

2006 Audi A8 L W12 quattro Product Information

European Model shown

2006 Audi A8 L W12 quattro History of the 12-cylinder engine

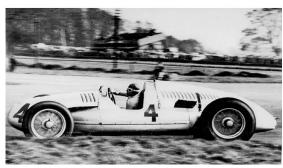

1931

Paris Autosalon, Horch 670, a V12 convertible with 6 liter displacement and 120 hp with 3200 rpm.

1938

Auto Union "Type D" race car, a 12-cylinder with 485 hp and a top speed of 330 km/h.

1991

Tokyo Motor Show. Audi presents the legendary Avus sports car concept with a W-12-cylinder and 509 hp.

2001

Launch of the Audi A8 L 6.0 quattro and Audi A8 6.0 quattro long and normal wheelbase in Europe, with a W12 engine and 420 hp and 406 lb-ft.

Not available in the US/Canada.

2004

World Premier of the new Audi A8 L W12 quattro at the Detroit Motorshow. Audi continues the 12-cylinder legend in the new A8 with a W12 engine and 450 hp. Market intro US/Canada end 2004.

2006 Audi A8 L W12 quattro Differences to A8 L 4.2 quattro

Model / Engine:

(Differences to A8 L 4.2):

- W12 6.0 liter DOHC aluminum alloy, 4 valves / cylinder
- **12 cylinders, 5998 cc** (366 CID)
- **450 hp** @ 6200 rpm, **428 lb-ft** @ 4,000 4,700
- 0-60 mph in **5.0 seconds**
- fuel mileage 15 city/ 21 highway, 17 combined
- curb weight **4,729 lbs** (2,145 kg)
- front brakes 15.2" ventilated disc, 2 piston calipers
- rear brakes 13.2" ventilated disc, 1 piston calipers
- track front / rear **63.74 / 63.10 in** (1,619 / 1,605 mm)

Add. Standard Equipment: (to MY06 A8 L 4.2)

- 19" 12-spoke polished forged alloy wheels
- 255/40 R19 100Y all-season tires
- Wood leather segmented four spoke multi-function steering wheel with shift paddles and matching wood shift knob.(new for 2006) currently n/a with amarette
- Heated front & rear seats, ski sack
- Front seat ventilation & massage
- Exclusive piping & stitching on seats and headrests
- Power side & rear sunshades
- Power trunk open/close
- Power door close assist with power rear childlock
- Rear vanity mirrors
- Advanced key keyless entry & start
- **Dual pane** security glass
- Four zone climate control incl. rear climate control
- Door armrest, center console and <u>lower dashboard</u> in leather with premium stitching
- Alcantara headliner, hatshelf, sunvisors, B-pillars
- Acoustic Parking system front & rear with graphic displa
- Rear Seat Entertainment System with 2 screens in front headrests, DVD changer, headphones, remote
- <u>4-seating</u> configuration with 2 individual power rear seats with 4-way power lumbar, extended rear center console

Additional Options:

(to MY06 A8L 4.2)

- Full Leather Upgrade
- 20" wheels with 275/35 R20 performance tires

 New single-frame grille - exclusive to A8 L W12 quattro are horizontal chrome strips and W12 badge as an active, 3-dimensional symbol symbolizes power and character.

New single-frame grille for U.S. without license plates.

New for 2006:

Adaptive Bi-Xenon headlights (AFS2 curve light like C6) with LI daytime running lights in distinctive 5-pointed star design

- Trapezoid shaped exhaust tailpipes, integrated in the rear bumper, suggest the elegance and power of 12-cylinders.
- W12 Badging: "W12" and "quattro" badge on right side of trunk lid
 New for 2006: "W12" badge on front fenders & left side of front grill
 "W12" on door entry sills

Door handles

• Exterior door handles with chrome strips (Advanced key)

Exclusive 19" 12 spoke polished wheels with all season tires

Optional 20" 9-spoke wheels with performance tires

New for 2006: W12 badging on side of car is relocated from side moldings to front fenders.

- W12 badge on door entry sills
- Exclusive Piping and Stitching on all seats and headrests
- Power front seats, heated, with perforated Valcona leather, seat ventilation, massage function and 4-way power lumbar support. (optional for A8 L 4.2)
- Lower Dashboard, Door Panel, Door armrests,
 Center Console in Leather with Premium Stitching

 4-Spoke Multifunction Segmented Wood Leather Steering Wheel with Shift Paddles and Matching Wood Shift Knob. New for 2006 (note currently not available with amaretto interior) New trapezoid shaped airbag modul transfers Singleframe Grille design to the interior.

- Exclusive Aluminum inlay beneath wood inlay
- Alcantara Headliner, Hatshelf, B-pillar and Sunvisors (optional for A8 L 4.2)
- Four Zone Climate Control (optional for A8 L 4.2)
- Individual Heated Power rear seats with fore/aft, inclination adjustment, easy entry function, perforated Valcona Leather, 4-way power lumbar support.
- Exclusive extended rear center console with headphone jacks for Rear Seat Entertainment System and additional storage compartment.

 Exclusive Rear Seat Entertainment System with 2 displays in the front headrests,
 6 DVD Changer (in trunk), remote control, headphones and headphones jacks in in rear center console.

