**Klinch-It
Time Saver
Tool**

Quick and easy to use. Klinch-it lowers your production cost and increases your production by speeding up one of the greatest time consuming operations. It eliminates the slow, old fashioned method of sewing springs to the web base. Instead the springs are permanently fastened with sturdy steel clips.

Easy to use instructions

Fill the magazine with 2 strips of fasteners, hold tool upright, place nozzle over spring, press down so that prongs of the fastener pierce the webbing, then squeeze lever and fastening is finished.

Refer to the diagrams for a description of (A), (B) and (C).

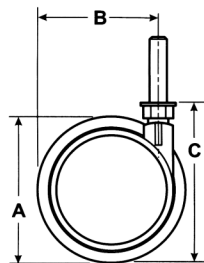

Available finishes are Antique Copper (Reddish Brown) or Bright Brass. Innovator is black only.

To determine the full load (lbs.) bearing capacity, multiply the dynamic load by the number of casters to be used on a piece of furniture.

Style Nova

We do not stock the caster shown at the top of the picture.

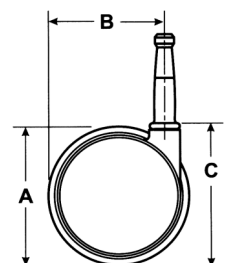

Nova – A Soft Tread Ball Caster

Designed for hard floor surfaces such as terrazzo, linoleum and hardwood. Oil-resistant rubber is permanently bonded to the wheel for quiet rolling. Unique design eliminates flutter, keeps out foreign matter.

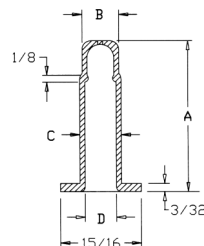

Style Satellite or Planet

We do not stock the caster shown at the top of the picture.

Satellite & Planet Metal Tread Ball Casters

The original Shepherd decorative ball caster that launched a new concept in caster design and endurance. Known for its durability and easy swivel action, it features a self-lubricating acetyl resin bearing. All moving parts are enclosed, with no exposed axle. These casters meet or exceed ANSI/FIFMA standards for seating.

Caster Socket

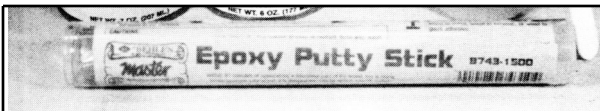

These self-lubricating Plastic Caster Sockets are a major advance over metal types. They absorb caster noise and won't squeak. They work equally well with ball-bearing stem or plain-stem casters. Sockets are vented to prevent collapse when driven into

Refinishing Supplies

Jet Spray Lacquer

Clear Lacquer Jet Spray

Especially formulated to enable the experienced as well as the novice to do a professional job. Two or three coats of the desired sheen will develop a durable, alcohol resistant lacquer finish. This product is economical, easily applied and dries quickly. The finish is alcohol resistant.

Item #	Finish
SPRAYCLRFLAT	Clear Flat B101 0802
SPRAYCLEAR	Clear Gloss B101 0800
SPRAYCLRSATIN	Clear Satin B101 0801

Jet Spray Sanding Sealer

One of the most versatile products used in furniture touch-up. It fills in and levels surface scratches, burn-in repairs, and will smooth "French padded" repairs. Fast drying, easy sanding, high solids for rapid build up. Seals in stains prior to final top coat of finish for faster build up.

Item #	
SPRAYSANDSEAL	B101 0803

Jet Spray Blush Eraser

If you work in a humid, damp, or cold climate you need Blush Eraser. Humid or cold weather can cause a finish to turn white or "blush". Blush Eraser re-flows the lacquer and allows the trapped moisture to escape without changing the existing sheen or shade of color. Blush Eraser eliminates the need to sand off or chemically strip the damaged finish.

Item #	
SPRAYBLUSERASER	B101 0871

Especially formulated to enable the experienced as well as the novice to do a professional job. Unfinished and finished wooden arms, legs, scuffed and rubbed through areas can be finished with ease by simply applying the desired shade. If a more durable lasting finish is required, follow up with an application of Sanding Sealer and complete with clear lacquer in the desired sheen (gloss, satin or flat). The product

is economical, easily applied and dries quickly.

Refinishing Supplies

Kutzit

For refinishing fine furniture and antiques, Kutzit is the professional refinisher's choice. It is excellent for horizontal surfaces, and its liquid formula cuts fast and penetrates carved detail. Kutzit is gentle on the patina of fine wood and veneers and will not raise wood grain. Surfaces can be cleaned with a scraper and washed with a cloth and paint thinner. Kutzit is flammable, and is recommended for use outdoors.

Save Money Save Time Provide A More Durable Seat Suspension
With Elasebelt Webbing

Provides the best seat

Compared to springs, coils or other webbing Elasebelt is simply the most comfortable seat.

Provides protection

Elasebelt's super-dense weave and polypropylene encapsulated latex protect against aging, ozone, and other environmental hazards

Provides "0" waste

Elasebelt eliminates expensive inventories of varying sizes of springs & if used correctly leaves "0" waste.

Provides fast, easy installation

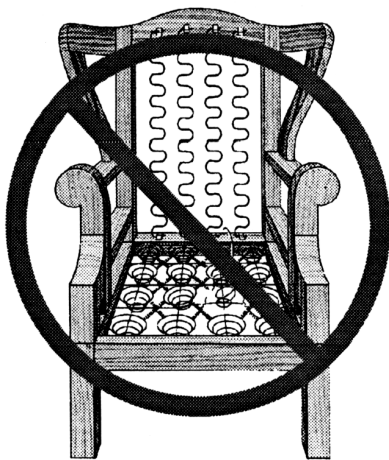

Elasebelt's one way webbing reduces production time.

Provides longest durability

Elasebelt does not sag or form a permanent set after repeated stretching up to 250,000 times.

Produces less stress on furniture frame

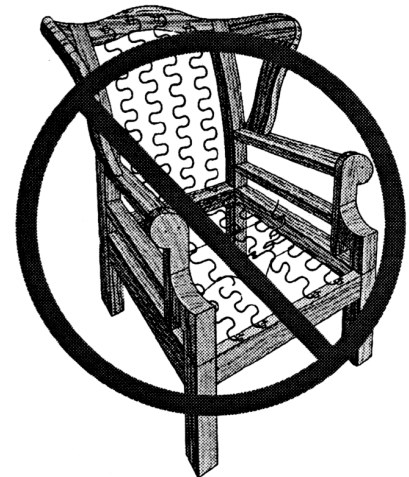

Elasebelt webbing pulls the frame inward, but when springs are compressed the springs system forces the frame outward. Elasebelt can increase the life span of the furniture frame.

Springs can break and squeak

Quality Seating Requires Quality Webbing

Quite simply Elasebelt webbing by INTES is the highest quality webbing in the world. It is tested to meet all GSA government standards. Elasebelt retains its elasticity long after other suspension systems have deteriorated. Independent laboratory tests prove Elasebelt webbing will not sag or form a permanent set after repeated stretching up to 250,000 times.

Sinuous wire can sag or break

Webbing Versus Springs

For generations the industry standard has been eight-way, hand tied springs for seating support. While springs still do the job, many furniture upholsterers and manufacturers have discovered the significant advantages offered by Elasebelt webbing by Intes. When you consider the following advantages, it may be time to take a closer look at your seating suspension:

Webbing is much stronger than springs with more than 300 pounds of tensile strength per two inch strap. Unlike springs, there is no twine holding it in place and therefore nothing to break.

Webbing will never squeak or rust like springs. Sooner or later, all springs are susceptible to squeaking and rusting.

Webbing requires a staple gun and shears. Springs require hooks, clips, tie wire, twine, slick fabric, specialty tools and expensive labor.

Six Steps To Success With Webbing

1. To avoid abrasive wear, frame edges must be eased or rounded wherever they contact webbing.
2. Be certain that material laid over webbing isn't fastened to the frame, restricting the springing effect of the seat or back elastic.
3. There are too many possible pitfalls to take chances. Always use the best webbing, even if less expensive products are available.
4. Use just enough properly driven staples. Too many is almost as bad as not enough. Follow the supplier's instructions for stapling techniques.
5. File down the hammer of the stapler so webbing won't be cut as the staples are driven.
6. Controlling the stretch of the webbing controls seat softness.

Stapling Procedure: It is recommended that coated staples 7/16" or 1/2" wide by 3/8" or 1/2" deep be used. The staples should be inserted at approximately a 45 degree angle and at least 1/2" from the end of the strap. The first and last staple should overlap the edge of the strap.

