Shop online: www.chevsofthe40s.com

Core charge information

All core charges are refundable when we receive your rebuildable unit in exchange. Please remove all external parts and brackets. Core returns must be same as purchased unit.

Part number information

Group and part numbers are original GM when applicable so you may refer to Chev parts book for questions.

Exceptions

Suffix "A"—part not originally available by itself.

Suffix "B"—not originally available as an assembly. Other suffixes, not originally available by itself or is a modified part.

If you have an addition or correction for this catalog, please give us a call. We want to provide the best possible service for you!

*CHEMICALS

Chemicals are shipped domestic ground only (lower 48 states only.) No international shipping.

Parts Index

To our Valued Customers:

For over 4 decades we have been providing the best in restoration parts for 1937–54 Chevrolet Cars & Trucks. We continue to expand our inventory of hard-to-find restoration parts while improving our selection of Street Rod Parts. We strive to provide the best in service, quality and variety of parts needed for your vehicle—from a complete restoration to a full-blown street machine. We have an easy to use Illustrated Index in the front of our catalog to make finding parts easy along with an alphabetical Parts Index in the back.

Street Rod parts are found in our STREET ROD HEADQUARTERS catalog and online at www.STREETRODHQ.com.

Thanks for your business!

*Ron Wade
CEO/Owner*

HOW TO ORDER

ONLINE: Order anytime by accessing our online catalog from our website, www.chevsofthe40s.com. Credit card information is secure and we don't sell our customer database to anyone.

Call toll-free: 1-800-999-CHEV (2438)

Our sales reps are available to assist you:

- via the phone: 6 a.m. – 5 p.m. Pacific Time, Mon. – Fri.
- in the showroom: 8 a.m. – 5 p.m., Mon. – Fri.
- via our lovable voice mail for after-hour and weekend calls.

Existing customers—Simply provide your name and customer number off your catalog label, vehicle year, series and body style, credit card number (if appropriate), part numbers with descriptions and quantities.

New customers—Please provide all of the above information as well as your phone number (in case we have a question about the order) and a complete address including zip code.

Stuff our attorneys want us to say: Chev's of the 40's will not be responsible for any expenses incurred for installation, modification, fitting or shop repairs of parts. The items sold in this catalog are without warranties of any kind. Items and prices in this catalog are subject to change without notice. Information in this catalog may contain typographical errors or inaccuracies. We reserve the right to correct errors or omissions.

HOW TO PAY

Use **Check by Phone** to achieve prompt shipping (10 days faster than mailing a check.) And because it helps reduce our costs, our reward to you is a 4% discount on parts when you place your first electronic-check order by phone. Try it—it's convenient and secure.

Checks by mail are welcome; however the accounting department may hold your order on uncertified funds. At company discretion, a mailed-in check may be converted to an electronic check.

Checks and money orders need to be in U.S. funds.

Returned checks will be charged an NSF fee.

Credit Cards—Visa, MasterCard and Discover are welcome! Ship-to address must match your credit card billing address.

HOW WE SHIP

How We Ship: We ship via UPS and USPS Flate Rate Priority Mail (size and weight permitting). For international orders we use UPS Expedited or USPS Priority Mail. Please talk to our sales staff for a shipping quote.

When purchasing oversized parts, some can be shipped via UPS and others need to be sent via truck freight, so please call for rates.

If paying by check, please call for shipping rates and order total.

Shipping Time on ground deliveries takes 2 to 14 days depending on your location. For faster service options, when placing an order, please ask your sales person for an express delivery quote.

Most orders ship the same day!

Sales Tax: Due to the Wayfair decision, we must now charge sales tax to all applicable states. Tax is calculated on the order total (including shipping). Tax rates vary according to your region.

HOW PROBLEMS ARE HANDLED

Damage Claims: If a package appears to be damaged upon delivery, open the package with the delivery driver and have them note any damages. Then call Chev's of the 40s immediately to notify us of any problems/damages. Do not ship to Chev's of the 40s; we will let you know what to do next.

Shortages: All orders are scanned with a bar code reader before shipping. If, in the unlikely event a shipment error occurs, call us immediately.

Back Orders: Our computerized inventory system allows us to maintain tight control on our stocking levels. However, we do not have control over our suppliers. Back orders are not charged until they ship. Shipment occurs immediately when we receive the part.

RETURNS/EXCHANGES

Made-to-order items, such as glass, are non-returnable. All other parts (excluding Odds & Ends) may be returned within 30 days. Damaged or altered parts cannot be returned. CODs will not be accepted. Returns subject to a 25% restocking fee.

1. Have your invoice ready.
2. Call 1-800-999-CHEV (2438).
3. Obtain return authorization number.
4. Write the number on the outside of the package and on a copy of the invoice.
5. Include invoice copy in package.

Remember: Shipping can take up to 14 days, so allow 3–4 weeks on returns. Warranty applies only to purchase price of item or replacement of part.

Unfortunately credit card companies no longer credit your credit cards for returns after 90 days. Therefore, we will issue in-store credits or a refund check.

Note: Product pricing and availability subject to change.

PHOTOS

Email us high-resolution photos of your restored and street rod Chevys! We love to see them and might even put them in one of our catalogs or advertisements!

You can now have your car or truck on the cover of your catalog!

It's easy!! Simply visit www.chevsofthe40s.com and click the link for "get your own vehicle on your own cover." After you upload a photo, the next time we print catalogs, your catalog will feature your car or truck framed on the cover!

