

The logo for D&L Art Glass Supply is contained within a white double-line square border. It features the letters 'D&L' in a large, white, serif font. Below this, the words 'ART GLASS' are written in a smaller, white, serif font, with a thin horizontal line underneath. At the bottom, the word 'SUPPLY' is written in a white, serif font, with wide letter spacing.

D&L

ART GLASS

S U P P L Y

A close-up photograph of molten glass being poured from a ladle. The glass is bright orange-yellow and highly reflective, with a smooth, curved surface. The background is dark and out of focus.

Bullseye Compatible - 90 COE Fusible Sheet Glass

Bullseye Glass manufactures a full line of hand-cast art glass and the largest selection of 90 COE glass and products. The line includes sheet glass, stringers, ribbons, frit, confetti, and rods. Let your imagination go wild, mixing and matching from the wide variety of Bullseye products that D&L stocks. See our entire Bullseye product line at dlartglass.com.

Bullseye Thin-Rolled & Double-Rolled Sheet Glass

Bullseye glass is available in several thicknesses, textures, and surface treatments: single or double-rolled (smoother than single), ripple, herringbone ripple, reed, accordion, and more.

Double-rolled 3mm sheets have a smoother surface than standard single-rolled sheets and are ideal for fusing.

Thin-rolled 2mm Bullseye is always fusible and is exceptionally easy to cut.

Thick-rolled 6mm is available in clear & black single rolled (special order).

See page 20 for coding system chart.

Thickness / Wgt.

	Thickness	Average Wgt.
Standard	30F (3mm)	8 lbs. or 3.7 kg
Thin	50F (2mm)	2.6 lbs. or 1.2 kg
Thick	60F (6mm)	15.4 lbs. or 7 kg

Opalescent

Image Key – Opalescent (Opal)

Approximate color before firing

Color after a full fuse firing. A solid sample indicates no change from unfired to fired.

Images represent glass color and design. There may be slight differences to the actual product.

Bullseye Color Wheel

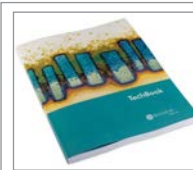

BE 8786

Experience a color-planning revolution with the Bullseye Color Wheel! One side strategically arranges

(almost) every opalescent Bullseye sheet glass color. The other does the same for (almost) all the transparent colors. Use it for visualization, for inspiration, and for picture-perfect realization of any project's palette.

Bullseye Tech Book 2020

BE 8780

The Bullseye TechBook compiles the core of Bullseye's educational articles as of 2019—including TechNotes,

TipSheets, Quick Tips, and Product Use information. It's an incredibly helpful tool for becoming a more polished kilnformer from home.

Bullseye Coding System – Item/Stock number

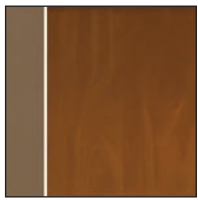

The item /stock number is the secret to correctly ordering Bullseye glass. Each stock number for Bullseye glass bears a 4-digit number code followed by a 2-digit suffix that ends with a F. The first four digits indicate the base glass and the second two digits indicate surface treatment, profile or thickness. See page 20 for coding system chart.

Standard: 3mm, 30F & 31F (Iridescent). **Thin:** 2mm, 50F & 51F (Iridescent).

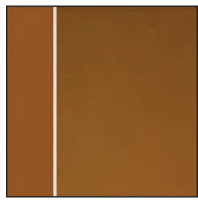

● **Striker** - This style may not reveal its target color until fired.

▶ **Shift** - Hues change depending on thickness and/or lighting, regardless of whether fired or not.

Standard: 3mm, 30F & 31F (Iridescent). Thin: 2mm, 50F & 51F (Iridescent).

 Striker - This style may not reveal its target color until fired.

 Shift - Hues change depending on thickness and/or lighting, regardless of whether fired or not.

