NATIONAL FUEL STATEMENT NO. 15

JANINE M. WARD

**BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

Docket No. R-2022-3035730

**National Fuel Gas Distribution Corporation
Pennsylvania Division**

Statement No. 15

**Direct Testimony of
Janine M. Ward**

Topics Addressed: Tariff and Gas Costs

Dated: October 28, 2022

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 **Q. Please state your name and business address.**

3 A. My name is Janine M. Ward. My business address is 6363 Main Street, Williamsville,
4 NY 14421.

5
6 **Q. By whom and in what capacity are you employed?**

7 A. I am employed as a Senior Manager in the Rates & Regulatory Affairs department of
8 National Fuel Gas Distribution Corporation (“NFGDC”). My primary responsibility is
9 the oversight of the market planning function, which focuses on the analysis of customer
10 usage and demands, including the annual five-year demand forecast.

11
12 **Q. Please provide your educational background.**

13 A. I graduated from The State University of New York at Geneseo, in May 2005, with a
14 Bachelor of Science degree in accounting. Additionally, I obtained a Master of Science
15 degree in Accounting from The State University of New York at Binghamton in May
16 2006. I became a Certified Public Accountant in 2012.

17
18 **Q. Please provide your professional experience.**

19 A. In September 2006, I began my employment at Ernst and Young, LLP as a Staff Auditor.
20 I was promoted to a Senior Auditor in October 2008. In October 2011, I was promoted to
21 Audit Manager and continued in that capacity through October 2014. In November
22 2014, I began my career with NFGDC, as a Senior Internal Auditor. In August 2018, I
23 was promoted to Manager of Financial Audits. In March 2021, I transferred to the Rates

1 and Regulatory Affairs Department as a Manager. In February 2022, I was promoted to
2 Senior Manager, which is my current position.

3
4 **Q. Have you previously testified in other proceedings before the Pennsylvania Public
5 Utility Commission (“PAPUC” or the “Commission”) or any other state or federal
6 agency?**

7 A. Yes, I testified before this Commission on behalf of NFGDC – PA Division (“National
8 Fuel” or the “Company”) in Docket No. R-2022-3030235.

9
10 **Q. Please describe the purpose of your testimony.**

11 A. I am testifying to certain required regulations pertaining to gas costs and the Company’s
12 tariff.

13
14 **II. DESCRIPTION OF EXHIBITS**

15 **Q. Are you sponsoring any exhibits or filing requirements in this proceeding?**

16 A. Yes, I am sponsoring National Fuel Exhibit F, which contains the Current and Proposed
17 Tariff. I am also sponsoring certain responses to the Commission’s regulatory filing
18 requirements that were prepared by me or under my direction. These regulations are
19 indicated on the master list accompanying this filing.

20
21 **Q. Please describe National Fuel Exhibit F.**

1 A. National Fuel Exhibit F is composed of two sections pertaining to the Company’s tariff.
2 Section 1 provides the current tariff and Section 2 provides the proposed tariff associated
3 with this rate case filing at Docket No. R-2022-3035730.
4

5 **Q. What tariff changes are being proposed in this case.**

6 A. The Company is revising references to the Supplement number, Issue and Effective dates,
7 and page numbers as necessary per this case. Apart from the proposed rate schedule
8 changes, a complete list of tariff modifications can be found in the List of Changes Made
9 by the Supplement section in National Fuel Exhibit F – Proposed Supplement No. 248 to
10 National Fuel Gas Distribution Corporation Gas Tariff No. 9. More significant proposed
11 changes to the tariff include:

- 12 • Removal of declining block rates, which is detailed in the direct testimony of
13 John D. Taylor in National Fuel Statement 19.
- 14 • Load Justified Investment – The residential consumption variables have been
15 updated.
- 16 • Rider B – The Company proposes the State Tax Adjustment Surcharge be
17 reset to 0.00% as discussed in the direct testimony of Donald N. Koch in
18 National Fuel Statement No. 2.
- 19 • Rider C – The Company proposes to add a new Rider C - Weather
20 Normalization Adjustment Rider, which is detailed in the direct testimony of
21 John D. Taylor in National Fuel Statement 19.

- 1 • Rider D – The Company proposes to add a new Rider D - Energy Efficiency
2 Pilot Cost Recovery, which is detailed in the direct testimony of Erik M.
3 Solomon in National Fuel Statement 18.
- 4 • Rider F – The Company proposes a change to the Low-Income Residential
5 Assistance Discount Charge to shift recovery of pre-program arrearage
6 forgiveness and program cost exclusive of company labor, from base rates to
7 Rider F.
- 8 • Rider G – The Company proposes the Merchant Function Charge be set to
9 2.6879% for Residential Service and 0.5097% for Non-residential Service,
10 which is detailed in the direct testimony of John D. Taylor in National Fuel
11 Statement 19.

12

13 **Q. Does this conclude your direct testimony at this time?**

14 **A.** Yes, it does.

NATIONAL FUEL STATEMENT NO. 16

JASON SCOUTEN

**BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

Docket No. R-2022-3035730

**National Fuel Gas Distribution Corporation
Pennsylvania Division**

Statement No. 16

**Direct Testimony of
Jason Scouten**

Topics Addressed:

- System Overview**
- Safety Programs/Initiatives**
- Damage Prevention**
- Emergency Response Leak Management**
- Reliability**
- Construction**

Dated: October 28, 2022

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 **Q. Please state your name and business address.**

3 A. My name is Jason Scouten. My business address is 225 Wayne Street, Erie,
4 Pennsylvania 16507.

5
6 **Q. By whom and in what capacity are you employed?**

7 A. I am currently employed by National Fuel Gas Distribution Corporation (“NFGDC”) as
8 the Superintendent of National Fuel’s Pennsylvania Division Operations (“Operations” or
9 “Operations Department”). NFGDC is a wholly owned subsidiary of the National Fuel
10 Gas Company (“NFG”). NFGDC has two divisions: its Pennsylvania Division (“National
11 Fuel” or the “Company”), which is a public utility regulated by the Pennsylvania Public
12 Utility Commission (“PAPUC” or “Commission”) and its New York Division (“National
13 Fuel – NY”), which is a public utility regulated by the New York Public Service
14 Commission (“NYPSC”).

15
16 **Q. Please provide your educational background.**

17 A. I hold a Bachelor’s Degree in Construction Engineering and Surveying Technology from
18 the University of Akron, as well as an Associate’s Degree from Penn State Behrend in
19 Mechanical Engineering Technology.

20
21 **Q. Please provide your professional experience.**

22 A. I have a deep range of professional experience in the natural gas industry, amassed both
23 in the field and from my education and learnings from trade and industry associations.

1 Most pertinently, I note that I have a deep understanding and knowledge of NFGDC's
2 Operations Department, having started at National Fuel in 2005 as an Operations
3 Supervisor. Through the years, I have gained an increasing number of managerial and
4 strategic opportunities as I have grown at National Fuel, being promoted most recently to
5 Superintendent from the role of Assistant Superintendent.
6

7 **Q. What are your responsibilities as Superintendent of National Fuel?**

8 A. In my capacity as National Fuel's Superintendent of Pennsylvania Operations,¹ I am
9 responsible for the operation, maintenance, upgrade, and enhancement of National Fuel's
10 transmission and distribution systems located in its Pennsylvania service territory (the
11 "Service Territory"). More specifically, through my oversight of the employees in the
12 Operations Departments, including: (a) the management, technical, clerical, and field
13 employees based at National Fuel's 12 Servicenters located throughout the Service
14 Territory; (b) employees based in the New Services Department; and (c) employees
15 housed in the Business Support and General Administration functions within Operations,
16 I am charged with, among other things:

- 17 • The delivery of safe and reliable natural gas distribution service to
18 National Fuel's customers.
- 19 • Leak detection, leak investigation, leak response, and leak repair activities,
20 including all required leakage surveys and system inspections, testing and
21 inspection of cathodic protection systems for steel facilities;

¹ All references in my testimony to "Superintendent" or to "National Fuel's Operations"/ "Operations Department" shall refer to "Superintendent of National Fuel's Pennsylvania Division" and to "National Fuel's Pennsylvania Division Operations Department," respectively, unless the context indicates contrary.

- 1 • Performing underground facilities locating for third-party excavators;
- 2 • Plant operations and system regulation;
- 3 • The day-to-day operations of National Fuel’s physical natural gas piping
- 4 system;
- 5 • Field customer service to National Fuel customers including, among other
- 6 things, odor complaints, meter turn-ons and turn offs, and all other
- 7 customer interfacing field interactions; and
- 8 • Dispatch and emergency response.

9 **Q. Have you previously testified in other proceedings before the Commission or any**
10 **other state or federal agency?**

11 A. No, I have not previously provided testimony in front of the Commission or any other
12 state/federal agency.

13

14 **II. PURPOSE OF TESTIMONY**

15 **Q. Please describe the purpose of your testimony.**

16 A. I will provide an overview of National Fuel’s natural gas distribution system
17 (“Distribution System” or “System”).² I will also discuss the operating performance of
18 the Distribution System, as measured by various metrics and benchmarks (including
19 safety, damage prevention, emergency response, leak management, reliability, and
20 ongoing maintenance, construction and enhancement). I will also testify regarding the

² All references in my testimony to National Fuel’s “Distribution System” or “System” (and related operations) shall refer to those located within National Fuel’s Pennsylvania Division.

1 initiatives and actions National Fuel has taken to increase the operating performance of
2 its Distribution System.

3
4 **Q. Are you sponsoring any exhibits or filing requirements in this proceeding?**

5 A. I am sponsoring National Fuel Exhibits JCS-1 and JCS-2.
6

7 **III. Overview of National Fuel's Pipeline Distribution System**

8 **Q. Please describe National Fuel's distribution system.**

9 A. Currently, National Fuel serves approximately 214,000 customers (including residential,
10 industrial and commercial customers). National Fuel owns and operates its Distribution
11 System, which is spread throughout 14 counties and serves over 230 municipalities
12 throughout northwestern Pennsylvania. More specifically, National Fuel's Distribution
13 System consists of: (a) approximately 4,900 miles of distribution and transmission mains;
14 (b) nearly 194,000 services that it owns, operates, and maintains; and (c) related facilities
15 (collectively, "Facilities").

16 National Fuel's distribution and transmission mainlines have been installed over multiple
17 decades and are comprised of many different types of materials including Unprotected Bare
18 Steel, Unprotected Coated Steel, Protected Bare Steel, Protected Coated Steel, Wrought
19 Iron, and Plastic.

20 National Fuel's service lines are distribution lines that transport gas from a common source
21 of supply to an individual customer, to two adjacent or adjoining residential or small
22 commercial customers, or to multiple residential or small commercial customers served
23 through a meter header or manifold. A service line ends at the outlet of the customer meter

1 or at the connection to a customer’s piping, whichever is further downstream. Excess flow
2 valves (“EFV”) and/or curb valves may be installed on newer gas service lines directly
3 downstream of the mainline tap as a safety measure in the event of a service line damage.
4 National Fuel also owns and operates 875 meter and regulator (M&R) stations as of
5 December 31st, 2021.

6 Furthermore, National Fuel owns and operates so-called “farm taps” throughout its Service
7 Territory, which are defined as service lines that are directly connected to either a
8 transmission pipeline or gathering pipeline that is not operated as part of a distribution
9 system. Farm tap equipment includes, but is not limited to, service taps, service lines,
10 risers, regulation equipment, over pressure protection equipment, valving, and meters.

11 A more detailed description of the Facilities and National Fuel’s Distribution System was
12 included in National Fuel’s recently-filed Long Term Infrastructure Improvement Plan
13 (“LTIIP”), which is pending before the Commission at Docket No. P-2022-3034957.

14
15 **Q. How many employees currently staff National Fuel’s Operations Department and**
16 **how does such staffing compare to that in previous years?**

17 A. Overall, as of August 2022, there are 261 employees in National Fuel’s Operations
18 Department as well as varying number of contractors (with exact number fluctuating at
19 any time based on number of projects being undertaken by the Company). The number of
20 employees staffing National Fuel’s Operations Department has grown over the past
21 several years, with a 18.1% increase since 2018. The number of Operations employees is
22 listed in the table below.

23

Year*	2018	2019	2020	2021	2022
Operations Headcount (FTE)	221	221	243	252	261
* Headcount as of August of each year.

18
19
20

Q. Why has the Operations Department’s staffing level increased by 18.1% since 2018?

A. Generally speaking, the increased headcount of National Fuel’s Operations Department is the result of the Company’s commitment to continuous improvement and the increased responsibilities arising from maintaining the integrity of the Distribution System in a safe and reliable manner. Some of the specific reasons for increased headcount correspond to our efforts/initiatives I will address later on in my testimony, including implementation of more robust safety programs/initiatives, increased role and responsibilities in the area of damage prevention and safeguarding the integrity of our facilities, ensuring a prompt and robust emergency response to incidents, managing, detecting, and repairing leaks (including Leak Management), other efforts to increase System reliability, and construction (both capital and ongoing maintenance).

Q. Please describe the Operations Departments organizational structure and duties of Operations employees at each level.

A. The Operations Department’s day-to-day operation and management is led by the Superintendent. The Superintendent has a direct line of report to the Senior Vice President of NFGDC, allowing the Superintendent to both obtain strategic information/direction from NFGDC executives and disseminate it to his Operations’ team (*i.e.*, share information from the “top-down”), as well as giving the Superintendent the

1 ability to quickly convey information from his team working in the field to NFGDC
2 executives.

3 The Superintendent is assisted by an Assistant Superintendent who helps with performing
4 certain delegated managerial functions. Reporting to the Superintendent are several
5 Senior Operations Managers and Operations Managers, who are assigned to/based out of
6 one of the twelve (12) Servicenters spread throughout National Fuel's Pennsylvania
7 Service Territory. Generally speaking, these Servicenters correspond to the
8 Responsibility Centers located throughout National Fuel's Service Territory.

9 Senior Operations Managers/Operations Managers are principally responsible for the
10 management of the Operations activities within the geographic area covered by their
11 Servicenter(s) and the management/oversight of the personnel based in their respective
12 Servicenter(s).

13 In addition, several skilled support personnel report to the Superintendent, Senior
14 Operations Managers, or Operations Managers, including individuals coordinating New
15 Services, Dispatch, general administrative functions for the Operations Department, and
16 those leading the Company's Damage Prevention initiatives.

17 Each Operations employee and contractor goes through robust training, to ensure they are
18 able to respond to the diverse array of tasks that they may be asked to perform each day.

19 An illustrative list of certain trainings is attached as National Fuel Exhibit JCS-1.

20 Moreover, Operations (as well as NFGDC, generally) is supported by an Emergency
21 Management Coordinator, who works with the emergency medical assistance providers,
22 fire departments, and other first responders within our Service Territory. Finally,
23 Operations has Field Operations Development Supervisors who provide hands-on

1 guidance to Operations field employees to further develop their skills and to ensure they
2 are performing their work in a safe and quality manner.

3
4 **Q. Please describe National Fuel's Servicers and their role in maintaining the**
5 **Distribution System.**

6 A. National Fuel's key Operations personnel and equipment are primarily located in twelve
7 (12) Servicers spread strategically throughout the Pennsylvania Service Territory.
8 More specifically, there are Servicers located in the following locations in
9 Pennsylvania: Erie (Erie County), West County (Erie County), Corry (Erie County),
10 Warren (Warren County), Oil City (Venango County), Meadville (Crawford County), Elk
11 (Elk County), DuBois (Clearfield County), Clarion (Clarion County), Sharon (Mercer
12 County), Brookville (Jefferson County), Bradford (McKean County), Chicora (Butler
13 County). As noted above, each Servicer houses key National Fuel personnel
14 including: (a) an Operations Manager or Senior Operations Manager; (b) in-house
15 construction crews; (c) clerical employees; (d) field technicians; and (e) support
16 personnel. Additionally, each Servicer houses key equipment including National
17 Fuel's fleet of vehicles and construction equipment, other special tools (such as line
18 locating equipment), and a stock of adequate supplies needed to handle routine
19 maintenance projects and emergency situations.

20 In addition to the twelve (12) Servicers, key administrative support personnel and
21 specialists who assist the Operations Department are located at National Fuel's Erie
22 Office located at 1100 State Street, Erie, PA 16501.

23

1 **Q. Can you describe the nature of National Fuel’s Pennsylvania Service Territory**
2 **served by the Distribution System?**

3 A. As discussed above, National Fuel’s Pennsylvania Service Territory spans fifteen (15)
4 counties across northwestern Pennsylvania. As a result, National Fuel’s Distribution
5 System crisscrosses over 230 municipalities of various geographic sizes and populations.
6 Significantly, while National Fuel’s Distribution System serves some larger population
7 centers, including the City of Erie, the City of Sharon, and the City of Meadville, the
8 majority of its Service Territory is rural, and its Distribution System is thus located
9 throughout many rural locales.

10

11 **Q. Can you describe how the nature of National Fuel’s Service Territory impacts**
12 **National Fuel’s Operations Department relative to the Distribution System?**

13 A. Generally speaking, there are different challenges/complexities in maintaining the
14 Distribution System in rural portions of the Service Territory and in urban portions of the
15 Service Territory.

16 With respect to the rural portions of the Service Territory, challenges/complexities
17 include:

- 18 • When National Fuel’s Facilities are scheduled for upgrade or otherwise
19 require to be replaced, we generally encounter a situation where the cost
20 and/or topography to replace facilities serving a small pocket of customers
21 may be costly and not in the public interest. In these situations, the Operations
22 Department has worked closely with the Land and Legal Departments to
23 determine whether it makes sense to replace such facilities or consider seeking

1 a Certificate of Public Convenience from the Commission to abandon service
2 and retire the facilities.

- 3 • Maintaining low response time to matters requiring Operations’ attention
4 (e.g., reports of leaks, emergencies, etc.) as a result of the large, sparsely
5 populated nature of National Fuel’s rural Service Territory. I will discuss our
6 emergency response times later in my testimony.
- 7 • There are a small number of customers served directly off of Company-owned
8 service lines, which have so-called “farm taps” or interconnection points with:
9 (a) high-transmission pipelines located throughout its Service Territory; (b)
10 wells owned/operated by local producers; and (c) gathering systems. These
11 situations can cause complexities. More specifically:
 - 12 ○ With respect to the scenario described in (a), National Fuel’s
13 Operations Department generally must work with third-party pipeline
14 operators and possess the skillset/have equipment to service a high-
15 pressure tap.
 - 16 ○ With respect to the scenarios described in (b) and (c), many of the
17 wells and gathering systems were installed in the early- to mid-1900’s,
18 meaning the wells serving such customers are, generally speaking, at
19 the end of their life in terms of traditional natural gas supply available.
20 As a result, in any given year, the customers served from farm-taps
21 require additional support from the Operations Department. Given that
22 such arrangements are often located in places distant from National
23 Fuel’s Distribution System, often, the only viable scenario (from a cost

1 perspective) and hence, in public interest, is to consider seeking a
2 Certificate of Public Convenience from the Commission to abandon
3 service to such customers.

- 4 • Hardship in designing and installing new/replacement facilities, as a result of
5 the topography of rural northwestern Pennsylvania (*e.g.*, large number of
6 mountains and hill, as well as streams, rivers, and wetlands).

7 With respect to the urban portions of the Service Territory, challenges/complexities
8 include:

- 9 • Access issues, as a result of customers either placing debris/fencing around
10 their yards and blocking the meter or as a result of meters being located in the
11 interior of the building (often basement) of homes (as was customary at the
12 time when the older buildings were constructed/fitted with gas hookups). As a
13 result of these access issues, sometimes the only viable way for National Fuel
14 to disconnect/ terminate service is through disconnecting the service line at
15 the curb box along the main line, which results in excavation costs both to
16 disconnect the service and to subsequently re-connect same.
- 17 • Additional complexity required in connection with the maintenance,
18 replacement, upgrade, and locating of facilities, as a result of limited space to
19 work, given the large number of improvements in close geographic proximity.
- 20 • Requirement to upgrade mains and related facilities to accommodate requests
21 from larger commercial customers located in urban areas, where the legacy
22 service comes from low-pressure distribution mains, but newer demands
23 require service from medium-pressure mains.

- Additional complexities caused as a result of heightened municipal regulation and large amount of improvements to the land required by municipalities when lines are repaired or replaced.

Q. On the matter of excessive municipal fees (including degradation fees) and other interference in the placement of National Fuel’s facilities, has National Fuel taken any actions to challenge same?

A. Yes, National Fuel has taken a proactive approach to combat excessive municipal fees, like degradation fees, as well as local ordinances which unduly interfere with normal operations of National Fuel. In this regard, Operations has worked closely with National Fuel’s Legal and Government Affairs Departments to engage municipalities with such permitting schemes, as National Fuel desires first and foremost to maintain its positive relationships with local governments. National Fuel has had much success through such engagement, with many municipalities agreeing to modify their fee structure/permitting schemes.

However, in recognition of the adverse impact on National Fuel’s operations and, ultimately, its customer ratepayers, if these collaborative discussions are not fruitful, National Fuel has resorted to litigation to resolve these matters. In this regard, I highlight that NFGDC commenced litigation against the City of Erie in 2021 in the U.S. District Court for the Western District of Pennsylvania. The result of such litigation was a settlement agreement whereby the City of Erie agreed to: (a) reduce its permit/inspection fees to a reasonable level; (b) eliminate degradation fees for public utilities like National Fuel; and (c) cease efforts to dictate placement of National Fuel’s facilities within the City of Erie’s rights-of-way. This settlement was brought before the Commission at

1 Docket No. U-2022-3030421 pursuant to 66 Pa.C.S. § 507, receiving Commission
2 approval on February 14, 2022.

3
4
5 **IV. Safety Programs/Initiatives**

6 **Q. Describe National Fuel's commitment to safety.**

7 A. At National Fuel, our highest priority is the safety of our customers, employees and the
8 communities we serve. While we are proud of our safety record, we are also experienced
9 enough to know that we can never become complacent. This is why we have worked hard
10 to establish a culture that embraces continuous improvement in all aspects of safety.

11
12 **Q. Describe National Fuel's current workforce safety record and trends relative to
13 same.**

14 A. In fiscal year 2020, National Fuel achieved an all-time best safety record with combined
15 Occupational Safety and Health Administration ("OSHA") recordable injury and DART
16 injury rates of 0.84 and 0.28, respectively. On top of achieving a Company best safety
17 record in 2020, the American Gas Association ("AGA") also recognized National Fuel's
18 Pennsylvania Division as a top-tier safety company in 2020 and leaders in accident
19 prevention. In addition, the Energy Association of Pennsylvania ("EAP") recognized the
20 combined National Fuel Pennsylvania Division and its sister affiliated company, National
21 Fuel Gas Midstream Company, LLC with four safety achievement awards for 2020:

- 22
- Exceptionally Low Injury Incidence Rate with 100,000 or more hours worked;

- 1 • Exceptional Reduction in Injury Incidence Rate with 100,000 or more hours
2 worked;
- 3 • Exceptional Reduction in Motor Vehicle Accidents; and
- 4 • Exceptionally Low Preventable Motor Vehicle Incident/ Accident Rate with
5 more than 2 million miles driven.

6
7 **Q. What actions has National Fuel taken to maintain and improve employee safety?**

8 A. As noted above, safety is our highest priority – in fact, it is one of National Fuel’s “core
9 values” and a “guiding principle.” In this regard, I highlight the following actions
10 National Fuel has taken to maintain and improve employee safety:

- 11 • **Education:** Integral to our safety commitment is a robust training and
12 qualification program to ensure that our employees and contractors are
13 knowledgeable and competent in performing their work, in accordance with
14 procedures designed to ensure regulatory compliance and reduce the probability
15 of incidents. In this regard, National Fuel trains and certifies both its employees
16 and contractors performing construction or operations and maintenance work on
17 its pipeline facilities using the same classroom training and
18 qualification/requalification exams. The education of our employees extends
19 beyond the classroom through regular emergency drills and tabletop exercises that
20 test our employee’s response to simulated emergencies. These exercises
21 periodically include representatives from local emergency management agencies.

22 Over the past three completed fiscal years (*i.e.*, 2018, 2019, and 2020)
23 National Fuel’s Pennsylvania Division amassed more than 26,850, 34,040, and

1 39,540 hours on safety meetings, training and operator qualification for our
2 hourly field personnel, respectively. In addition to classroom and online training,
3 three (3) real-world style training sites are available to National Fuel Operations
4 Personnel including facilities in Erie, Pennsylvania, Oil City, Pennsylvania, and
5 one in Buffalo, New York.

- 6 • **Safety Programs:** National Fuel has implemented safety programs and
7 management practices to ensure that a culture of safety is prioritized and
8 embraced throughout the entire organization. These important initiatives include:
 - 9 ○ Safe 4 the Right Reasons™ Safety Culture Program³ for promoting safe
10 work behaviors and inspiring teamwork for safety. The program has been
11 incorporated into every element of our safety program and is continuously
12 reinforced by employees and management;
 - 13 ○ Comprehensive Web-Based Operating Procedures designed for ready
14 access by employees and contractors to ensure safety and compliance,
15 including our Operational Compliance Program to ensure gas safety
16 requirements of laws, regulations and orders are incorporated into
17 procedures and that employees are trained to any new procedures, and that
18 compliance is audited in the field with annual “roll-up” certifications;
 - 19 ○ Weekly Safety Tips Published by Safety Department including
20 submissions from employees, which are used to share lessons learned,
21 raise safety awareness, and build safety culture;

³ The Safe 4 the Right Reasons™ Safety Culture Program is a product of DiVal Safety Equipment, Inc.

- 1 ○ Construction site work rules, safety procedures and guidelines on personal
2 protective equipment;
- 3 ○ Jobsite safety inspections and 3rd party safety audits of large construction
4 sites to ensure safety compliance;
- 5 ○ Multi-level employee and management interactions to identify and review
6 incidents, safety concerns and lessons learned, and to set safety
7 expectations and deliver timely safety messages, to raise safety awareness
8 and to build safety culture. This includes Bi-weekly Safety Calls including
9 senior management, management, supervision and union safety
10 coordinators, Labor-Management Safety Coordinator meetings, and All
11 Employee” Safety Calls including senior management, supervision and
12 hourly employees;
- 13 ○ Corporate Officer Health and Safety Goals tied to executive compensation
14 to promote safety;
- 15 ○ Intranet Safety Resource Center which provides ready access to the
16 Employee Safety Handbook and other safety procedures, safety forms,
17 safety training resources, PPE information, and COVID-19 safety
18 protocols;
- 19 ○ “Stop work responsibility” given to all employees and contractors in the
20 event they observe an unsafe practice or condition;
- 21 ○ Vehicle safety programs and driver safety training;
- 22 ○ Interstate Natural Gas Association of America (“INGAA”) Safety Culture
23 Survey; performed every 3-years the survey is utilized to monitor our

1 progress in cultivating a culture of safety across our organization, and to
2 identify areas for improvement;

- 3 ○ Extensive employee safety training and awareness; and
- 4 ○ Audits of our field employees to ensure compliance with safety policies,
5 procedures, etc.

6

7 **Q. What actions does National Fuel undertake to ensure that contractors working on**
8 **its Distribution System provide services in a safe manner?**

9 A. Contractors perform a significant portion of work on the Distribution System and we
10 recognize the importance of contractors working safely. Ensuring our pipeline contractors
11 work safely begins prior to the start of a project. In this regard, in addition to complying
12 with all operator qualifications and insurance requirements, our core group of pipeline
13 contractors are pre-qualified for safety by an independent, third-party service provider
14 specializing in this function. Contractors are required to submit documentation verifying
15 compliance with all OSHA and other mandated safety training as well as information
16 related to injuries and incidents on a quarterly basis.

17 In addition, National Fuel’s Engineering Department provides a comprehensive “Safety
18 Talk” ahead of each project and leads a weekly meeting with those working on such
19 projects during the project’s life. Also, National Fuel inspectors are on site at projects
20 reviewing work and ensuring it is being done in safe manner according to specs.

21 Finally, a third-party specialist audits the contractor safety programs and utilizes
22 statistical information to develop composite safety scores for each contractor. Of note,
23 National Fuel reviews contractor safety scores prior to awarding bids to ensure

1 contractors have appropriate and effective safety programs in place. In the event
2 contractor safety scores become unsatisfactory, we work collaboratively with contractors
3 to implement safety improvement plans and increase inspection levels to ensure safety on
4 our jobsites. Although rare, if safety performance does not improve to acceptable levels, a
5 contractor will be removed from our qualified bidder list.

6
7 **Q. Please describe National Fuel’s reduction in OSHA recordable injuries.**

8 A. As noted above, National Fuel has experienced a significant reduction in OSHA
9 recordable injuries from fiscal year 2010 through fiscal year 2020. This decline is shown
10 in the table below, which lists the OSHA Total Recordable Incident Rate (“TRIR”) as
11 well as total injuries and hours worked in 2010 and 2020, respectively:

OSHA Total Recordable Incident Rate (TRIR)		
Fiscal Year (October 1 – September 30)	2010	2020
TRIR	5.57	0.84
Injuries	18	3
Hours Worked	646,595	710,779

12
13 **V. Damage Prevention**

14 **Q. What are some of the causes of damage National Fuel encounters with respect to its**
15 **existing facilities?**

16 A. Generally speaking, damage to our facilities take the form of “line hits” where our
17 underground facilities are struck either as a result of: (a) the line being struck by a
18 National Fuel employee/contractor, acting in the scope of his/her normal operations; or
19 (b) the actions of a third-party (typically an excavator). In this regard, such hits by

1 excavators typically occur in connection with required relocations made to accommodate
2 highway and other public improvement projects.

3 In addition, our above-ground facilities like meters, regulator stations, and above-ground
4 portions of service lines are also struck on occasion, usually as a result of negligent
5 conduct of others (*e.g.*, a car collides with our above-ground regulator station).

6
7 **Q. Please provide information on the current level of excavation damages made to
8 National Fuel’s Distribution System, as well as metrics and trends.**

9 A. Maintaining the integrity of the Distribution System by preventing line hits is of critical
10 importance to National Fuel. In calendar year 2021, National Fuel experienced 145 total
11 number of excavation damages or 2.75 line hits per 1,000, compared with 389 excavation
12 damages or 9.67 line hits per 1,000 in calendar year 2005. This translates to a 62.7%
13 reduction in line hits over that time period. Based on information through July 31, 2022,
14 National Fuel remains on track to have another year of reduced line hits, compared to the
15 prior year.

16
17 **Q. What is a “problem locate” and what efforts has National Fuel taken to reduce the
18 number of problem locates?**

19 A. A problem locate is any of National Fuel’s facilities which is not able to be located using
20 traditional locating technologies prescribed by our standard operating procedures. When
21 National Fuel is asked to mark a “problem locate,” we use a variety of additional
22 tools/technologies, including our vacuum excavation crews and a Jameson tool.

1 Over the past several years, the Company has taken several initiatives to drive down the
2 number of problem locates, including through GIS mapping initiatives and upgrading
3 facilities known to be “problem locates.” As an example, we are currently implementing
4 a problem locate management system which helps identify situations where problem
5 locates are prevalent and then proactively alerts Operations Supervisors and Managers.
6 This will ensure Operations Supervisors and Managers are included in the decision-
7 making process as to how to best respond to same at the outset. National Fuel not only
8 plans to continue these efforts going forward, but to explore additional initiatives, as well.
9

10 **Q. What efforts has National Fuel taken to reduce the amount of line hits caused by**
11 **third-party excavators?**

12 A. While we cannot control the actions of all third-party excavators in our region, National
13 Fuel dedicates significant resources to educate and train contractors, our customers, and
14 the general public on the importance of damage prevention and safe excavation practices
15 through our “811 – Call Before You Dig” awareness campaigns. These awareness
16 campaigns have included customer newsletters in multiple languages, radio and print
17 advertisements, social media posts, outdoor billboard ads, educational outreach to local
18 municipalities, and educational outreach to third party excavators. We have also taken the
19 role of line locator resources “in-house,” to provide National Fuel maximum level control
20 over the locating work being completed and also to ensure that the line locator can have
21 open communication with the excavator, with each side understanding that the line
22 locator speaks for National Fuel.

1 In addition, we have recently enhanced our ticket/problem locate management. This
2 enhancement allows National Fuel to assign a “risk level” for an incoming line locate
3 request, by assigning a score to a particular locate ticket, based on metrics such as: (a)
4 National Fuel’s past history working with/safety record of the excavator; (b) type of line
5 (e.g., service-, main-, or transmission line); and (c) excavation metric being used. Based
6 on the “risk” computed as well as certain “red flags” assigned to the ticket (e.g., type of
7 high-risk excavation as determined by National Fuel, such as augering), Operations
8 Supervisors and Managers are promptly notified of the incoming line locate request to
9 ensure they are included in the decision-making process and are part of key decisions as
10 to how to best respond to same.

11 Additionally, National Fuel Operations personnel attend pre-construction meetings with
12 contractors and facility owners to emphasize safe excavation practices while working
13 near natural gas facilities. Company personnel also perform standby inspection during
14 excavation near critical facilities such as transmission and high-pressure pipelines, or
15 where trenchless construction near gas facilities is utilized.

16 As a result of the above initiatives and continuous improvement, National Fuel has
17 achieved a 63% decrease in excavation damage between calendar year 2018 and 2021.

18
19 **Q. What actions has National Fuel taken to reduce the number of line hits?**

20 A. National Fuel has undertaken several initiatives to reduce the number of line hits – both
21 internally and through public outreach. Some of the internal efforts include the following:

- 22 • **Robust Training of Employees and Contractors:** Nearly all National Fuel
23 Operations personnel and every contractor employee are required to attend a class

1 on operator excavation and backfilling in the vicinity of a pipeline. This class
2 covers the basics of the natural gas industry and instructs the employees and
3 contractors on the safe operation of mechanized equipment in the vicinity of a
4 transmission or distribution gas facility for maintenance or installation of a
5 pipeline. One-Call regulations, facility marking colors, proper support of
6 pipelines, and backfilling procedures are also covered in this class. With the
7 knowledge that is received from this class, National Fuel Operations field
8 employees can be considered “Damage Prevention Ambassadors” when
9 interacting with excavators.

- 10 • **Development of “Ticket Risk Analysis Tool”:** Information on this tool is
11 described in a previous answer provided in my testimony.
- 12 • **Enhanced GIS Mapping:** National Fuel has also leveraged GIS Mapping to
13 assist by plotting in GIS data relative to past facility damage. This allows
14 Operations personnel to help drive new damage prevention initiatives and to
15 strategically deploy additional personnel and resources to jobs which have higher
16 likelihood of line hits and work with excavators as result.
- 17 • **Development/Implementation of Robust Cross Bore Program:** National Fuel
18 has implemented two legacy cross bore inspection programs. As these programs
19 have been implemented, if a cross bore is discovered, National Fuel will inspect
20 all piping associated with the install job number for the affected facility. In a spirit
21 of continuous improvement, National Fuel Operations Supervisors and Managers
22 are working on updating the Cross Bore Program to make it more robust and to
23 incorporate new “best practices” developed by the American Gas Association

1 (“AGA”) on how to analyze the data the Company has already amassed and apply
2 it in a manner which mitigates impact/likelihood of future facility damage from
3 cross bores. In this regard, a group of National Fuel Operations Supervisors
4 recently attended an AGA’s Cross Bore Workshop, to learn about these “best
5 practices.”

6 From an external outreach perspective, we have taken the following initiatives:

- 7 • **Public Awareness Programs:** National Fuel has various public awareness
8 programs in place to increase the public’s knowledge of pipeline locations and
9 safety issues, including our “811 – Call Before You Dig” awareness campaigns.
- 10 • **Robust Communication and Meetings with Project Designers, Project**
11 **Owners, Excavators, and Other Relevant Stakeholders:** National Fuel
12 Operations personnel attend pre-construction meetings with contractors and
13 facility owners to emphasize safe excavation practices while working near natural
14 gas facilities. National Fuel personnel also perform standby inspection during
15 excavation near critical facilities such as transmission and high-pressure pipelines,
16 or where trenchless construction near gas facilities is utilized. National Fuel also
17 participates in Utility Coordination Committee Meetings, which are set up by PA
18 One Call in each county. The purpose of these meetings is to encourage
19 collaboration between municipalities and facility owners to minimize the impact
20 of new projects on the public and encourage damage prevention.

