DOOR SPORTS CAR

290 HP 3.5-litre
V6 with variable
valve timing for
better breathing

Smooth power delivered
by the intelligent CVT
(Continuously Variable
Transmission)

Driver-selectable
transmission modes to
match your driving needs

D-platform allows for
both agile manoeuvres
and a smooth ride

**Nissan Intelligent
Key® with Push
Button Ignition**

**Dual Panel Moonroof²
lets every passenger
enjoy the sky**

**Nissan Navigation System
offers a lot more than just maps²**

**9.3 GB Music Box™
hard drive stores
up to 2900 songs²**

**USB input for
seamless music
connectivity³**

Merge with unrelenting power.

Exhilaration comes standard with Maxima®. The legendary 3.5-litre V6 rapidly unleashes its 290 horsepower with a press of the accelerator. The intake valve design, coupled with variable valve timing, helps generate incredible torque for off-the-line acceleration and improved power at higher engine speeds. A unique piston design and an advanced engine-mounting system dramatically reduce unwanted vibrations, so the ride is as smooth as it is powerful.

Continuously Variable Transmission (CVT)

Take the powerful VQ engine, pair it with the advanced Continuously Variable Transmission, and seamless power is a green light away. This intelligent CVT optimizes engine performance and maximizes power output. The transmission also features four driver-selectable modes:

D Mode

automatic mode

Beginning in Drive, Maxima delivers quick acceleration and lasting euphoria.

DS Mode

driver sport automatic

“DS” mode engages more aggressive shift logic to provide sportier feedback.

Shift Lever

manual mode

If you're looking for more hands-on control, use the shift lever in manual mode.