Tekta™

Tekta™ is an economical sheet glass that is easy to work with. It is a uniform, machined glass that is Bullseye compatible, 90 COE fusible. Sheets are trimmed on all sides (no waste).

White Tekta™ is the same formula as O113 white but produced in the larger format process used for clear Tekta™. This process gives White Tekta™ a smoother surface with trimmed square edges (rather than the usual rolled edge of Bullseye Glass sheets).

Item #	Description	mm	Size
BE 1100 83F 48	Tekta™ Clear	3mm	24 x 48"
BE 1100 86F 48	Tekta™ Clear	4mm	24 x 48"
BE 1100 89F 48	Tekta™ Clear	6mm	24 x 48"
BE 1401 83F 48	Tekta™ Crystal Clear	3mm	24 x 48"

Black & White

Shaded area demonstrates translucency of white glass on dark backgrounds.

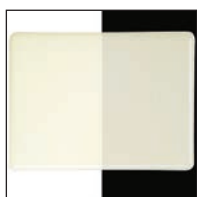

BE O137 30F
BE O137 50F
French Vanilla

Warm with amber tones. Reacts with silver. May strike to a bright dense white. Expect variation.

BE O420 30F
BE O420 50F
Cream

Like French Vanilla but without the reactivity. Fires to an even, warm-toned off-white.

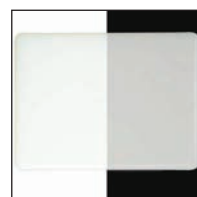

BE O920 30F
BE O920 50F
Warm White

It's still white, just warmer!

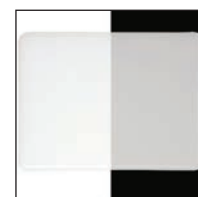

BE O403 30F
BE O403 50F
Opaline

Strikes to a milky white that transmits softened, yet fiery light. Can have a dramatic effect as an overlay.

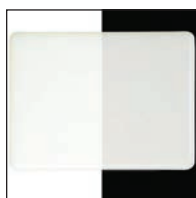

BE O143 30F
Lacy White

Intended for stained glass: when fired, strikes to an even white with unpredictable density.

BE O243 30F
BE O243 50F
Translucent White

Fires to an even white, but more translucent than White (O113). Cold sheet may have irregular white markings.

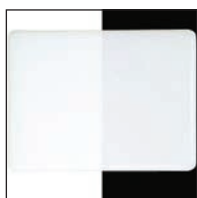

BE O113 30F
BE O113 50F
White

For kilnforming and stained glass. More opaque after firing, but still transmits light.

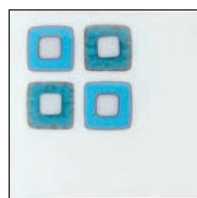

BE O013 30F
BE O013 50F
Opaque White

Bullseye's brightest white. Completely opaque before and after firing.

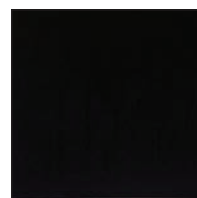

BE O313 30F
BE O313 50F
Dense White

A neutral white well known for its strong reactive potential.

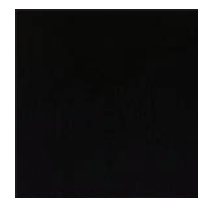

BE O009 30F
BE O009 50F
Reactive Cloud

Slightly more blue and translucent than White (O113) when fired. See reaction information on page 20.

BE O100 30F
BE O100 50F
Black

A classic. This opaque and glossy black melts to a uniform surface.

BE O101 30F
BE O101 50F
Stiff Black

Not as soft as Black (O100), holds its shape well at blowing temperatures. May slump differently than Black.

Standard: 3mm, 30F & 31F (Iridescent). Thin: 2mm, 50F & 51F (Iridescent).

● Striker - This style may not reveal its target color until fired.

■ Shift - Hues change depending on thickness and/or lighting, regardless of whether fired or not.