Hand Tool Procedure: The normal procedure is to staple one end of the Elasbelt webbing to the frame. The webbing is then stretched to the predetermined setting on the hand tool – specifically designed for this application. When using the Elasbelt type 680D product, it is not required to run this webbing in two directions. For a sofa or a chair, designed to sit more than two people at one time, it is suggested that the webbing be stretched from front to back ONLY (not side to side). Refer to photograph in order to thread the tool properly which is essential to tool use.

Warning: Elasbelt webbing by Intes is the best form of seat suspension available. Beware of imitations. There are other webbing manufacturers that produce webbing to look like Elasbelt and the webbing works on the same concept. Their advantage is a lower cost alternative even though Elasbelt is not expensive. The manufacturers who have been using these alternative types of webbing have suffered through an extremely high failure rate. The alternatives have formed a permanent set (sagged) in less than a year in many cases. Intes performs strict test on the raw material used in its products. Tests are performed to ensure continuity and to meet the strict requirements for the end product. Independent tests prove that Elasbelt will not sag or form a permanent set after repeated stretching up to 250,000 times. MASCO Fabrics, Inc. researched Elasbelt and webbing market for several years. We are one of the first companies to introduce this product to upholstery after market. You can count on us to never sell you an imitation.

Intes stands behind their product with a 10 Year Guarantee

Custom Pillows Can Be Produced With Ease By Using Our Pillow Form Inserts

Deluxe Forms

Our deluxe forms offer a consistently high quality product, which includes total uniformity in size, look and feel on our pillow inserts from order to order. The reason is that all of the deluxe pillow inserts are filled with 100% garnetted hollowfill siliconized fiber, not blown fiber (blown fiber is unprocessed

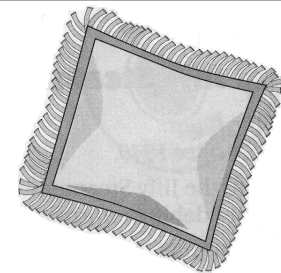

fiber blown directly into the pillow casing). Garnetting is a multi-step process whereby polyester fiber is opened up (combed) 100%. The fiber comes out in a continuous web, which is then layered at alternating angles and locked together to form a fiber batt. The end product is a perfectly smooth high loft fiberfill batt, with total fiber integrity, and absolutely no lumps, no shifting and flattening.

Please note: This adhesive should not be used for high heat applications. Example: Headliners, vinyl tops, Automotive Carpet, Marine Carpet, etc.

Adhesives

Foam & Fabric Adhesive
313B Fast Set Adhesive
Add long term profits to your business by converting to an air compressor glue system
All aerosol cans cost appreciably more than a compressor glue system

Non-flammable No Over spray

A non-flammable, high solids synthetic rubber adhesive which can be dispensed through any low pressure air sprayer. It gives quick tack, forming a strong bond and soft glue line when bonding, splicing or pinching. 313B offers a faster tack or dry time. Use lower pressure air when spraying to minimize premature drying of the adhesive. We recommend that you use an in line 100 psi regulator with this adhesive.

Acu-Cutter

The Acu-Cutter 350 is a simple multi purpose foam cutter that can cut most foams up to 8 1/2" thick. The Acu-Cutter 350 has 2 blades, one stationary and one moving. The blades are made from 1/2" inch (front to back) "V" tooth blade material (10 teeth per inch) to produce a fine reliable cut. The Acu-cutter 350 is also available as a 12 inch saw (Special Order). Because foam saws are awkward to use, we do not recommend this unless your foam cutting requires the longer length.

The Acu-Cutter uses, a detachable low profile base with glide rollers. This base can be removed to produce angle cuts or sculpting. It is powered with a 4.5 amp Black & Decker JS 500 jig saw motor with variable speed. Accordingly, these motors can be replaced at a low cost with case and parts which are readily available.

Pre-tested and ready to use out of the box.

Air Tool – Bazooka Filler
 Fill cushions, pillows, pillow backs,
 mattresses, mattress pads and more.

Turn a tedious job into a simple one by placing the back end of the bazooka just above the loose filler container and the front end into the item to be filled. In seconds, the Bazooka just above the loose filler container and the front end into the item to be filled. In seconds, the bazooka literally sucks the loose filler into the sleeve being filled, saving approximately 98% of the mess and waste. It's also a vacuum cleaner. It can be used with down, kapok, shredded foam, Styrofoam pellets and other loose materials.

Bright, lightweight aluminum
 28" long, 2" Diameter

Operates on 60 to 90 lbs. of pressure

Item #	Price
BAZOOKA	\$145.00

"Rat Bag"
 303 Filter Sock

Item #	Price
RATBAG	\$22.90

Comes assembled with ties ready to be attached to the end of the bazooka. It is made out of Reemay media similar to quilt matting. It measures 12" long with an inside diameter of 6".

Seam Stretcher

Made of light weight aluminum, Simple toggle clamp construction. Easy to operate, Minimum length 12" for pillows, maximum length 3 ft. Rigid when in use. Can also be used as calipers for cutting large circles. No springs or chains. Easy to follow instructions on each package. Points easily replaced with points of upholstery pins.

Item #	Price
SEAMSTR	\$162.70

412 Piping Tins

Used For Making Channel Back Furniture

These 36" long piping tins are made of smooth aluminum. No burs to catch on fabrics, the material is soft so tins can be bent and adjusted. Comes in three width sizes 2", 3" & 4". It is sold as a set of two tins.

Item #	Style	Quantity	Price
ASEWKLEER.....	A.....	50.....	\$33.90
GSEWKLEER.....	G.....	50.....	\$29.90

Clear, transparent monofilament sewing thread does away with that large inventory of multi-colors. It never goes out of style because each new season it blends with the latest in color fashion. There is a size and grade for every application. In addition, monofilament saves down time. There is no change over from one color to the other, and there are thousands of yards of thread on each industrial spool.

1. This thread reduces need for large inventory of colored thread.
2. Increases production by reducing changeover time
3. Strengthens seams, eliminates puckers
4. Won't rot, fade or mildew - resists deterioration
5. No lint to clog needles
6. Clear thread- takes on color of background
7. Heat resistant - Compatible for iron use

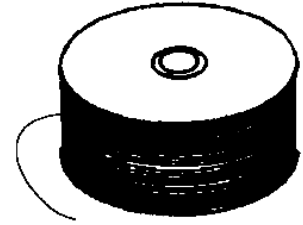

HIGH-SPEC

Bonded Nylon Thread

PREMO UVR Monocord Nylon

Tensile Strength

Constructed from a heat resistant, high tenacity type 66 nylon, Premo offers 10-15% more strength than twisted & plied threads.

Yield Advantage In Sewn Seam

Due to the unique cross section, Premo will produce 5-10% more stitched seam per yard of thread used versus twisted and plied threads – reduces thread usage.

Economical Alternative to Nymo

Low Profile Stitch

The unique oval/flat cross section of Premo forms a low profile stitch that buries itself in the fabric and significantly reduces thread exposure to abrasion.

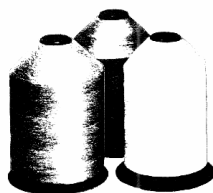

High Yield Bobbins

Provide fewer bobbin changes and uniform tack throughout each bobbin.

(FlexTrim)

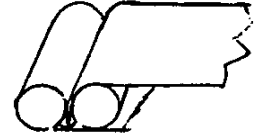

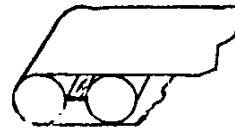

Item # PLYGRIP

100 ft rolls
\$24.30 per roll

2 Rolls
\$22.36 per roll

5 Roll Case
\$17.94 per roll

Pli-Grip is a continuous strip and invisible fastener. It is flexible enough to conform smoothly to twists, bends and radical curves without hand sewing. It won't buckle even when twisted and curved. No more sewing, double welting or gimp tacks. Cut off the length you want, when you want it. Galvanized satin finish for extra protection from rusting and staining.

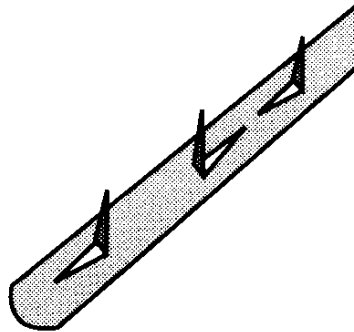

Eliminate several steps in upholstery. This vinyl tack strip is used instead of traditional tack strip and welt cord.