2005 MY shown above

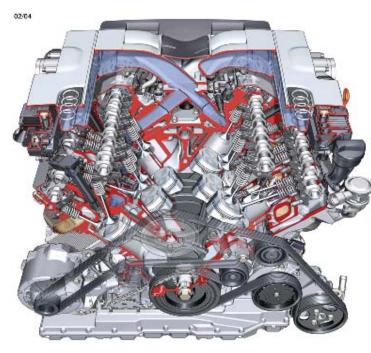

European Model shown

- Singleframe grille with W12 badge
- 6.0L DOHC W12 engine with 450 hp and 428 lbs-ft of torque
- 95% of maximum torque available over a wide range from 2,300 5,300 rpm
- 6-speed Tiptronic[®] Transmission (MB S600 & VW Phaeton only 5-speed)
- quattro[®] IV permanent all-wheel drive (not available on MB S600 & BMW 760)
- Multi-Media Interface (MMI) including retractractable 7" color screen
- Audi Space Frame (ASF), III generation
- Driver adjustable full adaptive air suspension
- Benchmark interior design and craftmanship
- Exclusive <u>piping and stitching</u> on seats and headrests
- Extensive standard equipment, including
 - Rear Seat Entertainment System with 2 displays in headrests
 - Individual power rear seats with extended center console
 - Front Seat Ventilation & Massage, Power lumbar and heated seats front & rear
 - Leather Upgrade, Alcantara Headliner & Hatshelf, Four zone climate control
 - Adaptive Bi-Xenon headlights (AFS 2) with LED daytime running lights
 - DVD Navigation, Bose® Premium Sound System

underlined intems - exclusive for A8 L W12 quattro, not available for A8 L 4.2 or A8 4.2

Engine: W12

Compact and powerful - the W12 engine in the Audi A8 is only 513 mm long and 690 mm wide

Powerful:

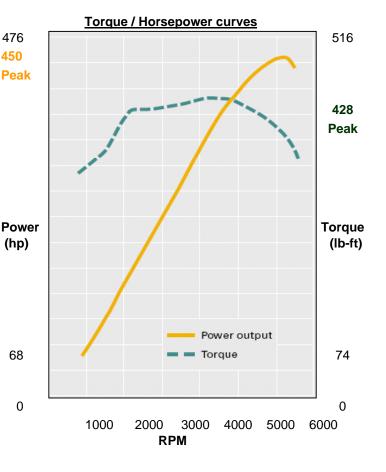

- 428 lb-ft of torque available at between 4,000 and 4,700 rpm
- 95% of maxium torque available over a wide engine speed range from 2,300 to 5,300 rpm

 Needle-bearing mounted low friction roller cam followers

W12 Engine Features:

- 6.0l, 5998 cc (366 CID), 12 cylinders, 48 valves
- 450 hp @ 6,200 rpm
- 428 lbs-ft. @ 4,000 4,700 rpm
- 15° V-angle and 72° bank angle
- Aluminum engine block
- cross flow cylinder head with 4 valves
- Double overhead camshafts per cylinder bank; driven by a single chain, with lowlow-friction roller cam followers
- Infinitely variable timing control for camshafts (52° at inlet and 22° at exhaust valves)
- Bosch Motronic ME 7.1.1. with electronic sequential injection, includes electronic throttle control, hot-film air-mass sensing, cylinder-selective knock control via 4 sensors and permanent lambda control

- W engine design offers a more compact design in relation to the number of cylinders and, as a direct advantage over BMW 760Li and Mercedes S600, allows for a combination of 12 cylinders with quattro all-wheel drive
- The Audi W12 engine, developed together with VW, has 2 connecting rods per crank pin.
 W-engines in the classic sense have 3 separate cylinder banks, where 3 connecting rods are mounted on a single crankpin.
- The Audi W12 engine consists of two ultra-compact VR6 units. Each of the two
 cylinder blocks contains 6 cylinders arranged in pairs at an angle of 15° (V-angle). The
 cylinder blocks are joined at a bank angle of 72° with a joint crankshaft.
- Advantages of the Audi W12 engine:
 - running smoothnes of an inline engine (high rigidity, low level of vibrations)
 - **short, compact design** of an V-engine (513 mm long, 690 mm wide)
 - combination of 12-cylinders with quattro all-wheel drive
 - use of light metals such as aluminum and magnesium

2006 Audi A8 L W12 quattro

Engine: Differences to predecessor and VW Phaeton

The W12 engine was first introduced in the predecessor A8 in 2001. This engine was not available in the U.S. or Canada. For the 2005 A8 L W12 quattro, the engine was refined:

Performance:

- 450 hp @ 6,200 rpm (vs. 420 hp @ 6,000 rpm)
- 428 lbs-ft. @ 4,000 4,700 rpm (vs. 406 lb-ft @ 3,250 4,250 rpm)
- 6-speed transmission
- Fuel consumption n/a

This increase in performance and fuel consumption compared to the W12 in the previous A8 and the VW Phaeton W12 was accomplished through:

- reduction of friction losses of moving parts
- weight reductions (conrods, pistons, wet sump lubrication)
- reduction of exhaust system back pressure

Performance enhancing measures:

Intake manifold - new design, optimized length

- larger throttle bodies to improve air flow
- Optimization of intake manifold length to reduce pulsation in intake port
- Modulation to engine control unit
- lighter pistons and connection rods (better fuel consumption, spontaneous acceleration)
- Reduction of exhaust system back pressure by more than 70mbar (performance)
- vent bores in engine block to reduce piston movement counterpressure (performance)
- increase in nominal engine speed to 6,200 rpm