BE 1015 30F
BE 1015 50F
Silver to Gold

BE 1016 30F
BE 1016 50F
Silver to Bronze

Alchemy Clear styles change the appearance of silver when fired in direct contact with glass.

Bullseye Reactive Glass may react with copper and/or silver chemistry bearing glass to create previously unattained results. Reactive combinations have the potential to create an interface color, which may continue to develop through multiple firings. Copper-based reactions tend to be variations of light to deep red, while silver-based reactions develop as earth tones. Reactions are generally related to the amount of copper and silver content, heatwork, and surface area contact. For Reactive Chart see page 20.

Alchemy Clear

Alchemy Clear is also available as Iridescent. See page 11.

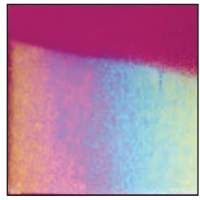

Standard: 3mm, 30F & 31F (Iridescent). **Thin:** 2mm, 50F & 51F (Iridescent).

● **Striker** - This style may not reveal its target color until fired.

Glass Packs

Studio Fuser Pack

The Bullseye Studio Fuser Pack contains approximately 20 colors in a variety of transparent, opal, wispy, irid, and clears, in either 2mm or 3mm thick, totaling 9 sq. ft. of glass. Also included is 10 tubes of frit in an assortment of sizes and colors, 5 bags of confetti and 4 tubes of assorted stringers, plus Bullseye Tech Notes and TipSheets. A great start to building your Bullseye color palette; ideal for the beginner, for experimentation, or jewelry projects.

Item #	Description
BE 8315	Studio Fuser Pack

Tekta™ Pack

The Bullseye Tekta™ Pack includes 30 pieces of 3mm, 8 pieces of 4 mm, and 4 pieces of 6mm all cut to a uniform 10 x 10" size, giving you a total of approximately 30 square feet of glass! Tekta™, being a clear glass, makes it a perfect base or cap glass. Trimmed on four sides, lead-free, clean, affordable, yet easy to work with.

Item #	Description
BE 8356	Tekta™ Pack

Fusible Class Pack

The Bullseye Fusible Class Pack contains over 30 sq.ft. of glass in a colorful assortment of fusible transparents, opals, iridescents, and clears. Sizes are either 5 x 10" or 10 x 10" pieces. All glass is individually marked for easy identification. This is one of the best ways to get a variety of glass at an affordable price.

Item #	Description
BE 8359	Fusible Class Pack

Painting with Glass Pack

This Bullseye Pack includes eight 5 oz. (14 g) jars of colored powders; one 1 lb (0.45 kg) jar of black powder; three jars of clear frits in fine, medium, and coarse grains; and an assortment of colored stringers are the basics. Also includes four stencils, two powder sifters, a frit sifter, sgraffito tool, GlasTac Gel, and TipSheet 4: Designing Your Own Art Glass. Sheet glass sold separately.

Item #	Description
BE 8599	Painting with Glass Pack

Disco Pack

Pre-cut circles of Bullseye 3mm clear fusible glass. Also includes a handout with helpful tips and firing schedules.

Item #	Description	Size	Pk. Qty.

Bullseye Fusible Coding System

Key for Ordering Bullseye Fusible Glass

The stock number is the secret to correctly ordering Bullseye fusible glass. Each stock number bears a 4-digit number. Bullseye's fusible glass code is followed by a 2-digit suffix and ends with an F. The first four digits indicate the base glass and the second two digits indicate surface treatment, profile and/or thickness.

4-Digit Base Code	2-Digit Suffix Code

Bullseye Compatible

Oceanside Glass & Tile manufactures continuous ribbon glass, creating products formerly known as Spectrum Glass and as Uroboros Glass.

Oceanside Compatible™ glass is compatible with existing, genuine Spectrum and Uroboros System 96 products. The net result of this will be more choices in the 96 COE fusible glass line.

Oceanside Glass & Tile also produces baroque sheets which are non-fusible, and can be found on page 39.

