

BEST OF BREED.

How does the Yukon family set the standard for other full-size SUVs? With unmatched available power, torque and towing capacity. With stylish, sophisticated cabins equipped for the comfort, convenience and safety of every occupant. With gas-saving features, including Active Fuel Management® and six-speed automatic transmissions, that help produce the best 2WD and 4x4 fuel efficiency in the class.* With a choice of half-ton and three-quarter-ton configurations and a full range of models, including Hybrid versions and the top-of-the-line 403-horsepower Yukon Denali. And with professionalgrade GMC engineering in every component of every model. Here's the bottom line: If you're looking for excellence in a full-size SUV, your search is over.

THE SUV FOR ALL REASONS.

Whatever you're looking for in a full-size SUV – power, space, efficiency, capability, you name it – you'll find it in a Yukon or Yukon XL. These are premium vehicles engineered to transport substantial quantities of people and cargo, and to handle every challenge with comfort, confidence and style. Every model performs to a world-class standard, thanks to a muscular Vortec V8 engine. Yet Yukon delivers the best fuel economy in the segment – just 14.4 litres per hundred kilometres in the city and 9.5 litres per hundred kilometres on the highway for Yukon 1500 4x4.* A trailering package is standard across the board. Properly equipped, Yukon 1500 can handle trailer weighing up to 3810 kg (8400 lb.), and XL 2500 can tow up to a whopping 4355 kg (9600 lb.) – the most of any full-size SUV. It all adds up to an irresistible combination of strengths.

YUKON TECHNOLOGY

ENGINEER'S CHOICE.

The more you know about engineering, the more likely you'll choose a Yukon as your personal SUV. Every Yukon model starts with an amazingly strong, precision-fabricated high-strength steel frame and professional-grade truck chassis components, including a coil-over-shock front suspension and a sturdy five-link rear suspension on 1500 models, available in a choice of model-specific tunings. Yukon XL 2500 models utilize rear multi-stage leaf springs to handle higher loading capacities. Every Yukon also includes an electronic stability control system – called StabiliTrak® – that's proven to reduce the risk of a fatal single-vehicle crash by a tremendous 63 percent.* Drivetrain choices include 2WD, electronic Autotrac™ on 4x4 models and, on Denali models, standard full-time all-wheel drive (AWD). And the list of intelligent technologies goes on. Case in point: the Grade Braking feature integrated into every Yukon transmission. On downhill slopes it can automatically use the engine's compression to help control your speed and reduce the burden on your Yukon's powerful four-wheel disc anti-lock braking system.

THE STATE OF THE SUV ART.

Named for North America's tallest peak, Yukon Denali and Yukon XL Denali are towering achievements in their own right. Visually they're a statement of unabashed capability and confidence, with bold chromed 20-inch aluminum wheels and, of course, those Denali-signature bright honeycomb upper and lowe grilles. Full-time all-wheel drive and a comfortable yet controlled AutoRide™ suspension are standard, as is a heavy-duty cooling package that's perfect for those planning on taking advantage of Yukon Denali's 3674 kg (8100 lb.) towing capability. Motivation comes from an advanced 403 horsepower Vortec 6.2L V8 teamed with a fuel-saving six-speed automatic transmission with Driver Shift Control. Or choose the class-leading fuel efficiency of the new-for-2010 Yukon Denali Hybrid.*

The available Side Blind Zone Alert system uses radar beams to sweep adjacent lanes of traffic. When it detects a vehicle entering the blind zone on either side of your Denali, It alerts you via a visual warning in the appropriate exterior rear-view mirror.

YUKON DENALI

IT'S GOT IT ALL.

Inside Yukon Denali or Yukon XL Denali, you're surrounded by the best of everything. The first and second-row seats are heated and appointed in fine perforated leathers, and the front buckets are also cooled and fitted with twelve-way power adjustments, including a four-way lumbar adjuster and a driver-side memory function. The second-row seats feature a power fold-and-tumble system that tucks them out of the way at the touch of a button.* A DVD navigation system is available and Bluetooth® hands-free mobile phone connectivity is standard in both models. For your listening pleasure, the standard Bose® audio system includes AudioPilot® noise reduction, a technology that automatically adjusts the character of the sound to maintain a consistent subjective listening experience, even if you should open a window. There's also a USB port that neatly integrates your iPod® with the sound system and charges its battery while you're en route.

