

2016 FORD TAURUS

Ford Taurus delivers what buyers of large sedans really want – technology, design refinement, craftsmanship and great driving dynamics. The 2016 Taurus introduces upgraded SYNC® 3 technology and three new colors – Shadow Black, Blue Jeans and Guard.

PRODUCT HIGHLIGHTS

- Available lane-keeping system gives Taurus drivers audible and visual alerts if the car drifts beyond visible lane markings without a turn signal activated, and uses electric power-assisted steering to help the driver stay in the lane*
- Power-adjustable pedals with memory standard on Taurus Limited and SHO
- Intelligent Access with push-button start and reverse sensing system available on SEL, standard on Taurus Limited and SHO
- Three new available colors: Shadow Black, Blue Jeans, Guard

*Driver-assist features are supplemental and do not replace the driver's attention, judgment and need to control the vehicle.

Engines: 3.5-liter Ti-VCT V6, standard; 2.0-liter EcoBoost® I-4, optional on SE, SEL, Limited; 3.5-liter EcoBoost® V6, standard on Taurus SHO; front-wheel drive, standard; all-wheel drive, optional

Transmission: Six-speed SelectShift® Automatic with sport mode

Series: SE, SEL, Limited, SHO

Production location: Chicago Assembly Plant, Chicago

STANDARD/SAFETY

- AdvanceTrac® with electronic stability control
- Second-generation first-row airbags, seat-mounted side airbags
- Belt-Minder® for driver and first-row passenger
- Energy management system pretensioning for height-adjustable front-row safety belts
- LATCH (Lower Anchors and Tether Anchors for Children)
- Rearview camera

MULTICONTOUR SEATS

Taurus offers class-exclusive multicontour seats with Active Motion®, providing a soothing, gentle lumbar massage through the first-row seats. The patented Active Motion function is a slight continuous movement in the seat cushion, which helps reduce potential back pain by provoking a change in the musculature activation of the pelvic area.

Ti-VCT

The standard 3.5-liter V6 and the available 2.0-liter EcoBoost four-cylinder engines feature twin independent variable camshaft timing that precisely times valve opening and overlap events to continuously optimize engine performance.

Green

Did you know? SYNC 3 – Ford's all-new communications and entertainment system – features conversational voice recognition, easy-to-use smartphone-like touch screen and easier-to-understand graphical interface.