21 As a final note, while National Fuel believes that robust communication, outreach,
22 training (both internally and externally), and other collaborative efforts is the most
23 productive means to keep line hits to a minimum, given the importance of protecting our

1 facilities, our customers, and the public at-large, if National Fuel becomes aware of
2 unsafe excavation practices which pose a threat to its facilities, National Fuel is not afraid
3 to avail itself of all of its legal remedies to prevent same. In this regard, and as an
4 illustrative example, National Fuel recently sought an injunction from the Court of
5 Common Pleas of Erie County, PA in order to prevent unsafe excavation activities from
6 occurring next to its facilities.

7 **VI. Emergency Response**

8 **Q. Describe National Fuel's performance in the area of emergency response.**

9 A. The Company places a high priority on having a rapid response to emergencies and a
10 thorough investigation once onsite. We believe this is critical to preventing an emergency
11 situation from becoming an incident. As a result of our commitment to emergency
12 response, the Company is among industry leaders in this area as confirmed by annual
13 industry benchmarking and statewide regulatory performance measure reporting.

14
15 **Q. As part of its emergency response, how does National Fuel investigate the causes of
16 same?**

17 A. When investigating pipeline emergencies and incidents, the Company utilizes a
18 comprehensive Root Cause Analysis ("RCA") process to determine the cause of the
19 incident and to identify lessons learned to prevent future incidents. The process includes
20 the use of trained facilitators and the oversight of an RCA Standards Team comprised of
21 subject matter experts from across the organization.

22

1 **Q. Does National Fuel have a mature plan in place for responding to emergency**
2 **situations?**

3 A. Yes. In accordance with applicable law and industry best practice, National Fuel has
4 developed Emergency Response Plan (“Plan”). By way of summary, the Plan has been
5 established as guidelines for responding to and helping emergency conditions. The Plan
6 includes, among other things, the following:

- 7 • Evaluation of the condition;
- 8 • Investigation and classification of emergencies;
- 9 • Departmental and individual responsibilities;
- 10 • Coordination and communication with emergency response agencies, public
11 officials and the general public;
- 12 • Plan and work out a coordinated response with owners of other utilities in the
13 vicinity of the pipeline facilities;
- 14 • Required notifications; and
- 15 • Follow up reporting.

16 Depending on the conditions encountered, many National Fuel departments and outside
17 agencies may become involved with the handling of the emergency condition. In addition,
18 recognizing the importance of a clear “chain of command,” the Plan prescribes a chain of
19 command for emergency response,

20 modeled off of guidance from the Federal Emergency Management Agency’s (“FEMA”)
21 regarding incident command organizational structure. All Operations Supervisors are
22 trained in the structure and the roles prescribed during emergencies.

23

1 **Q. How does National Fuel keep its personnel trained on its Emergency Response**
2 **Plan?**

3 A. National Fuel offers robust training to its personnel who would be tasked with responding
4 to an emergency situation. In this regard, National Fuel has an “Operator Qualification
5 Program” modeled after the Northeast Gas Association’s Operator Qualification (OQ)
6 Program, whereby operating personnel, with different levels of functional responsibility
7 and job complexity/seniority, are trained to ensure that they are knowledgeable of the
8 company’s Emergency Response Plan, among other job tasks. Training effectiveness is
9 verified through written examinations and “practice sessions,” where the task(s) at hand
10 are physically performed. Mandatory initial training is required for employees, as well as
11 periodic refresher training. Individual employee training frequencies and training module
12 completions are tracked by the company.

13 In addition, National Fuel trains its Operations personnel through various means as it
14 pertains to emergency response. Below lists the multiple ways that this training is
15 achieved:

- 16 • Emergency drills, simulations and “table tops;”
- 17 • Industry lessons learned and post-incident reviews;
- 18 • Postmortem reviews of company incidents or near misses;
- 19 • Safety stand downs and “all-calls;”
- 20 • On the job training with experienced FSR’s;
- 21 • Fire School; and
- 22 • Emergency Coordinator training.

1 On an on-going basis, emergency drills, simulations and tabletop exercises are run for
2 continued training, to check response times, communication systems, employee actions,
3 implementation of the Incident Command System (ICS) and to verify the adequacy of
4 Company procedures. Where practical, Supervisory and Management employees are
5 encouraged to invite area emergency and first responders, local and state public officials,
6 and other utilities and external stakeholders to participate in emergency drills, simulations
7 and tabletop exercises. Upon completion of a simulated event, a write up of events is
8 completed and reviewed with all parties involved. Any deficiencies identified are
9 corrected and remedial action is undertaken to address recommendations.

10
11 **Q. How does National Fuel ensure that community partners (e.g., fire, police, EMS) are**
12 **able to effectively assist with emergency response?**

13 A. As noted above, National Fuel's Plan contains provisions regarding coordination with
14 community partners, and provides guidance on coordination with same *during* the
15 emergency.

16 Nevertheless, in a proactive posture, the Company offers a number of training
17 alternatives for emergency response personnel in the communities we serve. These
18 training alternatives include an online First Responder Natural Gas Safety Training
19 Program. This program is a self-directed, interactive, online training package that
20 provides emergency response personnel with the information they need to safely identify
21 and respond to incidents that involve natural gas pipelines and other natural gas facilities.
22 It is a free program designed in partnership with fire chiefs, safety trainers, educational
23 experts, and instructional design professionals. The Company also offers and promotes

1 free in-person training for first responders and emergency management agencies in our
2 Service Territory, and sponsors and participates in regional meetings covering pipeline
3 safety with local excavators, emergency responders, and public officials.

4 In addition, National Fuel offers on-site, in person training for external first responders,
5 fire departments, and police departments, is held at mutually acceptable locations. The
6 content of these training sessions includes recognizing and responding to natural gas
7 emergencies, atmospheric monitoring and best practices that have been developed for gas
8 detection using CGI's, evacuation distances, natural gas facilities, emergency
9 preparedness, unified command using ICS, emergency contacts, and compressed natural
10 gas ("CNG") powered vehicles. The Company also reviews major incidents that have
11 occurred around the country, and lessons learned, which allows the Company to blend
12 responses by fire departments and the utility.

13 Moreover, the Company offers yearly hands-on training exercises that simulates what the
14 fire departments will expect responding to fires located near or directly involving a
15 pipeline facility. These simulations are used for training firefighters for responses during
16 pipeline damage, fire, explosions, natural disasters or concurrent natural disasters. For
17 non-volunteer fire departments, the Company offers to assist the training coordinator in
18 developing training programs for gas safety-related matters.

19
20 **Q. What is National Fuel's average emergency response time and how does it ensure**
21 **that Company personnel are timely dispatched to emergency situations?**

22 A. In 2020, National Fuel's Pennsylvania Division responded to over 98% of emergency
23 calls within 45 minutes, with the average response time being 20.8 minutes. Considering

1 the rural nature of a broad portion of National Fuel’s Service Territory, National Fuel is
2 proud of these numbers.

3 National Fuel always has Operations personnel on call/standby to respond to
4 emergencies. In this regard, National Fuel’s strategically has Operations personnel
5 throughout the Service Territory available and able to respond upon receiving notification
6 of an emergency. Such employees have National Fuel-owned vehicles and adequate
7 resources and equipment to respond to emergency situations. National Fuel has ensured
8 that the requirement to be available is a requirement for its Union personnel, as well.
9 In addition to Operations being ready to deploy to an emergency situation immediately
10 upon notice of same, response to emergency situations often requires coordination within
11 other National Fuel departments including, among others: (a) Gas Control; (b)
12 Construction; (c) Mechanical Department; (d) Consumer Business; (e) Corporate
13 Communications; and (f) Risk Department. The Plan specifies in which situations and the
14 means of quickly involving these Departments as part of National Fuel’s emergency
15 response.

17 **VII. Leak Management**

18 **Q. How are leaks classified on the National Fuel’s Distribution System?**

19 A. National Fuel classifies leaks on its Distribution System as “Type 1”, “Type 2”, and
20 “Type 3” as follows, with “Type 1” being the most severe:

- 21 • **Type 1 Leak:** A leak which, due to its location and/or relative magnitude,
22 imposes a potentially hazardous condition upon the public or buildings. These
23 include, but are not limited to:

- 1 ○ 1) Damage by contractors or outside sources resulting in leakage;
- 2 ○ 2) Any indication on a CGI of natural gas entering buildings or tunnels;
- 3 ○ 3) Any reading on a CGI within five (5) feet of a building wall;
- 4 ○ 4) Any reading of 4% or greater gas-in-air within manholes, vaults or
- 5 catch basins, in their normal condition;
- 6 ○ 5) Any leak which, in the judgment of the operating personnel at the
- 7 scene, is regarded as potentially hazardous;
- 8 ○ 6) Any reading of 10% or greater gas-in-air inside a continuously paved
- 9 area which is more than five (5) feet but within 30 feet of a building; or
- 10 ○ 7) Any reading of 20% or greater gas-in-air in any unpaved area which
- 11 is more than five (5) feet but within 20 feet of a building and inside the
- 12 curb line or shoulder of the road.

- 13 • **Type 2 Leak:** A leak that does not represent an immediately hazardous condition
- 14 to the public or buildings, but is of a nature requiring scheduled repair. Grade 2
- 15 leaks include, but are not limited to:
- 16 ○ 1) Any reading less than 10% gas-in-air inside a continuously paved
- 17 area which is more than five (5) feet but within 30 feet of a building;
- 18 ○ 2) Any reading less than 20% gas-in-air in any unpaved area inside the
- 19 curb or shoulder of the road which is more than five (5) feet but within 20
- 20 feet of a building;
- 21 ○ 3) Any reading of 30% or greater gas-in-air in any unpaved area and
- 22 inside the curb or shoulder of the road between 20 and 50 feet from the
- 23 building;

- 1 ○ 4) Any reading of 30% or greater gas-in-air in a paved area between 30
- 2 and 50 feet from a building;
- 3 ○ 5) Any leak other than a Grade 1 which, under frost conditions, should
- 4 be so classified in the judgment of the operating personnel at the scene; or
- 5 ○ 6) Any reading less than 4% gas-in-air in a manhole, vault or catch
- 6 basin in its normal condition.

- 7 • **Type 3 Leak:** Any leak that is not classified as a Grade 1 or Grade 2 leak.

8

9 **Q. Please discuss National Fuel’s efforts to reduce leaks on its Distribution System?**

10 A. With thousands of miles of underground piping that are subject to corrosion, frost

11 conditions, and other outside forces, some leaks are inevitable on any gas distribution

12 system. Therefore, an effective leak management program is essential to ensure safety

13 and to reduce greenhouse gas emissions from natural gas leaks.

14 The federal Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2020

15 (“PIPES Act”), signed into law on December 27, 2020, requires new regulations for leak

16 detection and repair programs to identify, locate, and categorize all leaks that are

17 hazardous to human safety or the environment. Further, the PIPES Act requires pipeline

18 operators to update their inspection and maintenance plans with respect to public safety,

19 eliminating hazardous leaks, minimizing releases of natural gas, and the replacement or

20 remediation of pipelines that are known to leak based on the material, design, or past

21 operating and maintenance history of the pipeline. The Company has a comprehensive

22 leak management program consistent with the goals of the PIPES Act and we are

1 exploring new areas for reducing methane emissions. Current mitigative measures
2 include:

- 3 • Accelerated leak surveys exceeding regulatory requirements that target facilities
4 with a higher potential to leak or that have potentially higher consequences should
5 a leak occur;
- 6 • Annual leak backlog goals to drive year over year improvement, which are also
7 tied to annual executive compensation goals; and
- 8 • Annual system modernization targets to replace pipelines that have a higher
9 potential to leak.

10
11 **Q. In addition to National Fuel performing leak surveys, has National Fuel taken any**
12 **other actions to reduce leaks?**

13 A. Yes. As will be described later in my testimony, among other capital projects prioritized
14 by National Fuel are those which aim to eliminate leak-prone portions of our Distribution
15 System. In this way, we strategically reduce the amount of our facilities with leaks.
16 Additionally, while National Fuel has a talented team of Operations employees who work
17 to detect and eliminate leaks, we also empower our customers to alert us to leaks they
18 may detect. In this regard, we send out literature and engage in advertising campaigns to
19 educate individuals about the “rotten egg” smell of gas (caused by the added odorant
20 mercaptan), and urging them if they “Smell Gas, Act Fast.”

21 **Q. How has National Fuel’s system leaks improved since 2005?**

22 A. National Fuel’s system leaks have improved significantly since 2005. More specific
23 information is listed in National Fuel’s Exhibit JCS-2.

1
2 **VIII. Reliability**

3 **Q. How reliable was National Fuel’s Distribution System, when measured by number**
4 **of outages?**

5 A. National Fuel takes its responsibility to provide reliable gas service to its customers and
6 believes it has done so in accordance with industry standards and commission
7 expectations. In this regard, the total number of customer outages in 2015-2021,
8 respectively was 1,067, 1,027, 741, 562, 646, 551, and 479. The data suggests that the
9 number of outages has generally decreased during that time period. If the outage
10 information for all five years was averaged, the average annual outages would be 595.8.

11
12 **Q. What outage trends have you observed?**

13 A. Generally, we have observed that outages fall into one of three categories: (a) above-
14 grade damages; (b) below grade damages; and (c) water issues. The table below
15 graphically depicts the outage trends in each of these categories during the period of
16 2015-2021:

Performance Measure	Year 2015	Year 2016	Year 2017	Year 2018	Year 2019	Year 2020	Year 2021	5-Year Average 2017-21
Water Issues	241	148	60	93	71	75	171	94.0
Above Grade Damages	25	30	35	65	40	36	37	42.6
Below Grade Damages	815	849	646	404	532	440	271	458.6
Total	1067	1027	741	562	646	551	479	595.8

Q. How does National Fuel’s Operations Department respond to such outages and work to remediate same?

A. National Fuel’s Operations Department is often the first group of National Fuel employees to respond to these outages. In this regard, National Fuel’s Operations Department is responsible for timely identifying the root cause of the outage and to work with other stakeholders to identify remedial action to resolve same and ultimately implement same.

Beyond responding to these incidents, on a more strategic level, National Fuel collects data on these outages and prioritizes known trouble spots for upgrade/replacement. More information on this process and National Fuel’s Operations Department role in same will be discussed in detail later in my testimony.

IX. Construction

Q. Describe the types of construction activities that National Fuel’s Operations Department is involved with and helps to execute/coordinate. Also describe how National Fuel staffs such projects.

A. Generally speaking, National Fuel’s Operations Department is involved with two categories of construction-type work: (a) strategic, capital improvements projects which have the aim of enhancing the safety, reliability, and efficiency of its Distribution System (“Capital Projects”); and (b) more routine, maintenance-style projects.

As a general rule of thumb, Capital Projects involve several business groups within National Fuel including the Engineering Department, the Land Department, and Operations, among others. After the design of the Project, Operations coordinates the

1 execution of the Project, with staffing consisting of a mix of National Fuel Operations
2 employees and approved contractors.

3 On the other hand, routine maintenance work (“O&M”) – which consists of smaller-scale
4 leak response/remediation, isolated mainline work, repair/replacement of service lines,
5 meters, regulator stations, and other facilities – is generally staffed by National Fuel
6 Operations employees and, to a lesser degree, National Fuel approved contractors.

7 In either case, National Fuel employees and contractors working on projects are tasked
8 not only with handling the construction aspects of the job, but also with ancillary matters
9 such as coordination/control of traffic in the area around the Project, quality control
10 review, and the like.

11
12 **Q. What are the historical budget/actual spend by National Fuel Operations on Capital**
13 **Projects and O&M?**

14 A. National Fuel’s Operations’ budgeted and actual spend on Capital Projects is more
15 thoroughly discussed in its LTIP, which is pending before the Commission at Docket
16 No. P-2022-3034957.

17 **Q. How does National Fuel determine which large-scale upgrade-style construction**
18 **projects to fund?**

19 A. National Fuel strategically and systematically charts out and identifies portions of its
20 Distribution System for upgrade/replacement on a regular basis. Among other things
21 considered include leak-prone locations, locations where there has been a documented
22 reliability concern, or which is made of dated materials such as steel or wrought iron. In
23 this regard, the Company has developed several programs/initiatives to coordinate such

1 projects. Such initiatives are more thoroughly discussed in the Company’s LTIP, which is
2 pending before the Commission at Docket No. P-2022-304957. Significantly, Operations
3 has an integral role in developing and strategizing priorities for system
4 modernization/upgrades.

5 **Q. What was the funding level for the projects described in your above answer?**

6 A. Funding levels for the projects described in my answer to the previous question can be
7 found in the Company’s LTIP, which is pending before the Commission at Docket No. P-
8 2022-3034957

9
10 **X. Initiatives**

11 **Q. Please describe any initiatives that National Fuel’s Operations Department is**
12 **helping to implement.**

13 A. The Operations Department is always trying to support the Company-wide goal of having
14 a reliable, safe, and sustainable Distribution System. In this regard, some specific
15 initiatives which the Operations Department is actively engaged with
16 designing/implementing, include the following:

- 17 • **PSMS:** We are implementing Devonway system, which is an industry-leader in
18 pipeline safety management systems. Within Devonway, we have developed, and
19 are continuing to develop workflows and reports which are aimed at enhancing
20 safety.
- 21 • **GPS Fusions and Completion Report:** We are currently developing and piloting
22 an application which contains “as-built” details and drawings of our facilities, to

1 ensure accurate mapping, capture detailed joining fusions, and ensure quality
2 workmanship.

- 3 • **Cross Bore Program:** Please refer to my above testimony regarding the
4 Company's efforts on this Program.
- 5 • **GIS Leak Survey:** To be fully implemented in 2023, this will be an electronic use
6 of GIS technology to monitor leak surveys, activities, and provide real-time
7 reporting on progress, leaks identified, etc.
- 8 • **IT Field Related Enhancements:** National Fuel is actively working to digitize all
9 field activities to enhance visibility and reporting from field activities, as well as
10 provide optimal level of customer service.

11
12 **Q. As Superintendent of National Fuel's Operations Department, what is your role with
13 respect to implementing the initiatives described in your previous answer?**

14 A. As noted above, as Superintendent I am responsible for the management of all aspects of
15 National Fuel's Operations Department. As such, I am tasked with ensuring that
16 appropriate Operations personnel are meaningfully working to advance and deploy these
17 initiatives, and to support them in their efforts. In this regard, I am able to strategically
18 redeploy Company personnel or assets in order to meet this goal.
19 Additionally, as I directly report to a Company executive, I am responsible for channeling
20 comments I receive "from the top down" regarding all matters including these initiatives,
21 and also relaying feedback received in the field to Company executives.

22
23 **Q. Does this conclude your direct testimony at this time?**

1 A. Yes.

- 8) Emergency Response Manual and tip card
- 9) Radio Operation Manual
- 10) Safety Handbook
- 11) Cell Phone Policy

ADMINISTRATIVE TRAINING:

The following list of items will be performed at some point during the training process.

- 1) Supervisory Timesheet
- 2) Hourly Timesheet Review and Timesheet Analysis.
- 3) MMD Documents
- 4) Operator Qualifications (ITS - Maintaining Qualifications by Employee)
- 5) Introduction to ARI (Fleet Management)
- 6) Risk Documents (Accidents/ Injuries and Root Cause Analysis)
- 7) Risk Management Observation Cards & Public Liability Reports
- 8) OMS Principals & HYK process (DSC/ Pre-Insp/ Reporting/ HYK Cal & flows)

NATIONAL FUEL STATEMENT NO. 17

ELMA BICO

**BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

Docket No. R-2022-3035730

**National Fuel Gas Distribution Corporation
Pennsylvania Division**

Statement No. 17

Direct Testimony of Elma Bico

**Topics Addressed: Universal Service Programs
Customer Initiatives**

Dated: October 28, 2022

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 **Q. Please state your name and business address.**

3 A. My name is Elma Bico. My business address is 1100 State Street, Erie, PA 16501.

4
5 **Q. By whom and in what capacity are you employed?**

6 A. I am employed by National Fuel Gas Distribution Corporation (“NFGDC”) as Consumer
7 Business Manager.

8
9 **Q. Please provide your educational background.**

10 A. I graduated from Penn State Erie, The Behrend College in 2006 with a Bachelor of Arts
11 Degree in Psychology and in 2008 with a Master’s Degree in Business Administration.

12
13 **Q. Please provide your professional experience.**

14 A. I joined National Fuel in 2010 as a supervisor in the Consumer Business department
15 which encompasses the call center, customer accounting, quality assurance, and
16 administration of universal service programs. I have held various roles in the Consumer
17 Business department and over the last few years have mainly been focused on managing
18 projects related to customer information system upgrades and implementations of any
19 regulatory changes.

20
21 **Q. Have you previously testified in other proceedings before the Pennsylvania Public**
22 **Utility Commission (“PAPUC” or the “Commission”) or any other state or federal**
23 **agency?**

1 A. Yes. I have testified in formal customer complaint proceedings before the Commission
2 several years ago.

3

4

II. PURPOSE OF TESTIMONY

5 **Q. Please describe the purpose of your testimony.**

6 A. The purpose of my testimony is to provide an overview of the NFGDC Pennsylvania
7 division’s (“National Fuel” or “Company”) Universal Service Programs, specifically the
8 Low-Income Residential Assistance (“LIRA”) Program and Low-Income Usage
9 Reduction Program (“LIURP”). In addition, I will provide an overview of the recent
10 customer initiatives.

11

12 **Q. Are you sponsoring any exhibits or filing requirements in this proceeding?**

13 A. No.

14

15

III. UNIVERSAL SERVICE PROGRAMS

16 **Q. Please provide an overview of the Company’s LIRA program.**

17 A. LIRA is National Fuel’s customer assistance program (“CAP”) for low-income
18 customers, which National Fuel offers per the terms of its Universal Service and Energy
19 Conservation Plan approved by the Commission. LIRA is currently offered as a
20 “discount rate” CAP (*i.e.*, enrolled customers pay a “discounted” rate based upon their
21 income and household size). However, National Fuel has petitioned the Commission to
22 modify the design of LIRA to structure it as a “percentage of income program” or “PIP”
23 per filing made at Docket No. M-2021-3024935 (the “PIP Petition”). The PIP Petition is

1 currently pending before the Commission. In addition to discounted rates, the LIRA
2 program includes pre-program arrearage forgiveness and energy education activities.
3 The goal of the program is to help customers better manage their gas costs, in turn
4 increasing the number of payments to National Fuel and reducing collection costs. There
5 are approximately 7,000 customers currently enrolled in LIRA.
6

7 **Q. Is National Fuel doing anything to increase participation in LIRA?**

8 A. National Fuel is currently working on developing an online application for LIRA which
9 will provide functionality for customers to submit their applications electronically. By
10 providing online application functionality, National Fuel hopes to increase enrollment in
11 LIRA.

12 In addition, National Fuel is involved in various outreach activities to educate the
13 community on the program and its benefits. The Company is adopting most of the 2019
14 Amendments to Policy Statement on Customer Assistance Program (*see, e.g.*, 52 Pa.
15 Code § 69.261–69.267 and Docket No. M-2019-3012599), including removing the
16 payment troubled requirement and only considering adult income for eligibility.
17 Reducing target energy burdens to 4% for 0%-50% federal poverty income guidelines
18 (“FPIG”) and 6% for 51%-150% FPIG increases affordability. Further, reverify
19 timeframes are extended from two (2) years to three (3) years for low-income home
20 energy assistance program (“LIHEAP”) recipients and social security/pension recipients.
21 All of these changes will help improve program retention.
22

23 **Q. Is the Company planning any additional changes to LIRA program?**

1 A. Yes. As noted above, National Fuel is working on a proposal to transition from the
2 discounted rate LIRA program to a PIP. The Company has worked with interested
3 parties to develop the PIP design and is currently seeking Commission approval of same.
4 After Commission approval is received, National Fuel will work to make necessary
5 programming/administrative changes to implement the PIP redesign of LIRA. National
6 Fuel has estimated that the LIRA redesign will “go live” approximately eighteen months
7 following Commission approval of same, and it will cost approximately \$673,000.

8

9 **Q. How is the LIRA program funded?**

10 A. The LIRA program is currently funded in part via Rider F – LIRA Discount Charge,
11 which is included in the rates subject to this Rider and in part through base rates. Rider F
12 is updated quarterly and effective each February 1, May 1, August 1, and November 1 of
13 the year. The charge is also updated whenever there is a change to the Residential Sales
14 Service Rate Customer Charge (basic service charge), Distribution Charge (cost to
15 deliver gas), Natural Gas Supply Charge (cost of gas), or Gas Adjustment Charge
16 (adjustment for over/under collected purchased gas costs).

17

18 **Q. Is National Fuel proposing any changes to how LIRA program costs are recovered?**

19 A. Yes. The Company is proposing to include all recovery charges related to LIRA
20 (discount costs, program administration costs and arrearage forgiveness costs) as part of
21 Rider F, removing the portion that is currently recovered in base rates and therefore
22 simplifying and streamlining reconciliation of these items.

23

1 **Q. Please explain National Fuel’s LIURP.**

2 A. LIURP is a weatherization program designed to assist low-income customers reduce their
3 energy usage, thus reducing their bills. Through LIURP, eligible customers receive
4 energy audit and education, heating system safety check, wall and/or attic insulation, and
5 other energy conservation measures. In addition to being low-income, to be eligible for
6 LIURP, customers need to have annual gas consumption greater than or equal to 1300
7 CCF. In an effort to provide additional assistance to customers and expand the LIURP
8 eligibility, the Company obtained a temporary PAPUC approval in January 2020 for a
9 new pilot program Low Consumption LIURP (“LC-LIURP). Per Order of the
10 Commission entered on May 3, 2022 at Docket No. M-2021-3024935, the LC-LIURP
11 pilot program was extended through January 2023. The goal of this program is to
12 identify and assist households with moderate consumption (annual consumption greater
13 than or equal to 900 CCF but less than 1300 CCF) in which the residence has a similar
14 amount of square footage equal to the identified yearly consumption. The Company bids
15 LIURP work out to community agencies and private contractors to obtain the lowest
16 price. The Company is focused on continuously improving its Universal Service
17 Programs by participating in outreach activities and various initiatives to encourage and
18 increase participation for eligible customers.

19
20 **Q. Is the Company proposing any changes to LIURP?**

21 A. No.

22

23

IV. CUSTOMER INITIATIVES

1 **Q. Please explain any new initiatives that the Company has implemented to improve**
2 **customer experience.**

3 A. There are several new initiatives that the Company implemented over the last few years
4 to improve customer service.

5 National Fuel implemented a new customer portal providing customers with easy
6 to navigate options and additional ways to pay their bill. Additional web and mobile
7 payment options include PayPal, Venmo, Apple Pay, Google Pay, and Pay by Text. The
8 Company also consolidated two AutoPay payment programs (Direct Pay – which was
9 managed by the Company and AutoPay which was managed by the payment vendor) into
10 a single program making it easier for customers to enroll and eliminating any confusion
11 related to having two similar options. The Company also partnered with the current
12 payment vendor to promote paperless and AutoPay enrollment through advertising and
13 sweepstakes.

14 In late 2020, the Company rolled out a new, more user-friendly corporate website
15 that is easier to navigate and accessible on multiple devices (mobile friendly). Along
16 with this, the Company has also expanded its social media use (Facebook, Twitter,
17 LinkedIn) as additional communication channels to share valuable content.

18 For non-collection related home visits, printed materials in the form of slip sheets
19 have been provided to customers explaining available payment assistance programs and
20 convenient payment options. The slip sheets include information about the following
21 payment assistance programs: LIHEAP, Neighbor for Neighbor Heat Fund (“N4N”),
22 LIRA, LIURP, Customer Assistance Referral and Evaluation Services (“CARES”),
23 Budget Plan, and Payment Arrangements. In addition, the slip sheets also provide

1 information about AutoPay and Pay by Text. The Company has also expanded eligibility
2 for N4N, allowing more customers to qualify for grants.

3 In early 2022, the Company has updated its customer information system to
4 incorporate preferred pronouns, providing functionality for customers to indicate their
5 preference and having that preference stored in the system for future interactions.

6

7 **Q. Does this conclude your direct testimony at this time?**

8 A. Yes.

NATIONAL FUEL STATEMENT NO. 18

ERIK M. SOLOMON

**BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

Docket No. R-2022-3035730

**National Fuel Gas Distribution Corporation
Pennsylvania Division**

Statement No. 18

Direct Testimony of Erik M. Solomon

**Topics Addressed: Bypass
 Research, Development &
 Demonstration
 Marketing Initiatives
 Energy Efficiency
 Gas Expansion**

Dated: October 28, 2022

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 **Q. Please state your name and business address.**

3 A. My name is Erik M. Solomon. My business address is 6363 Main Street, Williamsville, NY
4 14421.

5
6 **Q. By whom and in what capacity are you employed?**

7 A. I am employed by National Fuel Gas Distribution Corporation (“NFGDC”) as Area Manager
8 of the Energy Services Department.

9
10 **Q. Please provide your educational background.**

11 A. I graduated from the State University of New York at Buffalo in 1998 with a Bachelor of
12 Science Degree in Business Administration. I received a Masters Degree in Business
13 Administration from St. Bonaventure University in 2003.

14
15 **Q. Please provide your professional experience.**

16 A. I began my employment with National Fuel Gas Supply Corporation in June 1998 as a
17 Transportation & Exchange Representative. Since that time, I held a position for NFGDC in
18 the Gas Supply Administration department with responsibility for gas procurement, off-
19 system sales, capacity release and gas scheduling. In 2005, I transferred to the Energy
20 Services department as a General Energy Consultant, with responsibility for large volume
21 assigned account sales and customer service. In 2020, I was promoted to Area Manager, with
22 responsibility for sales, marketing, customer service, economic development, and research,

1 development & demonstration functions for NFGDC’s New York Division (National Fuel –
2 NY).

3
4 **Q. Have you previously testified in other proceedings before the Pennsylvania Public Utility
5 Commission (“PAPUC” or the “Commission”) or any other state or federal agency?**

6 A. Not before the PAPUC. However, I have testified in a New York state Rate Case (16-G-
7 0257) proceeding before the New York Public Service Commission.

8
9 **II. PURPOSE OF TESTIMONY**

10 **Q What is the purpose of your testimony?**

11 A. My testimony reviews the various competitive situations facing NFGDC’s Pennsylvania
12 Division (“National Fuel” or “Company”) including those of pipeline and local production
13 bypass as well as competition from alternative forms of energy such as electricity. I will
14 review National Fuel’s responses to these threats including its transportation service,
15 specialized rate designs and trade ally programs. I will also review those programs and
16 initiatives, including an overview of research, development, and demonstration programs.
17 Additionally, I will address National Fuel’s proposed Three-Year Energy Efficiency Pilot (EE
18 Pilot) and National Fuel’s proposed Three-Year Low to Moderate Income Demonstration
19 (LMI Demonstration).

20
21 **Q. Are you sponsoring any exhibits in this proceeding?**

22 A. Yes, I am sponsoring the following exhibits:

- 23
- National Fuel Exhibit EMS-1 – Existing Bypass

- 1 • National Fuel Exhibit EMS-2 – Potential Bypass
- 2 • National Fuel Exhibit EMS-3 – 2021 Delta Fund Report
- 3 • National Fuel Exhibit EMS-4 – RD&D Project Request Form Example
- 4 • National Fuel Exhibit EMS-5 – Proposed Residential Energy Efficiency Pilot
- 5 • National Fuel Exhibit EMS-6 – Proposed LMI Demonstration

7 **III. COMPETITIVE ASSESSMENT**

8 **Q. Please describe the competitive environment in National Fuel’s markets.**

9 A. National Fuel is affected by a variety of competitive market forces. The most obvious is in
10 the form of inter-fuel competition (oil, coal, electricity, propane, biofuels). There is also intra-
11 fuel competition with other providers of natural gas that construct facilities to physically
12 bypass National Fuel. Lastly, there is inter-company and intra-company competition faced
13 by National Fuel’s customers. Inter- company competition occurs when one firm, for
14 example a pipe manufacturer, is in competition with other pipe manufacturers either within
15 or outside of our service territory. Intra-company competition is characterized by situations
16 where a corporation has one plant located within our territory that is in competition for
17 production with another plant that is located outside of our territory. All these situations
18 contribute to the intensity of our competition.

19
20 **Q. Please explain how Inter-company or Intra-company competition affects your**
21 **throughput.**

22 A. Since National Fuel's sales to the manufacturing or process industries can often be directly
23 related to units of output, as the customer’s production levels increase or decrease because of

1 competitive forces, then so will National Fuel's throughput. An additional side effect is that
2 as customers are successful, jobs may be created or retained which affect the overall economic
3 viability of the marketplace. Therefore, National Fuel's objective has been, and continues to
4 be, to provide its product at a price or rate that enables its customers to compete. National
5 Fuel works extensively with its customers to assist them in achieving their competitive goals.

6
7 **Q. Please describe the overall economic viability of National Fuel's marketplace.**

8 A. While manufacturing is still an important part of the local economy, northwest Pennsylvania
9 has been transitioning from manufacturing to the service industry. To the best of our
10 knowledge, there have been approximately eight (8) major plant closings or severe production
11 reductions in the past five (5) years. The impact of this transition has dampened the growth
12 in throughput in the manufacturing sector. National Fuel's commercial and industrial
13 customers also are actively involved in implementing conservation measures to reduce
14 building heat loss, and new equipment technology is being utilized to provide for greater
15 efficiencies in space heating and process applications. As energy costs rise, there is greater
16 economic incentive for customers to investigate these measures to reduce costs. As customers
17 take these steps to reduce their costs, National Fuel's annual throughput declines. Today's
18 new construction standards are much more energy efficient than in years past. Better
19 construction materials, more insulation and more efficient space heating equipment all
20 contribute to reduced throughput. For example, over the past several decades the efficiency
21 of space heating equipment has increased from 80% to well over 90%.

22
23 **Q. Please explain briefly gas-on-gas competition that confronts National Fuel.**

1 A. "Bypass" is the primary form of gas-on-gas competition facing National Fuel, with bypass
2 being defined as the delivery of natural gas supplies directly to end-users, excluding the
3 services of the local distribution company ("LDC"). As in the past, this threat continues to
4 represent a significant competitive threat to National Fuel today. Producers continue to seek
5 direct markets for local gas production. While this local production threat has traditionally
6 existed in Northwestern Pennsylvania because of the presence of local gas reserves, National
7 Fuel has also witnessed a recent rise in the threat of bypass to interstate pipelines or gathering
8 systems. The threat of bypass in general is as pronounced as ever due to the economic and
9 market factors noted previously. The net effect of bypass is to deprive the LDC of operating
10 revenue and therefore the need to spread the expenses of operating its system to a smaller
11 base of customers and throughput.

12
13 **Q. How substantial is the threat of bypass?**

14 A. Local producer bypass is and will continue to be a very competitive issue. National Fuel's
15 large customers are physically surrounded by Marcellus and Utica gas reserves along with
16 existing local gas reserves. The opportunity for long-term contracts with end-users, coupled
17 with the proximity of local reserves, have combined to create producer initiatives to build
18 bypass facilities, thereby allowing customers to avoid the costs associated with utilizing
19 National Fuel's system. These customers are price elastic; meaning that if natural gas utility
20 prices rise or are too high, they can and will reduce demand through bypassing to a substitute
21 energy source. Customer bypass of National Fuel's system is a matter of continued concern
22 because it adversely affects both National Fuel and its other customers who, because they lack
23 substitute energy sources, tend to be price inelastic, especially over the short run. Customers

1 with large annual volumetric requirements are continuing to consider the installation of
2 bypass facilities.

