

Gonvarri
Material Handling

Corporate brochure

Who we are

We are a world leading provider of industrial storage systems, from racking and shelving to complete warehouse solutions. We support our customers through the complete life cycle of their storage needs, from initial planning through to installation and ongoing service and support.

We operate under the industry brands Dexion, Constructor, Kasten, Stålteknik and Kredit. The group has a strong and rich history with centuries of combined knowledge, allowing customers access to a global network of storage expertise and experience.

Our cutting edge, innovative storage solutions ensure we meet our customers needs, whatever their storage challenges. Our reach covers almost every continent, where we've helped some of the worlds leading brands and pioneering SMEs, providing our customers access to global expertise and support. We are committed to developing storage solutions that help our customers work more quickly and more efficiently whilst becoming more profitable.

Simply put, we make it work!

History

Gonvarri Material Handling was born in January 2018, when Gonvarri Industries decided to incorporate the material handling activity, as an additional division to the steel transformation business. This was possible through the acquisition of Constructor Group; former parent company of the well recognised brands Dexion, Constructor and Kasten. The group expanded further in 2019 when Stålteknik and Kredit were acquired.

Dexion

Formed in London UK in 1937 by 50-year-old Greek-Australian, Demetrius Comino. Comino developed the 'Dexion Slotted-Angle' (1947), which introduced the world to adjustable storage and would go on to blaze the trail for Dexion's purpose-built pallet racking and shelving systems. It became part of the Group in 1999.

Constructor

Originally founded as Høvik Verk in 1856, a glassworks at Høvik, Norway part of Christiania Glasmagasinas. In 1944, Constructor started in Sweden within Electrolux factory, Motala, to later run a separate factory as racking and shelving business grew significantly over time. Between 1951 - 2000, through mergers and acquisitions of Høvik Stål, Electrolux Constructor, Kasten, Krammer & Zeuten, ETH and MTH, business developed to become Scandinavia's leading company within storage, archive and logistics solutions. The Constructor name was adopted in the late 1990s.

Kasten

Started 1886 by Hjalmar Henrik Kasten who established a metal works company in Helsinki Finland. They manufactured their first shelves in 1951 and today they are market leaders in Finland.

Stålteknik

Gonvarri Stålteknik AB has its closest origin in Canrena System AB. The company has been active since the 80's and has over time expanded through active product development as well as company mergers with, among others former Stålteknik in Fellingsbro.

Gonvarri Stålteknik AB are experts in selected products and customizations in material handling like pull-out units, cantilever and mezzanine solutions. Products are mainly found in retailers in Scandinavia, but we are also represented in Germany & France. Sales are made to partners and resellers (B2B).

Kredit

Founded in 1991 in the Czech Republic by Petr Ševčík. Kredit is a well-known brand in the European material handling industry and beyond, being one of the key players within the mobile racking segment. The company is headquartered in the Czech Republic, where their entire product line is developed and manufactured.

Gonvarri Industries

Gonvarri Industries is a leading company in the transformation of steel and aluminium for the automotive, road safety, energy, material handling and industry sectors. We have a workforce of 6,000+ employees, 45 factories and an industrial presence in 19 countries.

Our purpose "Doing Well by Doing Good" is based on the concept of the transformation of steel, with special emphasis on sustainable growth and profitability.

We see sustainability not only as a model of business management and ethical commitment, but as well as one of transparency, fairness, and collaboration with our interest groups, regardless of where we operate.

Our commitment to the environment and to society entails we operate in an efficient and responsible manner in all we do, respecting the environment by lessening the impact. Due to this commitment, we support the Sustainable Development Goals (SDG) of the United Nations.

Gonvarri is committed to road safety as one of our strategic objectives. That is why we created Emotional Driving, the road safety program that aims to minimize the traffic accident figures among our employees, their relatives and society as a whole, based on positive and motivational messages.

“A long term partnership with our Customers is key to our business”

At the heart of our organisation is a dedicated and experienced team offering quality storage products and expert advice.

Frank Pohl - Chief Executive Officer

Our mission

“Customer satisfaction is our goal”

Our mission, as part of the Gonvarri Group, is to improve the performance of our customers providing innovative and sustainable Storage Solutions based on a worldwide highly collaborative Organization.

