

AVAILANCHE

Avalanche

ULTIMATE ADAPTABILITY.

With its revolutionary Midgate,[™] Avalanche is the only vehicle that can go from a six-passenger SUV with a 5.3-ft. cargo box to a three-passenger full-size pickup with an 8.1-ft. cargo box. That type of adaptability is combined with clever features like standard lockable, lighted top-box storage compartments (located on both sides of the cargo box), cargo cover and five-link rear suspension (on 1500 models). Avalanche is also big on power, thanks to the strength of Vortec V8 SFI engines. And in early 2003, Avalanche can be equipped with the available new WBH (Without Body Hardware) Package. With all it has to offer, it's no wonder we call Avalanche the **Ultimate Utility Vehicle**. From the family of Chevy Trucks — the most dependable, longest-lasting trucks on the road.*

*Dependability based on longevity: 1981–July 2001 full-line light-duty truck company registrations. Excludes other GM divisions. NOTE: All claims are based on latest available competitive information. Excludes other GM vehicles.

1. REAR-SEAT CARGO ROOM ►

With both portions of the split-folding rear seat folded forward and the Midgate™ up, you get extra interior cargo space.

2. INTERIOR CARGO ROOM, FRESH AIR ►

With the rear window removed and stowed on board, you can enjoy a fresh-air driving experience. Fold the rear seat forward, leave the Midgate™ up and you have extra interior cargo room for things like hiking boots and outdoor gear.

◀ 3. EXTENDABLE CARGO BOX LENGTH

Fold the rear seat forward and lower the Midgate™ for an 8.1-ft. cargo box and extra cargo space. With the hard, lockable cargo cover on and rear window in place, you get a secure environment for your belongings. Hard cargo cover not included with WBH Package.

4. ROOM FOR BIGGER ITEMS, FRESH AIR ►

With the rear seat folded forward, the rear window in place, and the Midgate™ lowered, there's room for longer, taller items. Remove the rear window (and stow it on board) and enjoy the fresh air as you drive.

Midgate™

CHANGE IS EASY.

The key to Avalanche's adaptability is its easy-to-use revolutionary Midgate™. Located right behind the rear seats, the Midgate™ allows Avalanche to go from a six-passenger SUV with a 5.3-ft. cargo box to a three-passenger full-size pickup with an 8.1-ft. cargo box. View an interactive Midgate™ demonstration by using the attached CD-ROM.

Interior

CAPABLE. COMFORTABLE.

You want to take Avalanche into rugged terrain. You also want roominess and comfort. Avalanche lets you have both. Like all Chevy Trucks, Avalanche is strong. But it also has an accommodating interior. Its standard Custom Cloth 40/20/40 split-bench front seat and 60/40 split-folding rear seat provide room for up to six. Available features like eight-way power, premium heated front buckets with Custom Leather seating surfaces, and Bose speaker system mean no matter how rough it is outside, you'll be comfortable inside. Get a better view of the Avalanche interior in the attached CD-ROM.

Select Interior Features:

- Available XM Satellite Radio featuring digital-quality sound with 100 channels of music, news, sports and talk, coast to coast. Activation fee and service subscription extra (available only in 48 contiguous states).
- Standard dual-zone manual climate control for driver and right front passenger. ■ Available steering wheel-mounted controls (included only with available Driver Convenience or optional Personal Security Packages).

▲ THE NORTH FACE EDITION INTERIOR
The North Face Edition interior, now in new Medium Gray/Graphite, includes The North Face-inspired exclusive seats, special door trim and floor mats with The North Face logo.

▼ SPECIAL INSTRUMENTATION
As a distinctive design feature, The North Face Edition includes white instrument panel gauges and The North Face logo.

The North Face Edition

MADE FOR ADVENTURE.

For some, mountains are meant for climbing and rivers are meant for kayaking. To help get you there, there's The North Face Edition Avalanche.

It takes the design of The North Face and combines it with the Avalanche 1500 4x4 model. With skid shields, 46mm specially tuned Bilstein shocks and more, this Avalanche model is equipped to take you to or on almost any adventure.