Oil circuit design changes

- wet sump lubrication with fewer components (weight reduction)
- 2 oil separators on the air intake collector pipe, with direct oil return to the cylinder-head rocker covers

Oil filter / cooler module directly mounted to crankcase

Exhaust emission control measures:

- 4 ceramic monoliths positioned close to the engine make for fast response in conjunction with reduced heat loss from the 4 manifold catalyst modules
- 8 oxygen sensors contribute to better exhaust quality
- pneumatically controlled exhaust flaps in rear silencers

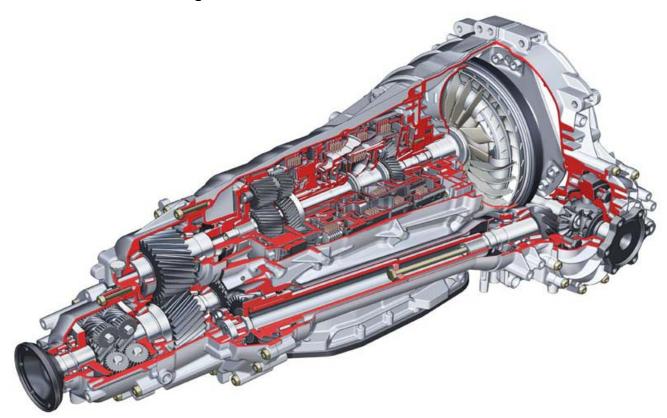

One unit: air gap insulated exhaust manifold and 3-way catalyst in close proximity to engine

Audi 6-Speed Tiptronic Transmission

Features/Benefits

- 6-Speed Tiptronic Transmission (MB S600 & VW Phaeton W12: 5-speed)
- spontaneous power flow, high performance and perfectly refined running
- spread between lowest & highest ratios increased to 6.04
- Dynamic Shift Program (DSP) automatically adjusts to driver's driving style
- Sport Program can be selected on shifter
- Shift Paddles on Steering Wheel

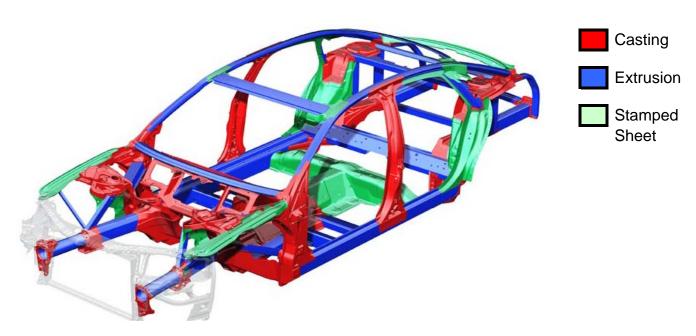

The 6-speed Tiptronic transmission is the exclusive transmission used on the Audi A8

The Audi A8 L W12 quattro - 12-cylinders with Aluminum Space Frame, Adaptive Air Suspension, 6-speed transmission and quattro all wheel drive. A combination that converts engine performance with superb efficiency into propulsion and cornering stability, and effortlessly translates the immense torque onto locomotion.

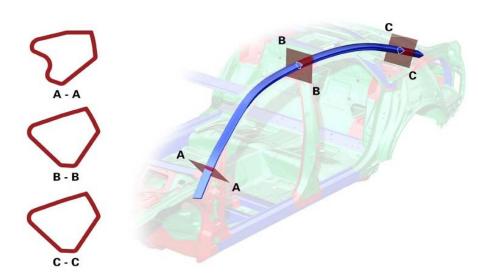

Audi Space Frame (ASF III)

Improvements over previous version of the Audi Space Frame:

- 60% Increased Rigidity
- 17% Less Parts
- 300 lb weight savings vs. conventional steel frame, thereby improving handling
- New laser-hybrid welding technique developed for better quality / more efficient welds

Extrusions

Hydroforming processes allow Audi to use extrusions with varying cross-sections. This enables the perfect cross-section design to be used at all points along the extrusion, thereby increasing strength and rigidity while enhancing functionality.

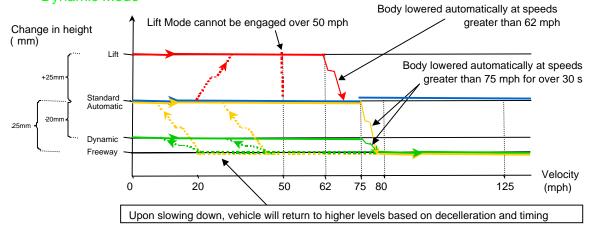

- Infinitely adjustable adaptive damping system
- Four corner air suspension with air spring struts at each wheel
- Automatic self-leveling regardless of load
- Various handling modes (combination of damping characteristic and ground clearance) can be selected via MMI.
- For outstanding dynamic handling combined with excellent ride comfort at all road conditions.