Paddle Shifters

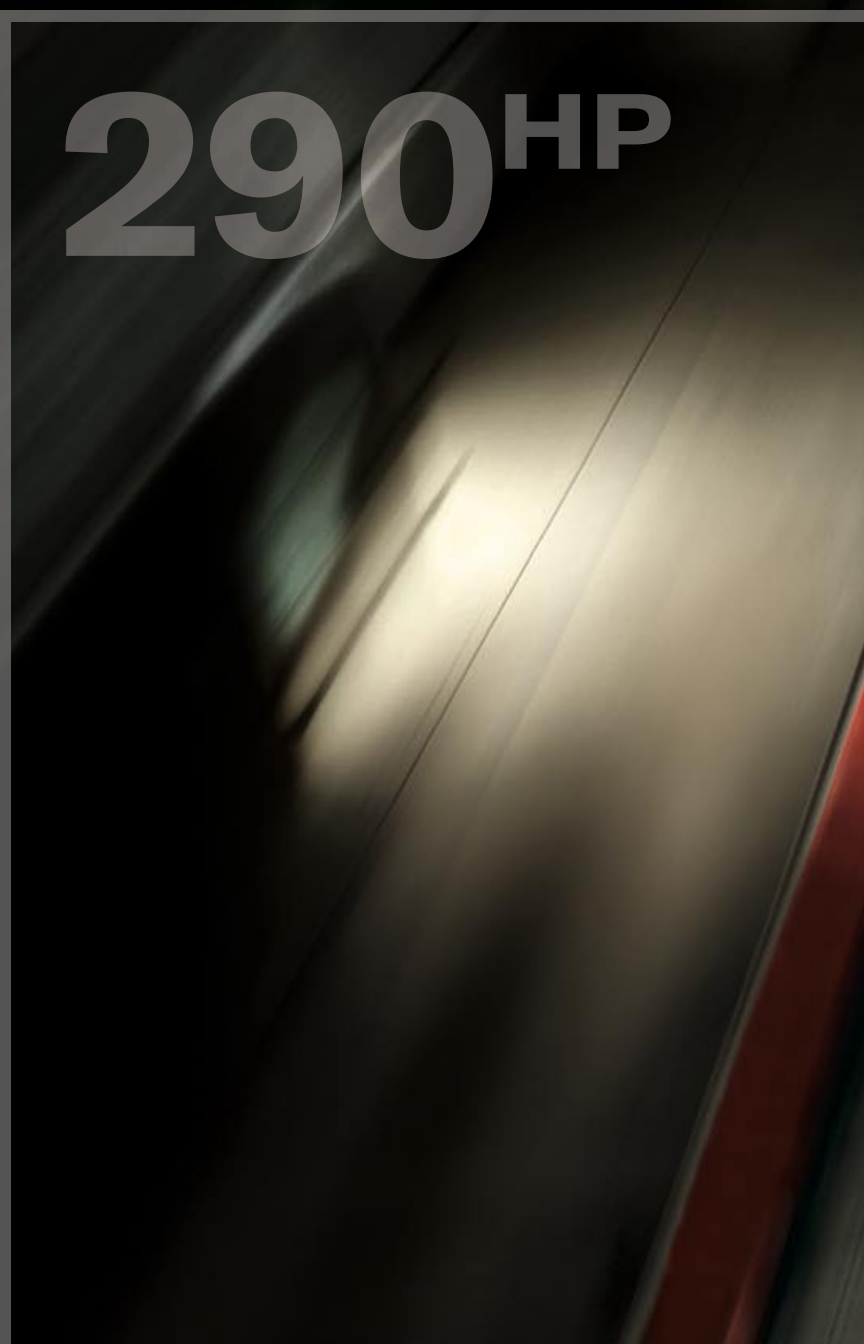

manual mode

For sporty fun, access the available paddle shifters mounted on the steering column.

U.S. instrumentation shown.

290^{HP}

Nissan Maxima 3.5 SV shown in Sonoma Sunset with Premium Package.

Swift. Smooth. Inspiring. Exceptional.

High-performance sedan meets smooth touring sedan. The Maxima advanced D-platform helps deliver a sporty ride without the typical sports-car harshness. The platform is both stiff and light to allow for quick acceleration and excellent agility. A high-strength body provides superior handling and a smooth ride. And when conditions change, some of Maxima's most advanced features kick in – helping provide added control and confidence. No doubt about it: Maxima rules as one of the most refined, yet thrilling, vehicles on the planet.

Vehicle Dynamic Control (VDC) Whatever direction you're steering toward, VDC – often known as stability control – helps you maintain it. This standard feature continuously monitors your steering and braking actions, senses any oversteer or understeer, and compensates by reducing engine power and/or applying brake pressure to specific wheels!

Traction Control System (TCS) Along with rain, snow or ice comes the need for extra grip. The standard Traction Control System can sense a front wheel spin and responds by instantly reducing throttle to help you regain grip and put you back on more solid footing.

Vehicle-speed-sensitive steering Navigating the streets on your morning commute, and squeezing into that parking spot once you arrive, is easier than ever. The cutting-edge steering system is exceptionally responsive. Since it reacts to vehicle speed, not engine speed, it provides more precise manoeuvring in the passing lane or the parking garage.

Sport-tuned suspension The Maxima shock absorber mounting system helps deliver exceptional responsiveness with minimal roughness. An available advanced sport-tuned suspension, fitted with a thicker front stabilizer bar, stiffer springs and high-performance front struts and rear shocks, gives you great open-road performance without compromising ride comfort.

Anti-lock Braking System (ABS) During hard braking, ABS rapidly pumps the brakes to help prevent your wheels from locking, helping you maintain steering control.

Electronic Brake force Distribution (EBD) If you have a car full of passengers, EBD senses the extra weight and sends additional brake force to the rear wheels for even greater confidence behind the wheel.

Everything for the driver. A cockpit at your command.

*Availability of specific features is dependent upon the phone's Bluetooth® support. Please refer to your phone Owner's Manual for details. Cell phone not included. The Bluetooth word mark and logos are owned by Bluetooth SIG, Inc., and any use of such marks by Nissan is under licence.