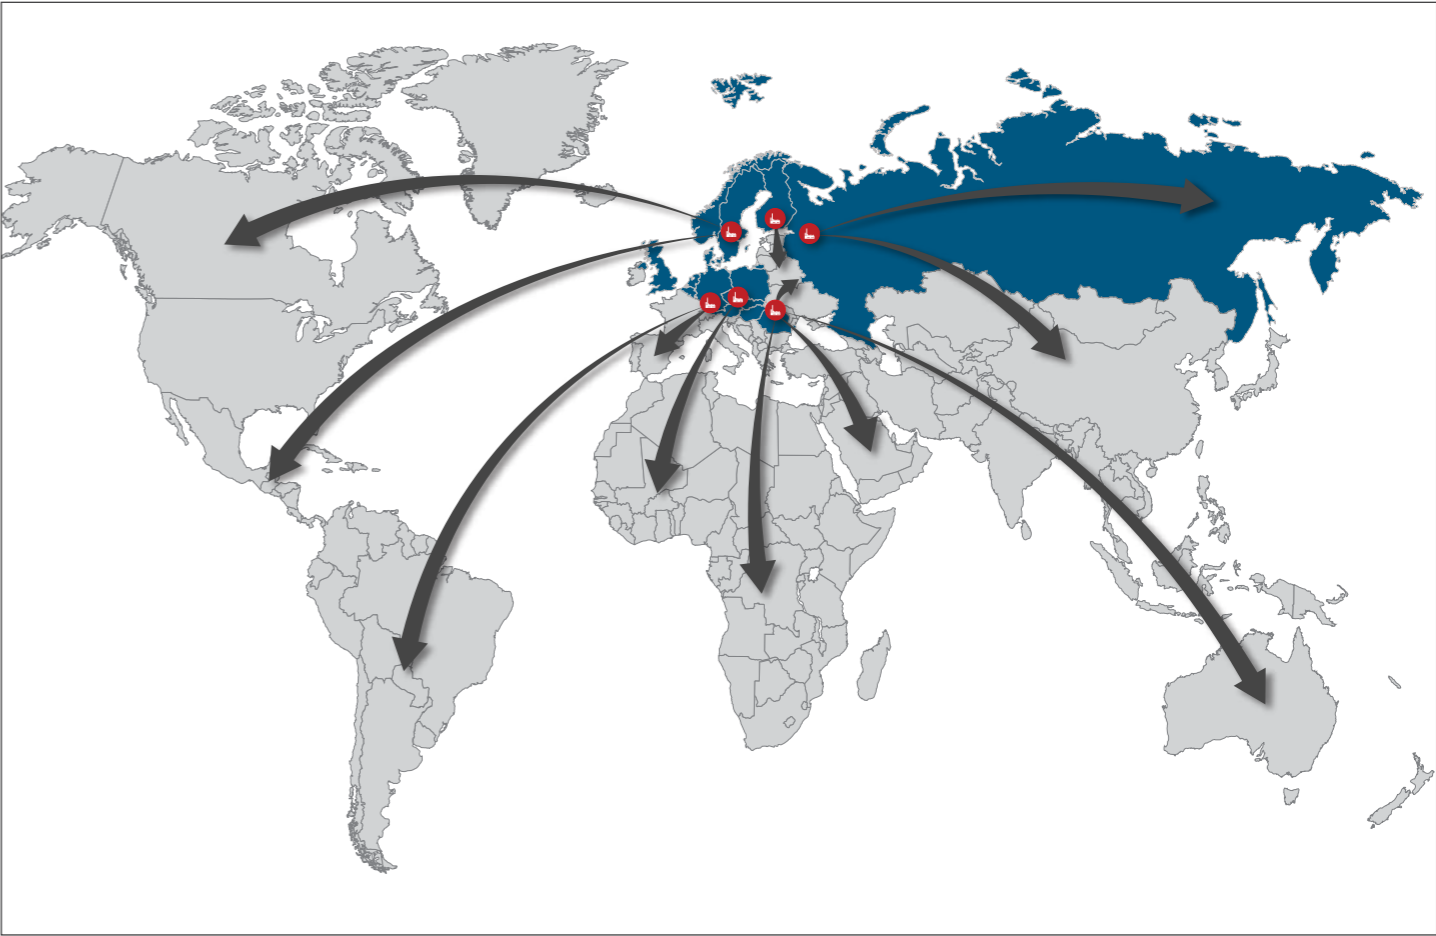

Customer requirements is always our starting point and ultimate goal. Through our highly experienced sales and design team, we develop tailored customer-oriented solutions to meet different needs. We deliver not only standalone products, but also a complete package of services including consultancy, storage and space planning, and maintenance support. Our range covers from static solutions to fully automated warehouses, where the best solution will be driven by optimizing customer satisfaction in an efficient and safe warehouse environment.

Our business

One of the top providers in Europe

Sales offices in 15 countries - delivering worldwide through an extensive dealer and export network

Manufacturing in 6 countries

Solutions

Ensuring you're doing things as efficiently as possible now, yet remain flexible enough to adapt as your business changes.

And if that weren't enough, if you're looking for a much more in-depth review of your warehouse or storage facility, we provide analysis, advice and ongoing support to give you just that.

From automotive, tyre storage and garage workshops to food & drink, cold storage, building products and ecommerce companies, we're able to continually deliver a world-class blend of insight, guidance and practical assistance.

We can help you

- By supplying complete storage solutions to make your life easier
- Reduce your operational costs
- Improve your ROI
- Future-proof your investment

Regardless of the industry you operate in **our range of unique storage solutions are engineered around you.**

Products

Whatever your storage needs, we have all the products, solutions and accessories you need to make the most out of every section of available space in your storage area.

Whether it's a new build, refurbishment or retrofit, we are the logical choice when you want a hard-working storage solution that will save you time and money.

We develop **customer-oriented solutions** tailored to meet your needs.

