

SIMPLY CLEVER

ŠKODA

ŠKODA OCTAVIA SCOUT 4X4

The **ŠKODA Octavia Scout 4x4** combines all the practicality of a family vehicle with the appeal of an SUV. Designed around the characteristics of the timeless Octavia Wagon, the Octavia Scout 4x4 features the latest **all-wheel drive technology** that adjusts to changing road conditions in milliseconds. And with underbody protection and elevated ground clearance as standard, the Octavia Scout 4x4 is able to tackle challenging conditions – an everyday car that demands to be driven everywhere.

Hosting the very latest in Volkswagen Group engine platforms, the Octavia Scout 4x4 comes in both petrol and diesel variants. The smooth 132TSI turbocharged petrol engine offers an impressive 280Nm of torque from a 6-speed DSG for effortless acceleration and pulling power. As a result, the 2.0-litre 110TDI turbo-diesel, coupled with a 6-speed manual transmission offers an exceptional combined fuel consumption of 4.9L/100km*.

With a whole range of Driver Assist Technologies, the entire Octavia range comes standard with **Adaptive Cruise Control**^ allowing the vehicle to automatically brake and accelerate to maintain a pre-selected distance from the vehicle in front.

Like the Octavia range, safety is paramount for the Scout 4x4 with **nine airbags**, **Adaptive Cruise Control**^, **fatigue detection**^, **rear view camera**^, **Multi-collision Brake** and **passenger protect assist** as standard across all variants. In addition, your Scout can be further enhanced with the latest in driver assist technologies including Lane Assist~ and Automatic Parking Assist~.

For added peace of mind, all ŠKODA vehicles now come with a standard **5 year/unlimited kilometre warranty**#. Conditions and exclusions apply.

#5 Year Warranty consists of 3 Year Factory Warranty and 2 Year Factory Extended Warranty. 5 Year/ Unlimited Kilometre Warranty is available with private, general fleet and government vehicles only. Excludes rental vehicles, hire cars, taxis, courier vehicles, driving school vehicles, security vehicles, bus and tour vehicles which are subject to a 5 Year/150,000 Kilometre Warranty (whichever occurs first). Your rights under this warranty sit alongside the consumer guarantees under the Competition and Consumer Act 2010 which cannot be excluded. ~Safety technologies are not a substitute for the driver's responsibility of the vehicle. *Fuel consumption figures according to Australian Design Rule (ADR) 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only. ~ Available in optional Tech Pack.

EXTERIOR

- Underbody protection
- Rear LED lights
- Bi-Xenon headlights with LED running lights
- 31mm Raised Ground Clearance over Octavia Wagon

The **protective front and rear bumpers** gives the Octavia Scout 4x4 a dynamic shape to match its rugged appeal. Adding to the unique Octavia Scout 4x4 design are the **integrated fog lights** within the front bumper and **Bi-Xenon headlights with AFS (Adaptive Frontlight System)** in combination with **LED daytime running lights**.

The decorative 'SCOUT' inscribed **door sill strips** aesthetically enhance the presence of the car.

The **rear bumper** with a silver protective cover hints at the car's all-road capabilities, which is further underlined by protective covers on the wheel arches and door sills. **The LED lights** are a stylish addition that further accentuates the rear.

The optional **two-part panoramic sunroof** can be electronically tilted or it can be opened fully in seconds. An adjustable sunblind cover and integrated wind deflector ensure maximum comfort no matter what the conditions.

The **electrically-adjustable, heated and foldable* exterior mirrors** automatically retract when the vehicle is locked.

*Standard on the Scout 132TSI; optional in the Premium Pack for the Scout 110TDI.

INTERIOR

- Leather Multifunction Steering Wheel
- Premium Sound System
- Dual-zone Climatronic Air Conditioning
- Columbus Navigation System including Smartlink Smartphone Connectivity

The upgraded German **10-speaker Canton Sound System**[^] features a digital equaliser, vehicle noise cancellation and the ability to play Dolby 5.1 surround sound for enhanced clarity.

The **8" touch screen Columbus Navigation System**^{*} also features **SmartLink**[~] - delivering a seamless connection between car and smartphone using Apple CarPlay[®] and Android Auto[™] interfaces. SmartLink enables you to control compatible apps from the infotainment display, whether it be listening to music on the smartphone connected or receive turn-by-turn directions; all of this is mirrored on Columbus display.

