◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Being persistent about making pottery exclusively using local materials to revive Kaminohata-yaki, it was difficult to find the right materials (pottery stones). I walked around the mountains and riverbanks near the old kiln and collected clay and stones considered suitable for pottery. Then I brought them to the Industrial Research Institute Ceramic Science Branch in Mie Prefecture where I was training at the time. The collected materials underwent fluorescent X-ray analysis, and were actually made into some pottery pieces for testing. Fluorescent X-ray analysis was also conducted on pottery pieces found from the old kiln site, and it was confirmed from a scientific perspective that both materials have the same properties. Furthermore, I worked to revive the old techniques, including handling a potter's wheel, hand painting, studying ancient documents, and reproducing paintings on porcelain pieces from the old kiln site (from which I found the santamon pattern). Six years were spent on these efforts to revive the kiln from 1974 to 1980, when the revival of Kaminohata-kiln came into sight. I then returned to my hometown, where I received much attention within the Tohoku region and across the nation for reviving pottery-making in collaboration with public and private sectors, and making it into a local industry. This attention on my efforts has been the driver of my passion during the past 40 years, to never allow the kiln fire to vanish.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

- 1) First and foremost, use materials found in locally.
- 2) Reproduce ancient works but also create various items required in the contemporary lifestyle.
- 3) Continue efforts to make known santamon, the characteristic pattern of Kaminohata pottery, throughout Japan and the world.
- 4) Create products by actively teaming up with partners from different industries.
- 5) Continue efforts to pass down traditional Japanese culture to young people as well as adults who have interest in such activities in the community through the art of pottery and Japanese tea ceremony.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

The founder of Shinjo Higashiyama-yaki, Yahei Wakui was originally a potter from Echigo Province. As he moved from one place to another around Japan to train, he became fascinated with pottery clay in Higashiyama, and in 1841, established Higashiyama-yaki pottery, an official kiln for the Tozawa Clan of Shinjo.

""Produce practical daily-use pottery"" has been our family rule since the first generation.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

I endeavor to produce items that match with the times and that are required by customers, adhering to the basics of traditional pottery-making passed down from the Edo period. To this end, I spare no effort in improving my skills every day so that I am able to deliver pottery that pleases customers.

My family has been making pottery for seven generations using quality clay for pottery found on our premises as well as various glazes handed down within our family, including namakoyu (literally, sea cucumber glaze) that represents the color of Dewa Province's snow in the shade.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Narushima-Yaki was established as a potteries of the Yonezawa Domain in the middle of the Edo era, as a part of industry promotion under the instruction of Yozan UESUGI. Narushima-Yaki reached their peak at the end of Taisho Era, but then disappeared. At the beginning of Showa Era, our grandfather Toshizo WAKUI who was the second son of 「Shin Kame Ya」 a potteries of Hirashimizu-yaki in Yamagata city, moved to Nagai city for the better pottery clay. Then he started his own business manufacturing and selling of clay pipes to succeed.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

We have a 250year history of continuing the traditional Narushima-Yaki, our aim is to keep on protecting our tradition. We make our products with a vision of the future. We use only local clay only, for glaze we use blend of ash from straw, bran and soil, all by-products from rice crops. We are particular about our work full of originality expression.

All of our work is done by the hand of skilled craftsman's hand with their full of emotion, we do not use any form. Our work is formed with a potter's wheel and Slab forming, the shape is the same but each one has a different expression and the scene. Each work is original and has the craftsman's originality.

We are a full member of the Japan Kogei Association, we would like to transmit the splendor of Japanese traditional craft to the world towards the development of traditional Japanese craft.

We also connect to the community through tours of our studios and offer field experience to kids from kinder gardens, students of elementary schools, junior high schools, high schools and special support education schools. We try our best to develop local culture awareness and successor upbringing so that we can gain the support, understanding and interest of traditional craft from the local people.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

In the early Meiji period, Seiryugama was founded by Josuke Niwa as one of the Hirashimizu-yaki (Hirashimizu ware) pottery pieces. During the Ryunosuke period (the third generation), the pottery was named "Seiryugama," taking one Chinese character each from "Hirashimizu" and "Ryunosuke." After finishing his apprenticeship in Mino and Kutani, Ryunosuke introduced the technique of overglaze painting called "uwaie" that he had mastered, and worked on developing new products. At that time, he paid attention to the local original soil containing iron sulfide, which had not been used by anyone, and perfected seiji (celadon) like the surface of a pear by daringly utilizing the features of the soil. It was named "Nashi Seiji (pear celadon)" and was introduced in Japan Pottery Old and New which was held at the Detroit Institute of Arts in 1950. In addition, works using hakuyu (buttery-white glaze), which were displayed at international exhibitions such as EXPO 1958 Brussels, were named "Zansetsu (remaining snow)," reflecting the snowy landscape in spring. These production methods have been improved daily by the fourth (and current) pottery owner, Ryochi, and our craftsmen, and passed down to the present time as Seiryugama's style.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Seiryugama independently conducts all processes, from making clay out of the original soil produced in the Hirashimizu area, to product commercialization. Products made at Seiryugama are characterized by a simple and subdued texture. Life in the satoyama (mountain village) deep in the snow enabled the creation of such a style. In particular, "Zansetsu," one of Seiryugama's representative works, was produced by reflecting the landscape of mountains in the Tohoku region where snow remains even when the long winter finally ends. Iron sulfide contained in the original soil reacts in the firing, which creates a unique expression in the whiteness of the product and brings about a texture that expresses wabi and sabi. Depending on the firing situation at different times, the same "Zansetsu" products show different expressions with the crystals produced. The smooth texture of the products fits comfortably in the user's hand, and the simple shape harmonizes with any scene. In recent years, we have received an increasing number of orders and inquiries from abroad. We hope that Seiryugama's products will make you think of the snowy landscape in faraway Yamagata and have a relaxing time in your daily life.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

The four seasons in Yamagata Prefecture are distinct, and each season has its own appeal. Their intrinsic beauty overlaps with what many of us draw in our mind as the archetype of nature. In this land of abundant culinary culture where one can appreciate the transient passage of the seasons, we are working to convey the charm of Yamagata through pottery. We strive to create the kind of pottery that helps people to discover the subtle beauty of nature in their everyday life that might be overlooked because it is so often taken for granted, and infuse life with the joy of eating. We also hope that our products blend into and enrich people's daily lifestyles.

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

In winter, the area around our studio is covered in stark white snow, and tranquility prevails.

We mainly produce tableware making full use of the characteristics of fine porcelain clay with a texture like powdered snow.

We are particularly keen on creating tableware with textured surfaces that distinguish themselves from other ordinary white dishes. These include a texture reminiscent of excavated ruins and antique-like muted color tone achieved by plating silver.

In addition to household use, our products are used in restaurants that offer dishes using local ingredients.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

In 1976, We, Noboru and Hiroko Jinbo, started to make pottery works in Kaminoyama city where a Japanese well-known poet Mokichi Saito was born. Our studio is located at the foot of Mt.Sankichi, in the east of Kaminoyama, and there are a lot of nature around our pottery studio. We painted some wildflowers and birds we can see around the studio using overglazed painting and underglazed iron painting. Then, our daughter Akiko Jinbo and her husband Yasunobu Wakabayashi started to work together, so there are four potters in this studio now. As each of us makes own works by using own pottery technique, for examples, Yasunobu uses "incrustation technique" called "zougan" in Japanese and persues black glazing, and Akiko mainly uses "deisai" in Japanese painting with colored mud on greenware. Styles of our works are different respectively, so you can see four styles of works at the gallery sited our studio.

◆ CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Our thought is 'modern crafts into our daily lives ' which is based on crafts movement occurred in 1970 in Japan. We think that using well-made things or beautiful things in daily life makes people comfortable. The goal we are aiming as a potter is to make works sincerely and to persue its quality. We'd like to express our efforts to be good potters into daily-use items such as cups, bowls, plates, vases, etc not into special art works.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

In 1902, Chuzaburo Hasegawa, founder of the Icho Chukosho foundry, and his successor Gasen Hasegawa established a studio specializing in the production and sale of temple bells, Buddhist statues, braziers, kettles, pots, and vases employing highly advanced yakigata metal casting techniques developed by Chuzaburo in the course of producing Kinkasan toro lanterns.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Gasen specializes in the production and sale of cast iron home accessories such as vases and incense burners as well as statues and monuments. While based on the 900-year-old art of Yamagata imono iron casting, the products also reflect the highly developed casting, finishing and coloring techniques newly introduced to the art by three generations of Gasen's master founders—Gasen, Yoshihisa, and Masaya—from places including Sado and Italy. The products' beautiful forms not only make them fitting reminders of the country's position as a terminal of the ancient Silk Road, but are also highly original artistic expressions. Furthermore, Gasen prides itself in its made-to-order services that employ the very same level of artistry to create one-of-a-kind pieces as requested by customers.

PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	φ165 × H300mm
WEIGHT	abt.3,000g
DOMESTIC RETAIL PRICE	JPY60,000 (excluding tax)

The beautiful, traditional blue-green hue of this vase is achieved by a finishing method that brings out the natural color of bronze. The resulting layers of greens, blues, and browns make for an impressive vase. The product name indicates that the model was presented to Emperor Shōwa. The vase shape makes it stable and ideal for branches and other long objects.

BRAND NAME	Gasen

PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	φ110×H225mm
WEIGHT	abt.1,400g
DOMESTIC RETAIL PRICE	JPY33,000 (excluding tax)

The beautiful, traditional blue-green hue of this vase is achieved by a finishing method that brings out the natural color of bronze. The resulting layers of greens, blues, and browns make for an impressive vase. Its relatively thick bottom makes this vase very stable and much less likely to topple over when displaying top-heavy materials. The wide mouth makes arranging flowers easier, while the narrow neck makes for easy lifting and carrying.