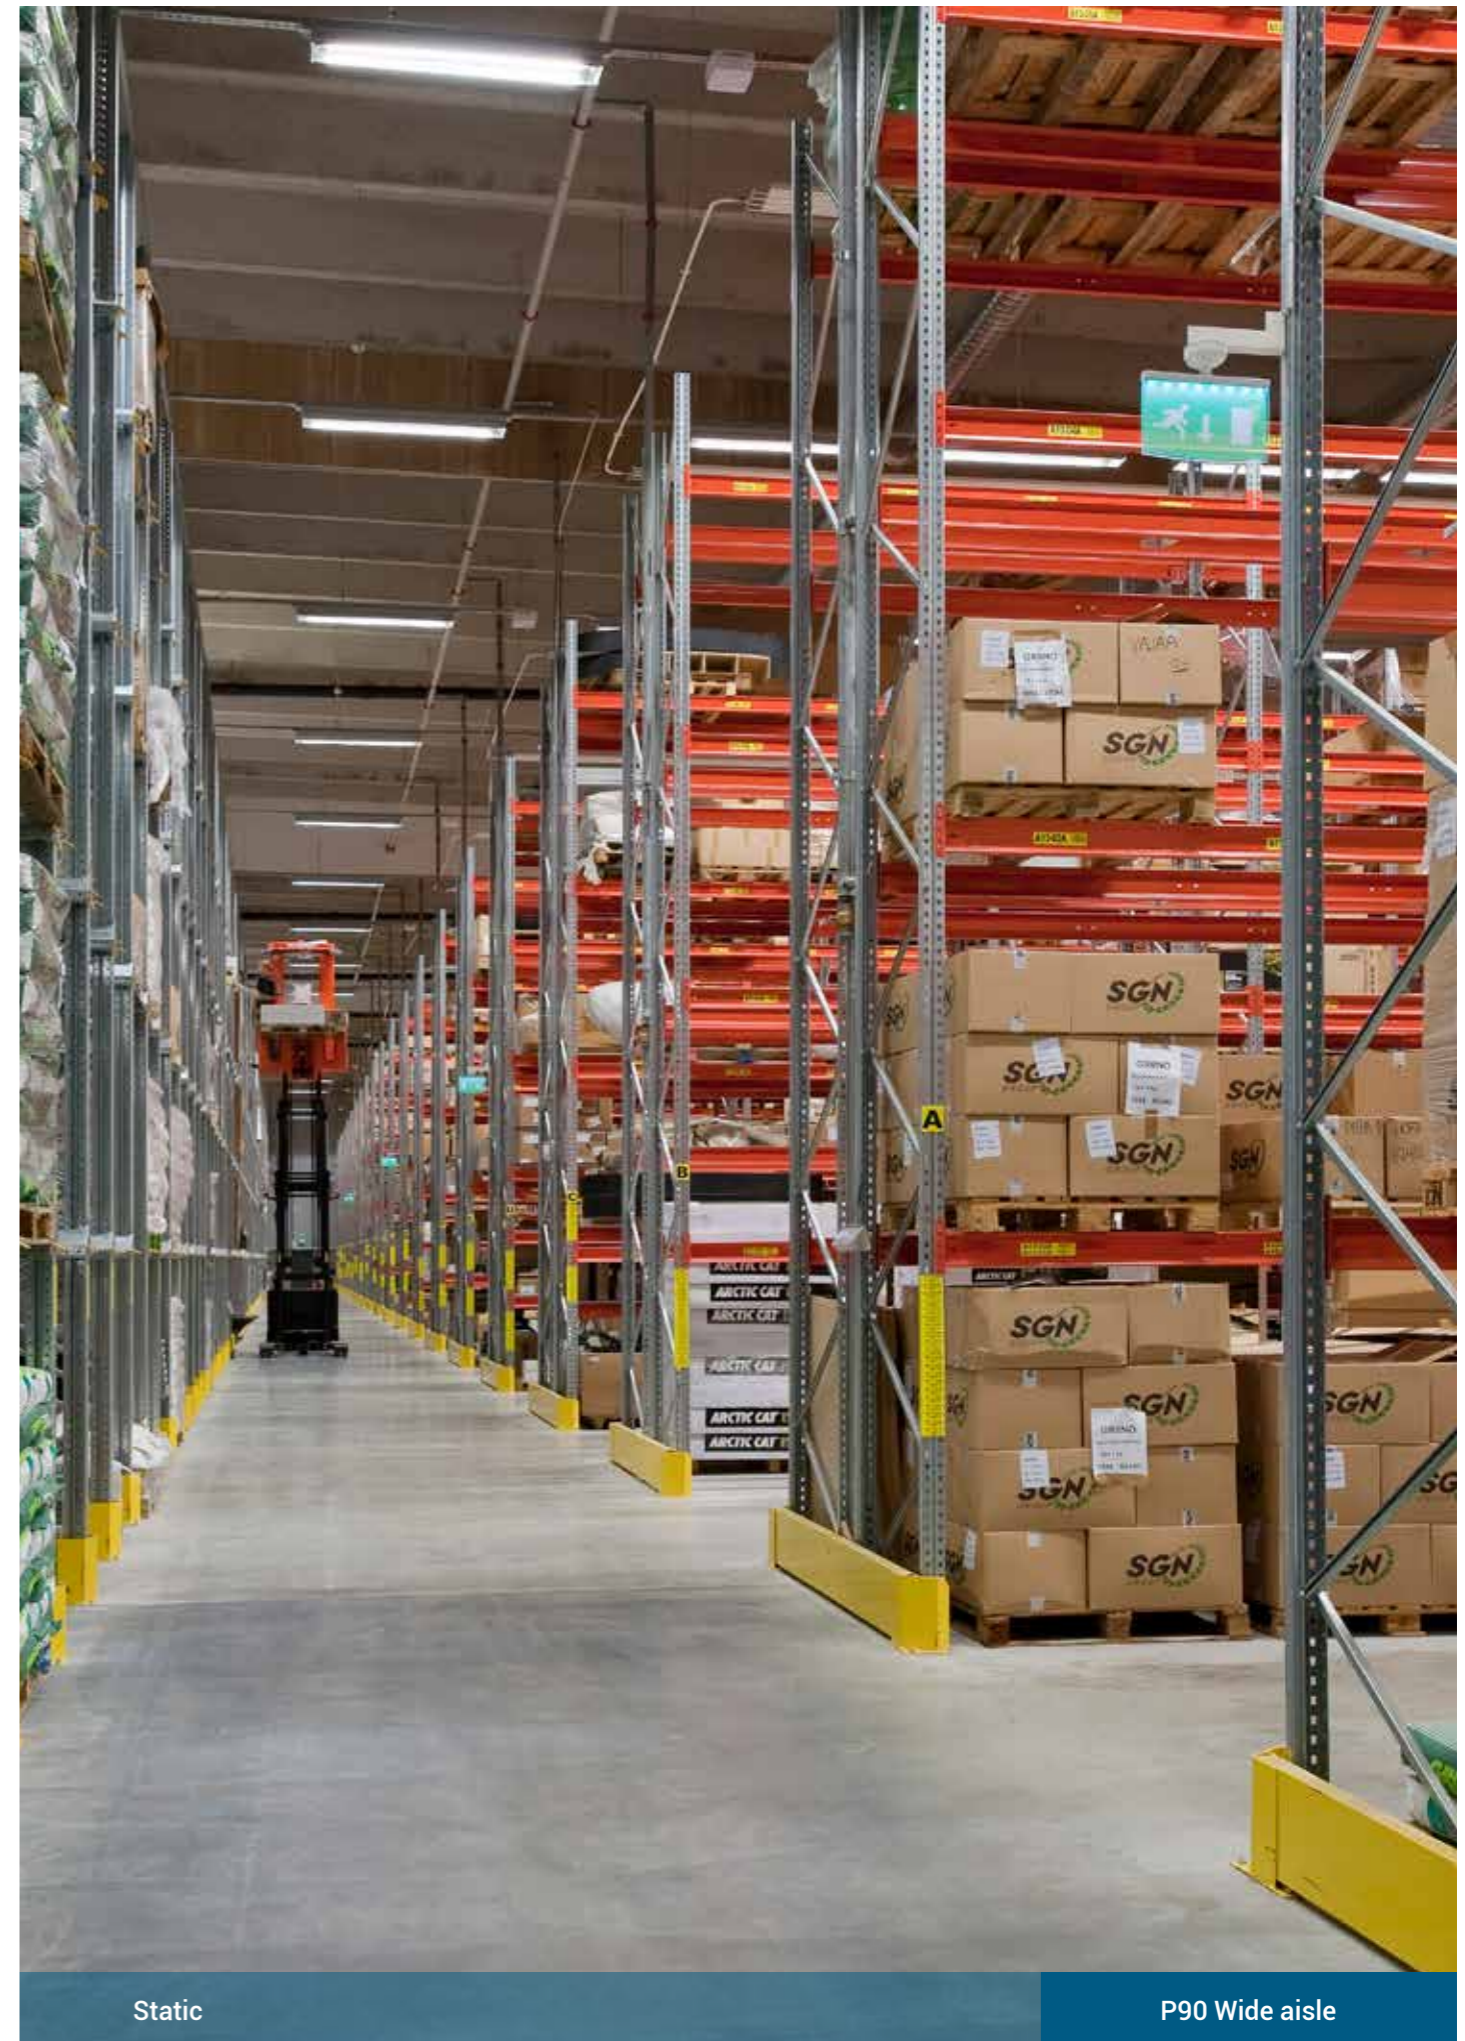

Pallet racking

The most effective way of storing pallets in your warehouse.

Find the perfect fit pallet racking storage solution for your requirements.