Simply wrap the fabric around the vinyl tack strip and place staples in the center of the bead. Staples are completely hidden as beads automatically close together.

Performs all phases that are required to close off outside wings, arm, and backs on upholstered furniture. It will make straight lines, curves and by cutting one of the pipings, it will make nice corner.

Staple Removers

120 Staple Knocker

The staple knocker is used for removing staples and shredded material. It is manufactured from top grade steel. Electronically hardened working ends. Easy to grip plastic handle. Used with hickory or rawhide mallets.

Item #	Price Each
OSBORSTAPREM.....	\$31.90

120 1/2 Staple Lifter

The correct angle for removing staples of any size, from the smallest to the long leg staples and shredded material. Manufactured from top grade steel. Electronically hardened working ends. Easy to grip plastic handle. Very popular model.

Item #	Price Each
LIFTER120.5	\$31.90

124 Staple Remover (Berry Style)

Forged from 4140 alloy tempered steel. A consistently made Osborne quality product. Carefully hardened for lasting use.

Directions: Slip either blade under staple and pry it partly up. Quickly twist handle to right, pulling staple completely free.

Item #	Price
BERRYSTAPREM.....	\$28.90

121 Tack & Stapler Remover (Cross Type)

This staple and tack remover is constructed with the same honest craftsmanship that goes into all Osborne tools. Can be also used for grooving out drawers so that when glued they will stick. Made of forged steel with wooden handle.

Item #	Price
CROSSSTAPREM	\$35.90

402 1/2 Combination Tool

Combined ripping tool and tack puller

A beautifully finished tool with a translucent amber handle made with rugged plastic. The handle is designed to fit the hand with perfect balance. The blade is made of forged and highly polished steel. It is shouldered to prevent driving into handle.

Item #	Price Each
TOOL402.5	\$30.90

402 Ripping Chisel

It has a translucent amber handle made of rugged plastic. It is perfectly balanced. The forged steel blade has the correct angle on the chisel edge. It has a shouldered tang to prevent driving into the handle.

Item #	Description	Price
50RIP	402 Ripping Chisel	\$29.90

Important Information For Anyone Owning A Staple Gun

Our Pneumatic tools operates with 80 lb. to 100 lb. P.S.I. of compressed air. The compressor must have sufficient air delivery for this specification or poor tool performance will occur. Some problems from low air pressure are:

1. Not enough power to drive
2. Slow operation
3. Poor return cycle or no return at all
4. Skipping – not driving each fastener

Your equipment should be connected in the following order to prevent restricted air flow.

1. Air Compressor
2. Filter
3. Regulator
4. Tool

If a problem with restricted air flow occurs, you can use an in-line air pressure gauge to determine the air pressure at each point in the line of air flow. A drop in pressure will indicate the point where the problem is occurring. Locating the problem will require taking air pressure readings on both the inlet and outlet side of the components listed above.

IMPORTANT

Please read the following.

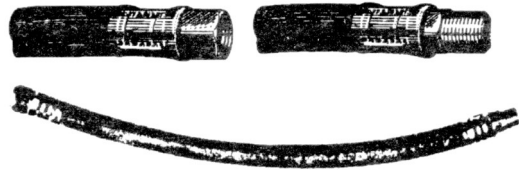

Lubrication is vital in order to maintain your staple gun. Pneumatic tools should receive **2 – 3 drops twice a day of Number 10 weight non-detergent oil**. This oil should be applied into the air connection. Reconnect the air line and fire two or three staples should be fired into scrap. This clear any excess oil and prevent from staining the upholstery. The correct lubricant is necessary. DO NOT USE Marvel Mystery Oil (Ben Gay smell), transmission fluid (sweet smell), WD 40, or Sandaro Pneumatic Lubricant. Synthetic oil or other cleaning solvents can not be used on this gun.

When a lubricant with detergent is used the inside of the tool will be black when opened. High viscosity oils and certain additives swell, dry and crack the O-rings. The tools which have the correct lubrication will have a fine

Continued from previous column at the bottom of the page

film around the outside exhaust and will be clear on the inside of the tool.

The tool is capable of lasting forever, with proper care and only replacing inexpensive parts. Unfortunately tools endure physical abuse. The tool can not be used for any other purpose than which it was intended. If you use the tool for purposes like a hammer, you will damage the tool beyond repair. So save your money by taking care of your tool.

Button Covering Dies

Precision manufactured dies are the key to making tight perfectly covered buttons. Our dies are made from high grade steel, machined, polished, case-hardened and polished again.

Choose A Die Weight

Our dies accept a wide range of fabric types and thickness, and are available in three types for light, medium, and heavy material. Our stock sizes all are available in medium dies. The medium dies work with the majority of fabrics. We recommend a heavy die to make buttons using a vinyl covering.

Item #	Size	Die Weight	Price
HB302-1220-191	22	Heavy	\$98.00
HB302-1300-191	30	Heavy	108.00
HB302-1360-191	36	Heavy	116.90
HB302-1400-611	40	Medium	119.00
HB302-1500-611	50	Medium	176.90

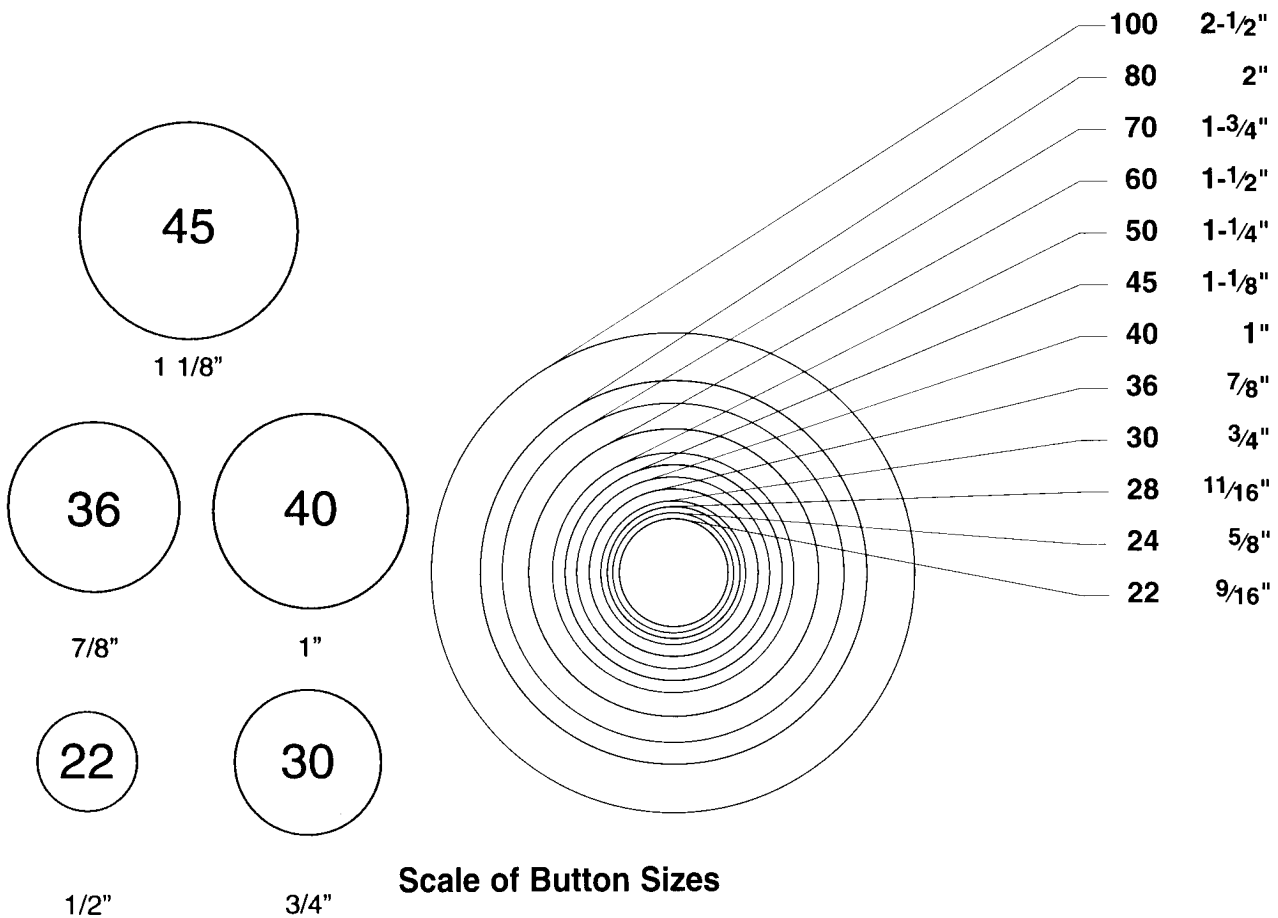

Item #	Size	Die Weight	Price
HB302-1220-611	22	Medium	\$89.90
HB302-1240-611	24	Medium	\$96.00
HB302-1300-611	30	Medium	\$97.90
HB302-1360-611	36	Medium	104.00
HB302-1450-611	45	Medium	149.90
HB302-1600-611	60	Medium	198.00

Dies for button sizes larger than 60 are special order only.

