

GOLF

Our photo shows the Golf L

The Golf. A pleasure 1000 000 times over.

When we started to develop the Golf, the car we had in mind was to be in the vanguard of modern automobile engineering. A car that would suit today's traffic conditions while meeting today's demand for motoring comfort and convenience. A car which is roomy and attractive but still reliable and economical. In other words, a Volkswagen.

As far as the engineering is concerned, it comes with all the typical characteristics of the new generation: front drive, the weight-paring design and the lively, thrifty engines.

Compact, space-saving outside dimensions cope with today's traffic situation and the parking-place shortage. An area of 64.6 square feet is all the 146.6-inch-long Golf needs.

But inside we let ourselves go. Thanks to the bright idea of mounting the engine transversely in front, it was possible to make the most of the long wheel base. And we had plenty of room for generous planning at our disposal. For two or four doors, for five well-fed occupants and any amount of luggage.

And to give it a character of its own, it has an

irrepressible, unconventional styling which sets new, advanced standards on our roads.

So it is hardly surprising to find so many motorists convinced that they would get on better with the Golf.

Their number has already passed the million mark.

Our photo shows the Golf L.

The Golf. A pleasure from beginning to end.

Of course, driving is not only for pleasure. Sometimes you drive simply because you want to get something from here to there. Now, while some cars one wouldn't even consider for this purpose, the Golf can take a real load from the rear.

Its roof-high tailgate the width of the car is positively inviting. And opens up a luggage

compartment with 13.1 cu. ft. capacity. Enough for quite a few suitcases, travelling bags and your little daughter's doll's house.

And if you happen to want to take the Chippendale chest straight home with you from the antique shop, the luggage compartment can be almost trebled in size — simply by folding the rear seat and backrest forward.

Now there is a huge 38.9 cu. ft. of luggage space at your disposal. So, if you want to keep a clear backward view when you are loaded to the ceiling, it is advisable to order your Golf with a second, inexpensive outside rear-view mirror on the passenger side.

This is not a luggage compartment you can count on finding in any saloon. Just loading a

bulky item through a side door could prove quite a problem, couldn't it?

So if ever you have any transport problems, the Golf is there, ready to take a load off your mind — and into its luggage compartment.

Our photo shows the cockpit of the Golf GLS.

The Golf. A pleasure from the purely technical point of view.

With the Golf you have the choice of four engines. On the principle: From each according to its performance, to each according to his needs.

First of all, there is the 1.1-litre engine. With an output of 50 DIN bhp. If is more speed you are after, it will not take you long to decide in favour of the 1.5-litre engine with 70 DIN bhp.

But if extreme economy is what you want, we have something quite special in store for you. An engine which is quite unusual for a car in this class, namely a special passenger-car diesel engine with 1.5 litres capacity and an output of 50 DIN.

Its performance is in no way inferior to that of

a petrol engine. And as far as consumption goes it has managed to reach the point where stinginess can go no further.

These three engines are available with any of the versions of the Golf — the 70-bhp Golf being identified by an additional "S" to its name, e. g. the Golf S. And the diesel Golf with a "D",

e. g. the Golf D.

There is the fourth engine too. The one at the top of the class, driving the Golf GTI. But this is an engine worth a special page of its own.

Orr photo shows the interior of the Golf GLS.

The Golf. A long-distance pleasure.

Settle comfortably into the Golf. There is certainly plenty of room to do so. For with 25.8 sq ft. of passenger compartment, even long legs can stretch out in comfort.

You will feel comfortable and safe in its anatomically designed front seats. Even after many hundreds of miles. It has been padded with a new kind of full-foam material which absorbs and attenuates the bumps on the road. The back-

rests can be adjusted to any position. Right down to fully reclining.

As far as the back-seat passengers are concerned, we have omitted nothing that makes for their comfort. Plenty of breathing space to relax in comfort, with the high ceiling and generously high backrests, soft seats and generous legroom mean that people will be just as happy to sit in the back as in front.

