Go to fiatcanada.com for more exciting FIAT 500X highlights.

500X is the first FIAT® to offer the confidence of All-Wheel Drive (AWD), and this innovative drive system brings unique functionality and improvements over conventional AWD systems. It features a disconnecting rear axle that helps to improve fuel efficiency. No input from the driver is needed — this AWD is intelligently and seamlessly engaged based on conditions and drive style.

The FIAT Dynamic Selector, standard on AWD models, puts three customized driving modes at your fingertips: The basic **AUTO MODE** is designed for the everyday — it will smooth things out to help optimize fuel efficiency, emissions and comfort.

SPORT MODE optimizes the transmission shift points for improved performance and accelerator feel for a sportier, faster driving response.

TRACTION+ MODE maximizes low-speed traction — the kind you need when things get a little slick or bumpy. It all works by providing additional wheel-slip through specially tuned chassis controls and a more direct engine response.

AWD

AS EFFICIENT AS

7.1/160

L/100 KM HWY⁶ HORSEPOWER

The spacious FIAT® 500X is also big on power. The 1.4L MultiAir® Turbo engine with 6-speed manual transmission delivers 160 horsepower, 184 lb-ft of torque, 7.1 L/100 km hwy⁶ and is standard on 500X Pop FWD.

All other 500X models feature the 2.4L Tigershark® MultiAir I-4 engine. It packs a 180-horsepower punch with 175 lb-ft of torque. Paired with an innovative 9-speed automatic transmission, fuel economy is as efficient as 7.8 L/100 km hwy⁶.

Pairing the Tigershark with the FIAT 500X 9-speed transmission creates a dynamic duo that optimizes engine output, so you can look forward to fast, assertive launches and smooth, power-when-you-need-it delivery on the highway.

*ITS ENDLESS
CAPACITY FOR
FUN INCLUDES
ROOM FOR FIVE
AND FLEXIBLE
SEATING.*

Adventure brings great discovery, and the more you do, the more you'll come to appreciate FIAT® 500X for its versatility and accommodating manner. Go ahead, bring a few more bags — the efficiency and utility of its interior almost magically makes room for just about any packing scenario. Its large rear cargo area, available height-adjustable rear cargo load floor, 60/40 split-folding rear seats and a fold-forward front-passenger seat welcome all the longer, wider and taller things you once said “forget it” to.

FIAT 500X Trekking shown in Giallo Tristrato.

Designers also took into account all the things we need and carry day-to-day and devised genius storage solutions to keep them stashed and organized. A dual glove box with a lower portion and a centre-console storage area that houses a dual-remote USB port (charge only) and 12-volt outlet are just a couple of convenient features.