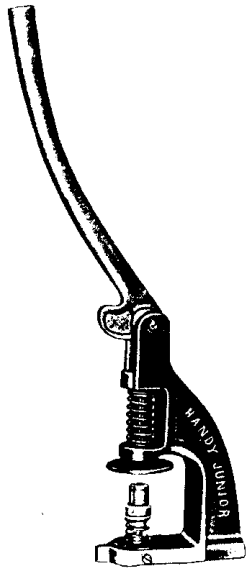

The two piece dies used with the Handy Jr. button machine come complete with a short cutter.

Short Cutter

Scale of Button Sizes

Button Making Problems & Solutions		Button Making Problems & Solutions	
Fabric Cut	*Check to see if clinching die is smooth & free of nicks and broken edges. Remove nicks on lathe or with emery cloth. Dies with badly broken edges should be replaced. *Use soft shells.	Top Die Does Not Pick Up Button	*Rocker arm not entering top die when top die comes down on shell die. *Check rocker arm for wear. *Check rocker arm spring pressure.
Plastic Cut	*Try above solutions. *Reduce friction by lubricating dies with lightweight oil, silicone spray or baby powder. *Warm plastic to create more "give" and reduce friction.	Ring on Top of Button	*Reduce Pressure.
Buttons Come Apart-Thin Material	*Add more pressure to covering machine. *Use thin material die. Shell may not hold firmly to back if die is too large. *Use two layers of materials on short runs.	Material Slipping or Not Making on One Side	*Use smaller top die. *Check for proper die alignment.
Buttons Come Apart Regular Material	*Add more pressure to covering machine *Use regular material die. Light material die may not allow back to be pushed far enough into shell. Heavy material die may not properly crimp shell to back. *Be sure springs on bottom dies are not packed with lint.	Buttons Rusting	*Use rust resistant shells.
Buttons Come Apart Heavy Material	*Add more pressure to covering Machine. *Use heavy material die. Light or regular material dies may not allow back to be pushed far enough into shell. *Add pressure to bottom back die by using heavier spring or raise back die by placing washer under it.	Buttons Sticking in Top Die	*Use Silicone Spray *Polish inside of top die with emery cloth. *Use larger die.
Buttons Come Apart Heavy Material	*Add more pressure to covering Machine. *Use heavy material die. Light or regular material dies may not allow back to be pushed far enough into shell. *Add pressure to bottom back die by using heavier spring or raise back die by placing washer under it.	Covering Material Looks the Same on Both Sides	*Mark with tailor's chalk on wrong side of material before cutting. This will allow operator to easily place cloth in die with the proper side up.
Material is "Bunched Up" Where Shell Meets Back	*Die is too small. Space between shell and back is not large enough for thickness of material. *Rough surface of dies prevents material from tucking in. Polish top & bottom of dies.	Check These Things Also Dies should be as smooth as possible. Oil, lint, nicks, etc. can interfere with covering. A quick solution for many problems is to clean dies and polish clinching surfaces with emery cloth. Cut covers should be round, not oblong. This is usually caused by dull cutters or by cutting too many layers at once. Check to see if top die is centered over bottom die. This can easily be done by removing the outer ring of top die. Inner post serves as a line up post. There should be a fairly even amount of space between the sides of the post & the bottom dies.	
1. Material does not fold uniformly into a button. Align button covering dies front to back. 2. Dent or ring on vinyl material after covering. Is die correct for material? Check for too much stroke pressure. 3. Shell wall not crimped; back not pushed completely into shell. Check for insufficient stroke pressure. 4. Vinyl material tears. Try special soft temper shells for delicate material.		5. Shell wall straight & back pushed completely into shell. Material is too light for die. 6. Wire eye wall collapses & buckles. Material is too heavy for die.	

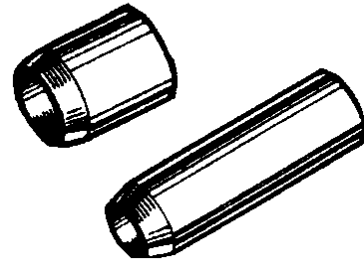

Button Covering Machine

No. 1 Handy Jr.

Produce approximately 90 buttons per hour. The Handy Jr. uses a two piece die and short cutter. It comes included with a wood cutting block.

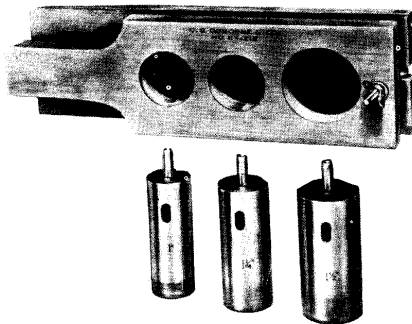

* Price does not include dies, cutter or button molds.

No. 9 WIRE EYE

LOOP EYE

No. 44

Choose A Type Of Button Eye Back

You have two choices of button eye backs. The number 9 wire eye has a heavy eye and will stand and 80 lb. Pullout test. The number 44 loop eye has a smaller eye to be used against delicate materials to minimize piercing and runs. All steel backs are zinc plated for rust resistance.

Choose A Button Size

Refer to page 53

Other Button Choices

Available in shells only, backs only or your choice of molds

Choose The Type Of Shell

Shell Temper

We provide shells in different tempers for various fabric requirements. Our standard shell tempers are regular and soft. The soft shells prevent tearing of delicate and vinyl material. We can special order harder shells for heavy or uneven fabrics. Please allow 4 weeks for special orders.

Rust Resistant Shells

We offer zinc plated shells which resist rusting and the resulting damage to upholstery are a must for high humidity environments. Rust resistant shells are denoted by RR.

* - Special order only @ - Special order only Call for pricing

- Not yet available at the time of printing

Item Numbers consist of three parts. Style, Head Size & Shank Length – Finish – Pieces per Box

The Item # prefix refers to the style, head size, and shank length.

The #'s above each finish description refer to the finish.

The following #'s refer to the pieces per box -20 = 1000 -21 = 500 -22 = 250

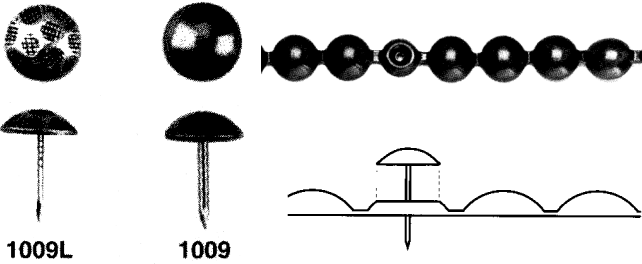

Example: 1009 Steel Gilt 15/32" Head 1/2" Shank 1000 per box Item # = N00113120

Note – The 1009 Steel nails have more hammered indentations than the 1909 steel nails which accounts for the difference in price.

Decorative Nails By Handy Button

Steel nail with a brass finish
 Head diameter 11.5 mm (Approximately 14/32")

Grommets & Ventilators

Ventilators

Our solid brass ventilators have a beveled under edge which holds firmly to any ticking, plastic, vinyl, leather or plastic. Use washers for thinner materials. Use the 621 ventilator die (below) to set the vents.

Use the 149-9/16" (leather) arch punch or the 149-7/16" (vinyl) arch punch to cut holes for the 1B ventilators. Use the 149-3/4" (leather) arch punch or the 149-5/8" (vinyl) arch punch for the 2B ventilators. The 149 arch punch is on page 68.

Hand Ventilator Setter

More Dies on page 67

Directions for 621 - 3/4" Setter

1. Punch 9/16 hole in material. Use 149-9/16" arch punch or for vinyl use the 149-7/16" arch punch (page 68).
2. Lay vent neck up on base, place material over vent, now slip vent ring on bow side up. A few even taps with an rawhide mallet (page 63) will set the vent.