3
4 **Q. Are there other specific bypass threats that cause significant risk of load loss to National
5 Fuel?**

6 A. Recent bypass assessments identified those customers with existing bypass facilities as well
7 as several customers that are at risk to bypass. As listed in the CONFIDENTIAL National
8 Fuel Exhibits EMS-1 and EMS-2.

9 To further exacerbate the previously described competitive conditions relative to local
10 production and interstate pipelines, National Fuel is uniquely situated in a geographic area
11 crisscrossed with privately-owned pipelines located within gas producing areas. This location
12 results in even more competitive pressures due to the relative ease with which local production
13 can be accessed through bypass connections, even when the gas supplies are not in the
14 immediate vicinity of customers. Examples include an extensive former interstate pipeline
15 owned gathering system purchased by RH energytrans LLC as well as a former petroleum
16 pipeline system, the Northern Pipeline (“Northern”), which was converted to transport natural
17 gas. Northern is owned and operated by Vineyard Oil & Gas and Eastern Resources. These
18 pipelines extend throughout significant portions of our service area, including locales where
19 several of our largest industrial customers reside.

20
21 **Q. How has National Fuel responded to these competitive bypass threats, both current and
22 potential?**

23 A. National Fuel responds to competitive situations for large incremental load opportunities that

1 are potential bypass threats by first trying to understand the competitive threat and the
2 associated economics. If the threat is determined to be legitimate, the value or cost of the
3 alternative is quantified. National Fuel then responds by offering an appropriate discount to
4 the existing transportation rate to retain the customer.

5
6 **Q. Has National Fuel experienced any competition from the electric industry?**

7 A. Yes. National Fuel experiences competition from electricity in several different market
8 segments and end-use applications. Competition in the commercial and public authority
9 segments is increasing in recent years. Electric closed loop, water source heat pump systems
10 are increasingly becoming the heating and cooling system of choice for new office buildings,
11 schools, and medical facilities. The efficiencies of these systems are high, with Coefficients
12 of Performance (“COP”) for heating in the range of 3.7 to 4.5. Heat pump COP is a measure
13 of the efficiency of a heat pump in the heating mode. Conventional electric resistance heating
14 is 100% efficient at the point of use, and natural gas heating systems have combustion
15 efficiencies in the range of 80 to 95% at the point of use. However, heat pumps do not convert
16 electric energy directly into heat. The electric compressor, or “pump”, is used only to transfer
17 the heat from a source (air, ground, or water) to its destination, the heated space. Therefore,
18 a heat pump with a COP of 4.0 transfers, or “pumps” four times more energy to the heating
19 space than the electric energy required to run the compressor. Properly sized ground source
20 heat pumps do not typically require supplemental heating systems. However, water source
21 (and air source) heat pumps usually require a supplemental heating system. In the case of the
22 growing emergence of closed loop water source heat pumps, natural gas simply provides the
23 supplemental energy for the very cold days in the winter when the heat pump system does not

1 have the capability to meet the building energy requirements. With these pumps National Fuel
2 would lose the heating load in the warmer shoulder months of the Fall and Spring.

3
4 **Q. How is National Fuel currently addressing electric competition?**

5 A. National Fuel has programs targeted towards educating both customers and key influencers
6 to encourage the efficient use of our system and to promote the benefits of natural gas. These
7 programs are designed to encourage customers to make natural gas the fuel of choice and to
8 encourage its use in the most efficient manner, thereby making National Fuel's services more
9 economically competitive over the long run. This result benefits the customers using these
10 programs and indirectly benefits all customers by retaining as much throughput on the system
11 as possible to control costs per unit. In addition to energy audits, National Fuel maintains key
12 influencer programs targeted at appliance dealers, heating/plumbing contractors, builders,
13 architects, and mechanical engineers to promote efficient gas technologies. These programs
14 exist because of the strong influence of these trade allies on the use of natural gas and natural
15 gas equipment by National Fuel's residential and commercial/industrial customers in both the
16 replacement/retrofit and new construction markets.

17 National Fuel has developed a broad umbrella trade ally program, "The Energy Partnership"
18 with the goal of building and maintaining preference for natural gas among key influencers,
19 and thereby among National Fuel's customers, to retain its existing sales/market share and
20 selectively pursue opportunities for increased sales. The programs offer cooperative
21 advertising to reinforce the benefits of natural gas (efficiency, economy and environmental).
22 The primary means by which National Fuel addresses electric competition in the
23 nonresidential marketplace is through direct interaction with architects, engineers and

1 customers in the planning and design phases to promote the use of natural gas equipment for
2 both traditional and innovative applications. Where beneficial to the project and
3 economically justified, internal and external technical assistance may be utilized to provide a
4 detailed comparative analysis to assist the customer in making an educated decision regarding
5 fuel choice. In addition, National Fuel distributes industry publications as well as publishing
6 its own technical fact sheets related to new or beneficial gas technologies highlighting key
7 energy efficiency and technology news.

8
9 **Q. Are there other competitive threats that affect National Fuel's ability to maintain or**
10 **grow natural gas sales?**

11 A. Yes. Like all employers in National Fuel's service territory, large-volume customers can be
12 sensitive to economic conditions in western Pennsylvania. As I noted above, our customers
13 compete with plants and facilities in other states, sometimes under the same ownership, and
14 if a competing state has lower business costs than western Pennsylvania, Energy Services'
15 role is to work with local, regional, and state economic development organizations to retain
16 (and attract) business. Sometimes those efforts are successful and sometimes they are not.

17
18 **Q. Please explain.**

19 A. We work with other departments in the Company, such as Government Affairs and Corporate
20 Communications, among others, to coordinate our efforts with economic development
21 officials to assist in producing an attractive offer to at-risk customers. Natural gas utility
22 services are often an important part of the overall economic development package that might
23 ultimately prevent the customer from leaving the state.

Q. What does National Fuel do to provide its customers with information on the efficient use of energy?

A. National Fuel uses multiple techniques to provide information regarding the effective and efficient use of natural gas. This information is provided in the form of bill stuffers, brochures, and is offered on our website. Additional information is provided to customers by National Fuel’s Energy Partnership Co-op advertising program with appliance dealers and builders.

Q. How does National Fuel inform commercial, industrial, and public authority customers of means for the efficient use of energy?

A. National Fuel provides technical information regarding the effective use of energy to its non-residential customers in a few ways. One example is Gas Technology, a magazine that is sent to select commercial, industrial, and public authority customers based on their potential to utilize the technologies featured in a particular issue. This publication is provided to our customers several times per year and features information on existing and new HVAC and process technologies.

Q. Does National Fuel provide information to commercial, industrial, and public authority customers in any forms other than these publications?

A. Yes. National Fuel’s Energy Services’ personnel offer an array of technical assistance programs. National Fuel has three account representatives in its Pennsylvania territory, assigned to cover approximately 220 of our large volume accounts greater than 12,000 Mcf/year. These customers operate in very competitive markets and have many choices for

1 their energy needs. The representatives are assigned specific geographic areas to cover, and
2 they assist our large commercial/industrial customers in assessing various gas technologies
3 that would make these customers more energy efficient. They work on a one-on-one basis
4 with these customers to collect energy usage data and utilize the services of our contracted
5 engineering staff to provide free technical and economic assessments of gas technologies that
6 best fit the customer's energy needs. For example, where applicable, National Fuel provides
7 operating cost analyses for HVAC and industrial process equipment to assist customers in
8 minimizing fuel costs and evaluating alternatives. In addition, where National Fuel conducts
9 an energy audit, further conservation related information and recommendations are provided.
10 National Fuel also provides information and advice on combustion technologies and industrial
11 process equipment selection, which also includes feasibility analyses in areas of distributed
12 generation, gas cooling and dehumidification.

13 Energy Services' personnel provide information on the various gas rates available to allow
14 National Fuel's customers to take full advantage of its rate options. This includes, for
15 example, information on its Transportation, Load Balancing, Business Development, Bypass
16 and Standby tariffs. In terms of electronic communications, National Fuel continues to
17 enhance its website to include information on efficiency and technology.

18 National Fuel has also actively participated in various local and regional energy conferences
19 and community-sponsored meetings, in conjunction with a variety of organizations such as
20 the Erie Chamber and Growth Partnership, Pittsburgh Region Clean Cities, Mercer County
21 Builders Association, Builders Association of NW PA, the Northwest Regional Office of the
22 Department of Environmental Protection, Clarion County Economic Development Council,
23 Jefferson County Development Council, Oil Region Alliance and the Dubois Area Chamber

1 of Commerce. The focus of these efforts has been to educate nonresidential customers on
2 energy efficiency and cost savings opportunities, environmental impacts, and rate options.

3
4
5 **IV. RESEARCH, DEVELOPMENT & DEMONSTRATION (RD&D)**

6 **Q. Does National Fuel engage in any programs to improve upon the performance and**
7 **availability of gas-consuming appliances and equipment options?**

8 A. Yes. National Fuel engages in research, development, and demonstration (“RD&D”) of gas-
9 consuming appliances and equipment.

10
11 **Q. What is the goal of National Fuel’s RD&D program?**

12 A. The goals of the RD&D program are to identify emerging natural gas technologies of benefit
13 to National Fuel and its customers, fund developments through co-funded gas industry RD&D
14 organizations and manufacturers, demonstrate appropriate technologies in our service
15 territory and disseminate information to customers who could benefit from the technologies.
16 For technology demonstration projects, National Fuel seeks to have the technologies located
17 at host sites with vested interests in the success of the technologies.

18 National Fuel does not internally conduct research and development. It does provide funding
19 for external RD&D initiatives in concert with other gas industry, manufacturing,
20 energy/environmental authorities, and other participants.

21 The primary purpose of the RD&D program is the identification, development, introduction
22 and demonstration of new technologies, equipment and processes which feature increased
23 efficiency and improved performance in the residential, commercial, and industrial end use

1 market segments, as well as in the National Fuel operations area. The main emphasis of the
2 RD&D program is on:

- 3 • Providing customers with a greater selection of energy-efficient, low emissions
4 gas technologies;
- 5 • Remaining competitive with other energy technologies to contribute to the
6 positive environmental attributes of natural gas;
- 7 • Reduction of fixed operating costs;
- 8 • Improved gas load factors for greater seasonal utilization of gas facilities;
- 9 • Increased safety and efficiency in delivering natural gas; and
- 10 • Increased customer benefits.

11
12 **Q. What types of programs does the RD&D Program support?**

13 A. National Fuel's RD&D program consists of the **Traditional RD&D Program** funded
14 through base rates and the **Delta Funds RD&D Program** which uses a separate rate
15 surcharge collected from Pennsylvania ratepayers.

16
17 **Q. Please describe the programs funded through the Traditional RD&D Program.**

18 A. The Traditional RD&D Program addresses technology segments for residential, commercial,
19 and industrial end-use markets, and for company operations technologies, focusing on
20 technologies nearing commercialization and conducts technology demonstration projects,
21 technology assessments, and technology transfer. Demonstration projects are initiated,
22 implemented, and managed by National Fuel personnel. Technologies demonstrated include
23 new and/or emerging natural gas equipment, or other technologies not in significant use in

1 our service territory.

2 The Traditional RD&D program is divided into the following 3 areas:

- 3 • **End Use** – This area consists of projects in the residential, commercial, and industrial
4 market segments featuring new and emerging technologies.
- 5 • **Operations** – This area consists of projects pertaining to National Fuel’s gas
6 infrastructure including reliability, productivity, safety, and the environment.
- 7 • **Other** – This area consists of funding set aside to cover technology assessment,
8 technology transfer and general administrative expenses of the RD&D program.

9
10 **Q. Describe the Pennsylvania Delta Fund’s RD&D Program.**

11 A. State regulatory commissions have established Delta Funds RD&D Programs to replace the
12 previous GRI assessments. Delta Funds are used to support the following programs:

- 13 • **Utilization Technology Development (“UTD”)** – The UTD is involved in the
14 research and development of natural gas utilization including residential and
15 commercial appliances, industrial process, distributed generation, and natural gas
16 vehicles. The program strives to meet critical demands by the United States for energy
17 by providing efficient, safe, economical, and environmentally acceptable uses of
18 natural gas to the benefit of the public.
- 19 • **Emerging Technology Program (“ETP”)** – National Fuel funding for this program
20 is included within UTD. ETP is a new initiative by Gas Technology Institute (“GTI”),
21 created in 2012, to address issues in better moving technologies from development to
22 commercialization. Despite many attractive technology developments after gas
23 industry RD&D restructuring, much of the former effective infrastructure and staffing

1 in moving those technologies to market no longer exist. ETP is an effort to re-establish
2 that necessary function.

3 • **Operations Technology Development (“OTD”)** - The OTD develops, tests, and
4 implements new technologies to provide solutions to a wide range of issues relating
5 to gas operations and its infrastructure. It is designed to provide new tools, equipment,
6 software, processes, or procedures that will enhance safety, increase operating
7 efficiency, reduce operating costs, and help maintain system reliability and integrity.
8 The scope of the program includes mid- to near-term developments.

9 • **Sustaining Membership Program (“SMP”)** – National Fuel funding for this program
10 is included within OTD. The SMP strives to develop new and innovative technology
11 concepts that will address current needs and will reduce the cost of transmission,
12 distribution, and environmental operations for member companies. The SMP
13 addresses mid- to longer-term developments.

14 • **Low-Carbon Resources Initiative (“LCRI”)** – National Fuel is funding an effort
15 lead by the Electric Power Research Institute (EPRI) and GTI to collaborate on
16 addressing the need to accelerate development and demonstration of low carbon
17 energy technologies.

18 • **North American Gas Heat Collaborative** – National Fuel is participating in a
19 collaborative to accelerate the commercialization and market acceptance of gas heat
20 pumps in North America. The goal of this collaboration is to enhance market share
21 of gas heat pump technologies and energy efficient gas technologies.

22 Once the minimum annual funding commitments are made, these utilization and operations
23 development entities provide portfolios of projects from which to voluntarily choose and

1 fund. Refer to the National Fuel Exhibit EMS-3 - 2021 Delta Fund Report, for more details.

2
3 **Q. How does National Fuel manage the RD&D Program?**

4 A. The Energy Services department is responsible for the overall administration of National
5 Fuel's RD&D program, managing the end-use demonstration projects of the Traditional
6 program, and managing the end-use RD&D activities within the Delta Funds RD&D Program.
7 The Mechanical department of National Fuel's Operations Division is responsible for
8 managing the Company's operations projects within the Traditional program.
9 The Energy Services department and the Mechanical department use existing department
10 personnel to manage RD&D projects, but occasionally use personnel on loan from other
11 departments as project managers, as needed. From time to time, National Fuel may also
12 assign personnel to an external project of GTI where some special interest and expertise exists
13 within the Company.

14
15 **Q. How are RD&D projects identified and selected for funding?**

16 A. Projects may originate from various internal and external sources and may consist of domestic
17 or international technologies. Once a potential project is identified, its potential benefits are
18 determined, as well as goal for the project. The impact of technologies can vary widely
19 depending upon differing regional needs. Before funds and other resources are committed,
20 approvals are received from senior management. Each approved project is planned to include
21 scope, budget, schedule, and goals. At project completion, the results are gathered, reported,
22 and filed. See National Fuel Exhibit EMS-4 for an example of an RD&D project request
23 form.

19
20
21
22
23

Q. What are some examples of RD&D projects in which National Fuel has participated?

A. Examples of projects include: advanced burner systems, distributed generation, combined heat and power (“CHP”) systems, advanced metal melting and sintering processes, foodservice equipment enhancements, gas engine drive- air compressors, manufacturing facility river water pumps, sewage treatment plant pumps, ice rink compressor and dehumidification, fuel cells, instantaneous water heaters, gas booster water heater; patio heaters, high-efficiency space heaters for retrofits, small-scale LNG Production, Hybrid HVAC (furnaces & electric air source heat pump) demonstrations, natural gas vehicle demonstrations, and hydrogen enriched natural gas demonstration and microturbines.

Q. Do you see any potential impediments to the overall natural gas and energy RD&D program?

A. National Fuel believes that current programs available through local and national organizations will adequately address future gas equipment development needs as technology offerings improve. These investments, in conjunction with a concerted effort to educate and assist customers to utilize energy in the most efficient manner, will maximize the benefits of these funds to all ratepayers.

Q. What level of RD&D expense do you project for the future test year?

A. National Fuel expects that the future test year RD&D expense will be \$670,103, with \$143,603 of this amount falling under the traditional RD&D and the \$526,500 under the Delta Fund. National Fuel is not asking for any changes to this allowance. The current Delta Fund

1 account balance is \$843,392.05 and the current Delta Fund annual collection is \$526,500.
2 Currently we use more than 80% of the annual funding on UTD, OTD, ETP and LCRI. This
3 leaves less than \$100,000 for other RD&D projects each year. Recently, we began to identify
4 some new emerging RD&D projects such as ZNE homes, hybrid heating systems, RNG,
5 hydrogen blending and CHP opportunities. The traditional RD&D annual allowance and the
6 remaining Delta Fund balance and annual allowance should be adequate to generate more
7 demonstrations within the before mentioned areas of interest.

8
9 **Q. Explain National Fuel's efforts concerning development of a reliable customer database.**

10 A. National Fuel's ongoing database development of customer end-use applications has focused
11 on the larger customers and those that elect to transport third party supplied natural gas.

12 The Energy Market Monitor ("EMM") customer database was designed to provide National
13 Fuel with a detailed monitoring system that is maintained by the Rates and Regulatory Affairs
14 department in conjunction with Energy Services and other departments. The EMM system
15 provides substantial information on the large-volume accounts. Data such as equipment, dual
16 fuel capabilities, base load, firm consumption, contact names and meter/regulator information
17 are stored to provide both the customer and National Fuel with detailed reports. Customer
18 data can also be summarized across various data fields to provide better management
19 information. National Fuel can report volumes on a sales, transportation, and total throughput
20 basis, or on an individual rate schedule basis. In essence, our goal is to gain a better
21 understanding of our customers so that we may better serve them. Data integrity for the EMM
22 system is maintained through ongoing system integration and maintenance. Lastly, National
23 Fuel has developed a variety of different systems upon which transportation service is based

1 and through which customers and third-party suppliers can access account information and
2 actively, efficiently, and effectively administer their natural gas supply deliveries and monitor
3 usage.

4
5 **Q. What is National Fuel doing to better understand its markets and the associated risks**
6 **and opportunities?**

7 A. National Fuel conducts ongoing residential market surveys to monitor market shares and
8 energy preference levels, understand customer energy perceptions and decision-making
9 processes, and collect customer demographic/building characteristics data. The latest survey
10 was conducted in 2021 and is used in quantifying market risk and opportunity and directing
11 its marketing/advertising message to the proper decision maker. Additionally, a natural gas
12 vehicle (“NGV”) market assessment was conducted in 2017- 2018 comprising the following:
13 an NGV market overview and outlook, potential compressed natural gas (“CNG”) load
14 growth based on technical and economic feasibility, development of a fleet-oriented database,
15 and identification of best target market and potential CNG conversions within the service
16 territory. In 2019, to gain a better understanding of the energy performance and economic
17 impact of space conditioning options available for the hotel market, National Fuel
18 commissioned a study from an energy engineer. The purpose of the study was to determine
19 the 25-year life cycle costs of the most common HVAC systems used for hotels.

20
21 **V. RESIDENTIAL ENERGY EFFICIENCY PILOT (EE PILOT)**

22 **Q. Please describe the proposed EE Pilot and the program’s offering to customers.**

23 A. National Fuel proposes to implement one energy efficiency program over the three-year

1 period starting August of 2023. The proposed EE Pilot is an equipment replacement program,
2 modeled after a Vermont Gas Systems program, which was cited by the American Council
3 for an Energy-Efficient Economy, as one of the nation’s best natural gas energy efficiency
4 programs. National Fuel’s program would offer equipment replacement rebate incentives for
5 single-family and multi-family residential dwellings, to encourage them to install high
6 efficiency space heating appliances such as furnaces and boilers. These types of appliances
7 are by far the largest users of natural gas in residential buildings and are therefore most likely
8 to show the largest savings to customers when they upgrade their appliances. National Fuel
9 sets minimum efficiency levels for each appliance type based on federal Energy Star
10 guidelines. The goal of the EE Pilot is to encourage the installation of high efficiency
11 appliances or thermostats by customers.

12
13 **Q. What are the EE Pilot’s proposed minimum efficiencies and rebate dollar amounts?**

14 A. The target market for the EE Pilot is all residential customers within National Fuel’s service
15 territory. Rebates are available for existing and new single-family dwellings, multi-family
16 dwellings, condominiums, and mobile dwellings who are replacing space heating equipment.
17 These replacements typically will occur when equipment has failed and can no longer be
18 repaired, reached the end of its useful life, or when the fuel source is being switched to natural
19 gas from another fuel, such as oil, propane, or electricity. The currently effective minimum
20 efficiencies are measured in annual fuel utilization efficiency (“AFUE”). The rebate dollar
21 amounts were determined by incenting 50% of the incremental cost to install the higher
22 efficiency appliance. The rebate amounts are as follows:

- Hot Air Furnace (80% to 95% AFUE); \$600

- Hot Air Furnace (92% to 95% AFUE); \$400
- Hot Water Boiler – 95% AFUE; \$1,000
- Wi-Fi Thermostat – N/A; \$85

These incentives will help offset a portion of the incremental cost of purchasing high efficiency equipment in place of standard efficiency equipment. With our rebate alone, the simple payback on the customer’s portion of the incremental cost will vary with their usage and equipment selected but will usually be less than ten years with most measures paying back within four years.

Q. How will the EE Pilot benefit the Company’s residential customers?

A. National Fuel is proposing an investment that will return an annual present value of total resource cost (“TRC”) net benefits of \$3.04 million, in 2024 dollars, with a TRC benefit-cost ratio (“B/C Ratio”) of 2.37 (see table below). Additionally, the EE Pilot will provide significant energy savings and economic benefits for customers while increasing the comfort of their home. The reduced spending on energy will allow our customers more disposable income to be utilized in other parts of the economy. The reduced energy costs are captured in the Participant column of the following table, which demonstrates a B/C Ratio of 2.35 from the participant’s perspective.

Benefits, Costs, Net Benefits and B/C ratios					
	Societal	Utility	RIM	Participant	
NPV Benefits	\$5,247,568	\$5,247,568	\$5,247,568	\$4,611,969	
NPV Costs	\$2,211,699	\$1,230,849	\$6,604,034	\$1,961,699	
NPV Net Benefits	\$3,035,869	\$4,016,718	-\$1,356,466	\$2,650,271	
B/C Ratio	2.37	4.26	0.79	2.35	
\$/therm	0.77	0.43	2.31	0.96

19
20
21
22

Q. What cost-effectiveness analysis methodology was used to calculate these results?

A. The cost-effectiveness results reported in the table above followed standard industry practices for utilizing the TRC test for cost effectiveness. The TRC test methodology used is similar to that used by other natural gas utility companies serving Pennsylvania that offer energy efficiency programs, and for Pennsylvania electric utilities that are required by statute to offer energy efficiency programs. To calculate benefits, projected natural gas savings are multiplied by avoided costs, and this stream of future values is discounted to the present. The cost side of the test consists of the present value of all incremental costs incurred by participants, including net operation and maintenance costs, and the non-incentive costs incurred by the portfolio administrator. If the benefits outweigh the costs (the benefit-cost ratio is above one), then the total cost of energy services for an average customer within the territory will fall and the portfolio is considered cost effective. This analysis used a discount rate of 5%. This analysis results in a B/C Ratio above 1.0.

Q. How much natural gas will National Fuel’s residential customers save who participate in the EE Pilot?

The program is projected to save 224,269 therms annually of natural gas for the first ten years and 190,447 therms annually for the next ten years. This totals 4,147,160 therms over the lifetime of the measures installed. The following table shows the incremental and lifetime natural gas savings.

1

<u>Year</u>	<u>Therms Savings</u>
2024	224,269
2025	224,269
2026	224,269
2027	224,269
2028	224,269
2029	224,269
2030	224,269
2031	224,269
2032	224,269
2033	224,269
2034	190,447
2035	190,447
2036	190,447
2037	190,447
2038	190,447
2039	190,447
2040	190,447
2041	190,447
2042	190,447
2043	<u>190,447</u>
TOTAL	4,147,160

2

3 **Q. How much will it cost to achieve these results?**

4 A. The total portfolio is projected to cost \$1.23 million annually or \$3.69 million for the three
5 years. Refer to table below for the proposed budget summary.

6

1

Budget	2023	2024	2025
Rebates	\$981,012	\$981,012	\$981,012
Administration	\$100,000	\$100,000	\$100,000
Evaluation, Measurement & Verification	\$100,000	\$100,000	\$100,000
Outreach	<u>\$50,000</u>	<u>\$50,000</u>	<u>\$50,000</u>
Total	\$1,231,012	\$1,231,012	\$1,231,012

2

3 **Q. Does National Fuel have any estimate of the results of the residential EE Pilot, with**
4 **respect to number of customer participants and rebate amounts?**

5 A. Yes. National Fuel has developed the following estimates for customer participation and
6 rebate costs for each year of the program.

	<u># of Participants</u>	<u>Total Rebate Costs</u>
Space Heating	1,572	\$937,453
Thermostats	<u>512</u>	<u>\$43,559</u>
Total	2,084	\$981,012

11

12 Please refer to National Fuel Exhibit EMS-5 for more details on these estimates.

13

1 **Q. How were these results developed?**

2 A. These results were developed by estimating the following information, as shown in National
3 Fuel Exhibit EMS-5.

- 4 • The percentage of existing residential customers using gas for space heating
5 and water heating.
- 6 • The percentage of existing customers with various types of space heating and
7 water heating equipment such as furnaces, boilers, storage tank heaters and
8 tankless heaters.
- 9 • The percentage of existing customers in each equipment type that currently
10 have medium or low efficiency equipment.
- 11 • The percentage of existing customers who will likely take advantage of the
12 proposed rebate and upgrade to a higher efficiency piece of equipment than
13 they currently have now.

14 The first 3 estimates above were done using knowledge gathered from the 2021 Residential
15 Market Survey referenced earlier. The last estimate above was developed based on National
16 Fuel's experience with the New York conservation incentive program. Using those
17 experiences with the early stages of a pilot program, we anticipate participation levels of 0.5%
18 - 1.0% of our eligible customer base annually. Once our pilot program matures, and
19 customers and contractors are very aware of it, the annual upgrades may increase to around
20 3.5% to 4.0%. Based on this, we used first year estimates of annual upgrades between 0.5%
21 and 1.5%, depending on the equipment type and efficiency level.

22

23 **Q. How are low-income customers addressed by the EE Pilot?**

1 A. Low-income customers are allowed to participate in the EE Pilot, which is open to all
2 residential customers. Although this program does not specifically target this market
3 segment, services offered by the Company for assisting low-income customers with their
4 energy bills, such as the Low Income Usage Reduction Program will still be available.

5
6 **Q. How will National Fuel handle the administration of the EE Pilot?**

7 A. National Fuel envisions utilizing an outside third-party contractor to handle the day-to-day
8 administration of the program. This -contractor will report to a National Fuel employee who
9 will act as the overall program manager. The contractor will set up a toll-free telephone call
10 center to handle the entire rebate application process.

11
12 **Q. How will the rebate application process be handled?**

13 A. National Fuel envisions the following procedures to occur when a customer applies for a
14 rebate:

15 Questions / Confirmation of Eligibility Requirement

- 16 • The customer calls National Fuel's third-party program administrator (“PA”) with any
17 questions they may have and confirms whether the equipment they plan on installing
18 meets the program's eligibility requirement for a rebate.

19 Application for Rebate

- 20 • The customer calls PA toll-free number and requests an application form be mailed to
21 them, e-mailed to them, downloads a copy of the form from National Fuel's web site
22 or completes an electronic version on the website.
- 23 • The customer completes the application form, attaches copy of their contractor's

1 proposal for rebate-eligible heating or water heating equipment and mails the
2 paperwork to the PA.

3 Equipment Installation

- 4 • The customer has heating, water heating equipment and/or wi-fi thermostats installed
5 by licensed heating or plumbing contractor.

6 Processing of Rebate Check

- 7 • Once eligible equipment installation has been verified by the PA, the PA enters the
8 customer into the list for processing and mailing of rebate checks.
- 9 • Before cutting rebate checks, PA works with National Fuel to check list against any
10 customers with unpaid bills or outstanding payments past due. These should be rare,
11 but if found, a hold will be put on the rebate check and National Fuel will determine
12 the appropriate action (e.g. credit on customer bill, payment arrangement, etc.)
- 13 • National Fuel will then reimburse PA for all rebate checks cut monthly, based on
14 records submitted to National Fuel from PA.

15 Inspection / Quality Control of Equipment Installations

- 16 • PA will not perform a 100% on-site inspection of all heating and water heating
17 equipment eligible for a rebate that were installed due to large number of customers
18 and geographic size of National Fuel's service territory.
- 19 • Instead, PA will perform a monthly random sampling inspection of installations.
20 These inspections will cover all contractors involved in the program and cover all
21 geographic locations.

22 Customer Satisfaction / Program Evaluation

- 23 • A short general satisfaction survey will be mailed to each customer receiving a rebate,

1 along with their rebate check. This survey will likely be a 3" x 5" postcard size with
2 postage return paid.

- 3 • A longer telephone survey (5 - 10 minutes) will be done by the PA on a random basis,
4 to a sample of the rebate population, to elicit further insight into the program.

5
6 **Q. How will National Fuel handle the marketing and customer outreach for the EE Pilot?**

7 A. The communication program would inform customers of the importance to conserve energy
8 and how to implement conservation strategies to reduce bills and energy use by using our
9 existing "Fueling Tomorrow Today" website to promote energy efficiency program and
10 other energy savings tips. Additionally, the Energy Services team will continue to partner
11 with local businesses and trade organizations (contractors, plumbers, HVAC service
12 providers, equipment suppliers, distributors, community-based organizations, etc.) to
13 familiarize them with program opportunities, energy efficiency practices and
14 implementation requirements. Due to using internal resources, we anticipate minimal
15 budget requirements. We anticipate 5% of the rebate budget (\$~1.0M), totaling \$50,000 for
16 the communication budget annually.

17
18 **Q. Does National Fuel have any estimates on the administrative costs to implement this
19 program using an outside contractor?**

20 A. Yes. National Fuel has an estimated administration cost of \$8,300 per month. This would
21 include handling customer calls, application requests and associated paperwork, issuing
22 rebate checks, coordinating random inspections, assessing program performance, and
23 generating program reports. To come up with total program administrative costs, we used

1 our experience with the costs associated with running our National Fuel - NY conservation
2 incentive program. This monthly cost includes a fixed amount of rebates per month. Based
3 on our estimate of 2,084 rebates and the monthly allocation of rebates, we estimate the
4 monthly cost will cover the total administration costs. Therefore, to get the total
5 administrative costs, we multiplied the total monthly cost (\$8,300) by the number of months
6 in a year (12), which resulted in \$99,600 annually. This is approximately 10% of the total
7 estimated rebate amount of \$981,012.

8
9 **Q. What environmental benefits are projected to occur from the EE Pilot?**

10 A. The EE Pilot is projected reduce emission of approximately 1,189 metric tons of CO2
11 annually or the cumulative effect of 3,566 metric tons of CO2 over the three-year pilot.

12
13 **Q. Does National Fuel plan to report on the EE Pilot results?**

14 A. Yes. National Fuel will submit an annual report on the EE Pilot to the Commission each
15 March, three months after the close of the program year. This report will provide information
16 on activity for the previous year and progress towards the three-year goals, including, but not
17 limited to:

- 18 • First year and lifetime savings;
- 19 • Participation;
- 20 • Spending;
- 21 • Cost effectiveness;
- 22 • Highlights of portfolio and program activity; and
- 23 • Updates to program delivery and design.

Q. Does National Fuel plan to evaluate, measure & verify the results?

A. Yes. National Fuel will likely hire an independent evaluator to examine the program objectives and implementation to determine overall program performance, any areas of improvement and recommendations for enhancement. These reviews will be crucial in our ability to manage this pilot effectively. The pilot will require the flexibility to adjust incentive changes based on market conditions. Additionally, the ability to use unspent funds from future years, will help to address higher demand and provide continuity for customers, contractors, and suppliers. We anticipate 10% of the rebate budget (\$~1.0M), totaling \$100,000 for the evaluation, measurement, and verification budget.

Q. How does the proposed EE Pilot align with the Statements of Policy as outlined by the Commission in the alternative rate making Docket No. M-2015-2518883?

A. Each rate consideration identified in the Statement of Policy is listed below along with the relevant effect the proposed EE Pilot Program has on each rate consideration:

1. Please explain how the ratemaking mechanism and rate design align revenues with cost causation principles as to both fixed and variable costs.
The Company is proposing to recover the cost of the EE Pilot Program from residential customers, which is the rate class that will directly benefit from the program.
2. Please explain how the proposed EE program impacts the fixed utility's capacity utilization.
National Fuel's EE Pilot is intended to reduce the average usage per account over the life of the program. This is anticipated to have an impact on capacity utilization.
3. Please explain whether the ratemaking mechanism and rate design reflect the level of demand associated with the customer's anticipated consumption levels.

1 The calculation of the Rider D rate will be based on total forecasted residential
2 usage.

3 4. How the EE Program limits or eliminates interclass and intraclass cost shifting.

4 The EE Pilot does not have interclass and intraclass cost shifting because the costs
5 and benefits are confined to the residential class.

6 5. Please explain how the EE Program limits or eliminates disincentives for the
7 promotion of energy efficiency.

8 The proposed EE Pilot actively promotes energy efficiency by providing incentives
9 for customers to purchase and install equipment with higher Annual Fuel Utilization
10 Efficiency (AFUE) ratings.

11 6. Please explain how the EE Program impacts customer incentives to employ
12 efficiency measures and distributed energy resources.

13 Customers will have an incentive to employ energy efficiency measures and
14 distributed energy resources because a reduction in volumetric usage reduces their
15 overall bill.

16 7. Please explain how the EE Program impacts low-income customers and support
17 consumer assistance programs.

18 Customers served under the Company's Low Income Residential Assistance Service
19 ("LIRAS") Rate Schedule, the Company's current Customer Assistance Program
20 ("CAP") receive bill discounts determined by household size and income level. The
21 Company also maintains a Low-Income Usage Reduction Program (LIURP)
22 weatherization program for low-income customers. Measures are installed to reduce
23 energy usage and customer bills. The EE Pilot supports these programs by
24 providing additional opportunities for low-income customers to reduce their usage
25 and their overall bill.

26 8. Please explain how the EE Program impacts customer rate stability principles.

27 Customers that use the program will see more stable bills from lower usage and
28 exposure to gas cost fluctuations.

29 9. Please explain how weather impacts utility revenue under the EE Program.

30 The proposed EE Pilot is intended to reduce the average volumetric usage per
31 customer. It does reduce the amount of weather-related variation in both customer
32 bills and associated utility distribution revenues. To the extent that weather is
33 warmer or colder than normal, weather will impact the amount of revenue recovered
34 through the proposed Rider D.

35 10. Please explain how the EE Program impacts the frequency of rate case filings and
36 affects regulatory lag.

37 The EE Pilot is not anticipated to (nor is intended to) impact the frequency of rate
38 cases or have an impact on regulatory lag.

39 11. Please explain if the EE Program interacts with revenue sources, such as Section

1 1307(f) automatic adjustment surcharges, 66 Pa.C.S. § 1307 (relating to sliding
2 scale of rates; adjustments), riders such as 66 Pa.C.S. § 2804(9) (relating to
3 standards for restructuring of electric industry) or system improvement charges, 66
4 Pa.C.S. § 1353 (relating to distribution system improvement charge).

