# Tox Explorer Collection

## An all-in-one LC-MS/MS solution for toxicology

Toxicology laboratories face many challenges, including the need to detect an ever-increasing number of substances at ever-decreasing concentrations. The Thermo Scientific™ Tox Explorer™ Collection allows the world's toxicology community to navigate with ease to solve complex analytical challenges and increase their laboratory's productivity.

- An all-in-one LC-MS/MS toxicology solution
- Analyze a wide range of drug compounds and their metabolites
- A customizable, single software solution
- HRAM and QQQ MS platforms
- Comprehensive training and support

**Media Statement:** The American Academy of Forensic Sciences (AAFS) does not comment on forensic cases or medicolegal investigations. Media releases will be issued by the AAFS Board of Directors only in response to matters deemed pertinent to the business of the Academy. The sitting AAFS President is the only member of the Academy authorized to provide comment on behalf of the Academy. Comments, views, and opinions expressed by all other members of the Academy reflect the comments, views, and opinions of the individual solely.

**Registrant Minimum Age:** Registrants and presenters at the AAFS Annual Conference must be at least 18 years old at the time of the conference.

**Lost Badge Policy:** Lost, misplaced, stolen, or forgotten badges will incur a replacement fee equal to the original purchase amount of your registration. If your badge was complimentary, the fee will be the current, on-site rate.

**Author Information:** The *Journal of Forensic Sciences* encourages authors to submit previously unpublished reports and papers presented at the AAFS annual conference. For full instructions on manuscript preparation, consult the Information for Authors available at: <https://www.aafs.org/resources/journal-of-forensic-sciences/information-for-authors/>.

Manuscripts must be submitted electronically via the *Journal of Forensic Sciences* Manuscript Central site: <http://mc.manuscriptcentral.com/jofs>. For questions, please contact: [jfs.editor@att.net](mailto:jfs.editor@att.net).

### Reminders:

- Video and/or audio recording of any session(s) or parts thereof is not permitted without prior approval from the American Academy of Forensic Sciences.
- English is the official language of the AAFS and its meetings; neither oral nor written translations will be provided.
- Although precautions are taken to prevent schedule changes, speakers and program schedules may change due to unforeseen circumstances.
- As a courtesy to others, please silence your cell phone when attending the sessions.
- Any inappropriate comments and behavior or other disruptions during a presentation will not be tolerated and may result in being removed from the session.

# SEXUAL MISCONDUCT RESOURCES AND INFORMATION

---

AAFS takes the safety of its meeting attendees seriously and strives to promote a welcoming experience for all. In order to promote a safe environment for meeting attendees, we have resources for meeting attendees about sexual misconduct.

## What is sexual misconduct?

Sexual misconduct is an umbrella term that includes different types of sexual violence, including sexual harassment and sexual assault. (<https://www.rainn.org/types-sexual-violence>)

## What is sexual harassment?

Sexual harassment includes unwelcome sexual advances, requests for sexual favors, and other verbal or physical harassment of a sexual nature in the workplace or learning environment, according to the Equal Employment Opportunity Commission. ([https://www.rainn.org/articles/sexual-harassment?gclid=CjwKCAjw2P-KBhByEiwADBYWCqz0g1E4mRJRxf5TN-EQ-JYXo2Q7USO-Yrtu1c9klaUmTmrEtpmsaxoCbiQQAvD\\_BwE](https://www.rainn.org/articles/sexual-harassment?gclid=CjwKCAjw2P-KBhByEiwADBYWCqz0g1E4mRJRxf5TN-EQ-JYXo2Q7USO-Yrtu1c9klaUmTmrEtpmsaxoCbiQQAvD_BwE))

## What is sexual assault?

The term sexual assault refers to sexual contact or behavior that occurs without explicit consent of the victim. (<https://www.rainn.org/articles/sexual-assault>)

## What do I do if I experience sexual misconduct during the annual conference?

- Call 911.
- Call the AAFS “safe person” number below or contact another member of the AAFS staff.
- Locate security personnel at the conference venue.
- Report conduct to the AAFS Ethics Committee.
- Refer to the resources list below.

## What do I do if I have witnessed sexual misconduct during the annual conference?

- Talk to the victim/survivor. Encourage them to review this resource page.
- Direct them to the AAFS ‘safe person’ or another member of the AAFS staff
- Direct them to security personnel at the conference venue.
- If the person is in immediate danger, call 911.

# CONFERENCE EXTRAS

The 2024 conference offers not only top-tier educational content, but a number of ways for you to enjoy Denver, connect with fellow attendees, and maximize your experience throughout the week. Check out some of the below opportunities offered to attendees of the AAFS Annual Conference:

## SUNDAY – FEBRUARY 18

Reception | 2:30 PM

Puck Drop | 4:00 PM

### AAFS Hockey Night

Arriving early in Denver? Kick off the conference with the Stanley Cup-winning Colorado Avalanche as they take on the Arizona Coyotes! AAFS attendees will have special seats for the game, along with pre-game food, drinks, and networking.

Note: This event is ticketed and is not included in your registration. You may purchase additional tickets for any guests you may wish to invite, even if they are not registered for the main conference itself. Tickets must be purchased by January 31. Transportation to the arena is not included.

Cost: \$150 per ticket

## SUNDAY – FEBRUARY 18 | 7:00 PM

### Film Screening – Just Mercy

Join AAFS for a special screening of *Just Mercy*, the powerful and thought-provoking 2019 biopic illustrating the true story of 2024 Keynote Speaker and renowned lawyer Bryan Stevenson and his history-making battle for justice for a wrongly condemned death row prisoner.

Cost: Free

## MONDAY – FEBRUARY 19 | 2:00 PM

## TUESDAY – FEBRUARY 20 | 2:00 PM

### Facility Tour: Denver City/County Office of the Medical Examiner

Take a peek inside the world-class facility home to the Denver Medical Examiner/Coroner teams. Specially designed to support the City and County of Denver, the office investigates over 2,000 deaths annually. Their team is opening their doors to allow AAFS attendees a special look at how they operate to support the region. Limited space will be available, and tours will be approximately 1-1.5 hours. Transportation to/from the facility will be provided.

Special thanks to Denver Chief Medical Examiner James Caruso for partnering with us to offer this opportunity.

Cost: Free

## FRIDAY – FEBRUARY 23 | 7:00 PM

### Closing Celebration: “Party on the Peak”

We’re wrapping up the week with a special celebration, themed around the mountains and skiing of Colorado. Taking place Friday evening, your ticket includes music, food, entertainment, and more. Wear your best “chalet chic” or “flannel fun” and close out the conference with your friends and colleagues!

Note: This event is ticketed and is not included in your registration. You may purchase additional tickets for any guests you may wish to invite, even if they are not registered for the main conference itself. All guests must be 18 years or older.

Cost: \$50 per ticket

# AWARDS

## R.B.H. Gradwohl Medallion

*John D. McDowell, DDS, MS*

Dr. McDowell is a Professor Emeritus from the University of Colorado School of Dental Medicine and is a retired professor from the University of Colorado School of Medicine. Dr. McDowell is board certified by the American Board of Forensic Odontology. He is presently associate medical examiner for the city and county of Denver, CO. He is a past president of the American Academy of Forensic Sciences (AAFS) and a Distinguished Fellow of the AAFS. Dr. McDowell is past chair of the Forensic Sciences Foundation, the AAFS Executive Committee, and many other positions within the AAFS. He has also served as President of the American Society of Forensic Odontology. He has been published extensively in the fields of diagnostic sciences, forensic odontology, pathology, domestic violence, and HIV and has contributed to radiology, dermatology, and otolaryngology textbooks.

Dr. McDowell has a long and distinguished career in academia and shared governance at the University of Colorado. He has served three terms as Chair of the Faculty Council of the University of Colorado System's four campuses, two terms as President of the Faculty at the Health Sciences Center, and three terms as President of the Faculty Senate at the University's School of Dental Medicine. He has received multiple teaching awards and has received the Professor of the Year Award. Because of his contributions to shared governance at the University, he was selected to be a one-year Administrative Fellow for the University of Colorado's Board of Regents.

Dr. McDowell operates a forensic odontology consulting firm, McDowell Professional Consulting, based in Castle Rock, CO. He has been an expert witness in many standard of care issues across the United States. He has worked with many local, state, regional, and federal agencies, including coroners' and medical examiners' offices. Although Dr. McDowell is retired from full-time teaching, he is still presently very active in providing continuing education courses.

Dr. McDowell is a retired colonel in the United States Army Reserves where he served in multiple command positions, including several years as a Command Dental Surgeon and as a United States Army Hospital Commander. He has received multiple awards from the Department of Defense, including the prestigious Legion of Merit Award. Dr. McDowell also has served as a consultant to the United States Senate's Subcommittee on Missing and Killed in Action.

## Attend the AAFS Annual Business Meeting for a Chance to Win a Complimentary Meeting Registration!

The Annual Business Meeting of the Fellows and Members of the AAFS will be held on Wednesday, February 21, at 4:15 PM. It is essential that all Fellows and Members attend this very important meeting in order to reach a quorum for the voting process. Agenda items include the election of 2024-25 Officers, consideration of bylaw amendments, a summary of AAFS activities during the past year, and plans for the future.

As an incentive to attend, all Fellows and Members present will automatically be entered in a drawing for a complimentary meeting registration to attend the 2025 AAFS Annual Scientific Conference in Baltimore, MD.

# CONTINUING EDUCATION

---

## General Information

---

All meeting sessions are lectures with one or more speakers. Continuing professional education credits will be offered for physicians, dentists, and attorneys. Continuing education credit applications will be submitted for physicians, nurses, and dentists. Attorneys may request CLE credit; please see the "Legal" section.

To register for continuing education credit, please complete the appropriate section on the meeting Registration Form. An individual must be a registrant to obtain continuing education credit. Fees charged for continuing education credits are based on projected costs of providing the various types of continuing education credit. The AAFS has adopted a user-pay approach so that those individuals who benefit from the specific continuing education program are responsible for the costs incurred.

In order to be in compliance with accrediting organizations, introductions and breaks have been deducted from the total hours. Please note that continuing education credit is not available for all sessions. All continuing education credit recipients will receive certificates with the number of continuing education hours awarded. Attendance reports are filed with the appropriate state or national agency, as required.

## Learning Objectives of the AAFS Continuing Education Program

---

- Recognize the perspectives and roles of the various forensic science disciplines
- Assess current concepts and practices
- Discuss relevant forensic science issues related to science, evidence and the law
- Identify strategies for researching descriptive studies, technology and methods, diagnostics, interpretation and testimony
- Review administrative functions performed by forensic scientists

## American Board of Criminalists Approval

---

The American Academy of Forensic Sciences (AAFS) is approved by the American Board of Criminalistics (ABC) to offer continuing education points for approved workshops for criminalists and forensic scientists. The ABC maintains responsibility for the program, and credit may be awarded to ABC Fellows, Diplomates, and Affiliates.

## Overall Purpose and Objective Statements for Major Aspects of AAFS Programs

---

### *Workshops and Special Sessions*

**Purpose:** To provide an opportunity for experts to present material and to lead discussion and practical exercises related to forensic science methods, procedures, diagnosis, investigation, professional relations and practices, communication, administration, and professional development.

**Learning Overview:** Detailed individually in each workshop and special session announcement and description.

### *Plenary and Keynote Sessions*

**Purpose:** To provide a multidisciplinary presentation and discussion of issues related to the forensic science profession.

**Learning Overview:** Attendees will be able to: a) identify the challenges the forensic science profession has faced and will continue to face in terms of ensuring quality; b) identify ways to deal with the variances each challenge presents; and c) identify the entities which have influence over setting the quality standards in the field of forensic science.

### *Oral and Poster Section Scientific Sessions*

**Purpose:** To provide an opportunity for presentation and discussion of case reports, descriptive studies, review presentations, research, administrative issues, and investigative/diagnostic methods regarding topics and issues of importance to a primary discipline among the forensic sciences.

**Learning Overview:** To meet the educational objectives stated by each presenter for his/her/their presentation.

### *Last Word Society*

**Purpose:** To provide a retrospective forensic analysis of historical events and to provide education about the history and evolution of forensic sciences as well as the modern methods and technologies used to re-examine past events of forensic science interest. Emphasis is placed on the evaluation of the original opinions and case outcome and on the development of newer hypotheses based on the re-analysis.

**Learning Overview:** To meet the educational objectives stated by each presenter for his/her/their presentation.

# CONTINUING EDUCATION

---

## Guidelines For Claiming Credit

---

As the sponsor of Continuing Education Credit, the AAFS recognizes that the forensic science disciplines are inextricably linked and that interdisciplinary knowledge is critical to promote competence in forensic practice. As a result, the claiming of credit for various continuing education activities related to medicine, dentistry, law, and other forensic disciplines need not be limited to one's primary professional specialty. For example, a forensic pathologist from the Pathology/Biology Section may gain very useful and relevant information by attending a presentation in the Anthropology Section scientific session. It is appropriate to claim continuing medical education credit for that session. Many other examples exist where the claiming of continuing education credit is appropriate for attending sessions that cover material related to, but which lay outside of, one's primary professional area of expertise.

It is the conference attendee's responsibility to document which program sessions were attended and to determine those sessions for which continuing education credit may be claimed. The AAFS operates under the assumption that meeting attendees will, in general, be unlikely to attend sessions that will not be beneficial to their professional practice and that the claim for continuing education credit is justified if a session contains scientific or practice-related information that may bring new knowledge, may affirm current knowledge, or may provide information that could possibly modify one's professional practices.

Those who wish to receive continuing education credit must register and pay the Continuing Education Credit fee on the meeting Registration Form. CE Credit Request Forms will be available on the AAFS website. The completed forms must be returned to AAFS by the designated deadline.

## Joint Accreditation Statement

---

JOINTLY ACCREDITED PROVIDER  
INTERPROFESSIONAL CONTINUING EDUCATION

In support of improving patient care, this activity has been planned and implemented by the Postgraduate Institute for Medicine and the American Academy of Forensic Science. Postgraduate Institute for Medicine is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

## Physician Continuing Medical Education Credit

---

The Postgraduate Institute for Medicine designates this live activity for a maximum of 44.75 AMA PRA Category 1 Credit(s)<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## Dental Continuing Education Credit

---

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Postgraduate Institute for Medicine and the American Academy of Forensic Sciences.

Postgraduate Institute for Medicine is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of the credit hours by boards of dentistry. The Postgraduate Institute for Medicine designates this activity for 44.75 continuing education credits. Concerns or complaints about a CE Provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at [www.ada.org/cerp](http://www.ada.org/cerp).

## Legal Continuing Education Credit

---

Continuing legal education credit will be awarded on an hour-for-hour basis. Attorneys may file the AAFS-issued CLE certificate with their respective state bars.

## Non Physician Continuing Education Credit

---

A general non physician certificate of attendance will be available.

## General Continuing Education Credit

---

General continuing education credit is offered for those practicing the various forensic science disciplines not represented in the aforementioned list.

## Nursing Continuing Education Credit

---

The Postgraduate Institute for Medicine designates this live activity for a maximum 44.75 Continuing Nursing Education (CNE) credits. Nurses should claim only the credit commensurate with the extent of their participation in the activity.

# DIVERSITY AND INCLUSION IN FORENSIC SCIENCE FORUM AND RECEPTION

---

*Open to All Meeting Registrants*

Tuesday, February 20, 2024

8:00 PM - 10:00 PM

---

*Moderated by the AAFS Diversity Outreach Committee*

The goal of the Diversity Outreach Committee (DOC) Session is to enlighten and initiate dialogue regarding diversity, equity, and inclusion initiatives within the AAFS and the greater forensic science community. Participants will hear from an invited speaker on their perspectives and experiences on issues related to diversity and inclusion. The DOC hopes that this interactive session will promote dialogue on navigating diversity, equity, and inclusion within forensic science throughout an everchanging social climate.

