Ushering in Next Generation Foam Technology

GreenScreen Certified™ chemical hazard assessments require a comprehensive toxicological review of 18 human health and environmental hazard endpoints, including carcinogenicity, reproductive and developmental toxicity, acute and chronic aquatic toxicity, endocrine activity, persistence, and bioaccumulation. **Clean Production Action** promotes the use of inherently safer chemicals in products and manufacturing. Clean Production Action designs and delivers strategic solutions for green chemicals, sustainable materials and environmentally preferable products.

Fluorine free foam is defined as no intentionally added PFAS chemicals in the foam concentrate formulation.

Knockdown Class A

Environmentally acceptable Knockdown, is a unique formulation which is UL listed as a wetting agent at 0.3% for Class A and Class B fires. USDA (5100-307A) approved for aircraft, water scoopers, fixed buckets, helicopters and ground engines. Premix, when using potable water is stable for more than 30 days and is excellent for use with Compressed Air Foam Systems (CAFS).

Universal^{F3} Green 3%-3%

A superior quality 3% synthetic fluorine free foam concentrate UL/ULC and LASTfire listed for hydrocarbon and polar solvent in fresh and saltwater for fixed systems and fuel in depth fires. A patented formulation produces a vapor sealing blanket of foam that rapidly spreads over the surface to provide rapid command and control at the scene.

Muni^{F3} Green Plus 3%

A superior synthetic fluorine free foam specially designed for municipal firefighters attacking Class A and Class B fires. The UL/ULC listing for Muni^{F3} Green Plus 3% covers various blends of gasoline from unblended through E5, E10 and up to E15 fuel. A patented formulation produces a vapor sealing blanket of foam that rapidly spreads over the surface of the fuel to rapidly control and suppress.

Muni^{F3} Green 3%

A reliable synthetic fluorine free foam concentrate for municipal and rural firefighting of Class A and Class B hydrocarbon fires. Formulated for various spill fires of gasoline, diesel fuel, and aviation kerosene. Can also be used as a wetting agent in combating structural fires and fires containing wood, paper and tires.

Avio^{F3} Green KHC

A new breakthrough in the aviation industry. This 100% biodegradable product is the world's first film-forming fluorine free foam with ICAO Level C certification, which requires 40% less foam concentrate and water versus ICAO B. Avio^{F3} Green KHC is designed for extinguishing and securing flammable Jet A and Jet A1 aviation fuel. Designed for ARFF vehicles, oscillating monitors and handlines.

“Until today, no certification existed for PFAS-free firefighting foam products, or that evaluated all chemicals used in these products for their human and environmental health hazards.” — **Dr. Mark S. Rossi, Executive Director of the non-profit organization, Clean Production Action.**