5 The Company's proposed EE Pilot does not interact with revenue sources such as
6 Section 1307(f) automatic adjustment surcharges, 66 Pa.C.S. § 1307 (relating to
7 sliding scale of rates; adjustments), riders such as 66 Pa.C.S. § 2804(9) (relating to
8 standards for restructuring of electric industry) or system improvement charges, 66
9 Pa.C.S. § 1353 (relating to distribution system improvement charge).

10 *12. Please explain whether the EE Program includes appropriate consumer protections.*

11 As noted in Rider D, a reconciliation will be completed at the end of the 3-year pilot.

12 *13. Please explain whether the EE Program is understandable to customers.*

13 See response to question above regarding the marketing and customer outreach for
14 the pilot.

15 *14. Please explain how the EE Program will support improvements in utility reliability.*

16 The EE Pilot will lead to more efficient usage, which will provide lower peak
17 requirements, reducing risk on system delivery.
18

19 **VI. LOW TO MODERATE INCOME NON-CUSTOMER CONVERSION**
20 **DEMONSTRATION PROJECT (LMI DEMONSTRATION)**

21
22 **Q. What are the challenges for a Low to Moderate Income (LMI) residential non-customer**
23 **to convert their residence to natural gas in the Company's service territory?**

24 A. The main challenges that the prospective LMI customer faces in receiving gas service are
25 paying for the upfront costs necessary for expansion of National Fuel's gas system and
26 customer equipment/appliance conversion costs.
27

28 **Q. Can you expand upon the upfront costs necessary for connecting to the gas system?**

29 A. Reaching these prospective LMI customers often requires significant capital investments to
30 extend the National Fuel service system into outlying areas. In cases where contributions in

1 aid of construction (“CIAC”) are necessary to offset the cost of mainline extensions, these
2 additional costs can be prohibitive. CIACs can place a financial burden on customers looking
3 to convert and add an additional layer of complexity to their conversion decision. For
4 residential customers, the amount of CIAC (collected in a lump sum or through a monthly
5 surcharge) normally depends on the length of main and service line required to connect the
6 customer to the system, as well as the number of customers looking to connect to the proposed
7 main extension. If there are enough customers to “cover” the main extension through facilities
8 entitlements, there will be no CIAC. It is difficult to coordinate conversion commitments,
9 and if customer interest changes over time, the CIAC amount changes. This leads to the
10 “death spiral” of customers continually dropping out, which can prohibit completion of the
11 enhancement project.

12
13 **Q. Can you expand upon the prospective LMI customer equipment conversion costs?**

14 A. The upfront costs of installing natural gas fired equipment can also discourage LMI customers
15 from converting. Even in cases where the savings realized from the significantly lower cost
16 of fuel results in a relatively short payback period, customers are often unwilling to make the
17 initial upfront payment to convert to natural gas. The cost to purchase and install natural gas
18 heating, hot water and other appliances can be substantial. For fuel oil customers, there is the
19 added expense and inconvenience of removing the oil tank, following environmental
20 regulations, and having to install gas piping in the home. Electric resistance heating
21 customers may need a complete forced air or hydronic heating system installed, at
22 considerable expense, in addition to house gas piping. In addition, there is the up-front or
23 monthly surcharge costs associated with installing new gas main for customers beyond the

1 existing National Fuel system. Conservative estimated paybacks, for equipment replacement
2 costs only, range from 2.7 to 7.5 years, depending on fuel type.

3
4 **Q. Does the Company propose a potential LMI Demonstration Project?**

5 A. Yes. The project location is on Thornapple Road in Crawford County, see National Fuel
6 Exhibit EMS-6. The project consists of converting 62 prospective LMI customers to natural
7 gas. We determined that the 62 homeowners would be required to each pay \$1,659.06 to offset
8 the internal cost of the mainline extension and connection plus the cost of natural gas fired
9 equipment and appliances. Considering this census area is comprised of low to moderate
10 income households, it is unlikely the homeowners will be able to afford the full cost of
11 conversion. Even then, we anticipate that only 50% or 31 of the LMI households will convert.
12 Therefore, we propose in this LMI Demonstration project to cover 100% of the Company's
13 infrastructure costs, which are estimated to be \$4,769.32 per customer, resulting in a total
14 projected cost of \$147,849.

15
16 **Q. How would the LMI Demonstration Project help low to moderate income homeowners?**

17 A. As mentioned above, the upfront costs of installing natural gas fired equipment can also
18 discourage customers from converting. The LMI Demonstration can help alleviate the cost
19 of connecting to the natural gas network. Although the LMI Demonstration does not
20 eliminate all the conversion cost, it can substantially lessen the burden on the homeowner.
21 The net economic benefit from this conversion investment will reduce overall energy bills,
22 allowing more household disposable income. For example, a home using propane or heating
23 oil will likely save about \$2,000 annually by converting to natural gas. This assumes a home

1 using 100 Mcf per year. The Mcf cost is about \$13.61, and the propane or heating oil cost is
2 about \$36.00, in equivalent Btu values. This results in the \$2,000 annual savings.

3
4 **Q. Would the LMI Demonstration Project help lower emissions?**

5 A. Yes. Using the Thornapple potential pilot site as example, if 31 or 50% of potential
6 homeowners using 100 Mcf per year of natural gas convert from heating oil, the CO₂ savings
7 annually would be 156,426 pounds. If the same 31 or 50% of potential homeowners using
8 100 Mcf per year of natural gas convert from propane, the CO₂ savings annually would be
9 83,551 pounds.

10
11 **Q. What is the proposed budget required to start the LMI Demonstration Project?**

12 A. The proposed budget is approximately \$125,000 per year for a three-year pilot, totaling
13 \$375,000, to fund one or more LMI Demonstration projects (including the Thornapple project
14 identified above). The \$125,000 annual budget is included as operations and maintenance
15 (“O&M”) expense in the Company’s fully projected future test year (“FPFTY”) and will be
16 recovered in base rates. Amounts funded by ratepayers will be used to offset project costs.
17 The Company will track revenues and pilot costs and provide a reconciliation at the
18 conclusion of the three-year pilot.

19
20 **Q. Does this conclude your direct testimony?**

21 A. Yes, it does at this time.

Re: National Fuel Gas Distribution Corporation
Delta Fund for Research and Development Projects Report

Dear Secretary Chiavetta;

Pursuant to R-00061493 Settlement paragraph 18 A.3 "Distribution will file with the Commission and serve upon other Parties on or before December 31 an annual report for the preceding twelve month period ended September 30, setting forth revenues for the Delta Fund for research and development projects and expenditures for such projects. In addition, Distribution will describe in the annual report projects that have been funded". The enclosed report is submitted under this settlement agreement.

Very truly yours,

Robert D. Eck
General Manager
Energy Services Department

Encl.

Cc: Office of Special Assistants (E-Mail)
Office of Consumer Advocate (E-Mail)
Office of Small Business Advocate (E-Mail)

I. INTRODUCTION/BACKGROUND

The provisions of R-00061493 Settlement paragraph 18 A.3 were adopted on November 30, 2006 and effective January 1, 2007. Paragraph 18 A.3 states:

“3. The Joint Petitioners agree to \$526,466 to fund the Delta research and development program pursuant to the Statement of Scott E. Swartzfager No. 14. The deferral treatment and review process outlined in R-00049656 will continue. The company will not expend these dollars on additional customer outreach for enhanced energy efficiency.

Distribution will be permitted to record a regulatory asset or liability for differences between the annual rate allowance and annual expenditures. However, Distribution will not be permitted to retroactively recover in a future proceeding any expenditures in excess of the annual rate allowance and any deferred balance from the previous year’s Delta funding. Distribution will provide for review of research projects as described in its testimony. In order to implement this Settlement, the Joint Petitioners request that the Commission’s Final Order in this proceeding include the following language to allow Distribution to qualify for deferred accounting under SFAS 71:

“National Fuel Gas Distribution Corporation’s accounting policies conform to the Statement of Financial Accounting Standards No. 71 ‘Accounting for the Effect of Certain Type of Regulations’ which are in accordance with the accounting requirements and ratemaking practices of regulatory authorities. The application of these accounting policies allows the Company to defer expenses and income on the balance sheet as regulatory assets and liabilities when it is probable that those expenses and income will be allowed in the rate-setting process in a period different from the period in which they would have been reflected in the income statement by an unregulated Company.

“Because research and development projects often require a commitment over multiple years and because the expenditures for such projects may not match on an annual basis revenues for funding of research and development projects, deferred accounting is appropriate and is approved. The regulatory deferral treatment sought for the Research and Development expenditures and rate relief requested in the case are in accordance with SFAS No. 71.

“The Company will manage the costs of the Research and Development expenditures to match revenues deferred pursuant to this Order to eliminate any differences between deferred costs and deferred revenues at the end of a five-year period commencing on the day after the R-00049656 Order was entered.”

Distribution will file with the Commission and serve upon other Parties on or before December 31 an annual report for the preceding twelve month period ended September 30, setting

forth revenues for the Delta Fund for research and development projects and expenditures for such projects. In addition, Distribution will describe in the annual report projects that have been funded.”

The provisions of R-00049656 Settlement paragraph 44 were adopted on March 23, 2005 and effective April 15, 2005. Paragraph 44 states:

"44. Distribution's proposal to fund the Delta research and development program pursuant to the Supplemental Statement of Ruth Friedrich-Alf No. 102 S2 is approved. Increased rates in this proceeding provide for recovery of \$526,466 in Delta research funds. Distribution will be permitted to record a regulatory asset or liability for differences between the annual rate allowance and annual expenditures. However, Distribution will not be permitted to retroactively recover in a future proceeding any expenditures in excess of the annual rate allowance and any deferred balance from the previous year's Delta funding. Distribution will provide for review of research projects as described in its testimony. In order to implement this agreement, the Parties request that the Commission's Final Order in this proceeding include the following language to allow Distribution to qualify for deferred accounting under SFAS 71:

'National Fuel Gas Distribution Corporation's accounting policies conform to the Statement of Financial Accounting Standards No. 71 'Accounting for the Effect of Certain Type of Regulations' which are in accordance with the accounting requirements and ratemaking practices of regulatory authorities. The application of these accounting policies allows the Company to defer expenses and income on the balance sheet as regulatory assets and liabilities when it is probable that those expenses and income will be allowed in the rate-setting process in a period different from the period in which they would have been reflected in the income statement by an unregulated Company.

'Because research and development projects often require a commitment over multiple years and because the expenditures for such projects may not match on an annual basis revenues for funding of research and development projects, deferred accounting is appropriate and is approved. The regulatory deferral treatment sought for the Research and Development expenditures and rate relief requested in the case are in accordance with SFAS No. 71.

'The Company will manage the costs of the Research and Development expenditures to match revenues deferred pursuant to this Order to eliminate any differences between deferred costs and deferred revenues at the end of a five-year period commencing on the day after this Order is entered.'

Distribution will file with the Commission and serve upon other Parties on or before December 31 an annual report for the preceding twelve month period ended September 30, setting forth

revenues for the Delta Fund for research and development projects and expenditures for such projects. In addition, Distribution will describe in the annual report projects that have been funded."

As presented in R-00049656 Statement No. 102 (page 15);

"On an annual basis coming off of September 30, a reconciliation of revenues and expenditures with a description of projects funded will be on file on or before December 31 with the Office of Trial Staff, Office of Consumer Advocate and the office of Small Business Advocate. At the fifth reconciliation, Distribution will file a five year report."

As presented in R-00049656 Statement No. 102 S2 (page 7)

"Annual revenues will be deferred to offset the costs of the Research and Development expenditures (expenses) to both the Gas Technology Institute ("GTI") fund and local projects.

The Company will manage the cost of the Research and Development expenditures to match revenues deferred pursuant to this Order to eliminate any differences between deferred costs and deferred revenues at the end of a five-year period commencing on the day after this Order is entered."

It is under these guidelines and agreements that Distribution files the following report for the period ended September 30, 2021.

National Fuel Gas Distribution Corporation
Pennsylvania Division

**II. Annual Filing of Delta Fund Revenues and Expenditures
For the period ended September 30, 2021**

Year Ended	Annual		Cumulative		Balance
	Expenditures	Revenues	Expenditures	Revenues	
Sept. 2005	\$92,300	\$113,927	\$92,300	\$113,927	(\$21,627)
Sept. 2006	\$376,800	\$526,466	\$469,100	\$640,393	(\$171,293)
Sept. 2007	\$596,800	\$526,466	\$1,065,900	\$1,166,859	(\$100,959)
Sept. 2008	\$526,493	\$526,466	\$1,592,393	\$1,693,325	(\$100,932)
Sept. 2009	\$376,368	\$526,466	\$1,968,761	\$2,219,791	(\$251,030)
Sept. 2010	\$455,911	\$526,466	\$2,424,672	\$2,746,257	(\$321,585)
Sept. 2011	\$721,800	\$526,466	\$3,146,472	\$3,272,723	(\$126,251)
Sept. 2012	\$280,300	\$526,466	\$3,426,772	\$3,799,189	(\$372,417)
Sept. 2013	\$626,800	\$526,466	\$4,053,572	\$4,325,655	(\$272,083)
Sept. 2014	\$278,891	\$526,466	\$4,332,463	\$4,852,121	(\$519,658)
Sept. 2015	\$276,800	\$526,466	\$4,609,263	\$5,378,587	(\$769,325)
Sept. 2016	\$458,404	\$526,466	\$5,067,667	\$5,905,053	(\$837,386)
Sept. 2017	\$500,530	\$526,466	\$5,568,197	\$6,431,519	(\$863,322)
Sept. 2018	\$362,547	\$526,466	\$5,930,744	\$6,957,985	(\$1,027,241)
Sept. 2019	\$445,438	\$526,466	\$6,376,182	\$7,484,451	(\$1,108,269)
Sept. 2020	\$452,883	\$526,466	\$6,829,065	\$8,010,917	(\$1,181,852)
Sept. 2021	\$468,422	\$526,466	\$7,297,487	\$8,537,383	(\$1,239,896)

Note 1: Rates were effective April 15, 2005 therefore the report ended September 30, 2005 does not represent a 12 month period of revenue collection.

III. DESCRIPTION OF ACTUAL EXPENDITURES - PERIOD ENDED SEPTEMBER 2021

A. GTI Utilization Technology Development Program

\$129,500 was submitted to Utilization Technology Development, NFP (UTD) for the April 1, 2021 through March 31, 2022 dues. \$116,932 has been allocated to specific projects as listed below.

UTD Payments, Fees, Credits, Carryover

Payments to UTD	129,500.00
Administration Fees	-12,950.00
Carryover of Unallocated Funds from Prior Year	9,148.80
Funds Available for Allocation	125,698.80

Allocations to Projects:

Large Commercial and Industrial Customers

2.14.O.3 Gas Quality Sensor Validation - Phase 3	-1,887.00
2.17.A.3 Water Recovery From Humid Exhaust Gas Field Demonstration – Phase 3	-335.22

2.20.A Low Emission Efficient Burner for Ovens and Dryers - Field Demonstration	-2,220.00
2.20.B Sub-Dew Point Cooling Technology	-2,960.00
2.20.C High Efficiency Low Emission Commercial Baking Oven Field Demonstration	-1,110.00
2.20.E Energy Source Options for Industrial Users	-1,059.68
2.20.E.2 Energy Source Options for Industrial Users - Phase 2	-3,700.00
2.21.A High Hydrogen Burner for Commercial and Industrial Applications	-2,590.00
2.21.B Energy Recovery from Brewing/Distilling Operations: Field Demo	-888.00
2.21.C Zero Emissions Processes with Carbon Recovery	-2,590.00
2.21.D High Efficiency Crop Drying Process	-1,517.00

Food Preparation and Service Customers

1.14.A.6 Next Generation of CFS Burners - Phase 6	-1,110.00
1.17.H.2 Residential Cooking Pollutants and IAQ - Phase 2	-320.79
1.17.H.3 Residential Cooking Pollutants and IAQ - Phase 3	-2,553.00
1.19.A.2 High Efficiency Smart Convection Oven - Phase 2	-1,480.00
1.19.B.2 Gas Fired Warewasher - Phase 2	-1,410.44
1.19.B.3 Gas Fired Warewasher - Phase 3	-1,591.00
1.20.K Field Evaluation of Indoor Air Quality in Residential Kitchens	-261.22
1.21.G Technical Support to Address Gas Foodservice Technologies	-4,218.00
1.21.H CFS Burner Technology Carbon Reduction Including Hydrogen Blending	-2,997.00

Residential and Light Commercial Customers

1.15.C.3 Next Generation Residential Gas Clothes Dryers - Phase 3: Full Prototype	-740.00

C. SUMMARY OF EXPENDITURES - 2021

Utilization Technology Development Program - GTI	\$ 129,500
Operations Technology Development Program - GTI	\$ 184,500
Emerging Technology Program - GTI	\$ 9,230
Low-Carbon Resources Initiative – GTI	\$ 106,500
North American Gas Heat Pump Collaborative – RI LLC	\$ 38,654
CNG Vehicle	\$ 38
Total Pennsylvania Delta Funds Program Expenditures	\$ 468,422

IV. PROJECTED EXPENDITURES - PERIOD ENDING SEPTEMBER 2022

Expenditures for National Fuel Gas Distribution Corporation's Pennsylvania Delta Funds RD&D Program are projected to be between \$600,000 and \$900,000 of which \$526,466 is collected on an annual basis. The balance will be covered by unutilized funds from prior years. In 2022 the following planned charges are projected:

1. **Utilization Technology Development (UTD)** membership fees of approximately \$129,500. Specific projects to be determined.
2. **Operations Technology Development (OTD)** membership fees of approximately \$184,500. Specific projects to be determined.
3. **Emerging Technology Program (ETP)** membership fees of approximately \$9,230.
4. **Low-Carbon Resources Initiative (LCRI)** membership fees of approximately \$106,500.
 - a. LCRI is an effort lead by the Electric Power Research Institute (EPRI) and the Gas Technology Institute (GTI) to collaborate on addressing the need to accelerate development and demonstration of low carbon energy technologies.
5. **North American Gas Heat Collaborative** membership fees of approximately \$50,000
 - a. The North American Gas Heat Collaborative is membership based collaborative to accelerate the commercialization and market acceptance of gas heat pumps in North America. The goal of this collaboration is to enhance market share of gas heat pump technologies and energy efficient gas technologies.
6. **Local Opportunity Projects** spending estimate of \$425,000 (see below). Funds not used for the development of qualified local technology projects in National Fuel territory may be allocated to the national Gas Technology Institute programs described above.
 - 1) \$100,000 – Hybrid HVAC Demos
 - 2) \$250,000 – CHP Incentive Program
 - 3) \$25,000 – Cold Climate Air Source Heat Pumps
 - 4) \$50,000 -- Natural Gas Vehicle Technology Demonstration

V. STATUS UPDATE OF LOCAL OPPORTUNITY PROJECTS - 2021

Funding of gas industry research through the Gas Technology Institute (GTI), as an example, returns many benefits, including ensuring continued improvement and availability of energy-efficient, low emissions and cost-effective gas technologies; while leveraging the funding resources of gas utilities across North America. The Local Opportunity Projects portion of this program intends to identify projects for direct local support offering equal, or better, benefits than GTI. This is challenging, but National Fuel endeavors to identify and develop these opportunities. Funds available through this portion of the program, beyond the minimum commitments to GTI, may be used for qualified local projects. Funds not used locally are sent to GTI to be allocated to suitable projects, as shown in the previous supported project listings.

Summaries for Local Opportunity Projects active or completed in 2021 are provided below.

1. **CHP Feasibility Assessments.** In accordance with the PUC CHP Policy Statement and as an extension of previous initiatives in support of market development for CHP, National Fuel will continue to implement an active prospecting program to identify prospective candidates for siting of CHP technology. Following initial pre-screening activities, it is strongly anticipated that Delta

Funds will support formal technical and economic feasibility assessment studies for those projects that demonstrate initial attractive deployment opportunities. One of the projects receiving a preliminary assessment has engaged with an engineering company for a more detailed feasibility study, which the Delta Fund will support with a modest financial contribution.

2. **Small-Scale LNG Production.** The goal of this project is to develop, test, and demonstrate a small-scale LNG liquefaction plant. If successful, the plant design would allow for cost-effective production of liquefied natural gas using distribution pipelines as the source. Once plant construction and testing is completed, the plant will be relocated and sited permanently at an existing CNG fueling station. The plant design itself is novel in that it would be coupled with existing CNG station equipment. This allows for cost reduction as existing CNG compressor capacity can augment that which would be required for LNG production. Also, existing compressors would see less idle time, as they would be used during off-peak hours for LNG production. The plant, as designed, is estimated to produce 6,000-20,000 LNG gallons per week. To this point, the initial prototype project location was identified and site preparation completed. All necessary permits have been acquired. Due to COVID and the associated supply chain issues, the equipment imported from overseas was delayed. The construction and testing of the CNG trailer that will feed the LNG system is planned for completion at the test site in Ringgold, PA by the end of this year or early next year. However, the current markets for LNG/CNG have changed so there are uncertainties regarding the last pieces of our demonstration project. As a result of this uncertainty, we will begin to transfer the knowledge gained from the completed phases and terminate the project moving forward.

VI. PROSPECTIVE LOCAL OPPORTUNITY PROJECTS – 2022

1. **Hybrid HVAC Demonstrations.** National Fuel is investigating the operating costs and impact on greenhouse gases that contribute to climate change associated with utilizing an electric Air Source Heat Pump (ASHP) in combination with a high efficiency natural gas furnace for heating (and cooling), as compared to a traditional furnace only and central A/C. National Fuel is desirous to further test and analyze this hybrid system by working collaboratively with contractors to install 8-12 hybrid systems in our Pennsylvania service territory.
2. **CHP Incentive Program.** In accordance with the PUC CHP Policy Statement, National Fuel intends to institute an incentive program to promote the implementation of CHP projects in its service territory. An initial industrial laundry operation has been identified and is expected to pursue the necessary public and private funding for a potential 875 KW CHP project in FY2022. The proposed incentive would be \$285/KW.
3. **Cold Climate Air Source Heat Pump Demonstrations.** National Fuel intends to install 2 cold climate air source heat pumps (ccASHP) in our Pennsylvania service territory. We will conduct a study to determine the monthly energy cost and usage changes, cold climate equipment performance, as well as the associated GHG emissions, associated with utilizing a ccASHP as the sole energy source for the residences heating and cooling needs.
4. **Natural Gas Vehicle Technology Demonstration.** National Fuel plans to participant in purchasing a Ford F-250 pickup which would be modified to include the Adsorbed Natural Gas (ANG) technology. ANG is a low pressure technology which reduces tank pressure from 3,600 to 900 psi. Low pressure enables private, daily fueling with the use of low-cost and small fueling device that can be installed wherever a natural gas line is available, thereby eliminating the lack and high cost of high pressure/fast-fill stations. The cost of the vehicle modification and the fueling device will be shared with an Alternative Fuels Incentive Grant and National Fuel.

National Fuel intends to continue efforts to identify other beneficial Local Opportunity Projects for development which may provide direct benefit to our Pennsylvania consumers, businesses, and industries.

X.	CONCLUSION	42

1 **I. INTRODUCTION**

2 **Q. Please state your name and business address.**

3 A. My name is John D. Taylor and my business address is 10 Hospital Center Commons,
4 Suite 400, Hilton Head Island, South Carolina 29926.

5
6 **Q. On whose behalf are you appearing in this proceeding?**

7 A. I am appearing on behalf of National Fuel Gas Distribution Corporation’s (“NFGDC”)
8 Pennsylvania Division (“National Fuel” or the “Company”).

9
10 **Q. By whom are you employed and in what capacity?**

11 A. I am employed by Atrium Economics, LLC (“Atrium”) as a Managing Partner.

12
13 **Q. Have you prepared an Exhibit describing your professional qualifications?**

14 A. Yes. National Fuel Exhibit JDT-1 presents my professional qualifications.

15
16 **Q. What was Atrium’s assignment in this proceeding?**

17 A. National Fuel requested Atrium to conduct a fully allocated Cost of Service Study
18 (“COSS”) to determine the embedded costs of serving the Company’s gas distribution
19 customers and support its rate design efforts. In this regard, I am sponsoring the COSS
20 that allocates National Fuel’s gas distribution costs to its rate classes, class revenue
21 increase apportionment, and proposed rate design. Additionally, Atrium supported the
22 development of a Weather Normalization Adjustment (“WNA”) mechanism, which is
23 designed to stabilize distribution revenues for certain heating sensitive rate classes from

1 experienced weather variability.

2

3 **Q. Please summarize your testimony.**

4 A. In my testimony I present National Fuel’s COSS and discuss its results, present the
5 revenue increase apportionment to National Fuel’s rate classes, and present the rate
6 design proposals filed by National Fuel in this proceeding. My testimony consists of this
7 introduction and summary section and the following additional sections:

- 8 • Purpose and Principles of Cost Allocation
- 9 • National Fuel’s COSS
- 10 • Principles of Sound Rate Design
- 11 • Determination of National Fuel’s Proposed Class Revenues
- 12 • National Fuel’s Rate Design

13 Additionally, I present the development of the WNA rider, which is based on the
14 distribution charge adjustment applicable to the monthly billings of certain weather
15 sensitive customer classes. In this regard, my testimony consists of the following
16 sections:

- 17 • Support and Rationale for a WNA Mechanism
- 18 • Summary of National Fuel’s Proposed WNA
- 19 • Components of National Fuel’s Proposed WNA Mechanism.

20

21 **Q. What exhibits are you sponsoring in this proceeding?**

22 A. I am sponsoring National Fuel Exhibit D – Cost of Service Study (“Exhibit D”). I also
23 am sponsoring the following Exhibits:

- 1 • National Fuel Exhibit JDT-1 – Resume
- 2 • National Fuel Exhibit JDT-2 – Proposed Revenue Targets by Class
- 3 • National Fuel Exhibit JDT-3 – Proposed Rate Design
- 4 • National Fuel Exhibit JDT-4 – Bill Impacts
- 5 • National Fuel Exhibit JDT-5 – WNA Mechanisms

6 7 8 **II. PURPOSE AND PRINCIPLES OF COST ALLOCATION**

9 **Q. What is the general purpose and use of a COSS in regulatory proceedings?**

10 A. The purpose of a COSS is to allocate the gas distribution utility’s overall adjusted test
11 year costs to the various classes of service in a manner that reflects the relative costs of
12 providing service to each class. A COSS represents an attempt to analyze which customer
13 or group of customers causes the utility to incur the costs to provide service. The
14 requirement to develop a COSS results from the nature of utility costs. Utility costs are
15 characterized by the existence of common costs. Common costs occur when the fixed
16 costs of providing service to one or more rate classes, or the cost of providing multiple
17 products to the same rate class, using the same facilities, and the use by one rate class
18 precludes the use by another rate class.

19 In addition, utility costs may be fixed or variable in nature. Fixed costs do not
20 change with the level of gas throughput, while variable costs change directly with
21 changes in gas throughput. Most non-fuel related utility costs are fixed in the short run
22 and do not vary with changes in customers’ loads. This includes the cost of distribution
23 mains, service lines, meters, and regulators.

24 Finally, the COSS provides different contributions to the development of
25 economically efficient rates and the cost responsibility by rate class. This is accomplished
26 through analyzing costs and assigning each rate class its proportionate share of the

1 utility's total revenues and costs within the test year. The results of these studies can be
2 utilized to determine the relative cost of service for each rate class to help determine the
3 individual class revenue responsibility and provide guidance with rate design. Using the
4 cost information per unit of demand, customer, and energy developed in the COSS to
5 understand and quantify the allocated costs in each rate class is a useful step in the rate
6 design process to guide the development of rates.

7
8 **Q. Is the preparation of a COSS an exact science?**

9 A. No. The fundamental purpose of a COSS is to aid in the design of rates to be charged to
10 customers by identifying all of the capital and operating costs incurred by the utility to
11 provide service to all of its customers, and then assigning or allocating those costs to
12 individual rate classes on the basis of how those rate classes cause the costs to be
13 incurred. Due to the existence of common costs, this process inherently requires a
14 substantial level of judgment and can be more accurately described as
15 engineering/accounting art, rather than science. The allocation of costs using a COSS is a
16 practical requirement of utility regulation since rates are based on the cost of service for
17 the utility under a cost-based regulatory model. As a general matter, utilities must be
18 allowed a reasonable opportunity to earn a return of and on the assets used to serve their
19 customers. This is the cost of service standard and equates to the revenue requirements
20 for utility service. The opportunity for the utility to earn its allowed rate of return depends
21 on the rates applied to customers producing revenues that equate to the level of the
22 revenue requirement.

23

1 **Q. Is there a guiding principle that supports the appropriate allocation of costs?**

2 A. Although there may not be a perfect methodology for allocating costs, there is a
3 fundamental foundational principle, cost causation, which should be followed in order to
4 produce more accurate and reasonable results. Cost causation addresses the need to
5 identify which customer or group of customers causes the utility to incur particular types
6 of costs so the analysis results in an appropriate allocation of the utility's total revenue
7 requirement among the various rate classes. In other words, the costs assigned or
8 allocated to particular customers should be those costs that the particular customers
9 caused the utility to incur because of the characteristics of the customers' usage of utility
10 service.

11
12 **Q. How do you establish the cost and utility service relationships?**

13 A. An important element in the selection and development of a reasonable COSS allocation
14 methodology is the establishment of relationships between customer requirements, load
15 profiles, and usage characteristics on the one hand and the costs incurred by the Company
16 in serving those requirements on the other hand. In order to accomplish this, I reviewed
17 National Fuel's expense and plant accounts, operational data, usage information, and
18 conducted interviews with National Fuel employees. The details and data gathered
19 provided information on the key factors that cause the costs to vary and supported studies
20 of the relative costs of providing facilities and services for each rate class. From the
21 results of those analyses, cost allocation methodologies can be chosen for all of the
22 utility's plant and expense elements.

23

1 **Q. What are the steps to performing a COSS?**

2 A. In order to establish the cost responsibility of each customer class, initially a three-step
3 analysis of the utility's total operating costs must be undertaken. The three steps that are
4 the basis to conduct a COSS are (1) cost functionalization; (2) cost classification; and
5 (3) cost allocation.

6

7 **Q. Please describe cost functionalization.**

8 A. The first step, cost functionalization, identifies and separates plant and expenses into
9 specific categories based on the various characteristics of utility operation. National
10 Fuel's functional cost categories associated with gas service include transmission,
11 distribution, onsite and metering, and customer accounts and service. Indirect costs that
12 support these functions, such as general plant and administrative and general expenses,
13 are allocated to functions using allocation factors related to plant and/or labor ratios (i.e.,
14 internal allocation factors).

15

16 **Q. Please describe cost classification.**

17 A. The second step, cost classification, further separates the functionalized plant and
18 expenses according to the primary factors that determine the amount of costs incurred.
19 These factors are: (1) the number of customers; (2) the need to meet the peak demand
20 requirements that customers place on the gas distribution system; and (3) the amount of
21 gas consumed by customers. These classification categories have been identified for
22 purposes of the COSS as: (1) customer costs; (2) demand costs; and (3) commodity costs,
23 respectively.

1 **Q. Please describe the types of costs contained in the customer cost, demand cost, and**
2 **commodity cost categories.**

3 A. Customer-related costs are incurred to attach a customer to the gas distribution system,
4 meter any gas usage, and maintain the customer's account. Customer costs are a function
5 of the number of customers served by the utility and continue to be incurred whether or
6 not the customer uses any gas. They may include capital costs associated with minimum
7 size distribution mains, services, meters, regulators, customer service, and accounting
8 expenses.

9 Demand or capacity-related costs are associated with a plant that is designed,
10 installed, and operated to meet maximum hourly or daily gas flow requirements, such as
11 the utility's transmission and distribution mains, or more localized distribution facilities
12 that are designed to satisfy individual customer maximum demands. Gas supply contracts
13 also have a capacity-related component of cost relative to the Company's requirements
14 for serving daily peak demands and the winter peaking season.

15 Commodity-related costs are those costs that vary with the throughput sold to or
16 transported for, customers. Costs related to gas supply are classified as commodity
17 because they vary with the amount of gas volumes purchased by the Company for its
18 customers.

19

20 **Q. Please describe the cost allocation process.**

21 A. The final step is the allocation of each functionalized and classified cost element to the
22 individual rate class. Costs typically are allocated on customer, demand, commodity, or
23 revenue allocation factors. From a cost of service perspective, the best approach is a

1 direct assignment of costs where costs are incurred by a customer or class of customers
2 and can be so identified. Where costs cannot be directly assigned, the development of
3 allocation factors by rate class uses principles of both economics and engineering. This
4 results in appropriate allocation factors for different elements of costs based on cost
5 causation. For example, we know from the way customers are billed that each customer
6 requires a meter. Meters differ in size and type depending on the customer's load
7 characteristics. These meters have different costs based on size and type. Therefore,
8 differences in the cost of meters are reflected by using a different average meter cost for
9 each class of service.

10
11 **Q. Are there factors that can influence the overall cost allocation framework utilized by**
12 **a gas utility when performing a COSS?**

13 A. Yes. First, the fundamental and underlying philosophy applicable to all cost studies
14 pertains to the concept of cost causation for purposes of allocating costs to customer
15 groups. Cost causation addresses the question – which customer or group of customers
16 causes the utility to incur particular types of costs? To answer this question, it is
17 necessary to establish a linkage between a utility's customers and the particular costs
18 incurred by the utility in serving those customers. The factors which can influence the
19 cost allocation used to perform a COSS include: (1) the physical configuration of the
20 utility's gas system; (2) the availability of data within the utility; and (3) the state
21 regulatory policies and requirements applicable to the utility.

22
23 **Q. Why are these considerations relevant to conducting National Fuel's COSS?**

1 A. It is important to understand these considerations because they influence the overall
2 context within which a utility’s cost study was conducted. In particular, they provide an
3 indication of where efforts should be focused for purposes of conducting a more detailed
4 analysis of the utility’s gas system design and operations and understanding the
5 regulatory environment in the state the utility operates in as it pertains to cost of service
6 studies and gas ratemaking issues.

7
8 **Q. How do state regulatory policies affect a utility’s COSS?**

9 A. State regulatory policies and requirements prescribe whether there are any historical
10 precedents used to establish utility rates in the state. Specifically, state regulations and
11 past precedents set forth the methodological preferences or guidelines for performing cost
12 studies or designing rates, which can influence the proposed cost allocation method
13 utilized by the utility.

14
15 **Q. How does the availability of data influence a COSS?**

16 A. The structure of the utility’s books and records can influence the cost study framework.
17 This structure relates to attributes such as the level of detail, segregation of data by
18 operating unit or geographic region, and the types of load data available.

