## FIELD PHOTOGRAPHY TIP NO. 2

Sky is a field photographer's best friend, especially blue sky. This typical mule deer was taken by Kevin S. Dixon in Rio Arriba County, New Mexico and scores 184-6/8 points.

By sky-lining your trophy's antlers you accomplish two things. For one, you will capture a clear account of the trophy quality of your animal. Secondly, by consciously putting blue sky in the background you will also avoid the tendency to sit right behind your trophy's antler, erasing any benefit of taking the time to skyline his rack.

Kevin also did a nice job of sitting to the side and slightly behind his buck with the buck's head tipped forward instead of level or nose tipped up. This is the best head position for a tall racked buck. Some do not like seeing firearms/bows resting on the animal, but in this case the rifle helps frame the left side of the photo to balance the hunter and the tree behind him to the right.

Shade across the face from the bill of caps is hard to work around and even harder for the hunter to detect. It's the job of the person behind the camera to have them tip their cap up.

The next time, if big sky is available, try positioning your trophy to take full advantage.

# Pronghorn and Bison

**PRONGHORN ABOVE** David L. Rummel, along with his hunting partner Taz, took this pronghorn, scoring 80-6/8 points, while hunting in Phillips County, Montana, in 2008.

**BISON BELOW** Stephen F. Bennett, Sr., harvested this bison in Teton County, Wyoming, in 2009. The bull scores 128-4/8 points.