DOMESTIC RETAIL PRICE	JPY33,000 (excluding tax)

The beautiful, traditional blue-green hue of this vase is achieved by a finishing method that brings out the natural color of bronze. The resulting layers of greens, blues, and browns make for an impressive vase. Bamboo is an auspicious symbol of family prosperity because of the plant's ability to take firm root and spread. The nodes are associated with landmark life events, which makes bamboo a popular motif for gifts exchanged on such occasions.

PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	φ82 × H85mm
WEIGHT	abt.370g
DOMESTIC RETAIL PRICE	JPY15,000 (excluding tax)

This cast bronze single stem vase is made in Yamagata, in a color inspired by La France pear, a specialty fruit of Yamagata. The color of this vase deepens over time, much like the color of ripening fruit. The color is achieved not by painting but by employing an environmentally friendly, time-honored method of bringing out the natural color of metal. For this reason, no two pieces are exactly identical, which is a unique asset of this product. It offers endless possibilities for arranging wild flowers, cut flowers, and dried flowers for adding color to everyday living. The modest size makes it ideal for casual arrangements.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

We have been a family-owned maker of cast-iron products since 1735, when the first family head Kiroku started business producing tetsubin (cast-iron kettles). The sixth-generation family head Tokutaro, who was highly skilled at lost-wax casting, exhibited distinguished examples of tetsubin and chagama (tea ceremony kettles) at World Expos held in Paris, Belgium, and the United States, winning awards and accolades. The eighth-generation head pursued nihonga (traditional Japanese painting) alongside his career as a maker of cast-iron utensils. He achieved nationwide fame by applying his artistic gift to the surface decorations of chagama, executed employing a technique called hera-oshi. Demand for cast-iron cookware rose sharply after World War 2, making the thriving cast-iron industry of Domachi a major contributor to the economy of Yamagata City. The art of the tea ceremony also grew in popularity, driving the demand for chagama nationwide. The present Seikodo Company Limited was established as a maker specializing in chagama in response to this demand. The ninth- and tenth-generation family heads in charge of the company today maintain production as chagama specialists, and at the same time also produce nearly 100 types of tetsubin in response to the growing demand in China, especially from the 1990s onward.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

We produce tea ceremony kettles and cast-iron kettles that are both functional and beautiful, employing casting techniques passed down through many generations. To constantly maintain high quality, our products are 100% handmade by a select team of artisans.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Chushin Kobo studio was established in 1997 for the purpose of manufacturing and selling products designed by myself, Hisanori Masuda. The studio proposes to incorporate the traditional beauty of castings that has been passed down for centuries in Japan into today's lifestyle. I studied at Musashino Art University under Professor Mosuke Yoshitake and worked as an assistant to Professor Yoshitake after graduation. Over this period of time, I learned about the important role of design from him. I then moved to Yamagata Prefecture and over the next 20 years learned the traditional techniques for making kettles used in the tea ceremony ("chagama" in Japanese) from artisans at the site. Based on the teachings from Professor Yoshitake and these artisans, I established my own brand, blending traditional techniques with my own design to pursue the potential of Yamagata Imono (Iron Casting).

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

To pass on traditional crafts handed down in the region to the next generation, it is important to manufacture items that are useful in today's life. Lifestyles are constantly changing with the times so it is necessary to preserve and develop the inherited techniques and pass them on to the next generation in response to these changes. Traditional crafts are not conservative and maintain innovative elements in any period. New attempts will lead to the succession of traditional techniques. Nine-hundred and fifty years ago, it was found that the sand from the Mamigasaki River beach and the clay in the area near Chitose Park are suitable for making molds, which became the starting point for Yamagata Iron Casting. Domachi town is the birthplace of Yamagata Iron Casting. It is not only an industry but also an important regional culture. Preserving the landscape of the town will lead to preserving Yamagata Iron Casting.

BRAND NAME	Chushin Kobo
PRODUCT NAME	HS-314S / Tea kettle S
GENERIC NAME	Iron kettle
MATERIALS	Cast iron, Wood
PERSON IN CHARGE	Chushin Kobo
PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	175x160x160mm / 1.1L
WEIGHT	1,200g
DOMESTIC RETAIL PRICE	JPY30,000 (excluding tax)

The product is designed to value usability and moderate the iron cast's image of hardness by using wood in the handle and knob. The bottom is shaped flat to increase thermal conductivity, and secures the appropriate base area to use with electromagnetic cookers. For finishing, it is biscuit-fired at 800 degrees Celsius to cover with oxide film to prevent rusting. Then, a baking finish with Japanese lacquer is applied to the oxide film-covered surface. When boiling water with an iron kettle finished in this manner, the water will become smooth, less smelly and taste good. As iron is leached into the boiled water, simply drinking water boiled in the teapot will provide the necessary daily amount. The handle and knob are replaceable.

This item is a "kobako (incense box)" that features two uses: storing incense and smelling incense. The cast iron lid uses a technique called "haochi" which has been handed down in making kettles for the tea ceremony. As the mountain shapes are created by striking with a hammer one by one, they are all uniquely shaped. This way of shaping represents the Japanese aesthetic sense of letting things flow naturally.

This kobako can be used both as an incense storage box and an incense holder. Take off the lid, take out a stick of incense and place it on the holder. After smelling the incense, put the lid on the box, which doubles as a storage box. You can use the incense holder part alone by sliding the lid. In the center of the wooden lid, the symbols from Chapters 41-43 of the 54 Chapters of Genji-ko, the incense ceremony based on the Tale of Genji—"Maboroshi," "Nioumiya (Imperial Prince who loves incense)" and "Kobai"—are carved. The texture of the casting utilizing the "sunahada" technique expresses the traditional beauty of Japan and harmonizes with the walnut lid.

The iron teapot has a special feature, it maintains its warm heat so it takes a long time to become cold. Therefore it's easy to make warm delicious tea. I use a traditional sandy technique for the surface of the iron teapot and designed the shape of it to be like a tea jar that is used in traditional tea ceremonies. I use enamel on the inside to prevent rust. The spout is handmade to be especially thin so that it is easy to control the pouring and the usage of it.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Chobundo, which was established in 1952, has been manufacturing iron kettles exclusively for 68 years. Choroku Hasegawa, the first generation, had a longing for iron kettle-making that ultimately made him a full-fledged caster, and dreamed of having his own studio to manufacture products. Around 1945, he became a factory manager at the workshop where he received training and accumulated experience and polished his skills. His dream of "making iron kettles loved by users for a long time" at his own studio was eventually realized. Several years later, however, he fell ill and died. It was at the time when he had just begun to practice long-cherished iron kettle making. Fumio Hasegawa, the second generation, who grew up seeing his father making efforts to fulfill his dream, established a studio named Chobundo, inheriting his father's will. The trade name of Chobundo was formed by taking one Chinese character each from Choroku and Fumio. Saying for generations to "Resolutely become a full-fledged iron kettle maker," and having belief in and passion for "making high-quality iron kettles that are loved by users for a long time," we have been earnestly working on making such products. Currently, Mitsuaki Hasegawa, the third generation maker, is endeavoring to polish his skills, inheriting the will of his predecessors.

❖ CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Yamagata Imono (Iron Casting) has been developed with high technical prowess and handed down in Yamagata, which boasts rich nature, for about 900 years. Yamagata Imono is evaluated as "usuniku-birei," which means thin-wall casting and the beauty of the cast surface. Chobundo's iron kettles have inherited such high quality. They are light and easy to use and good at stopping hot water from dripping. In addition, they have a beautiful casting surface and a well balanced shape. Manufacturing that combines usability with beauty has been inherited from predecessors. Moreover, hoping that our products will be used by customers regularly for a long time, I always endeavor to polish my casting techniques and increase product quality with the aim of manufacturing better products. One example is the traditional technique for the final finish called "urushi yakitsuke chakusyoku" (coloring with a baked Japanese lacquer finish). This technique requires proficient skill and sense, and with this finish, a deep gloss is generated with use. Chobundo's iron kettles, which are of high-quality and can be used for a long time, will allow you to use them as "tools to grow," and you will find yourself developing a profound attachment to them. This is one of the appeals of Chobundo's iron kettles.

PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	W18cm x D14.5cm x H23.5cm/ 1.5L
WEIGHT	1.4kg
DOMESTIC RETAIL PRICE	JPY65,000 (excluding tax)

This iron kettle, named "Natsume," was designed by the founder of the studio and has been loved by users for more than 60 years. The lightness of the product is realized by adhering to thin-wall casting. This plain iron kettle highlights the beauty of the casting surface. In addition, the product is not a commonly used "hiramaru (round and flat)" type iron kettle and is long vertically. These features allow the product to fit any scene or situation. As the spout is also made manually for each piece, the product pours well, and hot water dripping is easily controlled. Thus, the product is easy to use for everyone. It can be used with any heat source, including an IH cooking heater.

This is an iron kettle with a beautiful "arare" dot pattern. As the casting mold is used only once and not reused, the detailed dot pattern is beautifully finished. The knob has a pine cone shape, and a bamboo leaf is subtly added to the arare dot pattern. This design brings about a calm atmosphere. As iron kettles manufactured in our studio are all colored with Japanese lacquer, the surface of the products becomes more glossy the more you use them, and you can enjoy their deeper charm with the passage of time. It can be used with any heat source, including an IH cooking heater.

This iron kettle employs the pattern of pomegranate, which carries the meaning of "prosperity of descendants." As the casting mold is used only once and not reused, the pomegranate flower and the bee that gravitates toward it are expressed perfectly. The lacquer coloring finish makes the product more glossy with use, which generates the deep charm characteristic of Japanese lacquer. The lid is large, and it is easy to pour water into the kettle. In addition, the product offers sufficient capacity and can be used when serving tea to guests. It can be used with any heat source, including an IH cooking heater.

