this plant are poisonous. We plant 2 crowns per pot.

True 1 gallon

Aconitum 'Arendsii'

Adenophora confusa 'Gaudi Violet'

Gaudi Violet Fairybells

20-28" tall x 12-24" wide

Exposure: sun to light shade

Fairybells are elegant, long blooming, compact plants. Tall spikes of violet flowers bloom all summer long, especially when deadheaded. It grows best in full sun to light shade with medium water and well-draining soil. (photo on next page)

True 1 gallon

Agastache 'Arizona Sandstone'

Arizona Sandstone Hummingbird Mint

8-10" tall & wide

Exposure: full sun

This compact and cute Hummingbird Mint is perfect for the front of the sunny border. Fragrant gray-green leaves are topped with spikes of tubular terra cotta-orange flowers. Blooming begins in late spring and continues until early fall, attracting butterflies and hummingbirds to the garden. Performs best in well-drained soil.

Trade 1 gallon

Agastache 'Arizona Sandstone'

Agastache Crazy Fortune ('Atenduis')

pp# 31,364

28-32" tall x 20" wide

Exposure: full sun

Crazy Fortune Hyssop

A variegated Agastache! The bright white irregular variegation really stands out in spring and mellows a bit as summer heats up. In mid-summer, lavender-blue flower spikes attract hordes of pollinators to the garden. Compared to A. 'Blue Fortune', this plant is much more organized with a moderate growth rate.

True 1 gallon

Agastache Crazy Fortune

Agastache rugosa 'Golden Jubilee'

Golden Jubilee Hyssop

24-36" tall x 18-24" wide

Exposure: afternoon shade

This bushy perennial has shiny bright yellow-green, licorice-scented leaves. In early June tall spikes of violet-blue flowers appear and continue until mid-September. A butterfly and hummingbird magnet! Does very well in average to poor soils. Easy to grow and adaptable. An outstanding perennial for the Midwest.

True 1 gallon

Agastache 'Golden Jubilee'

Agastache 'Purple Haze'

Purple Haze Hyssop

36" tall x 24" wide

Exposure: full sun

Purple Haze is a shrubby looking Agastache with shiny green, licorice-scented foliage that produces long spikes of smoky violet-blue flowers from early summer until September. Flowers appear a darker blue than A. 'Blue Fortune' due to the black calyxes. The leaf petioles and stems will pick up a purple color with cooler fall temperatures. The stems hold up well into the winter giving several more months of interest.

True 1 gallon

Agastache 'Purple Haze'

Adenophora
'Gaudi Violet'
(previous

Ajuga 'Catlin's Giant'

Ajuga 'Cordial Canary'

'Parrot Paradise'

'Fierce Falcon'

Ajuga 'Tropical Toucan'

Alchemilla 'Thriller'

Ajuga reptans

3-6" tall x 12-36" wide

Exposure: part-full shade

Bugleweed

Ajuga forms a dense mat of foliage, up to 6" tall, that always looks neat and fresh. In many cases, the leaves are colored with shades of purple, white, silver, cream, or pink. Individual plants grow as a rosette, but they intertwine to form a solid carpet that withstands light foot traffic. Flower spikes adorn plants from late spring to early summer. Ajuga is a great ground-cover for part to full shade.

'Catlin's Giant' - a fast growing selection with large, bronze-green leaves, covered in blue flower spikes in April and May. A taller variety growing 6-10" tall.

Feather Friends Series

This series has shown tremendous vigor, and we are excited to be offering this new line of Ajuga bred by Chris Hansen.

tenorei 'Cordial Canary' - a gold version of the popular Ajuga 'Chocolate Chip'. Cordial Canary forms a tight carpet only 3" tall of golden yellow leaves. In spring, it's topped with short spikes of lavender-blue flowers. Morning sun to part shade is needed to retain the best yellow foliage color.

'Fierce Falcon' - glossy dark purple to near black foliage. Cobalt blue flowers in spring.

'Parrot Paradise' - crinkled foliage emerges bronze and matures to gold, creating a wonderful contrast. A hybrid of A. tenorei x A. reptans, this is a slow spreading, more well behaved variety. Blue flowers in spring.

reptans 'Tropical Toucan' - its claim to fame is being the world's first ever Ajuga with large gold leaves! In spring, plants are topped with short spikes of cobalt blue flowers. Morning sun to part shade is needed to retain the best yellow foliage color.

Quart Sold in flats of 10 Spring Only

Alchemilla mollis 'Thriller'

18-24" tall & wide

Exposure: part shade

Thriller Lady's Mantle

A wonderful plant for the shaded garden combining beautifully with ferns and hostas. The soft fuzzy green leaves catch tiny dew droplets and glisten in the morning sun. Tiny yellow flowers bloom en masse in early spring. Thriller was selected for its superior flower display and longer stems for cutting. Alchemilla can spread readily by seed, as they are apomictic, meaning viable seeds are produced without the need for pollination.

True 1 gallon Spring Only

NEW Allium 'Bubble Bath'

pp# 35,333

26-28" tall x 24-26" wide

Exposure: full sun

Bubble Bath Ornamental Onion

Tiny star-shaped, light lavender flowers are formed in 3" round globes and are held above strappy blue-green leaves. When compared to Millenium (listed below), Bubble Bath is taller and has larger flowers that are a lighter lavender purple. Like most Allium, this plant is resistant to most damaging disease and insects, while its blooms attract butterflies and bees. A Walters Gardens introduction.

True 1 gallon

Allium 'Bubble Bath'

Allium 'Millenium'

12-18" tall & wide

Exposure: full sun

Millenium Ornamental Onion

Fragrant, purple pom-pom flowers appear in mid-summer, above strappy, shiny, onion-scented leaves that are not bothered by deer, rabbits, or chipmunks! Compared to other Alliums, Millenium is well-behaved in the garden and does not reseed. PPA Perennial Plant of the Year 2018.

True 1 gallon

Allium 'Millenium'

Amsonia 'Blue Ice'

12-16" tall x 24" wide

Exposure: full sun

Blue Ice Blue Star

Blue Ice is a compact Amsonia that produces more flowers and has a longer bloom period than *A. tabernaemontana*. The small, star-like flowers are ice-blue and borne on the tips of the branches in June. Its small, shiny green foliage turns a brilliant yellow in the fall. Tough, easy-to-grow, and trouble free. Will form a dense groundcover.

Trade 1 gallon

Amsonia 'Blue Ice'

NEW Amsonia 'Starstruck'

pp# 32,246

20" tall x 36" wide

Exposure: full sun

Starstruck Blue Star

A compact, hybrid selection of Blue Star perfect for smaller spaces and the front of the flower border. Clusters of light blue, star-shaped flowers bloom in late spring and persist for a couple weeks. After flowering, its medium-green, oblanceolate foliage creates a clean, densely-stemmed habit, turning golden in the fall.

Trade 1 gallon

Amsonia 'Starstruck'

Anchusa capensis 'Blue Angel'

8-12" tall & wide

Exposure: full sun

Blue Angel Cape Forget-Me-Not

Blue Angel produces rich, royal blue flowers for up to six weeks in late spring to early summer. Native to dry regions of South Africa, Anchusa requires well-drained soil to overwinter. Avoid wet sites. After blooming, cut plants back to 3" tall to encourage a stronger basal rosette for next years growth.

Quart Sold in flats of 10 Spring Only

Anchusa 'Blue Angel'

Anemone 'Ariel'

Anemone 'Belle'

Anemone 'Curtain Call Deep Rose'

'Pamina'

'Snow Angel'

Anemone 'Ruffled Swan'

Anemone

Windflower

Exposure: sun-light shade

Fantastic perennials for shaded areas, Windflowers provide dramatic color in the fall garden. Blooming in late summer and fall, the delicate, upward-facing flowers come in shades of white to dark pink and are held on long stems well above the dark green palmate foliage. Always eye catching, Japanese Anemones add a unique form and texture to the garden. The taller varieties may require staking when in flower, but those two feet or less generally don't. They will perform equally well in sun if provided consistent moisture.

'Ariel' - an improved version of 'Red Riding Hood'. Single, dark reddish pink flowers begin to bloom in mid-August and continue into September. The compact and tidy plants are only 18" tall when in flower. Part of the Fantasy series from Plants Nouveau.

'Belle' - an improved version of 'Pocahontas'. Frilly, double pink flowers begin to bloom in mid-August and continue into September. The compact and tidy plants are only 18" tall when in flower. Part of the Fantasy series from Plants Nouveau.

'Curtain Call Deep Rose' - dark rose-pink flowers are semi-double with a classic yellow center. A Walters Gardens introduction, 14-18" tall by 16-18" wide.

'Pamina' - hot pink, semi-double, upward facing flowers begin blooming in September and continue into October. Being a shorter, sturdy form, it does not need staking.

Ruffled Swan ('Macane077') - dark purple buds become icy white semi-double flowers with violet-blue backs. Blooming begins in late July and continues into September. 24-30" tall by 18-24" wide. Hybridized in Scotland at the Elizabeth MacGregor Nursery.

Snow Angel ('IFANSA') - single to semi-double snow white flowers begin to bloom in mid-August and continue into September. The compact and tidy plants are only 18" tall when in flower. Part of the Fantasy series from Plants Nouveau.

True 1 gallon Summer Only

'Satin Doll Glow' - full size flowers on a dwarf plant that tops out at 14" when in flower. Single, blush pink flowers begin to bloom in late July and continue into October. Also a slow runner that doesn't readily spread in the garden. Introduced by Terra Nova Nurseries.

Quart Sold in flats of 10 Spring Only

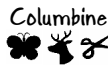

Anemone 'Satin Doll Glow'

Aquilegia
'Woodside
Strain'
(next pg)

Aquilegia

Exposure: light shade

A staple of the spring garden, Aquilegia form rounded clumps of delicate, apple green, ferny foliage in early spring, and are topped by very showy flowers with long spurs in late spring to early summer. Plants prefer moist but well-drained soil with afternoon shade. Columbines usually go dormant in summer.

Earlybird Series

Large upward facing flowers are held just above the foliage, blooming earlier than most other Aquilegia. Compact plants grow to be 9-12" tall by 8-10" wide.

Earlybird Purple Blue ('PAS125B487') - bicolor wine purple and indigo blue flowers

Earlybird Purple Yellow ('PAS125B488') - bicolor purple and yellow flowers

Earlybird Red Yellow ('PAS125B483') - bicolor red and yellow flowers

Songbird Series

Free flowering with large upward facing blooms on a somewhat compact plant. Mid-size, reach 12-18" tall by 10-16" wide.

'Blue Bird' - light blue and white flowers with long, showy spurs

'Cardinal' - red and white flowers with long, showy spurs

Aquilegia Earlybird Purple Blue

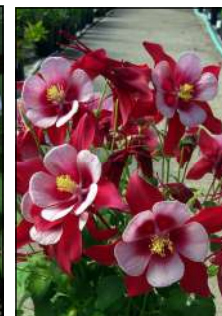

Aquilegia Earlybird Purple Yellow

Aquilegia Earlybird Red Yellow

'Blue Bird'

'Cardinal'

NEW Spring Magic Series

These hybrids have relaxed, nodding, mostly bicolor flowers. Downward facing flowers highlight the showy spurs while mimicking the habit of our native Columbine. This provides protection for pollinators when they're dining on the flower. Compact plants grow 14" tall by 10-12" wide.

'Spring Magic Blue and White' - bicolor blue and white flowers

'Spring Magic Light Red and Yellow' - bicolor light red and butter yellow flowers

'Spring Magic Yellow' - soft yellow flowers

NEW 'Woodside Strain' - this seed strain Columbine has yellow and green marbled and streaked leaves. This variety flowers later than most Aquilegia, blooming in May and June. The flowers are in shades of mostly blue but also includes violet, pink, and white. This strain was developed by Mervyn Feeseys whose UK home in Barnstaple, North Devon is named "Woodside". Due to the variability of this variety, only 75% of the seed is guaranteed to be variegated. However, we cull the all green plants at potting, so every plant will be uniquely variegated. (photo on previous page)

Quart Sold in flats of 10 Spring Only

'Spring Magic Blue and White'

'Spring Magic Light Red and Yellow'

Aquilegia 'Spring Magic Yellow'

Aralia 'Sun King'

Aralia cordata 'Sun King'

Sun King Japanese Spikenard

36-72" tall & wide

Exposure: part shade

Tropical, golden yellow leaves all season! Four to six hours of sunlight a day ensures the brightest color. In summer, 2' tall spikes of tiny white flowers appear. These turn into reddish-purple berries, inedible to humans but loved by birds. Be sure to give this large, shrubby perennial plenty of space in the garden.

True 1 gallon 2 gallon

Aruncus 'Fairy Hair'

Aruncus 'Fairy Hair'

Fairy Hair Goat's Beard

pp# 30,242

20-24" tall & wide

Exposure: sun to part shade

Fairy Hair is a dwarf Goat's Beard with upright, triangular plumes of white flowers that age to cream. Its foliage is incredibly cut and almost needle-like. Bred and introduced by Walters Gardens.

Trade 1 gallon *Spring Only*

Aruncus 'Misty Lace'

Aruncus 'Misty Lace'

Misty Lace Goat's Beard

pp# 15,798

18-24" tall & wide

Exposure: sun to part shade

A unique hybrid seedling discovered by Allen Armitage, Misty Lace is a dwarf Goat's Beard, growing 2' tall by 2' wide. In spring, red stems support large, creamy white blooms that float above the delicate, ferny foliage. A very hardy specimen, it can take full sun if given enough moisture.

True 1 gallon *Spring Only*

Asarum canadense

Asarum canadense

Canadian Wild Ginger

4-6" tall x 12-18" wide

Exposure: part shade to shade

Wild ginger is a native spring wildflower that makes a lovely groundcover with its satiny, heart-shaped leaves. Its unique purplish brown cup-shaped flowers appear beneath the leaves in spring. The flowers are quite attractive on close inspection, but usually hidden from view by the foliage. Prefers moist, well-drained soil. Fresh or dried roots were used by early Americans as a ginger substitute, but the plant is not normally used today for culinary purposes.

