01

ŠkodaSuperb

Where original design meets functionality and modern technology merges with a simple solution,...

... a sense of safety can meet enjoyment from a drive. Where the world of comfort meets the world of functionality,...

... you can find a car that is as comfortable as it is useful. With elegant timeless lines and impressive room for passengers as well as their belongings. The Škoda Superb.

The **Bi-Xenon headlamps** with AFS (Adaptive Front Light System) are attractive in addition to their technical functionality.

The **rear combined lights** extend to the sides, increasing lateral visibility. The traditional letter C, which becomes pronounced when the lights are turned on, lends this model a distinct Škoda look.

The **double exhaust** tailpipe is proof that elegance can also look sporty. The end of the exhaust is also more resistant thanks to the use of stainless steel.

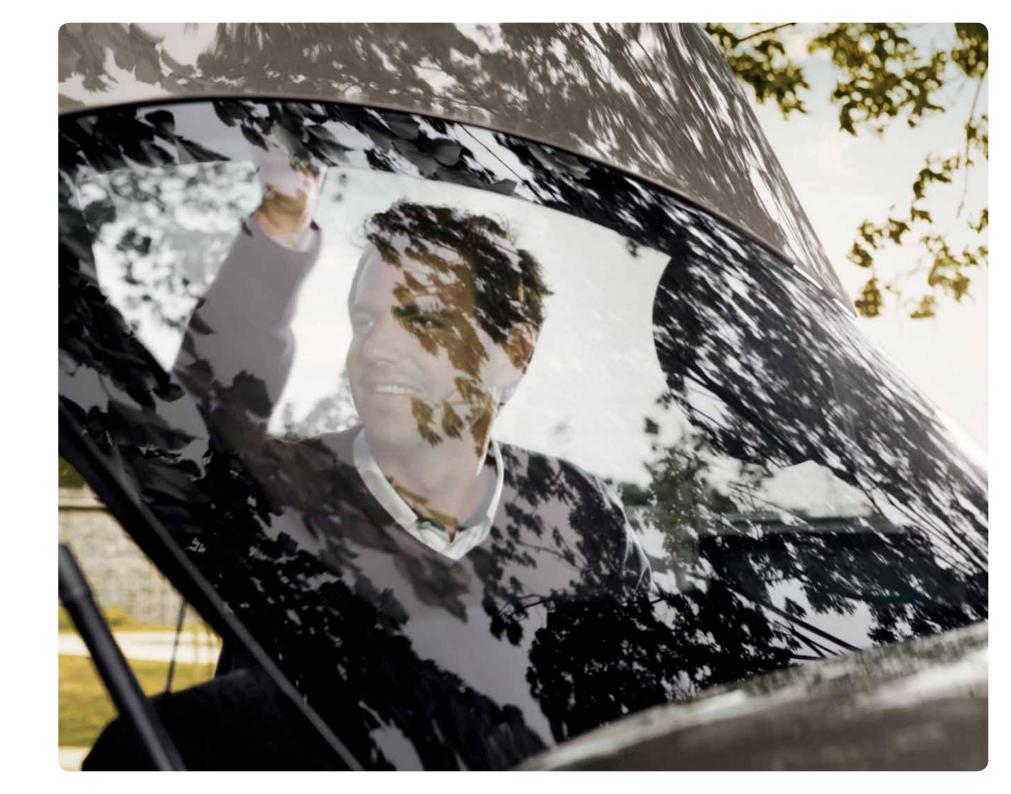

Chrome elements such as strips around the side windows (see photo), protective door strips and a strip on the luggage compartment cover highlight the exclusivity of the vehicle.

One of the characteristic **design** features of the Škoda brand is the **front grille** with the traditional vertical bars. At the lower part of the bumper is an inlet for air intake, which may be lined with a **chrome strip**.

The overall elegant look of the vehicle is further underlined by a **roof antenna** in the shape of a fin.