COMMERCIAL
BODY PARTS SECTION
 GROUPS 16.000 - 17.721
 Six Cylinder Models — 1929-1950

KEY TO SYMBOLS

The usage of parts listed in this section is designated either by job numbers, chassis symbols, or model abbreviations shown below:

CAB BODIES (including Cab Over Engine) C CAB
 CAB OVER ENGINE COE
 OPEN CAB Open Cab
 SINGLE UNIT BODIES (Panels, Canopy Express, Suburban Carryall, Etc.) SGL UNIT
 SUBURBAN CARRYALL BODY SUB
 SUBURBAN CARRYALL BODY (with End Gate) Sub w/End Gate
 SUBURBAN CARRYALL BODY (with Panel Doors) Sub. w/Doors
 DOUBLE UNIT BODIES (With Cab and Separate Body) DBL. UNIT
 PLAIN CHASSIS LESS WINDSHIELD FTC or FLAT FACE COWL
 ALL ABOVE MODELS. ALL

See Commercial Body Model Identification Sheet on Next Page for Job Numbers and Chassis Symbols. Suburban Carryall Body Parts for the years 1939-50 are now being listed in the "Master Parts Catalog" along with comparable parts. Body parts which are common to Suburban Carryall, Panels and Canopy Express, may be found listed as Single Unit or under Corresponding Commercial Body Types.

NOTE: Any chemicals will be shipped domestic ground only (Lower 48 states only). No international shipping.

Section 5T: Series Identification Table

1937 was the first year Chevrolet began to offer 3/4- and one-ton trucks as standard models. Chevrolet also introduced the 216 engines and increased the number of

main bearings to four. With the gas tank under the passenger seat, the seat had to be removed to fill the tank. The half-ton bed length increased from 72 to 77 inches. Other Chevrolet truck changes that year included the truck headlights attached to the radiator shell sides and the treads on the running boards ran the length of the board.

The **1938** Chevrolet truck model was much like the 1937 model. The gas tank filler changed to be extended through the cab wall from its location under the seat,

and a heavier bumper with a painted streak was added. The pickup used the flat-head six-cylinder engine borrowed from Pontiac. This was the last year Chevrolet used the generator cutout.

The **1939** and 1940 Chevrolet trucks had a restyled and re-engineered cab and front sheet metal. The new models were the best-looking trucks in

Chevrolet's truck division's history. The Chevy cab was designed for driver comfort and convenience. In 1939, Chevrolet launched its first cab-over-engine truck. This was also the first year Chevrolet used script lettering on the tailgate, and the last year for oval taillights.

Chevrolet continued the new design into the **1940** model year. One of the more obvious differences from the 1939 models was the uppermost

grille bar with the large Chevrolet name written in red script letters. Minor changes in the cab included the instrument panel, curved with a rectangular gauge cluster design from the passenger cars. Chevrolet also introduced the rectangular taillight and the truck bed was three inches wider.

The **1941** Chevrolet truck's front end was all new. The larger, more impressive truck had an increased wheelbase and more power. Chevy discontinued the stamped name in the tailgate that year. The longer wheelbase gave the cab area additional legroom and the seat back was reclined to a more comfortable angle. The headlight assemblies were secured to the fenders.

The **1942**, Chevrolet trucks were essentially unchanged from 1941. The government halted all automobile production in early 1942 because of World War II.

Chevrolet resumed production of civilian trucks for general sales in August, 1945. The government allowed Chevrolet to build civilian heavy-duty chassis cabs for qualified essential users in 1944 and 1945, and the half-ton 115-inch wheelbase pickup in 1945 for qualified essential civilian users.

In **1946**, Chevrolet brought a full line of light, medium, and heavy-duty trucks to the market. All the trucks that year came complete with chrome trim. The Coupe pickup was the only prewar model that didn't return. The light-duty engine was the same as the prewar engine. Only minor changes were made to the Chevy models in 1946.

1947 saw major overhauls. The Advanced Design trucks entered production with a multitude of model changes. The new Chevys had a larger cab, more comfortable seats, and better driving vision. The gas tank was moved to under the truck bed that year. The three-inch wider bed had nine planks versus the seven from the year before. The Chevrolet name was stamped into the tailgate. The larger windshield and bigger side and rear window glass and optional rear-quarter windows greatly improved safety and driver vision.

Chevrolet only made minor changes to the models in **1948**. The transmission gear shift lever was moved to the steering column from the floor, while the parking brake was changed from a floor-mounted lever to a foot-actuated pedal.

Only minor changes were made in **1949**. The gas tank was moved into the cab behind the seat back. The Chevy hood emblem became chrome-plated steel. This was the last year Chevrolet used the lever-action shocks.

In **1950**, the 216.5 cubic-inch six-cylinder engine was tweaked to put out more horsepower. The new modern tubular shocks were introduced. The Chevrolet hood side emblems display their name plus 3100 for a 1/2-ton, 3600 on a 3/4-ton, and 3800 on a 1-ton.

In **1951**, the left-side cowl vent was eliminated and replaced with the door vent windows. The seat adjustment with the metal cable was changed to a rod under the cushion which was run through a rubber grommet and secured to the seat riser frame. In mid-year 1951, the Chevy truck bed changed from nine boards to eight. The maximum speedometer speed was 80 mph.

Push-button door handles were introduced in the **1952** model year. The Chevrolet hubcaps changed from being chrome-plated to gray painted steel with black block letters, though the stamping and shape remained the same as prior years. Some say a very few deluxe 1/2-ton pickups still carried the chrome hubcap. The truck speedometer showed a maximum speed of 90 mph.

In **1953** the Chevrolet truck hood emblem was stainless steel. This was the first year Chevy offered the optional left side mount spare tire on the pickups. This was also the last year for wood blocks under the truck bed.

In **1954** Chevrolet introduced the one-piece windshield, an all-new grille, new parking lights, a new steering wheel, and a redesigned dashboard, the new high-pressure 235 cubic-inch insert-bearing engine on the pickups, and the 261 cubic-inch six-cylinder on large trucks. The Chevy hubcaps had the same shape as before; however, they had only the bowtie emblem. The redesigned bed changed to increase the bed depth with all new bed sides. The optional rear bumper was dropped in the center to make room for a new license plate location.

**SECTION 020T
RESTORATION PARTS**

Oversize shipping charges apply. Please call for rate.

