The Color Compatibility Guide is a tool to help identify colors found on a production vehicle not represented as a color code on the Paint Identification Label. The data contained herein is presumed to be correct, based on the color documentation provided by the Chrysler Corporation, however we cannot assume any responsibility for error or change.

How To Use The Color Compatibility Guide

The guide is listed in alphabetical order by Model and by the Exterior three-digit "P" color code (ie. PBU). To locate the Exterior three-digit "P" code found on the Paint Identification Label, refer to the Chrysler Color Code Location diagram found on Page 3 of the Color Manual. After locating the correct Model and Exterior Color Code in the Color Compatibility Guide, go to the Accent Color Class column for the vehicle part. A color chip representation of each code is shown in the color chip sections of the Color Manual.

Note: Color chips may not be found in the Color Manual under the same category (Accent Color Class) as represented within the Color Compatibility Guide. Refer to all chip sections for a color chip representation.

For the latest color information please visit FormulaExpress® Color Formula Retrieval System online.

Le guide de compatibilité des couleurs est un outil visant à aider l'utilisateur à identifier les couleurs d'un véhicule de série non représentées sous forme de code de couleur sur l'étiquette d'identification de peinture. On présume que les renseignements contenus aux présentes sont corrects, selon la documentation sur les couleurs fournie par la Chrysler Corporation; toutefois, nous nous dégageons de toute responsabilité relative aux erreurs ou aux modifications.

Comment utiliser le guide de compatibilité des couleurs

Le guide est organisé en ordre alphabétique par modèle et par code « P » à trois caractères de couleur extérieure (par exemple, PBU). Pour localiser le code « P » à trois caractères de couleur extérieure sur l'étiquette d'identification de peinture, veuillez vous reporter au diagramme d'emplacement des codes de couleur de Chrysler, à la page 3 du guide des couleurs. Une fois le modèle et le code de couleur extérieure localisés dans le guide de compatibilité des couleurs, consultez la colonne des catégories de couleurs accents pour la pièce du véhicule concernée. Une pastille de couleur est montrée pour chacun des codes dans la section appropriée du guide des couleurs.

Remarque : Les pastilles de couleurs peuvent ne pas se trouver dans la même catégorie dans le guide des couleurs (catégorie de couleur accent) que dans le guide de compatibilité des couleurs. Veuillez vous reporter à toutes les sections comprenant des pastilles de couleurs pour une bonne représentation des pastilles.

Pour les renseignements les plus récents au sujet des couleurs, veuillez utiliser le système en ligne d'extraction des formules couleurs FormulaExpress^{MD}.

La Guía de compatibilidad de colores es una herramienta para ayudar a identificar los colores que se encuentran en un vehículo de producción que no están representados como un código de color en la Etiqueta de identificación de pintura. Se presume que los datos contenidos en la presente son correctos sobre la base de la documentación sobre colores proporcionada por Chrysler Corporation; sin embargo, no podemos asumir ninguna responsabilidad por errores o cambios.

Cómo usar la Guía de compatibilidad de colores

La guía está organizada en orden alfabético por modelo y por el número de código de color exterior de tres dígitos "P" (es decir, PBU). Para ubicar el número de código de color exterior de tres dígitos "P" que se encuentra en la Etiqueta de identificación de pintura, consulte el diagrama "Ubicación del código de color de Chrysler" que se encuentra en la página 3 del Manual de colores. Después de ubicar el Modelo y el Código del color exterior correctos en la Guía de compatibilidad de colores, diríjase a la columna "Clase del color de acento" para la parte del vehículo. Se muestra una representación en la muestra de color para cada código en las secciones de muestras de color del Manual de colores.

Nota: Es posible que las muestras de color no se encuentren en el Manual de colores bajo la misma categoría (Clase de color de acento) que se representan dentro de la Guía de compatibilidad de colores. Consulte todas las secciones de muestra para obtener la representación de la muestra de un color.

Para obtener la última información sobre colores, por favor visite el sistema de recuperación de fórmulas de colores FormulaExpress® en Internet.