The atmosphere stays pleasant too. The Golf is equipped with a new, three-speed blower to adjust heating and ventilation just the way you want them.

And to make sure that there is plenty of safety to take care of you, we gave the Golf a rigid passenger-cell compartment, computer-calculated crumple zones front and rear and safety locks which prevent doors from bursting open unwitt-

ingly in an accident.

We gave it special safety anchorages for the front seats, safety locks for backrests, child-proof locks on the rear doors, a safety steering column and an interior devoid of sharp and hard edges that might hurt on impact.

We wanted to make sure that your "Golfing" pleasure would remain untroubled even on longer tours.

The Golf. A particularly inexpensive pleasure.

Anyone can afford a Golf. And without having to do without anything that really matters. Even if it is the lowest-priced model — which is the one we are dealing with on this page. It will have all the basic equipment — by which we mean all the equipment that you really need.

The Golf offers quite a number of practical features which are not usually to be simply taken for granted. The three-speed heating and ven-

tilation blower, for instance. Or the two-speed windscreen wiper system with additional tip-wipe contact. The electrically operated windscreen washing system. The heated rear window. The door-pane defrosters. And the reclining seats.

All this is standard, too. Which means you are getting good value for your money. Not that we want to forget the engineering which simply calls

for comparison with other makes in this price class.

The engines have already been presented. They are lively, full of temperament and thrifty. The only thing left is the lavish chassis.

It has a suspension strut front axle, guaranteeing accurate tracking. It has the combined trailing-arm centre-coupled rear axle which guarantees toe-in and camber stability. It has a diago-

nally divided dual circuit brake system which always brakes two diagonally opposed wheels — one in front and one at rear.

It has disc brakes in front. And the directionally-stabilizing steering roll radius, which you will appreciate if you ever get one of your front wheels on a soft shoulder and still manage to keep straight on your tracks.

The Golf L. A pleasure to be enjoyed in comfort.

The Golf L will do something for your status, with its stunning good looks. From chrome bumpers with rubber strips, through waistline trim with impact-profile, to the frames around all windows.

And from the elegant exterior it is easy to draw the correct conclusion about the lavish comfort of its interior. All the basic fittings are there of course. But there is a whole set of other pleasant features as well.

The driver's sun visor, for instance, is made to swivel to the side. And for your pretty front passenger there is a vanity mirror in the sun visor. There are grab-handles and loops for anyone who needs support. And restful armrests, even at the back.

With ashtrays in front and at rear, the smart carpet will keep its bright new look longer. And the light goes on for the passenger of the Golf L

too, when he opens his door.

And as for visibility: with the two-speed windshield wiper system, even a medium-sized cloud-burst will not succeed in clouding your view. And if there is only the odd raindrop now and then, an intermittent operation setting for the wipers will relieve you of having to turn it on and off all the time.

The Golf L is available with the 50 DIN bhp

engine. As the Golf LS it comes with the 70 bhp engine and to round the set off, as the Golf LD, with the new diesel engine.

But whatever its engine, the comfort it provides will always be found to be a cut above its 'class-mates'.

The Golf GL. An outstandingly lavish pleasure.

Even the most finicky motorist will find the Golf GL to his taste. He will miss nothing that is needed for comfortable motoring in real style.

First of all it has everything that the Golf and the Golf L have. And a great deal more as well. Bronze-tinted glazing all round. Which not only sets the tone for its outside appearance but also protects the Golf GL driver from glare.

And it creates the intimate interior atmosphere

that makes driving a pleasure. This is emphasized by the instrument panel padding, the foam-padded steering wheel, the covered window ledges, elegant carpet lining the doors, floor carpeting in matching shade, carpet lining and the elegant velour upholstery on the foam seats.

With "parchment" and "tobacco" upholstery, the instrument panel, steering wheel and shift-lever knob are in contrasting brown. A lighter is

within easy reach. And so are a number of other details which contribute to the pleasure of "Golfing" in the Golf GL.