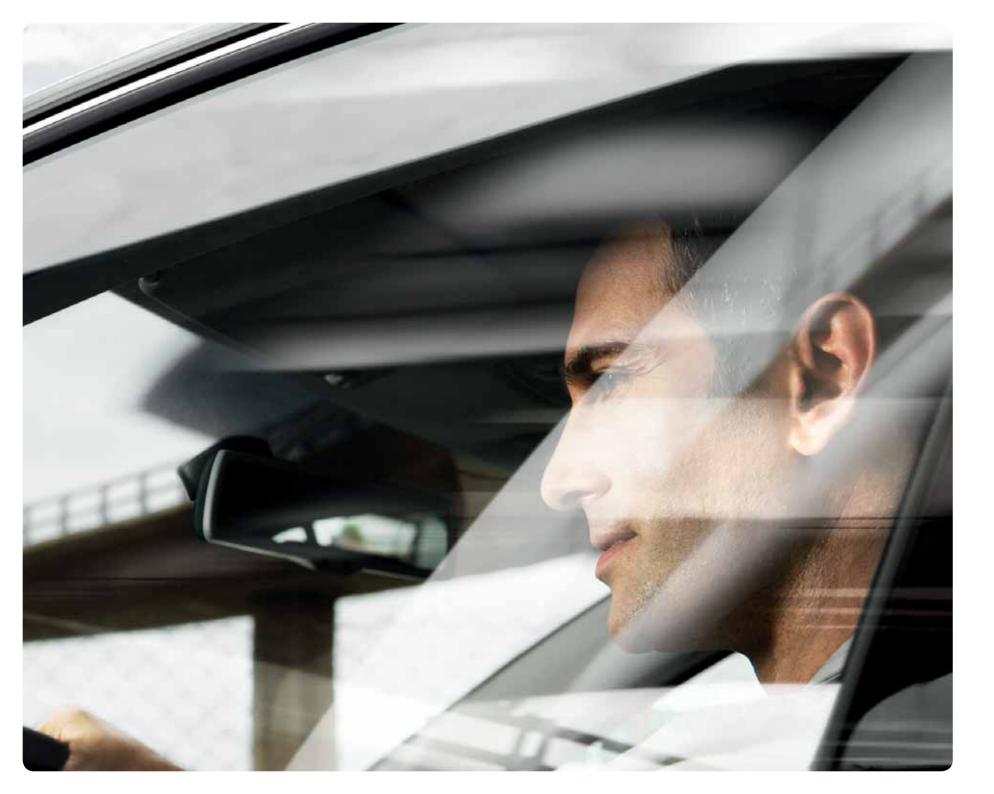

TwinDoor – the variable opening of the 5th door is a patent of the Škoda brand. With this unique structural and design solution, the Superb takes an exclusive position not only in its class, but also amongst cars in general. On one hand, the Superb represents a classically elegant sedan with a luxurious space for passengers, which is completely separated from the luggage area. When you press the Softtouch button in the middle of the 5th door, only the first part, which is really a cover for the luggage compartment, will open and you will gain access to stored items. On the other hand, the Superb is also a very practical liftback car, which enables unlimited access to the luggage compartment and easy handling of bulky items after lifting both parts of the 5th door including the window.

6-CD changer and more.

Modern **technologies** not only make travelling more pleasant but increase the ease of handling the vehicle. For example, the multifunctional 3-spoke leather steering wheel in its top version offers you control of the radio, phone and the automatic DSG (Direct Shift Gearbox). A multifunctional 4-spoke leather steering wheel enabling control of the radio and phone is also available.

Automatic 7-speed DSG, exclusively available for the 1.8 TSI/118kW engine, guarantees smooth and rapid gear shifts resulting in maximum utilisation of the potential of the engine's torque.

In vehicles equipped with **KESSY** (Keyless Entry, Start and exit SYstem) there is a Start/Stop button on the steering column for keyless starting and switching off the engine.

a multitude of functions, such as a reader for SD or MMC data cards, ability to play music CDs as well as files in MP3 and WMA formats, memory for radio traffic reports (TIM),

The **Columbus navigation system** with a 6.5" colour touch-screen and voice command function enables watching TV broadcasts and browsing teletext pages in combination with the TV tuner.

The **GSM II phone preparation** is designed for Bluetooth enabled devices, the **GSM III set** further supports phones with rSAP (remote SIM Access Profile).

The **MDI** (Mobile Device Interface) gives you the ability to control a connected external device through the radio, navigation system or multifunctional steering wheel.