The body of this iron kettle is garnished with items that are said to be auspicious throughout Japan. The knob is shaped like a mallet of good luck known as "uchide-no-kozuchi," and just looking at this kettle brings about a feeling of pleasure and delight. The kettle has a 2.4 liter capacity, but is lighter than other companies' products of the same size because it is made using the thin-wall casting technique. With a finish consisting of Japanese lacquer coloring, the surface of the product becomes more glossy the more you use it, and each of the patterns stands out. You can use the product for a long time, and you will find yourself becoming attached to it. It can be used with any heat source, including an IH cooking heater.

This product expresses the scene of a summit under the clouds with a flash of lightning. According to ancient tradition, "we will have a good harvest in the year with lots of thunder," and the lightning is also considered to be an auspicious event. The product was designed by the founder of the studio and has been loved by users even now. Although it is a small kettle, it is colored with Japanese lacquer, so the surface of the product becomes more glossy the more you use it, which generates deeper charm. The inside of the product is also colored with Japanese lacquer, rather than being enameled.

This teapot uses a Japanese old tale called "Bunbuku Chagama" as a motif. In the story, a raccoon dog turned itself into a teakettle. The raccoon dog's adorable expression and the detailed arare dot patterns are expressed delicately because the casting mold is made each time without reusing it. In addition, like iron kettles, the product is finished with Japanese lacquer coloring, and therefore, the surface of the product becomes more glossy the more you use it, which generates deep charm. The inside of the product is colored with Japanese lacquer, rather than being enameled. With this lovely teapot, you can enjoy a high-quality relaxing time.

DOMESTIC RETAIL PRICE	JPY108,000 (excluding tax)

Decorated on the body with a plum design, this product is identical in shape to the enduringly popular Natsume (jujube fruit) iron kettle designed by the founder of the studio. The plum is regarded as a joyous harbinger of spring because the tree is among the first to blossom after enduring the harshness of winter. Each plum motif is individually hand-pressed. The kettle has a distinctive vermillion copper lid that brings refinement to the piece and makes it perfect also as a gift. The lacquered surface ages well, gaining deeper gloss over years of use. Can be used on all heat sources including induction.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Fourteen years after leaving his company and founding Otoduki Shouten, the president, at the age of 54, suffered a cerebral hemorrhage and became paralyzed on his left side. His eldest daughter Chieko Otoduki, the current management director, succeeded the family business while taking care of her father. With no employees at the time to support her, she managed to keep the business going by remembering how her parents were doing business while she was still a student and going over the company's daybooks and ledgers. Then, after nine years of working alone, she launched a factory in Takanosu, Kita-Akita City in Akita Prefecture, where she was joined by a team of staff. The following year, she established a hand-stitching studio Sozodo in Yokote City in Akita Prefecture and ran both machine and hand-stitching studios. Currently, with another machine stitching studio in front of the main shop in Yonezawa City, the company is "giving shape" to all kinds of fabrics.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

With the motto of "producing Japanese clothes by Japanese artisans" such as clothes associated with Japanese culture, we have succeeded in creating everything related to traditional Japanese costumes but for tabi (socks for kimonos). Now we have become a company that can "give shape to fabrics" in all sorts of ways, including; ① Manufacturing and sales of our own brand of kimono coats; ② Collaboration with a kimono magazine (Nanao published by PRESIDENT Inc.); ③ Giving shape to designers' ideas; and ④ Contract manufacturing of other companies' products. Since we are a kimono coat manufacturer, our strength is being able to sew any materials, be it silk, cotton, polyester, wool, cashmere, velvet, or other. There is no other place where such variety of fabrics can be handled by the same workers within one factory. Our business also go beyond just creating new products. We also rework old kimonos that are not fit for wearing today but have been passed down for generations, by adding a modern touch. When the coronavirus pandemic hindered our regular business, we considered what we could do here in Yonezawa, and came up with the idea of creating face veils. We are confident that we were able to do this because we are a company that can give shape to fabrics. Our business is built on the idea of "if there is someone in need, there must be something that we can do for them." I am determined to play a role in handing down Japanese culture going forward.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

In the early Showa period (1926-1989), Yamagata was hit hard by cold weather. The situation was so serious that some were forced to sell their children for a living. Witnessing this dire situation, the founder, Junnosuke Watanabe became convinced that the region needed a place for women to work, and established Nippon Jutan Seizosho (Japan Carpet Manufacturing) in 1934. In the following year, he invited seven technical experts from China to provide technical training on carpet manufacturing to his Japanese employees.

The training was met with numerous challenges. Because the Chinese crafts persons could not speak Japanese, it is said they used gestures such as pulling on their ears and hair to give cues to the trainees. The year 1936 saw a new factory built and new trainees invited. However, the Pacific War broke out in 1941, and carpet manufacturing was forced to a halt as the factory was required to undertake war production. Employees also had no choice but to return to their respective family business.

After the war ended, in June 1946, Junnosuke established the current Oriental Carpet Mills, Ltd. and resumed business. That being said, there was no wool in the market at the time, so he devised a way to weave kudzu roots instead and delivered carpets to the GHQ.

◆ CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Our company started from directly introducing carpet making techniques from China, which entailed undertaking all the manufacturing processes in-house. This resulted in the formation of our integrated production system, in which the manufacturing processes such as spinning, dyeing, weaving, and after-sales care, are all done in-house. Every facet of carpet production is carefully handled by the same crafts person.

Had it not been for the impact of the novel coronavirus pandemic, we would usually welcome 2000 visitors in and outside of Yamagata every year to tour our workshop, which is also an important contributor to tourism.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

We are the exclusive weavers of Shirataka-tsumugi kimono fabric since 1880, across six generations. Shirataka is a location known for the raising of silkworms and other aspects of silk production since the mid-Edo period (from 1603 to 1868), when the local feudal lord Uesugi Yozan (the ninth lord of Uesugi domain, Dewa Province) promoted the industry to boost the local economy. Shirataka-tsumugi originated as a fabric woven from rejected cocoons. Today the firm primarily manufactures and markets yarn-dyed woven textiles Oitama-tsumugi (a traditional craft certified by the Ministry of Economy, Trade and Industry), and Honba-yoneryu-shirataka-itajime-kogasuri (registered as an Intangible Cultural Property of Yamagata Prefecture). Our kasuri woven fabrics are known as the country's northernmost kasuri, because of our location. We are the only weavers of the type of kasuri known as itajime-kasuri. Our flagship product Shirataka Omeshi® is rated highly by kimono industry professionals and kimono aficionados for its fine patterns and distinctive texture, referred to as onishiwa.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The kimono is an outfit traditional to Japan. In an increasingly diverse world where fresh value is often invested in things that have existed since long ago, we believe in creating an environment conducive to preserving the tradition of kimono for posterity. Working from Shirataka, a peaceful location surrounded by a nature-rich environment, we preserve and employ centuries-old techniques while incorporating today's technologies to add new value to our products so that traditions can survive to be passed down to successive generations. We also work to showcase Japanese woven textiles to international audiences. A new project is our new brand Akari, which involves developing products that add fresh value to kimono fabric through combinations with a wide range of other materials.

EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Yonezawa-ori is a range of woven textiles unique to Yonezawa that has a long history. It is popularly believed that the craft originated after Naoe Kanetsugu (1560–1620), chief retainer to Uesugi Kagekatsu (the second head of the Uesugi clan and first lord of Yonezawa domain) introduced ramie—a raw material for fabric—as a fiber crop. Ramie production and weaving evolved into the production of woven silk fabric after the ninth lord of the Yonezawa domain, Uesugi Yozan, encouraged silk farming and turned Yonezawa into one of the country's major producers during the mid-Edo period (1603 to 1868). Although no longer Yonezawa's core industry, Yonezawa-ori is still produced locally as a textile with an appeal like no other. Saiei Textile was founded 97 years ago, in 1923. As the third-generation successor to this business, I am hoping to create and widely showcase innovative and unique products capable of responding to current needs while demonstrating timeless craftsmanship, looking ahead to the company's 100th anniversary and beyond.

CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Our major products today include benibana (safflower), ai (indigo) and other plant-dyed kimono and obi (belts worn with kimonos). Fabric for these garments and accessories are woven on our trustworthy wooden power loom—built more than 50 years ago and still in perfect working order—because wooden looms weave silk into fabric that is exceptionally comfortable to wear. Aside from kimono and obi, we design and explore materials for neckties, scarves, handbags, clothing and other Western-style wardrobe accessories, hoping to expand the application of fabrics traditionally used for kimono. We are also keen to internationally showcase Yonezawa's woven textiles. Another activity close to our heart is training the future practitioners of this craft. We are certified by the Association for the Promotion of Traditional Craft Industries, and currently host four trainees.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Long after the first generation of the Nitta family had followed their feudal lord Kagekatsu Uesugi and relocated from Echigo to Yonezawa, the 16th head of the family, Tomejiro Nitta, became the founder of the Nitta weaving shop in 1884. After winning many awards at various fairs, the name “Nitta” became synonymous with the hakama skirting fabric of Yonezawa.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The second head of the family, Kumao Nitta, developed new products such as robakama, or hakama made with silk gauze. The third generation, represented by Shuji and his wife Tomiko, had a fateful encounter with benibana (safflower) in 1963. Fascinated by benibana, which was called a visionary flower, from that time on they devoted themselves to improving their dyeing technique and achieving colors that met their high standards. The fourth head of the family, Hideyuki, was very particular about product quality standards. He promoted integrated production, handling both the dyeing and weaving processes in-house. Thanks to the Nitta family's persistent efforts and research, and achievable only through the repeated-dyeing technique, Nitta fabrics now come in hundred's of unique shades and hues. The fifth-generation Gentaro, the current head of the family, has inherited this spirit and strives to pursue manufacturing that fits in with the times. The region of Yonezawa, Yamagata Prefecture, has allowed us to inherit the weaving business up until now. Therefore, we will continue to be grateful to the region and make contribution to it. While observing tradition, we will take on new challenges and attempt to develop a market abroad.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Yonezawa is blessed with abundant resources. Fruits, Yonezawa beef, nature, fabrics, spas, technologies, and people, to name a few. Nitorito is a factory brand of Yonezawa-ori fabric launched with the hope of delivering the beauty of Yonezawa-ori to many people as a garment of choice. Currently, garment labels are required to indicate the name of the country where products are finally sewn. As such, even if the fabrics were made in Yonezawa, once they are finished overseas, they cannot bear "Made in Japan" labelling. Believing that this is one reason why Yonezawa fabric has yet to enjoy wide recognition, we decided to make products in our own factory by ourselves inspired by the region's landscape. We believe that this is the best way to convey the appeal of Yonezawa fabric, and grow the number of people who become interested in the fabric, which in turn will help to maintain and pass down this wonderful weaving technique tradition to the next generation. It would be a great pleasure if people in Japan and around the world would become interested in Yonezawa through nitorito and search for Yonezawa on the internet to discover numerous other resources that we offer.