Quart Sold in flats of 10

Asclepias & Monarchs

Commonly known as Butterfly Weed or Milkweed, Asclepias are the primary food source for Monarch caterpillars. Known for the incredible mass migration that brings millions of them to California and Mexico each winter, North American monarchs are the only butterflies that make such a massive journey—up to 3,000 miles. Only monarchs born in late summer or early fall make the migration, and they make only one round trip. By the time next year's winter migration begins, several summer generations will have lived and died and it will be the great grandchildren of last year's migrators that make the trip. Yet somehow these new generations know the way and follow the same routes their ancestors took—sometimes even returning to the same tree. Scientists are concerned about the eastern population of monarchs, which summer east of the Rocky Mountains. This group is occurring in ever smaller numbers, and its survival is threatened by reduced acreage of milkweeds and nectar sources in their summer home. To do our part to help the Monarchs, we are offering 7 varieties of Milkweed for 2024. We never treat our Asclepias with neonicotinoid insecticides so they may be shipped with Monarch caterpillars.

Asclepias incarnata

36-60" tall by 24-36" wide Exposure: full sun

Swamp Milkweed

Swamp Milkweed is a hassle-free perennial with compact clusters of vanilla scented flowers in shades of pink to white from mid-summer to early fall. Erect clumps of non-branching stems typically grow to 3-4' tall but can reach 5' when they're very happy. Dried seed pods are interesting and are frequently used in arrangements, and the long stems are wonderful for cutting. These natives prefer moist sites, but will adapt to most garden soils.

Asclepias incarnata

Along with the straight species we will be offering the following varieties:

'Ice Ballet' - white flowers and a bit more compact than Soulmate

'Soulmate' - dark rose pink flowers, this variety tends to branch more than the straight species

True 1 gallon

Asclepias i. 'Ice Ballet'

Asclepias syriaca

36-48" tall x 12" wide Exposure: full sun

Common Milkweed

This native Milkweed typically grows 3-4' tall on thick, upright stems. Blooming in June and July, it features fragrant, light pink flowers that smell like honey. These are followed by prominent, warty seed pods which split open when ripe releasing their silky-tailed seeds for dispersal by the wind. Once commonly seen along roadsides and fields, this native plant is becoming scarce due to the widespread use of herbicides (glyphosate) on genetically modified farm crops and habitat destruction. Monarch caterpillars prefer Common Milkweed for dinner over Swamp Milkweed or Butterfly Weed.

Jack Frost Siberian Bugloss

The heart shaped leaves of Jack Frost have a heavy silver overlay with prominent green veins and are wonderful for brightening up dark shady areas. It produces tiny, blue, Forget-Me-Not type flowers in early spring. One of the best selections of Brunnera we have grown because it is more tolerant of sun and drier soils. 2012 Perennial Plant of the Year.

Quart Sold in flats of 10 & True 1 gallon

Brunnera 'Jack Frost'

Campanula carpatica

Carpathian Bellflower

Exposure: full sun to afternoon shade

This mounding perennial is native to the Carpathian Mountains in Europe. Showy, upward facing, cup-shaped flowers bloom above the foliage in late spring to early summer. They perform best in average, well-drained soil and appreciate afternoon shade during our hot and humid summers. Mulching also helps to keep their root zone cool. If plants begin to look tired after flowering, they can be pruned back to the basal foliage and they may bloom again. Clumps should be divided every two to four years to maintain plant vigor. Divide in spring or late summer for best results.

Campanula 'Clips Deep Blue'

NEW 'Clips Deep Blue' - deep blue flowers bloom in early summer, 6-8" tall and wide.

NEW 'Pristar Deep Blue' - the earliest flowering blue *C. carpatica* available! Deep blue flowers in late spring, 8-12" tall by 6-10" wide.

NEW 'Pristar White' - the earliest flowering white *C. carpatica* available! Bright white flowers in late spring, 8-12" tall by 6-10" wide.

NEW 'Rapido Blue' - violet blue flowers in late spring to early summer, 5-8" tall and wide

NEW 'Rapido White' - white flowers in late spring to early summer, 5-8" tall and wide

Campanula glomerata

Clusterd Bellflower

Exposure: full sun to afternoon shade

This upright perennial forms a dense clump of toothed, sometimes hairy foliage. Showy, upward facing, bell-shaped flowers bloom in terminal clusters above the leaves, from late spring to early summer. Dead-head plants to encourage rebloom, and discourage spreading via seed. They perform best in average, well-drained soil and appreciate afternoon shade during our hot and humid summers. Clumps should be divided every three to five years to maintain plant vigor or control especially happy plants. Divide in spring or late summer for best results.

'Angel Bells' - a smaller selection with pure white, bell-shaped flowers, pp# 31,465 blooming in early summer, and about a week later than the typical blue flowering counterparts. 14-18" tall by 16-20" wide, part of the Bell series from Walters Gardens.

NEW 'Bellefleur Blue' - a dwarf selection with vivid purple-violet flowers, growing 6-10" tall by 12-24" wide. From Syngenta Flowers.

NEW 'Church Bells' - a smaller variety with violet-blue flowers blooming in early summer, about a week earlier than Angel Bells (listed above), the other variety in the Bell series. 14-18" tall by 16-20" wide, a Walters Gardens introduction.

NEW 'Emerald' - ice blue flowers have darker tips and veins on dark petioles, pp# 18,343 blooming in late spring. The name Emerald is in reference to the color of the foliage. 20" tall by 12-18" wide

'Superba' - rich purple flowers bloom in early summer. This is the largest Campanula we offer, at 22-28" tall and wide.

Quart Sold in flats of 10

Trade 1 gallon & True 1 gallon

Campanula 'Superba'

Campanula poscharskyana Blue Waterfall ('Camgood')

Blue Waterfall Serbian Bellflower

8-10" tall x 18-24" wide

Exposure: sun to light shade

Aptly named, the vibrant blue-purple, star-shaped flowers pour like water over the foliage of this Bellflower. Flowers face upwards and are so numerous the foliage is completely covered from late spring into mid-summer. A vigorous spreading ground cover, the flowers will often repeat into fall. Does not like wet soils in winter.

Trade 1 gallon

Cerastium tomentosum 'Celine'

Celine Snow in Summer

4-6" tall" x 8-12" wide

Exposure: full sun

This undemanding perennial groundcover has small gray leaves covered in silver hairs and produces small white flowers in May and June. Cerastium prefers sunny locations, average to low water, and dry, sandy soils. Will tolerate light foot traffic in summer, but will not tolerate wet roots in winter.

Quart Sold in flats of 10

Cerastium 'Silver Carpet'

Ceratostigma plumbaginoides

Blue Leadwort

8-12" tall x 12-18" wide

Exposure: sun-shade

A great groundcover, very late to emerge in spring, with small, glossy green leaves and a beautiful red-purple fall color. Clusters of blue flowers are held above the leaves from late summer until frost. Easy and adaptable, will grow in full sun or shade.

True 1 gallon

Ceratostigma plumbaginoides

Chelone lyonii 'Hot Lips'

Hot Lips Turtlehead

24-30" tall x 18-24" wide

This Midwest native is known for its distinctive flowers that are shaped like a turtle's head with its mouth open. Hot Lips has rose-pink flowers with dark green, thick, almost plastic-looking foliage. Great for planting near streams or ponds.

True 1 gallon

Chelone 'Hot Lips'

Cimicifuga 'Black Negligee'

Black Negligee Bugbane

36-60" tall x 24" wide

Exposure: part shade to shade

The lacy purple-black foliage of Black Negligee is dramatic when arranged with green, yellow, and silver plants such as hostas, ferns, and polygonatum. Sweetly scented white flowers are produced at perfect smelling height in early fall. A cut stem will perfume an entire room for several days. This plant makes an excellent vertical accent for the shade garden.

True 1 gallon

Cimicifuga 'Black Negligee'

Cimicifuga 'Chocoholic'

Chocoholic Bugbane

pp# 24,821

36-60" tall x 30" wide

Exposure: light shade-shade

The lacy, mocha and burgundy leaves of Chocoholic combine wonderfully with yellow and variegated plants for a dramatic and eye catching arrangement. Sweetly scented flowers open a soft pink and lighten to white as they age. This plant makes an excellent vertical accent in the shade garden and works great with hostas and ferns. Bugbane benefits from organic matter being added to the soil when planted. **Sold out for 2024**

Cimicifuga 'Chocoholic'

Clematis maximowicziana

Clematis maximowicziana (paniculata, ternifolia)

Sweet Autumn Clematis

10-15' long vines

Exposure: sun-light shade

This vigorous grower produces a solid sheet of small, incredibly fragrant, white flowers in August. Sweet Autumn Clematis will not die to the ground each year, but some terminal dieback may occur. Great for covering up fences, abandoned cars, slow moving animals, etc...

True 1 gallon

Coreopsis

Valued for their colorful flowers, Coreopsis are low maintenance, drought tolerant, and long blooming. Native to US prairies, the flowers attract butterflies, and their seeds are enjoyed by Goldfinch and other birds.

There is an incredible amount of variety among Coreopsis, including broadleaf vs threadleaf, tall vs short, and flower colors including pinks, reds, yellows, oranges, whites, and bi-colors. Most Coreopsis are clump forming.

Coreopsis should be sited in full sun and average garden soils with good winter drainage. Fertilize once in spring for rich green color, good growth and abundant flower production. Deadheading will keep the plants tidy and promote rebloom; however, leave some seed heads for the birds in fall and winter.

Coreopsis 'Berry Chiffon'

Coreopsis 'Berry Chiffon'

pp# 27,414

Berry Chiffon Coreopsis

15-18" tall x 18-24" wide

Exposure: sun

Berry Chiffon forms a full, upright clump of dark green, threadleaf foliage. White flowers with a raspberry-red eye appear in mid-summer and continue into early fall, with the raspberry color expanding to cover most of the flower's petal in cooler temperatures. This sterile selection won't seed around the garden, and its foliage is very resistant to powdery mildew. From Darrell Probst's Satin and Lace Series.

True 1 gallon

Coreopsis 'Darling Clementine'

Coreopsis 'Darling Clementine'

pp# 31,843

Darling Clementine Coreopsis

8-12" tall & wide

Exposure: sun

Glowing orange flowers are tipped in gold, blooming from late spring to late summer. This sterile selection holds its flowers longer than typical and it won't seed around the garden. Its foliage is also very resistant to powdery mildew. From Darrell Probst's Li'l Bang Series.

True 1 gallon

Coreopsis 'Daybreak'

Coreopsis 'Daybreak'

pp# 27,138

Daybreak Coreopsis

10" tall x 16" wide

Exposure: sun

Daybreak features single red flowers with vibrant yellow-orange edges on clean, dark green foliage. From Darrell Probst's very compact and long-blooming Li'l Bang Series.

True 1 gallon

NEW Coreopsis Fall Sensation Series

18-24" tall & wide

Exposure: full sun

Fall Sensation Coreopsis

The Fall Sensation Series features larger, threadleaf plants that are disease resistant and incredibly floriferous, blooming slightly later, from early summer to early fall.

'Fall Sensation Quartz' - pink blooms with yellow eyes

'Fall Sensation Sandstone' - striking flowers are a wash of pinks and oranges blended together for a unique ombre effect

'Fall Sensation Vermillion' - rich, deep red flowers

NEW Delphinium elatum 'Excalibur Dark Blue Black Bee'

Excalibur Dark Blue Black Bee Delphinium

16-22" tall x 6-10" wide

Exposure: sun to part shade

Well-branched plants have sturdy flower stems that proudly display the showy blooms. The Excalibur series is more compact than traditional Delphiniums, perfect for today's smaller gardens. They form neat mounds of deeply cut, rich green leaves. Tall spikes of dark blue flowers with black bees bloom in early summer. This heavy feeder prefers rich, well-drained soil. Remove spent flowers to encourage rebloom. Delphinium dislike hot humid summers, if plants get mildew or begin to look raggedy, cut back hard to encourage fresh growth.

True 1 gallon

Delph. 'Excalibur Dark Blue Black Bee'

Dianthus 'Appleblossom Burst'

Burgundy Blush

Coconut Surprise

Dianthus 'Cherry Swirl'

'Coral Reef'

Passion

Dianthus 'Cherry Vanilla'

Dianthus

Exposure: sun

Pinks

Dianthus are highly prized for their eye-catching, fragrant flowers, blooming in late April to late May. Happy plants form a tight, spreading, semi-evergreen groundcover. Flower forms range from single to fully double, in hues of white, pink, reds, and bi-colors. Dianthus perform best with good drainage, moderate fertility, and average moisture. Plants look cleaner if spent flowers are removed in early summer.

NEW 'Appleblossom Burst' - semi-double flowers range from blush to mid-pink, pp# 31,454 with dark red eyes. 8-10" tall x 16-20" wide, part of the Pretty Popper Series from Walters Gardens.

Burgundy Blush ('KLEDG11143') - double burgundy flowers edged in pink, pp# 23,150 above gray-green foliage, 8-12" tall x 10-14" wide. Part of the EverLast series.

NEW 'Cherry Swirl' ('KLEDG22394') - semi-double white flowers accented with cherry red. Very fragrant, 8-12" tall x 10-14" wide. Part of the EverLast series.

Coconut Surprise ('WP05 Yves') - double white flowers with dark red centers pp# 18,828 above glaucous, gray-blue leaves, 6-9" tall x 9-12" wide; part of the Scent First series. Landscapers tell us this variety continues to flower longer than typical Dianthus.

'Coral Reef' - fully double, coral pink flowers with a white picotee edge, pp# 19,660 9-12" tall x 12-18" wide, part of the Scent First series.

Passion ('WP Passion') - double red flowers above gray-green foliage, 12" tall pp# 21,843 Scent First series

Pinball Wizard ('WP15 Mow08') - large, double soft pink flowers that are pp# 29,480 streaked and speckled with hot pink above glaucous, gray foliage, 12" tall; Devon Cottage series

Dicentra 'Ruby Gold'

Digitalis ambigua 'Temple Bells'

Temple Bells Foxglove

12-18" tall & wide

Exposure: sun to afternoon shade

Temple Bells, also known as *D. 'Carillion'*, is a true perennial, dwarf *Digitalis* bearing spikes of soft yellow flowers with brown speckles in their throats. Blooms in early summer, and responds well to dead-heading. If seed heads are left, it may reseed in the garden. Be aware, all parts of this plant are poisonous.