Engine Kit

When ordering: SPECIFY exact year and size of engine (216ci, 235ci or 261ci), HYDRAULIC or solid lifters, standard or exact oversize of rod, main bearings, pistons and rings. Also SPECIFY stick shift or powerglide.

Call for availability of pistons & bearings before boring block or having crank turned.

MEK1 Engine Kit

MEK1 contains all parts necessary to overhaul a complete short block assembly. Including: Rods machined for insert bearings, rod bearings, main bearings, pistons with pins, piston rings, new camshaft, lifters, cam bearings, timing gears, full gasket set, soft plugs, plastigauge, oil pump, bolt boots & block sealant lube (1937-39 includes pushrods). *Assembly lube no longer included.

- MEK139** **.37-39**
216. Includes pushrods, does not include oil pump 0.001 -0.15
..... **\$1,600.00 KIT** ⚠

OLD AIR — Air Conditioning & Heating System — GREAT FOR 6-CYLINDER APPLICATIONS!

Complete Universal systems with everything you need to install Heat & Air Conditioning in your vehicle (minus refrigerant). These Hurricane units are designed for efficiency and minimal use of space to allow for stereos, glove boxes, wiper motors, etc. Choose Hurricane unit with Upper, Lower or Side exit fittings (see dimensions below). System includes Sanden 508 Compressor (or equivalent), mounting brackets, Condenser (you'll need to measure your radiator), Receiver/ Drier, Binary Pressure Safety Switch, A/C & Heater Hose, Wire Harness, Clamps, 4 inch Vent Hose Kit, Control Panel w/ Knobs and more. Pick 4 vents to best suit your dash (some double vents count as 2). Optional items include Electronic Slide Controls (Vertical or Horizontal) in black or aluminum finish, Chrome Drier or Polished Compressor.

Condensers use flat tubes not round creating greater frontal area which equates to improved cooling.

The Heat & Defrost units for these systems mounts directly to your firewall. A/C & Heater lines pass through a custom rubber grommet that fits into the factory blower motor hole (shown below). Take a look at our In-Dash Vent and Switch kit below. These systems are designed for easy installation with custom condenser mounting, aluminum lines and step-by-step instructions. Retains cowl vent and majority of glove box. Has floor Heat and De-Humidified Defrost.

UNIVERSAL FOR MOST APPLICATIONS

A little tight on defroster space for your HVAC unit? Just let your sales rep know that you want the 90 degree defroster outlet option. And hey, we won't even charge you for it.

90° Defrost Option
Requires only 1-7/8" space above for duct hose routing, includes "Y" adapter.

Standard Defrost Outlets
Allow 2-1/2" to 3" above for duct hose routing

**Battery Minder Plus Battery
Charger**

Features:

Safely charges-maintains-conditions all
size/type/brands of starter, deep cycle,
maintenance-type, maintenance-free, sealed,
gelled, agm or dry-type batteries.
Charges and maintains from 1 to 4 batteries
(6 volt) at a time.
Automatically removes (dissolves) harmful
sulphation using safe, u.s. patented electronic
pulse technology.
Guaranteed to never overcharge any battery,
regardless of how long connected.
No need to add water to maintenance-type
batteries during long, non-use storage.
isolation transformer and smart chip
technology ensure safe, long-term
performance.
Splash-proof construction.
Allows battery to be stored safely at -0f to
+120f.
Unit comes complete with quick connect/
disconnect battery clips and a ring terminal
assembly (with easily replaceable fuse) for
permanent connection.

Battery Jump Starter

GB40ALL
Compact, yet powerful 1,000 Amp lithium-
ion jump starter that delivers 7,000 Joules
of starting power. Its patented safety
technology features spark-proof
technology and reverse polarity protection
making it safe for anyone to use. Designed
for use with gas engines up to 6 liters and
diesel engines up to 3 liters and doubles
as a portable power source for recharging
smartphones, tablets and more. -0.15
..... **\$128.00 EA** ⚠

GB70ALL
The GB70 is a portable lithium-ion battery
jump starter pack that delivers 2,000-
amps (15,700 J3S) for jump starting a
dead battery in seconds. It features a
patented safety technology that provides
spark-proof connections and reverse
polarity protection making safe and easy
for anyone to use. It's a powerful battery
booster that doubles as a portable power
source for recharging USB devices, like a
smartphone, tablet and more, or powering
12-volt devices, like a tire inflator, power
inverter and much more. And designed for
a car, boat, RV, truck and more with gas
engines up to 8 liters, and diesel engines
up to 6 liters. -0.15 ... **\$258.00 EA** ⚠

Genius Battery Chargers

G1100.....ALL
1.1 Amp UltraSafe Smart Battery Charger

Charge fully drained lead-acid and lithium-ion batteries up to 40 amp-hour with zero overcharge - Stay safely connected 24/7.

Ultimate performance and versatility. Charge 6-volt and 12-volt batteries, recover damaged batteries, suitable for micro-hybrid start-stop vehicles and works with CANBUS electrical systems.

Ultra-compact, portable, energy-efficient design that's impact, UV and water-resistant (IP65).

Actively monitors battery for safe and efficient charging. Includes spark-proof technology and reverse polarity protection.

Advanced diagnostics automatically tests and detects a bad, damaged, or shorted battery. -0.15 .. **\$50.00 EA** ⚠

The Highway 22 Panel packs all of the punch
of a high-powered OEM system into a smaller,
easy-to-install and extremely compact front
loading package. The components used in
this panel far exceed the power handling
capabilities of any other manufacturer's
system. Easy clamp-style system makes
adding and removing wires easy! No Terminals!
No Crimping! No Screws! Each Highway
Series wiring kit comes with complete, easy to
understand instructions to guide you through
every step.