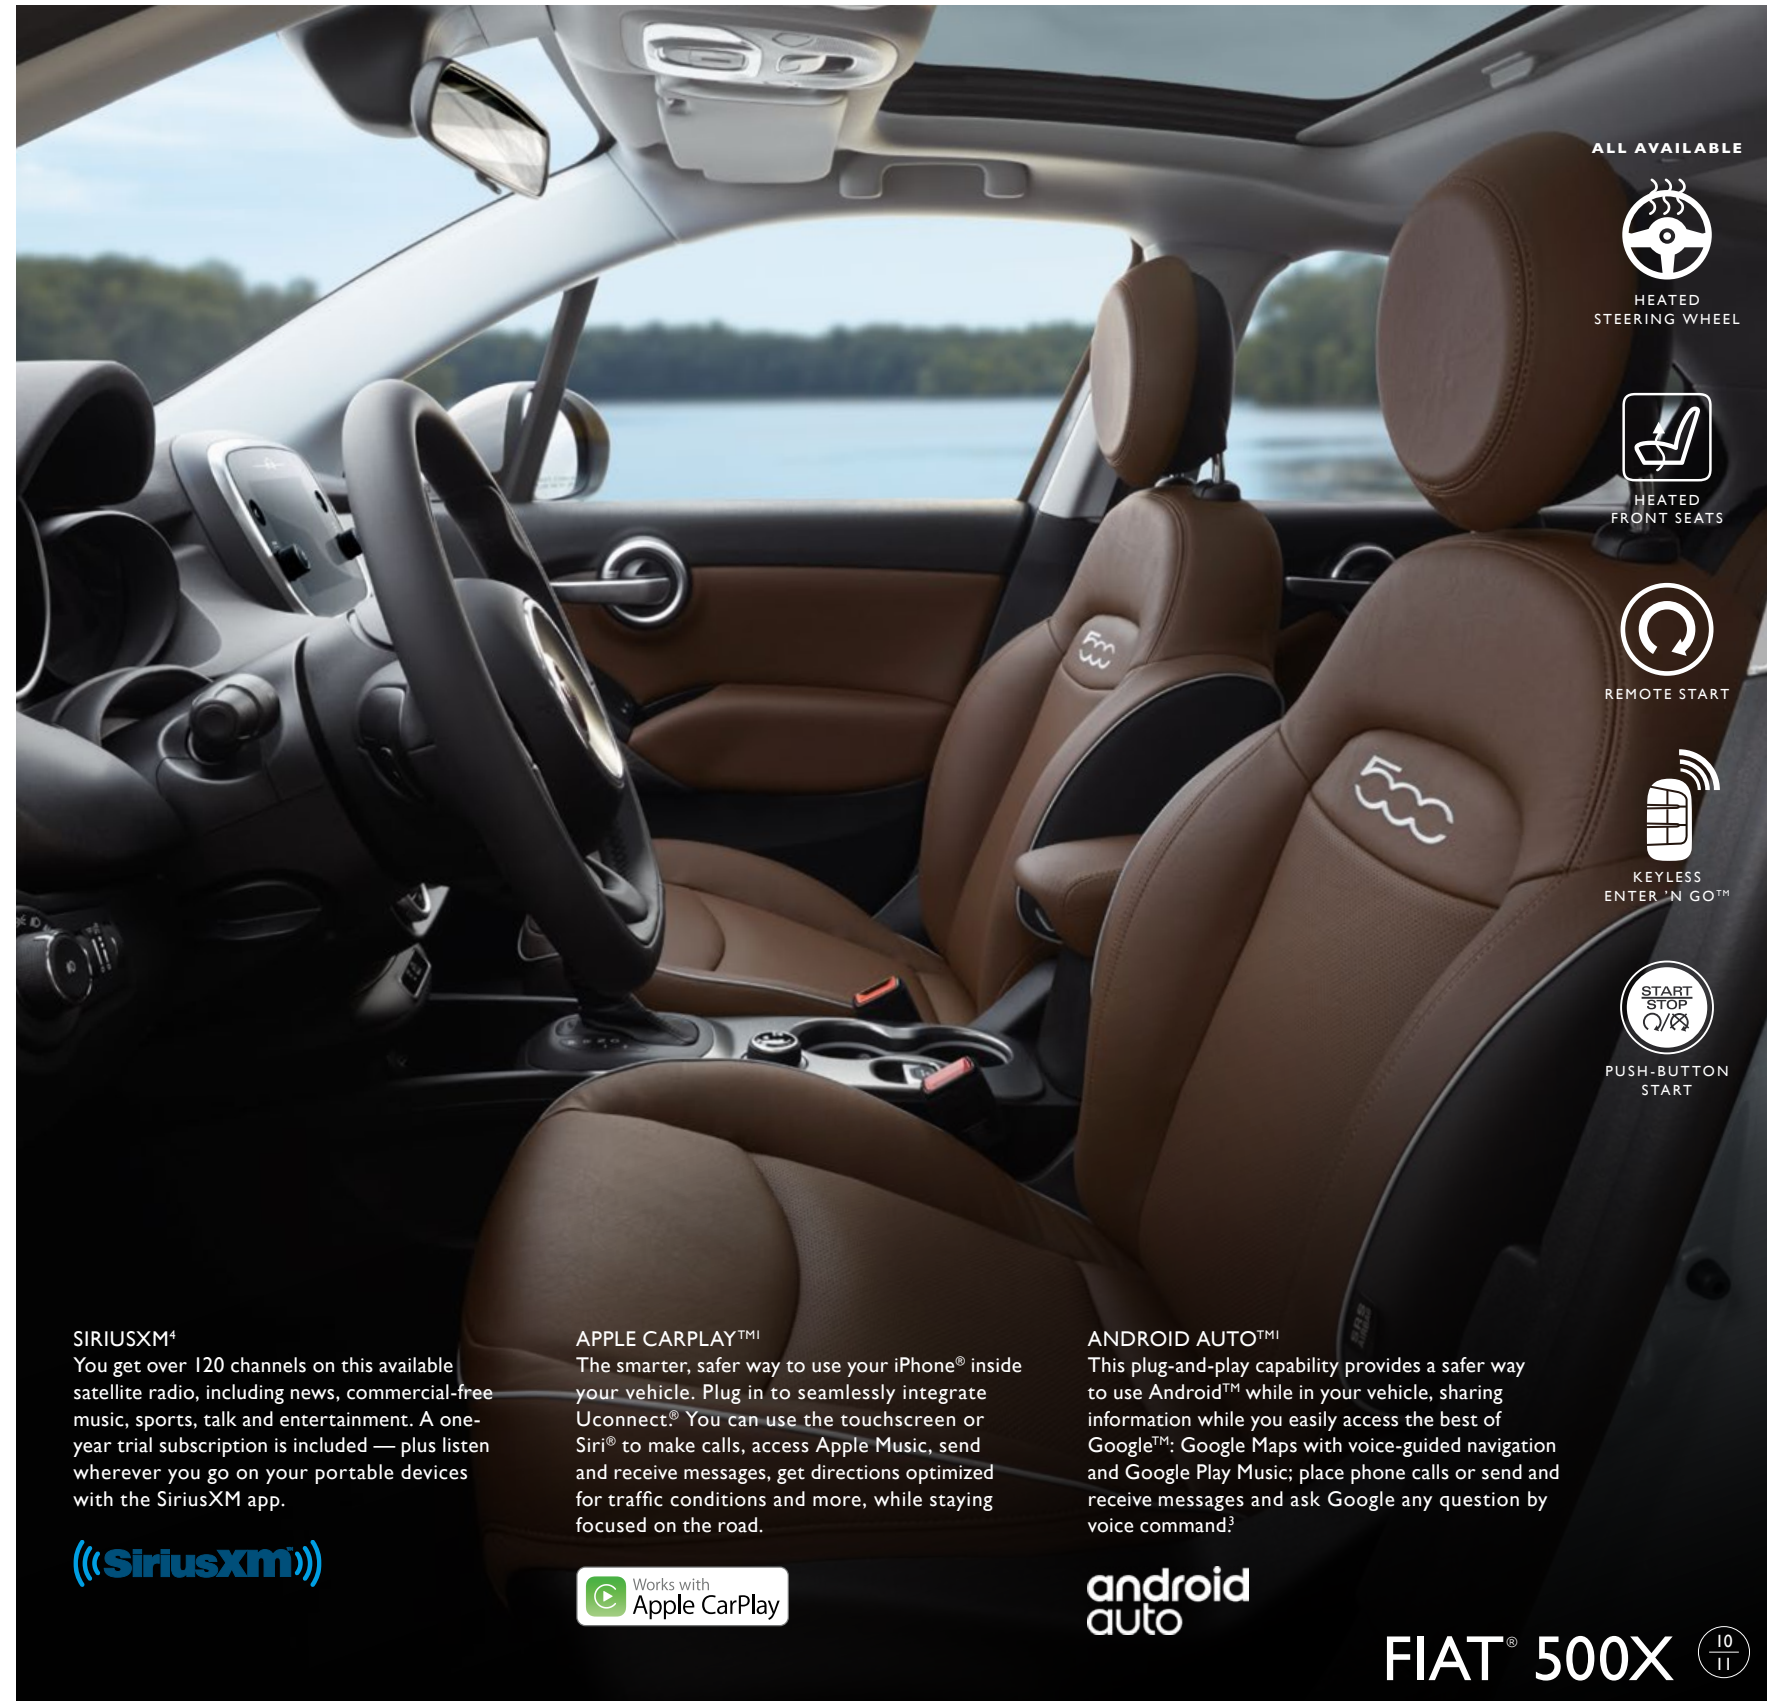

Beyond a long list of impressive available and standard amenities, FIAT® 500X drivers will discover what is conspicuously missing: noise. Engineers delivered superior torsional rigidity and Noise, Vibration and Harshness (NVH) advanced applications that contribute to creating the exceptionally quiet 500X cabin.