The Sound System with a 10-channel amplifier plus a digital equaliser and ten speakers provides excellent sound reproduction in the vehicle.

In the Superb model, you can rely on outstanding **safety** equipment with state-of-the-art technology. **Bi-Xenon** headlamps with AFS (Adaptive Front Light System), which are able to adjust the lighting in front of the car to the current driving conditions, add to your safety behind the wheel. The AFS works in several different modes: extra-urban, urban and motorway. Further, AFS offers the "rain" functionality intended for driving in conditions of reduced visibility. In addition, the Bi-Xenon headlamps are equipped with rotary modules, which illuminate turns as you drive through them. Further enhanced safety is contributed to by **front fog lamps with the Corner function**, which is particularly useful during turns in badly lit areas, and integrated **daytime running lights.**

The rear side airbags protect the chest and pelvis of passengers in the rear side seats in the event of lateral impact.

The front side airbags are designed to protect your pelvis and chest.

Driver and passenger airbags are effective protection in the event of a head-on collision. If a child seat is placed in the front seat, it is necessary to deactivate the passenger airbag.

The knee airbag, located under the steering wheel column, protects the driver's knees and shins.

Head airbags create a protective wall upon their activation, which protects the occupants in the front and rear against head injury.

The rain sensor automatically activates the front Aero-wipers based on the rain intensity, applying even pressure on the glass and, therefore, wiping evenly along their whole length.

Parking Assistant, which utilises front as well as rear parking sensors and additional two sensors for its operation, not only simplifies vehicle handling, it literally parks for you. While the Parking Assistant operates the steering wheel, a driver only uses the accelerator and the brake.

Safety lights on the panelling of the front and rear doors alert passing drivers to the open doors on the stopped vehicle.

The **dashboard** evokes a feeling of **comfort** at first sight, as well as at first touch. The placement of individual control components was designed so that you can become oriented quickly and easily behind the steering wheel. The controls are at an arm's length and in places where you would expect them intuitively. The steering wheels for Superb are available in several designs, which differ in their shape, material, and available functions, but any of them make driving the Superb easy and precise.

The ASR (Anti-Slip Regulation) can be deactivated if necessary while the ESP (Electronic Stability Programme) remains active.

SET (!)

The **TPM** (Tyre Pressure Monitoring) is a system that utilises data from the **ABS** (Anti-lock Braking System) sensors. Any decrease in the under-inflated tyre revolution speed is indicated on the instrument panel to alert the driver.

Pe

Turning off the parking sensors, or rather the acoustic signal, can be useful, for example, in heavy city traffic.

The **Parking Assistant**, designed to facilitate parallel parking in a row of vehicles, is activated by a button to the right of the gear stick. The parking procedure, including searching for a suitable parking place, is shown on the Maxi DOT display.