Turn Signal Kit Self Canceling

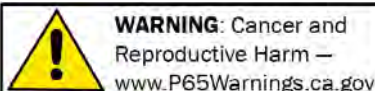

- * Operates on all cars - 6 or 12 volts, Positive or Negative Ground.
- * Self Cancel feature uses time and lack of brake signal to know when to cancel.
- * Time-out user adjustable for 15, 30, 45 or 60 seconds. Factory set for 15 seconds. Turn signal will not time out with the brakes applied.
- * Audible beep on turn - user selectable for On/Off.
- * Easy installation with included instructions, wiring diagrams and terminal labels on control.
- * Fail safes with brake and park lights still functional even with blown turn signal control fuse or no power to the control box.
- * Can operate with combined brake and turn lights or separate brake and turn lamps in rear of car.
- * Can share front Park or Fog lights for front turn signals.
- * Flash rate independent of lamp load. Will flash LED lamps or incandescent lamps at the same rate.
- * 4-way Hazard function.
- * Controller can use any style momentary switch(es) to access all control functions.
- * 10 pin European style screw terminal connector prewired for power, ground and signal switch plug.
- * Internal 15 amp turn function fuse and separate Park and Brake circuit 10 amp fuses.
- * Quick disconnect of control box for easy service. Simply unplug the 10 pin connector.

HID Headlight Conversion

The Features Of HID Conversion

Brighter/whiter illumination
HID lighting provides a crystal white beam of light that increases night time visibility by 3 times.

Quick snap water proof connectors, 35% less power consumption's that a standard halogen. Over 2000 hours of HID bulb life.

HID (High Intensity Discharge) Headlight Conversion. H4 6000K.

Convert your current halogens to Xenon HID.

Plug and play installation including instructions and ballast mounting hardware.

35 watts will draw less 3 amps.
3600 Lumens, in comparison a standard 55w H4 halogen bulb is about 1000 lumens.

*Race use only.

Corvette C4-IFS & IRS Installation Kits for 47-53 Chevy Trucks

Now you can have the ride, superior handling, cornering and braking provided only by the advanced technology built into the Corvette suspension.

We offer quality kits to adapt the late model ('84-'87 and '88-'95) Corvette front and rear independent suspensions to your '47-'55 Chevy truck. (Suspension not included.)

These kits are designed to fit your frame. All brackets are laser cut from cold rolled steel and heli-arc welded for strength and unsurpassed good looks.

These kits utilize Corvette C-4 front and rear suspension components mounted to your frame using the stock Corvette geometry. The real bonus is this system uses the stock Corvette Power Rack and Pinion Steering Unit as designed by

Gm, eliminating and “bump steer” problems inherent with units from vehicles designed in the '70s with light weight vehicles and economy in mind. You can GM sports car handling on your GM manufactured truck. All the corvette suspension components are manufactured from forged aluminum which allows you to decrease vehicle weight while also maintaining strength and a solid suspension.

Not only will you be amazed at how well your truck rides but how fun it will be drive with a Corvette front and rear suspension installed. And let's not forget 4-wheel disc brakes designed to mount to your suspension.

Available **Aldan Eagle coilover shocks** for front or rear allow you to adjust the ride to your liking with 6-position adjustable compression damping and spring rate adjustment also. Rugged construction and combination of oil and gas charging incorporated in each shock are only part of the reason we recommend them with our IFS and IRS kits. Kits complete with instructions and all hardware.

You'll enjoy the handling and new life brought to your truck with these very affordable suspension kits for years to come.

**SECTION 320T
STREET ROD PARTS**

Sound Deadener/ Insulation Kit

ACOUSTI-SHIELD KIT INCLUDES: FULLY ILLUSTRATED INSTRUCTIONS FOR A PAINLESS, TWO-HOUR INSTALLATION. STAGE 1: PRE-SIZED SOUND DAMPER PADS. The first stage consists of pre-trimmed, self adhesive, Sound Damper Pads. Bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit. STAGE 2: PRE-TRIMMED HEAT ABSORBER/BARRIER PANELS, SPRAY ADHESIVES AND SEALING TAPE. The second stage uses a high-tech absorbing, barrier material bonded to the body panels. Will deaden sound and insulate the vehicle from radiant heat penetration. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

Headliner Molded ABS Plastic

These are ABS Plastic with a medium embossed leather grain texture. This material is easily formed with heat and duplicates the original look and texture exactly. ABS plastic is very tough, yet flexible, and does not show scratches or scuffs. It can be easily dyed with a flat vinyl plastic spray paint. All of our patterns are based on out-of-vehicle originals. With few exceptions, truck headliners were black or brown when they came from the factory during the early years. ABS plastic can be easily dyed with a flat, vinyl plastic spray paint. The panels also can be covered with cloth or acoustic material.

1947-53 New Radio

Small size, big features! Original looking unit with current day audio technology. Fits stock dash radio opening without modifications. Shallow 3-1/4 inch case depth allows room for dash components such as electric wipers, air conditioning, etc. 4 x 45 watts RMS output, allows up to 180 watts of audio power. Original style AM dial scale in foreground with FM dial scale in background. Analog controls look and feel like the original radio. All audio controls are easily accessible: Volume, bass, treble, balance, fader and tuner from original looking controls. CD or XM (satellite) inputs included. LED dial lights which never need replacing. Digitally tuned AM/FM/Stereo front end provides stable, high quality reception with 10 station presets (5 AM, 5 FM). 40 year memory retention (presets, etc) with power disconnected. Inputs for CD. Maximum power = 180 watts RMS (45 watts x 4 speakers). Dimensions: 9in. W x 3.25in. H x 4.6in. D. 1/2" dia. shafts on controls for mounting (same size and thread as original shafts). Made in the USA. 1 year guarantee.

ADD COLOR AND STYLE TO YOUR TRUCK BED WITH EXOTIC AND DOMESTIC BED WOODS!!

Kiln-dried and stabilized. Properly milled, sanded and ready to finish.