Oceanside Compatible™ Sheet Glass

Most Oceanside glass sheets are produced to be approximately 3mm thick, with exceptions in textured products, and both thin and thick varieties.

Oceanside glass sheets are priced by the sq. ft. Continuous ribbon production glass is approximately 24 x 48" or 8 sq. ft.

For information on Oceanside's glass numbering system see page 38.

Transparent - Light transmission is unobstructed by the introduction of opalescent glass or other material.

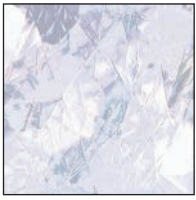

Translucent - These mixed glasses have a high transparent content allowing light to pass through in many or most areas.

Semi-Translucent - Semi-Translucent mixes have a higher Opalescent content, therefore allowing less light to pass through the sheet, or pass through in only small areas.

Opalescent - These glasses are primarily or completely opalescent, reflecting most light.

Glass Packs

Rack Pack - Non-Fusible & Fusible Mix

This Rack Pack features 16 or more different products in a pleasing range of styles and colors of gorgeous non-fusible Artisan Gems and fusible Oceanside glass. Each Rack Pack comes as a sturdy (and handy) wooden box containing a total of 80 pieces of 12 X 12 in. sheet glass (weighs approx. 140 pounds). Factory selected and packed. These Rack Packs will

contain a mix of both Fusible and Non-Fusible glass, in a variety of colors and textures. Fusible sheets will be labeled with F as the suffix. This Item Ships Via Truck Only.

Item #	Description	Pieces	Piece Size
OGT RPAG	Non-Fusible & Fusible Mix	80	12x12"

Fusible Range Rack Pack

The Fusible Range Rack Pack features 16 or more different products in a pleasing range of styles and colors of gorgeous 96 COE fusible glass. Each Rack Pack comes as a sturdy (and handy) wooden box containing a total of 80 pieces of 12X12 sheet glass (weighs approx. 140 pounds). Factory selected and packed. Oceanside Fusible Range glass is Tested

Oceanside Compatible™, yet falls outside of a stock item's standard visual characteristic range (color, translucency, surface, mix, etc.). These are high quality fusible products that have only been identified as FR as a courtesy to professional artisans who require stricter color tolerances for their product lines. This Item Ships Via Truck Only.

Item #	Description	Pieces	Piece Size
OGT RPFR	Fusible Range Rack Pack	80	12x12"

Master Sample Set

The OGT Master Sample Set is your guide to the Oceanside Compatible™ line. Each set includes 2 boxes and approximately 260 color chips (4 x 4 in. sample piece) per set. Dimensions: 13 x 8.25 x 4.75 in. per box Weight: 27 lbs per box (55 lbs per set)

Item #	Description	Pieces	Piece Size
OGT MSS	Master Sample Set	260	4x4"

Oceanside Compatible™

Oceanside Numbering System

Oceanside Numbering System

The Continuous Ribbon Numbering System (Glasses Originating From Spectrum).

Oceanside glass originating from Spectrum Glass Company is classified by a code system that attempts to identify colors by number, and in most cases describes lightness or darkness, color dominance, light transmission and texture. Letters are used to additionally ascribe characteristics such as glass family or texture. The system is imperfect, and most rules have their exceptions – especially since the system has spanned over 40 years of growth and evolution. What follows is based on the original intentions of the system with notes about changes that have affected its accuracy.

The numerical portion of the code has digits to designate:

- Category/Series – general product description (1st digit)
- Color(s) (2nd digit)
- Intensity of color (lightness / darkness)
 - Note the current system eliminated all decimal points, so that there is now considerable deviation of this attribute in the palest colors.
- Degree of translucency
 - The degree of light transmission, as affected by the proportion of Opal, white or colored, in the product. Actual light transmission is also related to the color intensity and texture of the glass. The system uses numbers 5-9, the higher the number being the most Transparent.