19
20 **III. NATIONAL FUEL’S COST OF SERVICE STUDY**

21 **Q. Please describe the process of performing National Fuel’s COSS analysis.**

22 A. The detailed process description of National Fuel’s COSS analysis is presented in Exhibit
23 D - Cost of Service Study. National Fuel Exhibit D provides responses to the filing

1 requirements of the Pennsylvania Public Utility Commission’s (“PAPUC” or the
2 “Commission”) regulations pertaining to the cost of service studies in the Fully Projected
3 Future Test Year Ended July 31, 2024 (“FPFTY”). The exhibit was expanded further to
4 provide a full scope of the process and the results of the COSS analysis.
5

6 **Q. Please discuss the content of the COSS Exhibit D.**

7 A. National Fuel Exhibit D – Cost of Service Study consists of three sections detailing the
8 process of developing COSS. The first section includes an introduction, the general
9 purpose, and the process of the cost of service study, as well as an overview of the excel-
10 based fully functional COSS model presented in this proceeding. The second section
11 presents the COSS development process specific to the Company including
12 Functionalization, Classification, and Allocation. The Allocation section specifically
13 describes all internal and external allocation factors and development bases and processes
14 used in the COSS. The last section depicts the results of the cost of service studies
15 including revenue requirement apportionment, comparison of cost of service with
16 revenues under present and proposed rates, and development of rate of return by
17 customer class under present and proposed rates.
18

19 **Q. Please describe the schedules included in Exhibit D.**

20 A. The following is the list of Schedules included in Exhibit D:

- 21 • Schedule 1 - Account Balances And Allocation Methods
- 22 • Schedule 2 - External Allocation Factors
- 23 • Schedule 3 - Internal Allocation Factors
- 24 • Schedule 4 - Comparison Of Cost Of Service With Revenues Under Present And
25 Proposed Rates

- 1 • Schedule 5 - Cost Of Service And Rate Of Return Under Present And Proposed
- 2 Rates
- 3 • Schedule 6 - Cost Of Service Allocation Study Fully Projected Future Test Year
- 4 Ended July 31, 2024
- 5 • Schedule 7 - Functionalized And Classified Rate Base And Revenue
- 6 Requirement, And Unit Costs By Customer Class
- 7

8 **Q. What was the source of the cost data analyzed in the Company’s COSS?**

9 A. All cost of service data was extracted from the Company’s total cost of service (i.e., total
10 revenue requirement) and schedules contained in this filing. Where more detailed
11 information was required to perform various analyses related to certain plant and expense
12 elements, the data were derived from the historical books and records of the Company
13 and information provided by Company personnel.

14
15 **Q. How are the National Fuel rate classes structured for purposes of conducting its**
16 **COSS?**

17 A. For National Fuel’s COSS, I included nine rate classes:

- 18 • Residential Service
- 19 • Small Commercial & Public Authority Service < 250 Mcf (“SCPA-LL”)
- 20 • Small Commercial & Public Authority Service > 250 Mcf (“SCPA-UL”)
- 21 • Large Commercial & Public Authority Service (“LCPA”)
- 22 • Small Volume Industrial Service (“SVIS”)
- 23 • Intermediate Volume Industrial Service (“IVIS”)
- 24 • Large Volume Industrial Service (“LVIS”)
- 25 • Large Industrial Service (“LIS”)
- 26 • Natural Gas Vehicle Service (“NGV”)
- 27

28 **Q. Do you propose any modification to the current customer classes?**

29 A. No. The customer class and relevant structure reflect the Company’s current tariff
30 schedules. For cost allocation purposes, customers on the NGV services schedule are

1 identified separately as compared to the customer classes reflected in COSS in National
2 Fuel's previous general rate case proceeding, Docket No. R-00061493 ("2006 Case").
3

4 **Q. How are Distribution Mains classified and allocated in the COSS?**

5 A. The COSS presented in Exhibit D was performed utilizing a peak allocation methodology
6 with distribution mains classified as demand and customer related. The Company
7 classified 61% of its investment in distribution mains as customer-related and 39% of the
8 investment as demand-related. The customer-related portion of the distribution mains
9 investment was then allocated to the rate classes based on the number of customers on
10 National Fuel's system. The demand-related portion was allocated to the rate classes
11 based on their respective contribution to the Company's peak day demand under system
12 design and weather conditions, in other words, on a "design day" basis. Transmission
13 mains are allocated to the customer classes based on the contribution to peak day
14 demand. Peak demand represents estimated class peak day requirements. The peak day
15 requirements are estimated based on regression analysis of monthly sales and heating
16 degree days and analysis of winter period throughput to average throughput. Total
17 throughput represents the total throughput for each class during the FPFTY.
18

19 **Q. How are other plant related costs allocated in the COSS?**

20 A. The COSS model also relies on special cost studies for meters, services, and regulators.
21 The investments in service lines, meters, meter installation, and regulators are allocated
22 considering customer weighing factors and the relative cost of the investment where
23 applicable. For a detailed explanation of the allocation factors development please refer

1 to the narrative descriptions presented in Exhibit D with the allocation factors provided in
2 Exhibit D Schedule 2. Miscellaneous Intangible Plant and General Plant accounts are
3 allocated based on labor costs. All plant investment-related accumulated amortization
4 and depreciation expenses follow the classification and allocation of the plant.

5
6 **Q. Please explain the basis for the Company's choice of classification and allocation**
7 **methods for Mains.**

8 A. It is widely accepted that distribution mains are installed to meet both system peak period
9 load requirements and to connect customers to the local distribution company's ("LDC")
10 gas system. Therefore, to ensure that the rate classes that cause the Company to incur
11 this plant investment or expense are charged with its cost, distribution mains should be
12 allocated to the rate classes in proportion to their peak period load requirements and a
13 number of customers.

14 There are two cost factors that influence the level of distribution mains facilities
15 installed by an LDC in expanding its gas distribution system. First, the size of the
16 distribution main (i.e., the diameter of the main) is directly influenced by the sum of the
17 peak period gas demands placed on the LDC's gas system by its customers. Secondly,
18 the total installed footage of distribution mains is influenced by the need to expand the
19 distribution system grid to connect new customers to the system. Therefore, to recognize
20 that these two cost factors influence the level of investment in distribution mains, it is
21 appropriate to allocate such investment based on both peak period demands and the
22 number of customers served by the LDC.

23

1 **Q. Is the method used by the Company to determine a customer cost component of**
2 **distribution mains a generally accepted technique for determining customer costs?**

3 A. Yes. The two most commonly used methods for determining the customer cost
4 component of distribution mains facilities consist of the following: (1) the zero-intercept
5 approach and (2) the most commonly installed, minimum-sized unit of plant investment.
6 Under the zero-intercept approach, a customer cost component is developed through
7 regression analyses to determine the unit cost associated with a zero-inch diameter
8 distribution main. The method regresses unit costs associated with the various sized
9 distribution mains installed on the LDC's gas system against the size (diameter) of the
10 various distribution mains installed. The zero-intercept method seeks to identify that
11 portion of plant representing the smallest size pipe required merely to connect any
12 customer to the LDC's distribution system, regardless of the customer's peak or annual
13 gas consumption.

14 Two of the more commonly accepted literary references relied upon when
15 preparing embedded cost of service studies, Electric Utility Cost Allocation Manual, by
16 John J. Doran et al, National Association of Regulatory Utility Commissioners, and Gas
17 Rate Fundamentals, American Gas Association, both describe minimum system concepts
18 and methods as an appropriate technique for determining the customer component of
19 utility distribution facilities. The existence and utilization of a customer component of
20 distribution facilities, specifically for distribution mains, is a fully supportable and
21 commonly used approach in the gas industry.

22 For purposes of determining the customer component of distribution mains to be
23 used in National Fuel's COSS, the zero-intercept method was employed. Please refer to

1 Exhibit D for the detailed study development process and results.

2
3 **Q. With respect to National Fuel's specific experience, is there demonstrable evidence**
4 **to support the use of a customer component of distribution mains?**

5 A. Yes. In developing an appropriate cost allocation basis for distribution mains, the two
6 methods of cost analysis mentioned in the previous response were conducted for the
7 Company's investment in distribution mains, by size and material type of main installed.
8 The zero-intercept method typically uses regression analysis to compare unit costs of the
9 various sized distribution mains installed on National Fuel's gas system against the size
10 (diameter) of the various distribution mains installed. This method seeks to identify that
11 portion of plant representing the smallest size pipe required merely to connect any
12 customer to the LDC's distribution system, regardless of its peak or annual consumption.
13 This regression determines that regardless of the main's diameter, the average cost of a
14 distribution main on National Fuel's gas system will be at least equal to a minimum cost
15 per installed foot. This per foot cost component is exclusively related to the simple fact
16 that National Fuel incurs this cost to install a main, regardless of its size. That is, the
17 installation is unrelated to either peak gas flows or average gas flows, but relating to site
18 prep, permitting, trenching, and recovering. These distinct costs are related more
19 strongly to the process of extending the distribution mains to connect customers, which is
20 a function of the length of distribution mains and not of the size or diameter of the mains.

21
22 **Q. What method was utilized in National Fuel's 2006 Case to classify and allocate**
23 **distribution mains?**

1 A. The 2006 case included multiple allocation methods. National Fuel presented COSS
2 results using both the customer demand method presented in this case and a peak and
3 average method which allocates distribution mains using what is commonly referred to as
4 the “Seaboard” method, which involves a 50% weighting of peak contribution by the
5 class and 50% weighting of annual throughput.

6

7 **Q. Can you please provide more details on the Seaboard method?**

8 A. The “Seaboard” methodology of assigning utility cost to classes was developed in the
9 early 1950s as part of the Federal Energy Regulatory Commission (“FERC”) rate
10 regulation process for interstate gas pipelines and is based on the premise that both peak
11 and annual usage are of equal importance in determining the cost responsibility of each
12 class. As used at the FERC, this methodology had more to do with rate design and the
13 recovery of revenues than cost allocation and causation. It was developed when gas
14 pipelines sold gas to all their customers including large commercial and industrial
15 customers, when both capacity costs and commodity costs were recovered in the same
16 rates before the advent of purchased gas adjustment mechanisms. With the deregulation
17 of gas within the gas industry in the 1980s, these large customers were given the choice
18 to buy their gas commodity from a producer or marketer and the LDC only provided the
19 delivery of that gas on their distribution system. Other Commissions, including
20 originally the Federal Power Commission, and later, the FERC, moved away from the
21 50/50 weighting of demand and commodity in favor of a 75 percent demand 25 percent
22 commodity weighting known as the “United” method. FERC adopted the United method
23 in 1973. After United, in 1983 FERC departed from a percentage weighting for demand

1 and commodity allocations to a Modified Fixed variable approach which allocated all
2 fixed costs based on demand and all variable costs based on commodity.

3
4 **Q. Has the Seaboard method been relied upon in PA in past gas LDC filings and been**
5 **under review by the PAPUC?**

6 A. Yes. While the PAPUC has recognized a customer component of gas utility
7 infrastructure in recent history, the PAPUC has recently relied on allocating a portion of
8 distribution mains on the annual usage rather than the cost causative basis of matching
9 the allocation of costs with the occurrence of the costs. Given this history, for
10 informational and comparison purposes, I also provide results of the COSS model that
11 allocates Distribution Mains using Peak and Average (“P&A”) methodology with no
12 customer component.

13
14 **Q. How are operation and maintenance (“O&M”), customer, and administrative and**
15 **general (“A&G”) expenses classified and allocated in COSS?**

16 A. A utility’s O&M expenses generally are thought to support the utility’s corresponding
17 plant in service accounts. In general, O&M expenses are allocated based on the cost
18 allocation methods used for the Company’s corresponding plant accounts. The majority
19 of customer accounts and services expenses were classified as customer-related costs and
20 allocated based on the average number of distribution customers by class or relative
21 weighting factors based on special studies. A&G expenses were allocated on an account-
22 by-account basis. Items related to labor costs, such as employee pensions and benefits,
23 were allocated based on O&M labor costs. Items related to plant, such as maintenance of

1 general plant and property taxes, were allocated based on plant. The detailed
2 classification and allocation methods applied to these expense categories can be found on
3 Schedule 1 of Exhibit D.

4
5 **Q. How are all other cost categories allocated in COSS?**

6 A. Taxes other than income are allocated in a manner that reflected the specific cost
7 associated with each tax expense category. Generally, taxes can be cost classified on the
8 basis of the tax assessment method established for each tax category and can be grouped
9 into the following categories: (1) labor; (2) plant; and (3) revenue. In the National Fuel
10 COSS, all non-income taxes were assigned to one of the above stated categories and
11 relevant allocation factors.

12 Current income taxes were allocated based on each class's net income before
13 taxes. Income taxes for the total revenue requirement were allocated to each class based
14 on the allocation of the required net income by rate class. Income taxes at proposed
15 revenues by class were allocated to each class based on the proposed income prior to
16 taxes for each class. The detailed classification and allocation methods are shown on
17 Schedule 1 of Exhibit D.

18
19 **Q. Does National Fuel's COSS include gas commodity costs?**

20 A. Yes. The COSS does include gas commodity costs and gas commodity revenues which
21 are both functionalized to the gas supply function with a net income of zero, since the gas
22 commodity costs match gas commodity revenues.

23

1 **Q. Have you provided all workpapers and studies supporting the COSS?**

2 A. Yes. All supporting workpapers, calculations, and documentation to the filed COSS
3 model are provided in response to the Supplemental Data Requests – Cost of Service
4 accompanying the Company’s filing.

5
6 **Q. Please summarize the results of National Fuel’s COSS.**

7 A. Table 1 below presents a summary of the results of the Company’s COSS that can be
8 reviewed in detail in Schedule 5 of Exhibit D. The COSS shows an overall revenue
9 deficiency to the Company of \$28.1 million.

10 **Table 1 - Summary Results of the Company’s COSS**

Rate Classes	Current Revenues	Cost to Serve	Current Rate of Return	Deficiency /(Surplus)	Revenue to Cost Ratio	Parity Ratio
Residential	\$ 80,816	\$ 114,654	1.2%	\$ 33,838	0.70	0.88
SCPA-LL	5,304	6,630	3.9%	1,326	0.80	1.00
SCPA-UL	5,597	6,116	7.4%	519	0.92	1.14
LCPA	11,923	8,192	19.8%	(3,731)	1.46	1.81
NGV	34	60	-0.7%	26	0.57	0.70
SVIS	355	257	20.3%	(99)	1.38	1.72
IVIS	4,246	2,904	19.8%	(1,341)	1.46	1.82
LVIS	2,144	1,028	32.8%	(1,116)	2.08	2.60
LIS	3,240	1,766	27.3%	(1,475)	1.84	2.29
Total	\$ 113,658	\$ 141,607	4.2%	\$ 27,949	0.80	1.00
Other Revenues	3,831	4,023		192		
Total System	\$ 117,490	\$ 145,630		\$ 28,141		

11 Table 1 presents the revenue deficiency/excess for each rate class, the class rate of return
12 on net rate base at current rates, the revenue to cost ratio, and the associated parity ratio.
13 Regarding rate class revenue levels, the results show that all classes except Residential,
14 SCPA-LL, SCPA-UL and NGV are being charged rates that recover more than their
15 indicated costs of service.

1 **Q. How do the results of the customer demand method of allocating distribution mains**
 2 **compare to the Seaboard method of allocating distribution mains?**

3 A. Table 2 below provides a comparison between the two methods. As is expected using the
 4 Seaboard method increases the allocation of costs to those classes with higher load
 5 factors and large volumes of annual throughput.

6 **Table 2 – Comparison of Customer / Demand and Peak and Average**

Rate Classes	Cost to Serve (Cust/Dem)	Cost to Serve (Peak and Average)	Difference	Revenue to Cost (Cust/Dem)	Revenue to Cost (Peak and Average)
Residential	\$ 114,654	\$ 98,321	\$ 16,334	0.70	0.82
SCPA-LL	6,630	\$ 5,961	669	0.80	0.89
SCPA-UL	6,116	\$ 7,437	(1,321)	0.92	0.75
LCPA	8,192	\$ 14,155	(5,963)	1.46	0.84
NGV	60	\$ 155	(94)	0.57	0.22
SVIS	257	\$ 307	(50)	1.38	1.16
IVIS	2,904	\$ 5,578	(2,674)	1.46	0.76

7 **IV. PRINCIPLES OF SOUND RATE DESIGN**

8 **Q. Please identify the principles of rate design utilized in development of the**
 9 **Company’s rate design proposals.**

10 A. Several rate design principles find broad acceptance in the recognized literature on utility
 11 ratemaking and regulatory policy. These principles include:

- 12 (1) Cost of Service;
- 13 (2) Efficiency;
- 14 (3) Value of Service;

- 1 (4) Stability/Gradualism;
- 2 (5) Non-Discrimination;
- 3 (6) Administrative Simplicity; and
- 4 (7) Balanced Budget.

5 These rate design principles draw heavily upon the “Attributes of a Sound Rate
6 Structure” developed by James Bonbright in Principles of Public Utility Rates.¹

7

8 **Q. Can the objectives inherent in these principles compete with each other at times?**

9 A. Yes. These principles can compete with each other, and this tension requires further
10 judgment to strike the right balance between the principles. Detailed evaluation of rate
11 design recommendations must recognize the potential and actual tension between these
12 principles. Indeed, Bonbright discusses this tension in detail. Rate design
13 recommendations must deal effectively with such tension. There are tensions between
14 cost and value of service principles as well as efficiency and simplicity. There are
15 potential conflicts between simplicity and non-discrimination and between value of
16 service and non-discrimination. Other potential conflicts arise where utilities face unique
17 circumstances that must be considered as part of the rate design process.

18

19 **Q. How are these principles translated into the design of rates?**

20 A. The overall rate design process, which includes both the apportionment of the revenues to
21 be recovered among rate classes and the determination of rate structures within rate
22 classes, consists of finding a reasonable balance between the above-described criteria or

¹ Principles of Public Utility Rates, Second Edition, Page 111-113 James C. Bonbright, Albert L. Danielson, David R. Kamerschen, Public Utility Reports, Inc., 1988.

1 guidelines that relate to the design of utility rates. Economic, regulatory, historical, and
2 social factors all enter the process. In other words, both quantitative and qualitative
3 information is evaluated before reaching a final rate design determination. Out of
4 necessity then, the rate design process must be, in part, influenced by judgmental
5 evaluations.

6
7 **V. DETERMINATION OF PROPOSED CLASS REVENUES**

8 **Q. Please describe the proposed approach to apportion National Fuel's proposed**
9 **revenue increase to its rate classes.**

10 A. As just described, the apportionment of revenues among rate classes consists of deriving
11 a reasonable balance between various criteria or guidelines that relate to the design of
12 utility rates. The various criteria that were considered in the process included: (1) cost of
13 service; (2) class contribution to present revenue levels; and (3) customer impact
14 considerations.

15 After discussions with the Company, the increase proposed in this case was
16 allocated based on considerations of the current parity percentages shown above in Table
17 1 and the desire to move toward full parity over time while addressing issues of
18 gradualism. National Fuel proposes to:

- 19 • For those classes with a revenue to cost parity ratio below 1.0 an increase of 1.1
20 times the system increase is proposed. This applies to the Residential class and
21 NGV class.

- 1 • For those classes with a revenue to cost parity ratio above 1.0 but below 1.5 an
2 increase of 0.9 times the system increase is proposed. This applies to the SCPA-
3 UL class.
- 4 • For those classes with a revenue to cost parity ratio equal to 1.0 an increase of 1.0
5 times the system increase is proposed. This applies to the SCPA-LL class.
- 6 • For all other classes with revenue to cost parity ratios above 1.5 an increase of
7 0.66 times the system increase is proposed. The 0.66 was set to recover the
8 remaining requested increase. This applies to the LCPA, SVIS, IVIS, LVIS, and
9 LIS classes.

10 The amounts of the existing rate subsidies and excesses among the Company's
11 rate classes were generally reduced. From a class cost of service standpoint, this type of
12 class movement, and reduction in class rate subsidies, is desirable to move class revenues
13 and rates closer to the indicated cost of service for each rate class.

14

15 **Q. What are the percentage changes in revenues by rate class resulting from the**
16 **Company's proposed revenue apportionment?**

17 A. Table 3 below summarizes the proposed distribution margin revenue change for each rate
18 class and the percent change in distribution margin revenues resulting from the above-
19 described process.

1

Table 3 - Proposed Class Revenue Apportionment

Rate Classes	Margin Revenues at Current Rates	Margin Revenues at Proposed Rates	Proposed Revenue Change	Percent Change	Increase Relative to System Increase
Residential	\$ 80,816	\$ 102,676	\$ 21,860	27.05%	1.10
SCPA-LL	\$ 5,304	\$ 6,608	\$ 1,304	24.59%	1.00
SCPA-UL	\$ 5,597	\$ 6,835	\$ 1,239	22.13%	0.90
LCPA	\$ 11,923	\$ 13,847	\$ 1,925	16.14%	0.66
NGV	\$ 34	\$ 43	\$ 9	27.05%	1.10

Total System	\$ 305,034	\$ 333,174	\$ 28,141	9.23%	

1 **Q. Has the Company prepared a detailed comparison of the Company’s present and**
2 **proposed rates and resulting revenues by rate class?**

3 A. Yes. National Fuel Exhibit E – Proof of Revenue, sponsored by Company Witness
4 Barber, presents a detailed comparison of present and proposed revenues for each of
5 National Fuel’s rate classes.
6

7 **Q. Have you prepared bill impacts?**

8 A. Yes. National Fuel Exhibit JDT-4 provides bill impacts for each of the rate classes.
9

10 **VII. SUPPORT & RATIONALE FOR A WNA MECHANISM**

11 **Q. How are weather-normalized gas volumes used to derive a gas utility’s base rates?**

12 A. Typically, as part of the rate design in a base rate proceeding, a utility’s volumetric unit
13 rates for gas service are derived by dividing the appropriate costs, to be recovered
14 through volumetric based rates, by the anticipated weather-normalized gas sales volumes.
15 These rates are designed to provide the utility with an opportunity to recover the costs it
16 incurs to provide utility service, at the levels determined in the utility’s rate case under
17 normal weather conditions. To the extent any costs are subject to recovery in a
18 volumetric charge, the recovery of such amounts is entirely dependent upon the volumes
19 of gas usage experienced by the utility. Therefore, the recovery of costs in a volumetric
20 component of rates will always lead to a difference in recovery of actual costs because
21 actual weather conditions will by and large never match the normalized weather
22 conditions used to set rates.
23

1 **Q. Please explain how fluctuations in weather over time impact a gas utility's**
2 **temperature-sensitive customers and the utility's financial performance.**

3 A. Since the bills of gas customers are largely based on the level of gas usage, temperature-
4 sensitive customers' monthly bills can vary widely due to changing weather conditions.
5 Under traditional ratemaking methods, if actual temperatures were colder than normal,
6 the typical gas customer would use more gas, pay more for service (through volumetric
7 charges), and potentially overpay its share of fixed costs. This occurs because the unit
8 rates used to recover fixed costs are not reduced to recognize the higher gas volumes used
9 by customers during colder weather. Since the gas utility's level of fixed costs does not
10 change, the higher gas volumes applied against the same unit rate would generate
11 comparatively higher distribution revenues than the level of fixed costs established for
12 ratemaking purposes. Conversely, in warmer than normal weather, the reverse situation
13 would occur. Customers' gas usage decreases with warmer temperatures, thus generating
14 comparatively lower distribution revenues than required to recover the gas utility's total
15 fixed costs that do not decrease due to warm weather.

16

17 **Q. Are WNA mechanisms like the one the Company proposes widely accepted in the**
18 **natural gas industry?**

19 A. Yes. National Fuel Exhibit JDT-5 presents a survey conducted by Atrium Economics,
20 with input from an American Gas Association survey,² which shows that many U.S.
21 gas utilities, across a wide geographic area, have implemented WNA mechanisms.

22 Specifically, the survey results (provided in Figure 1 below) show there are 25 states that

VIII. SUMMARY OF PROPOSED WNA MECHANISM

Q. Please define and describe the concept of a WNA mechanism.

A. The utility’s distribution rates, which are set to allow the utility to recover its authorized level of distribution revenues, are based on expected throughput during normal weather. When actual weather deviates from normal weather, there will be a difference between actual and projected distribution revenues. A WNA mechanism adjusts a customer’s bill due to these variations from normal weather (i.e., temperature variations or heating degree day variations) in order to have the bill reflect normal weather conditions. For billing periods that are colder than normal, a credit will be applied to the bill. For billing periods that are warmer than normal, a surcharge is applied to the bill. WNA mechanisms

1 are typically effective for usage during the heating season calendar months (e.g., October
2 through May). WNAs reduce the amount of variation in both customer bills and utility
3 revenues by making a compensating adjustment for the difference between actual
4 weather and normal weather.

5
6 **Q. Are WNA mechanisms different from Revenue Decoupling?**

7 A. Revenue Decoupling is a regulatory mechanism that separates a utility's distribution
8 revenues from its level of sales, thereby "breaking the link" so that the utility may
9 recover an established amount of revenues (regardless of weather, customer conservation,
10 etc.), even as sales fluctuate. WNA mechanisms only account for the changes in sales that
11 occur due to the difference between actual weather and normal weather. In the case of the
12 Company's specific proposal, the WNA will only address weather related impacts and
13 will only do so for certain of the Company's customer classes; thus, while providing a
14 level of revenue stability related to weather changes, it does not completely decouple
15 revenues from all sales related variances as full revenue decoupling would provide.

16
17 **Q. Do WNA mechanisms differ in their design?**

18 A. Yes. Gas utilities typically use two types of WNA mechanisms: (1) a mechanism that
19 adjusts current billings on a monthly billing basis as the bill is being calculated and
20 issued; and (2) a mechanism that adjusts billings on a lagged basis where the adjustment
21 appears on the customer's bill(s) from a few to several months after a variation from
22 normal weather is experienced.

23

1 **Q. Which type of WNA mechanism is the Company proposing to implement?**

2 A. The Company proposes to implement a WNA mechanism that adjusts billings on a
3 monthly billing basis as the bill is being calculated and issued.

4

5 **Q. Why has the Company chosen to adopt a WNA mechanism of this type?**

6 A. National Fuel has chosen this type of WNA mechanism because, by adjusting current
7 billings on a monthly billing basis, the customer can more readily link the resulting
8 billing adjustment with the weather causing the adjustment. In a cold winter with high
9 gas bills, customers will receive the benefits of WNA bill reductions more quickly. The
10 monthly bills will reflect the specific period in which the colder weather occurs. In
11 addition, the utility's financial statements will reflect the cash flow effect of the monthly
12 billing WNA mechanism sooner than a lagged WNA mechanism.

13

14 **Q. Please describe the Company's proposed WNA.**

15 A. The key elements of the Company's proposed WNA mechanism are as follows:

16 • It applies to National Fuel's Residential and Non-Residential customers receiving
17 service under Residential, LIRA, and Commercial and Public Authority Rate
18 Schedules.

19 • It adjusts billings on a current monthly basis and uses adjustment factors which are
20 representative of each customer's consumption characteristics.

21 • It is effective for the billing months of October through May.

22 • It adjusts the amount billed to each customer to offset the impact of actual heating
23 degree days ("AHDD") variations from normal heating degree days ("NHDD").

1 **Q. What are the benefits of the WNA mechanism for National Fuel and its customers?**

2 A. For an applicable customer, a WNA is advantageous because:

3 1. It reduces bill variability due to weather in the month when the variation occurs
4 and provides bill relief in severely cold months.

5 2. The WNA will improve customer satisfaction by providing more stable annual
6 bill amounts and mitigating volatility in monthly gas bills. This will help
7 customers budget for and pay their bills.

8 3. Customers will continue to benefit from their energy conservation efforts, as the
9 actual usage on each customer's bill is utilized to calculate the WNA adjustment,
10 and that usage level will reflect the conservation behaviors of each customer.

11 4. For National Fuel, a WNA is a fair and equitable rate mechanism because:

12 National Fuel's volumetric delivery service rates are based on the volumes of gas
13 it expects to sell under normal weather conditions. The WNA mechanism will
14 improve the ability to match the level of distribution revenues, established to
15 recover fixed costs, with the amount reflected in the monthly customer billings.

16 5. Deviations from normal weather can result in differences in actual and projected
17 recovery of the Company's annual non-gas distribution costs when actual weather
18 experienced is colder or warmer than normal, respectively. Therefore, such
19 deviations can produce erratic financial results for the Company.

20

21 **Q. Is National Fuel's proposed WNA similar to other WNA mechanisms in place for
22 gas distribution utilities in Pennsylvania?**

23 A. Yes. National Fuel's proposed WNA shares similarities with both Columbia Gas of

1 Pennsylvania’s (“Columbia”) WNA rider,³ and Philadelphia Gas Works’ (“PGW”) WNA
2 clause⁴. The WNA applies to Residential heating customers for all three utilities, and
3 Non-Residential heating customers for National Fuel. The specific calculation of
4 National Fuel’s proposed WNA rate is most similar to the calculation of Columbia’s and
5 UGI’s WNA rider. Finally, like Columbia and PGW, National Fuel is proposing annual
6 reporting for the WNA to the Commission and applies only during the heating season
7 months.

8
9 **IX. COMPONENTS OF PROPOSED WNA MECHANISM**

10 **Q. Please explain how National Fuel’s proposed WNA mechanism will operate.**

11 A. National Fuel’s proposed WNA mechanism will adjust the amount billed to each
12 customer served under Residential, LIRA, and Commercial and Public Authority Rate
13 Schedules to effectively weather normalize distribution revenues recovered from these
14 rate schedules during the cold weather heating season. It is a customer bill specific
15 calculation applied to monthly billing cycles during the months of October through May.

16
17 **Q. What is the Company’s basis for determining normal weather for its Pennsylvania
18 gas distribution system?**

19 A. The testimony of Company witness Gregory D. Harts (National Fuel Statement No. 13)
20 discusses this in detail.

21 **Q. Would the adjustment to customers’ bills be calculated on a calendar month or on a**

³ Columbia Gas of Pennsylvania, Inc., “Rider WNA – Weather Normalization Adjustment”, Rates and Rules for furnishing gas service, <https://www.columbiagaspa.com/docs/librariesprovider14/rates-and-tariffs/pennsylvania-tariff.pdf?sfvrsn=41>, pdf at page 187.

⁴ Philadelphia Gas Works, “Weather Normalization Adjustment Clause”, Gas Service Tariff, https://www.pgworks.com/uploads/pdfs/PGW_Gas_Service_Tariff_Through_Supplement_145.pdf, pdf at page 150.

1 **billing cycle month basis?**

2 A. The customer adjustments would be made on a billing cycle basis. This approach allows
3 the adjustments to be calculated at the end of each customer’s meter reading billing cycle
4 and incorporated into the original bill sent to each customer. This approach provides for
5 an accurate and timely adjustment for the customer. There is no additional time lag
6 between when the customer experiences the bill variability and when the weather
7 normalizing adjustment is made.

8

9 **Q. In the context of WNA riders, what are deadbands?**

10 A. A deadband applies to WNA riders such that the adjustment is not triggered if AHDDs
11 are within a certain threshold of the NHDDs. Thus, no adjustment applies to the bill if
12 weather falls within that threshold and some weather variability flows to customer bills
13 and is seen in the associated utility distribution revenues. Columbia’s WNA mechanism
14 utilizes a 3% deadband, PGW’s WNA mechanism utilizes a 1% deadband, and UGI’s
15 WNA will include a 3% deadband.

16

17 **Q. Does National Fuel’s proposal include a deadband?**

18 A. No. The National Fuel proposal does not include a deadband. The Company believes the
19 application of a deadband adds unnecessary complexity to the rider, which is a concern
20 for customer communication and education. Also, in principle, the WNA’s intended goal
21 is to stabilize billings and distribution revenues from readily identified weather related
22 variances, not just “some” element of weather variance that may be arbitrarily
23 established. NFGDC’s New York Division has a WNA that has successfully operated

1 without a deadband since 1989.

2
3 **Q. Please provide a formulaic representation of the WNA mechanism that you just**
4 **described.**

5 A. The Company’s proposed WNA formula that is applied to bills of Residential, LIRA, and
6 Commercial and Public Authority Rate Schedules for the heating season of October
7 through May is shown below⁵:

$$WNBC = BLMC + \left[\frac{NHDD}{AHDD} \times (AMC - BLMC) \right]$$

$$WNAC = WNBC - AMC$$

$$WNA = WNAC \times \text{Distribution Charge}$$

- 11 • WNA = Weather Normalization Adjustment will be applied to bills of Residential and
12 Non-Residential customers under Residential, LIRA, and Commercial and Public
13 Authority Rate Schedules, for any billing period during the heating season October
14 through May.
- 15 • WNBC = Weather Normalized Billing Ccfs (“WNBC”) will be calculated as the Base
16 Load Monthly Ccfs (“BLMC”) added to the product of (1) the NHDD divided by the
17 AHDD and (2) the Actual Monthly Ccfs (“AMC”) less the BLMC. WNA will not be
18 applicable for the billing period if AMC is less than the BLMC.
- 19 • BLMC = Base Load Monthly Ccfs shall be established for each customer using the
20 customer's actual consumption from the billing system, measured in Ccfs.
- 21 • NHDD = Normal Heating Degree Days shall be based upon the 15-year average for
22 the given day, as reported by the National Oceanic and Atmospheric Administration
23 (NOAA) for the Erie International Airport weather station. NHDD shall be updated
24 every 5 years with the next scheduled update of the NHDD to be effective on October
25 1, 2027, and thereafter every five years.
- 26 • AHDD = Actual Heating Degree Days shall be the actual experienced heating degree
27 days during the billing cycle AHDD shall be based upon experienced actual Gas Day
28 temperatures as reported by the National Oceanic and Atmospheric Administration
29 (NOAA) for the Erie International Airport weather station.

⁵ The full proposed tariff language is provided as National Fuel Exhibit F – Proposed Tariffs, Tariff Pages 158 & 159 detailing Rider C, Weather Normalization Adjustment.

- 1 • AMC = Actual Monthly Ccfs will be subtracted from the WNBC to compute the
2 Weather Normalized Adjustment Ccfs (“WNAC”).
- 3 • The WNAC shall then be multiplied by the applicable Rate Schedule Distribution
4 Charge based on service rendered to compute the WNA amount that will be charged
5 or credited to each Residential and Non-Residential customer served under
6 Residential, LIRA, and Commercial and Public Authority Rate Schedules.
- 7 • In the event a customer’s bill needs to be canceled and rebilled at any time, the WNA
8 will be recalculated using the most recently available data for the billing period. In
9 some cases, updates in data used in the calculation, may result in a different WNA for
10 the billing period.

11

12 **Q. Please explain the process the Company will follow to calculate the WNA.**

13 A. For each billing cycle, the Company will adjust the heat sensitive load to account for the
14 ratio of normal weather to actual weather and then recalculate the bill. The process works
15 as follows:

- 16 • For each billing cycle and each applicable customer, the Company will calculate the
17 weather normalized billing Ccfs by multiplying the heat sensitive load (actual Ccfs
18 less base load Ccfs) times the ratio of the normal HDDs for the billing cycle to the
19 actual HDDs. This adjusted heat sensitive AHDD load will then be added to the base
20 load Ccfs to calculate the Weather Normalized Billing Ccfs (WNBC);
- 21
- 22 • The Company will then determine the Weather Normalized Adjustment Ccfs
23 (“WNAC”) of each applicable customer for each billing cycle by subtracting the
24 actual monthly Ccfs from the Weather Normalized Billing Ccfs;
- 25
- 26
- 27 • This Weather Normalized Adjustment Ccfs is then multiplied by the applicable rate
28 class’s volumetric distribution charge to develop the Weather Normalization
29 Adjustment that will be applied on the customer’s bill.
- 30
- 31

32 **Q. Have tariff pages been developed that reflect the computational details and process
33 of the proposed WNA mechanism?**

34 A. Yes. The appropriate tariff pages to implement the proposed WNA mechanism are
35 presented in National Fuel Exhibit F (Proposed Tariff). Tariff pages 158 and 159 contain
36 Rider C – Weather Normalization Adjustment.

Q. When does the Company propose to implement the WNA?

A. Although intended to apply for bills during the months of October through May on a forward basis, assuming the effective date of new rates is in August 2023 in this proceeding, National Fuel is proposing the WNA will initially be implemented beginning with bills rendered during the October 2023 billing cycle.

Q. What additional filing(s) would occur related to the WNA Rider?

A. The Company will file weather normalization information with the Commission annually on or before December 1st for WNA data related to the 12-month period ending September of that same year. The filing will contain the following information on the WNA mechanism: (a) monthly WNA billed revenue; and (b) monthly actual and normal HDD data.

Q. How does the proposed WNA align with the Statements of Policy as outlined by the Commission in the alternative rate making Docket No. M-2015-2518883?