Sets are **milled to order** using only kiln dried "better than cabinet grade" lumber to assure you receive only the **highest quality product**. All pieces are 3/4" thick, grooved and trimmed to length. **Sanded** using a multi-step process providing a uniform and **extremely smooth surface**, read to finish right out of the box. (Does not come stained or with final finish.) Boards individually numbered for ease of installation and chosen and matched based on color, character and grain. **Grooves available** to fit both OEM and Custom-style bed strips at **no extra charge**. Professional packaging to minimize potential damage during shipping. **Custom width and lengths** are available to meet your specific requirements. **Many other types of woods available**. Call for pricing.

**SECTION 490T
STREET ROD PARTS**

Bed Lids

Standard Features and Benefits

- Resin filled composite honeycomb give a durable, long lasting construction.
- Built in stainless steel cross bar hinge is laminated into the truck lid giving our hinge system strength and durability.
- 2 double stage locking system for extra security.
- Dual heavy duty gas struts are mounted to assist in opening & closing the lid.
- Double weather seal helps protect cargo from the elements.
- Neoprene inside trim seal helps protect bed rail from excessive wear and tear.
- Nylon pull strap to assist in closing.
- Their classic lids are made out of composite fiberglass to last the test of time just like your classic truck.
- Reduces wind drag and saves fuel.
- Easy to install or remove.
- Proven, tight fit.
- Black, white or primered finish.
- *OPTION: Under the lid charcoal carpeting tops the interior of our Traditional Lids giving it a plush look and feel.

Custom Tailgate

Stock tailgates have exposed hinges that leak rusty water, chains that damage expensive paint and unsightly, poorly designed latches. These custom tailgates are manufactured from 16 gauge, satin coated steel. Hidden hinges concealed into the rear cross member. Hidden latch assemblies actuated by 2 small knobs on the inside of the tailgate. Nylon latch bolts and stainless steel strikers assure smooth, quiet and rust free operation. Mounts to Pro's Pick Custom Beds as well as Stock Beds to add a clean custom look to your original bed.

Tailgate Hidden Latch

Stock tailgates are beautiful, they hold the classic look that is near and dear to all enthusiasts. They also carry those tailgate chains that ruin our \$10,000 paint jobs. When Pros Pick designed this kit they felt the criteria had to be:
-Anyone could handle the installation.
-The tailgate had to slam shut.
-No rattles allowed as you drive down the road.
-None of the materials used could ever rust.
-It had to have check straps that could not damage the paint.
-You could install it on a painted bed without damaging the paint job.
-It had to look cool, yet be compatible with the vintage look of the truck.
-A touch of the release buttons on each side allow the gate to open.

SECTION 490T RESTORATION PARTS

Bed Metal Kit

The metal parts in this kit are manufactured of 16 or 14 gage steel, according to the original parts. Parts are ready to primer and bolt together. The kit includes hardware to bolt these parts together and bolt holes are provided. The kit also comes with instructions for bed assembly and bed wood installation. This kit does not include the wood bed floor parts, which may be ordered separately or as a wood bed kit.

- Kit includes the following:
- Rear Cross Sill Hardware - Zinc Plated Steel
 - Front Bed Panels - Original
 - Tailgates
 - Tailgate Chains - Zinc-Plated Steel - Import
 - Tailgate Chain Covers - Black
 - Tailgate Hinges - Steel
 - Rear Cross Sills - Original
 - Cross Sills - Front
 - Bed Sides - Driver Side Original
 - Bed Sides - Passenger Side Original
 - Cross Sills - Second cross sill from the front bed panel.
 - Bed Mounting Blocks and Pads - Blocks and Pads

Note: Midway through the 51 model year, GM changed the number of bed strips from eight (8) to seven (7) strips. This change affects the bed wood, cross sills, rear cross sill and bolt kit. If you are ordering for a 51 GM pickup, please be sure to select 47-51 for trucks with eight (8) bed strips or 51-53 for trucks with seven (7) bed strips so your cross sills and rear sill will be correct.
34-38 and 41-46 Chevy kits include smooth tailgate. 39-40 and 47-53 Chevy kits include "CHEVROLET" script tailgate. 47-53 GMC kits include "GMC" script tailgate.

Shop Manuals on CD

All CDs contain the factory service or shop manual and any applicable supplement. The factory manual is essential. It includes coverage on all mechanical and electrical systems. This is where you find specifications, wiring diagrams, diagnostic procedures, troubleshooting, installation and removal, and covers all systems.

CDs contain the body service manual as well. In some cases, the body information is included in the service manual.

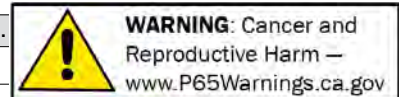

Parts books are included on most CDs; check content information for specifics.

Curing Slow Starting Problems On 1936-1953 6 Volt Vehicles

(Cadillacs Used In This Example)

BY JAY FRIEDMAN AND ART GARDNER

We love six-volt Cadillacs and encourage folks to keep 'em six-volt! Unfortunately, slow or hard starting sometimes causes owners to consider converting the car to 12 volts, which usually is unnecessary and sometimes regretted afterwards.

On six-volt cars, the margin for error is much smaller than on 12-volt cars. On a 12-volt car, if the grounds are iffy, it'll probably still crank. If the 12-volt cables are skinnier than specified, it'll probably still start. If the 12-volt starter is tired or the engine is hot, it'll probably still turn over fine. But, on a six-volt car, maybe not.

Starting from only a nominal six volts (or, more technically, 7.2 volts), if the system experiences much of a voltage drop, there just isn't enough voltage potential to make things work well. So, you need a quality six-volt battery, a good charging system, an ignition system that is in tune, and, most of all, you need **proper cables and good grounds**. If you have paid attention to each of these details and still find the starter motor turning the engine slowly, here is one more trick: add a heavy ground strap directly to the starter's commutator endplate. This article explains how to do that.

Most 1936-'48 Cadillacs' battery ground straps extend from the battery to a bolt on the car's frame. Beginning in 1949, the battery's ground strap extends from this grounding point on the frame to one of the bolts holding the starter to the engine. If you read the CLC online Discussion Forum from time to time, you may have come across a series of postings some months ago that discussed an improvement, which consists

of grounding the battery directly to the "commutator endplate" of the starter.