*Reception sponsored by:*

## MENTORSHIP PROGRAM BREAKFAST

---

*Pre-Registration Encouraged*

Wednesday, February 21, 2024

7:00 AM – 8:15 AM

---

The 2024 Mentorship Program Breakfast is for those who expressed an interest when registering for the conference. This breakfast will bring together those mentees and mentors who are willing to help guide personal growth within the individual AAFS sections.

For those unable to make it to Denver, or have a conflict that morning but are interested in the Mentorship Program, please let us know by contacting [mentorship@aafs.org](mailto:mentorship@aafs.org).

# STUDENT ACADEMY

---

*Pre-Registration Required (\$25/Person)*

Tuesday, February 20, 2024

9:00 AM - 2:00 PM

---

The purpose of the Student Academy of Forensic Sciences is to bring to the attention of high school students the vital importance of the application of scientific principles to the administration of justice. It acquaints the participants with the role of the forensic science disciplines in the legal system as well as the education and training required for the career in each discipline.

**Learning Overview:** Upon completion of this session, the participant should be able to understand the process of accreditation through the AAFS FEPAC mechanism and be able to participate in the process as a reviewer of academic programs. Participants from academic programs will also learn about the process of accreditation from different perspectives.

**Program Description:** This session has been developed to assist academic institutions offering undergraduate and graduate degree programs in forensic science and forensic digital evidence to prepare for the accreditation process through the FEPAC. This session will also assist future on-site evaluators (academic and practitioners) to prepare for on-site evaluations of academic programs. Successful completion of this one-day session will qualify participants for consideration to serve as on-site evaluators for FEPAC in the future (please note that participants must still meet other FEPAC requirements, such as membership in the AAFS and designation as either a practitioner or academician). This training session will highlight updates to the FEPAC Standards for Accreditation and provide valuable information for both program directors and on-site evaluators.

The FEPAC is a standing committee of the AAFS with a membership that includes five educators, five forensic science practitioners, and a public member as voting members. The mission of the FEPAC is to maintain and enhance the quality of forensic science education through a formal evaluation and recognition of college-level academic programs. The primary function of the committee is to develop and maintain standards and to administer an accreditation program that recognizes and distinguishes high-quality undergraduate and graduate forensic science programs. Forty academic programs have successfully completed the accreditation process since 2003. Additional information on FEPAC can be found on the FEPAC website: <https://www.aafs.org/FEPAC>.

**Program:**

8:30 AM - 9:00 AM	<b>Introduction and Welcoming Remarks/Module 1: What to Know About FEPAC</b> <i>Heidi Eldridge, PhD</i>

**Program Description:** This half-day Interdisciplinary Symposium will discuss the influence of forensic science on the concept of Justice for All. Presentations on forensic science's foundational principles, ethics, and evolving definitions will be explored through an in-depth discussion of the Sydney Declaration. The importance of scientific rigor and the role of transparent utilization of knowledge grounded in proper forensic science principles in ensuring the preservation of fair and just judicial and humanitarian outcomes will be highlighted by presenters discussing forensic science policy and context-specific challenges impacting innocence work and wrongful convictions. The last half of the symposium will be focused on understanding similarities and differences in the past and current real-world application and role of forensic sciences to the justice system in the United States, the United Kingdom, and South Africa/Africa. The aspiration of working toward a world where there is *Justice for All* is in the hearts of many forensic scientists. This presentation will discuss the application of forensic science to the basic human right of access to justice and open discussion about the future of the intersection of societal needs, science, and law.

**Educational Objectives:** Upon completion of this workshop, attendees will: (1) articulate the basic principles outlined in the Sydney Declaration and describe its significance; (2) discuss reasons why scientific rigor and transparent application of science grounded in proper forensic science principles is critical to ensuring justice; and (3) explain some of the similarities and differences in the application of forensic sciences to justice in the United States, United Kingdom, Australia, and South Africa/Africa.

## Special Documentary

Tuesday, February 20, 2024

4:00 PM – 5:30 PM

The FSF and HHRRC are pleased to offer AAFS attendees a special viewing of *El Equipo*, a documentary focusing on legendary anthropologist and AAFS Fellow Dr. Clyde Snow and his work with Latin American forensic students investigating disappearances in Argentina during the “dirty war.”

**Film Description:** Legendary U.S. anthropologist Dr. Clyde Snow sets out to train a new group of Latin American students in the use of forensic anthropology. Their goal: to investigate disappearances in Argentina during the “dirty war.” The group expands its horizons, traveling to El Salvador, Bolivia, and Mexico, doggedly working behind the scenes to establish the facts for the families of the victims.

**Bryan Stevenson**

**Montgomery, AL**

Bryan Stevenson is the founder and Executive Director of the Equal Justice Initiative (EJI), a human rights organization in Montgomery, AL. Under his leadership, EJI has won major legal challenges eliminating excessive and unfair sentencing, exonerating innocent death row prisoners, confronting abuse of the incarcerated and the mentally ill, and aiding children prosecuted as adults. He is a graduate of the Harvard Law School and the Harvard School of Government.

Mr. Stevenson has argued and won multiple cases at the United States Supreme Court, including a 2019 ruling protecting condemned prisoners who suffer from dementia and a landmark 2012 ruling that banned mandatory life-imprisonment-without-parole sentences for all children 17 or younger. Mr. Stevenson and his staff have won reversals, relief, or release from prison for over 135 wrongly condemned prisoners on death row and won relief for hundreds of others wrongly convicted or unfairly sentenced.

Mr. Stevenson has initiated major new anti-poverty and anti-discrimination efforts that challenge inequality in America. He led the creation of two highly acclaimed cultural sites that opened in 2018: the Legacy Museum and the National Memorial for Peace and Justice. These new national landmark institutions chronicle the legacy of slavery, lynching, and racial segregation, and the connection to mass incarceration and contemporary issues of racial bias.

Mr. Stevenson's work has won him numerous awards and he has received over 40 honorary doctoral degrees, including degrees from Harvard, Yale, Princeton, the University of Pennsylvania, and Oxford University. He is the author of the critically acclaimed *New York Times* bestseller, *Just Mercy*, which was named by *Time Magazine* as one of the 10 Best Books of Nonfiction for 2014 and has been awarded several honors, including the American Library Association's Carnegie Medal for best nonfiction book of 2015 and a 2015 NAACP Image Award. *Just Mercy* was recently adapted as a major motion picture. AAFS will present a free screening of the film on Sunday, February 18, at 7:00 PM.

**Overview:** Science, as a general discipline, is the practice of using systematic, rigorous observation, experimentation, and testing of theory-based hypotheses in environments over which the scientist has some control or can control for in their analyses. Though “science” is often used to describe a vocation, it is actually a philosophy. Science is a way of thinking, answering questions, and building an understanding of the world and the things and people in it. Forensic science, as a subdiscipline of general science, is broadly defined as the application of science to matters of the law. The tasks undertaken by forensic scientists incorporate many features seen in other types of science (i.e., practitioners must obtain and analyze evidence, interpret results, and provide critical information to support or refute hypotheses); however, there are some notable differences.

As opposed to most conventional scientific endeavors, in which debates over hypotheses and conclusions occur between scientists themselves and primarily in the academic realm, the practices of forensic science operate in a unique arena in which results are routinely presented to non-scientists (e.g., law enforcement professionals and triers of fact), with some cases finding their way into courts of law. This requires forensic scientists to navigate the differing interests, values, and/or needs of law enforcement, the legal community, public safety, individual liberty, and public perception all within an adversarial legal system staffed by professionals with varying degrees of scientific literacy.

Complicating matters further, forensic work, although typically performed under the direction and auspices of law enforcement and prosecutorial agencies, may also be performed under the direction of defense counsel or other agencies, lending an inherent view that forensic practices are biased. Although there are an increasing number of so called “independent” forensic laboratories, experts, or organizations, many of these entities still operate within a government structure which, although less direct, may still be subject to certain subjective pressures providing the appearance of bias.

## ***The Intersection of Science and Justice: Does Forensic Science Have a Role in Ensuring Justice for All?***

### **Overview cont.**

Scientists and forensic experts should strive for impartiality and objectivity at all times. Ideally, they should be the most objective component in any legal system as they must adhere to the facts, and present only information and opinions supported by a thorough scientific analysis of evidential data and/or a methodical consideration of information empirically demonstrated in the literature. Beyond the traditional forensic setting, some would hold that the scientist's role should remain the same, with an impartial view of the world and opinions limited to matters strictly in accordance with scientific or legal inquiry. Others, however, view the scientist's role as one that should go beyond this setting, into the public domain, where their objective pursuits of the truth could lend expertise toward improving matters of social significance.

"Justice for All," as a mantra, is a pervasive societal theme with a significant presence in both the forensic and legal realms, as any individual accused of committing a crime is entitled to due process in the same manner as any other individual, regardless of demographics. This theme, however, is more often associated with philosophical discussion within legal circles, rather than matters of scientific significance. The purpose of this session will be to examine the concept of "Justice for All" from the perspective of the forensic scientist, with the goal of elucidating what role, if any, the forensic scientist may play toward ensuring fairness within the larger legal context.

Some of the questions to be discussed during this session include: Does forensic science play a role in ensuring "justice for all"?; Do forensic scientists have an obligation in this matter and, if so, to what extent?; What measures are being taken to ensure forensic science produces equitable results?; And, what further work needs to be done to bring forensic sciences closer to these goals?

## CB1 The Boundaries of Judicial Discretion in Admitting Forensic Scientific and Technical Evidence

Tuesday, February 20, 2024

7:15 AM – 8:15 AM

CE Hour: 1.0

---

**Stephanie Domitrovich, JD, PhD**  
Senior Judge  
Administrative Office of PA Courts  
Erie, PA

**Milton Nuzum III, JD**  
Former Judge  
Vincent, OH

**Program Description:** In this presentation, Judge Stephanie Domitrovich and former Judge Milt Nuzum will facilitate an interactive dialog with the session attendees as they examine a series of cases and scenarios that test the limits of a trial judge’s judicial discretion in admitting scientific and technical forensic evidence. Attendees will analyze a series of scenarios based on actual cases and place themselves in the role of a trial judge in making decisions on admissibility of the evidence in each scenario.

**Educational Objectives:** The goals of this presentation are: (1) to examine a series of cases and scenarios that test the limits of a trial judge’s judicial discretion in admitting scientific and technical forensic evidence; and (2) to help attendees understand the Rules of Evidence and relevant case law that establish the guidelines a trial judge must follow in making critical decisions on the admissibility of scientific and technical forensic evidence.

**Impact on the Forensic Science Community:** Attendees will analyze a series of scenarios based on actual cases and place themselves in the role of a trial judge in making decisions on the admissibility of the evidence in each scenario. This dynamic presentation will impact the forensic science community by enabling prosecutors, defense attorneys, judges, and expert witnesses to be prepared to successfully face the scrutiny of the court when seeking admissibility of scientific and technical forensic evidence in cases where the outcome likely hinges on the testimony of an expert witness.

## CB2 Xylazine—An Emerging Cause of Death in Correctional Institutions

Tuesday, February 20, 2024

8:30 AM – 9:30 AM

CE Hour: 1.0

---

### Marie E. Lasater, MD

Coroner

Texas County Government

Licking, MO

**Program Description:** The unregulated veterinary drug xylazine is emerging as a cause of death in state correctional facilities. Unlike the drug fentanyl, there is no antidote. The origins and toxicity of the drug are discussed and illustrated with a case study of an offender death due to xylazine mixed with fentanyl.

**Educational objectives:** The goals of this presentation are to: (1) identify physical symptoms of xylazine use, (2) identify treatment for xylazine overdose, and (3) obtain proper toxicology samples in case of fatal overdose.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by informing attendees that the importance of recognizing signs/symptoms of xylazine use cannot be overstated. As an emerging drug, xylazine is not always included in basic forensic panels, so expanded testing is recommended. Xylazine has no approved antidote for humans. It is NOT a federally controlled substance, so has the propensity to be easily obtained.

## CB3      **Vacuous Accreditation: The Illusion of Quality in Forensic Science**

Wednesday, February 21, 2024

7:15 AM – 8:15 AM

CE Hour: 1.0

---

**Tiffany A. Roy, JD, MSFS**

Forensic DNA Expert  
ForensicAid, LLC  
West Palm Beach, FL

**Kimberly S. Kunkler, PhD**

Assistant Professor  
Marshall University  
Huntington, WV

**Program Description:** This presentation will call attention to gaps in the quality oversight structure by questioning the current perceptions of forensic laboratory accreditation, highlighting its strengths and limitations, providing specific examples of where failures have occurred, and discussing potential opportunities for improvement.

**Educational Objectives:** This presentation is intended to highlight common misconceptions regarding accreditation and quality assurance in United States forensic laboratories. Accreditation is often misdescribed by practitioners and misunderstood by judges and juries. As a result of participation in this presentation, attendees will gain a clearer understanding of the role of forensic laboratory accreditation in the United States, including its strengths and limitations.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by fostering discussion about what meaningful and effective forensic science oversight would look like in the United States and why current accreditation frameworks are insufficient to ensure production of accurate and reliable forensic results. This presentation will draw the attention of justice partners to the need for statutory oversight of forensic science on the state and federal level in the image of the Texas Commission on Forensic Science.

## CB4 2023 State Legislative Encroachments Against Forensic Pathology Professionalism and Independence: Harbingers of Future Threats and the Opportunity for Strategic Planning and Action

Thursday, February 22, 2024

7:15 AM – 8:15 AM

CE Hour: 1.0

---

### M.J. Menendez, JD

Senior Fellow/General Counsel  
CFSRE  
Willow Grove, PA

### Joyce L. deJong, DO

Professor and Chair  
Department of Pathology  
Western Michigan University  
Homer Stryker M.D. School of Medicine  
Kalamazoo, MI

**Program Description:** In 2023, the independence of forensic pathology in the context of Medicolegal Death Investigations (MDI) was directly attacked by the introduction of various state legislative proposals and bills passed into law. These legislative proposals and laws erode the ability of forensic pathologists to maintain impartiality and objectivity, mandate particular findings on death certificates, and allow non-physicians to perform autopsies. The cause for alarm is heightened by the apparent lack of scientific and medical underpinnings in the bills and laws. This program will address threats to the independence and neutrality of MDI and the medical practice of forensic pathology.

**Educational Objectives:** After attending this presentation, attendees will understand the importance of monitoring and evaluating state legislative proposals through a prioritized, anticipatory process. Vigilance in monitoring is warranted due to the recent uptick in legislative proposals and passed bills that dictate processes and outcomes in MDIs. The information obtained by attendees will enable proactive and informed responses to proposed legislation that encroaches on the independence of forensic pathology and MDI.

**Impact on the Forensic Science Community:** This presentation impacts the forensic science community by exposing threats to the independence and neutrality of MDI and the medical practice of forensic pathology and by encouraging forward-leaning responses to ward off such threats.

## CB5      **Protecting the Innocent: The Urgent Need to Research When, and Under What Circumstances, DNA Evidence Can Lead to Wrongful Convictions**

Friday, February 23, 2024

7:15 AM – 8:15 AM

CE Hour: 1.0

---

### **J.D. Schmid, JD**

Public Defender

Sixth District Public Defender's Office

Duluth, MN

**Program Description:** This presentation will address how two recent trends in forensic DNA analysis require stakeholders to re-evaluate the power of DNA evidence to accurately distinguish the guilty from the innocent. First, courts must learn to account for the increased sensitivity of current DNA testing methods and the ensuing risk that DNA recovered from a crime-scene is unrelated to the crime. Second, courts must learn to account for the increased use of probabilistic genotyping software programs and common misunderstandings about the meaning and limitations of the subsample likelihood ratios generated by such programs. Research exploring how each of these trends impacts stakeholders' abilities to distinguish the guilty from the innocent is urgently needed to prevent wrongful convictions.