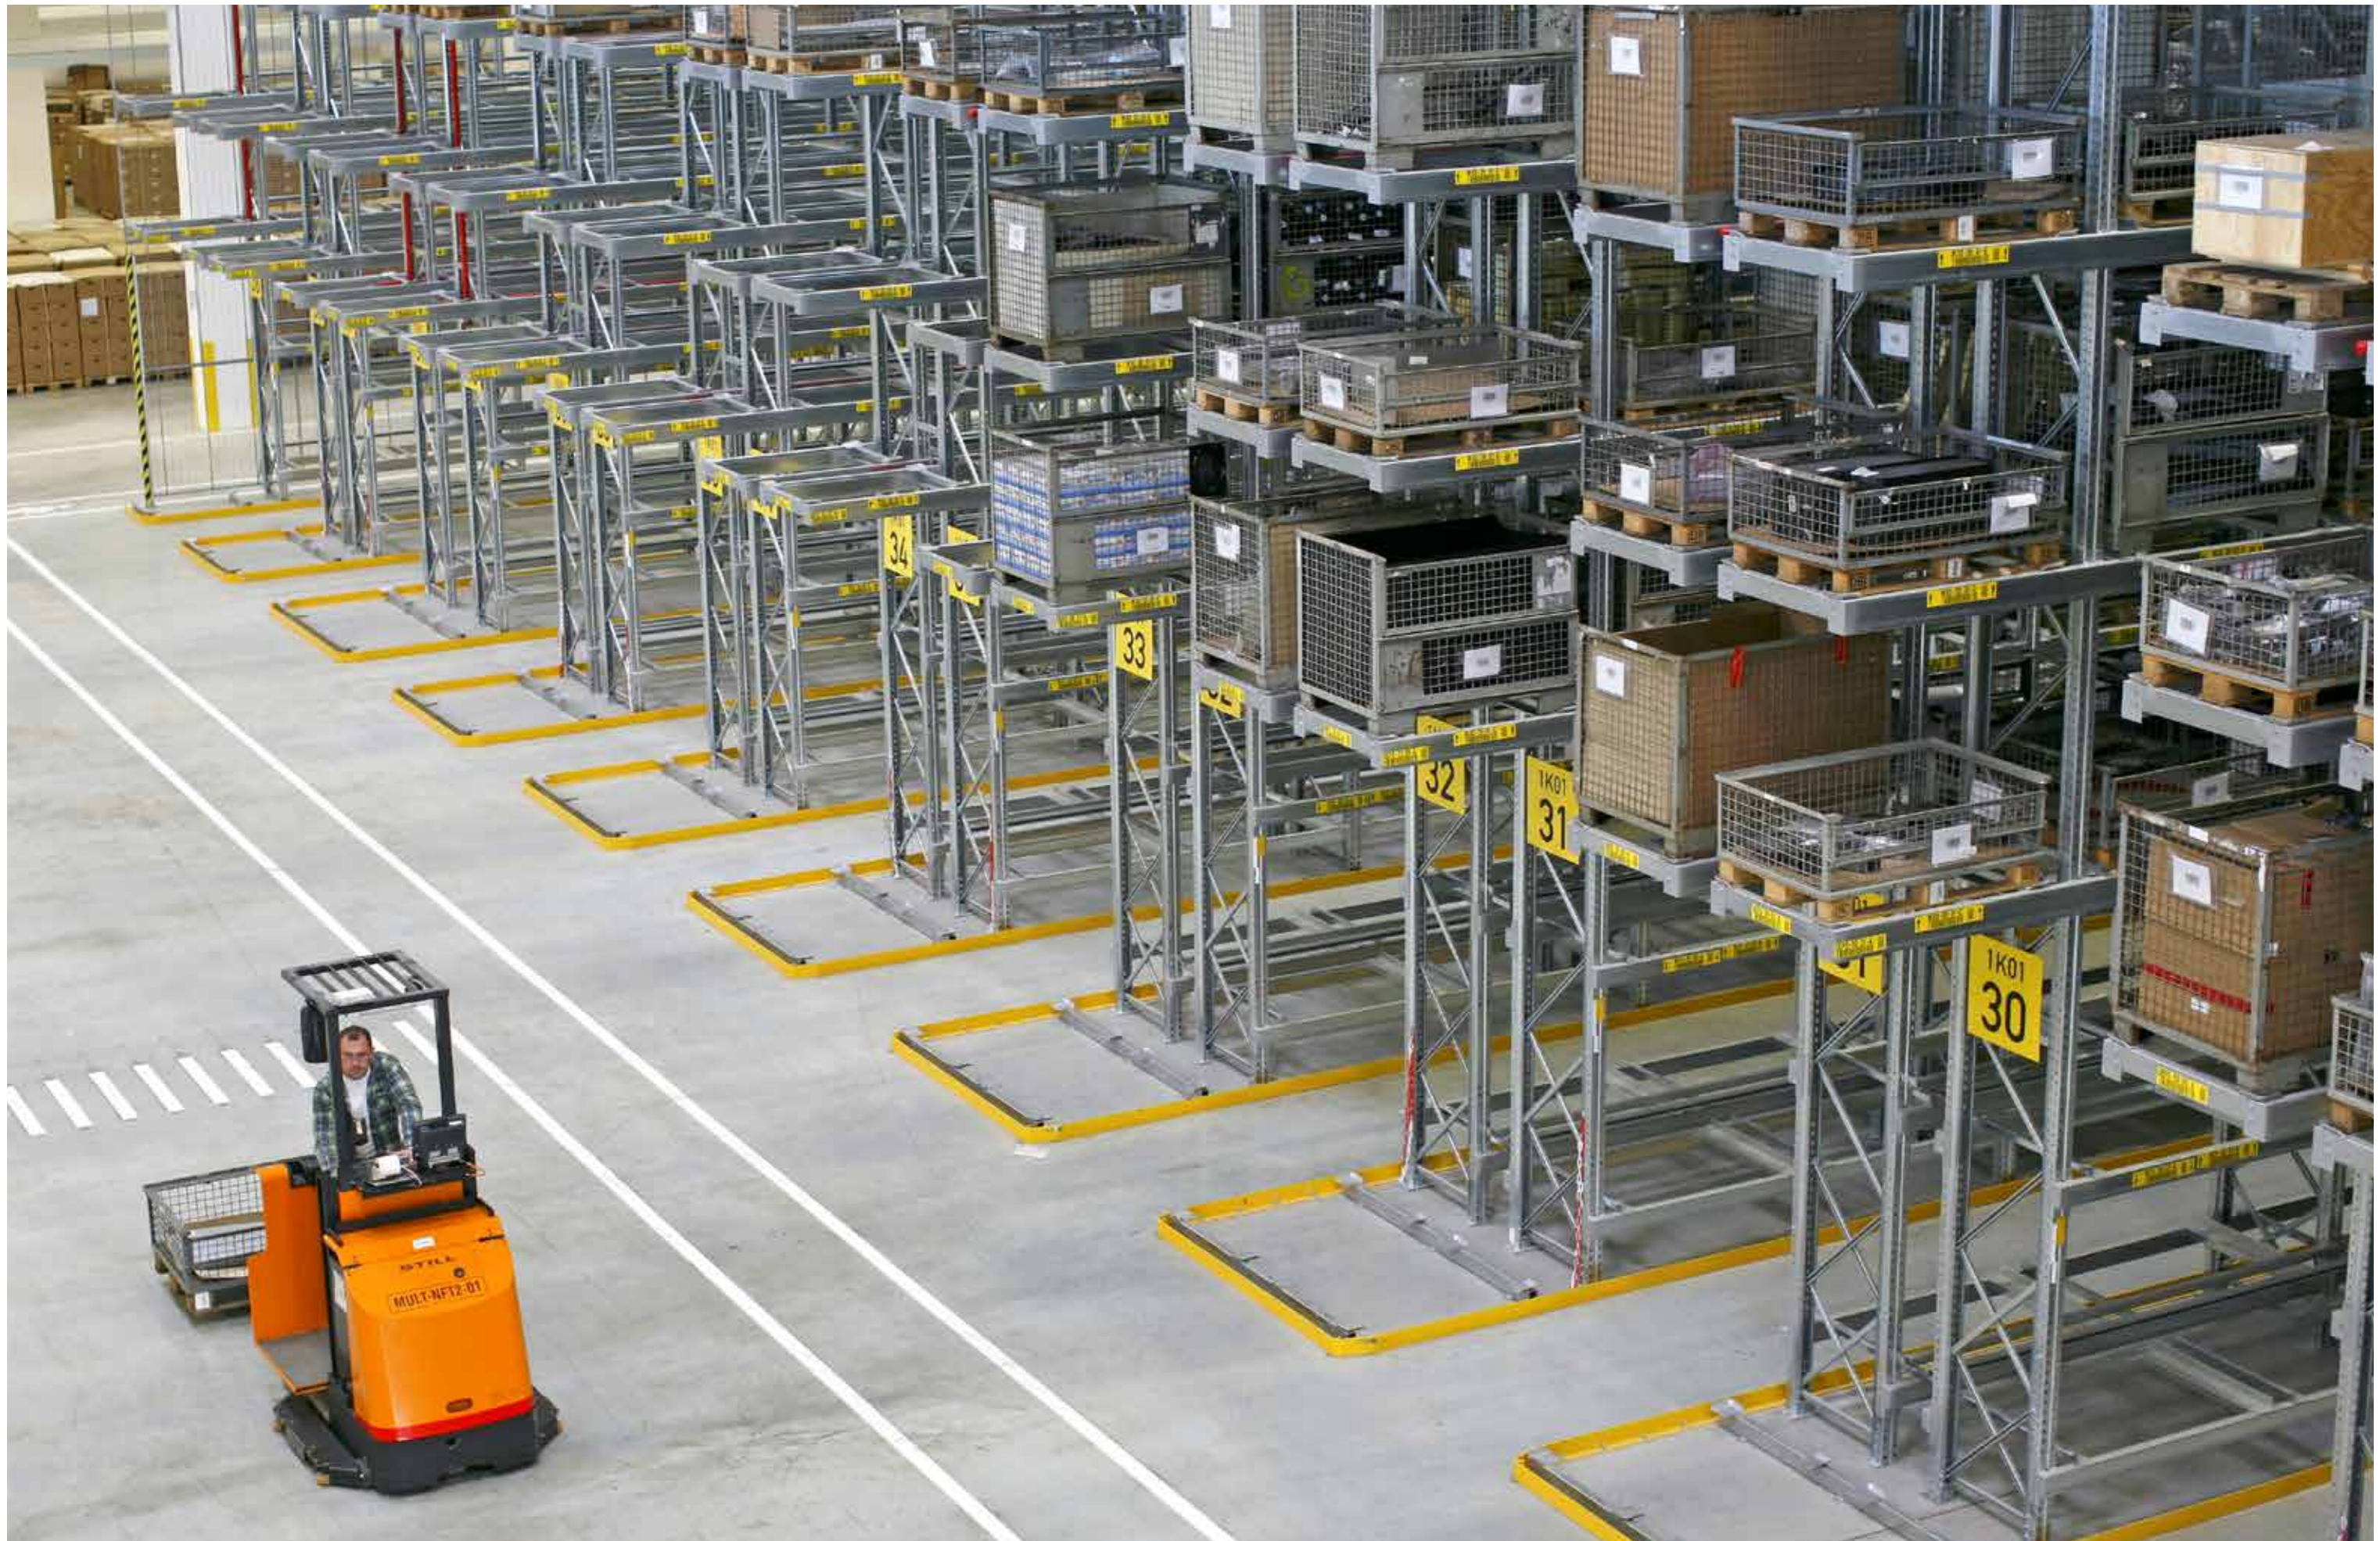

Pallet racking can be easily configured in a variety of ways based on your needs and pallet load, to ensure a functional and logical warehouse storage solution for you.

Whatever the industry, there's a range of storage systems that can provide optimal storage economics. From Drive-in Racking or Mobile Racking (MOVO) for frozen and cold-store goods; to First-in, First-out (FIFO) Pallet-flow systems for bulk goods such as those with a "best before date".

Shelving

From a single shelving bay, to a vast installation, our wealth of expertise and resources ensure your shelving not only meets your requirements right here, right now, but can accommodate your ongoing and changing needs in the future.

In fact, whether your facility operates to a multi-tier or mobile set-up, our wide selection of shelving systems are perfect for small-parts storage, organisation and identification in warehouses and picking areas.

We offer something for everyone, making for a world-class blend of performance, security and economy, all while complying with safe working practices and local requirements and regulations.

Storage machines

If you're a warehouse or storage operative, you'll know the importance of making every square meter count.

Our automatic storage systems can save you up to 75% on existing floor space, reduce picking errors by up to 70% and decrease picking time by more than 60%.

Computer-controlled, the vertical or horizontal storage machines easily integrate with your existing warehouse management system, but also operate effectively as a standalone solution.

Can you afford not to improve the efficiency of your storage and picking process with an automated solution built around you?

Cantilever

If you're looking for safe, organised storage of your long and heavy goods, then why not try our made-to-measure Cantilever systems for size.