Get a better look at The North Face Edition using

The North Face Edition Select

Standard Equipment:

- Autotrac 4x4 transfer case. ■ Z71 Suspension Package (Z71 decals not included). ■ Specially designed instrumentation. ■ The North Face exterior badging. ■ One-year OnStar Safe & Sound Package.* ■ Steering wheel-mounted controls. ■ Two water-resistant Water Duffalo Bags (an industry exclusive).† ■ Two Summit Pod Daypacks.†

*Call 1-800-ONSTAR-7 or visit onstar.com for system information and details. †These items include The North Face Limited Lifetime Warranty. See retailer for details. Not covered by the GM New Vehicle Limited Warranty.

IT'S ALL CHEVY TRUCK.

1 MANEUVERABILITY AND TURNING DIAMETER Avalanche features power-recirculating ball steering designed for easy maneuverability. It's a function that assists you in parking situations. The wheelbase and turning diameter in Avalanche are also shorter than the typical full-size extended cab pickup truck, based on 2002 competitive information.

2 DRIVER INFORMATION CENTER The standard Driver Information Center monitors and tracks numerous operating functions of your Avalanche. Here are some of the notifications it provides: ■ Battery not charging. ■ Change engine oil. ■ Check engine oil level. ■ Fuel level low. ■ Low coolant. ■ Ice possible. ■ Check washer fluid. ■ Driver door ajar. ■ Passenger door ajar.

3 FRONT AND REAR STABILIZER BARS The front suspension of Avalanche 2WD 1500 models features a 1.42-inch stabilizer bar while the rear suspension includes a 1.12-inch stabilizer bar. Both stabilizer bars help reduce body roll.

4 BUSSED ELECTRICAL CENTER (BEC) BECs centrally locate critical electrical system functions and allow for a reduction in the number of wires and connections throughout the vehicle. This helps achieve overall system reliability.

5 HYDROFORMED FRAME RAILS Front frame rails in 1500 and 2500 models, and the rear rails in 1500 models are made of hydroformed steel. Hydroforming optimizes the stretching of the steel, which allows the steel to retain more of its strength. Also, hydroforming greatly reduces the amount of welding required to manufacture the sections. This process results in more consistent and repeatable frame strength.

6 CORROSION PROTECTION Two-sided galvanized steel is used on all exterior body panels (except the roof) to help protect against corrosion. When the available sunroof is chosen, the roof is constructed of two-sided galvanized steel.

7 FUEL TANK CAPACITY Avalanche 1500 models feature a 31-gallon fuel capacity (approximate). With a highway MPG of 18 (2WD models), you get a highway driving range of more than 550 miles.* Avalanche 2500 models feature a 37-gallon fuel capacity (approximate).

*Estimated MPG 14 city, 18 hwy. Based on GM testing; official EPA estimate not yet available.

8 LOCKING REAR DIFFERENTIAL Avalanche can be equipped with an available locking rear differential. When rear-wheel slippage is detected at lower speeds, the locking differential mechanism locks the rear axle, sending maximum drive power to both rear wheels. The locking rear differential helps you explore unpaved areas with more confidence.

9 FIVE-LINK REAR SUSPENSION Avalanche 1500 models feature a five-link rear suspension design, which incorporates a track bar to control axle position. This contributes to the overall ride quality and load-carrying ability of Avalanche.

10 TWO-TIER LOADING Avalanche has two-tier loading capability allowing you to transport cargo on both the top and bottom part of the eight-foot cargo box. And with the Midgate™ lowered, rear window intact and cargo cover in place, these items are secure.

11 CARGO COVER The three-piece cargo cover is made from a strong, lightweight composite material. The cargo cover's panels can be individually removed and easily stored on board, in their own pouch, when not in use. Not included with the WBH Package, available early 2003.

12 WATER MANAGEMENT SYSTEM A Water Management System prevents water or snow from entering the passenger area of the vehicle from the cargo box, when the cargo covers are on, the Midgate™ is in its standard upright position and the rear window is in place. For further information, use the attached CD-ROM.

13 CARGO TIE-DOWNS All Avalanche models include eight tie-down loops located inside the cargo box. The tie-down loops let you secure large items, like furniture, appliances or outdoor equipment more easily.

14 OUTSIDE REARVIEW MIRRORS Power-folding outside rearview mirrors are available as part of the Driver Convenience Package. The mirrors are power, heated and body-color. They include curb-tilt, turn signals and a light at the bottom of their surface. The light illuminates the ground around the front side doors for convenient entry and exit.