**Educational Objectives:** The goal of this presentation is to explore the urgent need to further research how recent technological advancements in forensic DNA analysis are impacting the administration of justice in the American criminal court system.

**Impact on the Forensic Science Community:** Several members of the forensic science community have either: (1) identified common misunderstandings about likelihood ratios among lay people, or (2) recognized the impact of highly sensitive testing methods on the detection of irrelevant DNA at a crime scene. The materials discussed in this presentation will impact the forensic science community by hopefully providing empirical guidance to practitioners and decision makers in cases where the presentation of subsample likelihood ratio could lead to a wrongful conviction. This presentation will also hopefully encourage researchers with technical expertise and resources to study whether existing procedural safeguards are sufficient to protect innocent defendants faced with incriminating DNA evidence.

## CB6 New Jersey's Top 10 Most Wanted: Anthony Mota Apprehended

Saturday, February 24, 2024

8:00 AM – 9:00 AM

CE Hour: 1.0

---

### **Anna W. Delaney, MA**

Forensic Anthropologist  
New Jersey State Police  
Hamilton, NJ

**Program Description:** This presentation will cover how the New Jersey State Police Fugitive Unit, New Jersey State Police Office of Forensic Sciences Forensic Anthropology Unit, and the United States Marshal's Office were able to locate and close one of New Jersey's Top 10 Most Wanted cases—the case of Anthony Mota. Even in death, we strive to resolve and provide closure and justice to our victims and their families.

**Educational Objectives:** After attending this presentation, attendees will understand how to execute an international exhumation, gain knowledge of the valuable resources that the United States Marshal's Office can provide for assistance in cases, learn what samples provide the best DNA results, and the importance of documentation throughout a complex case.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by bridging the gap between international agencies working to achieve the same goals, demonstrating how to work collaboratively with multiple agencies across domestic and international jurisdictions, and informing attendees of the resources available from federal agencies.

## CB7      **Operation Death Harvester: How the FBI Is Dismembering the Illegal Trade in Human Body Parts**

Saturday, February 24, 2024

9:15 AM – 10:15 AM

CE Hour: 1.0

---

### **Paul Micah Johnson, PhD**

Special Agent

Federal Bureau of Investigation

Detroit, MI

**Program Description:** This presentation is a case review of the largest human body parts industry investigation in the Federal Bureau of Investigation (FBI) history. Death Harvester was opened by the author as an organized crime case in the Detroit Field Office in 2011. Its purpose was to investigate the illegal sale of human remains for research and education that was taking place through a network of anatomical supply companies. What started with the finding of severed heads in a rusty van ultimately resulted in the seizing of thousands of human remains across the country, the closure of four body donation programs, the arrest and conviction of seven individuals, and the identification, cremation, and return of human remains to hundreds of victim families.

**Educational Objectives:** This presentation will help the attendee to better understand the global trade in human remains for research and education, the common crimes associated with the trade, what has been, and can still be, done to stop the illegal activity, and the roles that forensic science professionals can play.

**Impact on the Forensic Science Community:** The expertise of forensic pathologists and forensic anthropologists is regularly needed in criminal investigations of the human body parts trade, as are the skills of fingerprint examiners and a range of DNA specialists. Having a broad understanding of this industry and its common crimes will better prepare these forensic science professionals to assist with ongoing efforts to stem some of the rampant illegality. Additionally, this presentation will impact the forensic science community by helping all attendees to have a better understanding of the risks associated with donating one's body to science.

## CB8 Online Child Exploitation: Proactive Law Enforcement Strategies

Saturday, February 24, 2024

10:30 AM – 11:30 AM

CE Hour: 1.0

---

### Paul C. Graf, MS

Independent Consultant of Child Abuse Legal Matters  
Sr. Special Agent, NCIS (Retired)  
Castle Rock, CO

**Program Description:** Under any other circumstances, a child sex offender would have to approach a child and converse, which is a much more difficult hurdle in terms of circumstance, intellectual capability, and social functioning. Online communication has dispensed with much of the social skills and verbal communication required to seduce a child, which may have deterred some offenders, and given them direct access to children, many of whom are on-line with little or no adult/parent supervision. In response to this crisis, law enforcement has adopted a number of proactive strategies to enforce child-protective criminal statutes. Those statutes, the communication elements of the internet, and the development of law enforcement efforts in this field will be discussed.

**Educational Objectives:** After attending this presentation, attendees will: (1) learn what conduct on the part of individuals expressing a sexual interest in children is illegal, and what conduct, though possibly objectionable, is protected by United States Constitutionally guaranteed freedoms; (2) learn to identify the various communication elements of the internet; (3) be able to understand how persons expressing a sexual interest in children make use of the various communication components of the internet to contact both persons who share similar interests and potential child victims; and (4) be introduced to several proactive techniques used by law enforcement, and the technology that makes them possible, to target and investigate criminal child sex offenders online.

**Impact on the Forensic Science Community:** Federal statutes prohibit the possession of graphic Child Sexual Abuse Materials (CSAM), the distribution of CSAM images by any means, including computer, the buying and selling of children for the purpose of producing CSAM images, and interstate or foreign travel with the intent to engage in a sexual act with a child. Law enforcement's proactive investigations often involve undercover communication with individuals who display a sexual interest in children; they document exchanges of illegal CSAM and rely heavily on face-to-face undercover meetings. This presentation will impact the forensic science community by delineating what conduct is and is not prohibited by federal and various state laws. A discussion of proactive law enforcement methods will be presented, as well as an explanation of the internet and its communication media components, such as the World Wide Web (WWW), the Dark Web, online gaming platforms, Internet Relay Chat (IRC), chat rooms, newsgroups, and file servers, all with case examples.

## LS1 W.W.G.D. (What Would Gibbs Do?): The Real Work of NCIS Special Agents

Thursday, February 22, 2024

12:00 PM – 1:30 PM

CE Hours:

---

### **Paul C. Graf, MS**

Independent Consultant of Child Abuse Legal Matters

Sr. Special Agent, NCIS (Retired)

Castle Rock, CO

**Program Description:** The duties and responsibilities of a Naval Criminal Investigative Service (NCIS) Special Agent, along with real case examples, will be discussed through the lens of the real-life Jethro Gibbs.

**Educational Objectives:** After attending this presentation, attendees will be familiar with the duties and responsibilities of NCIS Special Agents and understand the similarities, and the many differences, between the *NCIS* television shows and “real life” NCIS work.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by developing awareness of the critical missions of NCIS Special Agents and their role in federal law enforcement.

When this presenter, Paul C. Graf, began his career with the US Naval Investigative Service (NIS), he often said it took well over 20 minutes to tell someone who he worked for and why he was asking so many questions. Now, and since the advent of the wildly popular CBS Television series *NCIS* and its offshoot programs (*NCIS Los Angeles*, *NCIS New Orleans*, *NCIS Hawaii*) the re-named Naval Criminal Investigative Service (NCIS) has become a household word. That said, many viewers still believe it to be a fictional agency and are surprised to hear the presenter spent 33 years conducting criminal, counter-intelligence, counter-terrorism and espionage as a Senior Special Agent of NCIS (aka: The Real Gibbs) Mr. Graf was assigned to offices in Long Beach, CA, Naples, Italy, Newport, RI, Brunswick, ME, and Guantanamo Bay, Cuba. His duties included narcotics investigation, grand larceny, sabotage, espionage, Double Agent Operations, homicide, arson, rape, procurement fraud, cold case homicide, and child abuse investigations, his specialty. In his role as an Executive Protection Supervisor, he led teams of armed Agents who protected military and civilian VIP’s and world leaders, worldwide. Mr. Graf conducted NCIS investigations and operations in 26 countries of the world. Therefore, the duties and responsibilities of an NCIS Special Agent, as seen through the lens of his extensive career, along with real case examples, will be discussed. The Forensic Science Community will, thus, develop an awareness of the critical missions of NCIS Special Agents and their role in Federal Law Enforcement.

## LS2      **Getting Things Started With a Bang: Interpreting Gunshot Sounds in Audio Forensic Analysis**

Thursday, February 22, 2024

12:00 PM – 1:30 PM

CE Hours:

---

**Robert C. Maher, PhD, PEng**

Professor

Montana State University

Bozeman, MT

**Program Description:** This presentation begins with the historical background of gunshot audio interpretation, then provides several fascinating case studies of the current state-of-the art, demonstrating how gunfire sounds can provide essential forensic information. Attendees will learn the essential physical principles of how firearms make sounds and how those sounds are affected by the recording location and the recording system. At the conclusion of the seminar, attendees will understand how to interpret audio waveforms and spectrograms from gunshot audio recordings and how to apply their new knowledge to examples and case studies.

**Educational Objectives:** After attending this presentation, attendees will: (1) understand the basic physical principles of how firearms make sound and how gunshot sounds propagate through the air to the microphone; (2) have viewed waveforms and spectrograms of gunshot sounds, identifying the key features and important details; (3) understand how to interpret and knowledgeably discuss the strengths and weaknesses of various sources of gunshot audio recordings; (4) understand the basic features of contemporary gunshot detection and location systems, such as ShotSpotter™ from SoundThinking, Inc.; and (5) recognize the proper steps in handling user-generated audio evidence in forensic investigations.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by introducing the attendees to gunshot audio forensic examination.

**Program Description:** This presentation will give an overview of the phases of human spaceflight and the unique challenges each phase presents. Past fatal mishaps will be reviewed. The current applicable protocols in regard to human spaceflight medicolegal death investigations, current knowledge gaps, and future challenges to these investigations will be discussed.

**Educational Objectives:** Upon completion of this workshop, attendees should be able to describe the phases of spaceflight and the unique challenges these phases present during a spaceflight death investigation.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing a historical overview of human spaceflight medicolegal death investigations and an overview of current knowledge gaps and challenges for these investigations.

## LS4      **There Is No I in TEAM: The Importance of Leadership, Personal Accountability, and Personality Type in High Stress Work Environments**

Friday, February 23, 2024

12:00 PM – 1:30 PM

CE Hours:

---

### **Charla Skinner Perdue, MFS**

Teaching Faculty II & UG Public Safety & Security Program Coordinator  
Florida State University  
Panama City Campus  
Panama City, FL

**Program Description:** This presentation's goal is to show the importance of the role each person plays in high stress, collaborative work groups that make up many of the various positions in the fields of forensic science. High stress work environments are where the substance of the work is difficult, there is increased pressure to be right, and heavy caseloads and rapid pace take a toll on both mental and physical health. Reducing the stress on the team improves the work culture for everyone.

There is no I in TEAM, but the argument can be made that there should be. The only person whose decisions and actions we can control is ourselves. We will take a quick 11-question multiple choice quiz to determine personality color and then explore how understanding ourselves and just as importantly, how others perceive us, can lead to better workplace interactions, reduce errors and improve the overall quality of our work and our agency culture.

**Educational objectives:** At the completion of this luncheon presentation, attendees will be able to: (1) identify their personality color by completing a short 11-question multiple choice quiz; (2) recognize the characteristics of their personality color and how they may be perceived by others; (3) discuss the importance of using personality color to improve communication; (4) examine studies related to secondary trauma in high stress work environments; (5) relate the concept of stress in the workplace to noise and errors; (6) describe the physical and mental effects of the high stress workplace, both primary and secondary; (7) discern the role one plays in challenging work situations; (8) evaluate the importance of leadership; and (9) explore ways to leverage the team's talents.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by highlighting the benefits of knowing the individual's personality color and the color of those they work with. It will include a brief 11-question multiple choice quiz to identify their personality color, to better understand how others perceive them and consider studies and techniques from the field of sociology to improve how they interact with others. We will examine the importance of leadership as a tool to enhance the workplace culture and how a positive work environment may even reduce errors. By understanding the only person whose decisions and actions we can control is ourselves we can endeavor to improve our high stress work environment for ourselves and everyone on the team.

## **W1 Recommendations From the NIST/NIJ Expert Working Group on Human Factors in Forensic DNA Interpretation**

**Monday, February 19, 2024**

**8:30 AM – 5:00 PM**

**CE Hours: 6.5**

---

**Program Description:** In this workshop, we will walk participants through the National Institute of Standards and Technology (NIST)/National Institute of Justice (NIJ) Expert Working Group on Human Factors in Forensic DNA Interpretation Working Group process and highlight key findings, discuss some of the more controversial topics, and present implementation steps for the recommendations contained within the report.

**Educational Objectives:** Upon completion of this workshop, participants will be familiar with the recommendations in the NIST/NIJ Expert Working Group on Human Factors in Forensic DNA Interpretation report. They will know the implications of these recommendations for their own practice and how the recommendations serve to improve the practice of DNA examination.

Participants will be invited to discuss how relevant and feasible the recommendations are to their own practice and to the wider forensic DNA community.

**Impact Statement:** The study of human factors in forensic science is an essential element to inform our understanding of the interaction between humans and the systems they use. In understanding human factor issues, we can identify and address the potential for error and bias. Furthermore, we can develop ways to shape positive laboratory culture, improve staff morale, and increase work productivity. This workshop presents three years' worth of effort to understand human factors as they apply to forensic DNA interpretation. This effort provides guidance to DNA analysts, laboratory management, and legal practitioners on how to improve practice for safer justice outcomes.

## **W2 Get Fired Up for Improvements to Fire Debris Standards! (Overview, Use, and Implementation of the Major Revisions to ASTM E1618)**

**Monday, February 19, 2024**

**8:30 AM – 5:00 PM**

**CE Hours: 6.75**

---

**Program Description:** Attendees of this workshop will receive information and training on major revisions to the American Society for Testing and Materials (ASTM) E1618. Presenters will discuss why the revisions are needed, explain the new specifications for the ignitable liquid classification system, provide an overview of the performance-driven instrumental analysis requirements, and facilitate implementation of the new interpretation and reporting requirements through practical exercises. Intended as an introductory workshop, attendees will gain experience using these new specifications for classification of ignitable liquids and a practical understanding of how the updated requirements can reduce misattribution or misidentification of ignitable liquids in complex matrix samples.

**Educational Objectives:** After completing this workshop, attendees will: (1) be familiar with the major revisions currently being made to ASTM E1618-19 Standard Test Method for Ignitable Liquid Residues in Extracts from Fire Debris Samples by Gas Chromatography-Mass Spectrometry; (2) understand the potential impact of the revisions on their laboratory's standard operating procedures; and (3) have basic experience in utilization of some of the revisions through completion of practical, hands-on exercises.

**Impact Statement:** The major revisions to ASTM E1618-19 provide additional information that is designed to clarify its requirements and improve consistency of its use in fire debris analysis. This workshop will impact the forensic science community's practice by providing orientation and training related to implementation of the major revisions to ASTM E1618.

## **W3      Machine Learning-Powered SpectrApp: An Open-Source Tool for Analyzing Forensic Spectroscopic Data**

**Monday, February 19, 2024**

**8:30 AM – 5:00 PM**

**CE Hours: 5.5**

---

**Program Description:** Discover SpectrApp (<https://www.spectrapp.unito.it>), an innovative open-source tool developed by the esteemed Department of Chemistry at the University of Turin. Join us for an immersive workshop that showcases SpectrApp's cutting-edge capabilities in forensic spectroscopic data analysis. This user-friendly tool combines advanced machine learning techniques with a seamless interface, catering to both experts and non-experts in the field. Participants will delve into the power of SpectrApp's multivariate data analysis and chemometric strategies, facilitated by the R Shiny environment. Explore a vast array of graphical approaches, including univariate, bivariate, and multivariate visualizations, uncovering intricate patterns within complex datasets. Learn about SpectrApp's support for cluster analysis, Principal Component Analysis (PCA), and other advanced methodologies, such as PLS-Discriminant Analysis (PLS-DA) and PLS-Regression (PLS-R). Witness how SpectrApp enables the prediction of new samples, empowering forensic analysis like never before. Don't miss this enlightening workshop that showcases the potential of SpectrApp to revolutionize the future of forensic science through machine learning and data analysis.