◆ CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Hello! We are nitorito.

The name "nitorito" comes from the phrase "Knit to ori to (Knit and textiles)." We coined this word hoping it would evoke the image of knit products and fabrics in the minds of people and invite those who are not familiar with these textiles to enjoy them.

Our products are made entirely in Yonezawa, from production of raw materials and textile design to manufacturing. Our textiles are considerably inspired by Yonezawa's rich nature, history and culture.

We take pride in "Made in YONEZAWA" products. We delve into the art of weaving as we commit ourselves to deliver Yonezawa's appeal, which goes well beyond the mountains. We would surely be delighted if we can make people happy by delivering the blessings of Yonezawa.

At the sight of skilled artisans patiently throwing a shuttle back and forth as they weave a textile, you are able to feel the dignity of their experienced hands. It is indeed painstaking work, but the stole you see is the result of that hard work. An excellent dot reversible stole that you can enjoy in two different colors depending on your mood. Using regenerated fiber cupra, it is thin and lightweight and soft to the touch. Perfect for all seasons, keeping you warm and comfortable. Undoubtedly a staple piece for a quick trip outside with chic colors that can be used regardless of gender. I hope you will try it on and enjoy its smooth feeling.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Makoto Ishida founded Shinaori Sogei Ishida in 1990 to preserve shina fabric for future generations, believing that the fabric represented a true national legacy. Ishida's momentous first encounter with shina fabric, woven in his home prefecture Yamagata, actually happened in Tokyo when he was aged 20. Although finding the fabric curiously compelling, Ishida learned that the future of shina fabric was not looking very bright despite its superior material properties—production was in danger of dying out due to lack of practitioners, and applications were limited to souvenirs and folk knick-knacks. Ishida eventually produced hats capitalizing on the superior breathability of the fabric; and handbags likewise capitalizing on the fabric's light weight and durability after studying the possibility of nationally and internationally promoting this fabric by offering high-quality products that made full use of its superior material properties. He tirelessly studied and paid close attention to style as well, developing and creating extremely stylish fashion items with contemporary sophistication as well as traditional beauty. These products, marrying an ancient fabric with contemporary design sensibility, gradually found their way to department stores and specialist stores in major Japanese cities, leading to greater appreciation of and interest in shina fabric.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Shina fabric, woven from the bark fibers of linden trees (*tilia maximowicziana* and *tilia Japonica*) is one of the country's oldest woven textiles. Production from stripping the bark to weaving takes almost a whole year, and all stages are performed manually. Because of its labor-intensiveness, production has died out in all but three hamlets bordering Yamagata and Niigata Prefectures. These mountainous, snow-locked communities survived harsh natural conditions by cooperating with community members to earn their living, to which shina fabric was vitally important—more so than food or housing. There was even a saying that "How many bolts of fabric village women can weave determines how many villagers can survive." Mountain hamlet living was dependent on the blessings of nature, and based on seasonal cycles. Fundamental to locals was the idea that everything needed for living was a gift from the forests and mountains, and that humans were but a small part of nature. This way of thinking was basic also to the coexistence with nature that characterized traditional Japanese lifestyles. Shina fabric, Japan's oldest woven textile, is a perfect embodiment of life in harmony with the natural conditions presented by Japan's mountainous locations, and we delight in our mission of producing products that offer this fabric in contemporary designs.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Through years of painstaking hand labor, what was once a bare piece of land has become a garden overflowing with flowers and trees. This has of course required much time and effort, but spent in the company of these beautiful plants and flowers, it has been a time of great pleasure. Recently, we have seen increasing efforts to make our living environments greener, and more young people are embracing an organic way of life. However, many of us are used to uniformity and predictability in our daily lives, and the transitory nature of color and form can be an unfamiliar concept. At Kameya, we do not only work to convey the concept of transitory beauty to those who visit our shop, but we also utilize our products, social networking efforts, and special events to provide the outside world with a view of the garden where we grow the plants for our natural plant dyes, in addition to the traditional way in which we go about our dyeing. We do this in the hopes that it will encourage people to move beyond their comfort with uniformity in color and form, and will help them to welcome and explore the unpredictable and transitory beauty of our natural environment and the world we inhabit.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

We carry out our own soil preparation, use old nails and burn camellia leaves to hand-prepare our dye fixative, and use our organically grown benibana (safflower), Japanese indigo, Japanese madder and other plants to make the natural plant dyes that we use to dye washi paper and silk produced in Yamagata and the cocoons of silkworms that we raise ourselves. We use no chemical dyes, and return all the waste products and wastewater from our dyeing to the earth as part of our effort to shoulder environmental responsibility. We take the customers who purchase our products to our organic garden to introduce them to the plants which we use to make our plant dyes, and to show that just as the colors of these plants change with the seasons, the dyes which color our paper and silk also reflect the diverse beauty of every season, with so much pleasure to be found in the transitory nature of color and form. Since the days of old, red benibana dye has been believed to have the power to ward off evil, and we have presented Jionji Temple in Sagae city with our benibana-dyed kimono sashes, ones we dyed with children from the local community, to be used at the temple's traditional Japanese dance performances, and we have produced benibana-dyed paper petals made from local Gassan washi paper which are scattered in the traditional "sange" flower-scattering ceremony performed at Heisenji Temple in Yamagata city.

GENERIC NAME	Scarf
MATERIALS	Material 100% silk
PERSON IN CHARGE	Kameya – Natural Plant Dye Studio
PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	Size Approximately 80 cm x 150 cm
WEIGHT	Weight Approximately 35g
DOMESTIC RETAIL PRICE	14,500 yen (excluding tax)

This soft scarf, made from silk produced in Yamagata prefecture, is dyed with organically grown plant dyes from our own garden. It may be used as a long scarf, folded in two to emphasize the contrasting colors of each half, worn as a shawl with the ends tied together, or even used as part of a kimono ensemble. This scarf can be worn throughout the year, providing warmth during the winter months while shielding the skin from the sun's rays and the effects of air conditioning during summer. The ends of the scarf are not machine sewn, but rather finished using traditional kimono sewing techniques to facilitate re-dyeing, which we will carry out upon request.

- 100% natural plant dye (no chemical or animal-derived dyes)
- May be dry cleaned or gently hand washed using a diluted neutral detergent
- Store away from direct sunlight and humidity
- Each item is handmade, with natural variations in color. Due to the nature of natural plant dyes, the colors may change or fade over time.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Kamiya Sakuzaemon was founded in 2017 to preserve the tradition of washi (Japanese paper) for future generations. Our workshop is located in Nishikawa-machi, a rural location surrounded by the Three Mountains of Dewa (Mt. Gassan, Mt. Yudono and the Asahi mountain range) and which receives Yamagata prefecture's greatest amount of snowfall in winter. The rich natural surroundings allow us to live and work in harmony with the natural world. Gassan washi is a type of handmade traditional Japanese paper with a history of nearly 400 years. Its production and use has been closely associated with traditions of mountain worship in the Three Mountains of Dewa area. Kamiya Sakuzaemon produces handmade washi, employing and preserving centuries-old methods. I trained in papermaking in Kyoto and relocated to Yamagata after hearing from papermaking artisan Mr. Miura that the making of Gassan washi was about to die out because of the absence of successors.

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Handmade washi production involves numerous processes, each requiring loving care and attention, which we believe makes each and every sheet special. Although today washi is used less and less in our everyday lives, we look forward to preserving the rich tradition of handmade washi while creating both paper and paper products capable of complementing today's lifestyles.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Shirataka dolls, which are made using Miyama-washi (traditional Japanese paper) were created in 1983. At the founding of our study group, 18 members were making Shirataka dolls. Although currently only two members are engaged in doll making, the techniques that were uniquely devised after the group was established have been handed down until now. We, the fourth generation, make products that inherit the will of the founder. You can view samples of almost all products, excluding small articles, at the studio. We sell products based on a made-to-order system and make each product in a careful meticulous manner.

* Regarding large-sized products, we have small stocks for people who wish to buy them on the same day.

◆ CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Shirataka dolls are made using Miyama-washi paper, which is an intangible cultural asset of Yamagata Prefecture. The paper has been handmade using mulberry paper ("kozo" in Japanese) as a raw material for more than 400 years. The process of wetting the paper with water and crumpling it repeatedly to induce shrinkage generates a texture called "shibo." "Shibo" expresses warmth that is unique to Shirataka dolls. In addition to "shibo," all parts of the dolls, from the core to small articles, are completely handmade. Shirataka dolls, all parts of which are manufactured by hand, convey their tenderness and warmth to all who see and touch them.

* "Shibo" means the unevenness of crepe (kimono cloth).

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

It was one of the greatest wishes of the late Akira Ichiya to establish a studio in his hometown of Obanazawa, Yamagata Prefecture, and continue his work in his late years there and teach his glass-working technique.

Many considered the idea of setting up a studio by Lake Tokurako as reckless since the area was still a wilderness hinterland.

He undoubtedly was also motivated by the fact that the art of glass working was gradually beginning to be acknowledged in the Tohoku region at the time and wanted it to take root in Yamagata Prefecture.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

I believe ginsai glass (glass with silver overglaze) brings out the beauty of what's served with it (be it food, beverages or flowers), and vice versa.