With Uconnect® systems, your FIAT 500X becomes your portal to the world. Large 7-inch touchscreens and intuitive hands-free³ technologies deliver essential information and entertainment while keeping you focused on driving. The systems offer a wide range of services: radio, phone, messaging, navigation,⁵ charging, hands-free³ communication with Bluetooth® streaming audio and more. The available BeatsAudio™ Premium Sound System by Dr. Dre delivers studio-quality sound, just the way the artist intended. The system features eight-channel performance with 506 watts of power, eight speakers and a 6.5-inch subwoofer specifically tuned for the 500X.

6.5/160

L/100 KM HWY⁶ HORSEPOWER
I.4L MULTI AIR I-4 TURBO

PACESETTER

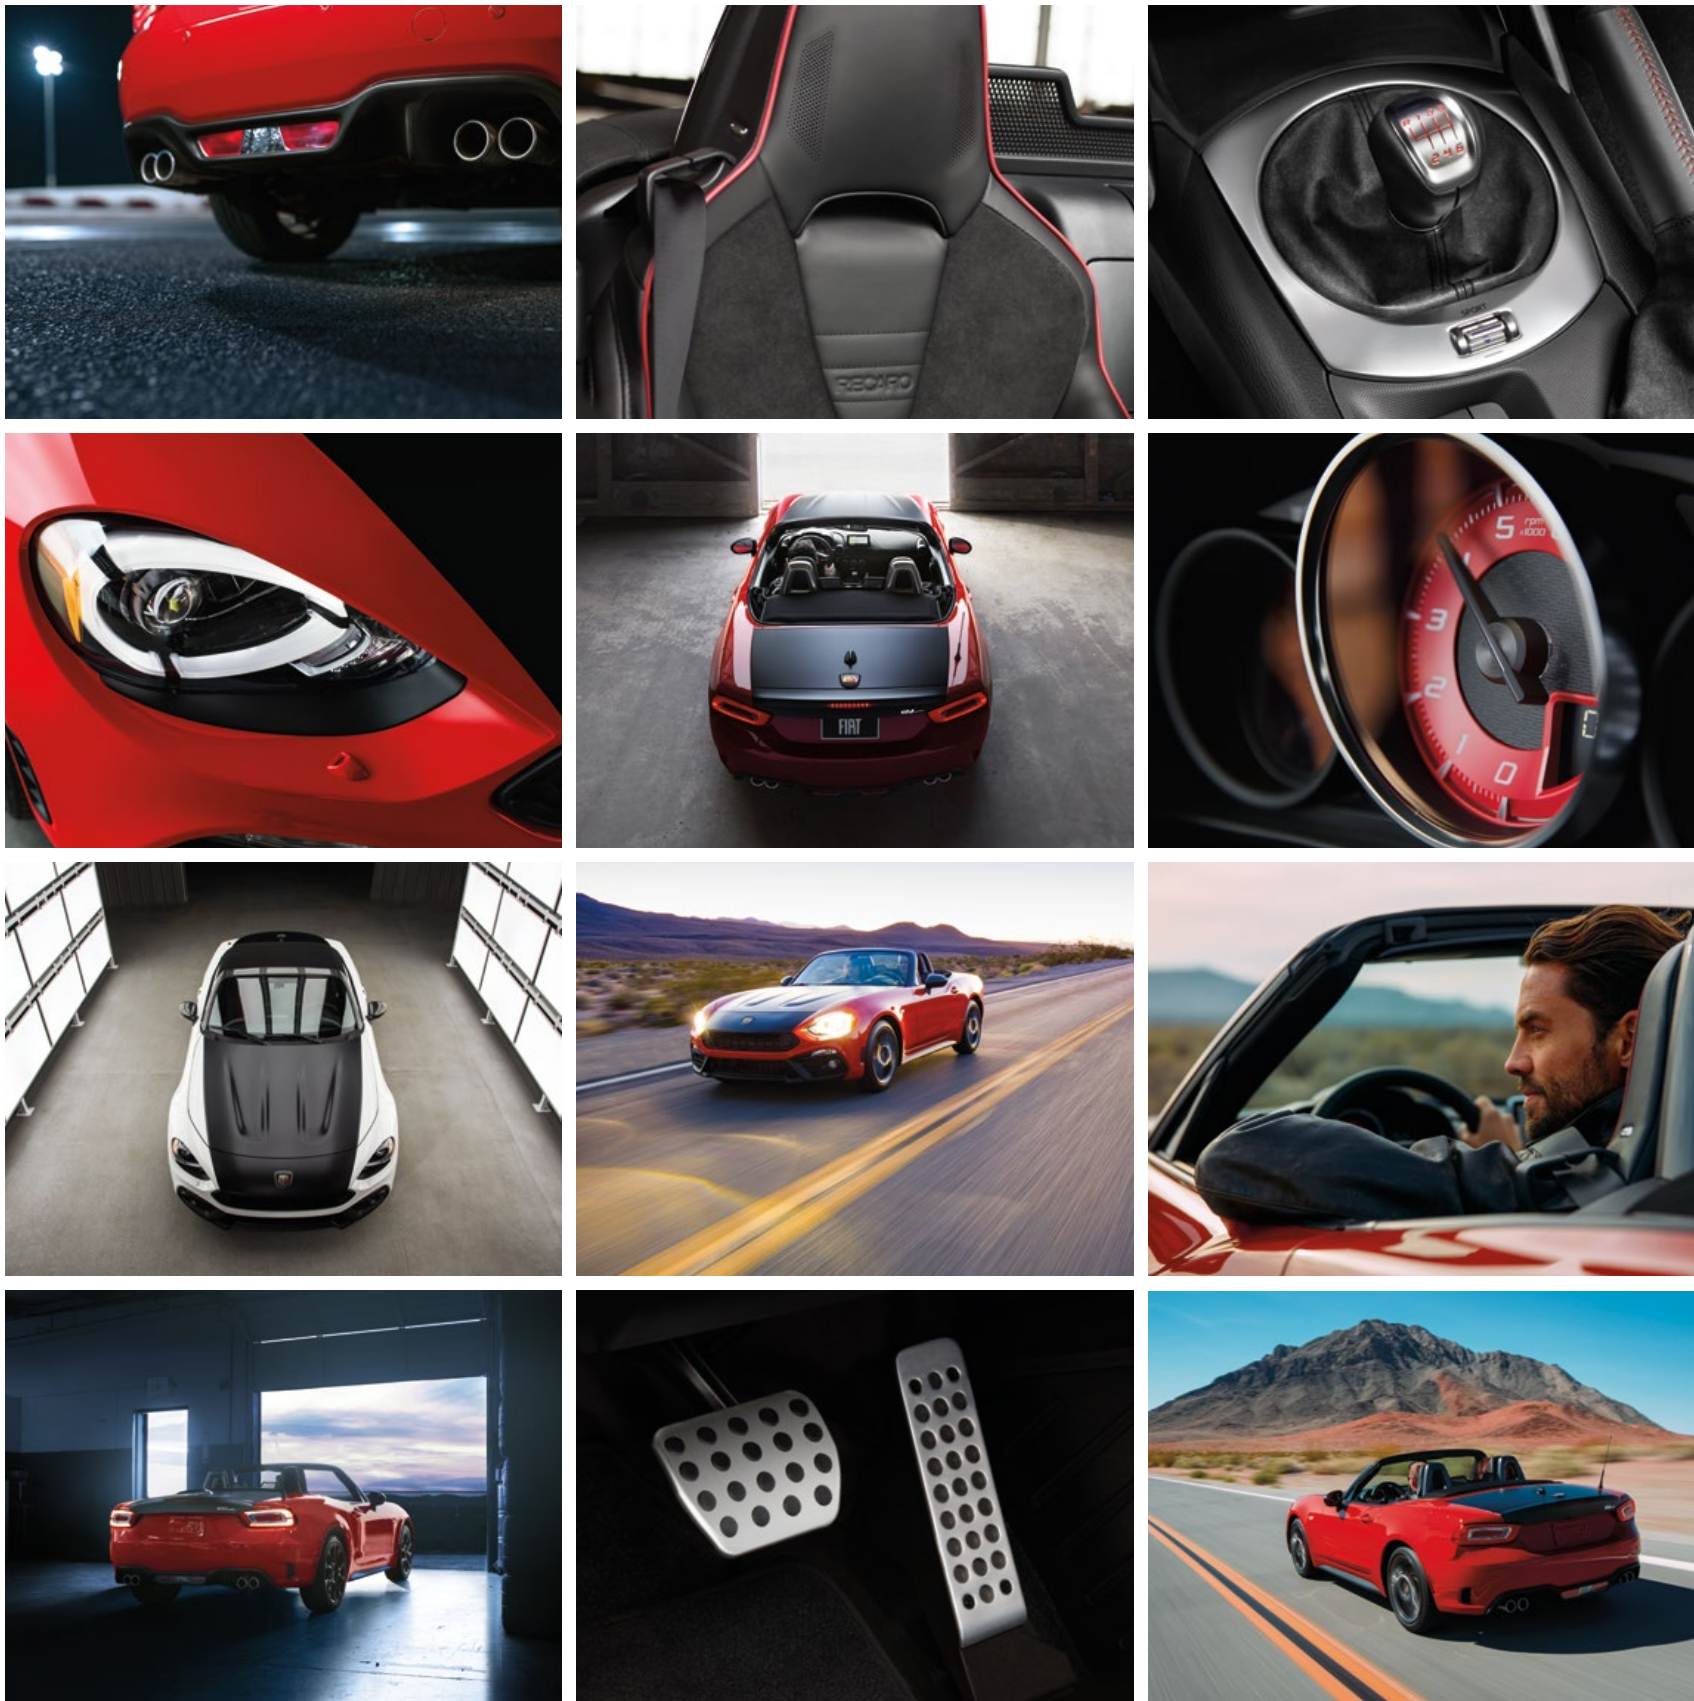

The FIAT® I.4L MultiAir® Turbo four-cylinder with twin intercoolers delivers up to 164 hp and 184 lb-ft of torque, and can be teamed with either the standard 6-speed manual or available 6-speed automatic transmission. The upshot? The FIAT 124 Spider gets to peak power and torque at a much lower rpm.