* Except Yukon Hybrid Denal

IMPOSSIBLE. BUT TRUE.

Imagine, if you will, a full-size SUV with uncompromised performance, seating for eight and a trailer rating of up to 2812 kg (6200 lb.). Now imagine that vehicle achieves better city fuel efficiency than much smaller vehicles such as the Volkswagen Passat and Ford Fusion, even when they're equipped with four-cylinder engines.* Sound impossible? The visionary engineers at GMC made it a reality. Thanks to high-tech two-mode hybrid technologies – including a 300-volt nickel-metal hydride Energy Storage System (ESS), an advanced Electronically Variable Transmission (EVT) and a regenerative braking system -Yukon Hybrid and the luxurious new-for-2010 Yukon Denali Hybrid can operate at speeds of up to 48 kilometres per hour in zero-emission electric-only mode. The electric assist also helps optimize the efficiency of the 332 horsepower 6.0-litre V8 engine whenever possible. The result is city fuel consumption of just 9.8 litres per hundred kilometres.* Yukon Hybrid. Impossible no more.

* 2010 Yukon Hybrid ratings based on GM testing in accordance with approved Transport Canada test methods. Competitive information based on Natural Resources Canada's 2009 Fuel Consumption Guide and published information available at time of printing. Your actual fuel consumption may vary.

All Yukon Hybrid models feature the convenience of a standard Integrated DVD navigation system with voice recognition. The Navigation screen also serves as a display for the Rearview Camera System and the Hybrid power-flow display, as shown.

IS THERE ANYTHING YUKON CAN'T DO?

With the keys to a Yukon or Yukon XL in your pocket, you know you can easily handle virtually any combination of people and cargo. Both models can seat up to nine occupants* in comfort, and the power release fold-and-tumble second-row seats available on SLT models make accessing the third-row seat a breeze. With a full quota of passengers on board, Yukon still has space for 479 litres of gear, while Yukon XL can accommodate a massive 1297 litres. For additional cargo space and even bigger loads, the second- and third-row seats fold away easily, and the third-row seat can be removed. So configured, Yukon's maximum cargo capacity is 3084 litres and Yukon XL's is a vast 3891 litres. Both interiors also pass the ultimate test: carrying 4' x 8' sheets of building material.

* When properly equipped.

Cargo capacity: Yukon 479 L, Yukon XL 1297 L Seating: 8 as shown, up to 9 with front bench seat.

Cargo capacity: Yukon 1708 L, Yukon XL 2549 L Seating: 5 as shown, up to 6 with front bench.

Cargo capacity: Yukon 1708 L+, Yukon XL 2549 L+ Seating: 3 as shown, up to 4 with front bench.

Cargo capacity: Yukon 3084 L, Yukon XL 3891 L Seating: 2 as shown, up to 3 with front bench.

YUKON CONTROLS

IT'S A GOOD FEELING.

The Yukon driving environment has been carefully developed to foster a sense of ease and control every time you take the wheel. You'll find visibility to be excellent in every direction, thanks to generous expanses of tinted glass and large, heated, power-adjustable mirrors. The analogue gauges are designed to communicate vital driving information instantly, and key additional data – such as individual tire pressure – is provided via the standard multi-function Driver Information Centre. Then there are the switches and controls, all logically designed and positioned precisely where you expect them to be. The result: fewer distractions from the task at hand and a greater feeling of confidence in every situation.

The available Rearview Camera System displays a wide-angle view of the area behind your Yukon any time the transmission's reverse gear is engaged. The image appears on the interior rear-view mirror or, when so equipped, on the DVD navigation system screen. Standard on Hybrid Models.

SUPERIOR DOWN TO THE LAST DETAIL.

The overall brilliance of Yukon and Yukon XL – the impressive levels of performance, comfort, reliability and safety that they consistently deliver – all derive from GMC's dedication to technical superiority. Described below are a few of the features that make Yukon and Yukon XL such outstanding SUVs.