Neither opaque nor clear, the translucency of the silver makes the food and beverages appear crisp and tasty, and the colors of the food and beverages enhance the luster of the silver.

I endeavor to express the silver snow that falls on Ginza Onsen by gentle and tender shapes and expressions that cannot be achieved through the use of molds.

Product information

BRAND NAME	Yokisai Glass
PRODUCT NAME	Zou [Okina]
GENERIC NAME	Flower vase
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Akira Ichiya
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	22cm x 14cm x 29cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY500,000 (excluding tax)

A piece that embodies the late Akira Ichiya's hallmark technique. In this work, gold-color yokisai appears—a kiln effect achieved by firing glass and silver foil in the kiln. In his late years, Ichiya worked on religious motifs, and this is a piece from the "Okina" series, a collection of mystical and stately pieces of glasswork adorned in yokisai, which is a deeper color than that of gold foil.

BRAND NAME	Ginsai Glass [Shirogane]
PRODUCT NAME	Ginsai Glass [Shirogane] Chuhai
GENERIC NAME	Chuhai (Rock glass)
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	abt.9.5cm x 9.5cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY10,000 (excluding tax)

A lowball glass from the ginsai glass "Shirogane" series, made by layering a silver foil between pieces of glass. The wavy glass surface obscures the refraction of light, the color of the beverage and its contrast with the silver foil, making the beverage look refreshingly cool.

BRAND NAME	Ginsai Glass [Shirogane]
PRODUCT NAME	Ginsai Glass [Shirogane] Guinomi
GENERIC NAME	Guinomi (Sake glass)
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	Φ abt.6 - 8cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY10,000 (excluding tax)

A sake cup from the ginsai glass "Shirogane" series made by layering silver foil between pieces of glass. The wavy glass surface obscures the refraction of light, the color of the beverage and its contrast with the silver foil, making the beverage look refreshingly cool.

I make them in various sizes based on my intuition rather than determining a certain size or thickness.

Product information

BRAND NAME	Ginsai Glass [Shirogane]
PRODUCT NAME	Ginsai Glass [Shirogane] Kahai Fruits port
GENERIC NAME	Kahai (Fruits port)
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	Φabt.11cm x H9 cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY12,000 (excluding tax)

A cocktail glass from the ginsai glass "Shirogane" series made by layering silver foil between pieces of glass. The wavy glass surface obscures the refraction of light, the colors of the fruits and their contrast with the silver foil, making the fruits look refreshingly cool. Makes cherries, Yamagata Prefecture's specialty, appetizing and beautiful when served.

BRAND NAME	Ginsai Glass [Shirogane]
PRODUCT NAME	40-27 Ginsai Glass [Shirogane]
GENERIC NAME	Nagazara (dish)
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	35cm x 22cm x 5cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY100,000 (excluding tax)

An irregular-shaped plate from the ginsai glass "Shirogane" series, made by layering silver foil between pieces of glass. The wavy glass surface induces the refraction of light, which together with the contrast between the food color and the silver foil makes food look refreshingly cool. No. 40-27 features a green lip wrapped around the edge of the rim. Within this Shirogane series, the nuance created by the twisted underglazed silver and kiln effect are more manifest in plates than in glasses.

BRAND NAME	Ginsai Glass [Saryu]
PRODUCT NAME	35-13 Ginsai Glass [Saryu] Asabachi
GENERIC NAME	Asabachi (pot)
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	20cm x 6.5cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY60,000 (excluding tax)

A shallow bowl from the ginsai glass "Saryu" series, made by layering silver foil between pieces of glass. In this series, the silver foil is placed nearer to the surface, and oxidization is reduced with the help of glass sand. This allows the surface color to turn gold after being fired in the kiln, resulting in a color similar to that of yokisai. No. 35-13 features a cobalt lip wrapped around the rim. The expressions created by the twisted underglazed silver and the transparent glow of the clear glass on the inside create an eye-pleasing texture.

◆ Product information

BRAND NAME	Ginsai Glass [Hotaruyuki]
PRODUCT NAME	Ginsai glass [Hotaruyuki] Flower vase
GENERIC NAME	Flower vase
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	17cm x 21cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY80,000 (excluding tax)

A flower vase from the ginsai glass "Hotaruyuki" series, made by layering silver foil between pieces of glass. By placing a coal-black glass piece under the silver foil, the scattered silver spots on the underglaze silvers look as if they are floating. The subtle kiln effect rising up from the base adds a mystical atmosphere to this piece. The work expresses the snow, dimly lit like fireflies, falling on the Tohoku region, Obanazawa, and Ginza Onsen.

BRAND NAME	Ginsai glass [Kofu]
PRODUCT NAME	30-22 Ginsai glass [Kofu] Large pot
GENERIC NAME	Oobachi (Large pot)
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	39cm x 35cm x 12cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY190,000 (excluding tax)

A large bowl from the ginsai glass "Kofu" series, made by layering silver foil between pieces of glass. The refraction of light created by the wavy surface and the shadow of the plate on the cloth underneath create an otherworldly atmosphere to this artwork. Pale green glass is used instead of clear glass. The piece is an expression of Lake Tokurako in Obanazawa, where the studio is located, and the wind blowing in the area.

BRAND NAME	Ginsai glass [Shirogane]
PRODUCT NAME	22-3 Ginsai glass [Shirogane] Flower vase
GENERIC NAME	Flower vase
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	11cm x 16cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY40,000 (excluding tax)

A flower vase from the ginsai glass "Shirogane" series, made by layering silver foil between pieces of glass. The wavy glass surface obscures the refraction of light, the colors of the stem and flower petals, and their contrast with the underglazed silver, making the flowers look refreshingly cool.

Product information

BRAND NAME	Ginsai Glass
PRODUCT NAME	Zou [Kaikou]
GENERIC NAME	Object
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Akira Ichiya
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	20cm x 73cm
WEIGHT	
DOMESTIC RETAIL PRICE	JPY1,500,000 (excluding tax)

A piece that embodies the late Akira Ichiya's hallmark technique. An object made up of three parts, created by layering silver foil between pieces of glass (ginsai). In his late years, Ichiya worked on religious motifs. This is a tall artistic glasswork in a black shade with an air of stateliness and a distinctively Japanese atmosphere. The title, kaiko (encounter), is believed to be themed on an encounter with the gods, or reincarnation.

BRAND NAME	Ginsai glass [Ayanagi]

GENERIC NAME	Flower vase
MATERIALS	Glass, Silver foil
PERSON IN CHARGE	Naohito Ito
PRODUCTION AREA	Obanazawa Yamagata Japan
SIZE	
WEIGHT	
DOMESTIC RETAIL PRICE	JPY25,000 (excluding tax)

A flower vase from the ginsai glass "Ayanagi" series, made by blowing a glass mass with silver foil. An advanced version of the technique used in the Saryu series is employed here, in which numerous pigments are added before applying underglazed silver. Silver foil is placed nearer to the surface and oxidization is reduced with the help of glass sand. The glass turns to a gold color, similar to yokisai, after it is fired in the kiln. The pigment flow adds to the dimension of the underglazed silver.

EPISODE OF FOUNDATION FOUNDER'S THOUGHT

At the root of my work is the sense of nostalgia I felt when I first saw the work of the artist who became my glass-etching master. I was living in Tokyo working in sales when I saw the grapevine design work which moved me deeply and reminded me of my hometown Yamagata, even though the artist was based in Tokyo. I felt a common, universal thread running through the artistic style of this work, and the aspects of Yamagata that I find special. After training under this artist, I opened my own studio hoping to communicate the warm feeling I felt that day through my work.

CRAFTMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Although glass is normally thought of as a "cold" substance, my work is driven by the desire to communicate the friendliness, warmth and occasional harshness of Yamagata through this medium. My Nariyasu sake vessel series is named after Nariyasu in Yamagata, where my studio is located. "Nariyasu" literally means, "to be peaceful," which is exactly how I wish users of this product to be.

The four seasons etched in glass show the beauty of Yamagata mirrored in the seasons.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

After studying at Tohoku University of Art and Design and pursuing other careers, Kazue Ashino joined Otsuki, a maker of butsudans (household Buddhist altars), one of the traditional crafts for which Yamagata is known. She began producing wood sculpture in styles traditional to Yamagata butsudans for the firm in March 2008 after receiving the go-ahead by the company president.

Her Kibori range of brooches were first made in 2015, when her company entered the Yamagata Excellent Design competition with works Ashino produced in partnership with a member of Yamagata Mirai no Takumi-kai, a group of younger artisans working to preserve Yamagata City's traditional crafts. Although the entry did not win a prize, her company was designated as an incentive company and offered a place in a product development and marketing course run by Yamagata Research Institute of Technology in 2016, which led to the brooches being developed as products. The brooches were publicly unveiled in November 2016 at the IFFT Interior Lifestyle Living exhibit held at Tokyo Big Sight. They were selected for the Yamagata Excellent Design Award in 2017, and received a commendation at the 2018 Wood Design Award. Her new series, Kissho, is the outcome of further training at the Yamagata Research Institute of Technology. It was unveiled at the 2018 IFFT Interior Lifestyle Living exhibition.

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

As a Yamagata butsudans sculptor, Ashino's work centers on producing sculptures for Yamagata butsudans, as well as re-varnishing, repairing, and cleaning butsudans. While butsudans sculptures are produced for butsudans manufacturers, producing the Kibori brooches has given her the chance to communicate directly with private customers. She looks forward to using such interactions to promote Yamagata butsudans and raise its status as a nationally-designated traditional craft, a fact that is not yet widely known even in Yamagata.