Category/Series	Color	Intensity	Translucency
100 series = Transparent/Cathedral (single non-Opal colors).	1 = Amber	1 to 2 = light	5 = Semi-dense (Mostly Opal with swirls of Transparent color)
200 series = Opal glasses, either solid colors or non-white Opals in a Transparent mix.	2 = Green	3 to 4 = medium	6 = Semi-translucent
300 series = Mix of single Transparent color with white Opal.	3 = Blue	5 to 6 = dark	7 = Translucent (About 50% Transparent color, 50% Opal)
400 series = Mix of two Transparent colors.	4 = Purple	7 to 9 = very dark	8 = Semi-transparent
500 series = One Transparent color described by blended hues (like greenish blue).	5 = Red		9 = Most transparent (Mainly Transparent color with swirls of Opal, "Wispy")
600 series = Multi-color mixes (3+) including white Opal.	6 = Yellow		
700 series = Multi-color mixes (3+) not including white.	7 = Orange		
800 series = One Blended-hue Transparent (500 series) mixed with white Opal.	8 = Gray		
	9 = Pink		
	0 = Clear		
	00 = Black		

Glass Reactions

When certain glass combinations become hot enough, they can produce an interface color, or reaction, as the ions in each adjacent glass mingle together. Two Oceanside Compatible™ products, Red Reactive Transparent (60-003-F), and Red Reactive Opal (60-045-F), were specifically developed to react when fused against Copper-bearing glasses, most often producing a deep reddish color where they intersect. Transparent and Opal Red Reactive formulas are also available in Accessory products.

Glasses containing Sulfur also react when fused next to Copper-bearing glasses, producing a range of different reaction levels at the interface that is sometimes much more subtle, but still distinct and interesting.

Vanilla Cream Opal (210-73S-F) is a high Sulfur content glass that is so reactive, it even changes from within. After full fusing, the interior of the glass stays its pre-fused buttery off-White color while the exterior brightens to a beautiful vivid and slightly warm White.

Non-Fusible Sheet Glass

Oceanside also produces non-fusible Baroque art glass. Baroque offers beautiful eddies of pristine white, or deep burgundy (OGT BRBURGUNDY) swirled across a clear base.

This item is intended for stained glass, mosaics and other cold working applications. It is not intended to be kilnformed/fused.

Priced by the sq. ft, sheet size is 24 x 48 in.; 8 sq. ft.

Glass Packs

Rack Pack - Non-Fusible & Fusible Mix

This Rack Pack features 16 or more different products in a pleasing range of styles and colors of gorgeous non-fusible Artisan Gems and fusible Oceanside glass. Each Rack Pack comes as a sturdy (and handy) wooden box containing a total of 80 pieces of 12 X 12 in. sheet glass (weighs approx. 140 pounds). Factory selected and packed. These Rack Packs will

contain a mix of both Fusible and Non-Fusible glass, in a variety of colors and textures. Fusible sheets will be labeled with F as the suffix.

This Item Ships Via Truck Only.

Item #	Description	Pieces	Piece Size
OGT RPAG	Non-Fusible & Fusible Mix	80	12x12"

The Paul Wissmach Glass Company was established in 1904. Many of the color batches used by Wissmach at the turn of the century are still used today, and new glasses are continually added.

Wissmach produces a variety of colors and textures. They are known particularly for their English Muffle, Mystic, and Wispy lines (yes, wispy, not wispy, as in Wissmach Wispy.) They are also known for their dazzling opalescents, cathedrals and streakies.

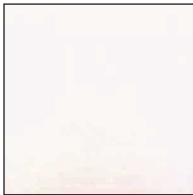

Recent additions to Wissmach Art Glass include Wissmach 96 COE fusible glass sheets and frit. Sheet size: Approximately 32 x 42" (81 x 107cm), or 9.33ft (.87m²). Average sheet thickness: 1/8" (3mm). D&L can special order up to 32 x 84" sheets (18.67 sq. ft.). Thin sheets (2mm) are 32 x 21". Different thicknesses are also available, 4mm, 5mm, and 6mm. Call or visit dlartglass.com.

