Hold Control mode is a smart little feature integrated into the available four-speed automatic transmission. It helps reduce wheel spin and loss of traction when traveling on slick roads by allowing you to select a higher gear to reduce torque. You can also use it to help maximize control on hilly or twisting roads by remaining in a lower gear.

LITTLE GOES A LONG WAY.

With Aveo, the only time you'll realize you're driving a small car is when you park or fill up. It offers an EPA estimated **35 MPG** highway – that's better standard fuel economy than a lot of its competition. Under the hood, the ECOTEC 1.6L I-4 engine with Variable Valve Timing generates **108 HP** and 105 lb.-ft. of torque. Choose from two transmissions: the standard five-speed manual or available four-speed automatic with Hold Control mode on LT models.

TWICE THE PERSONALITY.

Aveo5 and Aveo Sedan have two distinct personalities, while some competitors don't offer you a choice. Aveo5 has "hatchback-itude." It's not your typical small 5-door.

Determined designers found an inch here and an inch there to add up to **BEST-IN-CLASS** front and rear hip room and front shoulder room.¹ The rear seat flips and folds down to create a hefty **37.2 CUBIC FEET**

of cargo room?² As for the smartly styled Sedan, don't think of it as losing a door, but gaining a trunk. When folded flat, the **60/40 REAR SEAT** seemingly creates

cargo space out of thin air. Either way you go, Aveo is perfect for friends or stuff or friends with stuff.

It will make you start volunteering to drive for road trips, tailgates and nights out.

Be sure every occupant is properly restrained. 2 OnStar acts as a link to existing emergency service providers. SMALL CAN BE EVERY BIT AS SAFE.

Size has nothing to do with how many safety features a car can have. Aveo5 and Aveo Sedan come with standard advanced dual-stage driver and front passenger frontal and side-impact air bags¹. Plus, every Aveo is equipped with a **STEEL SAFETY CAGE** to provide a zone of protection. But what really moves it ahead of its competitors is OnStar with **AUTOMATIC CRASH RESPONSE**². Here's how it works: In certain types of collisions, built-in vehicle sensors can automatically alert an OnStar Advisor who is immediately connected into your vehicle and can request emergency help be sent to your

exact GPS location. It even sends specific crash data so first responders can be prepared in advance for potential injuries. It's part of the OnStar Safe & Sound Plan, standard for the first year.

Dual-stage driver and front passenger frontal and side-impact air bags¹ are standard head gear in every Aveo.