* US/Canada: "comfort" mode renamed to "standard"

Adaptive Air Suspension

- Lift Mode
- Standard Mode
- Automatic Mode
- Dynamic Mode

2006 Audi A8 L W12 quattro Interior Details

A8 L W12 quattro shown with 4-spoke multifunction heated steering wheel & leather shift knob (available at no cost)

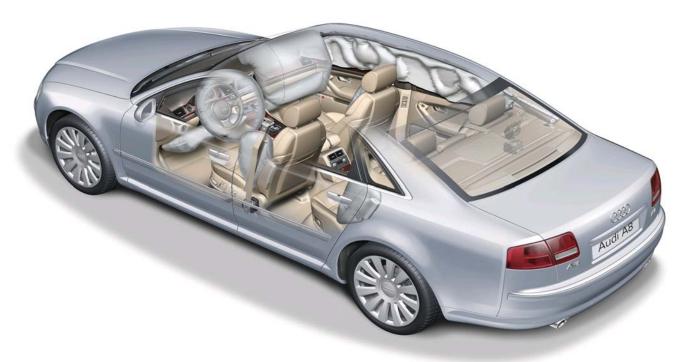

A8 L W12 quattro - Interior design highlights (additional to A8 L 4.2 quattro):

- Genuine wood inlays in Birch Beige, Brown polished walnut & Sycamore with exclusive aluminum inlay below wood
- Door armrests, and Center Console, Lower dashboard, Door panel and glovebox in Leather with Premium Stitching
- Alcantara headliner, hatshelf, and sunvisors
- Premium Comfort Seats with high-grade perforated Valcona leather, driver & passenger memory, 16-way front seat ventilation & massage, heated front & rear seats, front & rear power 4-way lumbar
- Exclusive Piping and Stitching on seats and headrests:
 - Platinum seats with Gray Piping / Stitching
 - Black, Sand Beige & Cream Beige seats with clay Piping / Stitching
 - Amaretto seats with black Piping / Stitching
 - No piping / stitching for blue interior
- Two <u>individual power rear seats</u>, heated, with 4-way power lumbar and <u>extended rear center console</u> with storage compartment, headphone jacks for Rear Seat Entertainment System, and climate controls for standard four zone rear climate control (4 seating configuration)
- 4-spoke multifunction segmented wood leather steering wheel with shift paddles and matching wood shift knob
- Power door close assist with power rear childlocks, power trunk open/close
- Power side and rear sunshades
- Advanced Key with start/stop button on center console
- Bluetooth cell phone preparation with voice control for phone, CD, radio, navigation
- Rear Seat Entertainment System with 2 displays in front seat headrests, 6 DVD Changer, remote control, 1 set of headphones, 2 A/V and 2 headphones connections.
- W12 on door entry sills
- Bose Premium sound system with 6 CD changer
- DVD Navigation with display in 7" retractable MMI screen

underlined intems - exclusive for A8 L W12 quattro, not available for A8 L 4.2 or A8 4.2

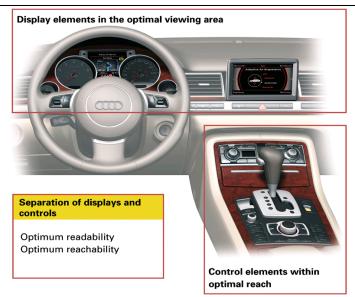

- Driver and front passenger dual-stage, dual-threshold next generation airbag supplemental restraints * for front crash protection.
- Driver annular airbag*, unfolds radially and provides particularly effective protection for occupants who are closer to the steering wheel.
- Front 3-point safety belts, autom.pretensioning, height adjustable upper mounts & force limiters
- Three rear 3-point safety belts with automatic pretensioning and angle adjustment
- Two active front head restraints, automatically pivot forward in the event of a rear-end collision to support the driver's and front-passengers heads. Three rear head restraints.
- SIDEGUARD head protection airbag supplemental restraints* for front & rear occupants, covers window area (A to C-pillar), remains inflated longer to cover secondary effects & crash intrusions
- Front and rear side airbags*, mounted in the seats
- Driver and front passenger knee protection airbags *
- Six crash sensors (two in front and two on each side) rapidly determine which airbags deploy, and when. These sensors, depending on crash severity can initiate:
 Switch on hazard lights, shut off engine and fuel pumps, unlock vehicle, switch on interior light,
- LATCH (Lower Anchorage and upper Tether CHild seat) provisions in rear seats
- Aluminum Space Frame (ASF), provides a stable occupant cell with footwell intrusion in conjunction with a balanced deceleration pattern
- High-performance braking system with ventilated discs and aluminum floating calipers
- ESP (Electronic Stabilization Program) integrating the following safety features:
 ABS (anti-lock braking system), ASR traction control, EBD electronic brake-force distribution, and hydraulic brake assist
- Safety steering column; telescopic, energy absorbing column
- Foot protection through energy absorbant padding and crash-optimised pedal assembly
- Tire pressure monitoring system for all four wheels and the spare tire
- LED Brake lights, proven to sharpen the reaction time of drivers in vehicles behind

^{*} Airbags are supplemental restraints only and will not deploy under all circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

MMI functions can be controlled from the multifunction **steering wheel** controls (thumbwheels with push-button function) or the **MMI control knob and buttons in the center console.**The MMI buttons shown control the radio, CD, navigation, and many other vehicle settings such as the adaptive air suspension - greatly minimizing the number of buttons necessary in the interior.

MMI functions can be viewed from two separate screens: in the **main instrument cluster** and in the 7" **MMI screen** located in the center console which can be stowed electronically for reduced driver distraction.

The Audi Multi Media Interface (MMI) follows a simple and logical 4-step principle:

The new Audi parking system with graphic display includes the previous front and rear parktronic audible warning as well.