The first time either of the authors saw one of those postings on the Forum, we were quite skeptical about whether this would really help. However, after additional reading, we not only found out all about endplates, but learned how to go about installing a new grounding bolt on a 1949's starter endplate and hooking up a ground strap to it. We did it on two cars, and, as a result, both now start perfectly.

Look at the back of your car's starter; that is, the end that does **not** go in the motor. This back end is the "commutator endplate," or, as it is called in some Cadillac literature, the "end frame." They are the same on all 1936-'52 Cadillac starters. [See photo below.]

▼ **THE ARROW** points to the commutator endplate of this starter.

Inside the starter, the endplate supports the starter's commutator and its brushes. Using a ruler or even a string, roughly determine the approximate distance from the endplate to the nearest point of your car's battery ground strap. As mentioned in a previous paragraph, on a '36-'48 car, this is probably a point on the frame, while on a '49-'52 car, it is one of the starter mounting bolts. File this distance away for the moment.

Remove the starter from the car and put it on a bench. You'll see that there are two bolts that hold the endplate to the rest of the starter. Remove these very long bolts that go right through the starter, pry open the endplate with a thin screwdriver or scraper and pull it off. (In doing so, you may hear a loud snap as the brush springs are released.) Don't let the rest of the starter components come apart, as the two long bolts hold the whole starter together. You'll see four brush assemblies on the inside of the

endplate. The brushes are the parts on the assembly with a screw through them. They fit over the commutator, which is the copper-colored round part that you can see in the main starter housing.

Hold the endplate up to the starter housing in the position it would be if it were still mounted on the starter. You'll see there is a small hole in the starter housing, into which goes a small pin on the inner perimeter of the endplate that positions the endplate on the starter. In this way, you may get a more precise idea as to the place on the outside of the endplate that is closest to the point on the frame or starter to which your current ground strap is bolted.

On a drill press, or, if you don't have one, using a hand drill, from the inside of the endplate, drill a $\frac{1}{8}$ -inch hole in the endplate about $\frac{3}{4}$ inch in from its outer perimeter, as near as possible to the place on the endplate you noted in the previous paragraph. Make sure the hole doesn't interfere with a brush assembly. Put a rag or piece of rolled-up paper in the hole in the center of the inside of the endplate that contains the bushing to

prevent any drill chips from going in the hole. Using a file or a "deburring" tool, clean off any burrs caused by the drilling on the perimeter of the drilled hole.

Buy a stainless steel $\frac{1}{8}$ -inch coarse-threaded ($\frac{1}{8} \times 16$) bolt $1\frac{1}{4}$ or $1\frac{1}{2}$ inches long, along with two stainless steel $\frac{1}{8}$ -inch nuts and two $\frac{1}{8}$ -inch lock washers. Using one of the nuts and one lock washer, install the bolt on the endplate with the bolt head inside the endplate and the threaded part of the bolt on the outside of the endplate.

Reinstall the endplate on the starter. Holding it at a 45-degree angle against the starter, push one, or, if you can, two of the brush assemblies over the commutator, while at the same time, you bend out the remaining brush assembly springs with a screwdriver so they go over the commutator. This is a bit tricky, so be patient. Make sure the small pin on the inner perimeter of the endplate that positions the endplate on the starter goes into the small hole in the starter housing. Reinstall and tighten the two long bolts. [See photo at right.]

Clean any paint off the other end of the starter where it mates to the motor as well as the adjacent surfaces of the motor. Reinstall the starter back on the motor.

Using the distance you estimated earlier, or, better yet, after measuring it again with the new bolt installed, obtain a ground strap of that length similar to the one in the photo below. It must be long enough to reach from the bolt that holds your battery ground

strap to the car's frame ('36-'48) or the starter ('49-'52) to the new bolt on the endplate. Ground straps like this can be found on eBay, on Amazon or at a local auto parts store. If the holes in the new ground strap are less than $\frac{1}{8}$ inch in diameter, drill them out to $\frac{1}{8}$ inch.

Unbolt the current ground strap from the frame or starter bolt, but not from the battery. Clean any paint or dirt off the place on the frame or starter and its bolt that the ground strap touches. Together with the original ground strap, bolt one end of your new ground strap to the same bolt on the frame or starter to which the original current ground strap is bolted. (You now have two ground straps bolted to the same place on the frame or starter.) Put the other end of the new ground strap over the new bolt on the starter endplate and fasten it with the second lock washer and the second nut.

You are now finished. [See photo, next page.] Your engine will turn over

► **COMMUTATOR ENDPLATE** with new grounding bolt installed.

▼ **TYPE OF** second ground strap needed, length to be determined.

MATERIALS NEEDED

- One 3/8-inch stainless steel coarse-threaded bolt 1/4 or 1/2 inches long;
- Two 3/8-inch coarse threaded nuts;
- Two 3/8-inch lock washers; and
- One ground strap as per the photo, length to be determined.

TOOLS NEEDED OTHER THAN ORDINARY HAND TOOLS

- Drill press or handheld drill; and
- Curved "starter" wrenches for the bolts holding the starter to the motor. [On most cars, the starter wrenches must be 5/8 inch.]

a lot faster and start more easily. By providing a more direct grounding of the starter commutator endplate, more of the battery's electrical potential (voltage) is applied to the starter's brushes, maximizing the effectiveness of the starter. You'll be surprised at how much of a difference this can make—we certainly were! ■

Jay Friedman, winner of the 2010 THE SELF-STARTER Author of the Year award, lives in Decatur, Ga. Art Gardner lives in Marietta, Ga.

NEW SECOND GROUND STRAP on a 1949-'52 starter. (A shorter second strap could have been used.) Arrow points to new grounding bolt. On a 1949-'52 motor, the battery ground strap will be attached to the same bolt at the left as the new second ground strap. On 1936-'48 cars, the second ground strap will be bolted to the grounding bolt on the frame.