A. Each rate consideration identified in the Statement of Policy is listed below along with the relevant effect the proposed WNA has on each rate consideration:

- 1. Please explain how the ratemaking mechanism and rate design align revenues with cost causation principles as to both fixed and variable costs.

National Fuel’s proposed WNA is designed to recover distribution revenues needed to satisfy the cost-of-service requirement determined in this proceeding, while mitigating the variance between actual and projected distribution revenues due to weather. National Fuel recovers a significant portion of fixed costs through volumetric rates. These fixed costs do not vary with the amount of gas delivered to customers and are composed of fixed operation and maintenance (“O&M”) expenses, administrative and general expenses, depreciation, certain taxes, a portion of working capital requirements, and return on investment. These costs

1 also do not vary in the short-term with changes in temperature. In the absence of
2 SFV rate design; where all fixed costs are recovered in a fixed monthly charge, a
3 WNA mechanism will better align distribution revenues with cost causation
4 principles; appropriately accounting for variation in usage due to weather.

- 5 2. Please explain how the ratemaking mechanism and rate design impact the fixed
6 utility's capacity utilization.

7 National Fuel's WNA proposal has no identifiable impact on capacity utilization.

- 8 3. Please explain whether the ratemaking mechanism and rate design reflect the
9 level of demand associated with the customer's anticipated consumption levels.

10 Customer specific usage factors corresponding to their individual demand (the
11 BLMC for each customer) is continually updated and reflects the level of demand
12 associated with the customer's anticipated consumption levels.

- 13 4. How the ratemaking mechanism and rate design limit or eliminate interclass and
14 intraclass cost shifting.

15 Since the proposed WNA mechanism is applying rates which are based upon the
16 specific revenue allocation and rate design approved by the Commission, it will
17 mitigate the potential for interclass or intraclass cost shifting related to weather
18 driven usage variances from those weather assumptions used in establishing rates.

- 19 5. Please explain how the WNA limits or eliminates disincentives for the promotion
20 of efficiency programs.

21 National Fuel is proposing an Energy Efficiency Pilot program in this proceeding,
22 which will promote energy efficiency measures. The proposed WNA only
23 addresses variations due to weather. The WNA does not negatively impact energy
24 efficiency programs.

- 25 6. Please explain how the WNA impacts customer incentives to employ efficiency
26 measures and distributed energy resources.

27 Customers will continue to have an incentive to employ energy efficiency
28 measures and distributed energy resources because a reduction in usage still
29 reduces their overall bill and the portion of their bill that is subject to the WNA
30 mechanism.

- 31 7. Please explain how the WNA impacts low-income customers and support
32 consumer assistance programs.

33 Customers served under the Company's Low Income Residential Assistance
34 Service ("LIRAS") Rate Schedule, the Company's current Customer Assistance
35 Program ("CAP") receive bill discounts determined by household size and income
36 level. The Company has petitioned the Commission to modify its CAP to a
37 "percentage of income program" or PIP. Under the current CAP, the WNA
38 mechanism will lower bill variability for distribution costs. Under the proposed
39 CAP, customers who are paying on a percent-of-income basis will see little to no
40 impact.

- 41 8. Please explain how the WNA impacts customer rate stability principles.

1 The WNA mechanism will provide customers more stable annual bills and
2 directly mitigate volatility in their monthly costs.

3 9. Please explain how weather impacts utility revenue under the WNA.

4 The proposed WNA adjusts a customer's bill due to variations from normal
5 weather and is employed for usage during the heating season months (October –
6 May). It only applies to the Company's weather sensitive customer classes and it
7 does not ensure the utility will recover 100% of its authorized distribution
8 revenues, but it does reduce the amount of weather-related variation in both
9 customer bills and associated utility distribution revenues.

10 10. Please explain how the WNA impacts the frequency of rate case filings and affects
11 regulatory lag.

12 The WNA is not anticipated to (nor is intended to) impact the frequency of rate
13 cases or have an impact on regulatory lag.

14 11. Please explain if the WNA interacts with other revenue sources, such as Section
15 1307 automatic adjustment surcharges, 66 Pa.C.S. § 1307 (relating to sliding
16 scale of rates; adjustments), riders such as 66 Pa.C.S. § 2804(9) (relating to
17 standards for restructuring of electric industry) or system improvement charges,
18 66 Pa.C.S. § 1353 (relating to distribution system improvement charge).

19 The Company's proposed WNA (appearing as Rider C – WNA in the Tariff) only
20 applies to distribution related charges that are recovering the base distribution
21 revenue requirement from applicable WNA customer classes for the heating
22 season of October through May. Specifically, the billing for the Company's
23 Riders, including Rider A – PGC, Rider D – EE, Rider E – Customer Education,
24 Rider F – LIRA, Rider G - MFC and Rider H – GPC, will continue to be based on
25 actual monthly usage.

26 12. Please explain whether the WNA includes appropriate consumer protections.

27 The WNA mechanism will result in an adjusted bill that reflects the revenues that
28 would be recovered under normal weather, i.e., the same normal weather used to
29 set rates. National Fuel will not recover additional distribution revenues due to
30 colder than average temperatures that result in higher-than-normal usage from
31 customers. The WNA mechanism insulates customers from high bills during
32 colder than-normal months, as WNA bills will be otherwise lower than non-WNA
33 bills during colder than normal periods.

34 13. Please explain whether the WNA is understandable to customers.

35 National Fuel's WNA is not a new concept to the regulated utility industry.
36 Similar versions have been successfully implemented by other Pennsylvania
37 natural gas distribution companies. National Fuel has proposed a WNA tariff that
38 provides detailed information to the customer of how the mechanism works based
39 on successful working versions found in the tariffs of other Pennsylvania natural
40 gas distribution companies that have implemented a WNA tariff. Further,
41 educational materials and customer service training will be developed upon
42 approval of the mechanism, as well as appropriate notice being provided to

1 customers related to the WNA being approved pursuant to the Commission's
2 alternative ratemaking notice requirements.

3 *14. Please explain how the WNA will support improvements in utility reliability.*

4 National Fuel's cost of service is inclusive of investments and costs to continue to
5 enhance the safety and reliability of its system. The proposed WNA will help
6 minimize the volatility of the recovery of these costs.

7
8 **Q. Do any members of the peer group used to inform the recommended return on
9 equity for National Fuel in this proceeding have similar mechanisms?**

10 A. Yes, as indicated above WNA mechanisms and decoupling mechanisms are common
11 ratemaking mechanisms across the industry. As indicated in the testimony of Company
12 witness Paul R. Moul (National Fuel Statement No. 10), the utilities included in the Gas
13 Group (the peer group) already have tariff mechanisms for stabilization of revenues due
14 to variation in weather, either through similar WNA mechanisms as that proposed by
15 National Fuel or through full revenue decoupling mechanisms. The implementation of
16 National Fuel's proposed WNA mechanism would place National Fuel on a more
17 comparable footing to the benchmark proxy group that Mr. Moul uses in his direct
18 testimony to establish the proposed return on equity.

19
20 **Q. Have WNA proposals recently been authorized by the Commission?**

21 A. Yes. In a December 6, 2018 Order, the Commission authorized the continuation of
22 Columbia's WNA mechanism that had earlier been implemented on a pilot basis.
23 Chairperson Gladys Brown Dutrieuille, provided the following statement in the Order
24 supporting the continuation of the WNA mechanism:

25 "I commend the parties for their commitment to this mechanism. ...
26 The Weather Normalization Adjustment works bi-directionally to
27 insulate customers from high bills during the extremely cold months,
28 while also limiting the decline in revenue for Columbia during

1 unseasonably warm heating months. This...stabilizes Columbia's
2 cash flow, and in turn, allows Columbia to more acutely focus on
3 operational items within its control; namely infrastructure upgrades
4 and repairs. Further, since this decoupling mechanism is only applied
5 to the distribution component of the bill, and not the natural gas
6 commodity charge, incentives for efficient consumption are
7 maintained."⁶
8
9

10 **Q. Do you believe National Fuel's proposed WNA mechanism is fair to both the**
11 **Company and its customers?**

12 A. Yes. The proposed WNA mechanism strikes an appropriate balance between the interests
13 of both the Customer and the Company. National Fuel would be simply billing its
14 customers in a manner to reflect the normal weather conditions that underlie its
15 Commission-authorized base rates on a monthly billing basis. Moreover, the WNA
16 mechanism provides the Company a reasonable opportunity to earn its allowed rate of
17 return on its investment and removes bill variability due a factor outside of customer's
18 control, variations in weather.

19
20 **X. CONCLUSION**

21 **Q. Please summarize your primary conclusions.**

22 A. The Company's proposed COSA method best reflects the cost causation of distribution
23 mains by accounting for the fact that distribution mains are extended to new customers
24 and are sized to meet peak demand requirements. As such, the Commission should rely
25 on the Company's proposed COSA to guide revenue targets for each rate class. The
26 revenue targets proposed by National Fuel reasonably balance the concepts of cost of

⁶ Pennsylvania Public Service Commission Docket No. R-2018-2647577.

1 service, current revenue contributions, and gradualism, while moving all classes closer to
2 parity. Lastly, the COSA model demonstrates that fixed costs, both customer-related and
3 demand-related are materially higher than the current level of customer charges and as
4 such the increase to customer charges should be approved by the Commission to better
5 align fixed costs occurrence with fixed costs recovery and pricing incurred by customers.
6

7 **Q. Please summarize how implementing the proposed WNA mechanism results in fair**
8 **and equitable ratemaking.**

9 A. The Company's proposed WNA mechanism results in fair and equitable ratemaking due
10 to the following:

- 11 • The WNA helps to break the link between the gas consumption of the Company's
12 customers and its distribution revenue recovery, and better aligns the interests of
13 National Fuel and its customers. The fixed costs embedded in National Fuel's
14 volumetric rates for distribution service do not vary in the short-term with
15 changes in temperature.
- 16 • The WNA addresses a factor beyond the Company's and customers' control,
17 weather variability. This variability contributes to increased volatility in
18 customers' bills, and increased volatility in the Company's recovery of costs.
- 19 • Customers receive greater stability in the non-gas portion of their utility bills, a
20 benefit during the winter months when gas prices tend to be at their highest, and a
21 particular benefit for low-income customers with high bills during the lengthy
22 heating seasons in National Fuel's service areas.
23

24 For these reasons, I urge the Commission to approve the Company's proposed WNA
25 mechanism.
26

27 **Q. Does this conclude your prefiled direct testimony?**

28 A. Yes, although I reserve the right to supplement or amend my testimony before or during
29 the Commission's hearing in this proceeding.

NATIONAL FUEL EXHIBIT JDT-1

JOHN D. TAYLOR RESUME

John D. Taylor

Managing Partner

Mr. Taylor has experience with a wide range of costing, ratemaking, and regulatory activities for gas and electric utilities. He has testified numerous times on these and other issues for clients across North America. He has extensive experience with costing and pricing rates and services, regulatory planning and strategy development, revenue recovery and tracking mechanisms, merger and acquisitions analysis, new product and service development, affiliate transaction reviews, line extension policies, market assessments, litigation support, and organizational and operations reviews. He has testified on numerous occasions as an expert witness on costing and ratemaking related issues on behalf of utilities before federal, state, and provincial regulatory bodies and has extensive experience in evaluating and implementing innovative ratemaking approaches and rate design concepts.

He has also testified on return on equity, electric vehicle and battery storage programs, time-of-use rates, and the appropriate use of statistical analysis during audit testing. Mr. Taylor has led engagements relating to gas supply planning and the review of midstream transportation and storage capacity resources. He has worked as the market monitor for New England ISO's capacity market, supported the negotiation of PPAs, and supported feasibility and prudence studies of generation investments. He has also been involved in selling generating assets and distribution companies, supporting due diligence efforts, financial analyses, and regulatory approval processes.

Mr. Taylor received a master's degree in Economics from American University and holds a bachelor's degree in Environmental Economics from the University of North Carolina at Asheville.

His consulting career includes Managing Partner with Atrium Economics, LLC; Principal Consultant – Advisory & Planning with Black & Veatch Management Consulting, LLC; Senior Project Manager & Principal of Concentric Energy Advisors, Inc.; and CEO of Nova Data Testing, Inc. Mr. Taylor started his career working on Capitol Hill working with NGOs that were seeking Public Private Partnerships with the Federal Government, World Bank, and International Monetary Fund to pursue various projects in developing countries.

REPRESENTATIVE EXPERIENCE

Rate Design and Regulatory Proceedings

Mr. Taylor has worked on dozens of electric and gas rate cases including the development of revenue requirements, class cost of service studies, and projects related to utility rate design issues.

Specifically, he has:

- Lead expert and witness for class costs of service studies across North America and worked on dozens of other class cost of service and rate design projects for other lead witnesses.
- Developed WNA mechanism for a gas utility including back casting results and supporting expert witness testimony and exhibits.
- Developed revenue requirement model to comply with a new performance-based formula ratemaking process for a Midwest electric utility.
- Supported the developed of time of use rates, demand rates, economic development rates, load retention rates, and line extension policies.
- Analyzed and summarized allocation methodology for a shared services company.
- Assessed the reasonableness of costs through various benchmarking efforts.
- Led the effort to collect and organize plant addition documentation for six Midwest utilities associated with the state commission's audit of rate base.
- Supported lead-lag analyses and testimonies.
- Analyzed customer usage profiles to support reclassification of rate classes for a gas utility.
- Helped conduct a marginal cost analysis to support rate design testimony.

Litigation Support and Expert Testimony

Mr. Taylor has testified in several cases on class cost of service studies and statistical audit methods. He has also supported numerous other expert testimonies. Specifically, he has:

- Filed testimony as an expert witness on allocated class cost of service studies for both electric and gas utilities.
- Filed testimony as an expert witness on the application of statistical analysis.
- Filed testimony before FERC on the rate of return for an Annual Transmission Revenue Requirement and participated in FERC settlement conferences.
- Part of two-person expert witness team that provided an expert report to the British Columbia Utilities Commission on the use of facilities for transportation balancing services for Fortis BC.
- Part of two-person expert witness team that provided an expert report on affiliate transactions and capitalized overhead allocations for Hydro One on three separate occasions.
- Sole expert for expert report on affiliate allocations for Alectra utilities, the second largest publicly owned electric utility in North America. This was conducted shortly after the merger of four distinct utilities.
- Sole expert for expert report on the allocation of overhead costs between transmission and distribution businesses for EPCOR.

Transaction Experience

Mr. Taylor has been involved with several generating asset transactions supporting both buy side and sell side analysis and due diligence. His work has included:

- Worked as buy side advisor for a large water utility in the mid-Atlantic region including supporting the review of revenue requirements, rates, and forecasts.
- Helped facilitate and manage processes for a nuclear plant auction by processing Q&A, collecting relevant documentation and managing the virtual data room for auction participants.
- Supported the auction process for steam and chilled water distribution and generation assets in the Midwest.
- Supported the development of a financial model to ascertain the net present value of several competing wholesale power purchase agreements and guided the client with a decision matrix for the qualitative aspects of the offers.
- Provided research on comparable transactions, previous mergers and acquisitions, and potential transaction opportunities for several clients.

Financial Analysis and Market Research

Other financial analysis and market research Mr. Taylor has conducted include:

- Estimated the rate impact and costs associated with moving California energy market to 100% renewable.
- Assessed the consequences of a divestiture on the cost of service model for a New England gas distribution company.
- Developed LNG market studies for two separate utilities and two separate competitive market participants.
- Modeling alternative mechanisms for the allocation of overhead costs to a nuclear plant.

National Fuel Gas Distribution Corporation
Capitalization and Financial Statistics
2017-2021, Inclusive

Notes:

- (1) Excluding Accumulated Other Comprehensive Income (“OCI”) from the equity account.
- (2) Total operating expenses, maintenance, depreciation and taxes other than income as a percentage of operating revenues.
- (3) Coverage calculations represent the number of times available earnings, both including and excluding AFUDC (allowance for funds used during construction) as reported in its entirety, cover fixed charges.
- (4) Internal cash generation/gross construction is the percentage of gross construction expenditures provided by internally-generated funds from operations after payment of all cash dividends divided by gross construction expenditures.
- (5) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less AFUDC) as a percentage of average total debt.
- (6) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less total AFUDC) plus interest charges, divided by interest charges.
- (7) Common dividend coverage is the relationship of internally-generated funds from operations after payment of preferred stock dividends to common dividends paid.

Gas Group
Capitalization and Financial Statistics
2017-2021, Inclusive

Notes:

- (1) All capitalization and financial statistics for the group are the arithmetic average of the achieved results for each individual company in the group.
- (2) Excluding Accumulated Other Comprehensive Income ("OCI") from the equity account.
- (3) Total operating expenses, maintenance, depreciation and taxes other than income taxes as a percent of operating revenues.
- (4) Coverage calculations represent the number of times available earnings, both including and excluding AFUDC (allowance for funds used during construction) as reported in its entirety, cover fixed charges.
- (5) Internal cash generation/gross construction is the percentage of gross construction expenditures provided by internally-generated funds from operations after payment of all cash dividends divided by gross construction expenditures.
- (6) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less total AFUDC) plus interest charges, divided by interest charges.
- (7) Gross Cash Flow plus interest charges divided by interest charges.
- (8) Common dividend coverage is the relationship of internally-generated funds from operations after payment of preferred stock dividends to common dividends paid.

Basis of Selection:

The Gas Group includes companies that are contained in The Value Line Investment Survey within the industry group "Natural Gas Utility," they are not currently the target of a publicly-announced merger or acquisition (i.e., South Jersey Industries), and after eliminating UGI Corp. due to its highly diversified businesses.

6	1.17	14.81%	9.79%	8.14%	1.66%
7	1.25	15.41%	10.39%	8.67%	1.72%
8	1.30	16.14%	11.12%	9.04%	2.08%
9	1.34	16.97%	11.96%	9.28%	2.68%
10-Smallest	1.39	20.27%	15.25%	9.66%	5.59%

Betas are estimated from monthly returns in excess of the 30-day U.S. Treasury bill total return, January 1926–December 2016. Historical riskless rate measured by the 91-year arithmetic mean income return component of 20-year government bonds (5.02%). Calculated in the context of the CAPM by multiplying the equity risk premium by beta. The equity risk premium is estimated by the arithmetic mean total return of the S&P 500 (11.95%) minus the arithmetic mean income return component of 20-year government bonds (5.02%) from 1926–2016. Comparable Earnings Approach
Screening Parameters

Timeliness Rank

The rank for a stock's probable relative market performance in the year ahead. Stocks ranked 1 (Highest) or 2 (Above Average) are likely to outpace the year-ahead market. Those ranked 4 (Below Average) or 5 (Lowest) are not expected to outperform most stocks over the next 12 months. Stocks ranked 3 (Average) will probably advance or decline with the market in the year ahead. Investors should try to limit purchases to stocks ranked 1 (Highest) or 2 (Above Average) for Timeliness.

Safety Rank

A measure of potential risk associated with individual common stocks rather than large diversified portfolios (for which Beta is good risk measure). Safety is based on the stability of price, which includes sensitivity to the market (see Beta) as well as the stock's inherent volatility, adjusted for trend and other factors including company size, the penetration of its markets, product market volatility, the degree of financial leverage, the earnings quality, and the overall condition of the balance sheet. Safety Ranks range from 1 (Highest) to 5 (Lowest). Conservative investors should try to limit purchases to equities ranked 1 (Highest) or 2 (Above Average) for Safety.

Financial Strength

The financial strength of each of the more than 1,600 companies in the VS II data base is rated relative to all the others. The ratings range from A++ to C in nine steps. (For screening purposes, think of an A rating as "greater than" a B). Companies that have the best relative financial strength are given an A++ rating, indicating ability to weather hard times better than the vast majority of other companies. Those who don't quite merit the top rating are given an A+ grade, and so on. A rating as low as C++ is considered satisfactory. A rating of C+ is well below average, and C is reserved for companies with very serious financial problems. The ratings are based upon a computer analysis of a number of key variables that determine (a) financial leverage, (b) business risk, and (c) company size, plus the judgment of Value Line's analysts and senior editors regarding factors that cannot be quantified across-the-board for companies. The primary variables that are indexed and studied include equity coverage of debt, equity coverage of intangibles, "quick ratio", accounting methods, variability of return, fixed charge coverage, stock price stability, and company size.

Price Stability Index

An index based upon a ranking of the weekly percent changes in the price of the stock over the last five years. The lower the standard deviation of the changes, the more stable the stock. Stocks ranking in the top 5% (lowest standard deviations) carry a Price Stability Index of 100; the next 5%, 95; and so on down to 5. One standard deviation is the range around the average weekly percent change in the price that encompasses about two thirds of all the weekly percent change figures over the last five years. When the range is wide, the standard deviation is high and the stock's Price Stability Index is low.

Beta

A measure of the sensitivity of the stock's price to overall fluctuations in the New York Stock Exchange Composite Average. A Beta of 1.50 indicates that a stock tends to rise (or fall) 50% more than the New York Stock Exchange Composite Average. Use Beta to measure the stock market risk inherent in any diversified portfolio of, say, 15 or more companies. Otherwise, use the Safety Rank, which measures total risk inherent in an equity, including that portion attributable to market fluctuations. Beta is derived from a least squares regression analysis between weekly percent changes in the price of a stock and weekly percent changes in the NYSE Average over a period of five years. In the case of shorter price histories, a smaller time period is used, but two years is the minimum. The Betas are periodically adjusted for their long-term tendency to regress toward 1.00.

Technical Rank

A prediction of relative price movement, primarily over the next three to six months. It is a function of price action relative to all stocks followed by Value Line. Stocks ranked 1 (Highest) or 2 (Above Average) are likely to outpace the market. Those ranked 4 (Below Average) or 5 (Lowest) are not expected to outperform most stocks over the next six months. Stocks ranked 3 (Average) will probably advance or decline with the market. Investors should use the Technical and Timeliness Ranks as complements to one another.

I. INTRODUCTION

The purpose of this document is to discuss the development and results of the Cost of Service Study (“COSS”) model and related schedules prepared for National Fuel Gas Distribution Corporation (“National Fuel” or the “Company”) based on the Fully Projected Future Test Year ended July 31, 2024 (“FPFTY”).

The document is organized into three sections. The first section discusses the purpose of cost allocation and includes an overview of Atrium’s COSS model used to develop the cost allocation study. The second section, National Fuel Cost of Service Procedures, includes details of the methodologies adopted in the development of the study. The last section exhibits the results of the cost of service allocation.

1. Purpose of Cost Allocation

The purpose of COSS is to determine the cost of service responsibilities of each customer class upon which the base rates may be established. The revenue requirement studies provide the overall level of costs of providing service, while the COSS is used to change the basic rate structures and/or the relative overall cost responsibility of each customer class. Based on the functionalization and classification of costs and allocation methodologies used in the COSS, the revenue requirement by customer class is determined and used in designing the Company’s proposed base rates. In other words, the COSS measures each class’s contribution to the Company’s overall cost of service. Comparing the costs to serve any customer class with that class’s rate revenues provides a measure of the return realized from that class and their associated revenue-to-cost ratio. This allows for a comparison across classes to ascertain the presence and extent of interclass subsidization (i.e., when one class pays more than its cost to serve and another pays less than its cost to serve).

2. COSS Procedures

Cost of service studies utilize a three-step process: functionalization, classification, and allocation.

In the first step, the functionalization sets off with assigning the Federal Energy Regulatory Commission (“FERC”) plant accounts and associated investment balances to appropriate cost of service functions. The expenses related to particular property investments or groups of investments can often follow the same functionalization and are allocated based on the ratios of gas plant assigned to each function. These plant ratios can be used to functionalize most other cost items.

In the second step, classification, each functional cost category is further separated by cost causation. There are three basic cost-defining characteristics of gas services: demand, commodity, and customer.

- Demand (Capacity) related costs are associated with the peak usage of the utility system. These costs are necessary to maintain the system at a level sufficient to satisfy the greatest demand that all the customers could place upon the system.
- Commodity-related costs are variable costs that vary with the quantity of gas used. These costs reflect the number of units consumed or supplied during a period of time.

- Customer-related costs are associated with serving customers regardless of their usage or demand characteristics. They are allocated directly to the customers of a particular class of service.

The last step is to allocate these cost components among customer classes. An analysis of the utility's records may indicate specific costs that should be assigned directly to a particular customer class, including plant investments and associated expenses. All the remaining costs that cannot be directly attributable to a specific group of customers are allocated using allocation factors.

[3. Atrium Economics Cost of Service Study Model Overview](#)

The Cost of Service Study is submitted in support of the direct testimony of John D. Taylor in Exhibit D. The COSS model presented in this proceeding is an excel based model that allows the user to modify various inputs and assumptions.

[COSS Model Capabilities](#)

The Atrium Economics' COSS model provides a large range of analytical capabilities including:

- Unbundling of operations into functions: (i.e. production/supply, storage, transmission, distribution, metering, and billing services.)
- Classification and allocation of costs into customer classes.
- Reports on Rate of Return, Revenue Requirement, and Revenue-to-Cost ratio for each function and rate class.
- Development of unit costs of each functional classification for each rate class.
- Specification of the individual rate of return targets for each function or customer class.
- Provides detailed analyses of costs of gas, income taxes, working capital, depreciation reserve, and depreciation expenses.
- Use of detailed analysis of labor expenses by account to facilitate the analyses of administrative and general expenses and overhead costs.
- Facilitation of direct assignment of plant investment, expenses, and revenue dollars to individual functions, classifications, or customer classes.

[Follows Traditional 3-Step Allocation](#)

The Atrium COSS Model follows the standard three-step analysis process: 1) functionalization of rate base and expenses into various functional categories; 2) classification of functionalized components into demand, energy/commodity, and customer cost categories; and 3) allocation of each component among the customer classes.

As part of the functionalization process, accounts for common costs that are not specifically related to the primary functions, such as general plant and administrative and general expenses, are automatically allocated to the proper function based on internally defined allocation factors. All components of the utility's total cost of service are grouped into one of the functions.

The Atrium COSS Model provides unbundled functionalized and classified cost information by customer class; develops unbundled revenue requirements by functional classification for each

customer class; and calculates unit costs by function for customer, commodity, and demand categories. Accounting costs are reported by the FERC account level, and the allocation of A&G expenses, general taxes, and income taxes are clearly reported.

Revenue requirements are calculated from the allocated rate base and expenses and are adjusted to reflect the user-determined target rate of return and statutory tax adjustments. The actual revenues collected are compared to the calculated cost-based revenue requirements to determine class-specific, revenue-to-cost ratios to assist in revenue allocation and pricing activities.

Unit Cost Output Functionality

The COSS model calculates the unit cost of each functional classification separately for each rate class based on the user-specified billing determinants. These unit cost data are among the most important outputs from an embedded cost of service analysis. They are defined as the average cost of providing service to customers per measure of service (i.e., per therm, per dekatherm of daily demand, and per customer). Unit costs are a key consideration in developing prices for bundled, unbundled, and re-bundled services.

Acceptance by Utility Regulatory Commissions

The format and presentation of the model's outputs have been used in many rate case proceedings and conform to standard utility commission requirements. Where necessary the COSS model outputs can be easily modified to meet specific jurisdictional filing requirements.

II. NATIONAL FUEL'S COST OF SERVICE PROCEDURES

1. Functionalization

The following functional cost categories were identified for purposes of National Fuel's cost allocation:

- Gas Supply
- Production
- Transmission
- Distribution
- Customer

National Fuel's assigned functional categories are presented on Schedule 1.

2. Classification

The following classification categories were identified for purposes of National Fuel's cost allocation:

- Commodity
- Demand
- Customer

National Fuel's assigned classification categories are presented on Schedule 1.

3. Allocation

The allocation step involves assigning classified costs to the customer classes based on cost causation. Therefore, the allocation of costs is usually based on some measure of class loads or class service characteristics. The External and Internal Allocation Factors are utilized to allocate costs among various customer classes. National Fuel's assigned Allocation Factors are presented on Schedule 1.

3.1. Customer Classes and Tariff Schedules

The following customer classes were identified for purposes of cost allocation:

- Residential Service
- Small Commercial & PA Service (LE 250)
- Small Commercial & PA Service (GT 250)
- Large Comm PA Service
- Natural Gas Vehicles ("NGV")
- Small Volume Industrial Service ("SVIS")
- Intermediate Volume Industrial Service ("IVIS")
- Large Volume Industrial Service ("LVIS")
- Large Industrial Service ("LIS")

3.2. External Allocation Factors

National Fuel's External Allocation Factors are presented on Schedule 2. The External Allocation Factors are developed based on the special studies conducted using various detailed data.

Commodity and Revenue Allocation Factors

Costs classified as "Commodity" are allocated among customer classes based on the weather-normalized volumes for the test year.

SALES_COM – Factor developed to directly assign Weather Normalized Volumes/Throughput to the specific class in the FPPTY, based on sales customers' volumes.

INCR_WNTR – Factor used to allocate base storage gas and calculated by taking the difference between average winter daily volumes and average summer daily volumes for sales customers.

GASCOST – Factor developed to directly assign associated gas costs and revenues to the specific class in the FPPTY.

REV – Factor developed to directly assign associated current base rate revenues to the specific class in the FPPTY.

REV_DSCNT – Factor derived to allocate forfeited discounts to the specific class.

Customer Allocation Factors

Customer-related costs are generally allocated based on the number of customers within each class of service, with appropriate weighting to recognize specific service characteristics.

CUST – Factor based on the average number of customers per customer class in the FPFTY.

MTRS – Factor based on the weighted customer unit cost of meters used to serve gas customers in different rate classes. The analysis relies upon the Company's records, which provide an inventory of each type and size of meter for a specific rate schedule, and the records of FERC Account 381 investment balances. The original cost data was restated in terms of current cost using Handy-Whitman indices for meters to determine current unit cost. Next, the derived average meter current cost was linked to the meter records dataset to develop the total current cost of the investment for each customer class. Then the relative customer class unit cost was developed and multiplied by the forecasted customer count for each customer class.

M&R – The Company's property records were used to directly assign investment of FERC Account 385 to the appropriate customer classifications. The factor was derived based on the allocated historical investment cost.

SERV – The analysis relies upon the data contained in the Company's property records which provide an inventory and original cost of the service lines, and additional distribution records that provide data on customer classes and service lines by diameter. The method employed to develop the service allocator was similar to that used for the meter allocator.

ACT 904 – Uncollectible Account - The factor is based on the statistics related to uncollectable accounts for the calendar year 2021.

DEMAND ALLOCATION FACTORS

DEMAND (PDAY) – The factor is based on Peak Day capacity demand throughput for each customer class.

PEAK_AVRG – The factor is based on the weighting of the factors derived from average weather normalized throughput volumes (COM) and from the Peak Day capacity demand factor (PDAY) for each customer class.

CUST DEMAND – The composite factor is based on the CUST and DEMAND factors prorated to the customer and demand components determined in Mains Analysis.

Mains Analysis

The allocation of investment in facilities serving a distribution function should recognize that the cost of these facilities is driven by two principal factors. First is the cost of extending the system to connect individual customers. Second is the cost associated with the capacity requirements of the customers connected.

There are two widely accepted methods for the classification of mains between customer-related costs and demand-related costs. The two methods are the Minimum System Method and the Zero

Intercept Method, both relying on the Company’s property record data to determine the cost of pipe by size and type. The unit cost for pipe in any year is determined by dividing the booked costs by the amount of pipe installed in a standard unit of measurement. A variety of factors, such as the length of pipe installed, location, installation conditions, etc., cause the annual unit cost of pipe by size and type to vary significantly. Thus, a simple average of the yearly costs is not adequate for a determination of the cost for each size of the pipe as it will not reflect a consistent set of data. Therefore, the original cost data was restated in terms of current cost using the Handy-Whitman index.

Minimum System Study:

The minimum system study is based on a selected minimum plastic pipe size of 2” and minimum steel pipe size of 2” and associated current unit cost to determine a minimum system cost over the total system cost as depicted below.

Minimum System Summary

Material	Quantity	Cost 2022	Minimum Size Cost (2022)	Customer Component	Customer Component Percentage
Plastic	16,362,687	\$526,449,783	\$24.36	\$398,640,355	75.7%
Steel	7,811,920	\$549,411,226	\$34.85	\$272,275,429	49.6%
Total	24,174,607	\$1,075,861,008		\$670,915,784	62.4%

Zero Intercept Study:

The zero intercept study was performed using a Weighted Linear Regression on the cost per foot by pipe diameter. Based on this relationship, the study estimates the cost of installing a hypothetical pipe with zero capacity, which is where the estimated diameter is zero (i.e., the zero-intercept). The zero-intercept determined value is then multiplied by all quantities of distribution mains currently installed by the utility to arrive at a total minimum system cost. Total minimum system cost divided by total system cost derives the portion of the system that is considered a fixed investment and is classified as customer-related.

Zero-Intercept Summary

Material	Quantity	Cost 2022	Zero-Intercept Cost (2022)	Customer Component	Customer Component Percentage
Plastic	16,362,687	\$ 526,449,783	\$ 21.07	\$ 344,745,446	65.5%
Steel	7,811,920	\$ 549,411,226	\$ 39.76	\$ 310,578,499	56.5%
Total	24,174,607	\$ 1,075,861,008		\$ 655,323,946	60.9%

The distribution main investment is functionalized to distribution, classified based on the results of the zero-intercept study to demand (39.1%) and customer (60.9%). The demand component of the mains investment is allocated based on each class’ allocation of peak day. The customer component of the mains investment is allocated based on each class’ number of customers.

3.3.Internal Allocation Factors

Internal Allocation Factors are developed within the COSS model based on the cost ratios of allocated cost using the external allocation factors.

INT_RATEBASE – Total Rate Base – The factor is based on the derived rate base by customer class.

INT_REV_REQ – Total Revenue Requirement – The factor is based on the derived revenue requirement by customer class.

INT_REQ_INCOME – Required Return on Rate Base – The factor is based on the derived customer class required return on the rate base.

INT_TOTPLT – Production Plant Total - The factor is based on the allocated total plant balance by customer class.

INT_PRODPT – Total Plant - The factor is based on the allocated Production plant balance by customer class.

INT_PROD_TRANSM_DIST_SUBTOTAL – Production, Transmission, and Distribution Plant Total- The factor is based on the allocated Production, Transmission, and Distribution plant balance by customer class.

INT_DIST_SUBTOTAL – Distribution Plant Subtotal – The factor is based on the allocated Distribution plant balance by customer class excluding FERC Account 375, Structures and Improvements.

INT_DISTPT – Distribution Plant Total – The factor is based on the allocated total Distribution plant balance by customer class.

INT_DMANS_SERV – Distribution Plant Mains and Services – The factor is based on the allocated plant balances by customer class of FERC Accounts 376 and 380, Mains and Services.

INT_GENPLT – General Plant Total – The factor is based on the allocated total General plant balance by customer class.

INT_TRANSPT – Transmission Plant Total – The factor is based on the allocated total Transmission plant balance by customer class.

INT_CUSTACC – Customer Account – The factor is based on the total customer class allocated Customer Account expenses excluding FERC Account 901 and 905, Supervision and Miscellaneous Customer Accounts expenses.

INT_OM_DIST_SUBTOTAL – Distribution Operation and Maintenance Expense Subtotal – The factor is based on the total customer class allocated Distribution Operation and Maintenance Expenses, excluding FERC Accounts 870,880,881,885, and 894, Operation supervision and engineering, Other Expenses, Rents, Maintenance Supervision and Engineering, and Maintenance of other Equipment.

INT_OM_Excl_A&G – Operation and Maintenance Expense excluding Administrative and General Expenses – The factor is based on the total customer class allocated Operation and Maintenance Expenses, excluding Administrative and General Expenses.

INT_OML – Operation and Maintenance Labor Expense Total – The factor is based on the total customer class allocated labor-related Operation and Maintenance Expenses.