Directions for 621 - 1" Setter

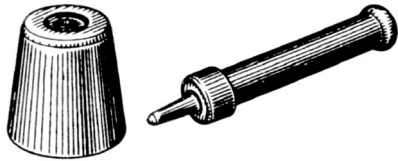

1. Punch 3/4" hole in material. Use 149-3/4" arch punch or for vinyl use 149-5/8" arch punch (page 68).
2. Lay vent neck up on base, place material over vent now slip vent on bow side up. A few even taps with a rawhide mallet (page 63) will set vent.

Item #	Ventilator Size	Price Each

149 Arch Punch

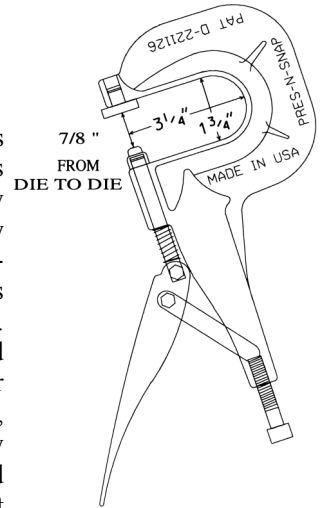

Use the 149 punch to make holes for grommets, ventilators and other items. Our arch punches are drop forged in one piece from the finest allow steel sizes from 3/8" to 5/8" diameter. A unique feature of the arch punch is the inside taper which permits the punched pieces to clear easily through the barrel. Punches have a fully polished barrel and black Japanned handle.

We suggest that you use the #4 rawhide mallet (page 63) with the #149 punch.

Pres-N-Snap

The Pres-N-Snap is capable of setting numerous brands of fasteners, simply by changing the dies. Many of our dies have rubber retainers to hold the fasteners in place during installation. We offer dies for standard and baby size snaps, regular and self piercing grommets, and other various specialty applications. Its heat treated cast aluminum body makes it both lightweight and durable.

Item # Price
PRESNSNAP \$240.00

Each Pres-N-Snap Tool includes dies for the following fasteners: Cap, Eyelet (Post), Socket, Stud and #1 Grommet

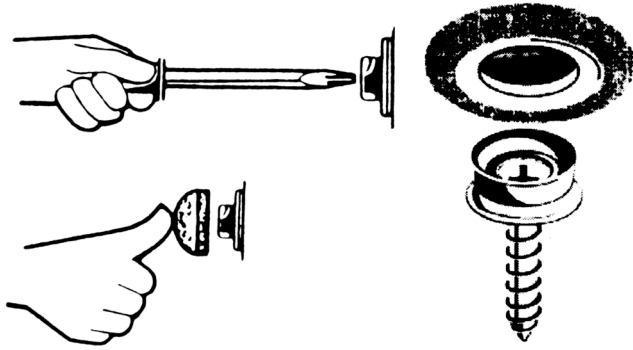

Item #	Description	Price

No. 1 Handy Jr.

Use the Handy Jr. to reduce labor and fatigue.

Button covering dies on page 53. Use the Snap Adapter and PM5 dies to set snap fasteners. Dies and adapter sold separately. Handy Jr. comes included with cutting block.

Item #	Price
HANDYJR	\$220.00

Adapter For Handy Jr Machine

Use these adapters to enable the Handy jr. machine to set snap fasteners. The adapters are used with the PM5 and the 20 line (Baby) dies. The adapters are sold in a set of a top and bottom. Use the Handy jr. for labor intensive jobs to reduce time and fatigue.

Item #	Price Per Set
SNAPADAPTER	\$125.90

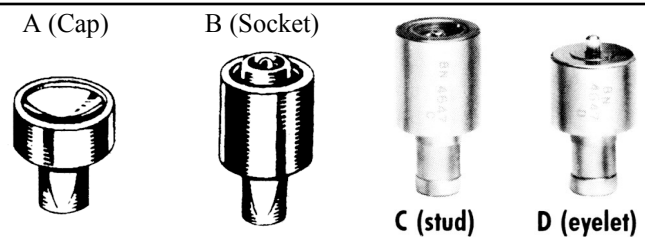

PM5 Machine

A durable machine with added portability in setting snap fasteners or grommets. It weighs approximately 9 lbs. We recommend the PM5 dies, but it accepts dies with a 3/8" diameter shaft. Dies not Included.

In Stock Now

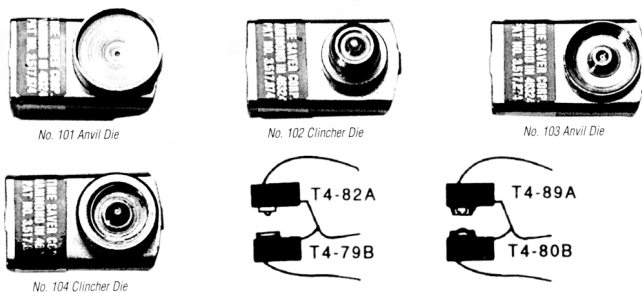

Item #	Price Each
PM5MACH	\$332.00

PM5 Snap Fastener Dies

The PM5 dies are sold in a set that includes all four dies. The dies are made for the PM5 machine, but they can be used on the Handy Jr. in combination with a snap adapter (listed above). These dies pay for themselves with reduced labor. In Stock Now.

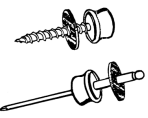

Item #	Price Per Set
PM5DIES	\$250.00

Time Saver Snap Fastener Dies For Use With Vise Grip Pliers

Spray Coating For Plastics and Vinyl, Leather, Carpeting, Convertible Tops, and Automotive Synthetic Seating Fabrics.

Color Coat, an elastomeric coating, is formulated to match, restore or change color on most vinyl surfaces, flexible and rigid plastics, carpet, leather, and automotive, synthetic seating fabrics. It is not a dye, but a solid covering coating which will easily change color completely. A black surface can be changed to white with only two or three coats. Color Coat is 200% stronger than any dye system.

Adhesion to a clean surface is excellent. Extreme flexibility is maintained, with no tendency to crack or check. Color Coat is durable and weather resistant, and will not soften with normal heat.

The system uses 9 colorants and 3 clears to intermix all automotive interior and exterior vinyl and plastic trim colors from 1976 to present. The accurately matched system is formulated for a gram scale or parts formula and is upgraded with each model year.

SEM Products

Plastic Prep

Plastic Prep removes mold release agents, fingerprints, grease, wax and other contaminants and leaves plastic substrates clean for coating. This special blend of mild chemicals will not soften or distort plastic and leaves no residue or film.

Item #	1 Can	6 Cans	12 Cans
PLASTICPREPSPRAY	..\$11.90 \$10.90\$9.90

Vinyl Prep

Vinyl Prep cleans soil, wax and grease from all vinyl surfaces. Also slightly softens the surface preparing it for excellent adhesion of top coat. Non-flammable. Works without excessive scrubbing.

Item #	1 Can	6 Cans	12 Cans
VINYLPREPSPRAY \$15.90\$14.90\$13.90

Leather Prep

Leather Prep is a special combination of rich solvents designed to penetrate and remove the film present on most commercial leathers. Opens the pores slightly and promotes proper adhesion of Color Coat.

Item #	Container Size	Price
LEATHERPREP Gallon \$71.90
LEATHERPRERQ Pint \$22.90

Flexible Bonding Clear

Flexible Bonding Clear is designed to promote adhesion of top coat materials when repairing or refinishing problem plastics such as polyethylene (PE), polypropylene (PP) or thermoplastic olefin (TPO). Flexible bonding clear works equally well on all flexible or rigid plastics and on painted surfaces.

Item #	1 Can	6 Cans	12 Cans
FLEXCLEARSPRAY \$27.90\$25.90\$23.90

Rust-Seal

Rust-Seal transforms rust into a tough, stable, protective coating. This unique formulation neutralizes surface rust immediately and continues to penetrate affected areas. Permanent – no need to prime or paint affected surface to prevent re-rusting.

Item #	Container Size	Price
RUSTSEALQ Quart \$49.90

SEM Solve

Sem Solve is a special combination of solvents formulated to simplify cleanup of adhesives, waxes, road tar, grease and paint over spray.

- Ready to use
- Convenient, easy to use pour spout
- Removes contaminants fast
- Does not leave sticky residue
- Leaves a clean surface

Item #	Container Size	Price
SEMSOLVE Quart\$12.90

SEM Topper
Recolor & Renew
Vinyl Tops

Recolor or renew vinyl tops with this fade resistant water-base coating.

Excellent ability to hide – usually only 2 coats will completely change the color. No masking necessary when applied by brush or applicator. May also be sprayed. Non-toxic, Non-flammable and cleans up with water.