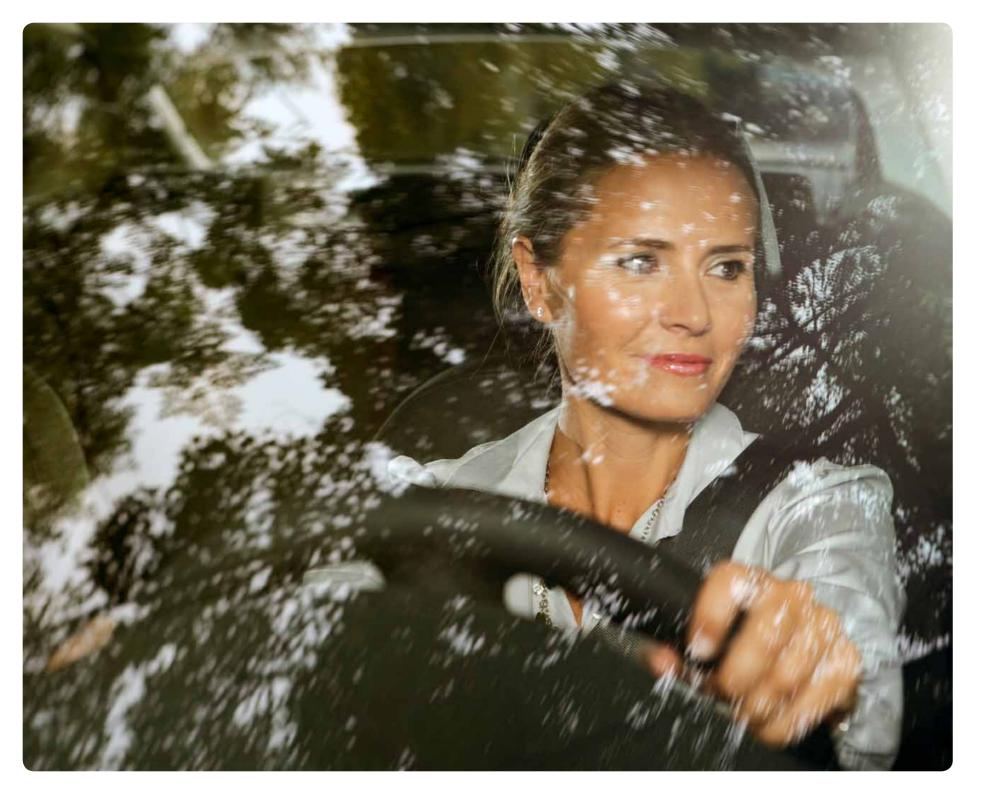

Heating of the rear seats is regulated by a separate control on the rear side of the Jumbo Box. This convenient feature, which contributes to the comfort of your ride in cold weather, is supplied exclusively in combination with heating of the front seats.

The **electrically-adjustable driver seat** is equipped with memory, which can store three different positions of the seat and the external mirrors.

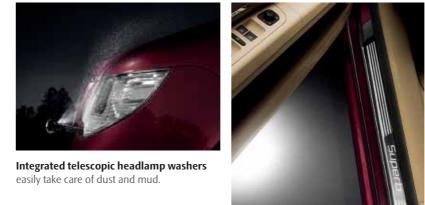

The **heated front windscreen** will quickly clear frost or steam and you are thus guaranteed a clear view in any weather.

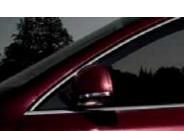

will be especially useful when parking on city streets.

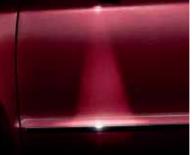

Boarding Spots on the underside of the external mirrors help you to avoid puddles and stones.

CatVision, softly diffused lighting of the interior with two white LED diodes, lights up together with lighting of the door handles when the low beam headlamps are turned on.

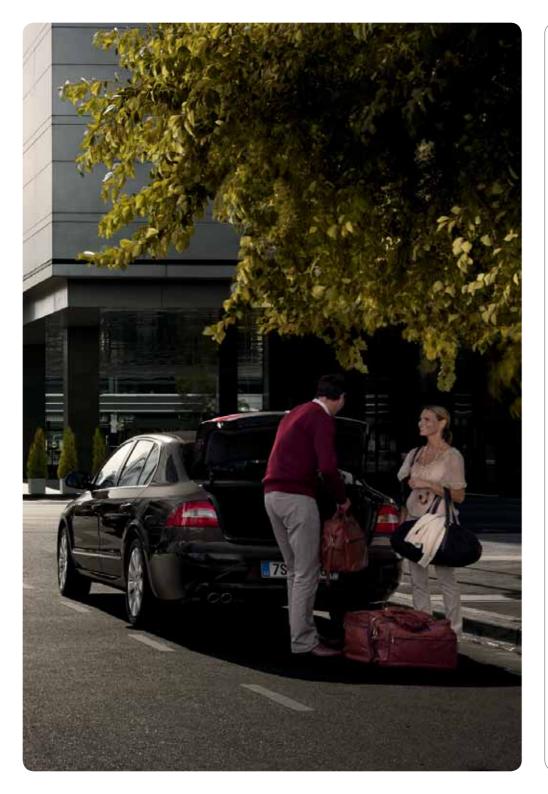

Boarding Spots on the underside of the doors illuminate the entry area to both front and rear passengers.

Illuminated internal door handles are a pleasant detail making exiting the car in the dark easier.

Lighting of the foot area in the rear is activated when the rear door is opened.