The day/night rear view mirror. The central console with parcel shelf. The steplessly adjustable instrument dial illumination and the luminous identification on the most important operating elements. The radiator temperature gauge, the trip-mileage recorder, the quartz clock, the

parking-light setting, outside mirror adjustable from inside and a great deal more. Even an automatic arrest feature for the tailgate—which you will find most pleasant.

It goes without saying that the three engine versions are available for the Golf GL too. The 50 DIN bhp for the Golf GL, the diesel engine for the Golf GLD and the powerful 70 DIN bhp engine for the Golf GLS.

The Golf GTI. A particularly lively pleasure.

There's no doubt that it will soon turn up in Monza: the Golf GTI. A thoroughbred sports car with the power to head it into racing-car sport. Lots of people were begging for a genuine sports Golf. And now here it is, ready to take off at the starting line.

Drop in at your dealer's and take a peak under its bonnet. A 1.6-litre engine that gets a full 110 DIN bhp out of the car. How does it do it?

With the K-Jetronic. An injection system which doses the fuel with exceptional accuracy.

It gets from 0 to 60 mph in a few seconds. After that, you only have time to take a deep breath before you experience its top speed. Its chassis has been adapted to cope with improved performance, and there are wider wheel rims and extra-wide steel radials to provide the required additional safety.

And its equipment has been made to match this performance. Outside there are mat-black strips on the lower sides and mat-black-framed rear window. The mudguards have been widened with black plastic. There is a two-tone horn. And halogen headlights.

Inside there are bucket seats, a sporty three-spoke steering wheel and the golf-ball styled shift-stick knob.

It does pretty well with consumption too, and — true Volkswagen that it is — it is pretty immune to the hardships of normal traffic — points which are quite rare plusses for a sportsman as lively as this one.

The Golf. A particularly convenient pleasure.

To own a car from Volkswagen has always been something special. Because each and every Volkswagen is backed by the experience and efficiency of a world-wide organization operating in 120 countries, following the same meticulous rules.

Top quality is included with each and every Volkswagen. It stands for sound craftsmanship in production and extreme accuracy in inspection.

Before it's allowed to leave the factory, every Volkswagen is subjected to the critical scrutiny of numerous inspectors. This attention to detail is what makes your Volkswagen so tough and reliable. And why it maintains such a high resale value, if ever the time comes that you want to sell.

The proverbial Volkswagen quality comes not only with 'new Volkswagens but with genuine Accessories too. Volkswagen is always Volkswa-

wagen after all.

Volkswagens — the very cars which generally need less servicing than others — have one of the densest and most extensive service networks in the world at their disposal.

With genuine Spare Parts that are controlled and checked as strictly as any Volkswagen car. And guaranteed the same way. Our Service also includes checked repair hours and perfect main-

tenance — at long intervals (with the Golf no more than once a year or every 10,000 miles). This sort of a check of your Volkswagen guarantees reliability: through our famous Diagnosis System. As a result, errors will be almost completely eliminated.

And all Golf models come with the world-wide 1-year unlimited mileage warranty.

The Golf. An unbounded pleasure.

If everyone agreed about everything as easily as they agree about the Golf, international understanding would be no problem. After all, the Golf has received an enthusiastic welcome in 120 nations around the world.

From the cool north to the scorching south. From easy-going America to traditional England. From the sober West to the brilliant Orient. By

mesdames and mynheers, by signorinas and sirs, by damen and dons.

They all agree on its merits. All are quite united in thinking it one of the most practical, economical, thoroughly thought-out cars in the world. Agree that its functional beauty and its concentrated engineering harmonize with maximum safety. And that its agile, lively temperament is

no flash-in-the-pan, but will last for years.

All have found to their pleasure that it has outstanding comfort, extensive equipment, and a versatility that is one of its strongest points.

All have found, to their unbounded delight, that its consumption, susceptibility to repairs and upkeep requirements keep well within bounds. The way one would expect of a Volkswagen.