Fifty Reasons We Love This '41

Text By Dan Burrill

**Photos By Dan Burrill
&
Jeff Stites**

Today cars come with many standard features that were rare options 60-years ago. This perfectly restored 1941 Chevrolet Cabriolet, owned by Ron Wade is a classic example. In fact this car is so unusual and so well done that it won the Prestigious National Vintage Chevrolet Club of America's Best of Show. But the really unusual things about this car are the 50 factory offered options or accessories that are on the car.

This is partly due to the fact that Ron Wade is a visionary when it comes to rare and collectable cars. In the early 1970's he put together a list of the 25 most desirable cars that he would like to own, cars that were low production, typically Hi-Performance, convertibles or luxury cars.

Now keep in mind that at that time he didn't own any of these cars and in some cases it would be years before he actually found the cars and started restoring them. However, he knew what he wanted, and he started buying NOS parts and accessories for these cars, while the parts were still available at swap meets and from dealers. So years later, when he actually started restoring these low production collector cars, he already had a stockpile of parts.

One of those cars high up on the wish list was this 1941 Chevrolet Cabriolet. He bought the first '41 in about 1984 and before he got started on it, some folks came

by with a better car that they were going to ship to Australia. But when they discovered the cost to ship a car that far, they opted to trade the car to Ron for a crate of original vintage Chevrolet parts and they shipped that instead, and Ron received a nicer car for his restoration project.

Although Ron had many of the required optional accessories, there were many more that were (are) so rare that it took him years to acquire them and several of the optional accessories are on this car may very well be the only ones in existence.

When talking about this car, the word, "rare," comes up about 100 times in the conversation. In fact, it took Ron years just to find the books, brochures, and parts catalogs that showed pictures of some of the original accessories and then the search was on for the actual items.

Needless to say, this is a frame off restoration that took years to complete. The car was in average condition for a '41, so once the car was completely dismantled everything needed to be cleaned, fixed, repaired, re-welded, reinforced or replaced.

Like all restored vehicles the work is tremendous and very time consuming, not to mention the financial aspect. The Restoration was done by Bill Baker; Paint and body by Keith Grendahl at New Start Autobody; Upholstery by the late Ken Jones; and a great deal of credit goes to Master Technician Ray Holland for his help in finishing the project.

After years of collecting parts, Ron's passion finally developed into a business and for the last 34-years his company, Chev's of the 40's, (Vancouver, WA), has been providing the best in restoration parts for 1937-54 Chevrolet Cars and Trucks. And, of course, the "Fabulous '41," has become the Flagship car for the company.

Here are the 50 original accessories that make this a very rare car:

Under The Hood

- Air Filter: The oil bath air filter.
- Valve Cover & Breather: The April 1941 Service Bulletin showed an optional valve cover and breather cap. After some searching, the item was found on a military vehicle in a wrecking yard. Ron speculates these may have been for the military as we were gearing up for WWII.
- The ground strap going from the firewall to the back of the head was only used on cars with 5-band radios.
- The external oil filter was not a standard item and was difficult to find. It was 15-years before Ron could even find what it looked like.
- The windshield washer reservoir bottle with pump on the firewall.
- Radiator overflow return tank.

Exterior

- Antenna – Reel: Took 20-years of aggressive looking to locate one that could be restored.
- The hand crank and the crank support – front bumper. "These are the only ones we have ever seen."
- Driving Lights.
- The sharks tail exhaust tip is extremely rare.
- Fender skirts: These were very hard to find and even in their "found" condition, they were expensive. The fender skirt moldings are almost impossible to find today.
- Fold down rear guard: The rear guard had to fold down for the spare tire to be removed.
- Foot Scraper: This was the first year that Chevrolets didn't have running boards, and GM was concerned that the farmers wouldn't buy the cars because they didn't have anyplace to wipe their feet (before getting into the car). So the designers at GM made "foot scrapers," an option that received mixed reviews.

Exterior-Continued

- Gas cap – GM locking.
- Grille guard bumper and Grille winter guard.
- The Initial holder over the rear license plate frame is a great personal touch. Is this the only one in existence? Ron has never heard of another one.
- Passenger side outside mirror.
- Spare tire inflator.
- Back up light.
- Wing tips, bumper.
- License plate frames are adjustable and the '41s are unusual because the outside corners are reversed in that they go over the top of the straight pieces instead of going under.
- Rear axle ratio 3.70:1
- Washboard, front fender.
- Whitewall tires, wheel disks, and beauty rings.

- Windshield washers.
- The Flying Lady Hood Ornament adds a lot of class, and breaks up the wide expanse of the hood and front fenders.

- Outside Thermometer is mounted on the driver's side door so it can be seen from inside the car without rolling down the window. This was a hard item to find and it took a few years for Ron to finally locate this one.

Interior

- Armrest – center. This center armrest was an unusual item that adds a nice touch to the burgundy front seat.
- Electric clock -An interesting side note; The gold in the electric clock is a different color than the gold in the speedometer even though they were from the same year.
- The Compass is a nice touch and fits well on the center of the windshield.
- Cowl vent knob – ivory.
- Emergency brake whistle.
- Flashlight: this was another hard-to-find item.
- Super Deluxe Heater and Defroster. These are two items that we think of as being part of any modern car, but the defroster and the Super Deluxe Heater were options in 1941. The optional under seat heater couldn't be used with the Cabriolet because there was an X-member added to the frame for additional support.
- Horn, Town and Country.
- Mirror, day/night. This style mirror was only used one year, which made the search just that much more difficult.
- Mirror, lighted vanity for the ladies. The lighted vanity mirror was also a practical item because there are places to write the mileage for the next oil change, check battery, record next lube job, spark plugs, and tune motor.
- Radio – AM and 4 short wave bands. It's been said that at night you could pick up Europe.
- The left and right spot lights with the ivory ball on the handle were only offered for the first half of the model year.