Dual-zone air conditioning with humidity control^{*} allows the driver and front seat passenger to set different temperatures for optimal comfort while the humidity sensor directs air flow as required, to keep the windscreen fog free.

^{*}Standard on the Scout 132TSI; optional in the Premium Pack for the Scout 110TDI. [^] Available in optional Tech Pack.
[~]SmartLink is compatible for selected apps with the latest smartphone versions of iOS and Android.

SPACE

- Exceptional luggage space
- Automatic Tailgate Opening
- Split folding rear seat backrest (60/40) with remote release
- Roof rails

The Octavia Scout 4x4 is equipped with an **automatic tailgate opening*** for easy access to the luggage compartment. For added convenience, the tailgate can be controlled from four separate locations:

- via remote control
- from the centre console
- with an internal button on the tailgate
- via an external soft-touch tailgate button

The Octavia Scout 4x4 is the perfect weekend get away and naturally, **roof rails** come as standard. They provide the base for further attachments, available from the ŠKODA Genuine Accessories range.

With a longer wheelbase than the previous generation, rear passenger space has been further maximised, ensuring three adults can sit comfortably in the rear - a perfect environment for growing families. All rear passenger seats are fitted with ISOFIX fixtures as standard on all models.

* Standard on the Scout 132TSI; optional in the Premium Pack for the Scout 110TDI.

Overseas model shown

Hidden within Octavia Scout 4x4's sleek design is exceptional **luggage space**, boasting **588 litres** of space with the rear seats up and a phenomenal **1718 litres** with the rear seats down. The **double-sided mat** is also a great addition to the Octavia Scout 4x4. The standard carpet fabric can be used for transporting everyday goods, whilst the washable, heavy-duty rubber (shown above) can be used for transporting rugged equipment.

SAFETY

- Fatigue Detection
- Adaptive Cruise Control with Front Assist
- Passenger Protect Assist
- 9 Airbags

An outstanding, technological advancement, standard on the entire Octavia range is **Adaptive Cruise Control (ACC)*** - an extension of the conventional cruise control system with advanced capabilities based on a radar sensor located on the front grille. When ACC is activated, the vehicle automatically brakes and accelerates to a speed and distance set by the driver. The dynamics of the ACC system can be individually varied by selecting one of the driving programs from the Driving Mode Selection.

Utilising the same radar sensor, the **Front Assist*** safety system monitors the area in front of the car and evaluates the distance, direction and speed of all nearby objects. Using predefined algorithms, it decides whether these objects pose a potential risk of collision and alerts the driver if the distance to object is insufficient - initially with a tone and an alert on the multi-function display; followed by a warning jolt of the brakes. If the driver doesn't respond, the car will brake itself - all the way to a standstill if needed, helping to avoid a collision or reduce the severity of the accident. It can be turned off by the driver via the touchscreen.

Passenger Protect Assist* uses information from the car's braking and electronic systems to recognise when there is a high chance of collision. If this is detected, the front seat belts will tighten and the sunroof (if equipped) and windows will close to help keep the car's occupants in the optimum position for airbag deployment and reduce items flying into the car. Drivers who prefer to desensitise the Passenger Protect Assist can change these settings on their touchscreen display.

Fatigue Detection* monitors the movement of the driver through the steering wheel and if the driver begins to display signs of fatigue, the car will audibly alert the driver with a tone and show a break recommendation alert on the multi-function display.

*Images are for illustrative purposes only

*Safety technologies are not a substitute for the driver's responsibility of the vehicle.

TECHNOLOGY

- Lane Assist
- Driving Mode Selection
- Automatic Parking Assist
- Advanced Keyless Entry Including Smart Start (KESSY)

Driving Mode Selection^ allows the driver to adapt the car's behaviour to their preference or needs. Four driving modes are available: Normal, Sport, Eco and Individual (Individual allowing the driver to configure their own settings). The car will then adapt the engine torque, accelerator sensitivity, power steering, headlight control (where AFS is fitted), DSG transmission, and air conditioning to suit the profile selected.

For those wishing to make both parallel parking and bay parking easier than ever, an **Automatic Parking Assist**^* can be added. With a press of a button, the system will begin searching for a parking space in a line of cars or other obstacles. When a suitable space is found (the car's length + 60cm is all the space needed), the car will steer itself into the space whilst the driver controls the pedals. This system will now also steer the car out of a line of cars from its parking space and with two presses of the same button, the car will search for and manoeuvre into a bay parking space.