FIVE-STAR CRASH TEST RATING

Yukon earned the U.S. government's highest rating – five stars – for its performance in frontal and side-impact testing.*

VORTEC V8 POWER

With horsepower ranging from 320 to 403, FlexFuel capability and a host of advanced features like Variable Valve Timing (VVT) and Active Fuel Management, the Yukon family offers a powerful, efficient Vortec engine for every purpose.

6-SPEED AUTOMATIC TRANSMISSIONS

Every Yukon and Yukon XL model (except Hybrids) features a fuel-saving 6-speed automatic transmission with the added control of tap-up/tap-down Driver Shift Control.

FIVE-STAR FRONTAL AND SIDE-IMPACT **CRASH TEST RATING***

TRAILERING EQUIPMENT

Every Yukon and Yukon XL comes with a trailer hitch platform, a 2-inch (51 mm) hitch receiver and a 7-wire trailering harness as standard equipment. An integrated trailer brake controller and a heavy-duty cooling package are standard on Yukon XL 2500 and available on other models.

Yukon's systems and is engineered for superior crash protection.

HYDROFORMED COMPONENTS

High-tech fabrication process results in strong, lightweight, precision-formed front frame sections.

WIDE TRACK DESIGN

Wide front and rear track dimensions enhance Yukon's stability and ride quality.

SAFETY CAGE

Liberal use of high-strength steel reinforcements helps provide excellent occupant protection in impacts and rollovers.

TIRE PRESSURE MONITORING SYSTEM

Automatically alerts you via the Driver Information Centre when a tire requires inflation.

AUTOMATIC LIGHT CONTROL

Turns your exterior lighting system on and off automatically, as ambient lighting conditions require.

COIL-OVER-SHOCK FRONT SUSPENSION

Delivers linear ride and handling characteristics on all road surfaces (1500 models).

RACK-AND-PINION STEERING

Provides precise and responsive control and enhanced on-centre feel (1500 models).

STABILITRAK

Standard on all models. Helps reduce lateral skids and incorporates hardware and software to mitigate potential rollover situations. Includes full-function traction control.

DUAL-STAGE FRONTAL AIR BAGS

Deploy with reduced force in low-speed frontal collisions to help protect the driver and front passenger.**

PASSENGER SENSING SYSTEM

Automatically disables the passenger-side air bag, based on weight and pressure, if the seat is empty or occupied by a child or small adult.**

HEAD CURTAIN SIDE-IMPACT AIR BAGS

Roof-mounted air bags provide protection in side impacts. Large air bags on each side protect the first-and second-row occupants. Models equipped with third-row seats also feature additional side curtain air bags for the protection of third-row passengers. Driver and right front passenger seats are fitted with seat-mounted side-impact air bags for additional thorax and pelvic protection.**

FRONT SAFETY BELT PRE-TENSIONERS

Automatically pull the driver and outboard front passenger safety belts snug when a collision is detected, for improved protection.

SAFETY-FOCUSED FRONT SEATS

Include energy-absorbing pans between the frame and cushion and high-strength seatbacks that resist collapsing in rear impacts.

- * Five-star rating is for driver and front- passenger seating positions in the frontal crash test and for the front and rear seating positions in the side-impact crash test. Models tested with standard side-impact head curtain air bags. U.S. government ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (NCAP) (safercar.gov).
- ** A NOTE ON CHILD SAFETY: Always use safety belts and proper child restraints, even in vehicles equipped with air bags. Even with the Passenger Sensing System, children are safer when properly secured in a rear seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active air bag. Refer to the vehicle Owner's Manual and child safety seat instructions for more information.

WE'LL TAKE YOU EXACTLY WHERE YOU WANT TO GO.

You demand more from a vehicle than ever before. Exactly the same can be said of GMC. For starters, you're looking for greener driving choices – GMC offers a range of vehicles that incorporate technology that helps reduce fuel consumption and emissions, like Active Fuel Management[®], Variable Valve Timing and Direct Injection. Down the road, there are plug-in electric vehicles and other emerging technologies that point the way to a future of zero-emissions driving.

At GMC, we take pride in more than the quality of our vehicles. We are also proud to be the Official Vehicle Supplier of the Vancouver 2010 Olympic and Paralympic Winter Games. To help create a more sustainable 2010 Winter Games, we are committed to providing the most environmentally friendly fleet of all time through the supply of hybrid, alternate fuel, and other advanced green technology vehicles. The Drive is On.