The Color Compatibility Guide is a tool to help identify colors found on a production vehicle not represented as a color code on the Paint Identification Label. The data contained herein is presumed to be correct, based on the color documentation provided by the Ford Motor Company, however we cannot assume any responsibility for error or change.

How To Use The Color Compatibility Guide

The guide is listed in alphabetical order by Model and by the Exterior two-digit color code (ie. DX). To locate the Exterior two-digit color code found on the Paint Identification Label, refer to the Ford Color Code Location diagram found on Page 24 of the Color Manual. After locating the correct Model and Exterior Color Code in the Color Compatibility Guide, go to the Accent Color Class column for the vehicle part. A color chip representation of each code is shown in the color chip sections of the Color Manual.

Note: Color chips may not be found in the Color Manual under the same category (Accent Color Class) as represented within the Color Compatibility Guide. Refer to all chip sections for a color chip representation.

For the latest color information please visit FormulaExpress® Color Formula Retrieval System online.

Le guide de compatibilité des couleurs est un outil visant à aider l'utilisateur à identifier les couleurs d'un véhicule de série non représentées sous forme de code de couleur sur l'étiquette d'identification de peinture. On présume que les renseignements contenus aux présentes sont corrects, selon la documentation sur les couleurs fournie par la Ford Motor Company; toutefois, nous nous dégageons de toute responsabilité relative aux erreurs ou aux modifications.

Comment utiliser le guide de compatibilité des couleurs

Le guide est organisé en ordre alphabétique par modèle et par code à deux caractères de couleur extérieure (par exemple, DX). Pour localiser le code à deux caractères de couleur extérieure sur l'étiquette d'identification de peinture, veuillez vous reporter au diagramme d'emplacement des codes de couleur de Ford, à la page 24 du guide des couleurs. Une fois le modèle et le code de couleur extérieure localisés dans le guide de compatibilité des couleurs, consultez la colonne des catégories de couleurs accents pour la pièce du véhicule concernée. Une pastille de couleur est montrée pour chacun des codes dans la section appropriée du guide des couleurs.

Remarque : Les pastilles de couleurs peuvent ne pas se trouver dans la même catégorie dans le guide des couleurs (catégorie de couleur accent) que dans le guide de compatibilité des couleurs. Veuillez vous reporter à toutes les sections comprenant des pastilles de couleurs pour une bonne représentation des pastilles.

Pour les renseignements les plus récents au sujet des couleurs, veuillez utiliser le système en ligne d'extraction des formules couleurs FormulaExpress^{MD}.

La Guía de compatibilidad de colores es una herramienta para ayudar a identificar los colores que se encuentran en un vehículo de producción que no están representados como un código de color en la Etiqueta de identificación de pintura. Se presume que los datos contenidos en la presente son correctos sobre la base de la documentación sobre colores proporcionada por Ford Motor Company, sin embargo, no podemos asumir ninguna responsabilidad por errores o cambios.

Cómo usar la Guía de compatibilidad de colores

La guía está organizada en orden alfabético por modelo y por el número de código de color exterior de dos dígitos (es decir, DX). Para ubicar el número de código de color exterior de dos dígitos que se encuentra en la Etiqueta de identificación de pintura, consulte el diagrama "Ubicación del código de color de Ford" que se encuentra en la página 24 del Manual de colores. Después de ubicar el Modelo y el Código del color exterior correctos en la Guía de compatibilidad de colores, diríjase a la columna "Clase del color de acento" para la parte del vehículo. Se muestra una representación en la muestra de color para cada código en las secciones de muestras de color del Manual de colores.

Nota: Es posible que las muestras de color no se encuentren en el Manual de colores bajo la misma categoría (Clase de color de acento) que se representan dentro de la Guía de compatibilidad de colores. Consulte todas las secciones de muestra para obtener la representación de la muestra de un color.

Para obtener la última información sobre colores, por favor visite el sistema de recuperación de fórmulas de colores FormulaExpress® en Internet.