Advanced Keyless Entry Including Smart Start^ can be added to allow the driver to lock and unlock the car and start and stop the engine without having to insert or even handle the key. As long as the key is within 1.5m of the sensor, the system will work, and a number of simply clever features ensure you can check the lock, preventing you from locking the key inside and preventing unwanted access.

Standard across all variants, the **Rear View Camera*** gives a clear view of objects usually out of sight allowing the driver to manoeuvre with added confidence and safety. When in reverse, the infotainment unit reveals a real-time image display with superimposed graphic lines thanks to the camera built into the tailgate.

Lane Assist^* technology reduces the likelihood of your vehicle veering off the road or accidentally crossing into another lane. Using a camera positioned within the rear-view mirror unit, it actively recognises lane markings and takes corrective action by gently steering you back on course. The system is also equipped with a warning tone and message in the multi-function display for situations that require additional actions from the driver.

^ Available in optional Tech Pack. *Safety technologies are not a substitute for the driver's responsibility of the vehicle.

ŠKODA Octavia Scout 4x4 Ambition

The **Scout 4x4** is offered with integrated fabric upholstery with black coloured door paneling and dashboard. Also included is host of technology and comfort features as standard, including: 9 airbags, fatigue detection, touch-screen 6.5" Bolero radio including SmartLink~ smartphone connectivity with Apple Carplay® and Android Auto™, Bi-Xenon headlights, rear view camera* and rear parking sensors.

ŠKODA Octavia Scout 4x4 Premium

The **Scout 4x4 Premium** is offered with Alcantara® Leather appointed seats upholstery* with matching coloured door panelling and dashboard. In addition to all features available on Ambition, the Premium also includes: touch-screen 8" Columbus Satellite Navigation, dual-zone 'climatronic' air conditioning, heated front seats and automatic tailgate opening and closing.

*Leather appointed seat upholstery has a combination of genuine and artificial leather, but are not wholly leather.

WELCOME TO CARE-FREE OWNERSHIP

ŠKODA Care is about making sure that same level of attention to detail remains long after you've made your purchase, making owning a ŠKODA as fantastic as buying one.

After getting behind the wheel of a ŠKODA, it's not hard to see why they're so beloved by their owners. Quite simply, ŠKODA vehicles are made to be driven and we want to keep your journey a long and happy one. And the way it works is simple. ŠKODA Australia provides a 5 Year/Unlimited Kilometre Warranty# across the entire range. Conditions and exclusions apply.

Every new ŠKODA vehicle includes a complimentary one year roadside assistance, from the warranty start date. The complimentary roadside assistance will subsequently be renewed on an annual basis for the second, third, fourth and fifth years, if the vehicle is returned to an Authorised ŠKODA dealer for scheduled maintenance (as per the ŠKODA service program) up to a maximum of five years.

ŠKODA Service Pricing

Buying a car is one thing, but owing a car is something else entirely. We're sure you'll want to know the costs of any service before you book it in. The cogs in our heads have been turning and we've come up with a solution we think is pretty clever. Our handy online service calculator can help you find the cost of your next service, scheduled to occur every 12 months/15,000 kms (whichever occurs first)^. No hidden expenses, no nasty surprises.

Genuine Parts

You don't have to be a genius (AKA a ŠKODA technician) to know that non-genuine parts aren't as good as using genuine ones. Our philosophy towards fixing your car is simple; the parts we use are identical to the parts used in the production of your car originally. Genuinely. And with a nationwide, two year, unlimited kilometre warranty on all genuine parts, peace of mind comes easily too. Exclusions apply, please visit skoda.com.au.

Service Packs

Why worry about handling the payment of your services on an ad-hoc basis when you already know you need to get them annually? Conveniently, you can save time by pre-paying your servicing with a 3 Year/45 000km or a 5 year/75 000km ŠKODA Service Pack^ at any of our ŠKODA dealers. That way you can simply book a service time that suits you, and the costs are already covered. Your car, serviced at your convenience.