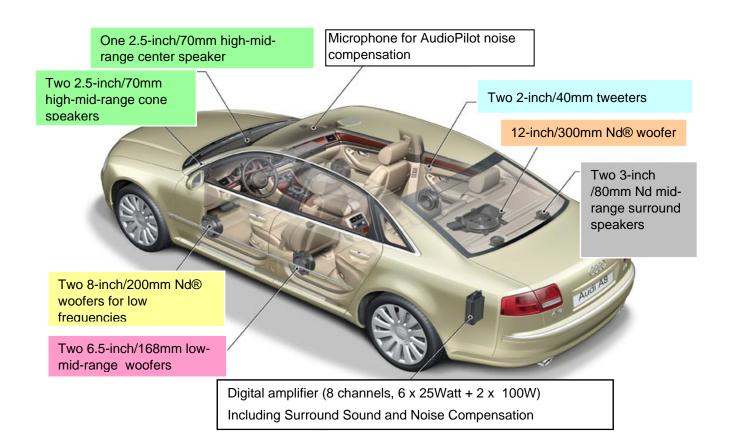

Bose 12-Speaker Premium Surround Sound System

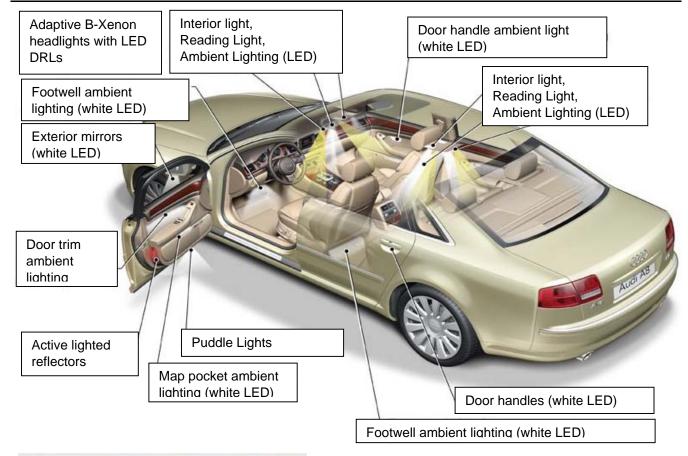

Features

- ◆ Standard equipment on Audi A8 4.2 quattro and A8 L 4.2 quattro
- ◆ 12-Speakers including 12-inch woofer
- Surround Sound capability
- ◆ Bose AudioPilot electronic noise compensation technology
- ◆ DSP (Digital Signal Processing)

2006 Audi A8 L W12 quattro Lighting

Adaptive Bi-Xenon headlights

The Audi A8 L W12 quattro is the first car in the world to be equipped with adaptive Bi-Xenon headlights with LEI daytime running lights, whose distinctive 5-pointed star type lighting elements also hava a dual function as new design features for the front end. For MY 2006 all A8's will get the AFS2 "curve" adaptive lighting like A6.

Thanks to LED daytime running lights, the A8 L W12 is the first vehicle in the world on which the use of DRLs adds virtually nothing to fuel consumption.

Unmistakeably A8 L W12 - 5-pointed star type front lights

Audi's use of LED technology is prevalent in both the **interior** (different light profiles programmable via MMI) as well as in the **exterior** (daytime running lights, rear tail light, rear brake light and third raised brakelight, rear indicator light and side turn indicators). The rear lights are a clear demonstration of how design quality is combined with functionality and state-of-the-art technology: the use of LEDs offers a number of advantages over conventional bulbs:

- brilliant depth
- quicker illumination, proven to sharpen reaction time of the driver behind
- longer service life (at least 10,000 hours, i.e. an entire vehicle's lifetime)
- require less space and so benefit the vehicle's luggage capacity
- consume up to 50% less energy than light bulbs, thus helping fuel consumption

The new Audi A8 L W12 features 2 types of Adaptive Bi-Xenon headlights as standard fee

Adaptive Light in the A8 L W12 activates an extra headlight to better illuminate curves and the edge of the road when turning or driving through a curve. An additional static reflector.

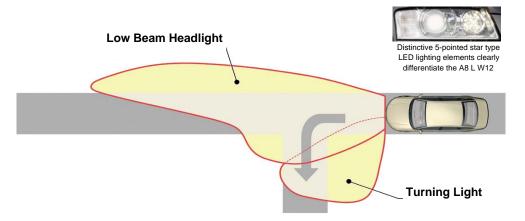

Adaptive Light will get activated:

- on the appropriate side of the vehicle if the turn signal lever is actuated all the way down or up (not "lane changer")
- automatically when driving through tight corners, depending on the steering angle
- on both sides when the reverse gear is engaged to improve peripheral vision and orientation when driving backwards
- only when driving up to a speed of 43 mph (70 km/h)
- only when low beam headlights are turned on

Features:

- LED daytime running lights for optimum visibility & unmistakable appearance
- first vehicle in the world on which DRLs have no adverse effect on fuel efficiency
- additional 35-watt reflector between high & low beam headlight, illuminates an area around 90° in relation to direction of travel. Increases the driver's field of vision.