BRAND NAME	kibori brooch
PRODUCT NAME	kibori brooch kumo 1
GENERIC NAME	Brooch
MATERIALS	Shinanoki (Japanese Linden), Urethane, Pin, Screws, Epoxy Adhesives
PERSON IN CHARGE	Kazue ASHINO
PRODUCTION AREA	Yamagata Yamagata Japan
SIZE	Gift box(82×56×27mm)
WEIGHT	abt.3g
DOMESTIC RETAIL PRICE	JPY6,600 (excluding tax)

Cloud motifs commonly appear in ranma and many other butsudan parts, and are often combined with other motifs such as the dragon, phoenix, and crane. Kumo 1 is very time-consuming to produce. Each Kibori brooch is made from 8 mm-thick linden wood. After drawing and cutting out the design with a fretsaw, the piece is hand-sculpted using only knives, and without using sandpaper. The sculpted brooch is then surface-finished with urethane resin to strengthen the wood and protect it against dirt. The brooch pin is attached with epoxy adhesive and then screwed on.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

After the passing of the founder, I succeeded his name. To cope with various changes in the architecture industry that have taken place over the past 75 years, I have presented products to the National Joinery Exhibition since 2003, where I won top prizes for four consecutive years. Prompted by this feat, I registered the trademark "Kumikokagu (kumiko furniture)." The first class architect office established 15 years ago has contributed significantly to my furniture making in terms of design and securing structural strength.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The development and launch of a new product is the pleasure that I share with my customers, and I consider it as the essence of monozukuri based on traditional Japanese culture, a source of comfort, and the succession of traditional techniques. In the current world where online shopping and social network services are rife, it is my earnest wish to become connected with people in Japan and around the world to become a business that promotes friendship, economic growth, peaceful society and cultural communication. In 2019, I exhibited "Mona Risa" in the Japan Wood Design Exhibition and won a prize. In 2020, my product received a Good Skill mark (as products that promote wooden joinery craft) from the Central Skills Promotion Center, which is awarded to those with skills that contribute to the development of vocational ability in Japan. I am committed to making kumiko joineries and living ware of exceptional quality.

A sister product in the "Symbol" series of kumikokagu. A tatami mat was added to the seat of the original design to give it more of a Japanese touch. The piece fits naturally into the lifestyle in this ageing society, where people are increasingly opting for chairs rather than sitting on the floor to cope with leg weakness. A sister product of the piece that won a Japan Wood Design Award in 2019, in which you can immerse yourself in the exceptional craftsmanship of traditional Japanese kumiko craftwork.

A renewed model produced to commemorate the 10th anniversary of the birth of kumikokagu. While maintaining the original structure passed down from the founder, I succeeded in reducing the weight to 60%. At the same time, the delicate feature of the kumiko craftwork is enhanced by boldly downsizing each frame, which previously measured 20 mm x 30 mm, to 9 mm x 20 mm, with proven sturdiness. I have thus succeeded in creating a kumiko pattern with dimensions close to those of artistic kumiko joineries that generally measure 2 mm x 10 mm. Suitable for hotels, Japanese-style inns, stores, and at home.

It is fair to say that among kumiko techniques, this honnejigumi (fixed like a woven basket), featuring no unevenness, is the most difficult and thus the most valuable skill of all. Since ancient times, the auspicious omen patterns (kissho-monyo) have symbolized a prayer for happiness. The checkerboard pattern is incorporated in this tray using cypress (confer) and beech (broad leaf tree) with a beautiful and sturdy finish. I proudly recommend this piece to connoisseurs who are looking for more than an off-the-shelf product. This will serve as a decoration on the wall or as a tray to serve sophisticated Edo cut glasses or champagne glasses to add a bit of sparkle when entertaining guests.

A work that won a prize at the National Joinery Exhibition. A screen with an image of Mt. Zao in Yamagata Prefecture measuring 2.0 m x 3.6 m (comprising four panels), on which as many as 120,000 kumiko leaves are fixed to form traditional patterns passed down from ancient times. It took one year to complete this masterpiece, from designing, preparing a full-scale drawing, carving, polishing, and finishing, and was exhibited at the annual National Joinery Exhibition. Produced manually with almost no machine processing, this is undoubtedly one of my greatest works that vied for mastery with the works of other distinguished crafts persons from all over Japan.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Located in Tendo City, Yamagata Prefecture, a leading producer of pieces for shogi (Japanese chess), this company largely produced kazari-goma (ornaments shaped like oversized shogi pieces and sold as gifts and souvenirs). The business was established to mass-produce kazari-goma using NC wood routers instead of by hand-carving. The business of producing and finishing kazari-goma as well as plinths and other accessories for displaying them proved highly successful and profitable, but demand started to drop around 1992, when Yamagata Prefecture hosted a Japanese Sports Festival nicknamed Benibana Kokutai. Fortunately however, the company was able to further improve its NC woodworking, assembly, and wood finishing techniques by fulfilling orders for furniture component production, assembly, and wood finishing services from local furniture manufacturers, Tendo Mokko and Asahi Sofu.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The 2008 financial crisis prompted the company to develop its original products because the crisis drove home how a negative business impact can affect sub-contractors and sub-sub-contractors many times worse than the parent. To keep the business going, the company took the necessary step of developing new original products, and with the advice of Yamagata Research Institute of Technology, developed the Moshimo Clock and the "mokuhen" series. It also developed the Yin Yang Tray, Hidariuma NEO, and other products as part of Yamagata Prefecture's pilot scheme. Each product has its unique theme, but the products are invariably designed to convey the good feeling and warmth of wood. The greatest assets of natural wood products are their colors, grain patterns, and the fact that no two are exactly the same. Kazari-goma production has a history of roughly 200 years. The art has led to our present work and calling. Our goal is to offer services and produce goods with an enduring appeal that makes them impervious to shifts in fashion. We look forward to serving future generations by building a robust business that stays resistant to negative impacts of shifting trends, which we believe will also serve to invigorate the local economy.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Sasano ittobori woodcarving is a craft traditionally used to produce toys. It has been practiced for over a dozen centuries, mainly by the farming population of Sasano district, Yonezawa City, Yamagata Prefecture. Many innovations and improvements have been made to the artform throughout its long history. Wood from the koshiabura tree (*Eleuthero coccus calophyllolides*) is the preferred material, which is carved with a large knife referred to as a sarukiri. The carved product is painted with rich colors. Because it has mainly been an off-season occupation for farmers, few people if any throughout the history of Sasano ittobori have been known to make a living solely out of it. Kanpu Toda, however, who is a sixth-generation ittobori carver, quit his family farming operation and opened a studio dedicated to the production and sale of Sasano ittobori products with the aim of making this unique artform known to more people. The studio, currently run by Kanpu and seventh-generation successor Kentaro Toda, has also been producing woven grapevine products for about 25 years.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Sasano ittobori carving has a long history, and we produce a range of products in hope of making this artform known to greater numbers of people. Our basic policy is to avoid making the woodcarvings overly detailed, which we feel takes away from the intrinsic charm of Sasano ittobori. When designing new products, we make many attempts until we reach the right balance of detail and simplicity.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Since the company's establishment in the early 1900s, we have consistently offered products with timeless, handcrafted warmth produced in-house using imported rattan. Made by combining select, high-quality materials and Japanese attention to detail, our Japan-made rattan furniture items are durable and do not go out of fashion, yet their classic designs also have a modernity that complement any decor. Awards to date include the Good Design Award (ami kago, 2006; ami isu, 2012); the Yamagata Excellent Design Selection Award (two-tier laundry basket, 1999; Armchair, 2003; ami series, 2006; Rattan Hanger, 2014; hairu series, 2017; nejiro, 2019).

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

We are increasingly collaborating with industrial designers to develop design-conscious products capable of competing against lower-priced imports. A leading example is our unstained, unvarnished range of modern designs, which is rated highly by customers for its timeless appeal. This line successfully communicate and enhance our brand's unique strength in the employment of quality materials and craftsmanship. We also engage in activities to pass down traditional Japanese handicraft skills to younger people, such as by hosting rattan stool-making classes at the industrial design department of Tohoku University of Art and Design. We started working with this local university about ten years ago, when its graduates joined our company.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Since 1912, our company has been in the business of producing traditional Japanese furniture and traditional Yonezawa tansu (a type of chest of drawers, an example of which was on display at the World Expo Osaka 1970 craft pavilion entrance). As Yonezawa's sole surviving Yonezawa tansu maker, the company received recognition from the local government in 2006 for its contribution to the preservation of traditional craft skills. Yonezawa tansu production began over 400 years ago as a winter job for builders. Made from zelkova, chestnut, and other solid woods, the chests are finished with lacquer and embellished with hand-forged hardware often featuring decorative motifs such as cherry blossoms and butterflies, which make them both practical and decorative. Yonezawa tansu are recognized as one of the country's traditional crafts. It is also believed to be the origin of chest-making traditions in other parts of the country, such as Sendai tansu and Iwate's Iwayado tansu. One of the decorative motifs that often feature in Yonezawa tansu hardware is the swallowtail butterfly. This motif closely resembles the family crest of the Taira clan, a prominent 12th century military and political power. Yanazawa, a remote district of Yonezawa, is recorded to have harbored Taira clan members lost in battle. Therefore, it is believed that this design was originally commissioned by these clan members, and it later became widely used for Yonezawa tansu hardware.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Made from high-quality wood

The wood used for the production of our Yonezawa tansu is air-dried for at least five years, some for over fifteen years. Exposing wood to the elements rids it of sap and other moisture, preventing it from warping after it is made into products. We buy our wood as logs, which after being processed into lumber are stacked into piles. Stack upon stack can be seen outside our workshop. Thorough seasoning alone does not guarantee a warp-free, beautiful finish, however. Vitally important for achieving a quality product is the selection of good wood, and the successful processing of wood into lumber. We choose a type of elm known as yamanire, typically over 400 years old and preferably from a remote, rocky terrain, where harsh environmental conditions has made the wood strong.