The driver's seat. Front row for all the excitement. Extra padding in the bolsters gives superior lateral support during high-performance driving, while the lower-seat thigh extension fights fatigue and is adjustable for comfort. Grab the sport steering wheel, designed for excellent grip. Reach for the offset shifter, situated close to the driver for improved engagement. Put manual control at your fingertips with available paddle shifters. And focus on the rush that comes with every drive.

Advanced technologies add convenience and control. Nissan Intelligent Key® with Push Button Ignition allows you to unlock the doors and start the engine, all without taking the key out of your pocket. With the standard Bluetooth® Hands-Free Phone System, voice-recognition allows you to make and receive calls through the stereo speaker system.¹ No headset, no reaching – just a nice firm grip on the steering wheel.

Nissan Maxima 3.5 SV shown in Charcoal Leather with Sport and Technology Packages.

Premium driver's amenities. Even for passengers.

In a Maxima, riding along as a passenger can feel nearly as extraordinary as taking the wheel. This spacious and inviting 5-seater offers comfort and style for all. Up front, Dual-zone Automatic Climate Control (ACC) allows driver and passenger to each choose their own individual temperature settings. Both front seats have a standard heating system, as does the steering wheel. The driver's seat goes an extra step, with an available cooling system. Overall, the roomy, light-filled cabin feels airy and open, with little touches to set the mood. Even the rear seats have their own comforts in store (see below). In so many ways, Maxima – our flagship – truly stands alone.

Nissan Maxima 3.5 SV shown in Café Latte Leather with Premium and Navigation Packages.

Open up to everything around you. The available Dual Panel Moonroof can help. This distinctive roof – made almost entirely of glass – allows in light for all passengers to enjoy. If you choose to open the moonroof, it lifts over the rear glass roof, so you always have a clear view out. To really set the mood, Maxima offers ambient lighting that illuminates the cabin with a soft glow, specially focused on key areas, to create a warm, inviting atmosphere for you and your fellow passengers.

Rear seat comfort. The sophistication extends to the back row. In the event your friends in the back want to stay out of the sun, the available power sunshade can be raised to shield the rear window. In addition, the Premium Package includes a rear centre console that folds down to expose audio and air conditioning controls that allow second-row passengers to custom-tune their environment in first-class style.

Easy access to endless information.

The Information Centre with 178 mm (7-inch) colour display is your central point of contact. One screen does it all: show you maps and other info from the available Nissan Navigation System. Help you view and organize your music from a variety of sources. Act as a RearView Monitor, and even play DVDs (if so equipped). Instant access to everything Maxima has to offer.^{1,2}

Touch-screen Navigation

¹Factory installed option. Never program while driving. GPS mapping may not be detailed in all areas or reflect current road regulations. ²The optional RearView Monitor is a convenience, but is not a substitute for proper backing procedures. Always turn and check that it is safe to do so before backing up. The RearView Monitor may not detect every object behind you. ³Driving is serious business and requires your full attention. Do not operate any devices connected to the auxiliary audio input jack while driving. ⁴Availability of specific features is dependent upon the phone's Bluetooth® support. Please refer to your phone Owner's Manual for details. Cell phone not included. The Bluetooth word mark and

RearView Monitor With this option, when you engage reverse, a discreet colour camera mounted on the rear of the vehicle helps you see what's directly behind you via your Information Centre monitor. The on-screen guidelines move along with steering input.²

Easy access to endless entertainment.