Real-world driving isn't all smooth sailing. That's why FIAT 124 Spider is equipped with a double-wishbone front and multilink rear suspension that enhances steering response and handling. Plus, its I.4L MultiAir Turbo engine serves up great mid-range torque for easy passing when you need it most — so you can enjoy a great ride no matter what lies ahead.

BEHOLD THE SCORPION

Abarth® reveals the wild side of the FIAT® 124 Spider. This is the ultimate model for true enthusiasts, shown here with the optional Hand-Painted Heritage Racing Stripe by Mopar®.

Whatever the demands of the day's course, FIAT Abarth amps things up with a mechanical limited-slip differential, a Sport Mode button, Bilstein® selective damping shock absorbers and 17-inch Gun Metal aluminum wheels.

Optional race-inspired seating and specially tuned quad exhausts turn up the adrenaline even more. Finishing touches include Gun Metal roll bar covers, windshield surround and Dark Matte interior accents.

FIAT 124 SPIDER

THE DESIGNERS' ASSUMPTION? EVERY RIDER IS AN AUDIOPHILE AND A FULL-ON NEWS JUNKIE.

REVEL IN IT

There is a distinctive ambience to FIAT® I24 Spider — the meticulously designed interior offers refined materials, quality leather and Italian-inspired design. Notably soft touchpoints, instruments, storage and technology are all expertly delivered with the driver in mind.

NOW HEAR THIS

With the available FIAT Connect 7.0, you'll enjoy full access to the world at large via an advanced available multimedia system with a 7-inch full-colour display. Available SiriusXM satellite radio⁴ with one-year subscription, MP3 compatibility and available nine Bose® speakers create the soundtrack of your drive.

COMMUNICATION MAJOR

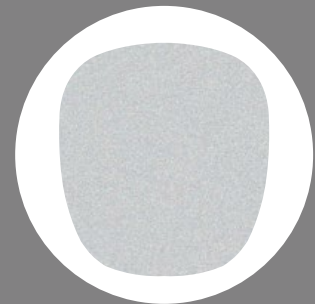

Stay fully plugged in with two USB ports, an auxiliary input and an available Multimedia Command Dial. Standard Bluetooth® hands-free³ communication system lets you take phone calls and stream music while keeping your hands on the wheel. Available GPS Navigation⁵, ParkView® Rear Back-Up Camera² and more, help you keep your bearings.