#5 Year Warranty consists of 3 Year Factory Warranty and 2 Year Factory Extended Warranty. 5 Year/Unlimited Kilometre Warranty is available with private, general fleet and government vehicles only. Excludes rental vehicles, hire cars, taxis, courier vehicles, driving school vehicles, security vehicles, bus and tour vehicles which are subject to a 5 Year/150,000 Kilometre Warranty (whichever occurs first). Your rights under this warranty sit alongside the consumer guarantees under the Competition and Consumer Act 2010 which cannot be excluded. ^ŠKODA Service Pack covers standard items as contained in each scheduled service interval only. Exclusions apply. For full terms and conditions please visit www.skoda.com.au/skoda-care

ACCESSORIES

ŠKODA Genuine Accessories add style to your car while enhancing its utility. To get a full overview of our range of products, ask any authorised ŠKODA dealer for an accessories catalogue or download a brochure from www.skoda.com.au

Glossary

Anti-lock Braking System (ABS)

When braking, sensors in each wheel measure the road speed. If one or more wheels start to lock, the ABS reduces brake pressure to those wheels. This prevents the wheels from locking during heavy or emergency braking and allows you to continue to steer the vehicle.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the front wheels from spinning under acceleration. When a difference in driving wheel speed is detected (e.g. due to differences in road surfaces), the system automatically reduces engine torque accordingly.

Electronic Brake-pressure Distribution (EBD)

This sophisticated system provides an electronic means of regulating the ratio of front to rear brake pressure. The system automatically varies the settings according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Stability Control (ESC)

The ESC is made up of the ABS and ASR traction control systems. Simply put, it helps ensure that the vehicle goes where you steer it – even in extreme driving conditions. By constantly comparing the actual movement of the vehicle with pre-determined values, ESC will apply the brakes to individual wheels and automatically adjust the engine's power output to correct a problem the very moment it arises.

Adaptive Cruise Control (ACC)

Adaptive Cruise Control (ACC) is an extension of the conventional cruise control system with advanced capabilities based on a radar sensor. When ACC is activated, the vehicle automatically brakes and accelerates to a speed and distance set by the driver.

If the Octavia Scout 4x4 approaches a slower vehicle, the ACC brakes the car to the same speed and maintains the pre-selected distance. Even when a vehicle pulls into the same lane in front of you or slows, your vehicle is automatically decelerated to the pre-selected distance. If the vehicle ahead moves out of your lane, the Octavia Scout 4x4 then accelerates up to the preset desired speed.

Deceleration of the vehicle may take place via intervention in the engine management system. If deceleration via engine torque is not sufficient, brake intervention takes place, braking the vehicle to a standstill if the traffic situation necessitates in vehicles equipped with a DSG transmission. ACC can be reactivated automatically by depressing the accelerator pedal. In vehicles fitted with a manual transmission, the system is automatically deactivated at speeds below 30km/h and the driver is prompted to take charge by visual and acoustic signals.

Note: Adaptive Cruise Control (ACC) cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain.

Brake Assist

Brake Assist aids the driver during emergency braking by automatically increasing the brake pressure to a level exceeding the locking limit. Then, the ABS is quickly brought into the operating range, thereby enabling maximum vehicle deceleration.

Multi-collision Brake

The multi-collision brake has been designed to provide effective assistance for the driver in the moments after an accident. Multi-collision brake triggers automatic controlled braking once an initial collision has been detected so as to reduce the intensity of further accidents after a collision and can help prevent follow-on collisions with oncoming traffic.

The triggering of the multi-collision brake is based on a collision being detected by the airbag sensors. The ESP control unit limits the deceleration of the vehicle by the multi-collision brake to a defined value and vehicle speed. The vehicle can still be controlled by the driver, even when automatic braking is taking place. The driver can interrupt the multi-collision braking at any time by accelerating or braking even more strongly.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Lane Assist

Lane Assist is a lane departure warning system that is designed to help reduce the likelihood of the vehicle leaving the road or crossing into an oncoming lane and therefore the risk of accident as a result of driver distraction or a lapse in concentration. The Lane Assist system monitors the road ahead with the aid of a camera (located near the interior rear view mirror) which recognises lane markings and evaluates the position of the vehicle. If the vehicle starts to leave the lane, the Lane Assist system takes corrective steering action. If this is not sufficient the driver is warned about the situation by a steering vibration and is asked to take over the steering. Additionally, if no active steering movements by the driver are recognised for longer than approximately eight seconds, a message will appear in the Multi-Function Display in conjunction with a warning tone. The corrective steering function can be overridden by the driver at any time and the system does not react if the turn indicator is set before crossing a lane marking.

Lane Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and therefore staying in the lane at all times. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system. The Lane Assist system does not activate at a vehicle speed of less than 65km/h.