Squat 1 gallon

Digitalis 'Temple Bells'

Digitalis x mertonensis

Strawberry Foxglove

36-48" tall x 18-24" wide

Exposure: full sun to part shade

Created in 1925 at the John Innes Horticultural Institute in England, by crossing *D. purpurea* with *D. grandiflora*. Strawberry Foxglove is a short-lived perennial typically staying in the garden for 2-4 years. Let some spent flowers remain so it will continue to show up. Tall spikes rise above the plants in June, sporting larger than average blooms. 2-3" long, dusty-pink, tubular flowers are tightly grouped on the flower stalk. Be aware, all parts of this plant are poisonous.

Doronicum 'Little Leo'

Dracocephalum 'Fuji Blue'

Digitalis purpurea Dalmatian Series

Dalmatian Foxglove

24-36" tall x 12" wide

Exposure: full sun to afternoon shade

The Dalmatian series was bred for uniformity, a great habit, early summer flowers, and better longevity in the garden. However, these are short lived perennials. Plant in well-drained soil and remove most of the spent flower stems to encourage the plants to overwinter. Leaving some seed will help the colony to perpetuate. Be aware, all parts of this plant are poisonous.

'Dalmatian Peach' - flowers open pinkish peach and then lighten to a soft peach color with tiny orange speckled throats.

'Dalmatian Purple Improved' - large spikes of outward facing, lilac purple flowers with maroon spotted throats on sturdy, upright stems; Fleuroselect Gold Medal winner

'Dalmatian Rose' - rose-purple flowers with purple spotted, white interiors

True 1 gallon

Digitalis purpurea 'Pam's Choice'

Pam's Choice Foxglove

36-48" tall x 18-30" wide

Exposure: sun to afternoon shade

Providing architectural height to borders, Pam's Choice is eye-catching, producing tall spires of pendulous, funnel-shaped, pure white flowers heavily spotted with maroon-purple in the throat. However these are short lived perennials. Plant in well-drained soil and remove most of the spent flower stems to encourage the plants to overwinter. Leaving some seed will help the colony to perpetuate. Be aware, all parts of this plant are poisonous.

True 1 gallon

Doronicum orientale 'Little Leo'

Little Leo Leopard's Bane

8-18" tall x 6-12" wide

Exposure: part shade

Semi-double, bright yellow daisies bloom in early to mid-spring. Remove spent flowers to prevent re-seeding (or leave them for new plants the following spring). Little Leo's lush green, serrated foliage will go dormant during the hot, humid summer.

Quart Sold in flats of 10 Spring Only

Dracocephalum arguense Fuji Series

Dragon's Head

8-12" tall & wide

Exposure: sun to light shade

In late spring to early summer, the short plants are covered with flowers that look like miniature snapdragons. Small, shiny, dark green, rosemary-like leaves are thick and leathery. They hold their color and shine very reliably throughout the summer, eventually developing a yellow to red fall color. A great plant for the rock garden that performs equally well in good garden soils. Very drought tolerant.

'Fuji Blue' - rich blue flowers

NEW 'Fuji White' - snow white flowers with a blue spotted throat

Trade 1 gallon

Echinacea

Prized for their large, brightly colored flowers, coneflowers have become a mainstay in today's landscapes. Their color and form combine equally well in the wildflower or urban garden. Most varieties make excellent cut flowers. The cones hold up well into winter providing architectural interest as well as attracting seed eating birds (however, double flowers are sterile and do not produce seed). Echinacea perform best in full sun to light shade. They prefer consistent moisture to avoid leaf burn and early petal decline. Being native, they are well adapted to our soils and climate. Height listed is in flower. We hope to have 35 varieties available in 2024, of which 28 are listed here. The other 7 varieties are trials.

Rattlesnake Master

This odd looking plant resembles yucca with its rosette of spiny, long, narrow, blue-green leaves. The unique flowers are whitish green, prickly spheres that are held well above the leaves in early to mid-summer, attracting a multitude of pollinators. Native to our tallgrass prairies, Rattlesnake Master thrives in rich, well-drained sites. Native Americans used the fibrous leaves of this perennial for weaving purposes, like making sandals and baskets. The sap and roots were also used to treat a wide variety of ailments, including the (unsuccessful) prevention and treatment of snake bites.

Eupatorium 'Baby Joe'

Eupatorium dubium 'Baby Joe'

pp# 20,320

30-36" tall x 18-24" wide

Exposure: full sun

Baby Joe-Pye Weed

An eastern native, this Joe-Pye Weed will grow to three feet tall and has bright green foliage with cabernet-colored flowers in late summer. Its smaller stature and slower growth rate make it much more suited for today's gardens. Eupatorium tolerates wet soil but will exhibit leaf scorch in dry locations.

True 1 gallon

'Gateway'

'Pink Frost'

Eupatorium dubium 'Little Joe'

pp# 16,122

48" tall x 24-36" wide

Exposure: full sun

Little Joe-Pye Weed

A shorter Joe-Pye Weed growing to four feet tall with mauve colored flowers in late summer. Its smaller stature and slower growth rate make it much more suited for today's gardens. This native attracts butterflies and seed eating birds such as Goldfinch. Can be pruned in mid-June to produce a shorter, more compact plant.

True 1 gallon

Eupatorium 'Little Joe'

Eupatorium fortunei 'Pink Frost'

30-36" tall x 18-24" wide

Exposure: sun to part shade

Pink Frost Joe-Pye Weed

This unusual variegated form of the Japanese Joe-Pye Weed has deeply serrated, green leaves with a creamy white edge. In late summer, the clumps are topped with small clusters of rich pink flowers that last into fall. Will perform best in slightly moist, well-drained soil.

True 1 gallon

Eupatorium maculatum 'Gateway'

48-60" tall x 18-24" wide

Exposure: full sun

Gateway Joe-Pye Weed

A big, bold, show stopping plant when in bloom, this lovely native produces mauve flower clusters on red stems from July to September. It is native to wet sites but will thrive in average garden soils.

True 1 gallon

Filipendula rubra 'Venusta'

36-60" tall by 24" wide

Exposure: sun to light shade

Queen of the Prairie

This impressive native is not for the faint of heart or the small garden. Plants thrive in moist soils and will easily attain a height of 5'. Intense rose-pink flowers are borne on 6-9" wide panicles in summer. After flowering, cut plants back hard. New foliage will re-grow to about 2' and remain fresh looking until frost. Does not do well in drought conditions.

True 1 gallon

Filipendula 'Venusta'

Gaillardia aristata

12" tall & wide

Exposure: full sun to light shade

Blanket Flower

This species is native to the Western U.S., found in the dry spots of meadows, prairies, and mountain foothills. Gaillardia love poor sandy soils and need great drainage to successfully overwinter in our area. Blooms begin in early summer, continuing into fall. The seeds that follow are loved by birds like Goldfinch.

Arizona Series - bred by Benary Seed

'Arizona Apricot' - large, apricot flowers with yellow tips and a dark orange center (photo on previous page)

'Arizona Red Shades' - large, crimson red flowers. Because this is a seed strain, about 20% of the flowers will have slight yellow tips. (photo on previous page)

'Arizona Sun' - fiery red flowers tipped in bright yellow. 2005 AAS Flower winner and 2005 Fluoroselect Gold Medal winner.

Spintop Copper Sun ('Dogailspincopsun') - copper-red fluted petals with gold pp# 32,215 throated flared tips

Spintop Red Starburst ('Dogailredstar') - large semi-double bicolor flowers pp# 31,518 have red eye and yellow tips

True 1 gallon

Gaillardia x grandiflora

14-16" tall x 20-22" wide

Exposure: full sun - light shade

Blanket Flower

A hybrid of the Western perennial *G. aristata* crossed with our annual *G. pulchella*, creating a plant that blooms like an annual from late spring until frost, but returns every spring. However, great drainage is needed to successfully overwinter in our area, and low fertility will prevent leggy, floppy plants. The seeds that follow the spent blooms are loved by birds like Goldfinch. The Mesa series was developed by Kieft Seed.

Mesa Bright Bicolor ('PAS888652') - bright yellow flowers with a red eye encircling a large brown cone. Temperature dictates the width of the red band

Mesa Peach ('PAS907056') - peach colored petals dipped in yellow surrounding an orange center

Mesa Red ('PAS933516') - dark red flowers that don't fade

Mesa Yellow ('PAS888653') - dazzling, sunshine yellow blooms sit high above the foliage

Gaura 'Crimson Butterflies'

Gaura lindheimeri 'Crimson Butterflies' Crimson Butterflies Wand Flower

12-18" tall x 12" wide

Exposure: sun

This tried and true, compact cultivar was discovered in 1997 as a seedling variant of G. 'Siskyou Pink'. Crimson Butterflies features hot pink flowers on short wands, blooming all summer long! In spring, the new foliage emerges crimson red and greens slightly in the summer, and the flowers flutter above the plant like butterflies, hence the name.

True 1 gallon

Gaura 'Gaudi Red'

Gaura lindheimeri Gaudi Red ('Florgaure')

pp# 26,518

Gaudi Red Wand Flower

12-16" tall x 12" wide

Exposure: sun

Gaudi Red forms compact mounds of dark green foliage with short spikes of deep rose-red flowers. Stems and buds are darker red, adding a nice contrast. This selection has excellent branching and blooms all summer. With its compact habit, Gaudi Red looks more organized and less messy than other taller varieties. Gaura is a southwest native but hardy enough for the Midwest to enjoy. Provide plants with good winter drainage.

True 1 gallon

Gaura Silver Fountains

Gaura lindheimeri Silver Fountains ('Walsilfou')

Silver Fountains Wand Flower

pp# 31,220

24" tall & wide

Exposure: sun

In early spring the foliage of this Gaura emerges burgundy before transitioning to green with bright creamy margins. Dainty wands of sterile flowers rise above the neatly mounded foliage from early summer into early fall. Blooms open light pink and become pure white when fully open. This is the largest of the three Gauras we'll be growing for 2024. Found as a white variegated sport of G. Snow Fountain ('Walsnofou').

True 1 gallon

Geranium 'Bevan's Variety'

Geranium macrorrhizum 'Bevan's Variety'

Bevan's Variety Bigroot Geranium

8-12" tall x 18-24" wide

Exposure: light shade

Bright, magenta-pink flower clusters adorn this perennial in spring. Bevan's Variety forms a tight, dense groundcover of large, fuzzy, green leaves. The soft, pubescent leaves smell like pine or dryer sheets (depending on who you ask) making them very resistant to deer. This semi-evergreen, cool season plant benefits from a hard pruning after the first flush of flowers for cleaner summer foliage.

True 1 gallon

Geranium 'Cloud Nine'

Geranium pratense 'Cloud Nine'

Cloud Nine Meadow Cranesbill

18-20" tall x 16" wide

Exposure: sun to light shade

Fully double, pale lilac-blue flowers have a tissue paper-like texture and can measure up to 2" across. Flowering begins in May and can continue into summer. Large, extremely dissected leaves add interest. Plants are robust and don't require staking.

Trade 1 gallon

Geranium pratense 'Dark Reiter'

Dark Reiter Meadow Cranesbill

8-10" tall x 12" wide

Exposure: sun to light shade

Finely dissected, dark purple leaves show off the bright lilac-blue flowers that bloom all summer! Deadheading encourages rebloom in fall and helps maintain a neat habit. Dark Reiter combines very well with silver toned plants. It has self-seeded occasionally in our garden, but never weedy and always welcome with its purple foliage as a nice contrast in most situations.

True 1 gallon

Geranium 'Dark Reiter'

Geranium cantabrigiense 'Karmina'

Karmina Cranesbill

6-12" tall & wide

Exposure: sun to part shade

Masses of soft pink flowers cover the foliage of Karmina for an extended duration from May to July. Rich, glossy semi-evergreen foliage is aromatic when bruised and turns wine red in fall. It performs best in afternoon shade and amended soils but will persist surprisingly well through drought.

True 1 gallon

Geranium 'Karmina'

Geranium sanguineum 'Lancastriense'

Lancaster Cranesbill

6-9" tall x 12-18" wide

Exposure: sun to part shade

This harder to find Geranium is almost identical to Max Frei in foliage and habit but sports larger pale pink flowers that absolutely glow. Another synonym for this plant is *Geranium sanguineum* var. *striatum* because each delicate flower is striped in hot pink. Typically blooms the same time as Max Frei.

True 1 gallon

Geranium 'Lancastriense'

Geranium sanguineum 'Max Frei'

Max Frei Cranesbill

8-10" tall x 30" wide

Exposure: sun to light shade

One of the most popular perennial geraniums due to its compact habit, Max Frei has intense reddish purple flowers that cover the plants from May to June and sporadically all summer. Bright green finely dissected foliage is deer and rabbit resistant and makes an excellent groundcover for the garden.

Trade 1 gallon & True 1 gallon

Geranium 'Max Frei'

Geranium sanguineum 'New Hampshire Purple'

New Hampshire Purple Cranesbill

12" tall x 12-18" wide

Exposure: sun to light shade

A profusion of rose-red flowers form atop compact, spreading mounds of leaves from late spring to midsummer. The intricately cut leaves are green for most of the season but turn a brilliant crimson-red in fall. This species is so adaptable that it handles both hot summer and cold winter climates with ease.

True 1 gallon

Geranium 'New Hampshire Purple'

Geranium 'Dark Eyes'

Geranium 'Kelly Anne'

'Mary Anne'

'Rozanne'

Geranium 'Mary Anne' with 'Kelly Anne'

Geum 'Sunkissed Lime'

Geranium wallichianum hybrids (Rozanne Group)

Cranesbill 

12-18" tall x 24-36" wide

Exposure: light shade

These are vigorous, spreading perennials with bright green leaves marbled with chartreuse. Unlike other Geraniums that tend to clump and slowly meander through the garden, these varieties are more vigorous and sprawling. Large flowers are produced from late spring to early fall. These plants flower like an annual in the landscape with a non-stop show of color.

NEW Dark Eyes ('Macger001') - vibrant red-purple flowers with very dark purple veining radiating from the near black eye. The dark gray-green foliage has a bronze overlay that darkens in the sun.
pp#

NEW 'Kelly Anne' - large, bright pink blossoms have darker pink veins extending into the white centers.
pp# 34,128

NEW 'Mary Anne' - intense violet-purple flowers with near black veins.
pp# 34,576

'Rozanne' - large, blue-violet flowers with a light eye and subtle darker veins. Perennial of the Year for 2008.

