Commitment

Like each brush-stroke the artist applies to a canvas, every part of a Toyota is created to function in perfect harmony with every other part. So you can count on superb Quality, Dependability and Reliability - or QDR, the foundation of our reputation. Rather than simply meeting your expectations, we strive to exceed them through our commitment to constant improvement. This means innovations such as more fuel efficient engines with increased power, traction control systems and enhanced occupant safety. And it means addressing environmental and safety concerns by developing alternative powered vehicles and vehicle stability control systems. Above all, it means creating a level of quality that, like fine art, can be relied upon to endure.

Mechanical elegance is everywhere: in the low effort steering; in the powertrain's amazing blend of performance and fuel economy; and in the generous cargo capacity enclosed within compact exterior dimensions. 4Runner – available in three different models: Limited, SR5 V6 and SR5. AIRBAG NOTICE: The 1999 Toyota 4Runner features a driver & front passenger airbag Supplemental Restraint System (SRS) which activates only in a front-end collision of sufficient magnitude to inflate the bags. In moderate frontal collisions, the airbags may not inflate, in a rear or side collision the airbags are designed not to inflate, so the primary protection is provided by the lap and shoulder belt system. *Seat belts must be worn at all times by all occupants.*