- Radio, pocket portable has become a very expensive item and very hard to find a good one. This also was a 20-year search.
- This Silk Umbrella may very well be the only one that survived. The silk was oiled and over the years the silk is stuck or glued together, so the umbrella is never opened. Still in the NOS box.
- Steering wheel spinner was a neat touch and a handy item to have in the 1940's. Because they cracked easily there are very few around and they require total restoration.
- Tire pump has been restored and the new labels are available. It took years to find out what the original tire pump even looked like. Ron finally found it in a 1937 Chevy parts book.

- This NOS Tool kit is all original and the box has been faithfully reproduced.

- This all purpose combination tool was another rare item.

- Turn signals were another item that took 20-years to find.
- The clip on visor was great for reducing glare.
- Air freshener on visor.

A Short History of Chevs of the 40's

We're not your average parts house! We didn't buy a building, slap a name on it and say, "We're Chevs of the 40's." Neither were we a planned business venture. When President Ron Wade began restoring his 1941 Chevrolet Special Deluxe Cabriolet, he found himself running in circles searching for the correct restoration parts. If he couldn't find it, he had it made. Many of the parts had to be ordered in such a large volume that he began placing classified ads selling these parts that nobody else offered.

So, where did he store all of these parts and pieces? Under the bed, on the fridge, in the rafters over the garage; virtually any place there was an empty hole in the house. That was over three decades ago. Now Chevs has over 25,000 square feet of shelf space, 20 full-time employees who run the day-to-day operation and the latest in computer technology. We constantly research the much-needed, hard-to-find parts that everyone is looking for and if there's a demand, we consider having them made. What was a rather limited supply of parts three decades ago has turned into well over 800,000 parts in stock from which you can choose.

A lot was learned restoring Ron's Cabriolet. Countless hours have dedicated to having the correct parts made as well as improving the products we sell today. Ron's Cabriolet has over 50 (yes 50) factory accessories that have been collected and restored over the last three decades. The accessories are worth more than the car itself!

The 1941 Cabriolet took home "Best of Class" and "Best of Show" in the VCCA National Convention, held in Springfield, Illinois. It also received "Best of Class" at the Forest Grove Concourse D'Elegance, and was one of three cars on the podium for "Best of Show." (The Best of Show award went to a rare 1931 V16 Cadillac.)

1939 = 17 bars; 1940 = 16 bars

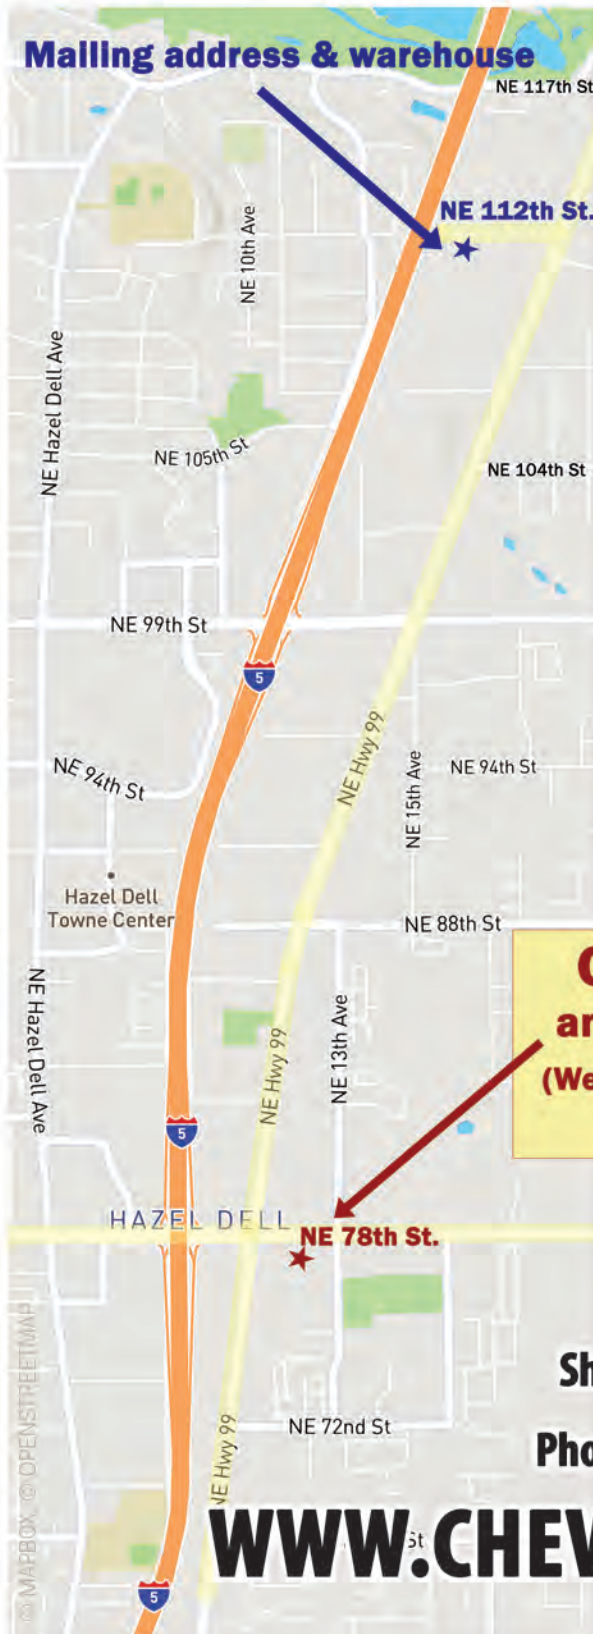

He didn't do it all himself-he had help! The restoration was performed by Bill Baker; the arrow-straight body and paint is courtesy of Keith Grendahl; Ken Jones stitched up the leather upholstery; and master technician Ray Holland provided all of the nitty-gritty details that make this car factory-correct. (And, of course, the able assistance of the Chevs staff.)