**Educational Objectives:** Upon completion of this workshop, attendees will be able to: (1) familiarize themselves with SpectrApp; (2) utilize multivariate data analysis; (3) master chemometric strategies; (4) navigate graphical approaches; (5) apply PLS-DA and PLS-R; (6) predict new samples; (7) promote machine learning integration; and (8) advance forensic data exploration.

**Impact on the Forensic Science Community:** The session on SpectrApp will have a profound impact on the forensic science community by introducing a transformative tool that leverages Machine Learning for spectroscopic data analysis. Participants will gain invaluable insights and practical skills to navigate the complexities of forensic data, propelling them towards more accurate and efficient analyses. The workshop's educational objectives emphasize the integration of cutting-edge techniques, such as multivariate data analysis and chemometric strategies, enabling forensic experts to extract meaningful information from intricate datasets.

By empowering both experts and non-experts with the user-friendly interface of SpectrApp, the workshop aims to democratize advanced data analysis in forensic science. This accessibility will promote broader adoption and foster a culture of collaboration and knowledge-sharing within the community.

## W5 Forensic Postmortem Radiology and Medicolegal Death Investigations

Monday, February 19, 2024

8:30 AM – 5:00 PM

CE Hours: 6.75

**Program Description:** This workshop is an update on current practices in forensic postmortem radiology and medicolegal death investigations. National and international forensic pathology and radiology practitioners will provide an introduction to and update on best practices in the field.

**Educational Objectives:** After attending this workshop, attendees will: (1) be informed of the different modalities for postmortem radiology; (2) understand the strengths and weaknesses of the different current modalities; (3) learn about the interpretation of the postmortem radiology scans and levels of forensic evidence; and (4) be aware of current advances, collaboration, and potential resources available to interested practitioners.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing attendees with expertise on best practices, interpretation of radiology imaging, and incorporation of forensic postmortem radiology into medicolegal death investigations.

**Target Audience:** Anthropology, General, Pathology/Biology

**Knowledge Level Required:** Basic

## **W6 Don't Know Much About Standards: Incorporating Forensic Science Standards Into University Curricula**

**Monday, February 19, 2024**

**8:30 AM – 12:30 PM**

**CE Hours: 3.75**

---

**Program Description:** During this presentation, representatives from universities and the Forensic Science Education Programs Commission (FEPAC) will present on ways they have incorporated standards into their university programs, examples of specific courses where students' knowledge has been enhanced by such standards, and how to overcome obstacles of changing curriculum to include private sector standards. Representatives from forensic laboratories will present on how hiring practitioners with a knowledge of standards affects their practices, as well as how they are implementing standards into lab training and standard operating procedures. The latter portion of the workshop will be comprised of a panel, including educators, lab managers, young forensic professionals, and recent university graduates, to discuss how forensic standards are changing, and will continue to change, the landscape of forensic education and training.

**Educational Objectives:** After attending this presentation, attendees will have a better understanding of how incorporating standards in an educational curriculum affects students' understanding of the discipline and forensic sciences when they enter post-graduate employment.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by creating greater awareness of how standards are currently being implemented in university level educational programs, and how lab managers have both incorporated standards into their training, and how they use standards for minimum qualifications and education of practitioners.

**Target Audience:** All Disciplines

## W7 Emerging Semi-Synthetic Cannabinoids: THC Isomers and Analogs

Monday, February 19, 2024

8:30 AM – 12:30 PM

CE Hours: 3.75

**Program Description:** This workshop will address the growing semi-synthetic cannabinoid market from both a toxicological and a seized drug chemistry perspective. It will provide an overview of the legislation and scheduling of THC-related compounds in the United States, discuss drug trends in semi-synthetic cannabinoids in both Europe and the United States, and review analytical methods for the separation of THC isomers in seized drug material. This workshop will also focus on the known pharmacological activity and potency of currently available semi-synthetic cannabinoids, provide reviews of cross-reactivity of the cannabinoid isomers and analogs on the commercially available immunoassay platform, and describe analytical methods for isomer separation in toxicological samples. Finally, delta-8-THC blood concentrations and trends in the Driving Under the Influence of Drugs (DUID) cohort will be presented.

**Educational Objectives:** After attending this presentation, attendees will be familiar with semi-synthetic cannabinoids such as delta-8-THC, THC-P, HHC, etc., their appearance in various cannabis-containing products, their potency, and their legality. Additionally, attendees will understand analytical challenges associated with these newly emerging THC isomers and analogs and how to resolve chromatographic interferences.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing a legal, pharmacological, and analytical overview of emerging semi-synthetic cannabinoid products.

**Target Audience:** Criminalistics, General, Toxicology

## **W8 Non-Fatal Strangulation: An Update on Practice and Current Literature**

**Monday, February 19, 2024**

**8:30 AM – 12:30 PM**

**CE Hours: 3.5**

**Program Description:** “He only choked me...” Anoxic brain injury can occur in minutes. Nonfatal strangulation and its associated effects are not well understood by responding providers. This 4-hour workshop provides a background in research and enhances skills in evaluating nonfatal strangulation. This potential lethal act is present in more cases than one thinks. The workshop presenters plan discussions around how the current evidence impacts the investigation, documentation, care, and prosecution of strangulation cases. Long-term effects such as traumatic brain injury are now being studied with current information to be discussed. Key concepts will be illustrated through the use of case studies and group discussion.

**Impact on the Forensic Science Community:** Many disciplines who investigate, provide care, or prosecute cases where nonfatal strangulation is a component benefit from understanding this topic. Investigators and crime scene personnel will be able to better recognize and investigate this potentially lethal act. Health care providers must properly assess and treat those who have experienced strangulation. Finally, prosecutors must develop knowledge about how to charge and prosecute for this action and to effectively use the expert witness to convey the significance that strangulation has on the victim.

## **W9      The Requirements and Implementation of ANSI/ASB Standard 123—Standard for Routine Internal Evaluation of a Laboratory’s DNA Interpretation and Comparison Protocol: Laboratory and Legal Perspectives**

**Monday, February 19, 2024**

**1:00 PM – 5:00 PM**

**CE Hours: 3.5**

---

**Program Description:** Several studies conducted over the past 20 years have demonstrated the inconsistent use of the interpretation and comparison protocols within some DNA testing laboratories as well as variability in the reporting of results and conclusions, especially when complex DNA profiles were evaluated that fell outside of the types of profiles routinely evaluated during mandatory proficiency testing. A standard, drafted by the Organization of Scientific Area Committees (OSAC) and developed by the Academy Standards Board (ASB), provides for the continued monitoring of the efficacy and consistent use of the laboratory’s protocol. This workshop will focus on the specific requirements of Standard 123 and provide effective mechanisms for implementation of the standard, including the evaluation of the resulting data to ensure quality interpretation and comparison of DNA data. DNA analysts and attorneys will provide insights regarding the importance of and value added through the implementation of this standard.

**Educational Objectives:** After attending this workshop, attendees will have a heightened understanding of: (1) the need to monitor the efficacy and consistency of use of the laboratory DNA interpretation and comparison protocols; (2) the specific requirements of Standard 123 and how to implement the standard in a DNA testing laboratory effectively in conjunction with other relevant DNA standards; (3) how to assess the results of the internal evaluation process with appropriate corrective actions; and (4) the legal perspective regarding the consistent use of high-quality interpretation and comparison protocols prior to- and post-conviction and how that may help to provide “Justice for All.” The attendees will have the opportunity to network with the speakers and other attendees while discussing implementation options.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community and the “Justice for All” initiative by providing information to laboratory staff, attorneys, and judges regarding the value of performing an annual review of the forensic science service provider’s interpretation and comparison protocols. Guidance for monitoring and evaluating the consistency of use and suitability of the protocol within a DNA laboratory via implementation of the ANSI/ASB Standard 123, Standard for Routine Internal Evaluation of the Laboratory’s DNA Interpretation and Comparison Protocol, and its possible effect on the judicial system will be the main focus of this workshop.

## **W10 Evolving Approaches and Technologies to Address Existing Challenges in Seized Drug Analysis**

**Monday, February 19, 2024**

**1:00 PM – 4:30 PM**

**CE Hours: 3.0**

---

**Program Description:** Challenges with the analysis of seized drugs have necessitated research into alternative approaches and technologies to assist forensic laboratories with the identification and quantification of unknown seized drugs. These challenges include the rapidly evolving nature of the seized drug landscape, with the continued emergence of Novel Psychoactive Substances (NPS), the identification of closely related chemical substances, the detection of minor components in mixtures, the differentiation of hemp and marijuana, screening of multiple subunits, and growing backlogs. However, there is a considerable divide between the research community developing these alternative approaches and technologies and actual implementation by practicing forensic laboratories. The Evolving Approaches and Technologies for Seized Drug Analysis subcommittee was established to specifically address this divide by the Forensic Laboratory Needs Technology Working Group (FLN-TWG), which is housed at the National Institute of Justice (NIJ) and supported by the Forensic Technology Center of Excellence (FTCOE) through a cooperative agreement with RTI International.

**Educational Objectives:** After attending this workshop, attendees will have learned about readily implementable evolving approaches and technologies to address existing challenges in seized drug analysis. The attendees will learn about emerging technologies, such as Direct Analysis in Real Time-Mass Spectrometry (DART®-MS), gas chromatography-vapor-phase infrared spectroscopy (GC-VIR), Gas Chromatography-Vacuum Ultraviolet spectroscopy (GC-VUV), and Ultra-High Performance Liquid Chromatography-Photo Diode Array Ultraviolet single quadrupole Mass Spectrometry (UHPLC-PDA UV-MS). In addition, attendees will also learn about evolving approaches, such as microcrystal tests and the analysis of marijuana and marijuana products.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by providing chemists, section leaders, and laboratory managers with the necessary information to determine which evolving approach or technology may be most appropriate to address their specific laboratory needs. Aspects such as the approximate cost, analysis time, capabilities, limitations, and specific challenges that each approach or technology can help address will be provided. Informing the seized drug community about the strengths and limitations of the identified evolving approaches and technologies will better prepare forensic laboratories to make informed decisions about how to combat their specific challenges in seized drug analysis.

## **W11 Police Officers Injured in the Line of Duty: The Role of Peer Support in Recovery**

**Monday, February 19, 2024**

**1:00 PM – 4:30 PM**

**CE Hours: 3.0**

---

**Program Description:** This presentation will provide an overview of the of circumstances that led up to the wounding of New York police officers and the challenges that they faced and still endure. We will engage in an interactive discussion with these officers and learn how they faced aspects of their physical and psychological recovery and the role other factors played in their seeking help such as individual characteristics, the availability of peer support, stigma, family, and social support, gratitude, resilience, and satisfaction with life. Special focus will be given to a traumatic brain injury caused by firearm. This workshop will discuss topics requiring basic knowledge pertaining to brain anatomy, brain function and cognitive and psychological effects of Traumatic Brain Injury (TBI).

**Educational Objectives:** After attending this workshop, attendees will: (1) better understand the experiences of police officers who have been severely injured in the line of duty; (2) build skills to identify the many challenges one can face while recovering from a TBI caused by a gunshot wound to the head; (3) be made aware of the physical damaged caused by a Gunshot Wound (GSW) to the head; (4) appreciate the effects of TBI on cognitive and psychological assessment protocols; (5) be informed about the current empirical research and literature on peer assistance programs, peer support, and peer-facilitated interventions for police officers; and (6) have a better understanding of the role social support, gratitude, resilience, and satisfaction with life have on recovery.

**Impact on the Forensic Science Community:** Presentations in this workshop will impact the forensic science community through detailed accounts of police officers who were injured in the line of duty. Through their first-hand accounts, these officers will discuss their road to recovery and associated psychological sequela and its impact on their families. The forensic science community was previously introduced to the one of the officers (LCJ) through a presentation at the 75th AAFS Annual Scientific Conference. This workshop will provide the most up-to-date information on the role, responsibilities, and best practices associated with a Peer Support Program.

## **W12      Reading the Blueprint to Construct the Framework: Demystifying Forensic Accreditation**

**Monday, February 19, 2024**

**1:00 PM – 5:30 PM**

**CE Hours: 4.0**

---

**Learning Overview:** This workshop will provide an overview of the Framework for Accreditation of Forensic Units developed as part of cooperative agreement 70NANB21H098 with the National Institute of Standards and Technology (NIST) that can be used by forensic service providers through the accreditation process. The workshop will review the benefits, and the drawbacks, to accreditation for an organization, particularly with respect to Crime Scene Investigation (CSI) and latent print units. It will also discuss why accreditation of Forensic Science Service Providers (FSSPs) is important to the criminal justice system using practical examples in forensics as well as other industries. Attendees will learn what a forensic accreditation program consists of and the structure of the International Organization for Standardization/International Electrotechnical Commission (ISO/IEC) 17020 and ISO/IEC 17025 standards used to build a framework, along with the similarities and differences between the two. Attendees will learn how to approach building a quality management system and the overall accreditation process as well as tips for reading and interpreting standards.

**Educational Objectives:** After attending this workshop, attendees will understand some principles of ISO accreditation programs and quality management, necessary elements of the requirements in each standard (ISO/IEC 17020 and ISO/IEC 17025), and guidance on how to meet the requirements. Attendees will be provided with resources to help them develop an effective quality management system and become an accredited forensic service provider.

**Impact on the Forensic Science Community:** This presentation will impact those in forensic science who are considering accreditation, or beginning the process of obtaining accreditation, by explaining the pieces needed to build a framework of accreditation.

## **W13 Beyond the “Who Done It . . .” DNA Interpretation Given Activity Level Propositions**

**Tuesday, February 20, 2024**

**8:30 AM – 5:30 PM**

**CE Hours: 6.75**

---

**Program Description:** This workshop will demonstrate peer reviewed, published methods for evaluating DNA evidence given activity level propositions as well as related testimony at court. DNA testimony has moved past the “Who?” questions related to the source of the DNA and it is now common for questions to be asked about “How?” the DNA ended up on the evidence item. While this is often done using hypothetical questions designed to elicit vague answers about “possible” or “could have” or “consistent with”, there are published frameworks and reporting and testimony guidelines available to assist both experts and the court. This workshop will cover the theory and application of Case Assessment and Interpretation (CAI) and Bayesian networks (BN) to evaluate DNA evidence profiles given activity level propositions and the communication of these results via report writing and testimony. A combination of lectures, demonstrations, and hands-on group activities will be used in this workshop. Challenges in both the evaluation of the evidence and testimony in an adversarial court system will be addressed as well.

**Educational Objectives:** After attending this workshop, attendees will be able to communicate expert knowledge on the evaluation of DNA evidence given activity level propositions using a scientifically sound framework and published practices. Participants will understand how to apply the Case Assessment and Interpretation (CAI) framework to perform case pre-assessments, formulate activity level propositions, and assign likelihood ratios for biological evidence given activity level propositions. This knowledge provides attendees with tools to handle hypothetical questions commonly asked in court, how to recognize poorly worded questions, and provide answers to these hypotheticals in a scientifically correct manner.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing guidance for real-world testimony on how to handle DNA testimony when the court’s interest is beyond that of an “inclusion” and its associated sub-source likelihood ratio.

## **W14 Applications of Digital Forensic Audio/Video for Real Life Challenges With DeepFake Video, Audio, and Artificial Intelligence**

**Tuesday, February 20, 2024**

**8:30 AM – 5:15 PM**

**CE Hours: 7.0**

---

**Program Description:** Digital Multimedia Authentication seeks to determine the validity of digital multimedia containers and contents by investigating their format, structure, time, frequency, pixel and/or sample level features. This workshop will discuss the digital audio and video analysis process providing the user with methods of detecting and authenticating audio, including Deep-Voice, and DeepFake videos. It will also demonstrate the incorporation of multiple tools and techniques into unified frameworks appropriate in forensic examinations where reducing examiner bias and error is crucial.

