

Volkswagen T3 Factory Paint Colors & Codes

Format: Paint Name (paint code) [sales code]

The paint code is found on the build sheet sticker located near the fuse panel. The paint sales code is found on the stamped ID plate inside the left front seat pedestal: Single colors are repeated (ex. S8S8), two-tone colors are individual (ex. D6T3). All non-metallic paints are single-stage from the factory; all metallic paints are two-stage.

Two-tone colors begin on page 6. Westfalia pop-top/high-top paint color codes are unknown.