Safety and Security

FIAT® 500X, 500L and 124 Spider

FIAT approaches safety and security from every angle. Here are just some of the advanced features that will offer extra peace of mind:

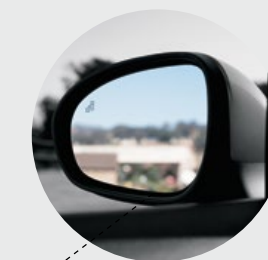

Full-Speed Forward Collision Warning with Active Braking²

uses radar sensors to detect when you may be approaching another vehicle too rapidly. This active safety feature sends an audible and visual alert to the driver and provides limited braking if the driver does not react in time. Available on 500X.

Lane Departure Warning with Lane Keep Assist² tracks the vehicle's lane position via mounted cameras. If the system detects the driver is drifting outside the lane boundaries, the system can provide a visual warning, as well as a corrective steering input to encourage the driver to keep within lane boundaries. Available on 500X.

Blind-Spot Monitoring with Rear Cross-Path Detection² will constantly monitor the space between you and other vehicles. When a side or rear blind spot is encroached, this feature notifies you via illuminated icons on sideview mirrors and an audible chime. Available on 500X and 124 Spider.

The ParkView® Rear Back-Up Camera²

provides a wide-angle view of the area immediately behind the vehicle, giving the driver greater peace of mind before moving backwards at low speeds. It displays dynamic grid lines on a colour touchscreen to aid the driver when the vehicle is in Reverse. Standard on 500X and 500L, available on 124 Spider.

Park-Sense® Rear Park Assist System²

can help you park and back out with grace. When the vehicle is in Reverse, these available sensors detect objects in the rear back-up pathway and also provide an audible and visual warning so you have time to react. Available on 500X, 500L and 124 Spider.

Seven Standard Air Bags⁸

are in every FIAT 500 model, surrounding you with a comprehensive air bag system. It features full-length front and rear side-curtain, driver's inflatable knee blocker, seat-mounted side for front occupants, and advanced multistage driver and front-passenger air bags, all working together to help provide encompassing protection. Standard on 500L and 500X.

Cornering Fog Lamps are initiated on the appropriate side of the car with a turn signal or steering-wheel turn — it's how to shed a little more light on some very important subjects. Available on 500X.

Electronic Stability Control (ESC)⁹ is designed to assist drivers in maintaining control of their vehicles during extreme steering manoeuvres. ESC⁹ senses when a vehicle is starting to spin (oversteer) or plow (understeer) and attempts to correct the vehicle's course by automatically controlling the throttle and applying the brakes to individual wheels. Standard on 500X, 500L and 124 Spider.

An Electronic Park Brake puts a parking brake switch in the centre console and offers five modes of operation: static apply and release, dynamic apply, drive away release, auto apply and safe hold. Available on 500X.

WARRANTIES: 2017 and 2018 FIAT vehicles are backed by a 5-year or 100,000-kilometre* fully transferable Powertrain Limited Warranty with \$0 deductible plus 24-hour roadside assistance! Basic Warranty coverage is for 3 years or 60,000 kilometres.* Rust-through coverage on all body sheet metal is for 3 years.

*Whichever comes first. Some conditions may apply. †The 5-Year/100,000-Kilometre Powertrain Limited Warranty does not apply to vehicles sold for certain commercial uses. Visit your FIAT Studio for full details.

DISCLAIMERS: (1) Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice controls, when it is safe to do so. Apple CarPlay requires a compatible iPhone connected via USB cable to the Uconnect system. Android Auto requires the Android Auto app on Google Play and an Android-compatible smartphone running Android 5.0 Lollipop or higher. Data plan rates may apply. (2) This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of his/her surroundings and be prepared to take corrective action to avoid collisions. (3) Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. Voice commands of phone require a Bluetooth-compatible phone. (4) Requires SiriusXM radio subscriptions governed by SIRIUS terms and conditions available at siriusxm.ca. (5) Never program while driving. GPS mapping and available 3D navigation may not be detailed or available in all areas or reflect current road regulations. (6) Based on 2018 *EnerGuide* fuel consumption ratings. Government of Canada test methods used. Your actual fuel consumption will vary based on driving habits and other factors. Use for comparison purposes only. Ask your retailer for *EnerGuide* information. Miles per gallon (MPG) ratings based on imperial gallon. (7) Preset voice-to-text messaging and incoming text message reading require a MAP-enabled phone. (8) The Advanced Front Air Bags in this vehicle are certified to the federal regulations for Advanced Air Bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. (9) No system can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions.