The Color Compatibility Guide is a tool to help identify colors found on a production vehicle not represented as a color code on the Paint Identification Label. The data contained herein is presumed to be correct, based on the color documentation provided by the General Motors Corporation, however we cannot assume any responsibility for error or change.

How To Use The Color Compatibility Guide

The guide is listed in alphabetical order by Model and by the Exterior "WA" number color code (ie. WA501 Q). To locate the Exterior WA number color code found on the Paint Identification Label, refer to the General Motors Color Code Location diagram found on page 58 of the Color Manual. After locating the correct Model and Exterior Color Code in the Color Compatibility Guide, go to the Accent Color Class column for the vehicle part. A color chip representation of each code is shown in the color chip sections of the Color Manual.

Note: Color chips may not be found in the Color Manual under the same category (Accent Color Class) as represented within the Color Compatibility Guide. Refer to all chip sections for a color chip representation.

For the latest color information please visit FormulaExpress® Color Formula Retrieval System online.

Le guide de compatibilité des couleurs est un outil visant à aider l'utilisateur à identifier les couleurs d'un véhicule de série non représentées sous forme de code de couleur sur l'étiquette d'identification de peinture. On présume que les renseignements contenus aux présentes sont corrects, selon la documentation sur les couleurs fournie par la General Motors Corporation; toutefois, nous nous dégageons de toute responsabilité relative aux erreurs ou aux modifications.

Comment utiliser le guide de compatibilité des couleurs

Le guide est organisé en ordre alphabétique par modèle et par code « WA » de couleur extérieure (par exemple, WA501 Q). Pour localiser le code WA de couleur extérieure sur l'étiquette d'identification de peinture, veuillez vous reporter au diagramme d'emplacement des codes de couleur de General Motors, aux page 58 du guide des couleurs. Une fois le modèle et le code de couleur extérieure localisés dans le guide de compatibilité des couleurs, consultez la colonne des catégories de couleurs accents pour la pièce du véhicule concernée. Une pastille de couleur est montrée pour chacun des codes dans la section appropriée du guide des couleurs.

Remarque : Les pastilles de couleurs peuvent ne pas se trouver dans la même catégorie dans le guide des couleurs (catégorie de couleur accent) que dans le guide de compatibilité des couleurs. Veuillez vous reporter à toutes les sections comprenant des pastilles de couleurs pour une bonne représentation des pastilles.

Pour les renseignements les plus récents au sujet des couleurs, veuillez utiliser le système en ligne d'extraction des formules couleurs FormulaExpress^{MD}.

La Guía de compatibilidad de colores es una herramienta para ayudar a identificar los colores que se encuentran en un vehículo de producción que no están representados como un código de color en la Etiqueta de identificación de pintura. Se presume que los datos contenidos en la presente son correctos sobre la base de la documentación sobre colores proporcionada por General Motors Corporation; sin embargo, no podemos asumir ninguna responsabilidad por errores o cambios.

Cómo usar la Guía de compatibilidad de colores

La guía está organizada en orden alfabético por modelo y por el número de código de color exterior "WA" (es decir, WA501 Q). Para ubicar el número de código de color exterior WA que se encuentra en la Etiqueta de identificación de pintura, consulte el diagrama "Ubicación del código de color de General Motors" que se encuentra en la página 58 del Manual de colores. Después de ubicar el Modelo y el Código del color exterior correcto en la Guía de compatibilidad de colores, diríjase a la columna "Clase del color de acento" para la parte del vehículo. Se muestra una representación en la muestra de color para cada código en las secciones de muestras de color del Manual de colores.

Nota: Es posible que las muestras de color no se encuentren en el Manual de colores bajo la misma categoría (Clase de color de acento) que se representan dentro de la Guía de compatibilidad de colores. Consulte todas las secciones de muestra para obtener la representación de la muestra de un color.

Para obtener la última información sobre colores, por favor visite el sistema de recuperación de fórmulas de colores FormulaExpress® en Internet.