The available 9-speaker Bose® audio system delivers incredible sound and helps end CD clutter with either a 2 GB flash memory drive (stores up to 600 songs) or an available 9.3 GB Music Box™ hard drive (stores up to 2900 songs). Both systems organize your music by mood, artist and song title.

iPod®-friendly USB input Plug your MP3 player or USB thumb drive into the USB input and control the music functions through the audio system or touch-screen monitor.³

Audio/video inputs Connect your iPod® or other MP3 player through the input jacks and enjoy personalized tunes – or watch movies on the display screen while in park.³

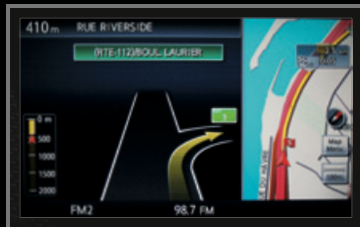

Bluetooth® Stream music from any compatible device via available Bluetooth® streaming audio and control the music functions through the audio system or touch-screen monitor.⁴

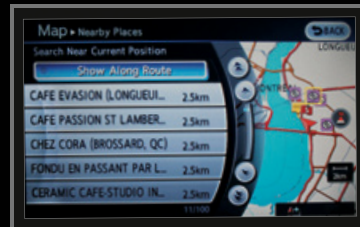

DVD player Add the Navigation or Technology Package and you can play DVDs on the navigation system display when Maxima is in park.

Available XM® Satellite Radio Scroll through the channel lineup, find exclusive programs, or search for your favourite artist. 130 channels of music and radio shows, most commercial-free.⁵

Lane Guidance

Key Points of Interest

The available touch-screen Nissan Navigation System gives you a lot more than “just maps”. The system includes on-screen Lane Guidance, which not only shows you where to turn, it also directs you to the appropriate turn lane. And with over 5 million Key Points of Interest – including ATMs, gas stations, parks and museums – you can find everything of interest to you – instantly!¹

Safety should never be a luxury.

The comprehensive safety strategy for Maxima includes six standard airbags at its core. Nissan engineers place as much emphasis on cabin and structural safety as they do overall performance. And additional confidence comes with the knowledge that the 2010 Maxima received the U.S. government's highest rating – 5 stars for front- and side-impact crash safety!

6
standard airbags

Cabin safety

The Nissan Advanced Airbag System incorporates seat belt sensors and an occupant-classification sensor to inflate the dual-stage supplemental front airbags according to crash severity and seat belt usage. Maxima also has front side-impact supplemental airbags built into the seats, so they move with you. In addition, roof-mounted curtain supplemental airbags help protect you in the event of a side impact.² What's more, front-seat Active Head Restraints help reduce the chance of whiplash injuries to front-seat occupants by moving up and forward during certain rear-end collisions.

Structural safety

Zone Body construction uses a high-strength cabin structure with crossmembers and rigid reinforcements. Front and rear crumple zones can help absorb impact energy before it reaches the passenger compartment. Hood-buckling creases, high-strength steel side-door guard beams and an energy-absorbing steering column help further reduce the likelihood of injury.

Child safety

Nissan safety engineers have dedicated thousands of hours to evaluating hundreds of child restraints in Nissans. The result: An industry first, The Snug Kids Child Safety Seat Fit Guide. This guide lists child seats that fit the rear seats of Nissan vehicles, as well as offers invaluable tips on correct installation. Look for the latest Fit Guide at nissan.ca/owners/en

¹Government star ratings are part of the U.S. National Highway Traffic Safety Administration's (NHTSA) New Car Assessment Program (www.safercar.gov). U.S. model tested with standard side air bags. Please see www.safercar.gov for up to date information. ²Airbags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, in addition to any other requirement of applicable law, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Airbags will only inflate in certain accidents; see your Owner's Manual for more details. Inflated airbags shown for illustration purposes only. Actual airbags deflate after deployment.

Features & Specifications

Engine	3.5 SV
VQ35DE – 3.5-litre DOHC 24-valve V6 engine	■
– Horsepower – 290 HP @ 6400 rpm	
– Torque – 261 lb-ft @ 4400 rpm	
Emissions – Tier 2, Bin 5 (LEV2-ULEV CA)	■
Continuously Variable Valve Timing Control System (CVTCS) on intake valves	■
Electronic Continuously Variable Valve Timing Control System (ECVTCS)	
– on exhaust valves	■
Variable induction system	■