All of which makes the Golf sound pretty convincing. But no need to leave it at that. How about putting it to the test yourself by taking it for a test drive? Maybe your delight with the Golf will then know no bounds.

The Golf. Pick the colours that suit you best.

Cloth upholstery for Golf (hound's-tooth check).

black/white -- 01 black -- 03 parchment -- 04 tobacco -- 08 marine blue -- 09

Cloth upholstery for Golf GL (velours).

black -- 22 parchment -- 23 tobacco -- 24 marine blue -- 25

Print processes do not allow exact reproduction of colours. This applies to the exterior colours as well as to the upholstery.

**Technical Data
and
Equipment.**

	Engine and Power Transmission	Chassis	Performance	Dimensions and Weights	Important features of equipment			
					Golf/D/S	Golf L/LD/LS	Golf GL/GLD/GLS	Golf GTI
Golf	Transverse four-cylinder in-line front engine. Overhead camshaft with toothed belt drive. Water cooling with electrically driven, thermostatically controlled fan. 12 Volt electric system with alternator. Front-wheel drive via dry single-plate clutch, fully synchronized four-speed gearbox, differential and double-jointed drive shaft.	Springing: front and rear progressive buffer springs with telescopic shock absorbers — all combined in suspension struts. Suspension: suspension struts and lower wishbones in front (self-stabilizing torsion), combined trailing arm torsion beam axle at rear. Steering: maintenance-free, self-adjusting rack and pinion steering. Safety steering column. Brakes: diagonally divided dual circuit brake system, with brake servo, discs in front and drums at rear. Wheels: styled perforated discs with drop-centre rims. Tyres: steel radial ply.	a) Maximum speed with manual/automatic gearbox b) Acceleration at half load with manual/automatic gearbox c) Fuel consumption according to DIN (with manual/automatic gearbox) d) Specific consumption under favourable conditions driving on level ground at a steady speed with manual gearbox	Dimensions a) Wheelbase b) Track front/rear c) Maximum outside length/width/height d) Minimum ground clearance e) Turning circle diameter Weights a) Unladen weight of 2/4 door models b) Permissible total weight of 2/4 door models c) Payload of 2/4 door models d) Axle loads front/rear e) Permissible trailer load with/without brakes	Exterior equipment ● Painted bumpers ● Black waistline and door sill trim ● Spoiler below front bumper ● Towing brackets front and rear ● Halogen headlights (only in conjunction with the 70 DIN bhp engine) ● Black outside mirror ● Disc brakes in front ● Steel radial ply tyres ● Safety outside door handles, black ● Permanent undersealing on underfloor and wheel housings ● Stone guards on rear mudguards ● Large tailgate opening upwards Interior equipment ● Safety steering wheel ● Three-speed heating and ventilation blower ● Combined heating and ventilation system with flow-through ventilation ● Defroster for window-panes on doors ● Flexible cowl on instrument dials ● Parcel shelf ● Headlight flasher ● Two-speed windshield wiper with tip-wipe contact ● Rev. counter (only in conjunction with 70 DIN bhp engine) ● Fresh-air vents in the instrument panel, directionally adjustable ● Self-cancelling turn signals with lane-changing and emergency light function ● Safety steering column ● Safety rear-view mirror ● Padded sun visors ● Fully reclining front seats ● Windscreen washing system with electric pump ● Automatic switching to parking light setting on starting and stopping engine ● 1 courtesy light ● Heated rear window ● Door-contact switch for courtesy light on driver's side ● Safety pull-to mouldings on doors ● Footboard, black ● Safety lock for front seat backrests (in 2-door models) ● Hinge-down rear seat and backrest to boost luggage capacity ● Child-proof door locks on rear doors (in 4-door models) ● Rubber matting on floor	In addition to basic equipment: Exterior equipment ● Chromed bumpers with rubber strip ● Ornamental frame around radiator grid and windows ● Black outside door handles with polished insert ● Polished waistline trim with impact strips ● Ornamental strip on lower