Luminescent

Luminescent glass is similar to other iridescent coatings. Different effects can be achieved when firing with the coated side up or down. Fire with the coated side down, coating will intensify. Fire capped with clear glass and the luminescent coating will completely fade.

English Muffle

Originally produced in England during the early 1900's, and popular in Victorian windows, English Muffle is suitable for both restoration and contemporary stained glass design. English Muffle is known for its soft colors, highly refractive texture and crystalline quality. The texture appears as a non-directional ripple, allowing for minimal waste. Glass sheet size: 32" x 42" or 9.33 ft2 (81 x 107cm) or .87 m2). Priced by the square foot.

Youghioghney Glass is a small manufacturing company that specializes in the production of stained glass sheets and glass products for the art and stained glass industry. Its products are distributed world wide for use in making of stained glass lamps, panels, windows, and other arts and crafts. Youghioghney Glass is world renowned in the artist community for its uncompromising quality and color artistry, designed to recreate the magnificence of nature's palette.

Most Youghioghney sheets are priced by the square foot. Sheet size: 24 x 36 in. (60 x 90cm) or 6 square feet (.56m²).

The following Youghioghney sheets are sold as each - not by the square foot:

Youghioghney Granite sheet - 18 x 28 in.; 3.5 sq. ft., Youghioghney True Dichro sheet - 28 x 18 in.; 3.5 sq. ft., URO by Yough - 24 x 36 in.; 6 sq. ft.

Youghioghney Y96 Sheet Glass

Youghioghney Glass has introduced a line of 96 COE compatible glass. The 96 COE compatible glass has a palette of robust opal, cathedral colors and multi color mixes. They have used standard COE 96 fusing schedules that are available online. Y96 Glass is tested using both a dilatometer to measure actual COE and a polariscope to ensure the product meets the set standard.

Youghiogheny Non-Fusible Sheet Glass

Tiffany Reproduction Glass - three- and four-color mixes - use a base glass of specially formulated opal having a true white cast, surface hazing and the waxy quality normally associated with the glass made by Tiffany.

Stipple Art Glass

Stipple's waxy, ice-like effect sets it apart from the rest. Due to the translucent quality of the glass, there is a 3D effect when colors are streaked together. This becomes beautifully apparent when illuminated. Youghiogheny Glass is proud to have replicated these qualities used first by Tiffany Studios.

Tiffany Reproduction Glass

Youghiogheny Glass has developed a series of authentic Tiffany Reproduction Opalescent Glass. These three and four color mixes use a specifically formulated opal base glass. This base creates a true white cast, surface hazing, and the waxy quality that is generally associated with glass made by Tiffany.

True Dichro

Youghiogheny "True Dichro" glass will change in color and opacity depending on the surrounding light. In reflected light, it will appear opaque. The glass comes alive in assorted shades of pinks, purples, blues and yellows with transmitted and natural light. Variation between sheets should be expected. Sheets size approximately 28"x18" (3.5 sq. ft.)

Oceana Glass

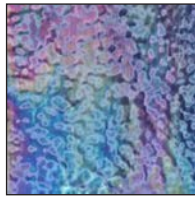

Oceana Glass mottles are soft with a delicate wispy background. Oceanas dichromatic glass appears opalescent in reflected light and changes to brilliant swirls and mixes of fiery pinks, reds and yellows in transmitted light. The primary color is listed first on the two-color and three-color mottles. Additional colors indicate secondary colors streaked into the base glass. Oceana is sold by the each, sheet size 28 x 18".

Van Gogh Glass

Colorful, sparkly and unique, use Van Gogh glass sheets for mosaics or stained glass!

Van Gogh Glass starts as a clear glue chip sheet (a fern-like texture). The sheet is hand painted on the textured back side with metallic automotive-type pigment. The metallic paint is covered with black paint, so the glass is completely opaque and gains a mirror-like depth along with the sparkle. The front remains smooth for ease of cutting. As this is a hand-painted product, expect variation in color including variation from the images used on this website.