INT_DIST_OL - Distribution related Operation Labor Expense subtotal - The factor is based on the customer class allocated Distribution labor-related Operation and Maintenance Expenses

INT_DIST_ML - Distribution related Maintenance Labor Expense subtotal - The factor is based on the customer class allocated Distribution labor-related Maintenance Expenses.

Attention Brian M. Welsch
Assistant Vice President

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant as of July 31, 2024. The results of our study as of June 30, 2023 are presented in our report titled "2023 Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant as of June 30, 2023". The same methods, procedures and estimates are used in both studies.

Summaries of the original cost, annual accruals, book depreciation reserve and amortization of net salvage are presented in Tables 1 through 4, beginning on page I-3 of the attached report.

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

PART I. RESULTS OF STUDY

NATIONAL FUEL GAS DISTRIBUTION CORPORATION
PENNSYLVANIA DIVISION
DEPRECIATION STUDY

PART I. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages I-3 through I-7 summarize the results of the depreciation study as of July 31, 2024. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of July 31, 2024, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to July 31, 2024. Table 3 sets forth the calculations of the depreciation accruals for the thirteen months ended July 31, 2024. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2019 through 2023.

DESCRIPTION OF DETAILED TABULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on page II-7. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2019 through 2023, beginning on pages III-2 through III-4.

Attention Brian M. Welsch
Assistant Vice President

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant in service. The results of our study as of June 30, 2023 are presented in the attached report. The results of our study as of June 30, 2022 are presented in our report titled "2022 Depreciation Study- Calculated Annual Depreciation Accruals Related to Gas Plant as of June 30, 2022". The same methods, procedures and estimates are used in both studies.

The attached report sets forth a description of the methods and procedures upon which the studies were based, the estimates of survivor curves and the calculated annual depreciation rates as of June 30, 2023.

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

PART I. INTRODUCTION

NATIONAL FUEL GAS DISTRIBUTION CORPORATION
PENNSYLVANIA DIVISION
DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study conducted for National Fuel Gas Distribution Corporation – Pennsylvania Division to determine the annual depreciation accrual rates and amounts for ratemaking purposes applicable to the original cost of gas plant as of June 30, 2023.

The depreciation accrual rates and amounts presented herein are based on estimated survivor curves and on methods and procedures set forth in previous orders approved by the Pennsylvania Public Utility Commission. The estimated survivor curves presented herein were based on the results of a service life study incorporating statistical analyses of data through 2017.

BASIS OF STUDY

Depreciation and Amortization

Depreciation, as defined in the Uniform System of Accounts, is the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

Depreciation, as used in accounting, is a method of distributing fixed capital costs over a period of time by allocating annual amounts to expense. Each annual amount of such depreciation expense is part of that year's total cost of providing utility service.

Normally, the period of time over which the fixed capital cost is allocated to the cost of service is equal to the period of time over which an item renders service, that is, the item's service life. The most prevalent method of allocation is to distribute an equal amount of cost to each year of service life. This method is known as the straight line method of depreciation.

The calculation of annual and accrued depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. These subjects are discussed in the sections which follow.

For most plant accounts, depreciation accruals and accrued depreciation were calculated using the straight line method, the remaining life basis, the average service life (ASL) procedure for plant installed prior to 1982 and the equal life group (ELG) procedure for 1982 and subsequent vintages. The calculations were based on the attained ages and estimated service life characteristics for each depreciable group of gas property. For certain general plant accounts, the amortization amounts, annual and accrued, were based on the age of the vintage and the selected amortization period.

Survivor curves were used to reflect the expected dispersion of retirements, thus providing a consistent method of estimating service lives and depreciation for mass property. Iowa type curves were used to depict the estimated survivor curves. For life span groups, the estimate of life characteristics is consistent because the calculated lives of the units within a group are obtained by employing a single probable retirement date for the entire group.

Service Life Estimates

The method of estimating service life consisted of compiling the service life history of the plant accounts, subaccounts or depreciable groups, reducing this history to trends through the use of acceptable actuarial techniques, and forecasting the trend of survivors for each depreciable group on the basis of interpretations of past trends and consideration of Company plans for the future. The combination of the historical trend and the estimated

future trend yielded a complete pattern of life characteristics from which the average service life was derived.

The Company's service life estimates used in the depreciation calculation incorporated historical data compiled through 2017 from the property records of the Company. Such data included plant additions, retirements, transfers and other activity. The period of experience studied and the method of historical analysis used for each group depended upon the availability of data from the Company's records.

A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirement was obtained through field trips conducted during the course of the service life study. Discussions with operating and management personnel also provided information regarding plans for the future which were incorporated in the interpretation and extrapolation of the statistical analyses.

AMORTIZATION OF NET SALVAGE

Inasmuch as this report relates primarily to Pennsylvania rate regulation practices, under which experienced costs of negative net salvage are amortized after their occurrence, no adjustments for expected salvage were made to either the annual depreciation accrual or the calculated accrued depreciation for the individual accounts. The annual provision for recovering negative net salvage is based on the amortization of net salvage over a five-year period, as established in the Stipulation and Commission order at Docket No. R-832469.

PART II. ESTIMATION OF SURVIVOR CURVES

PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below and the development of net salvage is discussed in later sections of this report.

SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of Iowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

Iowa Type Curves

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type curves. There are four families in the Iowa system, labeled in accordance with the location of the modes of the retirements (or the portion of the frequency curve with the highest level of retirements) in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family. A higher number designates a higher mode curve.

The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves, which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125.

FIGURE 1. TYPICAL SURVIVOR CURVE AND DERIVED CURVES

FIGURE 2. LEFT MODAL OR "L" IOWA TYPE SURVIVOR CURVES

FIGURE 3. SYMMETRICAL OR "S" IOWA TYPE SURVIVOR CURVES

FIGURE 4. RIGHT MODAL OR "R" IOWA TYPE SURVIVOR CURVES

FIGURE 5. ORIGIN MODAL OR "O" IOWA TYPE SURVIVOR CURVES

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."¹ In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements,"² "Engineering Valuation and Depreciation,"³ and "Depreciation Systems."⁴

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

Schedules of Annual Transactions in Plant Records

The property group used to illustrate the retirement rate method is observed for the experience band 2012-2021 for which there were placements during the years 2007-2021. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, \$10,000 of the dollars invested in 2007 were retired in 2012. The \$10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of \$143,000 retired for age interval 4½-5½ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2012 retirements of 2007 installations and ending with the 2021 retirements of the 2016 installations. Thus, the total amount of 143 for age interval 4½-5½ equals the sum of:

$$10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20.$$

^a Transfer Affecting Exposures at Beginning of Year

^b Transfer Affecting Exposures at End of Year

^c Sale with Continued Use

Parentheses Denote Credit Amount.

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

Schedule of Plant Exposed to Retirement

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2012 through 2021 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or addition are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2017 are calculated in the following manner:

Exposures at age 0	= amount of addition	= \$750,000
Exposures at age ½	= \$750,000 - \$ 8,000	= \$742,000
Exposures at age 1½	= \$742,000 - \$18,000	= \$724,000
Exposures at age 2½	= \$724,000 - \$20,000 - \$19,000	= \$685,000
Exposures at age 3½	= \$685,000 - \$22,000	= \$663,000

SCHEDULE 3. PLANT EXPOSED TO RETIREMENT
JANUARY 1 OF EACH YEAR 2012-2021
SUMMARIZED BY AGE INTERVAL

Year Placed	Exposures, Thousands of Dollars										Total at		Age Interval
	Annual Survivors at the Beginning of the Year										Beginning of		
	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Age Interval	Age Interval

^aAdditions during the year

Experience Band 2012-2021

Placement Band 2007-2021

For the entire experience band 2012-2021, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval 4½-5½, is obtained by summing:

$$255 + 268 + 284 + 311 + 334 + 374 + 405 + 448 + 501 + 609.$$

Original Life Table

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½	=	88.15	
Exposures at age 4½	=	3,789,000	
Retirements from age 4½ to 5½	=	143,000	
Retirement Ratio	=	143,000 ÷ 3,789,000	= 0.0377
Survivor Ratio	=	1.000 - 0.0377	= 0.9623
Percent surviving at age 5½	=	(88.15) x (0.9623)	= 84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE
CALCULATED BY THE RETIREMENT RATE METHOD

Experience Band 2012-2021

Placement Band 2007-2021

(Exposure and Retirement Amounts are in Thousands of Dollars)

Age at Beginning of Interval	Exposures at Beginning of Age Interval	Retirements During Age Interval	Retirement Ratio	Survivor Ratio	Percent Surviving at Beginning of Age Interval
(1)	(2)	(3)	(4)	(5)	(6)
0.0	7,490	80	0.0107	0.9893	100.00
0.5	6,579	153	0.0233	0.9767	98.93

13.5	<u>167</u>	<u>26</u>	0.1557	0.8443	42.24
					35.66
Total	<u>44,780</u>	<u>1,606</u>			

Column 2 from Schedule 3, Column 12, Plant Exposed to Retirement.

Column 3 from Schedule 1, Column 12, Retirements for Each Year.

Column 4 = Column 3 Divided by Column 2.

Column 5 = 1.0000 Minus Column 4.

Column 6 = Column 5 Multiplied by Column 6 as of the Preceding Age Interval.

The original survivor curve is plotted from the original life table (column 6, Schedule 4). When the curve terminates at a percent surviving greater than zero, it is called a stub survivor curve. Survivor curves developed from retirement rate studies generally are stub curves.

Smoothing the Original Survivor Curve

The smoothing of the original survivor curve eliminates any irregularities and serves as the basis for the preliminary extrapolation to zero percent surviving of the original stub curve. Even if the original survivor curve is complete from 100% to zero percent, it is desirable to eliminate any irregularities, as there is still an extrapolation for the vintages which have not yet lived to the age at which the curve reaches zero percent. In this study, the smoothing of the original curve with established type curves was used to eliminate irregularities in the original curve.

The Iowa type curves are used in this study to smooth those original stub curves which are expressed as percents surviving at ages in years. Each original survivor curve was compared to the Iowa curves using visual and mathematical matching in order to determine the better fitting smooth curves. In Figures 6, 7, and 8, the original curve developed in Schedule 4 is compared with the L, S, and R Iowa type curves which most nearly fit the original survivor curve. In Figure 6, the L1 curve with an average life between 12 and 13 years appears to be the best fit. In Figure 7, the S0 type curve with a 12-year average life appears to be the best fit and appears to be better than the L1 fitting. In Figure 8, the R1 type curve with a 12-year average life appears to be the best fit and appears to be better than either the L1 or the S0.

In Figure 9, the three fittings, 12-L1, 12-S0 and 12-R1 are drawn for comparison purposes. It is probable that the 12-R1 Iowa curve would be selected as the most representative of the plotted survivor characteristics of the group.

PART III. SERVICE LIFE CONSIDERATIONS

PART III. SERVICE LIFE CONSIDERATIONS

Field Trips

In order to be familiar with the operation of the Company and observe representative portions of the plant, field trips have been conducted periodically. A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements are obtained during these field trips. This knowledge and information were incorporated in the interpretation and extrapolation of the statistical analyses.

The following is a list of the locations visited during the most recent trips.

April 25, 2018

- Erie Service Center
- Erie District Regulating Station 1030
- Erie District Regulating Station 36 (26th and Ash Streets)
- VA Hospital Meter Set
- Pittsburgh Avenue City Gate Station (ERE 64)
- Owl Creek FTE 386 Station
- Production Well Station MCE 2231
- Production Well Station MCE 4468

February 6 and 7, 2013

- Erie Service Center Complex
- Regulating Station #572
- City Mission Meter Set
- Erie Regulating Station #14D
- Erie Measuring Station #4463X
- Pittsburgh Gate Station
- IMR Meter Set #15151
- IMR Meter Set #15154
- MCE Regulating Station #2009

January 21 and 22, 2008

- Erie Service Center Complex
- 5th and Wayne Street Regulating Station
- 3rd and French Avenue Regulating Station #1009
- West County Service Center
- Warren Service Center
- Dalrymple Street Regulating Station
- Davey Hill Regulating Station
- Oil City-Franklin Service Center

Regulating Station T-2486
Merasol Industrial Meter Set
Rouseville #5 Regulating Station

October 8, 2002

Pittsburgh Avenue Gate Station
Oil Creek Station

Judgment

The survivor curve estimates were based on judgment which considered a number of factors. The primary factors were the statistical analyses of data; current Company policies and outlook as determined during the field trips and other discussions with management; current developments in the gas industry; and the survivor curve estimates from previous studies for the National Fuel Gas Distribution Corporation, its predecessor companies, and other gas companies.

For many plant accounts and subaccounts for which survivor curves were estimated, the statistical analyses resulted in good to excellent indications of the survivor patterns experienced. Generally, the statistical analyses were the primary bases for the estimates for the following accounts, although information external to the statistics contributed to the specific interpretations of those statistics in several cases.

328.00	Measuring and Regulating Station Structures
332.00	Field Lines
334.00	Measuring and Regulating Station Equipment
366.20	Measuring and Regulating Station Structures
366.30	Other Structures
367.10	Mains - Excl. Cathodic Protection
367.20/376.20	Mains - Cathodic Protection
369.00	Measuring and Regulating Station Equipment 1980 and Prior 1981 and Subsequent
375.00/390.00	Structures and Improvements - Service Centers
375.00/390.00	Structures and Improvements - Offices
375.00/390.00	Structures and Improvements - Small
376.10	Mains - Excl. Cathodic Protection
378.00	Measuring and Regulating Station Equipment
380.00	Services
381.00	Meters
382.00	Meter Installations
384.00	House Regulator Installations
385.00	Industrial Measuring and Regulating Station Equipment

Account 376.10, Mains - Excluding Cathodic Protection, is used to illustrate the manner in which the study was conducted for the groups in the preceding list. This account represents 44 percent of the total depreciable plant. Aged plant accounting data have been compiled for the years 1960 through 2017. These data have been coded according to account or property group, type of transaction, year in which the transaction took place, and year in which the gas plant was placed in service. The retirements, and other plant transactions, and plant additions were analyzed by the retirement rate method.

The 1960-2017 and 1983-2017 experience bands are most indicative of future expectations. Discussions with operating and managing personnel, as well as field observations related to reasons for retirement and the changing average service life, indicated that public authority requirements, leak detection programs and the use of plastic mains have become more significant in recent years. These factors are expected to continue into the future. The Iowa 69-L1.5 survivor curve is estimated to represent the future, inasmuch as it is a reasonable interpretation of the significant portion of the 1960-2017 and 1983-2017 experience, through age 105, and reflects the expectations of management.

For Account 375.30, a life span was estimated for each major structure. Each life span was estimated on the basis of type of construction, use, age, condition, and management's plans within the foreseeable future. Interim survivor curves were estimated for the major structures based primarily upon statistical analyses of the interim retirements that have been experienced by the Company's service centers and offices.

The historical analyses for Accounts 380.00, 382.00 and 384.00 were combined due to present Company policy to retire all three assets when replacing one of the property units. The estimate for cathodic protection equipment, anodes and rectifiers, is the 25-S2.5 and is based on historical indications, discussions with management and

estimates for such equipment in other gas companies. The survivor curve estimate for Account 325.40 was based on judgment incorporating the nature of the plant and estimates for the same account in other gas companies.

The estimate for the rights-of-way included in Accounts 365.20 and 374.20 were based on a review of the age and magnitude of experienced retirements and a consideration of the survivor curves estimated for Accounts 367.10, Mains - Excluding Cathodic Protection and Account 376.10, Mains - Excluding Cathodic Protection, with which the rights are associated. The rates of retirement have been small during the early portion of the life cycle and are of use only in defining the foreportion of the estimated survivor curve. The 80-R4 survivor curve is consistent between the estimated curve for the rights of way accounts.

**PART IV. CALCULATION OF ANNUAL AND
ACCRUED DEPRECIATION**

PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

Group Depreciation Procedures

A group procedure for depreciation is appropriate when considering more than a single item of property. Normally, the items within a group do not have identical service lives, but have lives that are dispersed over a range of time. There are two primary group procedures, namely, average service life and equal life group.

In the average service life procedure, the rate of annual depreciation is based on the average life or average remaining life of the group, and this rate is applied to the surviving balances of the group's cost. A characteristic of this procedure is that the cost of plant retired prior to average life is not fully recouped at the time of retirement, whereas the cost of plant retired subsequent to average life is more than fully recouped. Over the entire life cycle, the portion of cost not recouped prior to average life is balanced by the cost recouped subsequent to average life.

In the equal life group procedure, the property group is subdivided according to service life. That is, each equal life group includes that portion of the property which experiences the life of that specific group. The relative size of each equal life group is determined from the property's life dispersion curve. This procedure eliminates the need to base depreciation on average lives, inasmuch as each group is equivalent to a unit having a single life. The full costs of short-lived units are accrued during their lives, leaving no deferral of accruals required to be added to the annual costs associated with long-lived units. The calculated depreciation for the property group is the summation of the calculated depreciation based on the service life of each equal life group.

Remaining Life Annual Accruals

For the purpose of calculating remaining life accrual rates as of June 30, 2023, the estimated book depreciation reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation for the vintages calculated by the average service life procedure and for the vintages calculated by the equal life group procedure follow. The detailed calculations are set forth in the Results of Study section of the report.

Average Service Life Procedure

In the average service life procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life of the vintage. The average remaining life is a directly weighted average derived from the estimated future survivor curve in accordance with the average service life procedure.

The calculated accrued depreciation for each depreciable property group represents that portion of the depreciable cost of the group which would not be allocated to expense through future whole life depreciation accruals if current forecasts of life characteristics are used as the basis for such accruals. The accrued depreciation calculation consists of applying an appropriate ratio to the surviving original cost of each vintage of each account, based upon the attained age and service life. The straight line accrued depreciation ratios are calculated as follows for the average service life procedure:

$$\text{Ratio} = 1 - \frac{\text{Average Remaining Life Expectancy}}{\text{Average Service Life}}$$

Equal Life Group Procedure

In the equal life group procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the composite remaining life for the surviving original cost of that vintage. The composite remaining life is derived by compositing the individual equal life group remaining lives in accordance with the following equation:

$$\text{Composite Remaining Life} = \frac{\left(\frac{\text{Book Cost}}{\text{Life}} \times \text{Remaining Life} \right)}{\frac{\text{Book Cost}}{\text{Life}}}$$

The book costs and lives of the several equal life groups which are summed in the foregoing equation are defined by the estimated future survivor curve.

Inasmuch as book cost divided by life equals the whole life annual accrual, the foregoing equation reduces to the following form:

$$\text{Composite Remaining Life} = \frac{\sum \text{Whole Life Future Accruals}}{\sum \text{Whole Life Annual Accruals}}$$

or

$$\text{Composite Remaining Life} = \frac{\sum \text{Book Cost} - \text{Calc. Reserve}}{\sum \text{Whole Life Annual Accrual}}$$

The annual accrual rate for each account is equal to the sum of the remaining life annual accruals for all vintages divided by the account's total original cost. The account's "composite remaining life" is calculated by dividing the sum of the future book accruals for all vintages by the sum of the remaining life annual accruals for all vintages.

The calculated accrued depreciation in the equal life group procedure also represents that portion of depreciable cost which will not be allocated to expense through future accruals. However, the calculation is based at the equal life group level rather than

the vintage group level, and does not require the use of averages. The equal life group accrued depreciation ratio is calculated as follows:

$$\text{Ratio} = \frac{\text{Remaining Life}}{\text{Average Service Life}}$$

Inasmuch as service life minus remaining life equals age, when averages are not employed, the foregoing equation reduces to:

$$\text{Ratio} = \frac{\text{Age}}{\text{Service Life}}$$

The table on the following page illustrates the procedure for calculating straight line equal life group accrued depreciation, using an Iowa 25-S2.5 survivor curve and a June 30, 2022 calculation date.

In the table, each equal life group is defined by the age interval shown in columns 1 and 2, which identify the ages at which the first and last retirement of each group occur. The group's designated life, shown in column 3, is the midpoint of the interval. In the calculation, the equal life groups of each vintage are arranged such that the midpoint of each one-year age interval coincides with the calculation date, e.g., June 30 in this case. This enables the calculation of annual accruals which are centered on, or as of, the same date as the calculation of accrued depreciation.

The retirement during each age interval, shown in column 4, is the size of each equal life group. It is derived from the Iowa 25-S2.5 survivor curve, and is the difference between the percents surviving (not shown) at the beginning and end of the age interval.

Each equal life group's whole life annual accrual, shown in column 5, equals the group's size (column 4) divided by its life (column 3), except that for the first age interval the annual accrual is set equal to the group's size.

Columns 6 through 10 show the derivation of the whole life annual factor and accrued factor for each vintage, based on the data developed in the first five columns.

The year installed is shown in column 6. For all vintages other than 2022, the summation of annual accruals for each year installed, shown in column 7, is calculated by adding one-half of the group annual accrual (column 5) for that vintage's current age interval plus the group annual accruals for all succeeding age intervals. For example, the figure 4.41622974711 for 2021 equals one-half of 0.00027000000 plus all of the succeeding figures in column 5.

DETAILED COMPUTATION OF ANNUAL AND ACCRUED FACTORS USING THE EQUAL LIFE GROUP PROCEDURE

TOTAL				100.00000					

Only one-half of the annual accrual for the vintage's current age interval group is included in the summation because the equal life group for that interval has reached the year during which it is expected to be retired.

For vintage 2022, the summation of annual accruals (column 7) includes the entire group annual accrual (column 5) for that vintage's current age interval, in order to fully recoup the retirements which occur during that first age interval, 0 to 1. Thus, the first figure in column 7, for vintage 2022, equals the entire group annual accrual for the first equal group plus the accruals for all of the subsequent equal life groups.

The average percent surviving, derived from the Iowa 25-S2.5 survivor curve, is shown in column 8 for each age interval. The annual factor, shown in column 9, is the result of dividing the summation of annual accruals (column 7) by the average percent surviving (column 8).

The accrued depreciation factor, shown in column 10, equals the annual factor multiplied by the age of the group at June 30, 2022.

CALCULATION OF ANNUAL AND ACCRUED AMORTIZATION

Amortization, as defined in the Uniform System of Accounts, is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized. Normally, the distribution of the amount is in equal amounts to each year of the amortization period.

The calculation of annual and accrued amortization requires the selection of an amortization period. The amortization periods used in this report were based on judgment which incorporated a consideration of the period during which the assets will render most of their service, the amortization periods and service lives used by other

utilities, and the service life estimates previously used for the asset under depreciation accounting.

Amortization accounting is appropriate for certain General Plant accounts that represent numerous units of property, but a very small portion of depreciable gas plant in service. The accounts and their amortization periods are as follows:

	<u>Account</u>	<u>Amortization Period, Years</u>
391.00	Office Furniture and Equipment	
	Furniture	25
	Equipment	15
	Computers	5
394.00	Tools, Shop and Garage Equipment	25
397.00	Communication Equipment	10

For the purpose of calculating annual amortization amounts as of June 30, 2023, the book depreciation reserve for each plant account or subaccount is assigned or allocated to vintages. The book reserve assigned to vintages with an age greater than the amortization period is equal to the vintage's original cost. The remaining book reserve is allocated among vintages with an age less than the amortization period in proportion to the calculated accrued amortization. The calculated accrued amortization is equal to the original cost multiplied by the ratio of the vintage's age to its amortization period. The annual amortization amount is determined by dividing the future amortizations (original cost less allocated book reserve) by the remaining period of amortization for the vintage.

AMORTIZATION OF NET SALVAGE

Experienced net salvage is incorporated in the results of the study, as it was reported on the Company's books and records for the period January 1, 2018 through June 30, 2022. The data for the last six months of 2022 is based on estimated experience. Results of the calculations are shown in Table 4.

Net salvage experienced during the five-year period is presented in this manner to determine the amount of negative net salvage to be amortized for book purposes. In developing the amount to be amortized, the data for the accounts which experienced positive net salvage have been netted with those for accounts which experienced negative net salvage.

In order to be consistent with this manner of recognizing net salvage, no adjustments for salvage were made to the annual accruals and accrued depreciation calculated for each individual account. There were no exclusions from the 2018 through 2022 net salvage accrual.

PART V. RESULTS OF STUDY

PART V. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages V-4 through V-8 summarize the results of the depreciation study as of June 30, 2023. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of June 30, 2023, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to June 30, 2023. Table 3 sets forth the calculation of the depreciation accruals for the twelve months ended June 30, 2023. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2018 through 2022.

DESCRIPTION OF DETAILED TABULATIONS

Supporting statistical data for the estimates of average service lives and survivor curves, the annual depreciation calculations, and salvage and cost of removal for the years 2018-2022 are presented in three sections.

The section beginning on page VI-2 sets forth, for each depreciable group analyzed by the retirement rate method, a chart depicting the original and estimated survivor curves followed by a tabular presentation of the original life table(s) plotted on the chart. A cumulative summary, by year installed, for gas plant and the supporting data for the original cost depreciation calculations are presented in the section beginning on page VII-2. The tabulations of experienced and estimated net salvage by year by account for the five-year period, 2018-2022, are presented in the section beginning on page VIII-2.

In the first section, the survivor curves estimated for the depreciable groups are shown as dark smooth curves on the charts. Each smooth survivor curve is denoted by a numeral followed by the type curve designation. The numeral used is the average life

derived from the entire curve from 100 percent to zero percent surviving. In cases where only a segment of the estimated curve is used in the depreciation calculation, the numeral used for identification purposes is not a designation of the average life of the group. The titles of the charts indicate the group, the symbol used to plot the points of the original life table, and the experience and placement bands of the life tables which were plotted. The experience band indicates the range of years for which the retirements were used to develop the stub survivor curve. The placements indicate, for the related experience band, the range of years of installations which appear in the experience.

The tables of the calculated annual depreciation related to original cost are presented in the second section and indicate the estimated average survivor curves used in the calculations. The tables set forth, for each installation year, the original cost, calculated accrued depreciation, allocated book reserve, future book accruals, remaining life expectancy and the calculated annual accrual.

Detailed tabulations setting forth the cost of removal and gross salvage amounts, by plant account for each year, are presented beginning on page VIII-2. The total gross salvage and removal costs, by year, were used to calculate the five-year net salvage amortization presented in Table 4 on page V-8.

Attention Brian M. Welsch
Assistant Vice President

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant as of June 30, 2022. Summaries of the original cost, annual accruals and the book depreciation reserve are presented in Tables 1 and 2, beginning on page I-3 of the attached report.

A description of the methods and procedures upon which the study was based is set forth in a companion report, "2023 Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant as of June 30, 2023".

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

DEPRECIATION STUDY

PART I. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

The results of the depreciation study are summarized in Table 1, which sets forth the calculated annual depreciation related to Gas Plant in Service as of June 30, 2022. Table 2 presents the experienced gross salvage and cost of removal associated with regular retirements during the five-year period, 2017-2021 and the annual amortization of net salvage.

DETAILED TABULATIONS OF DEPRECIATION CALCULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on II-7. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2017 through 2021, beginning on beginning on pages III-2 through III-4.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED

1. RULES AND REGULATIONS

The customer's application for service, the Pennsylvania Public Utility Code and the rules and regulations promulgated by the Pennsylvania Public Utility Commission, as amended from time to time, and the rules and regulations contained herein are a part of the contract with each Customer, and each Customer agrees to be bound thereby.

2. APPLICATIONS FOR SERVICE

The Company may require any applicant for service to sign an application. Regardless of the manner in which an application is made, the acceptance of such application by the Company shall result in a contract service governed by Rule 1.

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES

A. Maximum Company Investment Level

The Company investment for upgrade/extension of facilities for a firm gas customer shall be limited to an amount determined as follows:

$$\text{Maximum Company Investment} = \frac{\text{Additional Annual Revenues} \times \text{Justified Company Investment per Dollar of Additional Annual Revenue}}{\text{Dollar of Additional Annual Revenue}}$$

B. Determination of Additional Annual Revenues

The Additional Annual Revenues are calculated as follows:

(1) The Company will estimate the customer's projected firm annual volumes as follows:

(a) Residential

For guideline purposes, the Company shall use annual gas consumption figures for gas space heating and for various gas appliances as shown below (These figures are based on current insulation standards as well as 92% efficient furnaces):

(C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES
(Cont'd)

Gas Space Heating:

Single Family Home - [(square footage x .029) - 5.4] Mcf
Apartment/Condominium - [(square footage x .024) + 3.14] Mcf
Manufactured Home - [(square footage x .0267) + 6.98] Mcf

Gas Appliances:

Gas Water Heater - 20.4 Mcf
Gas Dryer - 3.6 Mcf
Gas Range - 7.6 Mcf
Other Gas Appliances - Determined by the Company on a case-by-

case basis.

(b) Commercial or Public Authority: Industrial

The Company shall estimate projected firm annual volumes on a case-by-case basis.

(2) This annual volume is then distributed into 12 monthly amounts based on an average distribution in the appropriate revenue classification. (Alternatively, the customer's annual usage estimate may be distributed according to his own historic or projected monthly load profile pursuant to the Company's review and approval.)

(3) The appropriate rate schedule is applied to each monthly volume, and the results are added to produce annual gross revenues.

(4) For each monthly volume the costs shall be determined for the portion of monthly gross revenues for recovery of purchased gas costs pursuant to applicable provisions of Rider A to this tariff and the applicable rate schedule.

|
(C)
|

The portion of monthly gross revenues for recovery of Purchased Gas Costs and Transition Costs for each month shall be added together to produce annual revenues for recovery of Purchased Gas Costs and Transition Costs.

(5) The amount calculated under item (4) above, shall be subtracted from the amount calculated under item (3) above.

(6) Additional annual revenues resulting from the upgrade/extension shall be determined by reducing the annual revenues for recovery of non-gas costs as calculated in (5) above, by the customer's currently generated annual revenues for recovery of non-gas costs, if any, as determined by the Company.

(C) Indicates Change
(D) Indicates Decrease
(I) Indicates Increase

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES
(Cont'd)

C. Determination of Justified Company Investment Per Dollar of
Additional Annual Revenue

(1) Residential

The Justified Company Investment Per Dollar of Additional Annual Revenue for residential customers is \$4.58. (D)

(2) Commercial and Public Authority; Industrial

The Justified Company Investment Per Dollar of Additional Annual Revenue for commercial, public authority or industrial customers shall be selected from the table below based upon the projected term of use by the customer of the new or upgraded facilities.

<u>Projected Term of Use of New/Upgraded Facilities (Years)</u>	<u>Justified Company Investment Per Dollar of Additional Annual Revenue</u>
1	\$.47
2	.91
3	1.30
4	1.66
5	1.99
6	2.29
7	2.57
8	2.82
9	3.05
10	3.26
Greater than 10	4.58

(D)

(D)

Because the term of use has a substantial effect on the determination of the Justified Company Investment Per Dollar of Additional Annual Revenue, the Company may require a letter of intent from commercial, public authority and industrial customers projecting the term of use of the new or upgraded extension of facilities being requested.

The Company reserves the right to require a guaranteed revenue contract if the customer projects a term of use of the new or upgraded facilities in excess of 10 years or if the customer does not demonstrate that the customer's term of use is reasonable.

(D) Indicates Decrease

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES
(Cont'd)

Additionally, the Company reserves the right to require a guaranteed revenue contract from a commercial, public authority or industrial customer if any of the following conditions exist:

(1) The investment is for a dual fuel or partially dual fueled facility;

(2) The Company determines that a customer's financial status does not demonstrate that the customer will be able to pay bills for the projected term of use of the facilities; or

(3) The actual investment by the Company is greater than \$50,000.

(3) Recomputation

The Company may recompute, modify, alter or amend the foregoing Justified Company Investment Per Dollar of Additional Annual Revenue amounts as the Company may deem necessary or convenient in the conduct of its business, provided, however, that such recomputation, modification, alteration or amendment shall not become effective unless and until included in this tariff.

(C)

D. Application of Maximum Company Investment

The Maximum Company Investment as determined above shall be applied, first, to the installed meter cost, if any, and then will be applied towards any mainline and/or service line extension, service connection, and/or the upgrade of any of the Company's facilities to accommodate increased volumes of sales or transportation. However, if the Maximum Company Investment is less than the installed meter cost, Company will provide and install the meter at no cost to the Customer.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES

A. Residential

Whenever the owner or occupant of any property eligible for service as a residential customer makes a written application for service to the Company, and the Company has authority to render service to said applicant, the Company shall extend its facilities so as to serve said property or new residential development, provided that the applicant shall first have executed an agreement to pay to the company the rate charged under the appropriate service classification and to contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Company's Maximum Investment (as calculated in Rule No. 3, above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

B. Commercial or Public Authority; Industrial

Whenever the owner or occupant of any property eligible for service as a Commercial or Public Authority customer, or as an Industrial customer, makes a written application for service to the Company, and the Company has authority to render service to said applicant, the Company shall extend its system so as to serve said property, provided said applicant shall first have executed an agreement to pay to the Company the rates charged under the appropriate service classification and to contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Company's Maximum Investment (as calculated in Rule No. 3, above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

The Company's Maximum Investment for Commercial or Public Authority and Industrial customers shall equal the Maximum Company Investment as calculated in Rule No. 3 above; provided, however, that, in the event that the Company reasonably believes that the Company's installation of facilities will be completed substantially in advance of date that the Customer's use will equal projected annual volumes used to calculate the Maximum Company Investment as calculated in Rule No. 3 above, the Company may discount the Maximum Company

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

Investment as calculated in Rule No. 3 above to present value based upon the Company's most recent Commission-approved fair rate of return. (C)

C. Developer/Builder - Residential

Whenever the Developer/Builder of a residential property eligible for service makes a written application for service to the Company, and the Company has authority to render service to the property to be developed, the Company shall extend its system to serve said property, provided that, if the cost to extend the facilities exceeds the Maximum Company Investment, as calculated below, the Developer/Builder shall have entered into an agreement to contribute to the cost of extending facilities. (C)

The Maximum Company Investment for extensions involving a Developer/Builder shall be calculated as follows:

(1) The Developer/Builder shall provide a reasonable schedule of unit completion within the property to be developed;

(2) The Maximum Company Investment shall be calculated (as provided in Section 3) separately based on the number of units scheduled to be completed:

(a) within twelve months from the date of the estimated completion of construction of the new facilities; and

(b) during each successive twelve month period following the date of the estimated completion of construction of the new facilities.

(3) For all units not scheduled for completion within twelve months from the estimated date of completion of the construction of the new facilities, the Maximum Company Investment, as calculated above, shall be discounted to present value at the projected date of the completion of Company installed facilities using the Company's most recent Commission-approved fair rate of return.

(4) The sum of the discounted Maximum Company Investment for units to be installed more than twelve months after construction of Company facilities and the Maximum Company Investment for units scheduled for completion within twelve months of the estimated date of completion of construction of Company facilities shall equal the total Maximum Company Investment for the extension.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

The Developer/Builder shall contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Maximum Company Investment (as calculated above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

In the event that the Developer/Builder does not achieve the projected annual completion rate, the Maximum Company Investment and the amount to be contributed will be recalculated, in the same manner stated above, based upon actual units completed. If the recalculated amount to be contributed is greater than the previously calculated amount to be contributed, the Developer/Builder will be required to pay such difference to the Company; provided, however, that no amount will be required to be paid if the recalculated amount to be contributed exceeds the Company's actual cost of construction less the recalculated Maximum Company Investment.

C1. Developer/Builder Commercial or Industrial

Whenever the Developer/Builder of a commercial or industrial property eligible for service makes a written application for service to the Company, and the Company has authority to render service to the property to be developed, the Company shall extend its system to serve said property, provided that, if the cost to extend the facilities exceeds the Maximum Company Investment, as calculated below, the Developer/Builder shall have entered into an agreement to contribute to the cost of extending facilities.