Adaptive light in the A8 L W12 now also has the same pivoting headlights as the A6 (AFS2)

Audi A8 L W12 quattro exclusive feature

Additional static 35W reflector

<u>LED</u> daytime running lights

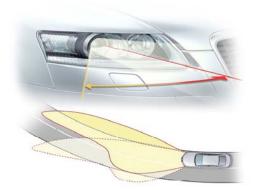

Turning Lights

New Audi A6/ A8/ W12

Pivoting headlights

Daytime running lights

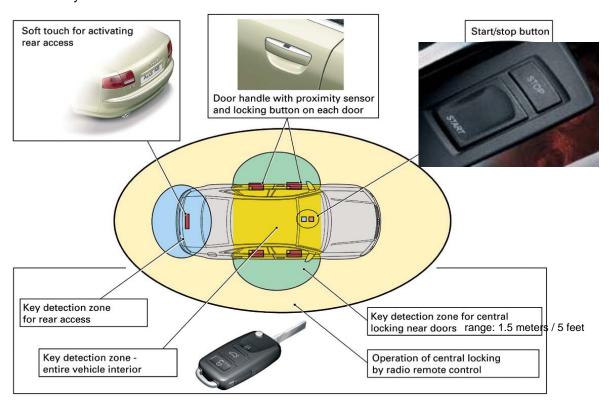

The 2006 W12 will now offer the same pivoting bi xenon headlight as the A6 (AFS2) Which pivots up to 15 degrees to the left or right. It pivots as a function of speed and steering angle.

2006 Audi A8 L W12 quattro Advanced Key

The Audi Advanced Key is standard equipment on the new Audi A8 L W12 quattro.

Avanced Key permits the driver to unlock and lock the vehicle as well as start and stop the engine without having to take hold of the key fob. A signal transmitter in the key releases the central locking when the vehicle is approached and allows the engine to be started at the push of the starter button as soon as the key is in the driver's cell inside the car.

Audi Advanced Key includes

- proximity sensors in all doors and trunk lid
- chrome strips on all door handles with locking button
- Engine start/stop button on the center console above the MMI terminal

Unlocking & Locking the vehicle:

- The authorized key fob must be within 5 feet (1.5 meters) from one of the vehicle doors or the trunk lid
- Actuating the door handle will start the key evaluation process for access authorisation (radio dialogue)
- Doors can be unlocked in general or individually as specified in the MMI (driver's door will always unlock)
- Trunk lid can be opened using the soft-touch button if the key is within the rear detection range
- To lock the vehicle, shift lever has to be in P. When the authorised key is within 5 ft., the vehicle can be locked by touching the locking buttons on the door handle. The door cannot be unlocked immediately after it has been locked to allow the driver to check whether it has been locked properly.

Starting / Stopping the engine:

- Pressing the START button once will turn on the ignition. Pressing the START button all the way down to position 2 will start the engine when the shift lever is in P or N, and the brake pedals are applied.
- Pressing the STOP button will stop the engine if the vehicle is at a complete stop with the shift lever in P or N. Pressing the STOP button a second time and longer while in P will lock the steering wheel.
- ! Pressing the STOP button will not stop the engine while driving (or when the key is thrown out of the window do not attempt!). However, if circumstances require to do so, the engine can be stopped when driving up to a speed of 6 mph (10 km/h) with shift lever in R, D, or S when pressing and holding the STOP button and the brake pedal at the same time (**Emergency OFF function**).

2006 Audi A8 L W12 quattro Four Zone Climate Control

The Audi A8 L W12 quattro features a **four-zone climate control as standard equipment**. Temperature and air distributions for all four outboard passengers can be adjusted separately through dedicated climate controls in the instrument panel in the front and the rear center console. Individual climate control preferences are **stored to the key-fob** (Memory function).

Climate controls are **independent of the MMI controls** but follow the MMI logic, with the 7" retractable MMI screen serving as a convenient **display**. Main climate settings such as temperature, air distribution, fan output and defrosting can be adjusted directly at the climate control unit. The climate controls refer to the four corners of the MMI screen.

Dedicated Climate controls

Front climate controls - the MMI screen serves as a convenient display

Rear climate controls located in rear center console (extended rear center console for 4-seating configuration).

Further functions such as synchronization can be called up in the climate control Setup menu.

The rear air conditioning controls are located in the rear center console. Both temperature and air distribution can be adjusted individually for the left and right side. In addition, output air is heated separately for the left and right side by silicon footwell heaters. The rear air conditioning can also be adjusted from the front throught the Setup menu in the front climate control operating unit.

Features:

- separate temperature and air distribution controls for all four outboard passengers
- indirect, draught-free ventilation
- sun sensor (adjust air temperature/distribution according to direct sunlight exposure)
- humidity sensor (regulates air moisture to reduce interior window fogging)
- particle filter with activated charcoal (absorbs pollutants when fresh air is drawn in)
- air-quality sensor (activates air recirculation function depending on outside air quality)
- residual heat function (operates heater when ignition is off via ON/OFF button)

Air outlets:

- four front outlets in dashboard
- five front outlets on top of dash
- six front footwell outlets
- two outlets in rear center console
- four outlets in rear door pillars
- rear footwell outlets

Attention to detail is an Audi hallmark - air is reheated before reaching the rear footwells.