**Educational Objectives:** After attending this workshop, attendees will: (1) be familiar with the latest developments in forensic audio analysis and authentication; (2) understand criteria used for media authentication; and (3) understand how to conduct analysis within a forensic framework and (4) multiple frameworks to use for DeepFake video detection..

**Impact on the Forensic Science Community:** This workshop will impact the forensic community by: (1) explaining the scientific approach in forensic audio authentication; (2) demonstrating an authentication investigation framework; (3) discussing tools used to combat multimedia forgery; (4) showing multiple frameworks to use for DeepFake video detection.

## **W15 To Tell the Truth: Perspectives on the Practice of Courtroom Testimony**

**Tuesday, February 20, 2024**

**8:30 AM – 4:30 PM**

**CE Hours: 6.0**

---

**Program Description:** This session is a multidisciplinary workshop focused on courtroom testimony. The sessions are geared for all levels of experience from novice to seasoned professional. While the speakers will focus on subjects that include training, preparation, cognitive bias, courtroom technology, and “high profile” cases, the sessions will explore criminal versus civil, deposition versus trial, state versus federal versus military, etc. Various perspectives from the different stakeholders involved are addressed—judge, prosecutor, defense, professional, and consultant.

**Educational Objectives:** Upon completion of this workshop, attendees will be better able to understand and perform one of the most challenging parts of any forensic practice—courtroom testimony in its many forms, be it civil or criminal, federal, military, or state, and deposition or trial.

**Impact on the Forensic Science Community:** This workshop will impact the forensic science community by providing a multidisciplinary look at the why and how of the practice of courtroom testimony, including recognizing potential challenges and pitfalls.

## **W16 Statistics and Forensic Science: From Probability to Black Box Studies to Likelihood Ratios**

**Tuesday, February 20, 2024**

**8:30 AM – 4:30 PM**

**CE Hours: 5.75**

**Program Description:** This workshop provides an introduction to key concepts in probability and statistics for forensic practitioners by linking them to key topics that are currently impacting the forensic community. The target audience is anyone from the forensic science community (practitioners, lawyers, judges, advocates) with a desire to better understand ongoing conversations about error rates, black box studies, inconclusive findings, and likelihood ratios.

**Educational Objectives:** Participants will: (1) become familiar with the language and key concepts of probability including the role of populations and sample, laws of probability, dependence/independence of events, conditional probability and Bayes' rule, and the likelihood ratio; (2) become familiar with the language and key concepts of statistical inference including the role of data collection, measurement, error rates, reliability, and validity; (3) understand issues associated with the design, execution, and interpretation of black box studies; (4) understand statistical hypothesis testing and its relevance for the two-stage approach for analyzing forensic evidence; and (5) understand the likelihood ratio / Bayes factor approach to assessing forensic evidence along with its strengths and weaknesses.

**Impact on the Forensic Science Community:** Understanding the applications of statistics by the forensic science community will assist practitioners, attorneys, and jurists in evaluating evidence and opinions. The workshop is intended to leave attendees in a position to better understand and engage in ongoing discussions (in the OSAC and other places) about appropriate approaches to assessing forensic evidence and reporting forensic conclusions.

## **W17 Crime Scene Reconstruction: Using Critical Thinking, Logic, and Reflection**

**Tuesday, February 20, 2024**

**8:30 AM – 5:30 PM**

**CE Hours: 5.75**

---

**Program Description:** This workshop is applicable to all forensic science disciplines and will begin with an overview of forensic reconstruction in a broad sense, followed by detailed information on how people process information to come to a conclusion, and culminating with a hands-on practical exercise involving all attendees who will implement the concepts studied and presented. During the presentation, attendees will be instructed on the background of reconstruction and how, by using a multidisciplinary systematic method of inquiry to problem-solving, they will be more likely to come to a logical and factual outcome.

**Educational Objectives:** This workshop will assist attendees in understanding and implementing the scientific method of inquiry to criminal investigations and forensic science problems by the use of physical evidence, objective data/information, artifacts of affect, and methods/processes of reasoning, logic, and cognitive learning within the contextual bounds of where this data/information is located, to derive knowledge regarding a particular incident and, when possible, to provide a chronological sequence to the incident.

**Impact on the Forensic Science Community:** This workshop is critical to all forensic scientists, crime scene investigative personnel, detectives, pathologists, and attorneys charged with investigating violations of law. By understanding logic, critical thinking, and reasoning, the law enforcement and forensic professional will better understand how their own biases and/or lack of knowledge and understanding can impact their decision-making process that could lead to a flawed outcome or conclusion.

**Tuesday, February 20, 2024**

**8:30 AM – 12:30 PM**

**CE Hours: 3.5**

**Program Description:** This presentation will provide an overview of campus shootings in America and continue with legislative and legal updates through case analyses. This workshop will explore gender, mental illness, behavior, victimology, and weaponry.

**Educational Objectives:** Attendees will be able to assess their role in making positive and effective changes to policy, practice, and research within and among multiple disciplines. Attendees will have the opportunity to discuss their existing practices and brainstorm alternates throughout the presentation.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by reminding all attendees of their role in making positive and effective changes to eliminate campus shootings by focusing on our historical, during, and post-incident responses and using case analyses to encourage accountability and promote real-time collaborative research and practices within multiple disciplines.

## **W19 Forensic Scientists on the Front Lines**

**Tuesday, February 20, 2024**

**8:30 AM – 12:30 PM**

**CE Hours: 3.75**

---

**Program Description:** After attending this workshop, attendees will be able to discuss examples of teamwork approaches that place forensic scientists on the front lines, addressing the challenges associated with the growing number of emerging drug substances and precursors, the complexity of the analysis, and the impact on enforcement and intelligence investigations.

**Educational objectives:** After attending this workshop, attendees will be able to: (1) describe how forensic techniques can be used beyond simply reporting the presence of controlled substances to provide insights into changes in drug manufacturing and distribution practices; (2) evaluate the differences in analytical capabilities and workflow strategies provided in central laboratories versus front line laboratories; and (3) to explain how forensic analysis impacts intelligence gathering to support investigations, health, and safety.

**Impact on the Forensic Science Community:** This workshop will benefit the forensic science community by highlighting the impacts of forensic science collaborations on investigations, epidemiology, drug intelligence, public health, and canine training and operations. It will also highlight how deployment of laboratories on the front lines strengthen the efficiency of these operations, utility of the results, and timeliness of testing.

**Tuesday, February 20, 2024**

**8:30 AM – 12:00 PM**

**CE Hours: 3.0**

---

**Program Description:** Socio-technical systems are made up of humans interacting with technology within the confines of an organizational culture. Forensic practice is socio-technical because it involves all these elements. Attendees will learn to see, understand, and manage risk in each of these elements to increase their overall organizational reliability and how to take steps to make their operations resilient.

**Educational Objectives:** Attendees will learn to see, understand, and manage risk in within their operations.

**Impact on the Forensic Science Community:** The work product of forensic providers is critical to the Criminal Justice System. While there have been advances in overall quality over the years, forensic providers still find themselves reacting to adverse incidents as they become front-page headlines. Attendees will learn proactive approaches that will prevent adverse events from occurring and mechanisms that can be put in place to quickly recover from these incidents if they do occur.

## **W21 Investigation and Certification of Intoxication Deaths for the Non-Pathologist**

**Tuesday, February 20, 2024**

**1:00 PM – 4:30 PM**

**CE Hours: 3.25**

**Program Description:** This workshop brings together experts in medicolegal death investigation, forensic pathology, and forensic toxicology to discuss the investigation and toxicological analysis when substance use is suspected, focusing on identifying and certifying these deaths. Common problems faced during the investigation, confounding or competing findings at autopsy, and pitfalls in postmortem toxicological testing and interpretation will be explored. To properly certify these deaths, experts will discuss the impact of information gained from the investigation of the circumstances, autopsy, and appropriate postmortem toxicological testing.

**Educational Objectives:** Attendees will be introduced to the essential components necessary for competent medicolegal death investigation and proper certification of suspected substance-related deaths. Experts from their respective fields will discuss death investigation, autopsy, and forensic toxicology. This program focuses on practical information that can be used by the non-pathologist and the pathologist-in-training to understand the necessary task of investigating and certifying these deaths. The importance of proper death certification for public health and safety purposes will be stressed.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community by providing non-pathologists with practical information to help them understand the medicolegal investigative process, toxicological testing, and result interpretations to facilitate the recognition, investigation, and certification of drug intoxication deaths.

**Target Audience:** Criminalistics, Forensic Nursing Science, General, Jurisprudence, Pathology/Biology, Toxicology

**Knowledge Level Required:** Intermediate

## **W22     How Should Forensic Genetic Genealogy (FGG) Navigate the Court System? A Mock Cross Examination**

**Tuesday, February 20, 2024**

**1:00 PM – 5:00 PM**

**CE Hours: 3.75**

---

**Program Description:** This workshop provides insight into the technical and legal challenges that may arise during cross examination, in the context of challenges the community faces if FGG should move further into the court system.

**Educational Objectives:** By attending this workshop, attendees will gain a perspective on important issues related to the introduction of FGG in court, from both the prosecution and defense points of view. The mock trial and subsequent discussion will also provide FGG practitioners with insight into how to present expert testimony.

**Impact on the Forensic Science Community:** This presentation will impact the forensic science community through a demonstration of the cross examination of a qualified, competent FGG expert witness, to show in real time various technical and legal challenges that may arise in court as FGG moves further into the judicial system.

**Target Audience:** Criminalistics, General, Jurisprudence

## **W23     The Impact of Burning on Skeletal and DNA Evidence**

**Tuesday, February 20, 2024**

**1:00 PM – 4:30 PM**

**CE Hours: 3.25**

---

**Program Description:** After attending this workshop, attendees will have learned how fire affects bodies and the ability of researchers and forensic practitioners to obtain skeletal and DNA evidence. The presenters will provide an overview of how bodies burn from case examples as well as experimental burning of complete human bodies and will discuss the classifications used to describe the extent of burning (i.e., the temperatures reached) in bone by previous researchers. Attendees will also learn about DNA extraction methods that have been applied to burned tissue and bone. The presenters will discuss the success of these methods based on data from research projects examining the effects of burning on skeletal remains and on the recovery of DNA from those remains. Attendees will learn how the DNA recovered from these burned remains performs in subsequent Combined DNA Index System (CODIS) Short Tandem Repeat (STR) and Next Generation Sequencing (NGS) analyses that aim to test the limits of DNA recovery from fire-death victims. This workshop probes the methods (and challenges) for obtaining DNA using novel ancient genomic technologies optimized for maximum ultra-short molecular recovery, as well as for obtaining skeletal evidence, including evidence for trauma, from burned human remains.

**Educational Objectives:** After attending this workshop, attendees should be able to: (1) describe methods used to characterize the extent of burning in bone; (2) understand the effects of burning on bodies, (3) appreciate the different extraction methods applied to burned and highly degraded skeletal tissues, and (4) evaluate which downstream analyses are likely to produce useful data for case identification.

**Impact on the Forensic Science Community:** The recovery and analysis of skeletal evidence and DNA from burned human remains represent some of the most challenging cases in medicolegal investigations. This workshop will impact the forensic science community by increasing attendees' understanding of how burning affects the body and DNA preservation. Specifically, attendees will understand the characteristics used to score the level of burning in bones and the protocols used for optimal recovery of DNA from burned bone and tissue.

## Forensic Science Research and Development Symposium

The National Institute of Justice (NIJ) Forensic Science Research and Development (R&D) Symposium is an open meeting delivered through NIJ's Forensic Technology Center of Excellence (FTCOE) where attendees can learn about NIJ-funded research across a variety of forensic science areas. You can register to attend the Symposium in person or virtually; however, American Academy of Forensic Sciences (AAFS) conference registration is not necessary to attend. Feel free to stop by to listen to specific presentations and view posters or stay all day and learn about the diverse NIJ forensic science R&D portfolio.

More details and registration information can be found here:  
<https://forensiccoe.org/event-2024-research-development-symposium/>

### Tentative Agenda—Tuesday, February 20, 2024

---

The podium presentations will take place from 8:30 AM MST to 5:00 PM MST in Meeting Room 205 at the Colorado Convention Center. A Q&A session for each presenter will directly follow their presentation. Please note that all times are listed in Mountain Standard Time (MST, UTC-7).

8:30 AM – 8:40 AM **Welcome and Opening Remarks**  
*Lucas Zarwell, Office of Investigative and Forensic Sciences, National Institute of Justice*

**Session I – Physics and Pattern Interpretation/Trace Evidence**  
*Moderated by NIJ Program Manager, Gregory Dutton*

8:40 AM – 9:05 AM **Development of Nationwide Reference Population Distributions for Statistically Supported and Objective Testimony in Firearm Evidence Comparisons**  
*Xiaoyu Alan Zheng, National Institute of Standards and Technology*

9:05 AM – 9:30 AM **Assessing the Strength of Trace Evidence Fracture Fits Through a Comprehensive, Systematic, and Quantifiable Approach**  
*Tatiana Trejos, West Virginia University*

9:30 AM – 9:55 AM **Fast Fluorescence Mapping and Raman Spectroscopy for Detection and Confirmatory Identification of Gunshot Residue**  
*Igor K. Lednev, University at Albany – State University of New York*

9:55 AM – 10:20 AM **Gaining Insight into the Transfer and Persistence of Inorganic and Organic Gunshot Residues**  
*Luis Arroyo, West Virginia University*

10:20 AM – 10:35 AM **BREAK**

**Session II – Forensic Anthropology and Forensic Pathology**  
*Moderated by NIJ Program Manager, Danielle McLeod-Henning*

10:35 AM – 11:00 AM **Pre-Grouping of Commingled Remains Using Field-Deployable Elemental Analysis**  
*Matthieu Baudelet, University of Central Florida*

11:00 AM – 11:25 AM **The Practicality of Postmortem Microbial Biomarkers in Death Investigation**  
*Jennifer Pechal, Michigan State University*

11:25 AM – 11:50 AM **Age- and Sex-Based Skull Thickness Distribution for Predicting Skull Fracture Patterns in Young Infants**  
*Brittany Coats, University of Utah*

# NATIONAL INSTITUTE OF JUSTICE

**Session III – Seized Drugs and Toxicology**  
*Moderated by NIJ Program Manager, Frances Scott*

1:25 PM – 1:50 PM **Towards the Non-Contact Vapor Detection of Fentanyl in the Field**  
*Lauryn E. DeGreeff, Florida International University*

1:50 PM – 2:15 PM **Expert Algorithm for Substance Identification Applied to the Tandem Mass Spectra of Seized Drugs**  
*Glen Jackson, West Virginia University*

2:15 PM – 2:40 PM **Retinal Cannabinoids: Measures of Function and Impairment**  
*Denise Valenti, Impairment Measurement Marijuana and Driving (IMMAD)*

2:40 PM – 3:05 PM **Drug Positivity Rates in a Court-Ordered Mandatory Drug Testing Population**  
*Katherine Bollinger, RTI International*

3:05 PM – 3:20 PM **BREAK**

**Session IV – Forensic Biology/DNA**  
*Moderated by NIJ Program Manager, Tracey Johnson*

3:20 PM – 3:45 PM **Unified Recovery of Nucleic Acids with Retention of Other Analytes from Trace and Degraded Samples**  
*Arati Iyengar, West Virginia University*

3:45 PM – 4:10 PM **STR Sequence Nomenclature Resources**  
*Katherine B. Gettings, National Institute of Standards and Technology*

4:10 PM – 4:35 PM **Evaluation of the ForenSeq™ MainstAY Kit and Comparing Standard- and Micro-Flow Cells**  
*Elisa Wurmbach, New York City Office of the Chief Medical Examiner*