Van Gogh Glass sheets are approximately 24 x 36 in. (6 square feet) and 4 mm thick. Van Gogh glass is not fusible.

Glue Chip Glass

Clear Glue Chip Patterned Glass

Glue Chip is a patterned glass created by sandblasting clear glass and then pouring hot animal hide glue on the surface and allowing it to dry. The glue then naturally chips away, creating a surface texture resembling a fern or feather-like pattern. Priced by the square foot or Closed Case if indicated.

Coatings by Sandberg, CBS, produces Dichroic glass, through precision manufacturing and careful monitoring, on a variety of glass types. CBS coatings are specifically designed for hot work. CBS coats the glass for use in fusing, slumping, beadmaking, glass blowing, flame working, and any other technique that involves the manipulation of glass with extreme heat. Low color distortion properties at high temperatures make their products the first choice of the most demanding professionals and ideal for novices as well.

Coatings By Sandberg (CBS) Dichroic Sheet Glass

Sheets are sold in full, half, or quarter sheet, except for Rainbow 1 & Rainbow 2 colored sheets (sold full or half only). Full sheets are 19" dia. rounds. They are approximately 262 sq. in. Half sheets have been cut down from 19" dia. circular sheets and are approximately 131 sq. in.

Transmitted color is the straight-through transmission color and is listed first in the description, the second color listed is the straight-back reflected color.

Code ID: Bullseye Thin Black – BTB, Clear – BTC; Oceanside Thin Black – STB, Clear – STC; Wissmach Thin Black – WTB, Clear – WTC. For half, quarter, scrap, accessory glass including frit visit dlartglass.com

Non-Fusible Sheet Glass

Kokomo Glass

Kokomo documents sales of its glass to Tiffany's studios as early as 1891. Recognized as the oldest manufacturer of magnificent color art glass in the United States, the company is dedicated to providing the artisan and craftsman with the finest in glass products available. Many textures and a choice of densities are available in opalescent, cathedral, streaky and opalume glass.

Non-Fusible Sheet Glass

Krosno Glass

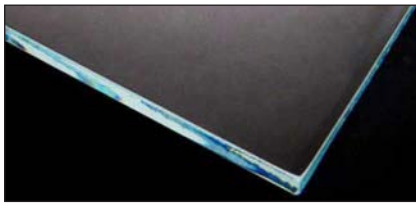

Krosno antique glass from Poland is an inexpensive mouth-blown antique glass.
Average Sheet Size: 24" x 34" (60 x 85 cm) or 5.67 sq.ft. (.51 m2). Priced by the square foot.

Call today for availability!

Specialty Glass

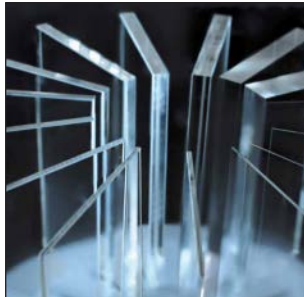

Starphire Ultra-Clear Sheet Glass

Starphire Ultra-Clear glass offers the ultimate in brilliant transparency. This optically clear glass lends itself to sculptural faceting techniques quite nicely. Layers can be laminated to create a clear glass block for faceted sculpture or jewelry. Include dichroic glass for spectacular effects. Sold as sheets.

Item	Size
STF 1214	12 x 12 x 1/4"
STF 1238	12 x 12 x 3/8"
STF 182414	18 x 24 x 1/4"

33P 38	3.8mm	16.5"x22.5
33P 65	6.6mm	16.5"x22.5

Robax Fireplace Glass

SCHOTT ROBAX is a transparent glass-ceramic with a very low thermal expansion, which means it can take the heat. It is particularly well suited for use as a window or door light in heating devices such as wood stoves, pellet stoves, wood and gas fireplaces, and fireplace inserts, etc. ROBAX is available in a variety of shapes and sizes, and can be decorated and fabricated. Unlike tempered glass, ROBAX can be cut making it easy to replace broken tempered stove glass with glass-ceramic. Available in cut-to-size pieces or cases for an additional fee.