The electric sunroof with solar cells is a unique example of modern technology that enhances comfort. Solar cells inside the window, whether open or closed, supply electric energy that drives a ventilator, which takes care of air circulation inside the vehicle. Therefore, the Superb provides you with a fresh and pleasant climate in the interior even after extended parking in the sun.

SunSet, windows with a higher density of tint in the rear part of the vehicle, provide simple yet effective protection from direct sunlight. Passengers in the rear seats will also appreciate a greater sense of privacy.

Roll blinds for the rear side windows and a roll blind for the rear window with manual control significantly increase passenger comfort in the rear seats during sunny weather.

display, showing the time and outdoor temperature, a 12V outlet, control for the heating of the rear seats and a storage compartment.

Climatronic, dual-zone air conditioning with electronic regulation, enables setting a different temperature for the left and right sides of the interior.

The **mid-level luggage compartment floor** creates a hidden storage area. In addition, thanks to the mid-level floor, the bottom

of the compartment is raised almost to the level of the loading

The **Net Programme** (four nets) divides the large luggage compartment into ideal storage spaces.

Foldable hooks in the luggage compartment are an inconspicuous but very practical feature.

A **drinks holder** in the rear armrest is a welcome accessory for the passengers in the rear seats.

The **split (1/3 and 2/3) and foldable rear backrest** amplifies the exceptional practicality of the vehicle.

The **sunglasses compartment** is a detail that belongs inside a comfortable interior without question.

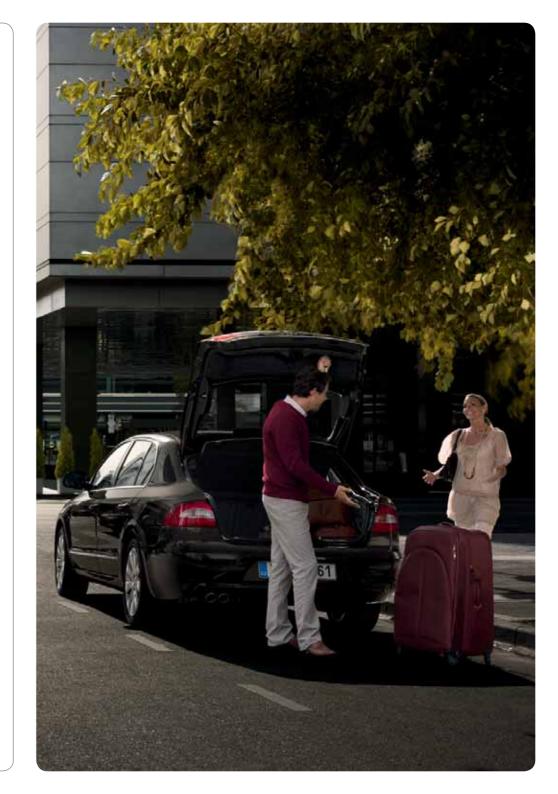

The **air-conditioned storage compartment** as the passenger's seats. in the dashboard on the passenger side of the vehicle comes as standard with all equipment versions.

The **drinks holder** with a laminated cover in the centre console is within easy reach from the driver's, as well as the passenger's seats.

The **4x4 version** holds quite a unique position among our offerings. In terms of driving properties, it adds a much more enjoyable and sporty angle to the already luxurious driving experience in the Superb. When driving the 4-wheel drive Superb you will feel much safer even on loose surface roads. The rear axle of all the offered Superb 4x4 versions is controlled by the Haldex clutch control unit that immediately reacts to driving conditions and prevents the front wheels slipping.

There are three engines available for the 4-wheel drive version – two petrol engines and one diesel engine. The **1.8 TSI/118kW** petrol and **2.0 TDI CR DPF/125kW** diesel engines are available with a proven manual 6-speed transmission. The top engine

offered is our **3.6 FSI V6/191kW** 6-cylinder petrol engine, which is exclusively delivered with the automatic 6-speed DSG.

You may select the vehicle **interior and wheels** for the 4x4 from our three equipment versions as well as numerous items from our generous range of extra equipment.

The **Škoda Superb GreenLine** model is another step forward in our effort to continuously minimise CO_2 emissions. This vehicle also proves that highly advanced technical solutions allow the combination of exceptional concern for the environment with high driving comfort.