4:35 PM – 5:00 PM **Comparative Assessment of Emerging Technologies for Body Fluid Identification**  
*Mirna S. Ghemrawi, Center for Forensic Science Research and Education*

### Poster Session

---

- 11:30 AM – 1:00 PM    **B1**    **What's In It For Me (WIIFM)?: Streamlining Sexual Assault Evidence From Collection to Analysis to Achieve the Best Outcome for the Survivor**  
*Fernanda Henry, BSc, MSc\**; Joy Quinlan, BSc; Valerie Mattimore Fuller, PhD, BS;  
Aliker Compton, BSc
- 11:30 AM – 1:00 PM    **B2**    **The Remains of the Crime: An Assessment of Body Fluid Identification Over Time**  
*Francisco Medina Paz, PhD; Brandon L. Kuba, BS; Emily Kryvorutsky;*  
*M. Gabriela Roca, MSc, PhD\**; Sara C. Zapico, PhD
- 11:30 AM – 1:00 PM    **B3**    **Dry Vacuum Recovery of DNA From Fabric**  
*Emily Sam-Zee-Moi, BS\**; Mechthild Prinz, MS, PhD
- 11:30 AM – 1:00 PM    **B4**    **An Initial Investigation of the Applied Biosystems® SeqStudio™ Genetic Analyzer for Human Identification Purposes**  
*Brayleigh Keefe, BS\**; Megan Foley, MSFS; Nicole Novroski; Fabio Oldoni, PhD  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 11:30 AM – 1:00 PM    **B5**    **A Morphological and Genetic Characterization of the Psychoactive Species *Psilocybe Cubensis* From Forensic Samples**  
*Ivana Horjan Zanki; Adela Makar, PhD; Andrea Ledić\**
- 11:30 AM – 1:00 PM    **B6**    **The Persistence of Wearer DNA on Clothing After Laundering**  
*Rachel Breitenstein, MS\**; Shawn Montpetit, MS; Ismail M. Sebetan, MD, PhD\*;  
Paul Stein, PhD\*
- 11:30 AM – 1:00 PM    **B7**    **A Multi-Species Reference Ladder Using Two PCR Multiplexes for the Rapid Identification of Most Domestic Animals for Forensic Purposes**  
*Vallarie Ostenson, MS; Lindsey Kaufman, MS; DeEtta Mills, PhD\**
- 11:30 AM – 1:00 PM    **B8**    **Advancing Semen Detection Techniques With Sperm Tracker STK® in Real Case Scenarios and Diverse Environments**  
*Monica Omedei, PhD\**; Selena Cisana, PhD; Aurora Desogus; Giorgia Ferrero; Florian Tharin;  
Paolo Garofano, PhD; Eugenio Alladio  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 11:30 AM – 1:00 PM    **B9**    **Into the “Sexome”: Genital Microbiome Transfer and Applications**  
*Julia Wang, BS, MS\**; Rachel Houston, PhD; Sheree R. Hughes, BSc, PhD;  
Brendan Chapman; Ruby Dixon, BS  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 11:30 AM – 1:00 PM    **B10**    **The Adaptation, Optimization, and Validation of a Semi-Automated DNase I-Based Differential Extraction Procedure on the Beckman Coulter Biomek NX<sup>P</sup> Automation Workstation**  
*Susan A. Greenspoon, PhD\**; William Eggleston, PhD; Cathryn Shannon, BS, MS
- 11:30 AM – 1:00 PM    **B11**    **From Tecan to Hamilton: Material Modification of Applied Biosystems™ PrepFiler™ Automated Extraction**  
*Cristina L. Servidio, MFS\**; Rachel H. Oefelein, MSc; Brittany Stirmell, MSFS
- 11:30 AM – 1:00 PM    **B12**    **An Evaluation of the Effectiveness of Flow Cytometry in Sperm Testing in Mixed Semen Specimen**  
*Fang Chun Chung\**; Chun-Yen Lin; Kuan-Miao Yeh; Yeh-Lin Lu; Chun Changou

## Dogs, Fire, and Detection

---

Moderator: Francesco Sessa, PhD, MS

Co-Moderator: Carlos Gutierrez, PhD

- 10:30 AM – 10:45 AM    **F71**    **The Road to Standard Development: An Update From Dogs and Sensors**  
*Paola A. Prada-Tiedemann, PhD\**; *Sara S. Perry, BS*; *Kenneth G. Furton, PhD*
- 10:45 AM – 11:00 AM    **F72**    **Human Remains Detection Dogs and Residual Odor**  
*Melissa A. Connor, PhD\**; *Alexander J. Smith, BA*; *Georgia Swelstad, BS*
- 11:00 AM – 11:15 AM    **F73**    **A Multidisciplinary Approach to K-9 Human Remains Detection: The Integration of Medical Examiners, Forensic Anthropologists, and Medicolegal Investigators With the K-9 Team**  
*Michele S. Slone, MD\**; *Angela Soler, PhD*; *Jennifer K. Odien, PhD*; *Justin Z. Goldstein, MA*; *Bradley J. Adams, PhD*; *Nicholas W. Schultz, BS*; *Dennis Cavalli, MPH*; *Scott Mateyaschuk*
- 11:15 AM – 11:30 AM    **F74**    **The Effect of Compressed Air Foam on the Detection of Ignitable Liquid Residues on Fire Debris Samples**  
*Victor Omondi, BSc, MSc\**  
*(FSF Emerging Forensic Scientist Award Oral Presentation)*
- 11:30 AM – 11:45 AM    **F75**    **The Impacts of Thermocouple Insulation Failure on the Accuracy of Temperature Measurement Data in Forensic Fire-Death Scenarios**  
*David Silveira, MS\**; *Ashley Kendell, PhD*; *Beth Shook, PhD*
- 11:45 AM – 12:00 PM    **F76**    ***In Situ* Detection of Gunshot Residue on Fabric Using Attenuated Total Reflectance/Fourier Transform Infrared Spectroscopy**  
*Igor K. Lednev, PhD\**
- 12:00 PM – 12:15 PM    **F77**    **An Exploratory Study of 3D Fused Deposition Modeling (FDM) and Polylactic Acid (PLA+) Filament Deposition as Toolmark Signatures for Common Source Comparison and Identification**  
*Steven Pavlovich, RMT\**
- 12:15 PM – 1:30 PM               **BREAK**

## Birds, Water, Loved Ones, and Convictions

1:15 PM – 1:30 PM	<b>K15</b>	<b>Forensic Digital Document Examination: Moving Forward in a Post-Pandemic Society</b> <i>Timothy Campbell, BSc*</i>
1:30 PM – 1:45 PM	<b>K16</b>	<b>Quantifying Bayes Factors for Forensic Handwriting Evidence</b> <i>Anyesha Ray, BS*; Danica M. Ommen, PhD</i>
1:45 PM – 2:15 PM	<b>K17</b>	<b>Quantifying Writer Variance Through Rainbow Triangle Graph Decomposition</b> <i>Alexandra Arabio, BS*; Alicia Laura Carriquiry, PhD; Danica M. Ommen, PhD</i>
2:15 PM – 2:35 PM	<b>K18</b>	<b>The Collection and Characterization of Counterfeit State Identity Cards and Driver's Licenses at the Homeland Security Investigations Forensic Laboratory</b> <i>Luther S. Schaeffer, MFS, MS*; Elaine X. Wooton, MFS*</i>
2:35 PM – 2:55 PM	<b>K19</b>	<b>The Discrimination and Characterization of Computer-Generated Printed Documents Using Energy-Dispersive X-Ray Fluorescence Spectroscopy Coupled With Chemometrics</b> <i>Neha Verma, MSc, PhD*; Vishal Sharma, PhD; Dinesh K. Sahu, MSc, PhD</i>
2:55 PM – 3:25 PM	<b>K20</b>	<b>The Hitler Diaries Revisited</b> <i>Thomas W. Vastrick, BSc*</i>
3:25 PM – 3:40 PM		<b>BREAK</b>

Moderator: Mark Goff, BA

3:40 PM – 4:25 PM	<b>K21</b>	<b>A Framework for the Creation of QuompenDium—The Mega-Site for All Things QD</b> <i>Zain Bhaloo, MSc, BScH*</i>
4:25 PM – 4:55 PM	<b>K22</b>	<b>A Proposal to Update SWGDOC Standards During the Transition Period: A Discussion</b> <i>Thomas W. Vastrick, BSc*</i>
4:55 PM – 5:15 PM	<b>K23</b>	<b>An Update on Standards Development Activities Related to Forensic Document Examination</b> <i>Kevin P. Kulbacki, MSFS*</i>
5:15 PM – 6:00 PM	<b>K24</b>	<b>New ASB Standards for Forensic Document Examiners: How They Differ From the Standards They Superseded and What You Need to Know to Use Them</b> <i>Mark Goff, BA*; Stephanie Kingsbury, MSFS*</i>

| 7:30 PM – 9:00 PM | <b>L9</b>  | <b>WITHDRAWN</b>  |
| 7:30 PM – 9:00 PM | <b>L10</b> | <b>A Complete Review of Propofol Misuse in the Health Care System and as a Drug of Abuse</b><br><i>Jidabha Apiluk, BS</i> ; <i>Sajeel Shah, PhD*</i> ; <i>Nikolas P. Lemos, PhD</i>   |
| 7:30 PM – 9:00 PM | <b>L11</b> | <b>A Retrospective Analysis of Results From United States Court-Ordered Mandatory Drug Testing of Oral Fluid and Hair and the Impacts of Expanding the Testing Scope for Fentanyl and Fentanyl-Related Compounds</b><br><i>Jeri D. Roper-Miller, PhD*</i> ; <i>Megan Grabenauer, PhD</i> ; <i>Nichole D. Bynum, MS</i> ; <i>Nicolas Richardson, PhD</i>   |
| 7:30 PM – 9:00 PM | <b>L12</b> | <b>Drops of Insanity? Tropicamide Recreational Usage: Early Warning Alarms in Forensic Science</b><br><i>Sushil Bhatt, PGDST*</i> ; <i>Jagmahender Singh Sehwawat, PhD</i> ; <i>Vishali Gupta, MS</i><br>(FSF Emerging Forensic Scientist Award Poster Presentation)  |

# TOXICOLOGY

---

- 7:30 PM – 9:00 PM **L13** **Biofluid Sampler: A Promising Sampling and Sample Preparation Platform for Forensic Toxicological Investigations**  
*Abuzar Kabir, PhD\**; *Marcello Locatelli, PhD*; *Kenneth G. Furton, PhD*
- 7:30 PM – 9:00 PM **L14** **Quantitation of Delta-8-Tetrahydrocannabinol in Postmortem Specimens by the Method of Standard Addition**  
*Robert M. Lockwood, PhD\**; *Taikeria Adams, BS*; *Curt E. Harper, PhD*
- 7:30 PM – 9:00 PM **L15** **Fabric Phase Sorptive Extraction: A Green Sample Preparation Strategy for Forensic Toxicology**  
*Abuzar Kabir, PhD*; *Kenneth G. Furton, PhD\**; *Marcello Locatelli, PhD*
- 7:30 PM – 9:00 PM **L16** **A Comparative Analysis of Accuracy, Precision, and LOD in AAS and TMA for the Quantification of Cadmium in the Blood Samples**  
*Jatin Kumar Drall, BTech\**; *Ajay Kumar Kataria, MTech*
- 7:30 PM – 9:00 PM **L17** **The Determination of Cadmium in Blood by Voltammetry Using Hanging Mercury Drop Electrode (HMDE)**  
*Ashok Kumar Jaiswal, PhD\**
- 7:30 PM – 9:00 PM **L18** **Identifying Designer Benzodiazepines in Blood Using Gas Chromatography/Mass Spectrometry**  
*Devin Baer\**; *Michael T. Truver, PhD*; *Sara C. Brogan, BS*; *Jennifer L. Hoyer, MS*; *Michele Crosby*; *Chris W. Chronister, PhD*
- 7:30 PM – 9:00 PM **L19** **The Impact of Gold Top SST (Gel and Clot) Collection Tubes on Cannabinoid Quantitative Analysis in Blood**  
*Bridget O’Leary, MS*; *Marta Concheiro-Guisan, PhD\**
- 7:30 PM – 9:00 PM **L20** **Designer Benzodiazepine ELISA Cross-Reactivity**  
*Leonela M. Placencia, BS\**; *Nicholas B. Tiscione, MS*  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 7:30 PM – 9:00 PM **L21** **EC-SERS and DART®-TOF/MS for Toxicological Screening**  
*Colby E. Ott, PhD\**; *Edward Sisco, PhD*
- 7:30 PM – 9:00 PM **L22** **A Validated Method for Quantification of Buprenorphine/Naloxone and Its Primary Metabolites in Clinical Human Breast Milk, Maternal and Infant Plasma Samples Using Liquid Chromatography/Tandem Mass Spectrometry (LC/MS/MS)**  
*Munchelou M. Gomomit, BS\**; *Krystle McConnell, BA, MPH*; *Lauren M. Jansson, MD*; *Madeleine J. Swortwood, PhD*
- 7:30 PM – 9:00 PM **L23** **An Evaluation and Comparison of the Evidence MultiSTAT to GC/MS for the Detection of Morphine, Codeine, and Thebaine in Urine and Oral Fluid**  
*Amanda L. Pacana, BS, MSFS\**; *Britni Skillman, PhD*; *Madeleine J. Swortwood, PhD*; *Stacie Terry, MSFS*
- 7:30 PM – 9:00 PM **L24** **An Investigation of Phthalate Levels in Teething Devices for Children in the United Arab Emirates**  
*Vipula Aravamudhan\**; *Nrashant Singh*; *Deveshi Kachroo*; *Noora Najeeb*
- 7:30 PM – 9:00 PM **L25** **The Validation of an LC/QqQ/MS Method for the Detection of Single Doses of Drugs in Hair**  
*Kaylyn Ann Keith\**; *Anthony P. DeCaprio, PhD*