Designed to meet nothing less than your precise requirements, our Cantilevers are exceedingly versatile whatever your work environment, and with no front uprights, all levels are available to forklifts.

We have other systems available that are also designed to store long goods. Our Cantilever Racking, Timber locker, and A-rack* are all specially designed to store various length items – steel bars, pipes, tubes, furniture, packs of timber; as well as boards, metal sheets, crates and boxes, or white goods.

Safety and other accessories*

Making sure your warehouse complies with the latest legislation is critical to smooth operations and team safety.

Our custom-designed systems come with a wide selection of safety and security accessories to complement and further customise your facility's set-up – whether you're looking for additional protection for your uprights and frames, or guarding your racking and goods against impact from forklifts.

It's the kind of knowledge, expertise and resources for making products fit for now and in the future. Guaranteeing fully functional, logical and secure warehouse storage where it counts.

* Visit our website to see the full range of accessories.

Our customers

Our solutions are the perfect fit for a wide range of customers, from small local companies to international well-known corporations.

Yearly we serve up to 30,000 customers and 80% of those are recurrent.

SCANIA

Corporate social responsibility

Sustainable development as a fundamental aspect of sound business management and Environmental, Social, Governance (ESG) considerations form an integral component of our business activities. We recognise responsible business decisions and actions as a key element of our strategy.

Environment

We are committed to making continuous improvement in the management of our environmental impact. Everything we do is in compliance with relevant local and international environmental standards and legislation.