15 AIR BAG SYSTEMS The right front-passenger front air bag includes a Passenger Sensing System.* The system is designed to automatically switch the air bag on or off based on a passenger's weight. An indicator on the inside rearview mirror monitors system status.

*A NOTE ON CHILD SAFETY: Always use safety belts and proper child restraints, even with air bags. Even with the Passenger Sensing System, children are safer when properly secured in a rear seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active air bag. See the Owner's Manual and child safety seat instructions for more safety information.

Clever Features

SMART AND FUNCTIONAL.

Avalanche comes with standard features that make the Ultimate Utility Vehicle easy to use.

The grab handles in Avalanche's cargo box, for example, not only provide easy access to the cargo box — they can be used as cargo tie-downs to help secure items. Adjustable brake and accelerator pedals can help make your driving experience more comfortable (available with the Driver Convenience Package or premium front bucket seats with Custom Leather seating surfaces). For a complete list of Avalanche's clever features, use the attached CD-ROM.

GRAB HANDLES ►

Integrated grab handles are designed to allow you easy access to the cargo box, and provide you with assistance while stepping on the rear step-bumper. The grab handles can also be used as cargo tie-downs when you need to secure items. (Rear step-bumper not included in the WBH Package, available early 2003.)

▼ RUBBER MAT BEDLINER

To help prevent items from shifting when you're driving, Avalanche comes equipped with a thick rubber bed mat. It's easy to remove, too, for fast cleanups.

◀ CARGO BOX LIGHT

Put your flashlight away. This feature lights both the top-box storage area and cargo box to provide visibility when you're stowing items.

◀ TOP-BOX STORAGE

Lockable, lighted storage compartments are located on the side of the cargo box and provide up to 1.7 cu. ft. of room each. These containers are perfect for holding small camping gear or emergency equipment, and can even be filled with ice and used to hold your favorite beverages. As an added benefit, holes at the bottom of the containers allow melting ice to drain.

ADJUSTABLE PEDALS ►

Power adjustable brake and accelerator pedals are included with the available Driver Convenience Package or when the available premium front bucket seats with Custom Leather seating surfaces are ordered. The pedals can be set to accommodate drivers of various heights to help make driving Avalanche comfortable. Adjustable pedals to be set in "Park" only.

◀ LOCKABLE PRO-TEC TAILGATE

The PRO-TEC tailgate is lockable, lightweight and rust-proof. Its one-piece inner panel is made from a durable composite material to help resist dents and dings. The PRO-TEC tailgate even includes integrated cup holders.

◀ THREE-PIECE CARGO COVER

The standard three-piece cargo cover is made from a strong, lightweight composite material. The cargo cover panels can be individually removed and stored on board. Not included with WBH Package, available early 2003.

◀ REAR STEP-BUMPER

Combined with integrated grab handles, the rear step-bumper provides extra convenience when you need access to the cargo box. Not included in the WBH Package, available early 2003.

Vortec Engines

YOU HAVE THE POWER.

The Vortec engines in Avalanche deliver some powerful statements. The Vortec 5300 V8 SFI engine in Avalanche 1500 models delivers 285 horsepower. That's more standard horsepower than a Ford SuperCrew, Ford Explorer Sport Trac or Dodge Ram 1500 Quad Cab. The Vortec 8100 V8 SFI engine, standard in Avalanche 2500, has more torque than V8 or V10 gas engines from Ford and Dodge. The strength of Vortec power in Avalanche. Get more information on the Vortec engines and view an interactive demonstration using the attached CD-ROM.

Common Vortec V8 Engine Features:

- Sequential Fuel Injection (SFI).
- Platinum-tip spark plugs that can travel up to 100,000 miles before they're scheduled to be replaced.*
- Engine coolant that won't require replacement for up to five years or 150,000 miles (whichever comes first).*

*Maintenance needs vary with different uses and driving conditions. See the Owner's Manual for more information.

▲ VORTEC 5300 V8 SFI ENGINE

- 285 horsepower @ 5200 rpm.
- 325 lb.-ft. of torque @ 4000 rpm.
- Four-speed automatic transmission with Tow/Haul mode.

▼ VORTEC 8100 V8 SFI ENGINE

- 340 horsepower @ 4200 rpm.
- 455 lb.-ft. of torque @ 3200 rpm.
- Four-speed heavy-duty automatic transmission with Tow/Haul mode.

Towing

IT HAS PULL AND LOTS OF IT.

