

THE X2

November 2022
Production

UNLEASH YOUR INNER REBEL.

Absolutely unique. Extremely exceptional. The BMW X2 makes its sporty ambitions quite clear at first sight. Thanks to its bold athleticism, it supplies a dynamic and agile performance that is unrivalled in this class. Coupled with a high-quality interior and many innovative technologies, it is the extroverted protagonist of a new era. Are you ready?

X2 HIGHLIGHTS

STYLE AND SUBSTANCE.

One of a kind. Inspired by extreme sports, this unique style offers a blend of dynamic M performance design with the off-road character of a BMW X model.

DYNAMIC PERFORMANCE.

The X2 is powered by a range of three and four-cylinder engines with petrol, diesel and plug-in hybrid variants. A range of individual measures have been employed to improve the power units' efficiency and performance characteristics.

READY FOR EVERY DAY.

The proportions of the BMW X2 are extremely generous, providing comfort for all passengers and convenient flexible storage options for added versatility.

LIGHT UP YOUR LIFE.

A combination of additional LED lights and ambient lighting provides the interior of your BMW X2 with a sumptuous feel for a truly relaxing journey. Available as standard on M Sport and M35i models. Available as part of the Comfort Pack on Sport models.

DAZZLING DISPLAY.

The BMW X2 comes with an optional 10.25" central display that allows easier interaction with the navigation and infotainment systems. The functions of Navigation Plus are displayed using split-screen viewing for a parallel display of information such as a digital clock and maps.

THE BMW CONNECTED DRIVE

DRIVING ASSISTANT PLUS

The Driving Assistant Plus equipment provides a clear improvement in safety and comfort. It includes the Collision Warning and Pedestrian Warning with light city braking function, Lane Departure Warning, the High-beam assistant, the speed limit info and the camera-based cruise control with Stop&Go function.

BMW HEAD-UP DISPLAY

The full-colour BMW Head-Up Display projects information relevant to the journey directly into the driver's field of vision, thereby allowing them to fully concentrate on driving. The display includes information such as the current speed, navigation directions, Speed Limit Info incl. no-overtaking indicator, along with telephone and entertainment lists.

NAVIGATION PLUS

Navigation Plus features a BMW Head-Up Display, an iDrive Touch Controller, a built-in 8.8" touch display and an instrument cluster with high-resolution 5.7" TFT display. The system is operated intuitively using either the iDrive Touch Controller, the direct menu control buttons and eight functional bookmarks, voice control or the touchscreen with interactive tiles.

SMARTPHONE INTEGRATION

Why go without the features of your smartphone in your BMW when you can continue operating it as usual? With smartphone integration, your vehicle supports Apple CarPlay and Android Auto by means of a wireless connection between your smartphone and the vehicle. This allows you to conveniently use familiar functions and various apps in the vehicle.

ACTIVE CRUISE CONTROL WITH STOP&GO FUNCTION.

Active cruise control with Stop&Go function including Approach control warning with braking function maintains your preselected speed, as well as the distance to the driver ahead. The vehicle takes over accelerating and braking and keeps the predetermined distance to the car ahead even in slow-moving traffic and down to a stand-still in traffic jams.

MY BMW APP

STAY IN THE DRIVER'S SEAT,
WHEREVER YOU ARE.

Connect your vehicle to your life. The My BMW App keeps you at the wheel with total control of your BMW, whether you're in your vehicle or not.

- **Remote control**
Lock and unlock your BMW from wherever you are.
- **Location location location**
Access your car's location remotely and send locations to your car's GPS, so you're always ready for the journey.
- **Driving conditions**
Set the temperature of your car remotely for the perfect climate the moment you open the door.
- **Great service**
Let your BMW tell you when it's time for a service, then schedule it with just a touch.
- **It's personal**
It's MyBMW, after all. Enter your BMW's colour palette, and the app design follows suit.

SUSTAINABILITY AT BMW

ACTIONS AND TECHNOLOGIES THAT HAVE A REAL EFFECT.

No competitor comes close to matching the comprehensive and diverse BMW Group portfolio of electrified models (fully electric BEV, partly electric PHEV), with half a million such vehicles delivered to customers to date.