2006 Audi A8 L W12 quattro Satellite Radio

- A choice of SIRIUS and XM is available as a factory installed option for the 2006 Audi A8 L W12 quattro in the U.S.
- All U.S. A8 models already come with a satellite radio preparation as standard equipment (roof antenna and wiring). Customers can order satellite radio directly from the factory, or as an accessory for installation before taking delivery.
- Factory installed Satellite Radio is covered by the Audi Limited Warranty (4 years or 50,000 miles), Satellite Radio purchased after the sale or lease is covered under the Spare Parts Limited Warranty (12 months or 12,000 miles).
- Satellite radio offers more than 60 music channels, all of them commercial free, along with news, talk, sports, kids, comedy and entertainment channels.
 Channel lineups are organized into categories and displayed on the MMI screen and the driver information display. Music channels also show the artist and song title that is currently played on the MMI screen.
- Channel guides can be viewed and printed at the following links:

Sirius http://www.sirius.com/pdf/channelguide.pdf
XM http://www.xmradio.com/programming/full_channel_listing_print.jsp?sort=number

- Customers can activate the service by providing their ID number found on channel 0
 and the Audi specific promotion code to SIRIUS or XM customer service, or online
 (XM only). During activation, the readio must be on "SAT" mode with the antenna
 exposed without overhead obstructions. Activation should be immediate (15 min. max)
- Satellite Radio is only available in the Continental U.S. Activation and first 3 months
 of service free of charge. Subscription required after 3 month trial period.

SIRIUS Satellite Radio

- Over 100 streams of music, news, sports, talk and entertainment
- Superior digital quality audio
- Coast-to-coast coverage
- 61 streams of 100% commercial-free music
- Over 40 streams of news, talk, sports, kids, comedy and entertainment channels; 21 are SIRIUS exclusive
- SIRIUS is the only satellite radio service providing complete play-by-play coverage of all major sports leagues including the NHL, and beginning August 2004, the NFL. SIRIUS is the official satellite radio partner of the National Football League.
- SIRIUS FIRST TRAFFIC & WEATHER delivers around-the-clock, nonstop traffic and weather reports for the 20 most congested cities across the country to all SIRIUS subscribers. Please check the latest stream listings at www.sirius.com to find your local market.
- Live in-studio performances and remote broadcasts
- Real-time sports scores and continuous market updates delivered to radio display
- Exclusive programming: NFL, NPR, Court TV Plus, The Word Network, and many more
- \$12.95 per month

- Over 120 digital channels of music, news, sports and talk
- Superior digital quality audio
- Coast-to-coast coverage
- 68 channels of 100% commercial-free music
- 32 news, talk, sports, kids, comedy and entertainment channels; 18 are XM exclusive
- 21 exclusive channels of XM Instant Traffic & Weather
- Comprehensive sports coverage from the leading sports networks including ESPN and ESPNews; XM is also the exclusive satellite radio provider of NASCAR Radio, FOX Sports Radio and Sporting News Radio.
- Live original programming and call-in requests
- The only satellite radio service to offer: MTV, VH1, CNN, MSNBC, Cinemagic
- The best names in news and talk, with the biggest talk stars on satellite radio
- \$9.99 per month

2006 Audi A8 L W12 quattro Bluetooth Cell Phone Preparation and Voice Control

The 2006 Audi A8 L W12 quattro features a **Bluetooth® cell phone preparation** and a **voice control system** as **standard** equipment.

Bluetooth® cell phone preparation (Standard Equipment):

Your Audi vehicle is equipped with a phone preparation utilizing a Bluetooth® interface to enable hands-free functionality (cell phones and cell phone subscription sold separately). The Audi cell phone preparation has the following features:

- Using a Bluetooth connection or an Audi phone cradle, the Audi phone preparation will allow you to place and receive phone calls through the Audi MMI or through the voice control system.
- In addition, cell phone book access and caller ID is available through the MMI and instrument cluster (not all phones support these feature).
- During a call, voice mail can be accessed using the MMI
- Up to four different Bluetooth cell phones can be paired to the Audi cell phone preparation, however only one phone can be connected actively at one time.

You will need a compatible mobile phone in order to utilize this function. Not all Bluetooth enabled mobile phone models are compatible with the Audi phone preparation. Visit our web site, www.audiusa.com (www.audicanada.ca), or contact your local Audi dealer, for the latest listing of compatible phones. Audi recommends the use of the Audi phone cradle (sold separately) with your mobile phone while operating this vehicle.

Depending on the cell phone, different steps are necessary to pair the phone to the car using Bluetooth. Please read the Owner's Manual of your cell phone for further details.

Voice Control (Standard Equipment):

The new voice control system features:

- Voice control is activated via "talk" button on the multi-function steering wheel (short push to activate, long push to cancel)
- Significantly improved voice recognition compared to previous generations of voice control with the ability to dial continuous phone numbers ("2485551212" as opposed to "2" pause, "4" pause, etc.)
- Over 44 voice commands to control the following equipment:

Radio Specific station selection ("96.3"), band change (AM/FM/Satellite

Radio), seek up and down

• CD Specific track, specific CD in changer

Navigation Navigate to a saved location, special destinations (next gas station)

for example), last destinations in memory, map zoom control

Phone Voice input of number or nametag ("Call Brian"), nametags can

have multiple phone numbers associated (office, home)

- Additional commands available by saying "Help" at any prompt
- Ability to assign nametags to radio stations, CDs, phone numbers and addresses and recall them using the voice control

These tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy wheather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tires specified for your car or its equivalent. These high performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommende levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. For more information on all of these topics, please consult the owner's manual, your local dealer or call 1-800-FOR-AUDI.