Avalanche is a natural when it comes to towing.

Standard trailering features include Tow/Haul mode and four-wheel antilock brakes. Vortec 5300 V8-equipped Avalanche 1500 models can pull up to 8,200

lbs., while the Vortec 8100 V8-equipped Avalanche 2500 model can tow up to 12,000 lbs., when properly

equipped (see chart below). If you have a load to pull, Avalanche has the strength and power you need. For complete information on Avalanche's trailering features, use the attached CD-ROM.

AVALANCHE TRAILERING SPECIFICATIONS

Weight-carrying hitch limit: 5,000-lb. trailer with 600-lb. tongue weight. Weight-distributing hitch and sway control required over 5,000-lb. trailer weight. The vehicle owner is responsible for obtaining the hitch ball, a hitch of the proper size, type and capacity, and other appropriate equipment required to safely tow both the trailer and the load that will be towed. Ask your Chevrolet dealer for advice about the proper trailering equipment for your new vehicle.

1 GVWR (Gross Vehicle Weight Rating) includes vehicle, passengers, equipment and cargo. GVWR availability may vary depending on series, model and equipment selected. **2** Maximum payload capacity includes passengers, equipment and cargo. **3** Gross Combination Weight Rating (GCWR) is the total allowable weight of completely loaded vehicle and trailer. **4** Maximum trailer weight ratings are calculated assuming a base vehicle, except for any option(s) necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your Chevy dealer for additional details. **NOTE:** Trailer tongue weight should be 10 to 15 percent of total loaded trailer weight (1,000 lbs. on 1500 models and up to 1,500 lbs. on 2500 models). Addition of tongue weight cannot cause vehicle weights to exceed Rear Gross Axle Weight Rating (RGAWR) or Gross Vehicle Weight Rating (GVWR). These ratings can be found on the certification label located on the driver door or door frame. * Available Trailering Package includes trailer platform hitch and trailer connector.

TRAILERING BASICS

Towing a trailer involves all major vehicle systems of your Chevy Truck, including powertrain, steering, suspension, tire and brake systems. Easy and safe trailering requires a properly equipped vehicle, additional trailering equipment and an appropriate trailer. It also requires loading both the vehicle and trailer properly, using safe driving techniques, meeting regional legal requirements and following break-in and maintenance schedules. For more information, consult the Owner's Manual, speak to a trailering expert at your Chevrolet dealership or visit our web site at chevy.com. The charts on the following page will assist in determining how to best equip your Chevy Truck for trailering. To help you understand the charts, consider these trailering factors:

TORQUE: Indicates the strength of the engine. Low-end torque reflects how much force is generated to get your vehicle moving.

HORSEPOWER: Indicates how much work the engine does at a certain engine speed. At mid- to high-engine rpm, it's what keeps you moving at highway speeds.

AXLE RATIO: Along with your vehicle's transmission gears, a higher rear axle ratio contributes to how much available torque and horsepower (mechanical leverage) can be applied to the drive

wheels for launch and uphill performance. Higher rear axle ratios, however, sacrifice fuel economy when not trailering.

BALL HITCH TRAILERING: There are two types of ball hitches. A weight-carrying hitch consists of a ball and coupler with no means to distribute the hitch weight. It is used primarily for lightweight trailers. Heavier trailers, however, require a weight-distributing hitch, which uses spring bars to transfer some of the hitch weight forward onto the tow vehicle's front axle and rearward onto the trailer's axle(s).

RGAWR AND GVWR: Addition of trailer hitch weight cannot cause vehicle weights to exceed Rear Gross Axle Weight Rating (RGAWR) or Gross Vehicle Weight Rating (GVWR). These ratings can be found on the certification label located on the driver door or door frame.

GCWR: The Gross Combination Weight Rating is the total allowable weight of the completely loaded vehicle and trailer. A properly equipped tow vehicle and trailer at the maximum GCWR should be able to accelerate and merge with traffic, climb typical interstate grades at highway speeds, handle the combination on virtually all road surfaces and stop adequately within a reasonable distance.

MAXIMUM TRAILER RATING: This rating is determined by subtracting the tow vehicle's weight (curb weight) from the GCWR. When a base vehicle (curb) weight is used, additional passenger, equipment and cargo weight reduces this rating.

TRAILERING CAUTIONS

NOTE: Please read this Trailering Caution safety information before trailering with your new truck.