edge of tailgate ● Special inscription Interior equipment ● Intermittent operation setting for wipers, with wash-wipe automatic ● Rear ashtray ● Cover beneath instrument panel ● Driver's sun visor swivelling to the side ● Vanity mirror in passenger's sun visor ● Grab handle for front passenger and assist straps at rear ● Armrests on doors and at rear ● Door contact switch for courtesy lights on passenger's side ● Door armrests with grab recesses ● Carpeting on floors ● Lining for A and C columns ● Better quality seat covers ● Steering wheel with foam padded rim ● Cover for glovebox ● Wide footboard	In addition to basic and L equipment: Exterior equipment ● Polished waistline and door sill trim ● Polished hub caps ● All round bronze-tinted windows ● Pneumatic detention for tailgate ● Lockable tank cap ● Two back-up lights ● Special inscription Interior equipment ● Padded instrument panel with two dials and metal-effect cowl ● Clock ● Temperature gauge for radiator water ● Trip mileage recorder ● Dimmer for instrument panel illumination ● Cigarette lighter ● Luminous identification for cigarette lighter, ashtray and heater ● Parking light setting ● Shelf on passenger's side ● Day/night rear-view mirror ● Outside rear-view mirror adjustable from inside ● Lockable glove-box ● Central console ● Plastic covers for window sills and central column ● Lining inside door with carpet inset ● Matching carpet on floor ● Better quality seat covers with special weld pattern ● Plastic strips for front seat backrests ● Parcel shelf lined with carpeting ● Brown toned instrument panel, steering wheel, console and shift lever knob in conjunction with upholstery colours "parchment" and "tobacco" (otherwise black) ● Radiator water temperature gauge ● Trip mileage recorder ● Dimmer for instrument panel illumination ● Cigarette lighter ● Luminous identification for cigarette lighter, ashtray and heater ● Large rev. counter ● Shelf on passenger's side ● Parking light setting ● Twin-tone horn ● Intermittent operation setting for wipers with wash/wipe automatic ● Door-contact switch for courtesy lights on the passenger's side ● Black velours carpeting ● Parcel shelf lined with black velours carpeting ● A and C column lined with black PVC ● Wide footboards ● Sports seats, upholstery with tartan fabric, with adjustable head restraints and reclining facility	Sports seats, differing from or in addition to basic equipment: Exterior equipment ● Radiator grid with red ornamental frame ● GTI inscription on radiator grid ● Halogen headlights ● Black bumpers ● Large front spoiler ● Air blade on the windshield wiper arm on the driver's side ● Black trim strips on sides ● Wider mudguards with black plastic bead ● Laminated windscreen ● Tailgate with black paint in the window ● Pneumatic detention for tailgate ● Back-up lights ● Rear window wash/wiper Interior equipment ● Ceiling lined with black leatherette ● Driver's sun visor (black) also swivelling to the side ● Vanity mirror in passenger's sun visor (black) ● Day/night rear-view mirror ● Grab handle for front passenger, assist straps at rear ● Ashtray at rear ● Armrests on doors and at rear ● Cover for glove-box ● Sports car steering wheel with foam-padded rim ● Gear-shift lever with specially designed knob ● Central console with clock and oil temperature gauge ● Radiator water temperature gauge ● Trip mileage recorder ● Dimmer for instrument panel illumination ● Cigarette lighter ● Luminous identification for cigarette lighter, ashtray and heater ● Large rev. counter ● Shelf on passenger's side ● Parking light setting ● Twin-tone horn ● Intermittent operation setting for wipers with wash/wipe automatic ● Door-contact switch for courtesy lights on the passenger's side ● Black velours carpeting ● Parcel shelf lined with black velours carpeting ● A and C column lined with black PVC ● Wide footboards ● Sports seats, upholstery with tartan fabric, with adjustable head restraints and reclining facility
Golf Golf L Golf GL	Capacity: 1.1 litres (1093 cc). Bore and stroke: 69.5 x 72 mm. Output: DIN/SAE net 50/48 bhp at 6000 rpm. Compression ratio: 8.0.