- The Audi Navigation system depends upon signals from the worldwide Global Positioning Satellite network, The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The mapping does not have the same level of detail in all areas. Periodically, the mapping is updated and a new DVD will be required in order to maintain the latest navigation information. This will be available for purchase from time to time at additional cost. Consult your dealer or cal 1-800-FOR-AUDI for details. The Audi Navigation System is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest or other road system changes are beyond the control of Audi of America, Inc. Complete, detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested Audi Navigation System route.
- Your Audi vehicle is equipped with a phone preparation utilizing Bluetooth® interface to enable hands-free functionality (compatible mobile phones sold separately). You will need a Bluetooth enabled mobile phone in order to utilize this function. Not all Bluetooth enabled mobile phone models are compatible with Audi's phone preparation. Visit our web site, audiusa.com (audicanada.ca), or contact your local Audi dealer, for the latest listing of compatible phones. Audi recommends the use of the Audi phone cradle (sold separately) with your mobile phone while operating this vehicle.

Personal refrigerator in pass through to trunk. Available from quattro GmbH, sold orders only. Not available with	0			
optional 5 seating configuration. 1W7				

Personal Refrigerator in pass through

Full Leather Uprade

Performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy wheather conditions. If you drive under those circumstances, you should equip your vehicle with four all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tires specified for your car, or their equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. For more information on all of these topics, please consult the owner's manual, your local dealer, or call 1-800-FOR-AUDI.

 $^{^{\}square}$ Satellite radio is only available in Continental U.S. Activation and first three months of service free of charge.

	rear	54.0 cu. ft.	1529.9 liters			
	total	121.4 cu. ft.	3439.5 liters			
Luggage Volume (S	SAE)	14.6 cu. ft.	412.9 liters			
ERFORMANCE:						
0-50 mph (0-80kmh	n)	3.9	sec.			
0-60 mph (0-100 km/h)		5.0 sec.				
Top speed		Top speed is ele	ctronically limited	at 130 MPH (209 km/h)		
UEL ECONOMY (EF	PA estimate):					
City		15	mpg			
Highway		21	mpg			
Combined		17	mpg			
UEL ECONOMY:	Canadiar	n Estimate				
City			liters/100km			
Highway		10.5	liters/100km			

¹ Performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy wheather conditions. If you drive under those circumstances, you should equip your vehicle with four all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tires specified for your car, or their equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling, however, in order to avoid tire, im or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. Please also remember in making your selection that, while these tires damafling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than otl choices. For more information on all of these topics, please consult the owner's manual, your local dealer, or call 1-800-FOR-AUDI.

2006 Audi A8 L W12 quattro Note

A word about this Product Information. Audi of America, Inc., and Audi Canada believe the specifications in this product information to be correct at the time of printing. However, specifications, standard equipment, options and colors are subject to change without notice. Some equipment may be unavailable when your car is built. Please ask your dealer for advice concerning current availability of standard and optional equipment and verify that your car will include the equipment you ordered. Vehicles in this product information are shown with optional equipment. See your dealer for complete details on the Owner Protection Program, Audi Advantage, limited warranty, Audi 24-hour Roadside Assistance program (coverage administered bu a third party in the U.S. and Professional Dispatch Group, Welland, Ontario in Canada) and a 12-year limited warranty against corrosion perforation. Tires supplied by various manufacturers. "Audi", "quattro", "A8", "ASF", the four rings and Audi emblems are registered trademarks and "MMI", "Parktronic", and "Sideguard" are trademarks of AUDI AG. "Never Follow" is a registered trademark and "Audi Advantage."

- * OnStar uses existing emergency service providers and cellular telephone and satellite technologies. Vehicle's electrical system must be operating for OnStar to work. One year OnStar (Safe & Sound Plan) service agreement included. Call 1-800-ONSTAR-7 or visit www.onstar.com for system limitations and details.
- * To enable hands free function, system requires a hands free phone cradle and appropriate Audi V60 cellular phone. Each sold separately at additional charge. Audi V60 cellular phone activation and subscriptions are the responsibility of the purchaser. Cellular subscriptions, policies and network coverage will vary by carrier. Consult your carrier for
- * Audi vehicles are equipped with a telematics system that utilizes analog telephone signals to enable Audi Telematics by OnStar services. Recently, the U.S. Federal Communications Commission (FCC) ruled that wireless telephone carriers are required to fully support the analog wireless network until February 16, 2008. After this date, it is likely that the analog wireless network will be phased out, rendering analog devices inoperable.
- * Owners of Audi vehicles equipped with analog telematics systems will be offered normal Audi Telematics by OnStar services through December 31, 2007. After this date, and because of the expected phase out of the analog wireless network, Audi Telematics by OnStar services cannot be offered to owners of Audi vehicles equipped with analog telematics systems.

Performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy wheather conditions. If you drive under those circumstances, you should equip your vehicle with four all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tires specified for your car, or their equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. For more information on all of these topics, please consult the owner's manual, your local dealer, or call Satellite radio is only available in Continental U.S. Activation and first three months of service free of charge.

The Audi Navigation system depends upon signals from the worldwide Global Positioning Satellite network, The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The mapping does not have the same level of detail in all areas. Periodically, the mapping is updated and a new DVD will be required in order to maintain the latest navigation information. This will be available for purchase from time to time at additional cost. Consult your dealer or cal 1-800-FOR-AUDI for details.

Your Audi vehicle is equipped with a phone preparation utilizing Bluetooth® interface to enable hands-free functionality (compatible mobile phones sold separately). You will need a Bluetooth enabled mobile phone in order to utilize this function. Not all Bluetooth enabled mobile phone models are compatible with Audi's phone preparation. Visit our web site, audiusa.com (audicanada.ca), or contact your local Audi dealer, for the latest listing of compatible phones. Audi recommends the use of the Audi phone cradle (sold separately) with your mobile phone while operating this vehicle.