Geum 'Sunkissed Lime'

pp# 26,622

Sunkissed Lime Avens 

9-12" tall x 12-16" wide

Exposure: sun to light shade

Eye-catching! This exciting Geum from Terra Nova has brilliant, electric lime leaves and bright orange flowers. By far, it is the most interesting Geum we've ever grown. Plants stay short and compact, and the showy foliage doesn't burn in full sun.

True 1 gallon

Geum 'Totally Tangerine'

pp# 22,041

Totally Tangerine Avens 

12-30" tall x 9-18" wide

Exposure: sun to light shade

Because this selection is sterile, its orange-yellow flowers are continually produced throughout the summer. Some sources claim that it produces about 5 times as many flowers as a typical Geum! It is clearly the most floriferous form we grow. Avens perform best in Ohio with afternoon shade and even soil moisture.

True 1 gallon

Geranium 'Rozanne' with 'Kelly Anne'

Geum 'Totally Tangerine'

Gypsophila cerastoides 'Pixie Splash' Pixie Splash Mouse Ear Baby's Breath
 3-5" tall x 6" wide Exposure: sun  

A mini groundcover-type Baby's Breath. Pixie Splash forms a compact carpet of semi-evergreen, thick leathery leaves, followed in late spring by dainty white flowers splashed with pink. This diminutive plant requires well-drained soil to overwinter, and it's drought tolerant once established.

Quart Sold in flats of 10 *Spring Only*

Gypsophila 'Pixie Splash'

Gypsophila paniculata Summer Sparkles ('ESM Chispa')
 pp# 19,318 Summer Sparkles Baby's Breath

24" tall x 30-40" wide Exposure: sun   
 Unlike most Baby's Breath which have an open habit and go dormant in late summer, Summer Sparkles is compact and refined, looking great all season. It forms a dense, round clump of gray-green foliage that becomes completely covered in flowers from late spring through mid-summer. The white flowers are small, semi-double, and slightly fragrant. Deadheading will encourage the plant to rebloom. Needs a well-drained site to successfully overwinter.

True 1 gallon

Gypsophila Summer Sparkles

Gypsophila repens 'Filou Rose' Filou Rose Creeping Baby's Breath
 3-5" tall x 6" wide Exposure: sun   

This groundcover Baby's Breath grows as a low mat of blue-green foliage. In late spring to early summer, plants are smothered in starry, bright pink, fragrant flowers. Immediately after flowering, lightly prune plants to encourage a new flush of flowers. Will perform best in well-drained soils.

Quart Sold in flats of 10 *Spring Only*

Gypsophila 'Filou Rose'

Helenium Mariachi Series Sneezeweed
 18-24" tall & wide Exposure: full sun   

Hybridized by Arie Blom of AB Cultivars, the Mariachi Series features incredibly vibrant flowers on shorter, 24" tall plants, more suited to today's smaller gardens. These bright summer blooms bring life to the perennial garden at a time when many plants are looking hot and dry. Sneezeweed tolerates a wide range of growing conditions but performs best in damp soils in full sun. It makes a wonderful cut flower with a long vase life.

'Fuego' - orange flowers with are tipped in yellow, with another yellow ring surrounding the copper brown center
 pp# 25,977

'Salsa' - tomato red flowers mature to shades orange and yellow, with a dark brown center
 pp# 25,978

'Sombrero' - bright yellow flowers with a matching yellow center
 pp# 25,968

True 1 gallon *Late Summer Only*

'Salsa'

'Sombrero'

Helianthus 'Autumn Gold'

Helianthus salicifolius 'Autumn Gold'

pp# 30,177

Autumn Gold Willowleaf Sunflower

24" tall & wide

Exposure: full sun

Glowing masses of bright yellow, daisy-like flowers appear in late summer and continue to early fall. Plants are upright growing with narrow, dark green, leathery leaves. Compared to *H.* 'First Light' this selection blooms 4 weeks earlier and is little more compact.

2 gallon Summer Only

Hemerocallis 'Always Afternoon'

Hemerocallis sp.

Exposure: sun

Daylily

Hemerocallis are selected for their abundance of blossoms, vibrant colors, and hardiness in a variety of climates and soils. These are tough plants that withstand heat, drought, light shade, harsh winters, wild children and hungry animals. Daylilies are a carefree, low maintenance perennial that is excellent for massing, edging, borders, or in containers. They are tolerant of winter salts from sidewalks, driveways, or roads, and they aren't affected by the juglone of Black Walnut trees. They can easily be divided every few years in fall or early spring.

Hemerocallis are typically classified by the following: bloom period (early vs late), length of time the single flowers are open (8 vs 16 hours), whether it reblooms, state of foliage in the winter (dormant vs evergreen), and number of chromosomes (diploid vs tetraploid). Most plants are diploids but tetraploids tend to be larger, more vigorous varieties. All heights listed are in flower.

Hemerocallis 'Bela Lugosi'

NEW 'Always Afternoon' - 5½", dusky rose flower with a striking plum purple eye zone and a green throat. Petals are crimped with thin buff pink edges, while the sepals are smooth. Introduced in 1987, and was the 1997 American Hemerocallis Society Silver Stout Medal Award Winner (AHS highest honor). Early Midseason Bloomer, blooming in early July. Rebloomer, producing a second set of flowers. Extended blooms with flowers staying open at least 16 hours, semi-evergreen foliage in winter, tetraploid with 44 chromosomes. Its parentage is (Ring of Change x Tiffany Palace) x Opus One. 22" tall x 18-24" wide.

Hemerocallis 'Berrylicious'

NEW 'Bela Lugosi' - 6", saturated true purple flowers with a bright lime green throat, that are very sunfast for such a dark color. Midseason Bloomer, blooming in mid-July. Semi-evergreen foliage in winter, tetraploid. Introduced in 1995, its parentage is (seedling x Nairobi Night) x tetraploid Grand Masterpiece. Winner of the 2001 AHS Award of Merit. 33" tall x 18-24" wide.

NEW 'Berrylicious' - 5", dark raspberry to red flower with a black eye zone above a yellow throat. Petals are ruffled with thin red-black edges, while the sepals are smooth. Early Midseason Bloomer, blooming in early July. Rebloomer, producing a second set of flowers. Extended blooms with flowers staying open at least 16 hours, semi-evergreen foliage in winter, tetraploid. Introduced in 2011. 20-24" tall x 24-28" wide.

True 1 gallon

Anatomy of a Daylily

Not sure what all those flower terms mean? This at-a-glance guide can help decipher "catalog speak."

Illustration by Carlie Hamilton.

Hemerocallis continued

NEW 'Chicago Apache' - 5", intense scarlet red flowers are recurved with a small sulfur yellow watermark and green throat. Petals have loosely ruffled edges, and the sepal edges are slightly crimped. The color is extremely sunfast, too. Late Midseason Bloomer, blooming in late July. Dormant foliage in winter, tetraploid, introduced in 1981. 27-30" tall x 18-24" wide.

Hemerocallis 'Chicago Apache'

NEW 'Fooled Me' - 5½", radiant golden yellow flowers with a striking deep red eyezone and green throat. Broad, rounded petals are crimped with a thin dark red edge, while the sepals are smooth. Introduced in 1990, and the 2005 American Hemerocallis Society Silver Stout Medal Award Winner (AHS highest honor). Midseason Bloomer, blooming in mid-July. Super Rebloomer, producing a second set of flowers, reputedly producing over 500 flowers on a single plant (in one year) after three years in the garden. Extended blooms with flowers staying open at least 16 hours. Dormant foliage in winter, tetraploid. 24" tall x 18-24" wide.

'Fooled Me'

'Garden Show'

NEW 'Garden Show' - large 6", shimmering, lavender mauve recurved flowers have a prominent citron yellow throat and matching purple stamens. The petals are ruffled while the sepal edges are smooth. The highly fragrant flowers sit just above the foliage rather than floating high on tall scapes. Midseason Bloomer, blooming in mid-July. Rebloomer, producing a second set of flowers. Dormant foliage in winter, diploid with 22 chromosomes. Introduced in 1997. 24-28" tall x 18-24" wide.

Hemerocallis 'Kansas Kitten'

NEW 'Kansas Kitten' - 5" lavender purple flowers with a dark purple eyezone above a green throat. The blooms are fragrant, and both the petals and sepals are ruffled. Midseason Bloomer, blooming in mid-July. Rebloomer, producing a second set of flowers. Dormant foliage in winter, diploid. Introduced in 1992, its parentage is Lavender Blue Baby x Cranberry Eyed Picotee. 22" tall x 18-24" wide.

NEW 'Mighty Chestnut' - 5" russet red-orange to chestnut brown blossoms with a bold burgundy eyezone and gold throat. The fragrant flowers have ruffled petals and smoother sepals. Late Midseason Bloomer, blooming in late July. Extended blooms with flowers staying open at least 16 hours. Dormant foliage in winter, tetraploid. Introduced in 1994, its parentage is Chicago Apache x Black Eyed Susan. 30" tall x 18-24" wide.

Hemerocallis 'Mighty Chestnut'

NEW 'Passion for Red' - large 6½", fragrant, scarlet red flowers have a deep green throat. Walters Gardens says, "For designers who are particular about their shades of red, this is more of an orange-red than a blue-red." Early Midseason Bloomer, blooming in early July and a rebloomer, producing a second set of flowers. Semi-evergreen foliage in winter, tetraploid. Introduced in 1994, its parentage is (seedling x tetraploid Super Purple) x (seedling x tetraploid When I Dream). 22" tall x 18-24" wide.

Hemerocallis
'Salieri'

'St. Catherine's Island'

'TN Volunteer'

Hemerocallis
'Nosferatu'

Hemerocallis continued

NEW 'Pink Stripes' - massive 7" magenta rose flower! Streaks and splashes of creamy pink radiate outward from the gold orange throat. Pink Stripes is one of the very first "brush stroke pattern" daylilies available for wholesale production rather than specialty mail order vendors that typically ship straight to the customer. In the past, production of this unique flower type has been limited to vegetative propagation, and then the plants must be held until they flower to cull out reverted plants that lose the magical streaked variegation in the bloom. Pink Stripes' variegation is likely due to "gene silencing" which is far more stable when reproducing plants, but we must note that the occasional flower or entire plant eye will be solid pink with a gold throat, yet still massive and eye-catching! Early Midseason Bloomer, blooming in early July. Dormant foliage in winter, diploid. Introduced in 2006, its parentage is Pink Brocade x Peppermint Parfait. 30" tall x 18-24" wide.

NEW 'Raspberry Eclipse' - 5½" fragrant flowers are raspberry purple with a lavender purple eyezone, and light green throat. The petals are heavily ruffled with a butter yellow picotee edge. The sepals are lightly ruffled with no picotee edge. Midseason Bloomer, blooming in mid-July. Rebloomer, producing a second set of flowers. Semi-evergreen foliage in winter, tetraploid. Introduced by Walters Gardens in 2019, its parentage is Southern Wind x Spiny Sea Urchin. 30" tall x 18-24" wide.

NEW 'Salieri' - 5" purple black flowers have a lemon green throat. Early Bloomer, blooming in mid-June. Extended blooms with flowers staying open at least 16 hours, dormant foliage in winter. Tetraploid, introduced in 1990. Its parentage is (Houdini x Sinbad Sailor) x Dominic. 26" tall x 18-24" wide.

NEW 'St. Catherine's Island' - large 6-6½" yellow flowers have a light yellow eyezone above a green throat. The petal midribs are watermarked with white, and their crimped gold edges are incredibly wavy! The sepals also exhibit some crimping along their edges. Midseason Bloomer, blooming in mid-July. Rebloomer, producing a second set of flowers. Tetraploid, 16-20" tall x 18-24" wide.

'Tennessee Volunteer' - large 6-6½" flowers are a shocking, eye-searing orange, with yellow midribs. Late Midseason Bloomer, blooming in late July and early August. 48" tall when in flower, they can be seen from 100 yards away! 48" tall x 30" wide.

True 1 gallon & 2 gallon

NEW 'Nosferatu' - large 6" shimmering dark purple flowers with a chartreuse throat are incredibly sunfast and fragrant. The petals have crimped wavy edges while the sepals are smooth. Midseason Bloomer, blooming in mid-July. Semi-evergreen foliage in winter, tetraploid. Introduced in 1990 and winner of the 2000 American Hemerocallis Society Award of Merit. Its parentage is Tuxedo Moon x tetraploid Grand Masterpiece. Part of the Proven Winners Rainbow Rhythm series from Walters Gardens. 26" tall x 18-24" wide.

Proven Winner True 1 gallon

Heuchera & Heucherella

Coral Bells & Foamy Bells

Heuchera and Heucherella are usually densely mounded perennials producing numerous sprays of white, cream, pink, or red flowers from spring well into summer. Breeding has produced a wide range of foliage textures including smooth, wavy, pubescent, crenate, and crinkled. Foliage colors include yellows, reds, pinks, oranges, purples, silvers, ambers, whites, greens, and bicolors. Great in mixed containers, they are showy all year and require very little water or maintenance. Heuchera and Heucherella benefit from well drained soils, partial shade, and have become versatile, well-adapted plants for the Midwest garden. Heights listed are without flowers.

This year we are organizing the plants by breeder and series rather than strictly alphabetically.

Terra Nova Heuchera

Heuchera 'Black Forest Cake'

NEW Heuchera 'Black Forest Cake'

pp# 33,532

6-12" tall x 12" wide

Exposure: part shade

Black Forest Cake Coral Bells

Smooth leathery leaves hold their deep chocolately purple color all year round! Like Obsidian, this selection does not color shift throughout the year. It also has short petioles, keeping the plant looking neat and compact. Showy dark red-pink flowers sit atop black stems in late spring to early summer.

True 1 gallon

Heuchera Champagne (spring)

Heuchera Champagne ('TNHEUCHA')

pp# 27,567

10-12" tall x 12-14" wide

Exposure: part shade

Champagne Coral Bells

The foliage of Champagne turns rosy-amber in early spring, shifts to shades of gold in summer, and then shifts back to rosy-amber in fall. Short, dark burgundy flower stems hold light peach blooms just above the plant in early summer.