# TOXICOLOGY

---

- 7:30 PM – 9:00 PM **L26** **The Development of a Reference Material for Chemical Hair Analysis**  
*Kaitlyn Bonilla, BS\**; Charlene Harris, BS; Chloe Phillips; Matthieu Baudelet, PhD  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 7:30 PM – 9:00 PM **L27** **Streamlining Blood LC/MS/MS Workflows to Meet ASB/OSAC Recommendations for Medicolegal Death and Impaired Driving Cases**  
*Jason Truskowski, BS\**
- 7:30 PM – 9:00 PM **L28** **Streamlining Urine LC/MS/MS Workflows to Meet ASB/OSAC Recommendations for Drug-Facilitated Crime Investigations**  
*Jason Truskowski, BS\**
- 7:30 PM – 9:00 PM **L29** **“Hang on a Minute”: Developing Improved Separation Methodologies for Weakly Retained Polar Molecules in LC/MS/MS**  
*Briana Rose Alarcon, BS\**; William H. Campbell, PhD  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 7:30 PM – 9:00 PM **L30** **The Separation of Fentanyl Analog Geometric and Positional Isomers by LC/MS/MS**  
*Erika L. Sitch, MPS\**; Briana Rose Alarcon, BS\*; William H. Campbell, PhD
- 7:30 PM – 9:00 PM **L31** **What Are You Smoking? A Derivatization to Improve the Analysis of Tetrahydrocannabinol (THC) Isomers Via LC/MS/MS**  
*Olesia Leonna Headen\**; William H. Campbell, PhD  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 7:30 PM – 9:00 PM **L32** **The Quantitation of 106 Drugs in Urine Using a High-Throughput, Seven-Minute Method by High Resolution Mass Spectrometry and Triple Quadrupole**  
*Courtney Patterson\**; Mark Tracy; Kristine van Natta; Stephanie Samra; Kerry Hassell  
(FSF Emerging Forensic Scientist Award Poster Presentation)
- 7:30 PM – 9:00 PM **L33** **Urine Immunoassay Cross-Reactivity of Various OTC and Prescription Drugs**  
*Fatima Chavez-Esparza, BS\**; Courtney Sellens, MS, BS; Qiyang Zhang, PhD; Melissa M. Bailey, MSFS, PhD; Timothy P. Rohrig, PhD; Connor DeJesus, MS, BS
- 7:30 PM – 9:00 PM **L34** **Don’t Huff Before You Blow!**  
*Genevieve Huppe, MSc\**; Julie Motard, MSc; Cynthia Roy, MSc; Anthony Gelinas, BSc; Pascal Mireault, MSc
- 7:30 PM – 9:00 PM **L35** **Evaluating Drug Positivity Trends in Fatally Injured Drivers, Passengers, and Pedestrians in Connecticut**  
*Amanda L.A. Mohr, MS\**; Grace Cieri, BS; James R. Gill, MD; Barry K. Logan, PhD
- 7:30 PM – 9:00 PM **L36** **Drivers Under the Influence of Alcohol and Drugs: A Six-Year (2017–2022) Retrospective Analysis in a Southern Italian Region**  
*Anna Carfora, PhD; Alessandro Feola, MD, PhD\**; Raffaella Petrella, PhD; Giusy Ambrosio, MD; Ilaria Fracassi, MD; Paolo Palermo, MD; Martina Zampone, MD; Carlo Pietro Campobasso, MD, PhD
- 7:30 PM – 9:00 PM **L37** **Pediatric Poisoning: A Plan of Action for Early Diagnosis and Treatment**  
*Pascale Basilicata; Mariagrazia Marisei, MD; Rossella Guadagni; Angela Simonelli; Gaetano Di Donna, MD; Anita Sammarco, MD; Massimo Niola, PhD; Maria Pieri\**
- 7:30 PM – 9:00 PM **L38** **The Effects of Ethanol on GABA Catabolism Via GABA-Transaminase**  
*Mary Corrigan\**; Robert H. Powers, PhD

# TOXICOLOGY

---

- 7:30 PM – 9:00 PM    **L39**    ***Crotalus* Snake Venoms of North and South America: Their Symptoms, Treatments, and Potential Medical Applications**  
*Victoria Hudson, MSc\**; *Sajeel Shah, PhD, MS*; *Nikolas P. Lemos, PhD*
- 7:30 PM – 9:00 PM    **L40**    **A Review of Popular Illegal Performance-Enhancing Drugs in Sports and Gyms**  
*Rami Abbas, BS\**; *Sajeel Shah, PhD, MS*; *Nikolas P. Lemos, PhD*
- 7:30 PM – 9:00 PM    **L41**    **An Evaluation of Long-Term Health Effects From Acute Exposure to Toxic Chemicals**  
*Theresa Pennington\**
- 7:30 PM – 9:00 PM    **L42**    **Future Strategies in Drug Trend Monitoring and Harm Reduction**  
*Agnieszka Urban, BSc\**; *Geraldine Dowling, PhD, MSc*; *Sajeel Shah, PhD, MS*; *Nikolas P. Lemos, PhD*
- 7:30 PM – 9:00 PM    **L43**    **A Review of Factors Affecting the Interpretability of Postmortem Cannabinoid Concentrations and Their Limitations**  
*Sherri L. Kacinko, PhD*; *Daniel S. Isenschmid, PhD*; *Barry K. Logan, PhD\**

## Thursday

### Annual Lectureship in Toxicology

---

Moderator: Dayong Lee, PhD

Co-Moderator: Erin Karschner, PhD

- 8:30 AM – 9:45 AM    **L45**    **Annual Lectureship in Toxicology**  
*Brandon Jeffery, MS\**
- 9:45 AM – 10:15 AM    **L46**    **An Update on Standards Development Activities in Forensic Toxicology**  
*Marc A. LeBeau, PhD\**
- 10:15 AM – 10:30 AM    **BREAK**

### Novel Psychoactive Substances

---

Moderator: Svante Vikingsson, PhD

Co-Moderator: Elisa Shoff, MS

- 10:30 AM – 10:45 AM    **L47**    **Quantitation of Hexahydrocannabinol and Metabolites in Blood From Recreational Users**  
*Robert Kronstrand, PhD\**; *Markus Roman*; *Henrik Gréen*; *Michael T. Truver, PhD*
- 10:45 AM – 11:00 AM    **L48**    **Determining Delta 9-THC Acetate Analog Metabolites Using Human Liver Microsomes to Determine the Structure and Rate of Metabolism**  
*Natalie Ortiz, BS\**; *Justin L. Poklis, BS*; *Kimberly Karin, MS*; *Grace R.R. Williams, PhD*; *Carl E. Wolf, PhD*  
*(FSF Emerging Forensic Scientist Award Oral Presentation)*
- 11:00 AM – 11:15 AM    **L49**    **The Metabolism of THC-O-Acetate (THCO)—An Emerging Drug Threat**  
*Ya-Chih (Jessica) Cheng, MS\**; *Charles R. Perkins, MS, BS*; *Sarah Kerrigan, PhD*  
*(FSF Emerging Forensic Scientist Award Oral Presentation)*

# TOXICOLOGY

---

- 11:15 AM – 11:30 AM    **L50**    **A Quantitative Confirmation Assay of New and Emerging Synthetic Cannabinoids by LC/QqQ/MS**  
*Haley Lynn Bibey, BS\**; Sara Walton, MS; Heather L. Harris, MFS, JD; Alex J. Krotulski, PhD  
(FSF Emerging Forensic Scientist Award Oral Presentation)
- 11:30 AM – 11:45 AM    **L51**    **A Case Series Involving the Synthetic Cathinone Alpha-PiHP in Postmortem Forensic Investigations**  
*Sara Walton, MS\**; Donna M. Papsun, MS; Michael E. Lamb, MSFS, BS; Alex J. Krotulski, PhD; Simon Elliott, BSc, PhD; Kerry Taylor, BSc; Michael T. Truver, PhD; Barry K. Logan, PhD
- 11:45 AM – 1:00 PM                    **BREAK**

## Multidisciplinary Session: Pathology/Biology and Toxicology

---

Moderator: Robert Johnson, PhD

Co-Moderator: Rhonda Mittenzwei, MD

- 1:00 PM – 1:15 PM    **L52**    **2C or Not Tusi? The Emergence of a New Drug Combination in Miami**  
*Rocio Potoukian, BS\**; Diane Moore, PhD; Kenneth Hutchins, DM  
(FSF Emerging Forensic Scientist Award Oral Presentation)
- 1:15 PM – 1:30 PM    **L53**    **The Frequency and Analysis of Kratom in Postmortem Cases**  
*William M. Schroeder, II, MS\**; Donna M. Papsun, MS; Justin Brower
- 1:30 PM – 1:45 PM    **L54**    **Postmortem Diagnosis of Ketoacidosis: The Importance of Beta-Hydroxybutyrate Quantification as Part of Routine Toxicological Screening at Autopsy**  
*Jeroen Roosendaal, PhD\**; Astrid Christiaens, MD; Kiki Van Langen, MD; Ingrid Bosman, PhD, MSFS  
(FSF Emerging Forensic Scientist Award Oral Presentation)
- 1:45 PM – 2:00 PM    **L55**    **A Case Series of Suicides by Sodium Azide Ingestion: An Update**  
*Ingrid Bosman, PhD, MSFS\**; Roelof Oosting, PharmD; Dick-Paul Kloos, PhD; Bart Ruiter; Jeroen Roosendaal, PhD; Kristof Maudens, PhD
- 2:00 PM – 2:15 PM    **178**    **I Didn't Want to Kill Him! The Role of Cocaine in Pseudoasphyxia by Compression of the Carotid Sinus**  
*Eleonora Mezzetti, MD\**; Matteo Leoni, MD; Andrea Costantino, MD; Carla Occhipinti, MD; Rebecca Pieretti, MD; Aniello Maiese, MD
- 2:15 PM – 2:30 PM    **179**    **Not So Much the "Spice" of Life: Identifying a Source for a Series of MDMA-4en-PINACA Deaths**  
*Michael Chaump, MD\**; Robert Johnson, PhD; Aria McCall, BS; Kei Osawa, MFS; Steven J. Hemberger, DO; Mark E. Shelly; Richard Fries; Dana Hopson, MD
- 2:30 PM – 2:45 PM    **180**    **Elevated Beta-Hydroxybutyrate Within a Pediatric Population and Its Associated Pathology: A Retrospective Case Series**  
*Nasim Haghandish, MDCM, PhD\**; Chris Milroy, MD, LLB; Jacqueline Parai, MD; Anthea Lafreniere, MD
- 2:45 PM – 3:00 PM    **181**    **Pediatric Fatalities Due to Methadone Toxicity in Cook County, Illinois: Considerations on the Manner of Death**  
*Lorenzo Gitto, MD\**; Daniel S. Isenschmid, PhD; Ponni Arunkumar, MD
- 3:00 PM – 3:15 PM                    **BREAK**

## Drugs and Driving Special Session

---

Moderator: Marilyn Huestis, PhD

Co-Moderator: Curt Harper, PhD

- 3:15 PM – 3:30 PM     **L56**     **Ketamine in Driving Under the Influence of Drugs (DUID) Cases: 2015–2023**  
*Amanda L. D’Orazio, MS\**; *Ayako Chan-Hosokawa, MS*
- 3:30 PM – 3:45 PM     **L57**     **DUID Cannabinoid Investigations: Blood, Oral Fluid, or Urine—Which Is the Superior Specimen?**  
*Curt E. Harper, PhD\**; *Clarissa Lawen*; *Kristin Tidwell, BS*; *Gil Sapir, JD, MSc*
- 3:45 PM – 4:00 PM     **L58**     **The Detection of Cannabinoids in Exhaled Breath Condensate After Cannabis Use**  
*Jennifer L. Berry, PhD\**; *Kavita M. Jeerage, PhD*; *Cheryle N. Beuning, PhD*;  
*Ashley Brooks-Russell, PhD*; *Tara Lovestead, PhD*
- 4:00 PM – 4:15 PM     **L59**     **Cocaine and Benzoyllecgonine in Blood and Oral Fluid of DUID Cases (2018–2022)**  
*Michael L. Weaver\**; *Clarissa Lawen*; *Christopher Bartle*; *Curt E. Harper, PhD*
- 4:15 PM – 4:30 PM     **L60**     **Mile High: A Five-Year Review of Fentanyl Trends in Colorado Impaired Driving Cases**  
*Stephanie Olofson, BS, MS\**
- 4:30 PM – 4:45 PM     **L61**     **Impaired Driving Cases With Bromazolam**  
*Nicholas B. Tiscione, MS\**; *Edward Zumaeta*

## Friday

---

## General Forensic Toxicology

---

Moderator: Chris Heartsill, BSc

Co-Moderator: Aaron Shapiro, PhD

- 8:30 AM – 8:45 AM     **L62**     **An Outlook on Fentanyl Adulteration: Polydrug Circumstances, Trends, and Tomorrow’s Forecast**  
*Alex J. Krotulski, PhD\**; *Sara Walton, MS*; *Donna M. Papsun, MS*; *Joshua S. DeBord, PhD*;  
*Barry K. Logan, PhD*
- 8:45 AM – 9:00 AM     **L63**     **Controlled Oral Kratom Leaf Administration to Healthy Humans: Abuse Potential- and Withdrawal-Related Effects, Adverse Events, and Mitragynine and 7-Hydroxy-Mitragynine Plasma Pharmacokinetics**  
*Marilyn A. Huestis, MS, PhD\**; *John Bothmer, PhD*; *Thomas Hudzik, MS, PhD*;  
*Jack E. Henningfield, BA, PhD*; *Ramsey Atallah, BA*
- 9:00 AM – 9:15 AM     **L64**     **The Extraction’s Always Greener on the Other Side**  
*Madeleine E. Wood, MS\**; *Joshua Z. Seither, PhD*; *John J. Kristofic, BS*; *Erin Karschner, PhD*;  
*Jeffrey P. Walterscheid, PhD*
- 9:15 AM – 9:30 AM     **L65**     **Homoamphetamine: A Cautionary Tale**  
*Laura Friederich, BS\**; *Sandra Bishop-Freeman, PhD*
- 9:30 AM – 9:45 AM     **L66**     **The Bath Salts State: A Comprehensive Review of Substituted Cathinones in Miami From 2011 to 2023**  
*Elisa N. Shoff, MS\**; *Zaney E. Mary, BS*; *Diane Moore, PhD*

# TOXICOLOGY

---

- 9:45 AM – 10:00 AM    **L67**    **The Search for the K-Hole: A Six-Year Study of Ketamine in Postmortem Cases From the Miami-Dade County Medical Examiner Department, 2018–2023**  
*Jennifer Gonyea, BS\**; *Diane Moore, PhD*
- 10:00 AM – 10:15 AM    **L68**    **Segmented Workflows and the Confrontation Clause: Achieving Congruence Between Constitutional Guarantees, Laboratory Productivity, and Toxicological Expertise**  
*M.J. Menendez, JD\**; *Barry K. Logan, PhD*; *Daniel T. Anderson, MS*; *Donna M. Papsun, MS*
- 10:15 AM – 10:30 AM    **BREAK**

## Alternative Matrices

---

Moderator: Marta Concheiro-Guisan, PhD

Co-Moderator: F. Wayne Lewallen, BS

- 10:30 AM – 10:45 AM    **L69**    **A Quantitative Analysis of Cannabis Exposure Biomarkers in Exhaled Breath Condensate and Oral Fluid**  
*Meena Swaminathan, MSFS\**; *Anthony P. DeCaprio, PhD*  
*(FSF Emerging Forensic Scientist Award Oral Presentation)*
- 10:45 AM – 11:00 AM    **L70**    **The Use of Hair Analysis as a Potential Predictor of Tolerance in Decedents With High Fentanyl Concentrations in Fentanyl-Related Deaths: Preliminary Results**  
*Nicola Pigaiani, MD\**; *Marco Ballotari, PhD, MA*; *Brandi C. McCleskey, MD*; *Francesco Taus, PhD*; *Federica Bortolotti, MD, PhD*; *Rossella Gottardo, PhD*; *Gregory G. Davis, MD, MSPH*; *Karen S. Scott, PhD*
- 11:00 AM – 11:15 AM    **L71**    **A Quantitative Assessment of Five Hair Drug Testing Laboratories With a Commercial Hair Reference Material**  
*Edwin Dale Hart, BS\**; *Svante Vikingsson, PhD*; *Ruth E. Winecker, PhD*; *Eugene D. Hayes, PhD*; *Lisa S. Davis, MS*; *Ron Flegel, MS*
- 11:15 PM – 11:30 AM    **L72**    **The Gonadotoxic Effects of Tobacco Smoking on Human Seminal Fluid**  
*Nadeem-Ul-Hassan Khan\**; *Allah Rakha\**; *Rahat Abdul Rehman\**; *Shahid Nazir, PhD*; *Tahmina Rehman*
- 11:30 AM – 11:45 AM    **L73**    **The Identification of the New Synthetic Opioid N-Piperidinyl Etonitazene (Etonitazepipne) in Postmortem Alternative Matrices**  
*Erika Buratti, PhD\**; *Gianmario Mietti, PhD*; *Alice Cerioni, PhD*; *Marta Cippitelli, PhD*; *Rino Frolidi, MSc*; *Mariano Cingolani, MD, MSc*; *Roberto Scendonì, PhD*  
*(FSF Emerging Forensic Scientist Award Oral Presentation)*
- 11:45 AM – 1:00 PM    **BREAK**