Item #	Color	Price
SEMTOPBLACK Black \$22.90
SEMTOPWHITE White \$22.90

39711 SEM Flex

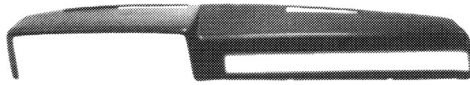

Sem Flex is a custom product formulated for use as a flexing agent in both acrylic enamel when extreme flexibility is essential. Examples are plastic or urethane parts such as flexible impact bumpers, etc. Sem Flex is designed to be compatible with all makes of acrylic lacquer and acrylic enamel.

Item #	Price
SEMFLEX \$125.90

Fab-Tec

Fabric Protectant And Seam Sealer

Use On: Convertible tops, car covers, upholstery & carpeting

16 oz aerosol can

- Creates and maintains water repellency on virtually all fabrics
- Seals seams for leaking on convertible tops, car covers, etc.
- Protects new or cleaned fabrics from dirt, grease, stains & spills
- Helps prevent fabric fading, etc. caused by UV light damage
- Does not change the feel, color or breathability of a fabric
- Non-toxic and odorless – contains no silicone, freon or trichlorethane

Do not use on plastic, vinyl, fiberglass or imitation suede.

Item #	Price Each
FABTEC.....	\$27.90

Plas-Pro

Convertible Top Plastic Window Protectant

Use On: Convertible top plastic rear windows, motorcycle windscreens, helmet visors and shields.

- Microscopic polishing agents improve surface conditioning (optical levelness)
- Contains plasticizers than maintain flexibility and vitality of material
- Features UV ray blockers to intercept sunlight and guard against yellowing
- Special anti-static ingredient prevents attraction/build-up of dust and dirt on window
- Leaves a durable film that reduces scratching.

SUV Tops

Jeep Wrangler Tops

1988 – 1995

Reduced Leaks – Better Fit – More Aesthetically Pleasing than the OEM tops

The AMCO Wrangler top has larger windows for improved visibility and safety, plus special attachment methods that improve the fit and reduce “flapping” noise. The doorskins are unique in that the insides are designed to provide a finished appearance with only fabric visible (instead of mixed vinyl and fabric) and the center bar of the frame is hidden. On the outside of the doorskin only one exterior stitch is visible.

To prevent the pesky water leaks that occur on factory tops, Amco engineers have designed the rear seam to face rearward and heat-sealed it. And the elastic straps that are used to roll up the rear window can be snapped out of the way to eliminate the unsightly and distracting “dangling” OEM straps.

The Jeep Wrangler top can easily be installed, and detailed, fully illustrated, instructions are furnished. What’s more, little subtleties, like a rear window positioning assist tab, make it easier than ever. All in all there isn’t a better replacement top on the market for Jeep Wranglers.

Item #	Part	Color	Price
CT2100/91 Top Char Grey \$680.00
CT2100/92 Top Black \$680.00
2100/96 Top Spice \$680.00

Isuzu Amigo

1989 – 1995

Amco has made a number of important improvements to the OEM Isuzu design and offers what is undoubtedly the best top on the market today. For openers, Amco tops are made of a sturdy denim vinyl for improved durability. The windows are approximately 20% larger than the original for vastly improved visibility. And the rear window “zips out” for easy removal and storage. This eliminates the need to roll up the rear curtain.

Item #	Color	Price Each
CT2010-92 Black \$550.00

Geo Tracker

1990 – 1994

Made of a sturdy denim material developed specifically for sport utility vehicles, Amco’s replacement tops for 1990-94 Geo Trackers are the hot ticket. Complete with Amco extras, like a special center snap tab that holds the rear curtain in place for easier installation.

Item #	Color	Price
CT2020/92 Black \$309.60
CT2020/93 White \$309.60

OEM Zipper for GEO Tracker

#10 YKK Black – 74” Coil Zipper

Item #	Price Each
ZIPTRACKER \$29.90

More Coil Zippers On Page 153

Suzuki Sidekick

1990 – 1994

Here’s a great replacement for 1990-94 Sidekick tops. It’s made from a sturdy Denim Vinyl material developed especially for SUV’s. Installing the rear window is much easier than stock, thanks to Amco’s exclusive center snap tab, which holds the rear curtain in place and facilitates zipping it up.

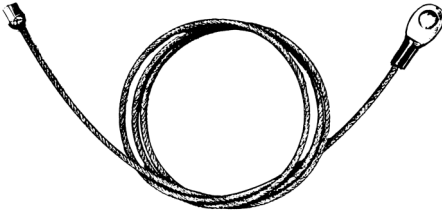

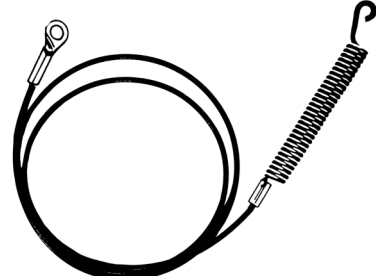

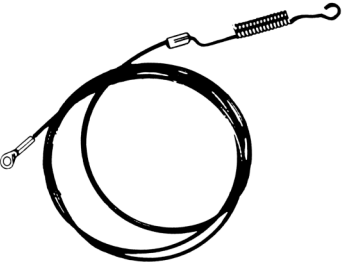

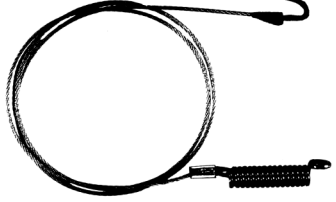

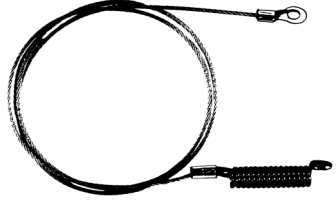

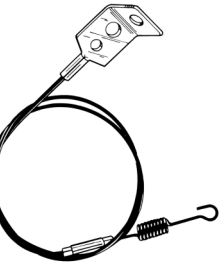

Item #	Color	Price Each
CT2020/92 Black \$309.60
CT2020/93 White \$309.60

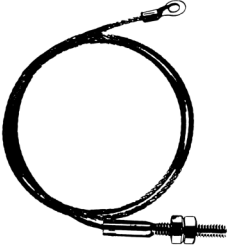

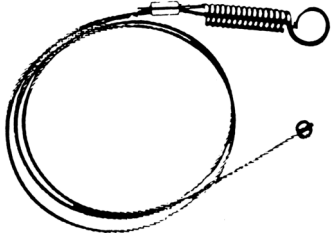

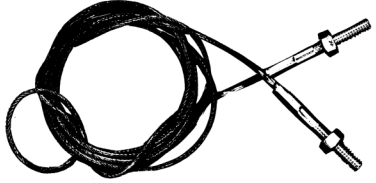

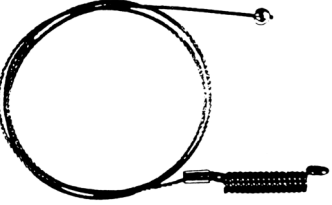

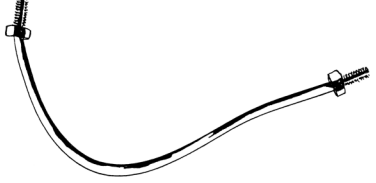

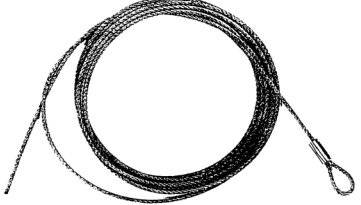

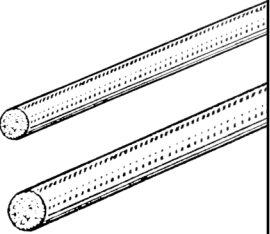

Suzuki Samurai

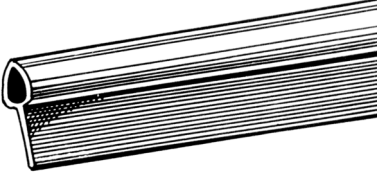

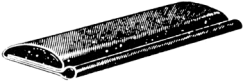

1983 – On

The Samurai replacement top from Amco offers major improvements over the factory stock. To begin with, the top is made from a heavy-duty Denim Vinyl, which is far more durable than the original fabric. Secondly, Amco’s exclusive design incorporates larger side and rear windows for improved visibility.

Item #	Color	Price Each
CT2000/92 Black \$266.60
CT2000/91 Char Grey \$266.60

88 Marking Chalk

Our chalk is clay based and thus it is much easier to erase. Other chalks that are not clay based will leave a grease mark on cottons and other fabrics. The 88 marking chalk also works on vinyl that other chalks do not. Due to the shape of chalk a sharp marking edge is maintained. Each Box contains 12 chalks: 8 white chalks, 2 yellow chalks, 1 red chalk and 1 blue chalk.