True 1 gallon

Heuchera 'Fire Alarm'

Heuchera 'Fire Alarm'

pp# 24,525

9" tall x 14" wide

Exposure: part shade

Fire Alarm Coral Bells

Fire Alarm forms a mound of thick, leathery, glossy red leaves. It changes colors throughout the season, with the brightest red color appearing in cooler temperatures. Spikes of white flowers top the plant in summer. Winner of "Best Heuchera in the Shade" in 2012 Ohio State University trials.

True 1 gallon

'Fire Chief' (spring & summer)

Heuchera 'Fire Chief'

pp# 21,880

9" tall x 15" wide

Exposure: part shade

Fire Chief Coral Bells

Fire Chief forms a burning red, medium sized mound of foliage that just glows in the landscape. The leaves turn a little browner in the winter but hold a dark wine red color. Bicolor white and pink flowers are held above the foliage on dark red stems from spring into fall, frequently reblooming. Fire Chief is slower growing with a tighter habit than Fire Alarm.

True 1 gallon

Heuchera Forever Purple (year round)

Heuchera Forever Purple ('TNHEUPP')

pp# 26,358

12" tall x 15" wide

Exposure: part shade

Forever Purple Coral Bells

Glossy, purple leaves have black veins and wavy edges. The bright, almost electric color is unlike any other purple heuchera we've grown. Short spikes of purple-pink flowers appear in summer. Forever Purple lives up to its name, providing vivid color all year.

True 1 gallon

Heuchera Forever Red ('TNHEUFR')

pp# 29,644

Forever Red Coral Bells

7" tall x 14" wide

Exposure: part shade

Forever Red is touted as having "the reddest leaves ever!". The foliage holds its color all year, but its most vibrant in spring and fall when the temperatures are cooler. White flower spikes appear in late summer.

True 1 gallon

Heuchera Forever Red

Heuchera 'Green Spice'

9" tall by 16-28" wide

Exposure: part shade

Green Spice Coral Bells

One of the first Heucheras from Terra Nova, Green Spice was introduced in 1996! This tried and true americana hybrid begins the season sporting green leaves with dark purple-red veins and a purple cast. In summer, the leaves color shift to a lighter green, with dark green veins and a heavy silver overlay. Then as the temperatures become colder in autumn, Green Spice shifts back to having beet-red veins and the foliage pick-ups a pumpkin orange fall color.

True 1 gallon

'Green Spice' (spring/summer)

Heuchera 'Midnight Rose'

pp# 18,551

Midnight Rose Coral Bells

12" tall x 24" wide

Exposure: part shade

The dark, nearly black leaves are covered with hot pink polka dots. The pink spots are small in spring but grow and brighten as the season progresses. A very unique specimen for the shade garden with an unusual variegation pattern, a sport of H. 'Obsidian' that was discovered at Behnke Nursery in Maryland. One of the most sun tolerant Heucheras.

True 1 gallon

Heuchera 'Midnight Rose'

Heuchera Northern Exposure Sienna ('TNHEUNESI')

pp# 32,044

Northern Exposure Sienna Coral Bells

12-14" tall x 20" wide

Exposure: part shade

The foliage emerges yellow with orange-red middles, transitions to solid yellow-green in summer and then gets some orange-red color again in the fall. It also has incredibly showy dark pink flowers on red stems. The Northern Exposure series is incredibly cold hardy, bred from the Canada native *H. richardsonii*. It can have some difficulty during especially hot and humid periods of summer, so be sure not to overwater already stressed plants.

True 1 gallon

Northern Exposure Sienna (spring/summer)

Heuchera 'Obsidian'

pp# 14,836

Obsidian Coral Bells

10" tall x 16" wide

Exposure: sun to part shade

The large, smooth, purple-black foliage is so shiny it looks lacquered. Quite popular, it combines very well with lighter colored hostas and silver ferns. A good grower forming a dense mound, it produces small, cream colored flowers that float over the foliage in early summer. We grow Obsidian in full sun, though it has well drained soil and sufficient summer water.

Paprika Coral Bells

Described as "the brightest orange heuchera on the market!" Very showy rosy orange foliage in spring and fall, and orange to peach shades the rest of the year. Paprika sports larger, fuzzy leaves due to *H. villosa* breeding.

True 1 gallon

Heuchera 'Paris'

Heuchera 'Paris'

pp #18,881

8" tall x 14" wide

Exposure: part shade

Paris Coral Bells

Paris continuously sends up fresh stems of large, deep rose flowers, feeding hummingbirds from spring into mid-summer. The leaves are striking, with their whitish green tones and gorgeous green veins. A much prized plant for the garden that will tolerate more sun than most heucheras.

True 1 gallon

Heuchera 'Red Lightning' (spring/fall)

Heuchera 'Red Lightning'

pp #27,767

11" tall x 18" wide

Exposure: part shade

Red Lightning Coral Bells

Large, eye-catching, golden yellow leaves with vibrant red veins creating a lightning strike pattern on the thick leaves. In summer the veination is less pronounced, but the leaves still hold a nice yellow color.

True 1 gallon

Heuchera 'Rio' (summer)

Heuchera 'Rio'

pp# 24,273

9" tall x 14" wide

Exposure: part shade to shade

Rio Coral Bells

Rio has multi-colored foliage that changes throughout the season. New leaves emerge glossy rose-peach, change to amber, and finally to yellow amber. Very floriferous with outstanding, short spikes of white flowers on red stems in summer.

True 1 gallon

Heuchera 'Sugar Plum' (spring)

Heuchera 'Sugar Plum'

pp# 21,857

16" tall x 18" wide

Exposure: part shade

Sugar Plum Coral Bells

Sugar Plum stands out from other Coral Bells with its bright silver and glowing plum-purple foliage in spring. Summer turns the leaves a unique silver-gray with darker contrasting veins. Silvery pink flowers rise above the foliage on purple stems and sometimes rebloom. A fantastic, vigorous plant that blends together many types and colors of foliage.

True 1 gallon

Heuchera 'Sweet Tart'

pp# 24,573

Sweet Tart Coral Bells

5-6" tall x 8" wide

Exposure: part shade

This mini heuchera forms a tight mound of bright, lemon-lime foliage. Dense spikes of contrasting two-toned pink flowers top the plant beginning in late spring. This is one of the best yellows we have found.

Trade 1 gallon

Heuchera 'Sweet Tart'

Indian Summer Series

14" tall x 18" wide

Exposure: light shade to part shade

This series from Innoflora Plant Breeding & Gootjes Allplant, was selected for compact plants with incredibly high sun tolerance, in a gorgeous range colors and foliage texture. The Indian Summers are also proving to be extremely winter hardy here in central Ohio.

'Boysenberry' - glossy, ruffled, orange to mahogany leaves; white flowers in summer.
pp# 28,575

'Coralberry' - bright, coral-pink ruffled foliage, white flowers in summer.
pp# 28,828

'Cranberry' - in spring, leaves emerge bright reddish pink, and hold their brilliant color until the temperatures begin to cool in autumn. Then leaves become glossier and a darker orange-pink. White flowers in summer.

'Gojiberry' - glossy, ruffled leaves in amber, tangerine, and orange; white flowers in summer.
pp# 28,883

Mulberry ('Ifehemul') - rounded, glossy reddish-purple leaves with near black veins; white flowers in summer.
pp# 32,045

Heuchera 'Boysenberry'

Heuchera 'Coralberry'

Heuchera 'Cranberry' (summer & fall)

The Remainder

Hibiscus moscheutos and hybrids

A heat lover, perennial Hibiscus are slow to emerge in spring, but are vigorous growers in the summer. They will grow best planted in rich soil in full sun. Hibiscus provide bold color that is easily seen and appreciated from quite a distance. The large dinner plate sized flowers typically begin to flower in early August and continue for 4 to 8 weeks, depending on the variety and the weather.

Hibiscus moscheutos Luna Series

24-36" tall x 24" wide

Exposure: sun

Luna Perennial Hibiscus

The Luna series is a seed propagated hardy hibiscus series that has gained popularity because of its compact, well-branched, shrubby habit, with flowers measuring 6-8" across. Blooms are produced from mid-summer to frost atop bright green leaves. From PanAm Seed.

Luna Pink Swirl ('PAS351671') - pink and white flowers with cranberry-red centers

Luna Red ('PAS537702') - true red blooms

Luna Rose ('PAS490714') - rosy pink blooms with a small ruby eye

Hibiscus Luna Rose

HOSTA

Perfect for the beginning gardener, hostas are tough, long-lived plants that perform despite neglect. And, for those of us that love plants, hostas respond wonderfully to amended soils and high fertility, rewarding the attentive gardener profusely. Though not commonly used as such, hostas are a wonderful nectar source for hummingbirds.

We are frequently asked how large a particular hosta will get. The size and growth rate of a hosta greatly depends on sunlight, soil type, moisture, and fertility. The best benchmark for determining how large a hosta will grow is to observe other hostas in the area and compare that to their size categories.

Hosta sizing:

Mini (MN): < 6" tall

Very Small (VS): 6 - 10" tall

Small (S): 11 - 15" tall

Medium (M): 16 - 22" tall

Large (L): 23 - 28" tall

Giant (G): > 28" tall

Lavandula Platinum Blonde

Lavandula angustifolia Platinum Blonde ('Momparler')

pp# 23,834

Platinum Blonde English Lavender

16-24" tall x 18" wide

Exposure: full sun

Platinum Blonde features unique, variegated, needle-like foliage that is aromatic and evergreen. Fragrant blue-purple flowers bloom in summer. Does best in drier soils and full sun. Do not prune in the fall.

Trade 1 gallon

Lavandula Phenomenal

Lavandula x intermedia Phenomenal ('Niko')

pp# 24,193

Phenomenal Lavender

24-32" tall x 48" wide

Exposure: full sun

Phenomenal lives up to its name! This hybrid lavender features great tolerance to extreme heat, cold, humidity, and common diseases. Larger than average, Phenomenal forms a very uniform, dense mound of silvery green foliage topped in mid to late summer with tall wands of rich lavender purple flowers. Great used as a low hedge. Do not prune in fall.

Trade 1 gallon

Lavandula Sensational

Lavandula x intermedia Sensational ('Tesseract')

pp# 31,786

Sensational Lavender

24" tall & wide

Exposure: full sun

This sport of Phenomenal has huge flowers and broad, thick, bright silver leaves. Four inch long flower spikes are densely packed, and plants are long blooming, especially if dead-headed. Compared to its parent, Sensational is more compact with thicker foliage, larger flowers, and slightly less fragrance. Do not prune in fall.

Trade 1 gallon

Leucanthemum 'Becky'

Leucanthemum 'Becky'

Becky Shasta Daisy

36" tall x 24-36" wide

Exposure: sun-light shade

In our opinion, Becky is still the best daisy around, producing masses of large, single white flowers with a yellow cone from June to September. It brings strong sturdy stems and great durability to the garden. It's a great cut flower and will re-bloom well with deadheading. Wonderful for the beginning gardener because it's sure to grow! Perennial of the Year for 2003.

True 1 gallon

Leucanthemum 'Carpet Angel Daisy'

Leucanthemum 'Carpet Angel Daisy'

Carpet Angel Shasta Daisy

12" tall x 10-12" wide

Exposure: sun-light shade

Shaggy, anemone-type daisy flowers have drooping white rays and yellow-green centers. Blooms completely cover this compact grower in early summer. This is a great groundcover alternative.

True 1 gallon

Leucanthemum 'Goldfinch'

pp# 24,499

19-24" tall x 20" wide

Sugar Buzz Series

This new series from Walters Gardens is suitable for the middle of the border, growing to about 2' in height with dark green foliage that exhibits above average resistance to powdery mildew. Available in a multitude of colors they form a solid dome of color in mid-summer with their 2" wide flowers on well-branched stems.

NEW 'Blue Moon' - lavender blue flowers with purple bracts
pp# 29,549

'Cherry Pops' - cherry red flowers
pp# 27,618

NEW 'Pink Frosting' - pastel pink flowers
pp# 29,548

'Rockin' Raspberry' - deep raspberry-purple flowers, new growth is tipped with purple
pp# 28,752

The Remainders

NEW 'BeeMine Red' ('Balbeemed') - flowers are true red. This variety is an improved version of Fireball that blooms earlier with a more compact habit, just 15-18" tall by 14-16" wide. Part of the BeeMine series from Darwin Perennials.

'Gardenview Scarlet' - vibrant scarlet red flowers, 36" tall by 24" wide. Discovered by Henry Ross at the Gardenview Horticultural Park in Strongsville, Ohio and introduced in the 1970's.

'Purple Rooster' - selected by David Nedveck of The Flower Factory for its large, royal purple flowers and excellent mildew resistance. 36" tall x 24" wide

'Raspberry Wine' - large raspberry pink flowers, 36-48" tall by 24-36" wide. Red wine colored bracts and reddish green new foliage set this slower growing form apart from the myriad of soft red selections. Hybridized by Darrell Probst and introduced by White Flower Farms in 1992.

NEW *Nepeta subsessilis* Prelude Series

pp# 24,788

Japanese Catmint

28-36" tall x 24-30" wide

Exposure: sun

From Darwin Perennials, the Prelude Series consists of larger, more upright Japanese Catmint. Plants flower for months, from late spring through summer. If plants begin to look tired in July or August, they can be pruned back hard to rejuvenate the leaves. The fragrant foliage deters deer and rabbits but may attract the occasional cat.

Twilight Evening Primrose

10-12" tall x 18-24" wide

Exposure: full sun

This sport of *O. 'Siskiyou'* is covered in mauve-pink flowers throughout early summer. New growth emerging in the spring appears deep purple, but during the warmer months, it changes to green with a purple mid-vein. This variety over winters best in drier soils.

True 1 gallon

Oenothera b. Twilight

NEW *Oenothera missouriensis*

9-12" tall x 12-15" wide

Exposure: sun

Ozark Sundrops

Also known as *Oenothera macrocarpa* and native to the central US. From early to mid-summer, this perennial produces many bright yellow flowers with a mild fragrance. The flowers are 3-4" wide and contrast with the dark green, narrow leaves. After the flowers fade, they form decorative 4-winged seed pods that are 2-3" long, which can be used in dried flower arrangements. This plant has a trailing habit and can tolerate drought. It is ideal for planting along pathways or in rock gardens.