Made with attention to detail

Our Yonezawa tansu are made carefully with great attention to detail, so that we can preserve for posterity this unique legacy inherited from our predecessors. We also maintain quality standards so as to meet the expectations of our customers, who have used Yonezawa tansu for many generations.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Located in Kaneyama Town, Yamagata Prefecture, our business specializes in the production of wood products made from Kaneyama sugi wood, a local specialty. My grandfather was a joiner, and my father worked in forestry, so woodworking was very familiar to me from early on. The family business was originally furniture retail, with my mother and older sister in charge of purchasing. After graduating from technical college, I worked on a dredging ship, then joined the family business when my sister got married. For a while I continued selling ready-made furniture, but after producing picture frames from Kaneyama sugi wood, a material unique to this location, I began producing all sorts of wooden products from beds to doors. One day the unwanted offcuts piled up in the workshop caught my eye. Their cut ends looked very attractive and too good to be thrown away. Trying to think of a good use for them, I finally completed a table by assembling the offcuts in a way that made a feature of their cross sections, which was my very first work of this kind. The table, which was prompted by my reluctance to waste wood, turned out to be a wonderful product. It was rich in character, gentle to the touch, and amply expressed the warmth of wood. This led to the current range of products including coasters, plates, and dishes. Produced by assembling cut ends, our original Kaneyama sugi cut-end parquetry plates are unparalleled in that they embody our "waste not" ethos, and convey the passion of their makers.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Kaneyama Town is in the northwestern part of Yamagata Prefecture. It is noted for its heavy snowfall and above all, its Kaneyama sugi trees, many over 100 years old. The scenic beauty created by the sugi forests has served as a model for landscape and townscape enhancement programs across the country. The local government very enthusiastically encourages scenic preservation and enhancement in this nature-rich town, resulting in multiple awards for well-preserved townscapes. Local landmarks include the Kaneyama model of a residential house, which employs white plastered walls for their capacity to age beautifully, and stone-built irrigation canals (referred to as ozeki) where nishikigoi carp are released. Kaneyama sugi trees were first planted in the Edo period (1603 to 1867) and over time became well-established and known nationwide. The town's fine sugi forests are among the largest and most spectacular in the country. Century-old Kaneyama sugi trees are characterized by their tight rings, fine grain, and uniquely gentle sugi fragrance—a result of growing slowly in a climate with long winters. As a highly committed member of the local community, our firm extensively uses Kaneyama sugi wood—the treasure of this town—to create wood products. Sometimes new product ideas come from consultations and conversations we have with local customers as well as holiday visitors. Conversations offer numerous new discoveries, which is why we value face-to-face dialogue and interactions. It is not unusual for us to receive custom furniture orders from the local government. We place great importance on using wood with minimum waste because Kaneyama sugi is a precious legacy resource developed by and inherited from the previous generations. Our quest for ways of reusing offcuts led to combining them to form one-of-a-kind patterns with endless variations. We want to offer an alternative to today's "throwaway culture" by making the most of any material. This desire led to the perfection of our richly varied wood products that have proved unique in the world. The zero-waste mindset, appreciation of and reluctance to waste the things we have, and gratefulness toward customers who delight in using our products motivate our work, day in and day out.

◆ Product information

Made from Kaneyama sugi (cryptomeria Japonica) wood over 100 years old

The cut ends of wood are often not visible in finished products, but these products make a feature of the cross sections to highlight the expressiveness and rich variation of wood. Each product is handmade and one of a kind. The use of natural wood makes each product unique, and never exactly identical to the samples shown in the photographs.

Finished with Kigatame Ace wood sealer

Kigatame Ace is suitable for wood products, especially tableware and utensils. It protects wood from moisture, bacteria, and insects, and mitigates discoloration and aging of wood. Kigatame Ace is a unique, non-toxic, food-safe wood sealer highly resistant to yellowing, water, and abrasion.

Care instructions for all products

1) Before each use, moisten the product with cold water both inside and out. 2) After each use, wash with dishwashing liquid and cold water. Never use hot water, even to remove oils. 3) Do not leave the product soaked in water. 4) Any warping will correct itself by standing the product on its edge until both sides are dry.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Yamagata Koubou has been manufacturing official Kendamas for over 40 years.

Our policy in making Kendamas is to make professional Kendamas with the eyes and hands of skilled Japanese craftsmen. As our Kendamas are used in the official competitions, we are maintaining high quality and accuracy in each Kendama in order for the players to perform a variety of tricks in these competitions. We have officially designated as a certified Kendama factory and accredited as the No.1 manufacturer in Japan by the Japan Kendama Association. The founder Yosaburo Suzuki established the company policy "Nature's bounty, The beauty of wooden works, Fusion of traditional and modern technique". It represents our attitude to make the most of the beauty of woods with thanking the blessings of great nature, and utilize modern advanced technologies to make products meeting the needs of our times. We continue doing our best in Kendama manufacturing so that this wonderful Japanese traditional culture will spread further.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The place names in Nagai come from the place where water gathers. Being embraced by the rich mountain ranges of Asahi and Iide, the clear streams of Mogamigawa River, OkitamaShirakawa River and OkitamaNogawa River flow through the town while providing beautiful scattered villages. During the Edo Period, the place prospered as a merchant town with transportation on the Mogamigawa River and the cultural exchange with Kyoto and vicinity contributed to the atmosphere that loves art and culture. And flowers that show pretty expressions different in each season. The 1200-year-old "Kubo Cherry Tree of Isazawa" and "Daimyojin Cherry Tree of Kusaoka" are seen in spring, the pure "white azalea" blooms in early summer, and 1 million "Iris" of 500 kinds tell the beginning of summer. The start of making woodworks at Yamagata Koubou was when the founder Yosaburo Suzuki, who had been in charge of managing mountains for many years, was fascinated by the beauty of locally produced wood, and thought to utilize abundant water and timber resources to start a business contributing his hometown. We thereafter have been doing the business to this day with being supported by the culture and the climate unique to Nagai City, Yamagata Prefecture.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Through our full process of planning and design to production and sales, we make implements for daily life using wood from Japan (primarily from broadleaf trees originating in Yamagata Prefecture).

We also “cook up” (design) excess materials so they do not go to waste. From large tables to small chopstick rests, each item is handmade with love and care.

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

moco is a word coined by combining "mo" and "eco".

We offer products made with only the best Japanese wood and craftsmanship.

The "mo" in moco stands for the Mogami region, mori (forest), Mogami River, mokko (woodworking), and mottainai (a principal of avoiding waste). The logo is designed to represent the Mogami River when viewed from “above”, as well as a mountain scene when viewed from the “side”. We “cook up” (design) entire trees from leaves to roots for our products so that nothing goes to waste. We use materials without wasting them to create everything from large dining tables to chopstick rests.

This Japanese wooden plate (rectangular wooden plate, or KIZARA) is not only functional, but also transforms your dining table into a fun space. Two plates together can be used as a platter, or place two plates separately to make a uniquely shaped plate. The 45 degree chamfer on the bottom side makes it easy to hold with one hand. This simple design makes the plate seem to float. As shown in the photo, it pairs well with both Western and Japanese styles, such as coffee with sweets, or Japanese tea and sweet bean jelly, or karinto. It is also useful for serving rice balls (Japanese style) or sandwiches (Western style). You can also use it to enjoy cheese or prosciutto. Serve supermarket sushi on this plate to transform it into high quality sushi.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Kato Mokko is a fourth-generation family-run woodworking business specializing in sashimono--joinery for assembling wood without metal nails or screws--for making Sakata funa-dansu (ship chests), a traditional craft item of Sakata City, Yamagata Prefecture. Sakata funa-dansu chests of drawers were widely used between the mid-18th and late 19th centuries aboard Kitamaebune merchant ships mostly serving ports on the west coast of Japan. As one of the country's three major producers of funa-dansu along with Mikuni (Fukui Prefecture) and Ogi (Sado, Niigata Prefecture), Sakata attracted great numbers of skilled artisans. Demand for Sakata funa-dansu declined with the demise of the Kitamaebune shipping route, however, and today, with most homes furnished in Western-styles, demand for Sakata funa-dansu as a utilitarian piece of furniture is all but gone, although it is admired for its workmanship and decorative value. With the loss of demand, Sakata lost its funa-dansu makers, leaving Kato Mokko as its only surviving maker continuously engaged in funa-dansu production.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Alongside preserving and continuing traditional production techniques so that Sakata funa-dansu can be enjoyed by generations to come, Kato Mokko is focusing much effort on developing products incorporating technical innovations complementary to today's lifestyles. A Sakata funa-dansu typically has a substantial, hardwearing exterior of zelkova, iron hardware, and lacquer coating. In contrast, its interior drawers are made of paulownia for superior airtightness--funa-dansu could be recovered from sunken ships because of their buoyancy, according to anecdotes. For exterior wood, we use zelkova harvested in Shonai, Yamagata Prefecture, thereby contributing to sustainability of the local forest industry. We also encourage local manufacturing by studying traditional iron hardware engraving and lacquerwork techniques that have lost practitioners and supporting younger people to acquire such skills.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

We have continued to do business as a manufacturer specializing in shogi (Japanese chess) pieces for four generations. At the time of our founding, we manufactured cheap popular products. Presently, however, we manufacture a wide variety of products ranging from a set of pieces for beginners to high-end pieces called "moriagegoma" that are used in title matches, etc.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