The **1.9 TDI PD DPF/77kW** engine powering the Superb GreenLine experienced numerous technical changes that resulted in decreased combined fuel consumption and consequently reduced CO₂ emissions to 129 g/km. This vehicle features decreased engine idle speed and manual transmission with longer gearing. The lower chassis, spoiler on the 5th door and closed cooling air inlets of the front brakes decreased its air resistance coefficient.

The **wheels and the tyres** also significantly contribute to the fuel consumption and emission decrease. The Superb GreenLine features the 7.0J x 16" steel wheels with Tempel hub covers and the 205/55 R16 special tyres with low rolling resistance and higher prescribed air pressure.

The **Elegance** version will satisfy the highest expectations. It comes with the Felicity interior in black or lvory as standard. The lvory option is available with light or dark floor panelling including removable woven carpets. The dashboard, in black-black or black-lvory colour combinations, and doors, in black or lvory, are lined with the Noblesse décor (imitation wood). The interior features a range of decorative high-polish black décor elements as well as many chrome components. By special request, the Elegance version may be ordered with the Emory (Alcantara) or Glamour (leather) interior trim and Mirage décor (imitation metal). The front seats are specially shaped to provide maximum comfort.

The **Ambition** version is typical for its dynamic style. In the basic version it is equipped with the Rubicon interior in black or grey, a 4-spoke leather steering wheel and a small leather package (gear stick knob and handbrake handle). The dashboard, in black-black or black-grey colour combinations, and the doors, in black or grey, are lined with the Mirage décor (imitation metal). Also, this interior includes decorative high-polish black décor elements as well as chrome components. By special request, the Ambition version may be ordered with the Emory (Alcantara) or Glamour (leather) interior trim and Noblesse décor (imitation wood).

The **Comfort** version is offered with a stylish Ray interior in black. The dashboard and doors are lined with the Stromboli décor. As with the other versions, this interior also features an entire range of decorative high-polish black décor elements such as the cover of the rotating lights switch, air conditioning, radio etc., as well as many chrome components including air inlet frames, rotating lights switch, air conditioning, radio, gear stick lever etc.

7.5J x 18" **Themisto** alloy wheels with a polished surface for 225/40 R18 tyres.

7.5J x 17" **Callisto** alloy wheels with a polished surface for 225/45 R17 tyres.

7.0J x 17" Venus alloy wheels for 225/45 R17 tyres.

7.0J x 16" **Spectrum** alloy wheels for 205/55 R16 tyres.

7.5J x 18" **Luna** alloy wheels for 225/40 R18 tyres.

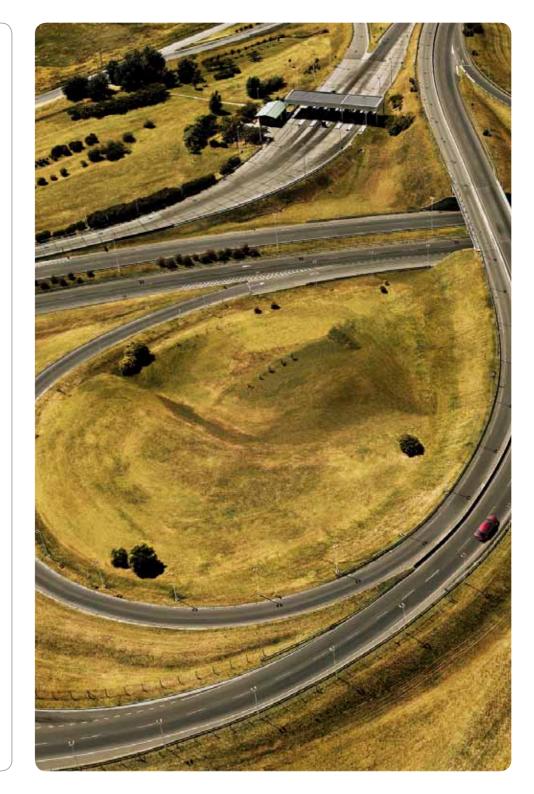

7.5J x 17" **Trifid** alloy wheels for 225/45 R17 tyres.