Quart Sold in trays of 10 & Trade 1 gallon

Oenothera missouriensis

Oenothera fruticosa "Smith's Variety"

Smith's Variety Sundrops

18-24" tall x 12-18" wide

Exposure: sun

We purchased this clone in the early 90's under the name Fireworks but have found out that this is incorrect. This plant is far superior to Fireworks! Bright yellow, slightly fragrant flowers on tall stems in June will re-flower if trimmed back early. The foliage is rich green and shows better disease resistance than other Sundrops we've grown. The semi-evergreen basal rosettes have good red fall color.

True 1 gallon

Oenothera "Smith's Variety"

Oenothera "Bumblebee"

Oenothera tetragona "Bumblebee"

Exposure: sun

Bumblebee Sundrops

This native wildflower shines brightly in the landscape. Discovered here at Smith's Gardens, cheery butter yellow flowers bloom for 2 months during the summer, attracting butterflies and bees. Sundrops will tolerate hot, dry, poor soils but perform best in cool, moist, normal soils. If the plants look scruffy after flowering, cut them down to 3-4" tall.

True 1 gallon

Papaver 'Beauty of Livermere'

Papaver orientale

Exposure: sun to light shade

Oriental Poppy

Poppies perform well in rich to average garden soils. The key to success is a well-drained site in full sun to afternoon shade. Clump-forming plants have serrated, thistle-like, gray-green leaves, up to 12" long. Crepe paper-like flowers bloom on long wiry stems in late spring to early summer. The foliage then yellows and dies shortly after flowering. In fall, basal mats of new leaves re-appear and overwinter until spring when the plants begin to grow again until the flowers bloom. Plants tend to self-seed in the garden, but may not come true to form.

NEW 'Beauty of Livermere' - large 4-6" scarlet red flowers, with a near black blotch at the base of each petal, and dark purple stamens. 24-36" tall x 18-24" wide

'Fruit Punch'

'Royal Wedding'

'Fruit Punch' - large 5" blooms of hot pink, orange, plum and red, flowering in late spring. All have dark centers and ruffled petals. Blooms are weather resistant and will not flop. 24-30" tall x 15-18" wide

NEW 'Prince of Orange' - large 4-5" blooms are the color of tangerines, with a dark purple to near black splotch at the base of each petal, and dark purple stamens. 30" tall x 18-24" wide

'Royal Wedding' - large 4-6" blooms are pure white with dark purple centers. 30" tall x 18-24" wide

Scabiosa 'Ritz Rose'

Sedum 'Blue Spruce'

Sedum 'Tricolor'

'Cosmic Comet' (foliage & flowers)

Scabiosa japonica var. aplina Ritz series

Dwarf Pincushion Flower

6-8" tall & wide

Exposure: sun

This dwarf alpine form of Scabiosa has a very long flowering season, from early summer right into fall. Remove faded flowers regularly to encourage more buds. Plants form a low mound of gray-green, somewhat ferny foliage, bearing small round pincushion flowers. Scabiosa prefer full sun, but this species can tolerate light shade. They need average to low water, and good drainage is essential for overwintering success.

'Ritz Blue' - blue flowers with a lighter silvery blue center

'Ritz Rose' - soft pink flowers

Quart sold in trays of 10

Groundcover Sedum sp.

Stonecrop

Exposure: sun

Groundcover sedums come in many varieties, with foliage types ranging from large leathery leaves to tiny, delicate needles. A wide range of foliage and flower colors are available too! Sedums thrive in dry areas with low fertility. Over watering during the growing season, or siting in an area with soggy winter soils will result in death. However when these plants are happy, they form a solid decorative mat. They usually do not tolerate foot traffic.

reflexum 'Blue Spruce' - the name says it all! This glaucous, gray-blue needle-like foliage resembles the branches of a Blue Spruce. Yellow flowers bloom in early summer. 6" tall by 12-18" wide.

spurium 'Tricolor' - tiny green leaves are dappled with pink and creamy white. Soft pink, star-shaped flowers completely cover the leaves in early summer. 3-6" tall by 12-18" wide.

SunSparkler Series

First introduced in 2014, this series from breeder Chris Hansen is comprised of short groundcover sedums averaging 6" tall by 18" wide, in a range of colors and variegations.

'Cosmic Comet' - glaucous blue foliage all season, raspberry pink flowers ppaf in late summer. *Limited quantity*

'Dazzling Dynamite' - deep purple foliage edged in neon orange, yellows, and pink. *Limited quantity* (photo on next pg)

'Firecracker' - striking ruby red foliage is covered in large clusters of hot pink flowers in August and September. (photo on next pg)

'Lime Twister' - small, mouse-ear shaped leaves are bright lime green and edged in creamy white. The white edge will turn pink-red in the cool temperatures of spring and fall. Dark pink flowers cover the foliage in late summer into fall. A sport of Lime Zinger. (photo on next pg)

'Plum Dazzled' - eye catching, intense plum-purple foliage stands out in the landscape. The foliage is covered in large sprays of rosy red flowers from summer to fall. (photo on next pg)

Quart sold in trays of 10

Squat 1 gallon

Upright Sedum sp.

Exposure: sun

Stonecrop

Like the groundcover types, upright sedums come in many varieties, with foliage color ranging from deep purple to light green. Typically the flowers are a shade of light pink to brick red. Sedums thrive in dry areas with low fertility. Over watering during the growing season or siting in an area with soggy winter soils will result in death.

'Autumn Fire' - an improvement on Autumn Joy, with a tighter habit, thicker foliage, and brighter flowers; 18-24" tall & wide.

'Frosted Fire' - leaves edged in white to cream; a variegated sport of Autumn Fire. 24-30" tall by 18-24" wide.

spectabile 'Neon' - selected from a block of Sedum 'Brilliant'. Its intense, vibrant, rose-pink flowers stood out from the rest being much brighter than its parent. 24" tall x 12-15" wide.

'T-Rex' - selected here at Smith's Gardens from a block of Sedum 'Autumn Joy'. Its leaves are heavily toothed and cupped, giving the plant much more textural interest, especially before it flowers. This selection is more resistant to stem rot, making it easier to grow and/or hold in a container. The flower color, the same as Autumn Joy, is a nice mid-pink. 24" tall x 12-15" wide.

Sempervivum Classics

Hens and Chicks

3-4" tall & wide

Exposure: sun

Hens and Chicks are fun and easy to grow. They do great in full sun with very little soil, but good drainage is the most important requirement. Kids and adults love to watch these unusual plants grow and multiply in the garden or in containers.

tectorum 'Oddity' - thick, tubular lime green leaves with open tips that pick up a crimson tint. A very distinctive look, adding texture to the rock garden or containers.

'Royal Ruby' - ruby-red to gray-red rosettes

Quart Sold in trays of 10

Sempervivum Chick Charms Collection

Hens and Chicks

3-4" tall & wide

Exposure: sun

Enduring hardy succulents that offer color all year round! The Chick Charms collection is a curated selection of hens and chicks, handpicked from a vast array of varieties and thousands of seedlings. Each variety in this collection is chosen for its vibrant, year-round color and exceptional hardiness. These collectible succulents are as tough as they are charming! From Chris Hansen at Garden Solutions.

NEW Chick Charms Berry Blues ('Pacific Blue Ice')- icy blue-green rosettes, in cooler weather they pick up a rose blush.

NEW Chick Charms 'Butterscotch Baby' - rosettes have candy apple red edges that melt right into the butterscotch center

NEW Chick Charms Chocolate Kiss ('Pacific Devil's Food') - this variety shows a range of reds, from golden tones in the summer to chocolately purples in the winter. It produces lots of new chicks each spring, quickly growing into an impressive colony.

Chick Charms 'Gold Nugget'- this unique sempervivum sports a different look for every season. In spring the rosettes are crimson with yellow tips. The heat of summer turns them an electric lime green, and then the cooling temperatures of autumn shifts the rosettes to neon yellow with red tips. (photo on next pg)

NEW Chick Charms 'Gold Rush' - brilliant ruby red rosettes are tipped in vibrant bright gold, colors become somewhat muted during the heat of the summer. (photo on next pg)

NEW Chick Charms 'Lotus Blossom' - an improvement on the previous Chick Charms variety called Citrus Sunrise. Stunning dark pink rosettes in the shape of a lotus flower, with each slender leaf edged in white, reminiscent of peppermint candy. Colors intensify in the spring and fall. (photo on next pg)

Sisyrinchium 'Moody Blues'

Sisyrinchium idahoense var. *macounii* 'Moody Blues'

Moody Blues Blue-Eyed Grass

6" tall x 12" wide

Exposure: full sun to bright shade

Striking, star-shaped, violet-blue flowers dance above the grassy iris-like foliage beginning in late spring and continuing into summer. A sun worshipper, the vivid flowers open in the morning, but tend to remain closed on cloudy days. Moody Blues grows best in moist areas with good drainage but will tolerate almost any garden conditions.

Quart Sold in trays of 10

Solidago Little Lemon

Solidago Little Lemon ('Dansolitlem')

pp# 17,392

Little Lemon Goldenrod

12-15" tall & wide

Exposure: full sun to bright shade

The most compact, dwarf yellow *Solidago* to date, Little Lemon is well branched and blooms in mid-summer. Also worthy of noting: the pollen of Goldenrod is too heavy to be blown by the wind, rather it falls to the ground, so it doesn't cause allergies.

True 1 gallon

Stachys 'Helen von Stein'

Stachys byzantina 'Helen von Stein'

Big Ears Lamb's Ear

8" tall x 24" wide

Exposure: sun-part shade

Large, thick, soft, velvety leaves makes this plant irresistible! This Lamb's Ear forms a quickly spreading mat, 8" tall. Flower stalks appear in mid-summer, but are usually removed by gardeners to keep the plant neat and short. Some summer die-out may occur in wet soils or during humid summers. Also known as Big Ears.

True 1 gallon

Stachys minor

Stachys minor (*S. minima*)

Dwarf Betony

8" tall & wide

Exposure: sun-shade

Short, dense, upright spikes of vibrant pink flowers are produced in late June and July. Glossy, waxy, crenate, dark green foliage is resistant to burn and wilt in summer and is semi-evergreen in winter. Attractive seed heads are held from late summer into early spring of the following year. Grows 8" tall in full sun or shade. This easy to grow perennial is perfect for the front of the border or as an edging plant.

Trade 1 gallon

Stachys 'Hummelo'

Stachys monnieri 'Hummelo'

Hummelo Betony

18-24" tall x 18" wide

Exposure: sun-shade

Similar to *Stachys officinalis* but with slightly longer glossier leaves, flowers 2-3 weeks earlier, and has narrower flower spikes. Flowers are an outstanding shade of dark, saturated pink, starting in mid-summer. The flower color is darker than *S. officinalis*, but a bit less floriferous. Semi-evergreen with showy seed stalks in winter.

True 1 gallon

Stokesia laevis 'Honeysong Purple'

12-14" tall x 15" wide

Exposure: sun-light shade

Honeysong Purple Stokes' Aster

Honeysong Purple is a wonderful Stokesia producing large, 3" diameter, intense royal purple flowers in summer. The plants have short, strong, stems that hold the flowers uniformly above the foliage. Deep green foliage is free of insect or disease problems and has a neat mounded habit. The seed heads are quite attractive and extend interest into the fall. Native to the Southeastern USA.

True 1 gallon & 2 gallon

Stokesia 'Honeysong Purple'

Stokesia laevis 'Peachie's Pick'

18" tall & wide

Exposure: sun-light shade

Peachie's Pick Stokes' Aster

Peachie's Pick blooms are up to 3" across and a lovely lavender-blue. They flower later than other Stokes' Asters, extending the season for this colorful perennial. Its strictly upright habit differentiates this selection from others. The seed heads are quite attractive and extend interest into the fall. Native to the Southeastern USA.

True 1 gallon & 2 gallon

Stokesia 'Peachie's Pick'

Thalictrum aquilegifolium 'Black Stocking'

48-60" tall x 18-24" wide

Exposure: sun-light shade

Black Stocking Meadow Rue

This statuesque perennial makes a distinguished presence in the back of a border or the edge of a woodland with its black stems and Columbine-like, lacy green foliage. Fluffy bright lavender flowers bloom in early summer. The combination of black stems and frothy flower heads makes for an interesting cut flower. Does best in full sun with moist soils or along the woodland.

Trade 1 gallon

Thalictrum 'Black Stocking'

Thalictrum aquilegifolium 'Nimbus White'

18-28" tall x 16" wide

Exposure: sun-light shade

Nimbus White Meadow Rue

A smaller Meadow Rue, Nimbus White only reaches 28" tall when in flower. Masses of cloud-like white flowers are held on dark stems above the ferny, Columbine-like foliage. The white flowers become lavender pink seed heads, extending the show into late summer. Grows well in full sun to part shade in moist, organic soils with average water needs.

Trade 1 gallon

Thalictrum 'Nimbus White'

Thymus serpyllum 'Magic Carpet'

Tradescantia

16-24" tall x 18-24" wide

Exposure: sun to part shade

Spiderworts are clump-forming herbaceous perennials with arching, grass-like foliage. Prolific bloomers, flowering starts in late spring and continues into late summer. They prefer moist soil in full sun. Cut plants back hard if they start to look tired, they will produce fresh new foliage and will often re-flower.

Spiderwort

'Blueberry Sundae' - plum colored buds open to very large, icy blue flowers with a darker, lavender-blue eye; 24" tall. Longer than average bloom time. **Sold out for 2024**

'Leonora' - beautiful violet-blue flowers, 16" tall & wide

'Sweet Kate' - brilliant gold foliage, vibrant violet-blue flowers; 12" tall

True 1 gallon

Tricyrtis formosana 'Autumn Glow'

Autumn Glow Toad-lily

24" tall x 24-30" wide

Exposure: part shade

Orchid-like flowers cover the gracefully arching stems of this early fall flowering perennial. Flowers are heavily spotted and reddish-purple in color. Bright green, waxy leaves are edged in brilliant gold.

True 1 gallon

Tricyrtis formosana 'Samurai'

Samurai Toad-lily

12-18" tall x 12-24" wide

Exposure: part shade

Samurai is a compact selection with shiny, dark green leaves thinly edged in golden-yellow to cream. Its small, orchid-like, pink-purple flowers with yellow throats are heavily freckled with dark purple, and bloom in early to mid-autumn.