- ◆ It's Lightweight – (2 3/4 lbs.), for extended periods of use with minimum operator fatigue. It includes a stand for ease of handling
- ◆ It's A Tough Tool – built for rugged handling with GE Lexan housing & parts that are impact resistant and non-conductive
- ◆ Unique Suspended Quick Change Heating Element – extends life and carries an exclusive 2-year warranty
- ◆ Housing, Handle, Safety Stand and Trigger Guard of Rugged G.E. Lexan – for superior electrical insulation properties, corrosion and impact resistance.
- ◆ Adjustable Air Intake Regulator – Provides variable temperature adjustment within the units rated heat range
- ◆ Toggle Type Control Switch – provides hot-cold-off operation
- ◆ Double-jacketed Nozzle and Shield – helps maintain cool exterior temperatures
- ◆ Nozzle Air Opening – 1 3/16" diameter
- ◆ 6 ft Three-wire Grounding – type strain relief cord features neopreme jacketing and molded plug

Since their introduction to the trade, versatile Eddy Heat Guns have established impressive records for rugged performance through prolonged motor brush and element life in both intermittent and continuous duty applications.

With a reputation for long service life, the Eddy Heat Gun has found increasing acceptance as a standard tool for large service organizations, industrial maintenance, a safe heat or cooling source for laboratories, a component in OEM products such as heat shrink tunnels, etc.

What does General Electric LEXAN mean to you?

General Electric's LEXAN has positioned itself as "the" metal die cast replacement material because of its unique combination of properties and outstanding performance in maintaining these properties over extended time and a wide range of temperature frequency and humidity conditions.

Eddy Products chose LEXAN polycarbonate resins for its housings and comfort grip handle because it combined a unique blend of rigidity, impact strength, toughness and self-extinguishing flammability performance.

Cloth**

Clear-coat Safe

Streak free cleaning of oily or filmy residues

Safe for all hard
Surfaces

Unique combination of knitted, super-soft micro-texture fibers provide:

- Quick removal of oily and filmy residues including waxes, polishes, glazes and fingerprints.
- Safe, chemical-free, lint-free and streak-free cleaning of vehicle surfaces.
- More dust-trapping than traditional cotton and paper cloths.

Extremely versatile

- Use dry to polish, shine and dust.
- Use damp to clean.
- Works well even without cleaning solvents.

Long-lasting and durable

- Machine washable (up to 200° F / 95° C).
- Dryer safe (permanent press setting recommended).
- Chlorine bleach safe.
- Launder separately or with non-linting articles.

ACIDBRUSH.....	\$0.50.....	\$4.80

3M 8011
Weather Strip
Adhesive – Black

Fast-drying adhesive used for bonding and sealing weather stripping.
Also an excellent adhesive for new EPDM weather stripping.
Easy to apply – Remains flexible – Waterproof

Item #	Price Each
8011TUBE.....	\$13.00

8661 3M Super Silicone
Sealant

Rapid-curing adhesive/sealant formulated to solve repair and maintenance problems
Adheres to a wide variety of automotive surfaces.
Clear – 3 oz tubes

Item #	Price Each
ADH8661	\$15.50

3M 8001
Super Weatherstrip
Adhesive

Bonds all types of gaskets to painted or unpainted metal surfaces.
Adhesive stays permanently flexible and rubbery, never dries out or becomes hard.
Easy to brush and spread – Extremely fast drying
Exceptional bonding strength – Waterproof – Flexible
Resists oil, grease and solvents

Item #	Price Each
8001TUBE.....	\$9.20

8661 3M Super Silicone
Sealant

Rapid-curing adhesive/sealant formulated to solve repair and maintenance problems
Adheres to a wide variety of automotive surfaces.
Clear – 3 oz tubes

95 Bray Retainer Remover

A special pair of pliers for removing the retainers from the underside of auto upholstery buttons. Does not damage buttons or retainers so that can be reused. This tool is a great money and time saver. A difficult job is now easy.

To remove the retainers, the lower forked jaw of the pliers is inserted between the retainer and the upholstery material with the pin of the button in the forked portion of the jaw. The upper jaw with dimple is then in position for the pointed pin of the button to fit into the dimple. Then with pressure on the pliers the retainer will snap off the button. On buttons with two pins, the procedure is repeated. If the retainer does not snap off, rotate the pliers a quarter turn and apply pressure again. After removal, if the ears on the retainer plates are slightly distorted, they can easily be flattened to the original shape by using a #33 or #36 tack hammer (page #62) on a solid flat surface.

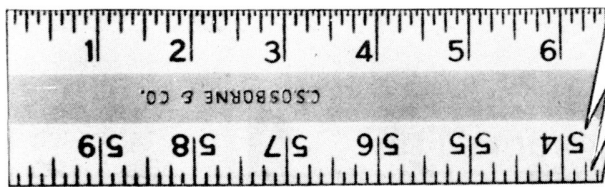

Item #	Price Each
95PLIERS	\$49.90

99 Glass
Retainer
Clip
Installer

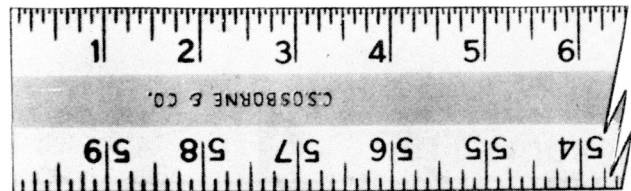

A practical tool for placing trim retainer clips over headed studs welded around the body window shields and rear window openings. This tool reduces the risk of chips and scratches to glass windows put in by make-shift tools. This tool is specifically designed to fit trim clips over the studs and virtually rubber like sealant surrounding the studs.

**The MASCO Fabrics, Inc.
In-Stock Guarantee
For The Softside Collection**

We guarantee to have enough inventory to fill any order for 19 yards or less of any vinyl that is sampled in this book. If not we will give you a 10% discount over and above your normal quantity dis-

count on the vinyl or a substitute of equal or greater value. Substitutes must be used on the same day that the order was placed. We pick up our orders from our supplier twice weekly, so we can fill multi roll orders quickly.

How to calculate leather from fabric yardage requirements.

- Each yard of 36" (width) fabric requires 12 square feet of leather.
- Each yard of 50" (width) fabric requires 16 square feet of leather.
- Each yard of 54" (width) fabric requires 18 square feet of leather.

LEXOL

Leather Conditioner

Lexol protects old and new leather from cracking and premature aging by providing the essential lubrication to keep it soft and supple. It is made with the finest oils which have been emulsified into microscopic droplets. These droplets bond easily to leather

fibers, nourishing the leather and leaving no greasy residue. Use Lexol regularly to keep your leather looking and performing its best.

Naugahyde brand fabric with advanced BeautyGard protective finish is an exceptional choice as an upholstery fabric. Crafted in America and containing the finest materials available, Naugahyde is a practical and popular choice among designers, specifiers and consumers.

Whether it's our rainbow of colors, look of fine leather or depth of woven fabric design, Naugahyde blends beautifully with other mediums of design, such as carpet, wall covering and furniture laminates.

As the industry leader for over forty years, naugahyde delivers reliable and consistent product performance. It is extremely durable, easily maintained and tailors well in high traffic residential and commercial interiors, as well as recreational vehicles and other means of transportation. Formulated with antimicrobial agents and capable of high level disinfectability, Naugahyde is an ideal choice for medical and health care applications.

Naugahyde BeautyGard top coat finish is produced from environmentally friendly materials and processes, and is technically formulated to achieve the highest performance standards. Our total quality commitment, combined with innovative top coat technology provides excellent product features:

⇒ **Durability** _____

When subjected to rigorous abrasion exposure using the industry accepted Wyzenbeek test standards, Naugahyde with BeautyGard exceeds:

- Over 500,000 cycles (one million rubs) on 1.21 cotton/polyester sateen (standard clothing material).
- Over 50,000 cycles on #8 cotton duck (canvas/tent material).
- Over 15,000 cycles on #10 cotton duck (heavy canvas/tent).

⇒ **Disinfectability** _____

- High-Level Disinfectability – Naugahyde BeautyGard has been formulated to achieve the high-level disinfectability required in medical applications. It may be safely subjected to cleaning with disinfectant products containing sodium hypochlorite (common household bleach) at full strength or glutaraldehydes.
- Intermediate-Level Disinfectability – May be achieved by using sodium hypochlorite (common household bleach) diluted 1:10 or rubbing alcohol. For rubbing alcohol to achieve intermediate-level disinfectability, the puddles must remain on surfaces, including Naugahyde, until evaporation occurs. Due to its ease of application, sodium hypochlorite is the preferred disinfectant.