SHIPPING & PACKAGING

General

All shipments and prices are FOB Denver, Colorado.

Small package (UPS and FedEx) glass and tool orders placed before 3 p.m. (MST) are usually shipped the same day.

Expedited, international, and drop-ship are available.

Glass via Box Shipments D&L offers glass shipments via box in various box sizes. Call your sales representative for details. There is a box fee in addition to shipping charges. Glass boxes are a one-time use. Customer assumes all responsibility for glass damages.

Hazardous and Regulated Materials

D&L packs and ships according to federal regulations. Hazardous materials are shipped via motor freight only. SDS sheets are available at dlartglass.com/about/msds.

Additional fees for items and services include, but are not limited to:

- Insurance
- Oversized-box charges
- Various specialized boxes
- Crates/skids
- Additional handling charges
- Cutting fees

BACKORDERS

D&L keeps a fantastically well-stocked inventory. Occasionally an item you wish to order may be out of stock due to popularity or manufacturer out-of-stock. At your request, we will notify you of out of stock items prior to shipping. D&L staff is happy to suggest substitutions for any out of stock items. We will notify you when your back ordered item(s) are in stock and available to ship.

CUSTOMER SATISFACTION POLICY

Ordered It Wrong

All sales of glass, special orders, books, patterns or discounted items are final. Other returns are accepted within 15 days of purchase. Before you return merchandise you must call your account representative. Returned items must include the D&L invoice, all accessories, the reason for return and the original packaging. You will be responsible for return freight and up to a 25% restocking fee.

Received Incorrect Items

If incorrect merchandise or quantities are received from D&L, notify us within five days of receipt and allow us to correct the problem. Failure to notify D&L is considered evidence that D&L has satisfactorily performed its obligation.

Defective Products

If you receive defective items, notify D&L immediately. Our representative will tell you whether to return the item to D&L or directly to the manufacturer.

D&L will honor only defective material that is backed by manufacturer warranty and sold by D&L. D&L's sole obligation is limited to repair or replacement of the subject merchandise as provided herein. There shall be no express or implied warranty of merchantability or of fitness for a particular purpose. In no event shall D&L be liable for consequential or incidental damages. No replacement after 60 days. No claims for labor or damage will be allowed.

Damaged Merchandise

We ensure that all items are in good condition when they leave our warehouse. D&L is not responsible for any subsequent damage. If you receive damaged goods, you must accept the shipment, note evidence of damage on your delivery receipt and file a damage claim with the freight carrier. D&L will provide information to assist you with your claim.

If you receive a damaged small-box shipment retain all packing materials, take pictures and contact your account representative. If you refuse any shipment from D&L, you will be liable for the purchase price of the merchandise, storage charges, subsequent freight charges to and from D&L, as well as any additional charges.

Protecting Your Information

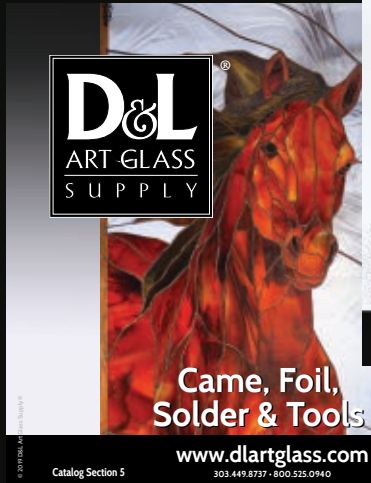

When you do business with D&L, be assured that we will protect your customer information. We will not sell or share your information with other companies for marketing purposes. D&L Art Glass Supply values our relationship with you.

While we have made every attempt to ensure the accuracy and completeness of the information provided, D&L assumes no responsibility for errors or omissions.