Social/Human rights

We expect and encourage the avoidance of discrimination or harassment based on age, race, gender, religion, sexual orientation, disability, nationality, trade union activity or any other factor. In our workplace environment there is mutual trust and respect, every person feels responsible for the performance and reputation of our company.

Governance

We are compliant with the relevant principles governing data protection in each country in which we operate. We also adhere with any local laws and regulations wherever we do business.

Our zero tolerance to corruption is in full compliance with applicable anti-bribery, anti-fraud, anti-money laundering and tax evasion laws and regulations.

Health & Safety

The safety of our employees and customers is paramount. We only use suitably qualified installation sub-contractors and we promote the benefits of safety inspections to our customers. Safety is so important to us that we actively contribute to the development of technical standards within the storage equipment industry.

Consulting services

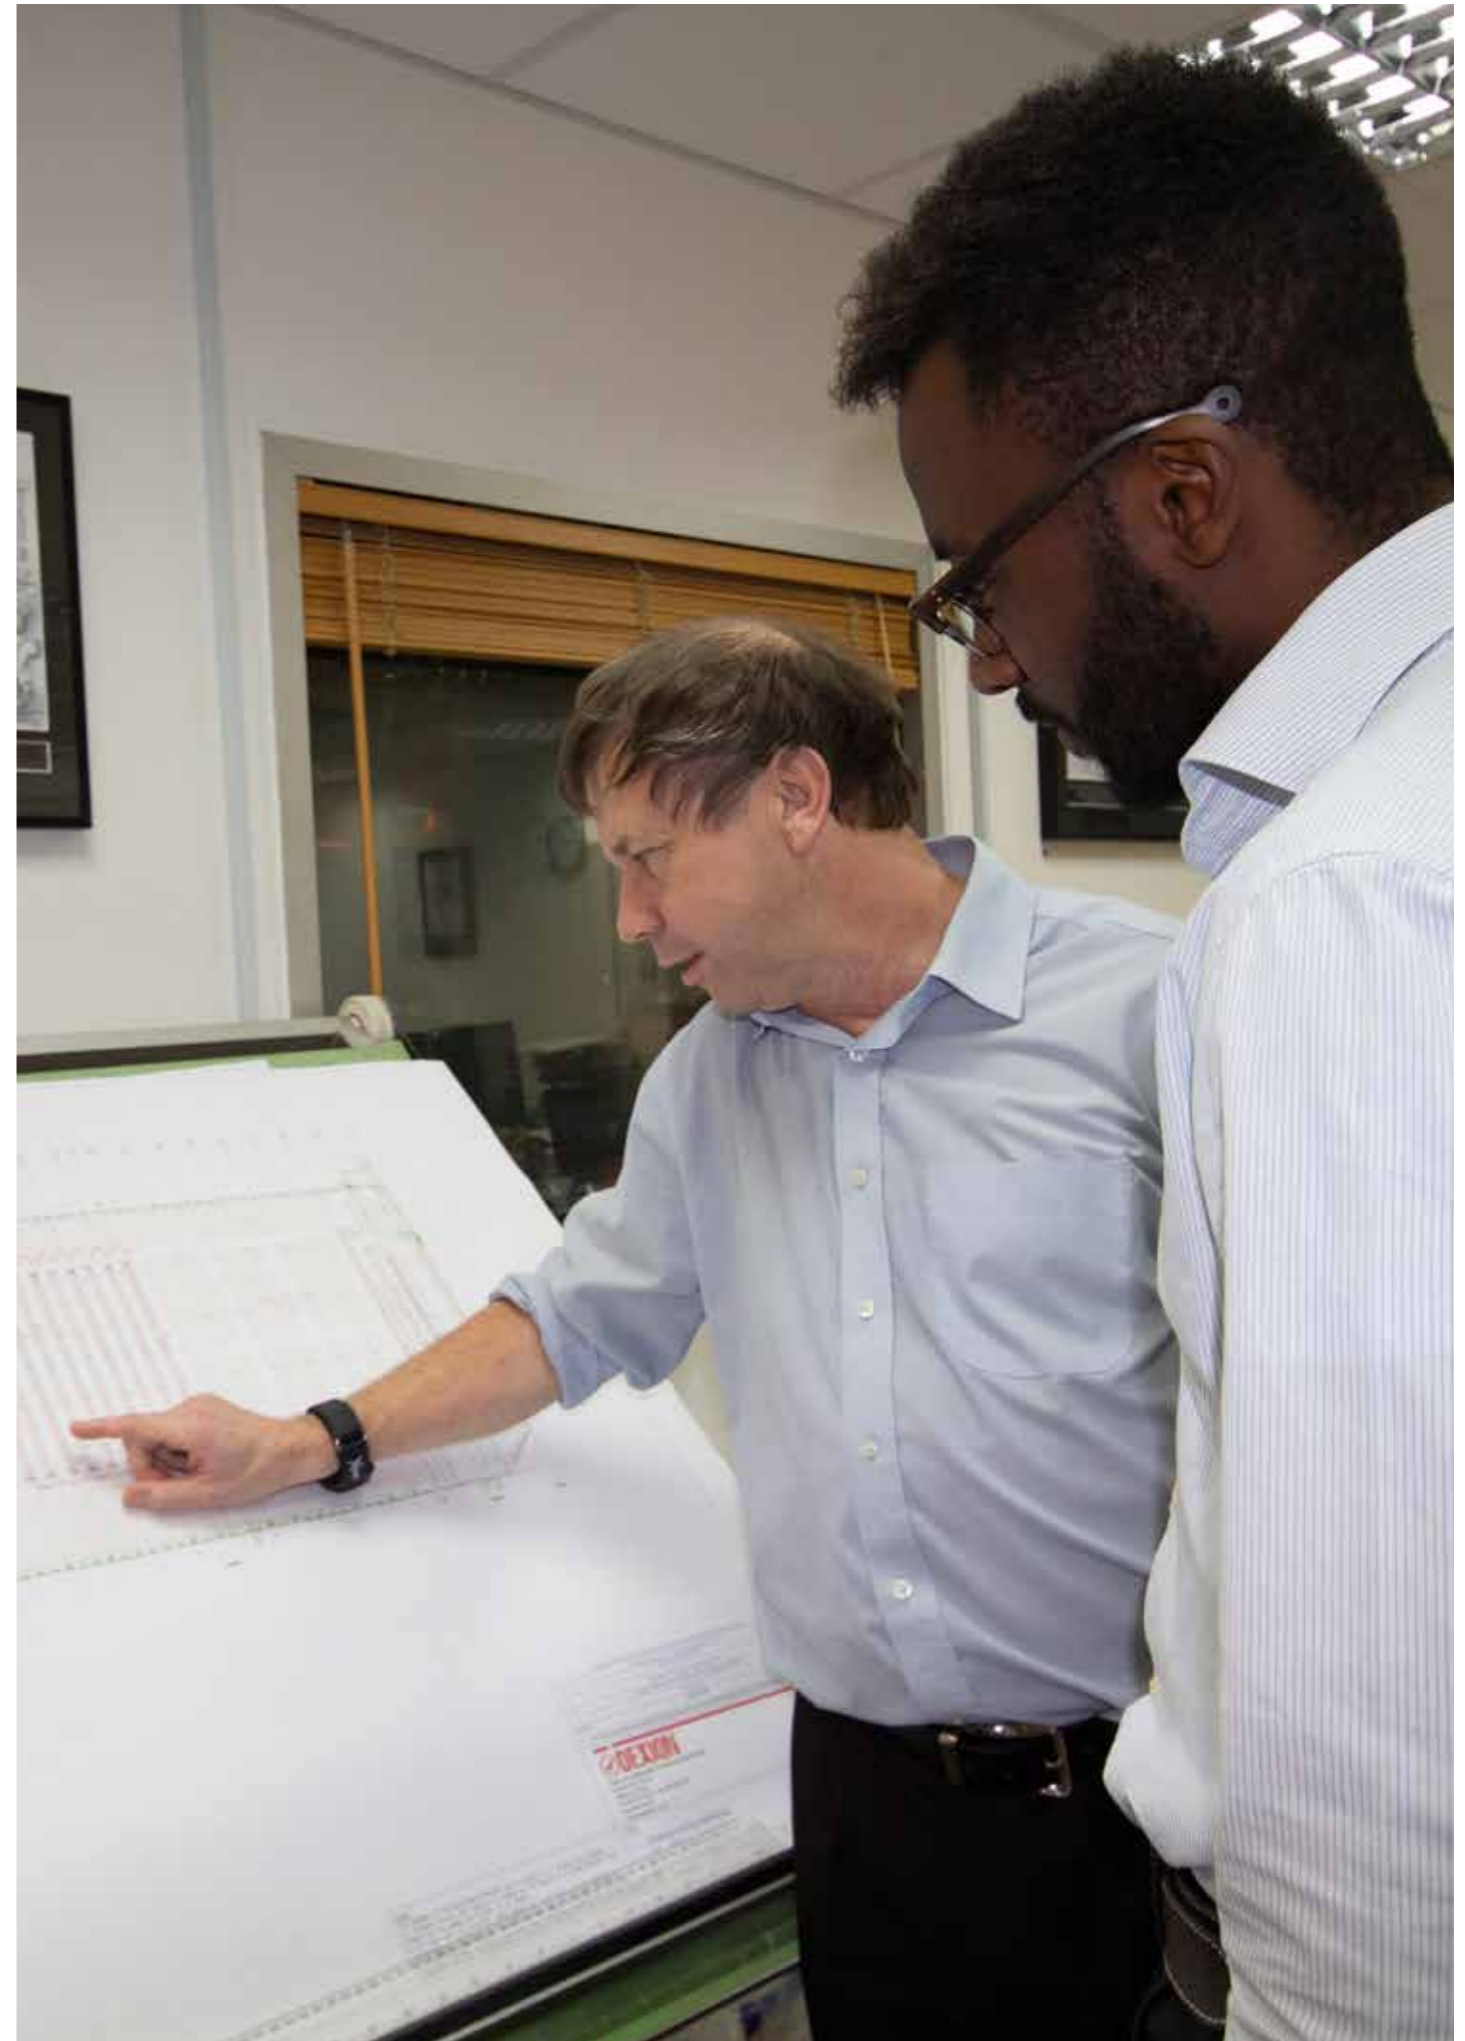

When finding the right storage solution, it's always reassuring to have an expert by your side. Our experienced and knowledgeable sales and design team give you a world-class blend of valuable insight, guidance and practical assistance.

Looking for a much more in-depth review of your warehouse or storage facility? Dexion provides analysis, advice and ongoing support to give you just that.