We devote ourselves to manufacturing shogi pieces with the utmost care so that users of our products can play shogi comfortably. We conduct all processes in-house, from purchasing logs as raw materials to drying them and making shogi pieces.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Our founder (present chairman) was a medical representative at a major pharmaceutical company. He chose to start a business in his hometown so that he could contribute to the local economy by creating year-round employment uninterrupted by the long, snowy winters of Yamagata. Our current president makes it a point to personally work at pop-up sales events (held at department stores and typically focusing on regional specialties, these events are held almost on a monthly basis somewhere in the country) because he finds it extremely enjoyable to meet and serve customers who buy the products we have designed and created. These events also provide opportunities for us to receive feedback directly from customers, even leading to new models inspired by customer ideas, which are internally referred to by the respective customer's names. Since the start of the company, manual production has characterized our products, which are designed, produced, sold, and repaired in-house. Each product is carefully handmade by artisans recruited locally. Rather than just any wallet, the company strives to offer products that users can feel increasingly attached to over time. Luego is a Spanish parting word similar to "see you later." We hope customers will appreciate the superior finish of our products, their soft feel, and handsome beauty.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The craftspeople who make LUEGO products often say that they can repair anything that they make. This is because LUEGO leather wallets and accessories are designed by the artisans themselves. Selling a product to a customer is not the end, but the start of a long, shared journey. Whenever a new product is developed, the prototypes go through a lengthy, painstaking process of trial and testing. LUEGO products require many processes of burnishing, which is a method of edge finishing, using dyes and grounds that need to be adjusted to ambient temperatures and humidity levels. Under some seasonal conditions, it is not unusual for edge treatment alone to take several days. Artisans adjust the pressure of their fingers according to the moisture content of the leather as perceived by how the leather feels on their fingertips. All steps of production except the sewing is performed manually, allowing delicate adjustments to take place as a matter of course in response to subtle changes in the leather. Typically, products arriving for repairs are scrutinized like long-lost children being reunited with their "parents," who might marvel at the excellent condition of a ten-year-old product, for instance, or admire the sheen of well-used leather.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

The studio started as a privately owned woodturning business established in 1946 and located in Oemachi Aterazawa, Nishimurayama-gun, Yamagata Prefecture. Its flagship product, the peach stone tea caddy, was launched in 1960. The novel concept of using peach stone as a craft material made the product topical, and has kept it in production past its 60th anniversary in 2020. In 1974, Noriyasu started to study under Teisaku, the founder of this business, and expanded the peach stone craft range to include trays, tea saucers, candy bowls and other items. In 2006, Keita, the successor to Noriyasu, started studying as Noriyasu's apprentice. Japan's Tohoku region, especially Yamagata, is among the country's leading producers of fruit, including peaches. Peach stones are very hard and hard-wearing. They can be polished to a gemstone-like beautiful gloss, which deepens with age and handling. Their material beauty caught the eye of Teisaku, the founder of this business, who investigated their potentiality as a craft material for many years until he perfected peach stone craft, the highly original art of manually cutting, assembling, and then carefully polishing peach stones. They are used to create products that fascinate people, who often wonder what they are made of. The products have a comforting handmade warmth about them, and improve with age and use. We are confident that users will find our products highly satisfying.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

1. Peach stone craft is the country's only range of craft items made from peach stones for the appreciation of the beauty of natural shapes.
2. The use of natural materials is of prime importance to this studio, which explores combinations of locally produced peach stone and natural wood, producing products that highlight the material beauty of peach stone and zelkova wood.
3. Our products are produced and sold as officially certified Oe Brand products.
4. Our products are environmentally friendly because they are made from peach stones from peach canning plants, which would otherwise become industrial waste.
5. For greater perfection and accuracy, products are made from materials washed and allowed to dry for seven to eight years.
6. All stages of production take place in-house at this studio.
7. Some of our products are available as Yamagata Prefecture's Furusato Nozei (Hometown Tax) gifts.
8. We were awarded Yamagata's prefectural award for excellent craft skills.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Lisen is a metalwork studio that produces tableware, decorative objects, jewelry, and other products made of aluminum. Lisen's proprietary technique for dyeing metal with natural dyes achieves products that can't be found elsewhere else. The use of aluminum, which is lightweight and easy to handle, enables us to offer a wide range of household objects suitable for everyday use. Their beauty and technical uniqueness have made our products available at department stores and boutiques throughout Japan.

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

The products made by Lisen seek to bring the sensation of being surrounded by nature into the home. They aim to capture the brief moments of ever-changing nature—light, wind, water, and time—for displays that add color to everyday living. Our studio is located between the Asahi mountain range and one of its foothill villages, where nature's blessings are abundant. Each product is made with the utmost care and attention so as to successfully embody and express the inspiration we receive from the changing seasons, and the countless stars adorning the night sky. Aluminum products are easier to incorporate into everyday living because they require less maintenance than many other metals. We hope customers will find their own unique styles of enjoying our household products, which embody nature's vitality in their highly original shapes and exquisite colors.

◆EPISODE OF FOUNDATION FOUNDER'S THOUGHT

My parents' home was also originally a textile manufacturing facility in Yonezawa. I, as the third generation, began manufacturing umou futon (down quilts) using Yonezawa-ori woven fabric. The down quilts made of Yonezawa-ori silk fabric on which yuzen-style patterns are printed manually were much appreciated by customers at that time, and I had great success with the quilts. In my home city of Yonezawa, there is a mineral ore with excellent effects. So, looking ahead to the next generation, we collaborated with the Faculty of Engineering, Yamagata University, to conduct detailed research on this ore. From the research results, it was found that the ore emits a large amount of far-infrared rays and also features other excellent effects. In addition, the ore had always been highly evaluated as a good-quality ore, and we came to know that it is very effective for health. We therefore developed healthy bedclothes by kneading the specially processed ore into fibers. Bedclothes that use this fiber improve blood circulation and increase body heat and immune strength. These bedclothes are currently well-received in Japan, and we would like to sell them throughout the world in the future.

◆CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Yonezawa City, Yamagata Prefecture, where our company is located, has links to many feudal lords and samurai who earned their place in history, such as the Date family and the Uesugi family. In and after the Edo period in particular, Yonezawa flourished as the castle town of the Uesugi family. Yozan Uesugi, the ninth head of the Yonezawa Domain, who is famous for his words "Where there is a will, there is a way," established Yonezawa-ori woven fabric, which made Yonezawa a nationally famous location for the textile industry. Borne from Yonezawa-ori, our company carefully selected materials and developed original healthy products that other companies cannot copy in the spirit of "Love and Righteousness" of Uesugi samurai, whom my predecessor adored. All our employees strive to provide products that satisfy customers using their excellent skills and rich experience.

This product adopts the Air Lock Down Structure (ALDS) to prevent down from going too far to one side. A special valve is attached to the hole from which down is blown into the quilt so that the down will not move too far to one side even after using the quilt for a long time. As the gore is longer than in usual quilts, down is able to swell up uniformly. Moreover, as the natural ore is kneaded into the fabric, the product increases immune strength, retains heat and fits well to your body. So this product will keep you warm and enable you to sleep well even if you live in cold regions. Top-quality down, such as Hungarian, Polish and Canadian are used for the filling.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

We are a bedding maker and wholesaler celebrating our 70th year of business this year. Our major businesses are OEM, where we manufacture and sell original brand bedding to around 30 major companies such as POLA and Panasonic. We also wholesale products to around 200 small-scale retailers nationwide. One of our important management philosophies is "coexistence and shared prosperity." We believe it is important that not only our company but our partner retailers that actually supply products to end-users are able to sell quality products with confidence and improve customer satisfaction. Most of our products undergo several processes, including measurement, tests, approval, and recommendations conducted by public entities and facilities comprising third-party organizations, before being sold. Such an uncompromising approach towards supplying quality products is our strength, which we believe has enabled us to garner customer trust and continue business for as long as 70 years. In recent years, we have worked to strengthen our product development capabilities to develop and manufacture high quality original products in an effort to become more than a wholesaler.

❖ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

Abe Sangyo is a maker of house shoes with a focus on comfort. We differentiate our products from others by referring to them as “home shoes” rather than slippers.

We are located in Kahoku, Yamagata Prefecture, a town well-known for the production of zori (traditional Japanese sandals) in the early 20th century, and the country’s largest producer of slippers from the latter 20th century onward.

Our business was founded in 1919 by Saikichi Abe, who opened Abe Saikichi Shoten, a dealer and producer of zori insoles. In 1967 his successor, also named Saikichi Abe, in response to changing lifestyles, diversified into the production of luxury slippers in original designs, targeting Tokyo department stores. After becoming the third-generation successor to the business in 1999, current company president Hirotoishi Abe embarked on the development of new original products while producing for other brands in order to shift the company away from its heavy reliance on department store wholesalers to areas where more growth was likely in the future. Some of the resulting products have been selected for the Good Design Award, Yamagata Excellent Design Award, and other accolades.

❖ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Each of our products is carefully handmade, including not just our zori sandals of past years, but our house shoes as well. A high level of dexterity and skill is required in making footwear, and we have always been an active employer of local women—including work-from-home grandmothers—who play an important role in the house shoe industry. In this sense, our industry may be described as truly local. Women make up about 90% of our current staff, and are vital for all aspects of our operation.

◆ EPISODE OF FOUNDATION FOUNDER'S THOUGHT

The origin of slipper production in Kahoku Town can be traced back to the thong sandals (zori) that farmers wove from rice straw, an abundant by-product of rice cultivation. Yamagata Prefecture was recorded as the country's largest producer of zori in 1941. Rapid post-WWII lifestyle changes, however, saw traditional footwear such as tabi, zori and geta being replaced by socks, slippers, sandals and shoes. Our company commenced slipper production as early as 1955, paving the way for Yamagata to become the country's top producer of slippers, and has since continuously maintained and improved on its technical excellence in slipper production.

◆ CRAFTSMAN'S THOUGHT, COMMITMENT RELATIONSHIP WITH THE COMMUNITY

Our company president, aged 97, is at the center of production at our tiny factory, which produces slippers with prime importance on comfort and durability. We apply dedicated craftsmanship and technical excellence developed over many years to produce products that meet today's needs, and look forward to offering slippers that will keep your feet cool in summer and warm in winter.

The safflower is the official prefecture flower of Yamagata Prefecture, as well as town flower of Kahoku Town. The plant has been widely cultivated locally since as far back as the Muromachi period (1338–1573). Between the Edo period (1603–1867) and the early Meiji era (1868–1912), the area thrived as a major hub on the Mogami River freight route, which left behind fine cultural legacies with direct cultural links to Osaka and Kyoto. This product is an expression of the rich history and heritage of Kahoku slippers. Available in a choice of khaki, red, and blue.