True 1 gallon

Tricyrtis 'Sinonome'

Sinonome Toad-lily

30" tall x 18-24" wide

Exposure: part shade

Orchid-like flowers are heavily spotted white and reddish purple. Bright green, waxy leaves cover the stems from top to bottom. A wonderful plant that should be sited so the interesting flowers can be seen up close. Sinonome is more tolerant of drier conditions than many Toad-lilies and has an exceptionally long bloom duration. In our yard, the plants will get hit with a hard frost before they're finished flowering. Foliage is deer resistant, but they love pruning off the buds in late summer.

Athyrium filix-femina 'Lady in Red'

Athyrium filix-femina var. angustum 'Lady in Red'

18-24" tall & wide

Exposure: light-deep shade

Lady in Red Northern Lady Fern

A selection of our native Northern Lady Fern which is found in rich moist woods, thickets, fields, meadows, and ravines throughout northern North America. Lady in Red is slightly smaller than the straight species, with lacy light green fronds that contrast with burgundy-red stems for which it was named.

True 1 gallon

Athyrium niponicum 'Regal Red'

Regal Red Japanese Painted Fern

12-18" tall x 18-24" wide

Exposure: light-deep shade

Loose arching mounds of silvery green fronds are heavily tinted with pinks and mahogany that provide a striking contrast to its rich red stems. An excellent grower for part to full shade and evenly moist soils. Great for brightening up a dark area in the shade garden and blending with almost anything. One of the most colorful and easy to grow hardy ferns.

True 1 gallon

Athyrium niponicum 'Regal Red'

Matteuccia struthiopteris

Ostrich Fern

36-48" tall x 36" wide

Exposure: sun-shade

Huge plume-like fronds arch from a central crown and will produce large colonies over time. This fern will tolerate quite a bit of sun given adequate water, and quite a bit of drought given adequate shade. A very vigorous grower when properly sited.

True 1 gallon

Matteuccia struthiopteris

GRASSES

Andropogon gerardii 'Blackhawks'

pp# 27,949

4-5' tall x 2' wide

Exposure: sun

Blackhawks Big Bluestem

This long-lived grass was found as a seedling of Red October. It forms a robust, upright clump of dark green foliage. As the nights start to cool in late August, the foliage undergoes a stunning transformation, turning purple and deepening to almost black by late September. In late summer, flowering stems rise above the foliage, bearing unique purplish, 3-part, finger-like flower clusters that can be up to 4" long. These clusters bear a striking resemblance to turkey feet, resulting in another common name of turkeyfoot grass. Big Bluestem was once the dominant member of the tall-grass prairie and has adapted easily to a wide range of conditions, provided it receives full sun. It serves multiple purposes, including acting as a specimen plant, providing screening, naturalizing landscapes, restoring prairies, and offering nesting materials for birds and mammals.

True 1 gallon

Andropogon 'Blackhawks' (early fall)

Calamagrostis x acutiflora 'Eldorado'

pp# 16,486

3-5' tall x 2-3' wide

Exposure: sun-light shade

Eldorado Feather Reed Grass

A striking ornamental grass that is attractive throughout the year! Dark green leaves are uniquely striped down the middle with gold, giving this cultivar its name. Clumps grow vertical flower spikes that can reach up to 5' high. In early summer, it produces purplish-yellow flowers that provide visual interest year-round. This grass is not invasive but adapts easily to a wide range of conditions, including full sun, light shade, and damp clay soils. It's drought-tolerant once established.

True 1 gallon

Calamagrostis 'Eldorado' (late spring)

Calamagrostis 'Karl Foerster'

Calamagrostis x acutiflora 'Karl Foerster' Karl Foerster Feather Reed Grass

3-4' tall x 1.5-2' wide

Exposure: sun-part shade

Perennial of the year for 2001, Karl Foerster is easy to grow with a strictly upright, clumping habit. Greenish, loose clustered flowers appear in June, quickly followed by tight, upright, warm brown spikes of seed. It will grow 2-3' tall in dry sites while attaining 4-5' in richer soil. Very tough.

True 1 gallon

Calamagrostis 'Lightning Strike'

NEW Calamagrostis x acutiflora 'Lightning Strike'

Lightning Strike Feather Reed Grass

2.5-3.5' tall x 1.5' wide

Exposure: sun-part shade

A brightly variegated grass with dark green leaf blades that have a wide white stripe running down the center. It has a clumping habit with stiff, upright growth. The fat green flowers produced in June dry to narrow, upright, tan spikes that look like wheat seed heads and persist into fall.

True 1 gallon

Calamagrostis 'Overdam'

Exposure: sun-light shade

Dixieland Japanese Silver Grass

Dixieland is a dwarf form of *Miscanthus s. 'Variegatus'* with very similar green and white variegated foliage but a shorter, more compact growth habit. The silky pink plumes which appear in late summer are very showy, maturing to silvery-white.

True 1 gallon

Miscanthus 'Dixieland'

Miscanthus sinensis 'Morning Light'

4-5' tall x 3-4' wide

Exposure: sun-light shade

Morning Light Japanese Silver Grass

Morning Light is a slow-growing very fine bladed, graceful grass with variegated, creamy white margins. This variety needs more heat to flower than other selections, but is grown primarily for its misty, airy foliage texture.

True 1 gallon

Miscanthus 'Morning Light'

Panicum 'Purple Tears'

NEW Panicum virgatum 'Purple Tears'

pp# 28,518

3-4' tall x 2' wide

Exposure: sun

Purple Tears Switchgrass

Most likely a seedling of Shenandoah, discovered by Piet Oudolf of the Netherlands, Purple Tears has lighter green foliage that persists through out the season. In late summer, soft gray flower stems carry decorative airy purple seed heads. Panicum is one of the dominant species of the tallgrass prairie, but also grows along roadsides where moisture is present. It adapts to both sandy and clay soils, and is drought tolerant once established. Site in full sun, as part shade can lead to lodging plants.

True 1 gallon

Pennisetum Lumen Gold (spring/summer)

NEW Pennisetum alopecuroides Lumen Gold ('JS Jommenik')

pp# 27,435

1.5-2' tall & wide

Exposure: sun

Lumen Gold Fountain Grass

This grass glows in the spring landscape with bright golden yellow leaves that mature to chartreuse in summer. Fall colors are a mix of golds and oranges. Plants have a rounded, compact habit and hold their foliage late into winter. In late summer, this cutie shows an abundance of lavender-brown, bottlebrush-like flowers. Excellent choice for year round interest for patio or deck. Pennisetum prefers well-drained soils, especially in winter. Lumen Gold is an all gold sport of *P. 'Gelbstiel'*. Concept Plants says, "When covered with snow, hardy to USDA Zone 5b, without snow, hardy to USDA Zone 5a."

True 1 gallon

Pennisetum 'Karley Rose'

Pennisetum orientale 'Karley Rose'

2-4' tall x 2-3' wide

Exposure: sun-light shade

Karley Rose Fountain Grass

This selection produces intense, smoky rose-purple flowers starting in mid-summer and continuing until fall. The colorful plumes are held above the glaucous, blue-green, horizontally layered foliage for a soft, but colorful display. Good drainage, especially overwinter, is needed for best performance. Selected and introduced by David Skwiot, Sunny Border Nursery, CT.

Deer Resistant Plants

Shrubs, Vines and Trees

Abelia x mosanensis – Fragrant Abelia
 Albizia julibrissin - Mimosa
 Buddleia – Butterfly Bush
 Callicarpa – Beauty Berry
 Campsis – Trumpet Creeper
 Caryopteris x clandonensis – Bluebeard
 Chionanthus retusus – Fringe Tree
 Clematis – Large Flower
 Clematis maximowicziana – Sweet Autumn
 Helianthemum – Sun Rose
 Indigofera amblyantha – Indigo
 Liquidambar – Sweetgum
 Lonicera – Honeysuckle
 Magnolia – Magnolia
 Nyssa – Black Gum
 Salix – Willow
 Sinocalycanthus raulstonii – Sweetshrub
 Spirea japonica - Spirea
 Weigela – Weigela
 Vitex – Chaste Tree

Grasses

Acorus – Sweet Flag
 Andropogon gerardii - Big Blue Stem
 Bouteloua gracilis– Grama Grass
 Calamagrostis x acutiflora – Feather Reed Grass
 Carex morrowii – Sedge
 Chasmanthium latifolium – Northern Sea Oats
 Miscanthus sinensis – Japanese Silver Grass
 Panicum virgatum – Switch Grass
 Pennisetum – Fountain Grass
 Phalaris – Ribbon Grass
 Schizachyrium scoparium – Little Bluestem
 Sporobolus heterolepis – Prairie Dropseed
 Sporobolus wrightii - Giant Sacatoon

Perennials and Ferns

Acanthus - Bear's Breches
 Achillea millefolium – Yarrow
 Aconitum napellus - Monkshood
 Actaea – Doll's Eyes
 Aegopodium – Snow on the Mountain/ Goutweed
 Agastache – Hyssop, Hummingbird Mint
 Ajuga - Bugleweed
 Alcea - Hollyhock
 Alchemilla – Lady's Mantle
 Allium - Chives, Ornamental Onion
 Amsonia – Blue Star
 Anemone – Japanese Anemone, Windflower
 Aquilegia – Columbine
 Aralia - Japanese Spikenard
 Arisaema triphyllum - Jack-in-the-Pulpit
 Aruncus – Goat's Beard
 Asclepias – Butterfly Weed, Milkweed
 Astilbe – False Spirea
 Athyrium – Fern
 Baptisia – False or Wild Indigo
 Belamcanda – Blackberry Lily
 Bergenia – Bergenia, Pig Squeak
 Blechnum spicant – Deer Fern
 Brunnera macrophylla – Siberian Bugloss

Perennials and Ferns (continued)

Campanula - Bellflower
 Centaurea – Mountain Bluet, Bachelor's Button
 Cerastium – Snow in Summer
 Ceratostigma - Blue Leadwort
 Chelone – Turtlehead
 Chrysanthemum nipponicum – Montauk Daisy
 Cimicifuga - Bugbane, Fairy Candles, Snake Root
 Convallaria - Lily-of-the-Valley
 Coreopsis – Coreopsis, Tickseed
 Cyrtomium fortunei – Holly Fern
 Delosperma – Ice Plant
 Delphinium - Delphinium
 Dianthus – Pinks
 Dicentra – Bleeding Heart
 Digitalis – Foxglove
 Dryopteris – Wood Fern, Autumn Fern
 Echinacea - Coneflower
 Eryngium yuccifolium – Rattlesnake Master
 Eupatorium – Joe-Pye Weed
 Euphorbia – Spurge
 Ferns – most ferns are unpalatable
 Filipendula – Meadowsweet
 Gaillardia – Blanket Flower
 Gaura – Wand Flower
 Geranium – Cranesbill
 Geum – Avens
 Helenium – Sneezeweed
 Helianthus – Sunflower
 Heliopsis - False Sunflower
 Helleborus – Lenten Rose
 Heuchera – Coral Bells
 Heucherella – Foamy Bells
 Hibiscus – Perennial Hibiscus/Rose Mallow
 Iris ensata – Japanese Iris
 Iris psuedoacorus – Swamp Iris
 Iris sibirica – Siberian Iris
 Isotoma – Blue Star Creeper
 Kirengeshoma – Waxbells
 Knautia macedonica – Field Scabiosa
 Kniphofia – Red Hot Poker
 Lamium - Deadnettle
 Lavandula angustifolia – Lavender
 Leucanthemum – Daisy (occasionally will eat flowers)
 Liatris spicata – Gayfeather, Blazing Star
 Ligularia – Leopard Plant
 Lychnis x arkwrightii—Maltese Cross
 Lysimachia —Loosestrife
 Matteuccia struthiopteris – Ostrich Fern
 Monarda - Beebalm
 Musa basjoo - Hardy Fiber Banana
 Nepeta – Catmint
 Oenothera – Sundrops, Evening Primrose
 Origanum – Oregano
 Paeonia – Peony
 Papaver - Poppy
 Penstemon - Beard Tongue
 Perovskia x atriplicifolia – Russian Sage
 Phlox – Phlox
 Physostegia – Obedient Plant
 Platycodon grandiflorus – Balloon Flower

- Continued on next page -

Deer Resistant Plants (continued)

Perennials and Ferns (continued)

Polemonium reptans – Jacob's Ladder
 Polygonatum – Solomon's Seal
 Polystichum polyblepharum – Tassel Fern
 Primula - Primrose
 Pulmonaria – Lungwort
 Rodgersia – Rodger's Flower
 Rudbeckia – Black-eyed Susan
 Salvia – Garden Sage
 Sauromatum venosum - Voodoo Lily
 Scabiosa – Pincushion Flower
 Sedum – Sedum, Stonecrop
 Silene – Campion
 Sisyrinchium – Blue-eyed Grass
 Solidago – Goldenrod
 Stachys – Betony, Lamb's Ear
 Stokesia laevis – Stokes' Aster
 Tanacetum - Painted Daisy
 Thalictrum – Meadow-rue
 Thelypteris - Japanese Beech Fern
 Tiarella – Foamflower
 Tradescantia – Spiderwort
 Tricyrtis – Toad-lily
 Trillium grandiflorum - White Trillium
 Verbascum – Mullein
 Vernonia – Ironweed
 Veronica – Speedwell
 Viola - Violet
 Zauschneria - Hardy Fuschia

Attractive to Butterflies

Shrubs, Vines and Trees

Abelia x mosanensis – Fragrant Abelia
 Buddleia – Butterfly Bush
 Callicarpa – Beauty Berry
 Caryopteris – Bluebeard
 Clematis maximowicziana – Sweet Autumn
 Helianthemum – Sun Rose
 Hibiscus syriacus - Rose of Sharon
 Hypericum – St. Johnswort
 Indigofera - Indigo
 Lonicera – Honeysuckle
 Nyssa sylvatica – Black Gum, Tupelo
 Salix – Willow
 Vitex agnus-castus – Chastetree

Perennials

Achillea – Yarrow
 Actaea pachypoda- Doll's Eyes
 Agastache – Hyssop, Hummingbird Mint
 Ajuga - Bugleweed
 Alcea - Hollyhock
 Allium - Chives, Ornamental Onion
 Aquilegia - Columbine
 Armeria psuedoarmeria – False Sea Thrift
 Aruncus - Goat's Beard
 Asclepias – Butterfly Weed, Milkweed
 Astilbe – Astilbe