⇒ **Antimicrobial** _____

Naugahyde with BeautyGard leads the way in providing outstanding protection in difficult medical and health care environments.

- Sulfide stain resistant
- Oil and mildew resistant (Federal specifications CCC-A-680a).
- Contains agents effective against the following microorganism:

Bacterial Species

- Bacillus Subtilis
- Staphylococcus Aureus
- Oseydinibas Aeruginosa
- Aerobacter Aerogenes
- Proteus Vulgaris
- Brevibacterium Species
- Streptomyces Rubrircetuli
- Escherichia Coli
- Klebsiella Pneumoniae
- Pseudomonas Aeruginosa

Fungal Species

- Aspergillus Niger
- Aspergillus Flaus
- Penicillium Funiculosum
- Penicillium Islandicum
- Chaetonium Globosum
- Trichoderma Species
- Aureobacidium Pullulene
- Candida Albicans

⇒ **Flammability** _____

Since Naugahyde produces a wide range of coated fabric products, please refer to our sample cards and technical data bulletins for specific flammability information.

Naugahyde brand fabric provides additional competitive edge features:

- Superior tear strength
- Easily tailored
- Non-migratory plasticizers to retain soft and supple feel
- -20 degrees cold crack
- Static dissipative slip finish

Vinyl Repair

We Guarantee the VLP Repair is stronger than the original vinyl.

Here are some uses for our product:

- Seats in cars, trucks, boats, buses, snowmobiles.
- Furniture, indoor and outdoor.
- Boat tops, tarps, awnings.
- Athletic bags, luggage.
- Swimming pool liners.
- Jackets, boots, rainwear.
- Air Mattresses
- Bean bag chairs

You simply squeeze it from a tube onto rips, tears and cuts, and it fuses the vinyl together. VLP air dries – no heat or messy patch is needed

Permablok³ Care & Cleaning Guide

The following guide covers many of the common staining agents. During independent laboratory testing, many were allowed to stand on Permablok³ fabrics for up to 40 hours with excellent cleaning results.

Care And Cleaning Guide

Staining Agent	Cleaning Procedure
Eye Shadow/Mascara	Step 1
Grease	Step 1
Crayon	Step 1
Black Felt Tip Pen	Step 1
Chocolate	Step 1
Suntan Lotion	Step 1
Red Lipstick	Step 2
Blood, Urine, Feces	Step 3
Oil Base Paint, Tar, Asphalt	Step 3
Other Tough Stains	Step 4 or 5*

- Step 1: Remove excess spill with damp cloth.

- Clean with 1:1 mix of Ivory7 liquid and water. Rinse water and dry.
- Step 2: Use straight application of concentrated cleaners such as Formula 4097 or Fantastik7 Spray clean water and dry.
- Step 3: Use a 1:1 mix of ammonia and water or a 1:4 mix of bleach and water. Rinse with clean water and dry.
- Step 4: Use straight application of naphtha (lighter fluid). Rinse thoroughly with clean water and pat surface dry.
- Step 5: Use 1:1 mix of isopropyl alcohol and water. If stain persists, use straight alcohol. Rinse thoroughly with clean water and pat surface dry. If stains remain, use a 1:1 mix of acetone and water. Rinse with clean water and pat surface dry.
- *Note: For cleaning that requires steps 4 or 5 – use soft cotton cloth saturated with the cleaning material, rub the stain in circles 10 times. Pat dry with the cleaning material, rub the stain in circles 10 times. Pat dry with another soft cotton cloth and check results.

**Beautiful Protection In
The Battle Against
Germs, Abrasion And
Stains.**

Permablok³ from Spradling is a proven vinyl protective coating that's engineered to create a tough, effective barrier against the three biggest problems encountered in today's commercial environment. Germs, Abrasions and Stains.

You can't see it. Yet the protection it offers results in extended performance and lasting beauty with a minimum of care.

⇒ **Keeps Germs Down For The Count** ———

Permablok³ results in a more hygienic environment, because germ counts can be kept down. Importantly, it also guards against the surface growth of fungus, mold and mildew spores which can cause unpleasant odors, unsightly pink and black stains, even allergic reactions. Which means vinyl treated with Permablok³ not only keep their great appearance, they remain highly resistant to microbial deterioration which can cause cracking, splitting and loss of flexibility.

- Permablok³ offers unsurpassed antimicrobial protection by resisting gram positive and gram negative bacteria, filamentous fungi and yeast.

Gram Positive	Gram Negative
Bacillus Cereus	Enterbacter Aerogenes
Cacillus Mycoides	Eschericia Coli
Bacillus Subtilis	Klebsiella Pneumoniae
Enterococcus Faecalis	Morganella Morgani
Listeria Welshimeri	Proteus Mirabilis
Nocardia Asteroides	Proteus Vulgaris
Staphylococcus Aureus	Psudomonas Aeruginosa
	Salmonelle Choleraesuis

Filamentous Fungi	Yeast
Aspergillus Niger	Cadida Albicans
Microsporium Canis	
Penicillium Ochro-chloron	
Scopulariopsis Brevicaulis	
Trichophyton Mentagrophytes	
Trichophyton Rubrum	

So from any standpoint – hygienic, cosmetic or structural – Permablok³ offers superior bacterial protection that healthcare and hospitality industries can really count on.

⇒ **Stands Up To Abrasive Actions** ———

It takes a tough skin to stand up to the everyday wear and tear that typify today's commercial environments. CFFA standard Wyzenbeek test methods confirm that Permablok³ offers some of the toughest abrasion protection available for vinyl fabrics today – demonstrating excellent resistance to scuffing and burnishing which

can make ordinary vinyl look old before their time.

⇒ **An Unstained Reputation** ———

When caught quickly, most everyday stains like grease, blood, suntan lotion, crayon, ketchup and black felt tip pens can be wiped right off vinyl treated with Permablok³. Just use mild soap and water. For more stubborn stains, a variety of concentrated and solvent type cleansers may be used without damaging the surface. Including alcohol, naphtha and bleach. (Abrasive household cleansers and steel wool should be avoided – see the guide on the back cover for complete care and cleaning procedures.)

- **Permablok³ Care and Cleaning**
Vinyl fabrics treated with Permablok³ require a minimum of maintenance to retain their good looks. Everyday soil can usually be removed using a soft cloth or sponge with mild soap and water. Spills and accidents require immediate attention for best results. In many cases, stains such as coffee, tea, cocoa, ketchup and blood, may be cleaned simply with warm water alone. If the stain is allowed to set, more concentrated cleaners may be required. Generally speaking, always start with the mildest cleaning agents first. Never use harsh powdered abrasive cleaners or steel wool.

**See Page 148
For Care & Cleaning Instructions**

- **Colors And Patterns That Are Tough On Top**
Spradling offers Permablok³ vinyl in a vast array of elegant textures, innovative patterns and over 300 colors. And in addition to fighting germs, abrasion and stains, all incorporate outstanding flame-resistant additives that meet or surpass many major US flammability codes.

Marine Supplies

Adjustable Shock Cord Hooks

With this plastic adjustable hook, the 1/4" shock cord can be adjusted to any desired length easily, in just seconds. It is ideal for automotive, marine and a variety of everyday uses. Durable, rustproof hooks will not mar finished or plated surfaces.

Item #	Price Each
ADJHOOK.....	\$1.50

Adhesive Transfer Seam Tape

Our acrylic double coated adhesive transfer tape is a high tack acrylic and is designed to provide high initial adhesion and excellent bond to most canvas and acrylic fabrics.

The tape is rolled onto the fabric surface to which it adheres, and leaves a very sticky, clear strip on both of its sides. Another fabric may then be laid over to which it will stick and be ready for sewing. This will eliminate any slipping and help prevent leakage in the seams.

Width 1/4" - Roll Length 60 Yards

Item #	One Roll	Ten Rolls
SEAMTAPE1/2.....	\$12.90.....	\$11.30

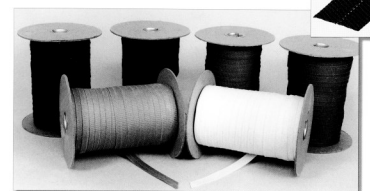

Coil Spring Shock Cord Hooks

Black Nylon Coated - Fits 1/4" Shock Cord