## 23rd Annual Postmortem Pediatric Forensic Toxicology Session

---

Moderator: Robert Middleburg, PhD

Co-Moderator: Nikolas P. Lemos, PhD

- 1:00 PM – 3:00 PM    **L74**    **Postmortem Pediatric Forensic Toxicology**  
*Robert A. Middleberg, PhD\**; *Nikolas P. Lemos, PhD\**; *Katherine Kenerson, MD\**; *Andrew Baker, MD\**; *Sterling J. McLaren, MD\**; *Diane Moore, PhD\**; *Mary Zaney, BS\**

## Wednesday

### Digital & Multimedia Sciences

---

- 11:30 AM – 1:00 PM    **Y1**    **The Forensic Acquisition and Inspection of Aftermarket Vehicle Infotainment Systems**  
*Jett Brandes, MD\**; Andrew Clark; Robert Boggs, APS
- 11:30 AM – 1:00 PM    **Y2**    **The Impact of Zoom on Smart Phone Camera Identification**  
*Gavin Norton\**; Stephanie Reinders, PhD
- 11:30 AM – 1:00 PM    **Y3**    **Known Hash Filtering: An Efficient Way to Eliminate Irrelevant Files and Show Files of Interest in Digital Examinations**  
*Jessica A. Smith, BS\**; Lyndsay Haak, MS; Timothy G. Suggs, BS; James Trevillian, BS; Josh Brunty, ScD
- 11:30 AM – 1:00 PM    **Y4**    **Producing Datasets: Capturing Images on Multi-Camera Smart Phones for Source Camera Identification**  
*Megan McGuire\**; Stephanie Reinders, PhD

### Toxicology

---

- 11:30 AM – 1:00 PM    **Y5**    **The Quantification of Alcohols and Acetaldehyde in Hand Sanitizers Using Headspace/Gas Chromatography/Mass Spectrometry**  
*Ngoc Diem Kieu To, BS\**; Jacob A. Theruvathu
- 11:30 AM – 1:00 PM    **Y6**    **The Development and Validation of a Biotage® Extrahera™ Automated Extraction Method of Opioids and Their Metabolites in Human Urine Using LC/MS/MS**  
*Jessica M. Braeunle, BS\**; Marianne Staretz, PhD; Nadine M. Koenig; Dean Fritch, PhD; Thomas A. Brettell, MS, PhD
- 11:30 AM – 1:00 PM    **Y7**    **The Death of an Accused Person in a Court After the Announcement of the Verdict**  
*Massinissa Benyagoub\**; Mohamed Oualid; Djamil Azzouz; Redouane Benazzouz
- 11:30 AM – 1:00 PM    **Y8**    **The Use of Novel Psychoactive Substances (NPS) in Italy: A Comprehensive Meta-Analysis**  
*Muhammad Usman, PhD, MS\**; Donatella Nardiello; Christian Pallante; Donatella Curtotti; Maurizio Quinto
- 11:30 AM – 1:00 PM    **Y9**    **Monitoring the New England Drug Supply Through Novel Drug Checking Methods**  
*Max T. Denn, MS\**; Joshua S. DeBord, PhD; Alexis D. Quinter, MS; Barry K. Logan, PhD; Alex J. Krotulski, PhD
- 11:30 AM – 1:00 PM    **Y10**    **An Evaluation of Postmortem Redistribution of  $\Delta^9$ -Tetrahydrocannabinol (THC) and 11-Nor-9-Carboxy-THC (THC-COOH)**  
*Isabelle Chevrier, BSc\**; Betty Chow, MSc; Brent Cahill, MSc; James Watterson, PhD
- 11:30 AM – 1:00 PM    **Y11**    **Chemiluminescent Detection Limitations of Cannabinoids in Edibles and Urine Samples**  
*Cristina Elisabeth Lemus\**
- 11:30 AM – 1:00 PM    **Y12**    **Method Development for a Quantitative Panel of Psychoactive Adulterants in Biological Matrices using LC/MS/MS**  
*Shayna R. Kasher, BS\**

## Thursday

### Criminalistics

---

- 11:30 AM – 1:00 PM    **Y13**    **Body Fluid Identification From Mixed Samples and Male DNA Confirmation Utilizing SERATEC® PSA and PMB Tests**  
*Scarlet Tabitha Neilson, BS\**; *Lindsay Loughner Kotchey, MS*; *Mirna Ghemrawi, PhD, MSFS*;  
*M. Gabriela Roca, MSc, PhD*; *Leah Nangeroni, BS*
- 11:30 AM – 1:00 PM    **Y14**    **Exploring the Performance of an Initial Set of DIP-STR Markers for Biogeographic Ancestry Prediction in United States Populations**  
*Lauren Hoopes, BS\**; *Diana Hall, MA*; *Fabio Oldoni, MS*
- 11:30 AM – 1:00 PM    **Y15**    **An Internal Validation of the Janovsky Color Test and Testing the Platinum Chloride Microcrystalline Method for Benzodiazepines**  
*Allison M. Swigart, BS\**; *Lauren L. Richards-Waugh, PhD*; *Kathleen Schell*;  
*Rebecca Barlag, PhD, MS*; *Lyndsay B. Cone, MS, BS*
- 11:30 AM – 1:00 PM    **Y16**    **The Use of Leaf Spray PSI-MS for the Detection of Kratom (*Mitragyna Speciosa*) Leaf**  
*Macenzie Hope Powell, MS, BA\**; *Michael Van Stipdonk, BA, PhD*; *Stephanie J. Wetzel, PhD*;  
*Theodore A. Corcovilos, PhD*; *Hannah Zimmerman-Federle, MS*
- 11:30 AM – 1:00 PM    **Y17**    **The Effects of Fingerprint Development Techniques on Forensic Cartridge Case Identification**  
*Sasha L. Valentino, BA\**; *Lyndsie N. Ferrara, PhD*; *Missy Meredith*; *Sarah Varhola, MS*;  
*Stephanie J. Wetzel, PhD*
- 11:30 AM – 1:00 PM    **Y18**    **The Impact of Age on Strength and Fracture Patterns of the Human Hyoid Bone**  
*Olivia DePergola, BA\**; *Pamela Marshall, PhD*; *John A. Viator, PhD*; *Suvendra Vijayan, BDS, MS*;  
*Jennifer L. Hammers, DO*
- 11:30 AM – 1:00 PM    **Y19**    **Surveillance Efforts to Track Drug Market Changes in Philadelphia, Pennsylvania**  
*Alexis D. Quinter, MS\**; *Joshua S. DeBord, PhD*; *Max T. Denn, MS*; *Barry K. Logan, PhD*;  
*Alex J. Krotulski, PhD*
- 11:30 AM – 1:00 PM    **Y20**    **The Detection of Low Concentration Ignitable Liquid Residues From Fire Debris Using Gas Chromatography/Mass Spectrometry and an Ignitable Liquid Detection Canine**  
*Abigail V. Burke, BA\**; *Nancy A. Love, BS*; *Matthew Regentin, MS*; *Stephanie J. Wetzel, PhD*
- 11:30 AM – 1:00 PM    **Y21**    **An Analysis of Drug Content Distribution on Paper Using Both Soak and Spray Methods by Gas Chromatography/Mass Spectrometry (GC/MS)**  
*Aizlynn M. Michel, BA\**; *Hannah J. Spitzer, MS*; *Ashley N. Ebert, PhD, BS*;  
*Stephanie J. Wetzel, PhD*
- 11:30 AM – 1:00 PM    **Y22**    **Examining the Effects of Thermal Stress on the Structure and Downstream DNA Analysis of Human Teeth**  
*Michael Allie Brivchik, BA\**; *Pamela Marshall, PhD*; *Jennifer L. Hammers, DO*;  
*Rhonda K.K. Roby, PhD, MPH*; *Lisa R. Ludvico, PhD*; *Angie Ambers, PhD*
- 11:30 AM – 1:00 PM    **Y23**    **An Analysis of the Transfer of Drugs to the Envelope in Mail Over Time and Varying Conditions**  
*Madison Ann Eidemueller, BS\**; *Erica Maney, MSc*; *Christopher Merrill, BA, MS*;  
*Stephanie J. Wetzel, PhD*

# YFSF POSTER SESSION

---

- 11:30 AM – 1:00 PM    **Y24**    **Investigation and Detection Methods for Digital and Penile Penetration With No Ejaculation**  
*Brianna Gregory, BS\**; *Janine M. Kishbaugh, MS*; *Lawrence Quarino, PhD*; *Amrita Lal-Paterson*
- 11:30 AM – 1:00 PM    **Y25**    **Identifying the Presence of Semen Through the Detection of Fructose**  
*Taylor M. McClure, BS\**; *Emily Chadwick, MS*; *Pamela Marshall, PhD*;  
*Michael I. Jensen-Seaman, PhD*
- 11:30 AM – 1:00 PM    **Y26**    **Addressing Sexual Assault in Pakistan: Insights From an Analysis of Female Survivors at Lahore General Hospital**  
*Muhammad Ahmad Faraz, MBBS\**
- 11:30 AM – 1:00 PM    **Y27**    **A Gunshot Residue Analysis: The Development of a Combined Procedure for the Detection of Inorganic Elements and Organic Compounds in Traditional and Clean Range Ammunitions Using Spectroscopic Methods**  
*Zaire Elijah Fabian, BS\**
- 11:30 AM – 1:00 PM    **Y28**    **The Recovery of Human DNA in an Aqueous Environment Using Novel Technology**  
*Halle E. Saf, BS\**; *Pamela Marshall, PhD*; *Lisa R. Ludvico, PhD*; *Samantha Border*
- 11:30 AM – 1:00 PM    **Y29**    **The Optimization of DNA Extraction Methods From Alternative Reference Materials**  
*Sophie S. Lee, BS\**; *Leah Nangeroni, BS*; *Lindsay Loughner Kotchey, MS*;  
*Mirna Ghemrawi, PhD, MSFS*
- 11:30 AM – 1:00 PM    **Y30**    **Assessing the Impact Dynamics of Less Lethal Bean Bag Ammunition**  
*Brook Fontaine\**
- 11:30 AM – 1:00 PM    **Y31**    **A Comprehensive Examination of STR and Y-STR Profiling in Samples With Limited or Negligible DNA Quantities**  
*Chih-Wen Su\**
- 11:30 AM – 1:00 PM    **Y32**    **A Landscape Study: Investigating Potential Links Between Adoption and Serial Killers**  
*Amanda F. Piccirilli, BA\**; *Pamela Marshall, PhD*; *Lyndsie N. Ferrara, PhD*;  
*Colleen M. Fitzpatrick, PhD*
- 11:30 AM – 1:00 PM    **Y33**    **The Recovery of Nuclear DNA From Skeletal Remains Decomposed in Freshwater**  
*Zoe L. Sikon, BS\**; *Ashley G. Morgan, PhD*

## Forensic Nursing Science

---

- 11:30 AM – 1:00 PM    **Y34**    **Examining the Presence of Foreign DNA on Neck Swabs**  
*Alexa M. Gonzalez Morales\**; *Lyndsie N. Ferrara, PhD*; *Lisa R. Ludvico, PhD*

## Odontology

---

- 11:30 AM – 1:00 PM    **Y35**    **Allied Dental Professionals' Identification Accuracy of Burned Teeth**  
*Brenda Tallon Bradshaw, BSDH, MS\**; *Marsha A. Voelker, MD*; *Samantha Vest, MS*;  
*Sinjini Sikdar, PhD*

# PROGRAM COMMITTEE FINANCIAL DISCLOSURE

---

As a sponsor of continuing education, the American Academy of Forensic Sciences (AAFS) must ensure balance, independence, objectivity, and scientific rigor in all its educational activities. All faculty participating in a sponsoring activity are expected to disclose any significant financial interest or other relationship: (1) with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services discussed in an educational presentation; and (2) with any commercial supporters of the activity. (Significant financial interest or other relationships can include such things as grants or research support, employee, consultant, major stockholder, member of speaker's bureaus, etc.) AAFS has an established policy regarding conflicts of interest that includes decisions the Program Committee members may make in selecting content for the Annual Scientific Meeting Program. By serving on the committee, regardless of the role, each member has agreed to comply with Section 1.4.7. of the *AAFS Policy and Procedure Manual*.

To serve on the 2023–24 Program Committees, it is required that relevant AAFS staff members, program committee members, and/or reviewers complete a Financial Disclosure Form before being provided access to review submissions for the program. For continuing education accreditation purposes, the disclosed relationships are published below so learners are aware of the nature of any relationships that may impact the selection of presentations for the program. If a committee member failed to provide complete disclosure of a relevant financial interest or relationship, the committee member or reviewer was not allowed to serve. The executed Faculty Disclosure Forms are on file in the AAFS Office.

# AUTHOR FINANCIAL DISCLOSURE

As an accredited provider of Continuing Medical Education, the American Academy of Forensic Sciences requires speakers to disclose any real or apparent conflict of interest they may have related to the content of their presentation(s). The existence of commercial or financial interest of authors related to the subject matter of their presentation(s) should not be construed as implying bias or decreasing the value of their presentation(s). However, disclosure should help participants form their own judgments. AAFS and the Program Committee review the submissions to ensure that the content is educational and not a commercial presentation for companies and their products. Participants may notify AAFS by email (abstracts@aafs.org) should any presentation be considered solely a commercial endorsement presentation. Notification should include presentation number/ID (e.g., BS10, E100, W30) and speaker name.

If an author failed to provide complete disclosure of the discussion of commercial products, a relationship with the manufacturer including employee/employer relationship, sources of support for the research project, and/or the discussion of unlabeled or unapproved uses of pharmaceuticals/medical devices, the presentation was not accepted. Authors are required to disclose at the beginning of each presentation any information disclosed and listed below. Copies of the executed disclosure forms are kept on file in the AAFS office.

***The following presenting authors have disclosed financial relationships with commercial entities.***

# PRESENTING AUTHOR INDEX

The presenting author index can provide a quick reference to find when and in what section presenting authors are scheduled to present at the 2024 Annual Scientific Conference. The reference table below assists you in finding the section in which the presentation will be given. Letters correspond to the scientific discipline/section in which the presentation is being made while the number corresponds to the numerical sequence of the presentation within the section.

A	Anthropology	J	Psychiatry & Behavioral Science
B	Criminalistics	K	Questioned Documents
C	Digital & Multimedia Sciences	L	Toxicology
D	Engineering & Applied Sciences	LW	Last Word Society
E	Forensic Nursing Science	Y	YFSF Poster
F	General	CB	Case Break Session
G	Jurisprudence	LS	Luncheon Seminar
H	Odontology	S	Special Session
I	Pathology/Biology	W	Workshop

# BRING YOUR OWN SLIDES (PowerPoint®) BYOS.ppt

Wednesday Evening: 8:00 p.m. - 10:00 p.m.

In order to keep BYOS.ppt informal, fun, and informative for the large and diverse audience, here are a few things to keep in mind for the BYOS.ppt program at the 2024 AAFS Annual Scientific Conference in Denver, CO:

- Presentations must be in PowerPoint® format.
- Proposals must be submitted on this form accompanied by a “6-slides-per-page” printout of the presentation and an electronic copy on CD or flash drive.
- BYOS is not intended as a forum to present scientific papers. It is designed as a means to present interesting information and/or unusual case(s) that may be educational and blended with humor.
- Speakers should plan on 10 minutes in which to present their material.
- Material being presented in other parts of the AAFS scientific program will not be accepted at BYOS.ppt.
- Tables, charts, and graphs should be avoided, making every effort to use slides of scenes, bodily findings, and evidence.

This completed form, a “6-slides-per-page” printout, and the electronic presentation copy should be delivered to the on-site AAFS Registration Desk by 4:00 p.m. on Wednesday, February 21, 2024. Presentations will be selected and scheduled based on perceived interest to the audience and in the order in which the completed submissions are received. This form and required printout are needed to organize the BYOS.ppt program and to allow appropriate allocation of continuing education credit.