Attractive to Butterflies (continued)

Perennials (continued)

Baptisia – Indigo
 Belamcanda – Blackberry Lily
 Centaurea – Mountain Bluet, Bachelor's Button
 Ceratostigma—Blue Leadwort
 Chelone – Turtlehead
 Chrysanthemum nipponicum – Montauk Daisy
 Coreopsis – Tickseed, Coreopsis
 Dianthus – Pinks
 Echinacea – Coneflower
 Eryngium yuccifolium – Rattlesnake Master
 Eupatorium – Joe-Pye Weed
 Filipendula – Meadowsweet
 Gaillardia – Blanket Flower
 Gaura – Wand Flower
 Geum – Avens
 Helenium – Sneezeweed, Helen's Flower
 Helianthus - Sunflower
 Heliopsis - False Sunflower
 Heuchera - Coral Bells
 Heucherella - Foamy Bells
 Hibiscus moschuetos - Perennial Hibiscus
 Iris ensata - Japanese Iris
 Iris sibirica - Siberian Iris
 Knautia macedonica – Field Scabiosa
 Kniphofia – Red Hot Poker
 Lamium - Deadnettle
 Lavandula angustifolia – Lavender
 Leucanthemum x superbum – Shasta Daisy
 Liatris spicata – Gayfeather, Blazing Star
 Ligularia – Leopard Plant
 Lobelia - Cardinal Flower, Lobelia
 Lyncis x arkwrightii - Maltese Cross
 Lysimachia —Loosestrife
 Malva - Mallow
 Monarda - Beebalm
 Nepeta – Catmint
 Oenothera tetragona – Sundrops, Evening Primrose
 Paeonia – Peony
 Papaver - Poppy
 Penstemon - Beardtongue
 Perovskia x atriplicifolia – Russian Sage
 Phlox – Phlox
 Primula - Primrose
 Rudbeckia – Black-eyed Susan
 Salvia – Garden Sage
 Scabiosa – Pincushion Flower
 Sedum – Sedum, Stonecrop
 Sidalcea - Prairie Mallow
 Silene – Campion
 Sisyrinchium – Blue-eyed Grass
 Solidago – Goldenrod
 Spigelia - Indian Pink
 Stokesia laevis – Stokes' Aster
 Tanacetum - Painted Daisy
 Tiarella - Foam Flower
 Tradescantia – Spiderwort
 Verbascum - Mullein
 Vernonia – Ironweed
 Veronica – Speedwell
 Viola - Violets
 Zauschneria - Hardy Fuschia

Plants for Cut Flowers or Foliage

Shrubs, Trees, and Vines

Buddleia – Butterfly Bush
Clematis – Large Flower
Clematis maximowicziana – Sweet Autumn
Hydrangea - Hydrangea
Hypericum – St. Johnswort
Rosa – Rose
Salix babylonica – Willow
Sarcococca hookerana – Sweet Box
X Sinocalycanthus raulstonii - Sweetshrub
Vitex agnus-castus – Chaste Tree

Grasses

Bouteloua gracilis – Grama Grass

Agastache – Hyssop, Hummingbird Mint
Alcea - Hollyhock
Alchemilla – Lady's Mantle
Allium - Chives, Ornamental Onion
Anemone – Anemone
Aquilegia – Columbine
Aruncus – Goats Beard
Asclepias - Milkweed
Astilbe – Astilbe
Athyrium – Lady Fern, Ghost Fern, Painted Fern
Baptisia – False or Wild Indigo
Belamcanda chinensis – Blackberry Lily
Bergenia – Pigs Squeak
Campanula glomerata – Bellflower
Campanula punctata – Bellflower
Centaurea – Mountain Bluet
Chelone - Turtlehead
Chrysanthemum nipponicum – Montauk Daisy
Cimicifuga - Bugbane, Fairy Candles, Snakeroot
Convallaria - Lily of the Valley
Coreopsis – Tickseed, Coreopsis
Dianthus – Pinks
Dicentra – Bleeding Heart
Digitalis – Foxglove
Disporopsis pernyi – Asiatic Fairy Bells
Dryopteris - Autumn Fern, Wood Fern
Echinacea – Coneflower
Epimedium – Barwort
Eryngium – Rattlesnake Master
Eupatorium – Joe-Pye Weed
Euphorbia – Spurge
Filipendula – Meadowsweet
Geum - Avens

Perennials and Ferns (continued)

Helenium – Sneezeweed, Helen's Flower
Helianthus salicifolius – Willowleaf Sunflower
Heliopsis - False Sunflower
Heuchera – Coral Bells
Heucherella - Foamy Bells
Hosta – Hosta
Iris ensata - Japanese Iris
Iris sibirica – Siberian Iris
Knautia macedonica – Field Scabiosa
Kniphofia – Red Hot Poker
Lavandula angustifolia – Lavender
Leucanthemum x superbum – Shasta Daisy
Liatris spicata – Gayfeather, Blazing Star
Ligularia – Leopard Plant
Lilium - Lily
Lobelia - Cardinal Flower, Lobelia

 Salvia – Garden Sage
 Sidalcea - Prairie Mallow
 Spigelia - Indian Pink
 Stachys - Betony
 Verbascum – Mullein
 Veronica – Speedwell
 Zauschneria - Hardy Fuschia

Native to Ohio and Adjacent States

Shrubs, Vines and Trees

Aesculus flava - Yellow Buckeye
 Aesculus glabra - Ohio Buckeye
 Aesculus parviflora - Bottlebrush Buckeye
 Asimina triloba - Pawpaw Tree
 Campsis – Trumpet Vine
 Cercis canadensis – Redbud
 Magnolia acuminata hybrids - Magnolia
 Liquidamber – Sweetgum
 Lonicera – Honeysuckle
 Nyssa sylvatica – Black Gum, Tupelo
 Quercus - Oak
 Salix - Willow
 Wisteria futescens - American Wisteria

Grasses

Andropogon gerardii - Big Blue Stem
 Bouteloua gracilis – Grama Grass
 Chasmanthium latifolium – Northern Sea Oats
 Panicum virgatum – Switch Grass

Native to Ohio and Adjacent States (continued)

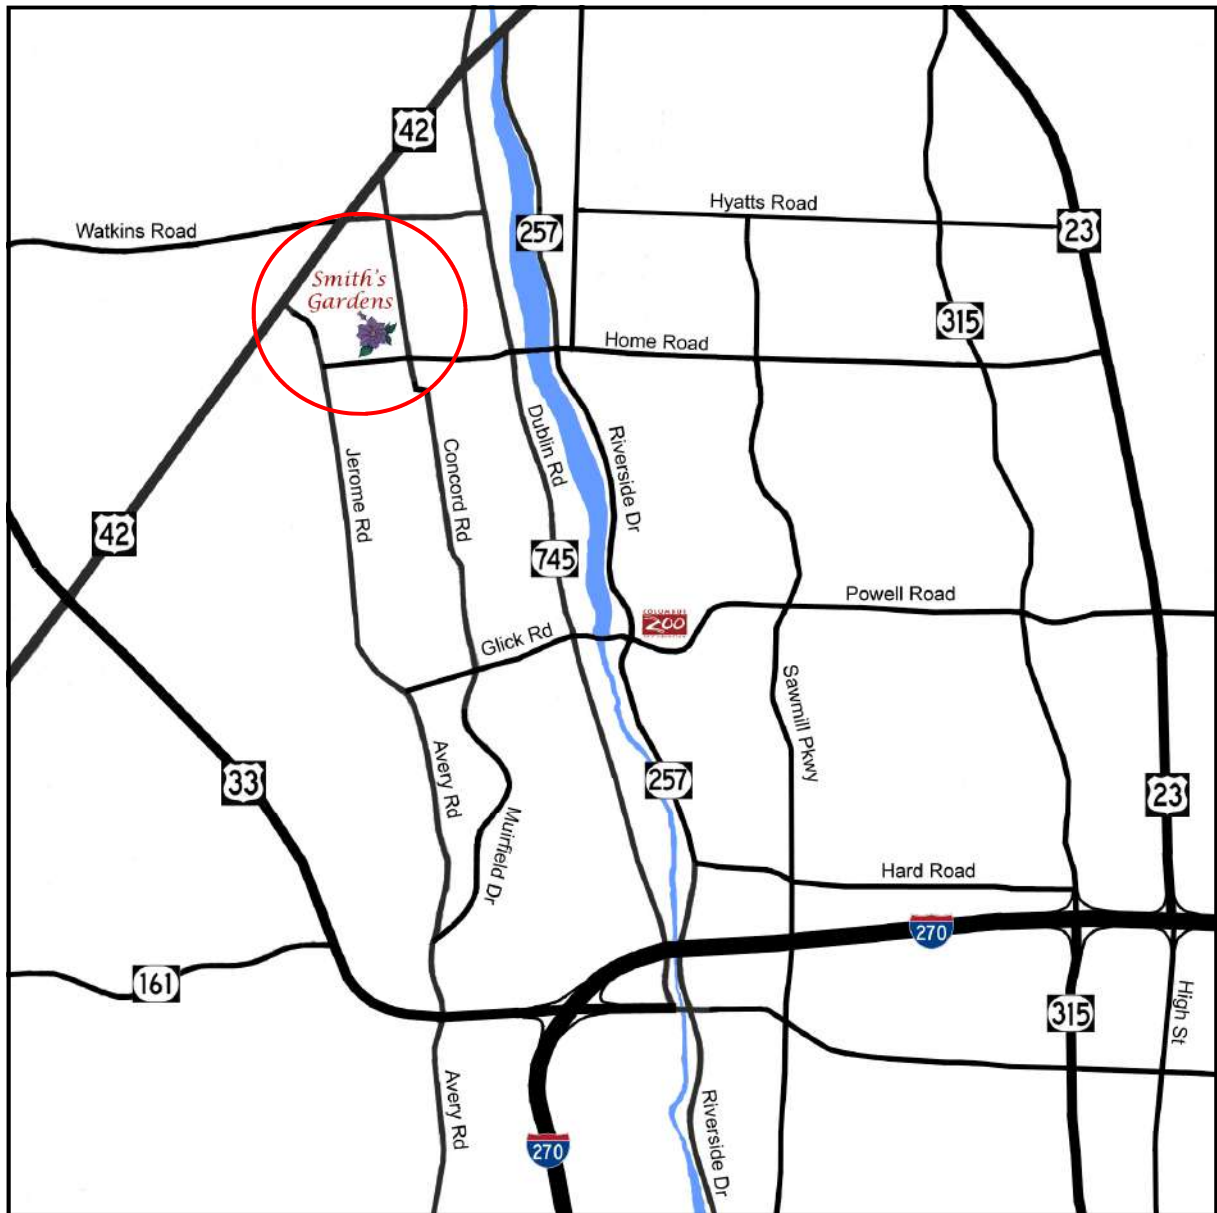

Grasses (continued)

Schizachyrium scoparium – Little Blue Stem
 Sporobolus heterolepis – Prairie Dropseed

Perennials

Achillea - Yarrow
 Acorus calamus - Sweet Flag
 Actaea pachypoda – Doll's Eyes
 Amsonia tabernaemontana hybrids – Blue Star
 Aquilegia canadensis - Eastern Columbine
 Asarum canadense – Canadian Wild Ginger
 Arisaema triphyllum - Jack-in-the-Pulpit
 Asclepias - Milkweed
 Athyrium felix-femina – Lady Fern
 Baptisia australis – False Blue Indigo
 Campanula rotundifolia - Harebell
 Chelone – Turtlehead
 Coreopsis – Tickseed, Coreopsis
 Cypridium candidum - Small White Ladyslipper
 Cypridium parviflorum - Large Yellow Ladyslipper
 Dodecatheon meadia - Eastern Shooting Star
 Dryopteris cristata - Crested Wood Fern
 Dryopteris x australis - Dixie Wood Fern
 Echinacea – Coneflower
 Eryngium yuccifolium – Rattlesnake Master
 Eupatorium – Joe-Pye Weed, Boneset
 Filipendula rubra – Queen of the Prairie
 Gaillardia – Blanket Flower
 Gaura coccinea - Scarlet Gaura
 Geranium maculatum - Cranesbill
 Geum triflorum - Geum
 Helenium autumnale - Sneezeweed, Helen's Flower
 Helianthus - Perennial Sunflower
 Heliopsis helianthoides - False Sunflower
 Heuchera – Coral Bells
 Hibiscus moscheutos - Perennial Hibiscus
 Iris versicolor - Northern Blue Flag
 Liatris – Gayfeather, Blazing Star
 Lobelia - Cardinal Flower, Lobelia
 Lupinus perennis - Sundial Lupine
 Mertensia virginica - Virginia Bluebells
 Monarda – Beebalm
 Oenothera – Sundrops, Evening Primrose
 Phlox - Phlox
 Physostegia virginiana– Obedient Plant
 Penstemon digitalis - Foxglove Beardtongue
 Polemonium reptans – Creeping Jacob's Ladder
 Polygonatum commutatum – Giant Solomon Seal
 Rudbeckia – Black-eyed Susan
 Silene virginica - Scarlet Catchfly
 Sisyrinchium – Blue Eyed Grass
 Solidago – Goldenrod
 Stokesia laevis – Stokes' Aster
 Thalictrum - Meadow-rue
 Tiarella – Foamflower
 Tradescantia – Spiderwort
 Vaccinium angustifolium - Lowbush Blueberry
 Vernonia – Ironweed
 Veronicastrum virginicum - Culver's Root
 Viola – Prostrate Blue Violet
 Zizia - Alexanders

You are cordially invited to stop in at your convenience. We will gladly assist you with your plant selection needs, or you may peruse the nursery at your leisure. We are located at 7520 Home Rd., west of the Scioto River, between Concord Rd. and Jerome Rd. in southwestern Delaware County.

Hours

March – November

Monday – Friday 8:00 am – 5:00 pm

Saturday Closed

April – July: We are probably working but call ahead to be sure. Arrangements can be made for someone to be at the nursery.

Sunday Closed

December – March

Closed for the winter but please call if you have any questions. Again, arrangements can be made for someone to be at the nursery.

Ph: 740-881-6147 Fax: 740-881-5603 Email: sales@smithsgardensinc.com