- In co-operation with ChargeNet, BMWi customers in New Zealand can access the ChargeNow 'electric highway' - 100 fast-charging stations from Kaitaia to Invercargil.
- BMW Group considers sustainability a fundamental aspect of its past, present and future corporate strategy.
- Decades-long history of action to protect the climate and significantly reduce fuel consumption.
- Focus on further electrification of the product roster as the key measure for lowering CO2 emissions.
- Largest range of plug-in hybrids as the most versatile form of electrification.
- Greatest benefit of plug-in hybrids: enabling both customary range and driving without generating local emissions.
- Fully electric BMW i3 is uniquely sustainable, with sales figures still rising six years after launch.
- By 2023: 25 models with electrified powertrains, half of them pure battery electric vehicles.
- Numerous awards for eco-conscious design covering the entire product lifecycle.

MEET THE ELECTRIFIED BMW FAMILY

For an electric vehicle it is not only important to consider how fast and safely it travels, but also how far it will take you. In this consideration, the range of an electric vehicle also depends on factors such as the speed, driving style and outside temperature as well as the use of the air conditioning or seat heating. These are factors that we cannot calculate. But all the others we can. Here you can find out all about the ranges of our electric cars and plug-in hybrid vehicles.

THE X2 EQUIPMENT

STANDARD EQUIPMENT

sDRIVE18i

TRANSMISSION AND TECHNOLOGY

- 7-speed Steptronic transmission with double clutch
- Driving Experience Control with ECO Pro mode
- Electric power steering with Servotronic
- Electronically controlled differential lock
- M Sport suspension
- Performance Control braking system
- Start/Stop button

EXTERIOR DESIGN AND FEATURES

- 19" M light alloy wheels Y-spoke style 722 M
- BMW Individual high-gloss Shadow Line
- BMW kidney grille, black high-gloss and chrome high-gloss frame
- Exhaust tailpipe, single round, left side
- M Sport X package

LIGHT AND SIGHT

- Exterior mirrors, electrically foldable and automatic parking function
- High-beam assist

- LED headlights with cornering lights
- Rain sensor
- Rear LED lights

DRIVER ASSISTANCE

- Cruise control with braking function
- Driving Assistant
- Lane Departure Warning

FURTHER INFORMATION ON CO₂ DATA

The values of fuel consumptions, CO₂ emissions and energy consumptions shown were determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The figures refer to a vehicle with basic configuration in Germany and the range shown considers optional equipment and the different size of wheels and tires available on the selected model.

The CO₂ efficiency specifications are determined according to Directive 1999/94/EC and the European Regulation in its current version applicable. The values shown are based on the fuel consumption, CO₂ values and energy consumptions according to the NEDC cycle for the classification.

When charging times are shown they can be affected by a number of factors such as type of charger, voltage supplied to the charger/car and type of current (AC or DC) supplied to the charger/car. The car also plays a role in charging times as it can be set by the driver to accept various different amperage and should preconditioning be used to heat or cool the vehicle while charging this will also affect the charging time.

The basis for the calculation of the charging times for 100 km range is the electric consumption of the vehicle based on the use of a high-Powered Charging station (HPC) or charging type and current as indicted in the literature above. The testing procedure measures are based on a 23 degrees Celsius battery start and ambient temperature with certification values excluding additional auxiliary consuming devices and systems within the vehicle such as seat heating, displays, air conditioning.

Individual consumption (fuel economy) may differ due to driving profile, vehicle load profile, auxiliary consumer usage, temperature, and ambient conditions. Consumption is based on WLTP or NEDC (whichever is indicated) best case conditions and is independently tested for BMW Group. If you are comparing this range with other models or brands make sure they are stating the same WLTP or NEDC testing regime. These results can be used to compare vehicles on a close to "like for like" basis but are unlikely to be achieved in real world conditions for reasons including temperature variation, driving conditions and the use of the auxiliary systems referred to above.

Information provided and images displayed in this brochure include overseas models and may show some features not available in New Zealand. Please contact an authorised BMW dealer for specific information on vehicles and features available in New Zealand. Product changes may have been made since production of this content.

Note: To obtain NZ CO₂ figures for vehicles imported by BMW Group NZ in relation to the NZ Clean Car discount or "FeeBate" you will need to contact your preferred dealer. The Clean Car discount figures sourced from your dealer will differ from those listed in the BMW owner's handbook and reported figures as they have been converted by the NZ government to WLTP3 from figures derived through one of the following testing procedures: WLTP4 or NEDC.