NOTE: The safety steps described here are by no means the only precautions to be taken when trailering. See the Owner's Manual for the Chevy Truck of your choice for additional guidelines and trailering tips.

TRAILERING CAUTION: If you don't use the correct equipment and drive properly, you can lose control of your vehicle when you pull a trailer. For example, if the trailer is too heavy, your vehicle brakes may be less effective. You and your passengers could be seriously injured. Pull a trailer only after you have taken the following steps.

TRAILER BRAKES: If your trailer weighs more than 2,000 lbs. loaded, then it must have its own adequate brakes. Be sure to read and follow the instructions for the trailer brake controller so that it is installed, adjusted and maintained properly.

■ Don't tap into your vehicle's brake system if the trailer's brake system will use more than 0.02 cu. in. of fluid from your vehicle's master cylinder. If it does, neither braking system will work well. You could even lose your vehicle brakes.

■ The trailer brake parts must be able to take 3,000 psi of pressure. If not, the trailer brake system must not be used with your vehicle. If everything checks out thus far, have a qualified individual make the brake fluid tap at the master cylinder port that sends fluid to the rear brakes. Don't use copper tubing, because it will bend and ultimately break. Use only double-walled steel brake tubing.

HITCHES: It's important to have the correct hitch equipment. Crosswinds, large trucks going by and rough roads are just a few reasons why you'll need the right hitch. Here are some rules to follow:

■ If you'll be towing a trailer that, when loaded, will weigh more than 5,000 lbs., be sure to use a frame-mounted, weight-distributing hitch and sway control of the proper size. This equipment is very important for proper vehicle loading and good handling when you're driving.

■ If you have to make any holes in the body of your vehicle to install a trailer hitch, be sure to seal the holes if you ever remove the hitch. If they're not sealed, dirt, water and deadly carbon monoxide from the exhaust can get into your vehicle.

*Maximum trailer rating may be less, based upon powertrain combination.

ACCELERATE YOUR COLLEGE SAVINGS

GM — along with many other leading companies — has teamed up with Upromise, the revolutionary college savings accelerator that can help you save thousands of dollars for college. When you purchase or lease an eligible new Chevrolet, GM will contribute \$150 into your Upromise college savings account. For complete details on the GM-Upromise program, go to <http://upromise.gm.com>. Enrollment is simple and absolutely free. To receive the \$150 GM contribution, you need to be a Upromise member 30 days before you take delivery of your vehicle.

IMPORTANT: A WORD ABOUT THIS BROCHURE We have tried to make this brochure comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment specifications, models and availability. Since information may have been updated since the time of printing, please check with your Chevrolet dealer for complete details. Chevrolet reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times.

AN IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES

Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design features, materials or workmanship of any alterations by such a supplier.

UPDATED SERVICE INFORMATION Chevrolet dealers receive useful service bulletins about Chevrolet products. You can purchase them by calling **1-800-551-4123**.

ASSEMBLY Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.

ENGINES Chevrolet vehicles are equipped with engines produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

Do you have a few more questions about the lineup of Avalanche models? Find out the answers right here on the attached CD-ROM. It's the next best thing to driving a new 2003 Avalanche. Here's just a sample of what you'll see on the CD-ROM:

- The ability to see The North Face Edition, Avalanche Z71, Avalanche 1500, Premium On-Road Suspension, Avalanche Without Body Hardware Package and Avalanche 2500 in every available color, inside and out, from every angle.
- OnStar® demonstration.
- Autotrac 4x4 system (standard on 4x4 models) demonstration.

Be sure to visit chevy.com for more information on Avalanche models and the rest of the 2003 Chevrolet line of cars and trucks.

*Call 1-800-ONSTAR-7 or visit onstar.com for system information and details.

GM PROTECTION PLAN The GM Protection Plan offers mechanical repair protection in addition to that provided by GM's New Vehicle Limited Warranty. Coverage for vehicle maintenance is also available. Ask your dealer about the GM Protection Plan. Coverage available only in the U.S. and Canada.

RUST-THROUGH CORROSION PROTECTION Chevrolets are designed and built to resist corrosion. All body sheet-metal panels are warranted against rust-through for 6 years/100,000 miles (whichever comes first). Application of additional rust-inhibiting materials is not required and none is recommended. See your Chevrolet dealer for terms of this limited warranty.
