

Welcome from our Chairman

With roots dating back to Savannah's first electric streetcars in the late-19th century, Chatham Area Transit has a long history of helping residents and visitors get to their destinations. We embrace that tradition by meeting today's public transportation needs with a modern fleet of accessible vehicles designed to serve all people.

Our fleet of fixed-route buses, CAT Mobility vehicles and water ferries provide about four million passenger trips a year throughout a special service district that includes Savannah, unincorporated Chatham County and portions of Garden City.

Catch a CAT at one of our 1,300 stops or at the Joe Murray Rivers, Jr. Intermodal Transit Center in the heart of downtown, where you can purchase tickets and passes for multiple trips.

The downtown "dot" shuttle provides free and quick transportation throughout the Historic District thanks to funding support from the city of Savannah. And the Savannah Belles Ferry system links River Street to Hutchinson Island by providing free passage across the Savannah River.

We also help long-distance travelers catch their flights by providing a low-cost shuttle service to and from the Savannah/Hilton Head International Airport.

So if you haven't already, please take advantage of the many services we offer. And for CAT's existing customers, thank you for your support. We look forward to serving you well into the future.

— Dr. Michael O'Halloran,
CAT board chairman

PLANNING A TRIP

Reading a Schedule

Routes are typically named for a major road they serve or a particular area of town. For example, buses on the 14 Abercorn primarily travel north and south along Abercorn Street.

Once you have located the route that best suits your needs, follow these easy steps to catch a CAT:

- Select the route that suits your needs.
- Check the map for any special routing service notes.

- Locate the section of the schedule with the day of the week you are traveling.
- Look at the heading to pick the direction you are traveling.
- Find the intersection closest to your desired boarding point.
- Look down that column to the time closest to your desired departure time.
- Read across the line to find the arrival time at the intersection closest to your destination.
- Be sure to read any special service information marked by an asterisk at the bottom of the schedule.

Google Trip Planner

Our website's Google supported trip planner offers an easy way to figure out how to get to your destination. Whether using a computer or mobile device, just enter the starting address, destination and time of day you would like to travel. It will tell you how long each option should take and include any special instructions like how to get to the nearest bus stop or transfer point. The feature also is available via Google Maps. Just choose the transit option when getting online directions.

Safety Tips

When a customer gets injured on one of our vehicles, the injury is typically the result of stumbling, slipping or falling. Help us make your ride a safe one by following these guidelines:

- Feel free to ask the operator to wait an extra minute to find an empty seat.
- Hold on to poles or straps if no seats are available.
- If standing, stay behind the line on the floor near the fare box.
- Watch your step when boarding and exiting vehicles, and make use of railings and handholds.
- When exiting through the rear door, pay attention to closing doors and be aware of the high steps.
- Be particularly careful when moving about on buses and ferries on rainy days when water gets tracked in.