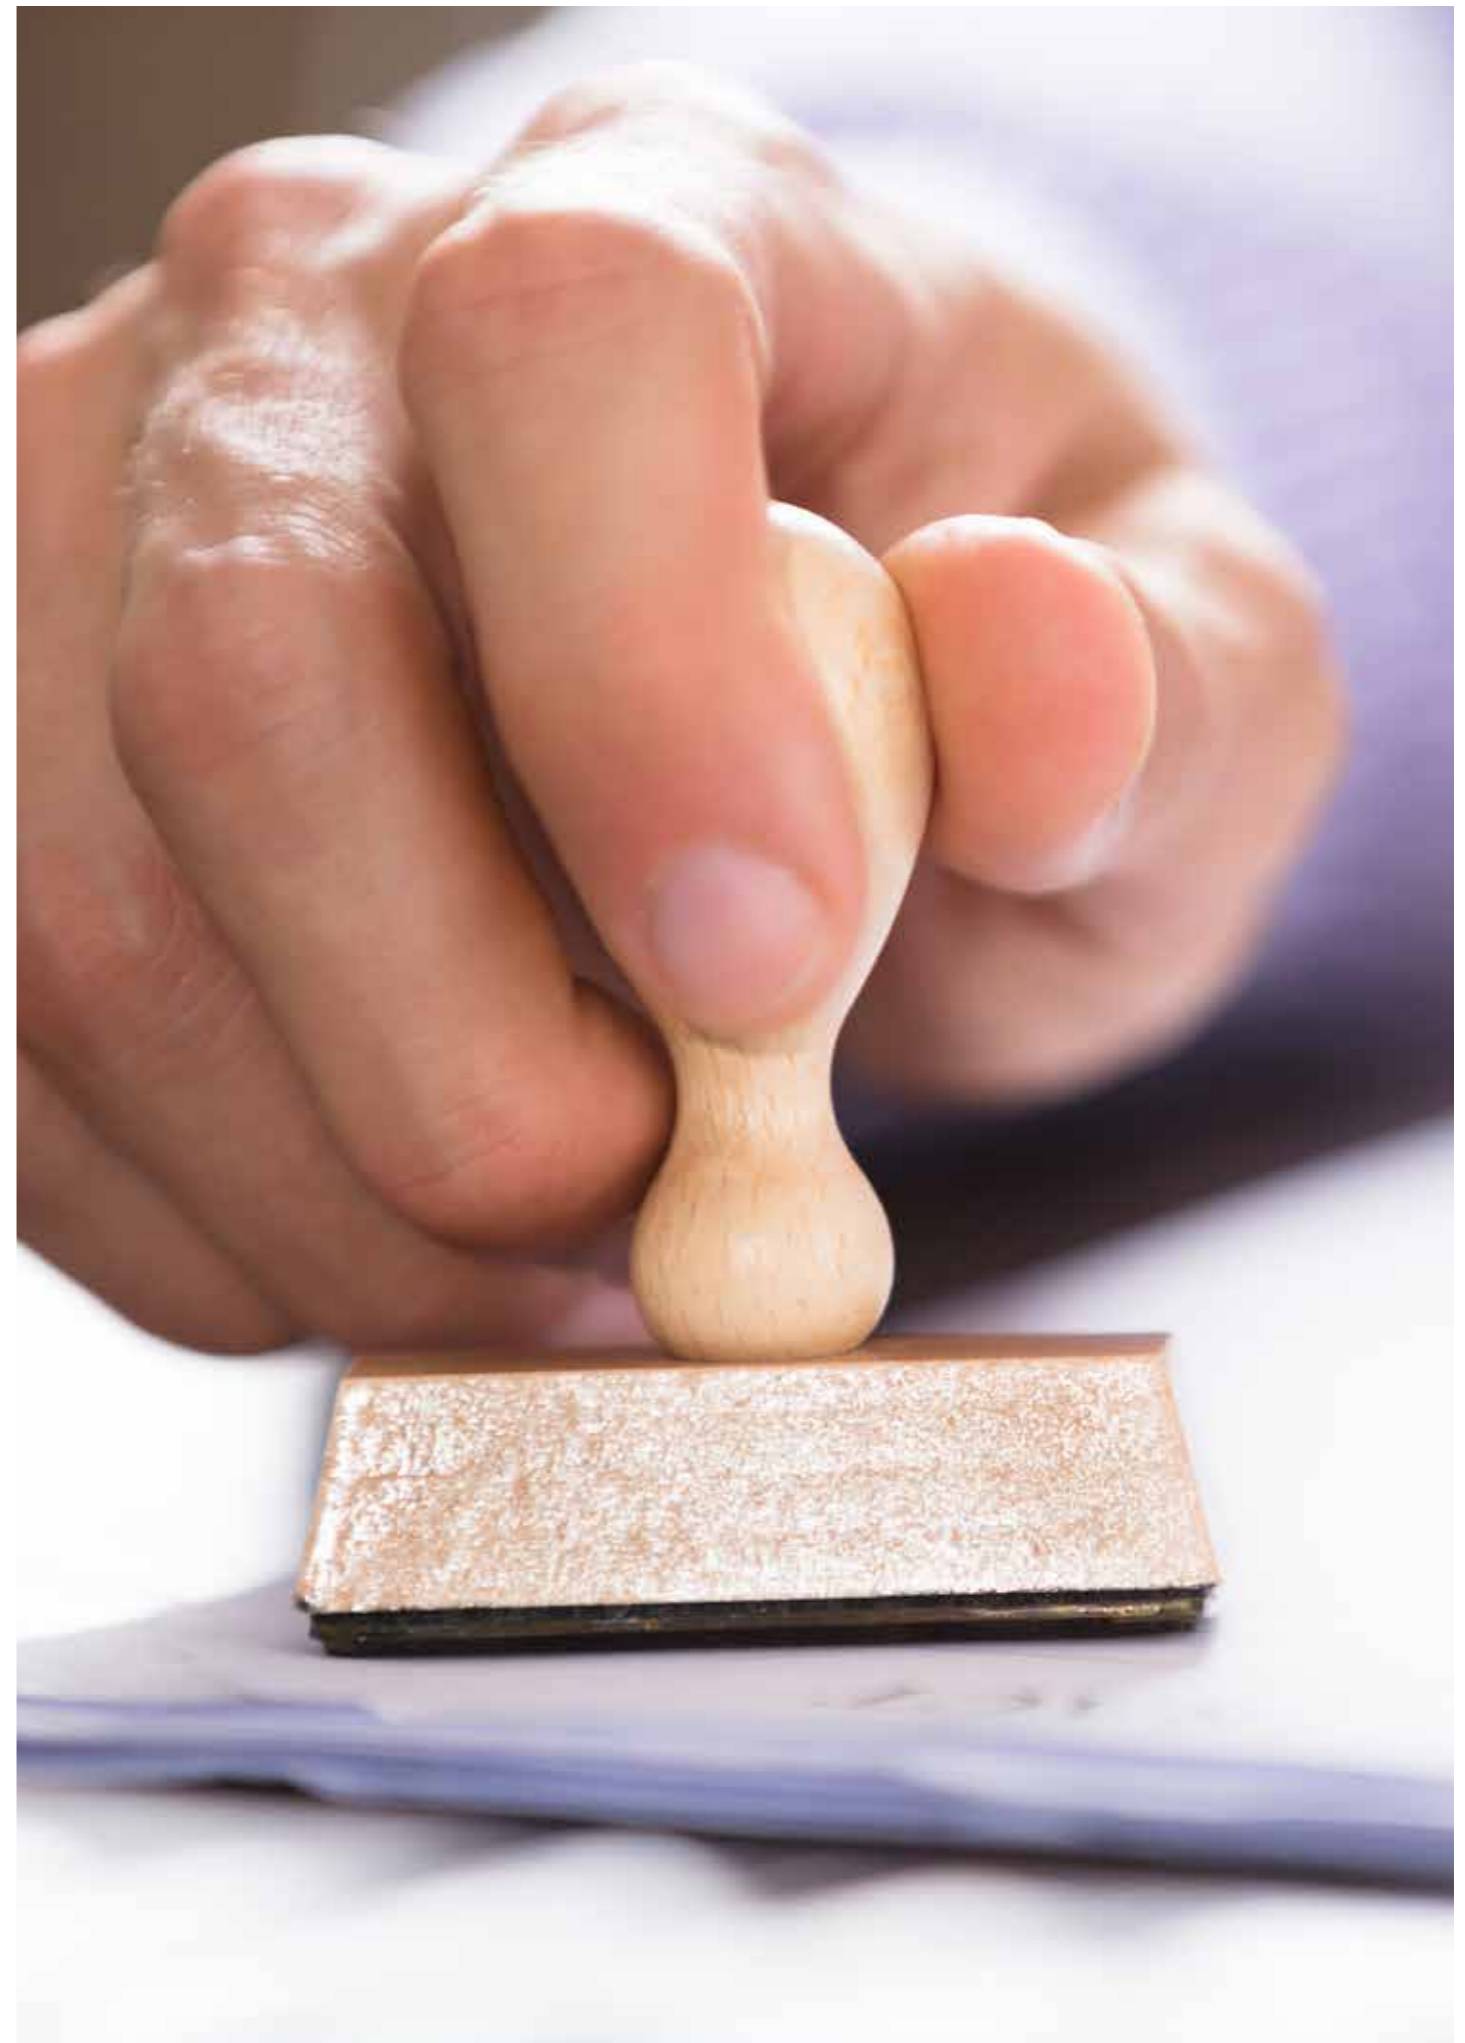

Analysis & Advice

We don't just offer general advice and guidance about your storage requirements; we go further to provide you with practical assistance and advice with a more detailed analysis of your storage requirements.

Our own in-house Analysis & Simulation Tools will translate your storage needs into a specification report, evaluating all areas of your warehouse.