7.0J x 16" **Moon** alloy wheels for 205/55 R16 tyres.

7.0J x 16" steel wheels for 205/55 R16 tyres with **Tempel** hub covers.

Superb with a 4-wheel drive and a 4th generation Haldex clutch (1.8 TSI/118kW; 3.6 FSI V6/191kW and 2.0 TDI CR DPF/125kW engines)

Superb with a front-wheel drive (available for all engine versions except for 3.6 FSI V6/191kW engine)

Snow chains will guarantee a safe drive even on snow-covered roads. For those who want to have a really elegant vehicle even with winter tyres, we have developed special 17" Flash alloy wheels, designed specially for use with snow chains.

Even though Superb already offers many accessories in all equipment versions, there is always space for your own individual decision. We are offering you **Škoda Genuine Accessories,** with which you can modify your vehicle so that it matches your needs or desires. Components that underline the car's design, comfort accessories, practical interior equipment, or roof racks – you will find it all in our assortment. A comprehensive review of our range is available in our separate catalogue of accessories, which is available at every Škoda authorised partner.

Clothes hanger is an extremely practical accessory, especially for those who drive to work wearing a suit.

A **towing device**, which is removable, will enable your Superb to tow a trailer of up to 2,000 kg, based on the engine version.

A **Styling kit** is offered to our customers who desire a vehicle with a more sporty appearance. The styling kit includes a front bumper spoiler, a rear diffuser, a decorative exhaust pipe end piece and a spoiler for the 5th door.

General information

ŠKODA SERVICE

Put your car in good hands. We give you good reasons to choose an authorised Škoda service partner.

We offer you first-class quality

Your car requires advanced technology. For this reason, all the Škoda authorised service partners have special tools and quality diagnostic systems at their disposal which in combination with the technological procedures prescribed by the manufacturer ensure the perfect functionality and reliability of your car.

Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in the car requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the staff of the authorised service partners in order to provide them with up-to-date information important for their activities.

Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is of great importance to us in the same manner as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control of the provided services.

Comprehensive range of services:

Service inspections

For your car to remain in top condition and functional for a long time and, optionally, not to forfeit warranty, it is essential for your Škoda authorised service partner to perform regular service inspections. The service schedule informs you when the service inspection must be done.

· Body and paintwork service

Damage to the body and painted areas following an accident will be fixed by your authorised Škoda service partner in an expert manner, in accordance with information from the manufacturer, using Škoda genuine parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

Courtesy car

The authorised Škoda service partner can provide you with a courtesy car for the period of repair or service inspection.

• Pick-up and delivery service

If you are unable to take your vehicle to a Škoda service, an authorised Škoda service partner will arrange a date with you to pick up the car. The car will be delivered back after the service work has been completed.

The listed services represent only a part of the wide range of Škoda service offers, which may vary from country to country. Please contact your authorised Škoda service partner for further details and information on the range and specific conditions of services they offer.

ŠKODA GENUINE ACCESSORIES

Škoda Genuine Accessories offer you child safety seats, roof rails, alloy wheels, sunblinds and more. For more detailed information on the complete Škoda Genuine Accessories range see the individual Škoda model catalogues.

ŠKODA GENUINE PARTS

Safety

Škoda genuine parts are identical to those used during the assembly of Škoda vehicles. The use of first-class materials and technologies guarantees safe and worry-free driving.

Availability

Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's batch production and does not merely focus on high-turnover parts. Škoda ensures the provision of genuine parts even after the relevant model is discontinued.

Long service life

The use of first-rate materials and production technologies in the manufacture of Škoda genuine parts ensure their maximum reliability and long life.

Environment protection

The Škoda Genuine Parts range includes exchange parts whose production has a low environmental impact in terms of waste, excess heat and water pollution.

INFORMATION ON THE INTERNET

Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models.

ŠKODA FINANCE

ŠkoFIN offers solutions for both individuals and businesses. You can learn about the current offer through any authorised Škoda partner. The credit or lease contract can also be concluded online directly with the car dealer.

GLOBAL FLEET

The Škoda Auto Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of Škoda cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and, as a result, excellent value for money. You can find more information about our products and services at www.skoda-auto.com/fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluable paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes (including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