The Maximum Company Investment for extensions involving a Developer/Builder shall be calculated as follows:

(1) The Developer/Builder shall provide a reasonable schedule of customer attachments and projected additional annual revenues from volumes to be transported by or purchased from the Company and consumed by the attaching customers;

(2) The Maximum Company Investment shall be calculated (as provided in Section 3) separately based on the historical and projected additional annual revenues from volumes to be transported by or purchased from the Company and consumed by the attaching customers:

(a) within twelve months from the date of the estimated completion of construction of the new facilities; and

(b) during each successive twelve month period following the date of the estimated completion of construction of the new facilities.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

(3) For all customer attachments not scheduled for completion within twelve months from the estimated date of completion of the construction of the new facilities, the Maximum Company Investment, as calculated above, shall be discounted to present value at the projected date of the completion of Company installed facilities using the Company's most recent Commission-approved fair rate of return. (C)

(4) The sum of the discounted Maximum Company Investment for customers to be attached more than twelve months after construction of Company facilities and the Maximum Company Investment for customer attachments scheduled for completion within twelve months of the estimated date of completion of construction of Company facilities shall equal the total Maximum Company Investment for the extension.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

The Developer/Builder shall contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Maximum Company Investment (as calculated above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

In the event that the Developer/Builder does not achieve the projected annual completion rate, the Maximum Company Investment and the amount to be contributed will be recalculated, in the same manner stated above, based upon actual additional annual revenues from volumes transported by or purchased from the Company and consumed by the attaching customers during the 60-month period following completion of the extension and the projected additional annual revenues from volumes to be transported by or purchased from the Company and consumed by the customers attached as of the last day of such 60-month period. If the recalculated amount to be contributed is greater than the previously calculated amount to be contributed, the Developer/Builder will be required to pay such difference to the Company; provided, however, that no amount will be required to be paid if the recalculated amount to be contributed exceeds the Company's actual cost of construction less the recalculated Maximum Company Investment.

D. Upgrade

The Company's investment for the upgrade of facilities shall be subject to the formula described in Rule No. 3. An upgrade is required when the customer needs dictate increasing, decreasing or otherwise changing the current service line, main line or meter size for the increased, decreased or otherwise changed volume or pressure requirements or when the customer requests installation of an excess flow valve or natural gas related equipment or facilities not otherwise required by regulation and the Company has deemed such installation appropriate. (C)

E. Advance Payment and Construction

Construction of any extension or installation of excess flow valves or natural gas related equipment or facilities not otherwise required by regulation will not be undertaken until the amount of the applicant's contribution has been paid to the Company by the applicant. In the case of an excess flow valve or natural gas related equipment or facilities not otherwise required by regulation, the amount of the applicant's contribution will be determined based upon the Company's cost to install such equipment. The actual construction of the extension shall be scheduled at the Company's discretion. (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

F. Refunds of Customer Investment

Any customer attaching to a facility extended/upgraded within five (5) years of completion thereof will be required to contribute to the cost of the extension/upgrade in accordance with Rules 3 and 4. In the event a new customer attaches to an extension/upgrade of the Company's facilities paid for by a customer or a developer/builder, within five (5) years of the date of completion thereof, a pro rata refund will be made to customers or developer/builder who were charged for such extension. In the alternative, the customer or builder/developer and Distribution may mutually agree in writing that the refund, if any, shall equal the Company's Maximum Company Investment for the attaching customer less the Company's actual attachment cost of construction. An annual review of such extensions is made on the anniversary date of completion thereof, during said five (5) years, and any refunds due are made at that time except for extensions for a developer/builder of commercial or industrial property which shall be reviewed at the end of year five (5) and any refunds due will be made at that time. No refunds will be paid for attachments occurring more than five (5) years after the completion date and in no case will the aggregate amount of refunds to a customer or developer/builder exceed the amount which the customer or developer/builder paid for the mainline extension/upgrade.

┌
(C)
└

5. MAINTENANCE OF FACILITIES

After initial installation of facilities has been made, pursuant to Rule Nos. 3 and 4, above, all facilities including mains, customer service lines (i.e., the portion of the service line from the outlet of the Company's service stop cock to the inlet of the meter) and Company service lines (i.e. the portion of the service line from the gas main to and including the curb box and service stop cock), shall be maintained, replaced or renewed, as required, at the expense of the Company.

5A. SPECIAL UTILITY SERVICES

The provisions of Rules 3 and 4 do not apply to applications for special utility service. "Special utility service" shall include (a) a request for utility service when the applicant has an installed alternative fuel capability, including service from a natural gas well; (b) a request for utility service when the applicant is already receiving natural gas service from another Pennsylvania public utility; (c) a request for utility service from an applicant located in an area in which another natural gas utility is authorized to serve the applicant; (d) a request for utility service by an applicant who was the owner or ratepayer of record for the premises at the time the Company last provided service to the premises; (e) any request for service by an applicant who, in the Company's view, is unlikely to remain on the Company's system for a sufficient period of time to justify the extension. Applications for special utility service shall be resolved on a case-by-case basis through negotiations between the applicant and the company.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

6. METERS

Gas delivered to customers from services attached to distribution lines shall be measured by meters to be furnished, installed and owned by the Company.

If, at any time after the installation of a meter, conditions are changed so that its location becomes unsuitable, the Company shall have the right to move the meter to a suitable place at the expense of the customer or property owner.

The cost of changes in location of meters made at the request of the property owner shall be borne by the owner. The customer shall not tamper with the meter and shall permit no one except employees of the Company to connect or disconnect the meter.

The customer shall be responsible to the Company for any injury to, or loss of, any meter arising out of or caused by the customer's negligence or carelessness, or that of his servants, employees, members of his household, or any person upon his premises under or by his consent, or sufferance. The customer shall at once notify the Company of any injury to, or any cessation in registration of, the meter as soon as it comes to his knowledge.

The Company, in its sole discretion, may install, together with its meter, an automated meter reading device ("AMD"), which can communicate automatically data from the meter to the Company by use of the telephone system. Customer shall provide the Company a suitable location for installation of an AMD, and the customer shall permit the Company to connect the AMD to the customer's existing telephone inside wiring. The customer shall not be required to install or modify telephone inside wiring or to subscribe to public utility telephone service in order to receive service from the Company.

The Company shall provide at least 72 hours' notice of the installation of an AMD at the customer's premises. The Company will not install an AMD at a customer's premises unless the AMD is designed to relinquish control of the customer's telephone line when the customer's telephone equipment is activated. If an AMD installed by the Company fails to relinquish control of a customer's telephone line when the customer's telephone equipment is activated, then such AMD will be replaced or repaired by the Company at the Company's expense. The Company will not install any AMD capable of transmitting voice communications unless specific permission is obtained from the Commission prior to installation.

If a Customer of the Company is billed by a telephone public utility specific charges for usage of telephone service (toll charges or local message unit charges) or charges for maintenance services that were caused by the Company's installation or use of AMD's, then the Company will reimburse the Customer for such charges.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

7. CUSTOMER'S PIPING AND EQUIPMENT

Prior to the installation of house piping by the customer in new or altered premises, inquiry shall be made of the Company to determine the requirements, sizes of pipe, quality and other specifications.

House lines, piping, connections and appliances are subject to inspection by the Company and no gas will be delivered unless all conditions are satisfactory.

The Company gives no warranty, expressed or implied, as to the adequacy or safety of any structure, equipment, piping, appliance or device owned, installed, leased or maintained by or for the customer or the owner of the premises served.

8. ACCESS TO PREMISES

The authorized agents of the Company shall, at all reasonable times, have free access to any premises supplied with gas or to which a service connection has been made, for the purpose of reading, inspecting, repairing or removing meters, piping, or other appliances therein belonging to the Company and of inspecting the piping and appliances belonging to the customer.

Every industrial customer shall permit the Company, during business hours and upon reasonable notice, to inspect the customer's facilities so that the Company may determine whether facilities have been installed which would enable the customer to obtain volumes of gas without using the Company's system ("Bypass Facilities"). If a customer refuses to permit the Company to inspect the customer's facilities, it shall be presumed that Bypass Facilities have been installed.

9. INTERRUPTION OF SERVICE

In accordance with the Public Utility Code, the Company will provide service which shall be reasonably continuous and without unreasonable interruptions or delay. The Company shall not be liable, in any amount, for damages, direct or consequential, where service meets requirements of the Public Utility Code. This limitation of liability, however, shall not apply to Company conduct which is found to be willful, wanton or reckless. If the Company shall know, in advance, of an expected interruption of service, the Company will take all reasonable steps, such as personal contact, phone contact or the use of mass media, to notify affected customers of the cause and expected duration of the interruption.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

10. LEAKS

The responsibility for detecting leaks or defects in piping between the Company's service connection and the point of consumption shall be upon the customer. The customer shall give immediate notice to the Company of inadequate, irregular or failing gas supply, leakage, abnormally high or low pressures, or any dangerous conditions.

Should any leak or defect be discovered in the mains, service connections, customer's service line, piping, or appliances, the Company shall have the right to shut off the supply of gas until satisfactory repairs have been made.

11. REFUSAL OR TERMINATION OF SERVICE

The Company may decline to serve an applicant (1) until he has complied with state and municipal regulations governing gas service and the approved Rules and Regulations of the Company contained in this Tariff and any supplement thereto, (2) if the Company does not have adequate facilities to render the service desired or if rendering such service would affect unfavorably service to other customers, (3) if in the Company's judgment, the applicant's installation of piping or gas equipment is regarded as hazardous or of such character that satisfactory service cannot be given, (4) if an extension of street main is required beyond length warranted by anticipated revenues, and the customer refuses to pay the charges required by Rule 3 of this Tariff, (5) until all amounts due for regulated service or amounts purchased from a Natural Gas Supplier (NGS) through the Company's Purchase of Receivables Program (POR) pursuant to Rate Schedule SATC Section F ("Lesser Of" calculation) at a previous location have been paid or covered by a payment agreement (unless the amount owed is more than four years after the date of the final bill, in which case service cannot be refused), (6) or where the service proposed is from a gathering, production or transmission pipeline (see Rule 25). (C)

The Company may terminate service for nonpayment of a billing or billings for regulated services or NGS provided natural gas supply charges purchased through the Company's POR Program pursuant to Rate Schedule SATC Section F ("Lesser Of" calculation), and such termination of service shall be in accordance with general regulations of the Pennsylvania Public Utility Commission applicable thereto and in accordance with the Pennsylvania Public Utility Code. (C)

The Company may not threaten termination of service for nonpayment of unregulated Natural Gas Supplier charges incurred by the customer from qualified Suppliers under Rate Schedule SATS if the Company did not purchase the receivables from the Supplier. (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

The Company may terminate service for such reasons and on such notice as specified by the regulations of the Pennsylvania Public Utility Commission, the Pennsylvania Public Utility Code, or for other violation of these Rules and Regulations.

The Company may refuse to serve any applicant, or may terminate service to any customer who fails to pay a security deposit for regulated services or who fails to provide the Company with security in lieu of a deposit as provided for in this Tariff.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

12. RECONNECTION OF SERVICE

When the supply of gas to any customer is turned off due to the customer's failure to pay for regulated service or NGS provided natural gas supply charges purchased through the POR Program pursuant to Rate Schedule SATC Section F ("Lesser Of" calculation), for any other infraction of these Rules and Regulations or at the customer's request, and if there has been no change in ownership or occupancy of the premises served, the supply of gas will not be turned on until the customer or applicant has paid a reconnection fee of \$69.00. The Company will reconnect a residential customer or applicant's gas service in accordance with the general regulations of the Pennsylvania Public Utility Commission applicable thereto and in accordance with the Pennsylvania Public Utility Code. Company may determine liability for outstanding balance for residential gas service based upon the methods set forth in 52 Pa. Code §56.191 and Company records. (C)

If the supply of gas was turned off due to a non-residential customer's failure to pay for regulated service or NGS provided natural gas supply charges purchased through the POR Program pursuant to Rate Schedule SATC Section F ("Lesser Of" calculation) and if the former customer reapplies for service or if a court, district justice or administrative agency has determined that the applicant is legally obligated to pay for the service previously furnished, the supply of gas will not be turned on until the non-residential customer or applicant has paid all outstanding bills for service. (C)

The reconnection of service cannot be denied for the nonpayment of Natural Gas Supplier charges billed to the customer for services rendered by Rate Schedule SATS Suppliers if the Company did not purchase the receivables from the Supplier.

13. DISCONTINUANCE NOTICE BY CUSTOMER

Any customer who is about to vacate any premise supplied with gas, or who for any reason wishes to have service discontinued, shall give at least seven days' notice to the utility specifying the date on which it is desired that service be discontinued. The customer who fails to give proper notice shall be liable for all gas which passes through the meter, until: the account is terminated; another party occupies the premises and agrees to assume responsibility for gas service; or, the customer notifies the Company or the Company learns that he has or will vacate the premises, in which case he shall be responsible for gas used for the period, not to exceed seven days, before the company is able to discontinue service.

14. GAS DELIVERED UNDER HIGH PRESSURE

The rates contained in this tariff are based upon gas delivered under conditions generally applicable to low pressure service (four ounce base). Bills for gas metered under high pressure will be computed upon the volume as indicated by the meter registration increased to the equivalent volume at standard pressure.

15. BILLING

Bills will be rendered and will be payable once each month. The Company may read any meter once each month but ordinarily it will read meters of domestic and commercial customers once each two months.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

15. BILLING (Cont'd)

As to any customer whose meter is read once each two months, the consumption for the first month of each bimonthly meter reading period shall be determined by calculation on the basis of the customer's previous usage adjusted for weather conditions; and the consumption for the second month of each bimonthly meter period shall be determined by subtracting the first month's calculated consumption from the total actual consumption for the bimonthly period as shown by the meter. The bill for each month shall be the result of applying to the consumption, determined as aforesaid, the applicable rates and charges contained in this tariff.

Under 52 Pa Code § 56.222 the Company requested and was granted a waiver from 52 Pa. Code § 56.12(2) (i) - (ii) by the Commission. In accordance with this waiver, the Company will only accept customer supplied readings by telephone or through the Company's Internet website when such readings are: (1) reasonable based on historical usage information; and, (2) received by the Company within the proper billing window 3 business days prior to the bill being rendered. Acceptable customer readings will be used to compute a bill that otherwise would have been determined by calculation.

If the meter reader in any month is unable to gain access to the premises for the purpose of reading the meter, a calculated bill will be rendered and adjustments, if any, will be made by the Company when the meter is read.

In those instances where the Company's agent or representative is unable to gain access to the customer's premises during the regular scheduled working hours to obtain a meter reading, the number of calculated readings shall be limited to six consecutive months, and the customer's service, thereafter, is subject to termination, after due notice.

The late payment date specified on the monthly bill is not less than fifteen days from date the bill is mailed except that, for service under, or billed in conjunction with, residential rate schedules, the late payment date is not less than twenty days from the date the bill is mailed.

At the time the Company receives a notice to transfer service from one customer to another, the Company will provide customers with the option to either have the Company read the meter or to have the disconnecting and reconnecting customer read the meter. The Company will read the meter if the two customer readings are significantly different. The Company will inform the customers that if they elect the customer meter reading and the customer fails to provide the Company with an acceptable reading in a timely manner, the Company may estimate the final meter reading.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

15. BILLING (Cont'd)

The Company will make reasonable efforts to obtain actual meter readings: (a) when the Company has insufficient data to estimate the Customer's usage; (b) when disconnect and reconnect orders are executed on different days; and (c) when the customer, at least seven days prior to the disconnect order date, specifically requests that the meter be read. The Company reserves the right to estimate a Customer's usage for a final bill whenever the Company is unable to gain access to its meter on the disconnect order date. The Company will accept meter readings from customers for final bills if the customer reading is provided in a timely manner and if, upon review, the Company finds the customer reading to be reasonable and consistent with prior usage levels. Notwithstanding the foregoing, the Company may not discontinue service unless in compliance with the Rules, Regulations or Orders of the Pennsylvania Public Utility Commission pertaining thereto and in effect at the time of such discontinuation.

16. PENALTY CHARGES

If the customer fails to pay his gas bill by the late payment date, a penalty will be charged. Payments received by mail will be considered paid on the date of the postmark.

Where a customer receives natural gas supply service from a qualified Supplier under Rate Schedule SATS but is not participating in the Company POR program, late payment charges will be applied to the Supplier charges only if the customer has agreed to pay Supplier late payment charges. Otherwise, late payment charges will be based on the distribution charges of the Company and natural gas supply charges of either the Company or Supplier.

The penalty charged to all customers shall be 1.50% on the full unpaid and overdue balance.

17. BILLING PERIOD

Bills will be mailed monthly to residential customers for service furnished during the preceding meter-reading period at least twenty (20) days prior to the expiration of the late payment date as shown on the bill.

Bills will be mailed monthly to Commercial, Public Authority, Industrial and Large Industrial customers for service furnished during the preceding meter reading period at least fifteen (15) days prior to the expiration of the late payment date as shown on the bill.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

18. BALANCED BILLING PLAN

The company has available a budget payment plan for Residential, Commercial, and Public Authority customers. The budget payment plan is available for all qualifying Company regulated services and for services provided to the customer by qualified Suppliers under Rate Schedule SATS where the Company provides billing service for the Supplier. At the request of any Residential, Commercial or Public Authority customer who uses gas as the primary source for space heating and who satisfies the company's credit standards, monthly payments for such customers may be made as follows:

Monthly payments shall be based on an amount equivalent to 1/12th of the customer's estimated annual bill rounded to the next higher dollar amount.

If a debit balance has accrued as of the 12th cycle month of this plan, the customer may either incorporate it all in the 12th cycle month's payment or at the company's discretion, spread all or part of the debit in equal monthly installments over the next cycle year. If the credit balance is accrued, the customer shall have the option of either receiving a cash refund, having it applied against the current bill, or having it used to reduce the monthly installments in the next cycle year. Absent an indication from the customer of his preference, the debit or credit will be applied to the first monthly installment in the ensuing year.

19. SEASONAL SERVICE

Service to Residential, Commercial, Public Authority, and Industrial premises occupied seasonally will be supplied at the rates and minimum charges of the applicable rate schedule.

20. SUPPLYING OF GAS SUPPLIES TO OTHER CUSTOMERS

No branch, valve or fixture which would permit gas to be withdrawn without registering on the meter shall be connected to a customer service line (i.e., the portion of the service line from the outlet of the Company's service stop cock to the inlet of the meter).

No extension of facilities, including the customer service line and facilities connected thereto and extending into a customer's premises, may be used to provide gas service at any additional or different premises. As used herein, a premises is defined as a single building; or the several buildings of a housing development under one ownership within a single parcel of land not intersected by a public highway or city street; or the several buildings of a religious, charitable, educational, or benevolent corporation if used exclusively for such purposes, if situated on adjoining properties even if intersected by a public highway or city street; or an industrial plant if situated on adjoining properties even though intersected by a public highway or a city street.

21. CONJUNCTIVE BILLING

The Company's rates are based upon gas supply through a single delivery point, as measured by one meter. Separate supply for the same customer at other points of delivery or through more than one meter shall be billed separately. However, the Company may, when engineering or operational conditions warrant, or to improve service, install two or more meters on the

|
(C)
|

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

21. CONJUNCTIVE BILLING (Cont'd)

same premises to service a single customer, in which event the consumption registered by such meters may be consolidated and the rates under which service is taken applied to the total consumption. The term "same premises" means a single building; or the several buildings under one ownership within a single parcel of land not intersected by a public highway or city street; provided, however, that the Company, in its sole discretion, may permit conjunctive billing at premises not conforming to the above definition of "same premises" if it is reasonably necessary to do so to meet competition from another supplier of energy, including gas.

An established conjunctive billing arrangement shall be permitted to continue so long as the customer remains at the premises presently served. The conjunctive billing arrangement shall neither be expanded to the customer's newly-acquired premises, nor transferred in whole or in part to different premises, nor continued at the same premises for different customers, unless, in the Company's sole discretion, it is reasonable to expand, transfer or continue the conjunctive billing arrangement.

22. ADJUSTMENT OF BILLS FOR METER ERROR

Charges to customers will be adjusted for fast, slow and nonregistering meters, as per Section 59.22 of the regulations of the Pennsylvania Public Utility Commission for Gas Service, 52 Pa. Code Paragraph 59.22.

23. METER TEST ON REQUEST OF CUSTOMER

Meters which are not due for periodic tests will be tested for accuracy as per Section 59.21 of the regulations of the Pennsylvania Public Utility Commission for Gas Service, 52 Pa. Code Paragraph 59.21, upon written request by the customer and payment to the Company of a deposit in the amount specified by said regulations.

24. RULES FOR SECURING DEPOSITS

The Company may require customers to provide deposits for services. The Company may not deny the customer regulated services based on the customer's failure to provide deposits for unregulated services.

Deposits may be required from customers taking service for a period of less than thirty days in an amount equal to the estimated bill for such temporary period.

Deposits may be required from Commercial or Industrial customers but shall not exceed the amount equal to the sum of amounts computed by applying the applicable sales rate schedule to the volumes of gas transported by or purchased from the Company, and consumed by the customer during the two, of the most recent twelve months of greatest usage by the Customer. In lieu of actual experience, the determination will be based on an estimate considering all relevant information and data.

Deposits may be required from Residential customers in accordance with the Pennsylvania Public utility Code and the Rules and Regulations of the Pennsylvania Public Utility Commission.

(C)
(C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

24. RULES FOR SECURING DEPOSITS (Cont'd)

Security, in the form of a cash deposit, letter of credit, surety bond, or third-party guarantee, will be required from the applicants for Non-residential service unless: A) the premises to which gas service is to be supplied is a branch of, or additional facility operated by, financially responsible, enterprise which will be the ratepayer of record with respect to gas bills incurred at the premises; or, B) in the case of a premises not covered by "A" above, the Company determines, through relevant Company records covering past direct dealings with the applicant over a period of at least one year, that a deposit is not necessary. Security, in the form of a cash deposit, letter of credit, surety bond, or third-party guarantee, will be required from existing Non-residential customers where the Company determines that the customer's credit standing warrants concern as to its continuing ability to pay. In evaluating a customer's credit standing, the Company will take into account certain factors, including, but not limited to, the following: i) average monthly consumption; ii) average monthly bill; iii) payment history during the immediately preceding twelve month period; iv) customer's general credit standing as evaluated by any available applicable credit rating indices or rating services; v) customer's payment history and credit standing with other lenders or providers of utility and other services.

Until returned or credited, interest will accrue on Residential deposits at the rate of interest as determined by the Secretary of Revenue for interest on the underpayment of tax under Section 806 of the Act of April 19, 1929 (P.L.343, No. 176), known as The Fiscal Code. Interest accrued on Residential deposits will either be applied, together with the deposit, to any outstanding balance for service or will be paid at the time the deposit is returned. Interest will be paid on non-residential deposits at the rate of six percent (6%) per annum without deductions for any taxes thereon. Upon non-residential deposits held for more than a year, the Company shall pay to the patron, at the end of the calendar year, the interest accrued thereon. (C)

25. CUSTOMERS SERVED THROUGH SERVICE CONNECTIONS ATTACHED TO FACILITIES OTHER THAN DISTRIBUTION SYSTEM LINES

Service from a line outside the Company's low pressure and medium pressure distribution systems will not be furnished unless such line is at that time being operated in a manner which will permit gas to be served to the applicant without interference with its operation. The furnishing of such service will be with the understanding that the use or manner of use of the Company's line from which gas is to be supplied is not permanent and that such service is subject to temporary or absolute change or discontinuance at the sole discretion of the Company which may at any time remove, repair or change the use or manner of operating said line after having first canceled the service contract by thirty days' written notice to the customer.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES (Cont'd)

25. CUSTOMERS SERVED THROUGH SERVICE CONNECTIONS ATTACHED TO FACILITIES
OTHER THAN DISTRIBUTION SYSTEM LINES (Cont'd)

The customer assumes sole responsibility, financially and otherwise for obtaining alternative sources of fuel in the event that customer's service is interrupted or discontinued permanently or temporarily, as described in the preceding paragraph.

The Company has the right to cancel the service contract for any such reason or in accordance with any other published rule or regulation of the Company, and, during the term of the contract, the Company shall not be liable for any deficiency in the supply of gas caused by the use of compressing stations, breakage of lines or other causes or for any claim for damages on account of any matters set forth in this paragraph.

All materials used in connecting the meter and regulators from the outlet of the Company's service stop cock to the outlet of the meter, and including the box or structure housing the meter and regulators, shall be furnished and installed by the Company at the expense of the customer. The meter and regulators shall belong to the Company and will be installed as near to the Company's lines as is practicable.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

26. GAS EMERGENCY PLANS

A. Definitions

The following words and terms have the following meanings unless the text clearly indicates otherwise:

- (1) Alternate fuel - Any fuel other than natural gas.
- (2) Alternate fuel capability - The installed and operable ability to use any fuel other than natural gas on a time sensitive basis.
- (3) Commercial use - Gas usage by customers engaged primarily in the sale of goods and services including consumption by office buildings, institutions and government agencies.
- (4) Essential human needs - Gas usage in any building where persons normally dwell including residences, apartment houses, dormitories, hotels, hospitals and nursing homes.
- (5) Firm service - Natural gas service offered to consumers under tariffs or contracts that anticipate no interruption.
- (6) Industrial use - Gas usage by customers engaged primarily in a process which creates or changes raw or unfinished materials into another form or product including the generation of electric power.
- (7) Interruptible service - Natural gas services that can be temporarily discontinued under term and conditions specified by tariff or contract.
- (8) Plant protection use - Minimum usage of natural gas required to prevent physical harm to an industrial or commercial consumer's facility, or danger to personnel at the facility, when the protection cannot be afforded through the use of an alternate fuel. Plant protection use includes usage necessary for the protection of the material in process as would otherwise be destroyed, but does not include deliveries required to maintain production.
- (9) Residential use - Gas usage in a residential dwelling or unit for space heating, air conditioning, cooking, water heating or other domestic purpose.

B. Natural Gas Emergency Planning

- (1) The Company has filed a Natural Gas Emergency Plan ("Plan") with the Pennsylvania Public Utility Commission ("Commission") reflecting its unique operational characteristics and design criteria. The Plan contains simplified and understandable rules and regulations so that all of the Company's customers and all natural gas suppliers licensed to provide services to their customers can have a responsive action plan in place to protect themselves and their property in the event of a crisis. The Company's Natural Gas Emergency Plan can be located at the Company's website www.nationalfuelgas.com organized with other information for utility customers and natural gas suppliers. The Company shall file revisions to the Plan when and as appropriate, or as directed by the Commission. (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

26. GAS EMERGENCY PLANS (Cont'd)

(2) As part of the emergency planning process the Company shall attempt to make every reasonable effort to make contractual or informal arrangements with our transportation customers, sales customers and others to obtain supplies or, as an alternative, to implement usage reductions so that resorting to firm service reductions under Rule 26. C. Emergency Action can be avoided, or the severity of the supply or capacity disruption can be mitigated. The purpose of these arrangements is to provide a means to minimize the potential of supply shortfalls that threaten public health and safety, and not to make up for inadequate performance by individual parties.

(3) The Company's Natural Gas Emergency Plan includes provisions addressing:

(a) Emergency load shedding

(b) Voluntary usage reductions, for example, reducing space or water heating temperatures to levels specified by the Company.

(c) Mandatory usage reduction for certain customers consistent with Rule 26. C. Emergency Action.

(d) Issuance of periodic reports to the media concerning the existing natural gas emergency.

(e) Notice to affected customers and natural gas suppliers of the expected initiation of actions under Rule 26. C. Emergency Action.

(f) Customer and natural gas supplier delivery requirements that apply during the term of Rule 26. C. Emergency Action, regardless of customer specific usage reductions that arise or may arise from end-use curtailments.

(g) A procedure for focusing emergency measures to confined geographic or operational portions, segments or zones of the Company's system where a natural gas emergency exists.

(h) Procedures for establishing communications with electric system control area operators, if the Company provides gas service to electric generation stations.

(4) The Company's Natural Gas Emergency Plan specifies the procedures the Company shall use to provide notices to affected customers, their natural gas suppliers and natural gas distribution companies. After the Company determines the appropriate response, the Company shall issue notices to affected customers, their natural gas suppliers, and natural gas distribution companies as soon as reasonably possible.

C. Emergency Action

(1) An emergency exists whenever the aggregate demand of firm service customers on the Company's system or confined segment of the system exceeds or threatens to exceed the gas supply or capacity that is actually and lawfully available to the Company to meet the demands, and the actual or threatened excess creates an immediate threat to the Company's operating integrity with respect to Priority 1 customers as defined in Rule 26. A (4).

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

26. GAS EMERGENCY PLANS (Cont'd)

(2) If, in the sole judgment of the Company, there is sufficient time, the Company shall use reasonable business and operational efforts to: interrupt all interruptible services, issue operations flow orders, and call for voluntary usage reductions by all customers before taking action under subsection 3. The Company shall take these three actions sequentially to the extent feasible.

(3) In the event of an emergency as described in subsection 1, the Company may require each commercial and industrial retail and transportation customer that is not a Priority 1 customer under subsection 9 to reduce its consumption of gas.

(a) The reduction required shall be determined by the Company without regard to priorities of use, as necessary to minimize the potential threat to public health and safety.

(b) The minimum authorized usage may not be lower than the minimum usage of firm service for plant protection use.

(c) When all other service has been curtailed except for Priority 1 service and the Company continues to be unable to meet Priority 1 requirements, the Company shall utilize measures designed to minimize harm to customers if curtailments to plant protection use are found to be necessary.

(d) Consistent with the Company's responsibility to maintain system integrity at all times, the Company shall restore service as soon as practicable to any gas-fired electric generation facility that is deemed critical to electric system reliability by the electrical system's control area operator.

(4) Mandatory reduction under subsection 3 shall be for a period specified by the Company until further notice. The Company may change a customer's authorized usage, upon notice, at any time during an emergency.

(5) Mandatory reductions under subsection 3 shall be for a maximum duration of 5 business days unless extended by Commission order. As an alternative to extending mandatory reductions under subsection 3, the Commission may order the Company to initiate priority-based curtailments under subsection 6.

(6) In determining whether to order the Company to initiate priority-based curtailments, the Commission will examine whether the Company did the following:

- (a) Interrupted all interruptible services.
- (b) Issued operation flow orders.
- (c) Called for voluntary usage reduction by all customers. (C)

(7) Upon issuance of a Commission order to initiate priority-based curtailments, the Company shall provide all affected customers the maximum notice possible, via telephone, text message, fax, electronic data interchange, or any other reasonable means of notification specifying the curtailment percentage of the customer's firm gas service and resulting allowances as may be the case. (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

26. GAS EMERGENCY PLANS (Cont'd)

(8) Upon issuance of a Commission order to initiate priority-based curtailments, the available gas supplies to the Company shall be prorated, if practicable, among its customers according to the following priorities of use:

(a) Customers in a higher priority category shall not be curtailed until all customers falling into a lower priority category have been restricted to plant protection use levels, unless operational circumstances or physical limitations warrant a different result.

(b) Where only a partial restriction of a classification is required, implementation shall be prorata, to the extent practical under the circumstances as set forth in the Company's curtailment plan.

(9) Following are the priority categories, listed in descending order, pertaining to the curtailment of firm services:

(a) Priority 1. Service for essential human needs use.

(b) Priority 2. Firm services not included in essential human needs use.

(2.1) Plant protection gas

(2.2) All other consumption not contained in (2.1) above and Priority 1. Service for essential human needs use (excluding plant protection gas).

(2.3) Intermediate Volume Industrial Service (IVIS) / Commercial / Public Authority consuming > 12,000 Mcf per year (excluding plant protection gas).

(2.4) Large Volume Industrial Service (LVIS), all industrial accounts consuming greater than 50,000 Mcf per year (excluding plant protection gas).

(2.5) Large Industrial Service (LIS), all industrial accounts consuming greater than 200,000 Mcf per year (excluding plant protection gas).

D. Utility Liability

(1) The company may restrict or discontinue service in accordance with this section without hereby incurring any penalty or liability for any loss, injury or expense that may be sustained by the customer except when the restriction or discontinuation of service is a result of the Company's willful or wanton misconduct.

(2) Company liability for actions taken under Rule 26. C. Emergency Action, or to a regulation, policy statement, directive or order issued by the Commission or an emergency order issued by the Governor shall be governed by the following principles:

(a) If the Company appropriates natural gas during an emergency action, the Company shall compensate the applicable entity, whether the customer or the

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

26. GAS EMERGENCY PLANS (Cont'd)

customer's natural gas supplier, for the cost of the lost, firm gas service. The compensation, in the aggregate, shall equal but not exceed the greater of:

(i.) The city gate cost of the appropriated natural gas, including transportation charges up to the Company's city gate, or

(ii.) The reasonable cost actually paid by the customer for delivered substitute energy, as documented to the Company. The Company may provide compensation in kind only at the discretion of the affected customer or natural gas supplier.

(b) The Company may discontinue service, for the duration of an emergency, to a customer that continues to take gas in violation of the rules found in Rule 26. Gas Emergency Plans.

E. Penalties for Unauthorized Takes

If a customer exceeds its authorized consumption during a natural gas emergency, then the customer will pay a penalty, in addition to any and all other penalties or charges incurred during such emergencies, according to the following schedule:

Actual usage as a percentage of
Emergency Authorized Consumption

Penalty

Greater than 103% but not in
Excess of 110%

The higher of \$10/MCF or 110% of the highest gas supply purchased by the Company during the month of usage.

Greater than 110%

The higher of \$25/MCF or 125% of the highest gas supply purchased by the Company during the month of usage.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

27. FINANCIAL FITNESS REQUIREMENTS FOR NATURAL GAS SUPPLIERS (C)

Dun & Bradstreet reports will be utilized as the primary source of credit information to determine the creditworthiness of Natural Gas Supplier applicants for service. The following Dun & Bradstreet standards will be used: a credit risk rating of 1 through 5 and "uncoded", noted on the report (the continuum range is 1 to uncoded). The values for these rating are: (C)

"1" assets, liabilities and payment history indicate little or no risk to creditors.

"2" assets, liabilities and payment history indicate some risk to creditors.

"3" assets, liabilities and payment history indicate a moderate risk to creditors.

"4" assets, liabilities and payment history indicate a greater than moderate risk to creditors.

"5" assets, liabilities and payment history indicate a severe risk to creditors.

"Uncoded" indicates that there is insufficient historical credit data available to make a reliable credit assessment of the applicant (such as the applicant being in business less than 14 months, change of ownership, etc.)

Upon receipt of the properly completed Credit Application, the company will obtain various Dun & Bradstreet reports for initial review and assessment. The reports will include, but not be limited to: Payment Analysis Report, Business Information Report, Comprehensive Report and Credit Score

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

Report. In addition, other criteria will be taken into consideration in assessing the Company's potential risk exposure, such as: (1) established payment history of the applicant with the Company and (2) the ratio of anticipated projected enduser volumes to the supplier's unencumbered assets available for payment; and (3) historical reliability of deliveries (nominations vs. deliveries). (C)

"1" Rating: (C)

In general, if the reports indicate an overall rating of "1" no security deposit will be required at the time, subject to changes listed below. However, if anticipated projected enduser volumes indicate a substantial risk exposure over and above indicated current assets available for payment, a security deposit may be required.

"2" Rating: (C)

If the reports indicate an overall rating of "2" additional background investigations will be completed. These investigations will include but not be limited to: (1) an assessment of the applicant's payment history with the Company, (2) compilation of other creditors and trade creditor's reports, (3) request for financial statements, if necessary. Upon completion of a review of the additional information a determination will be made regarding the Company's risk exposure and a recommendation made to waive or request a security deposit.

"3-5" Rating: (C)

If the reports indicate an overall rating of "3-5" a security deposit will be required. No further investigations will be made unless extenuating circumstances exist and the applicant brings those situations to the attention of the reviewer.

"Uncoded": (C)

Any applicant with a rating of "uncoded" will automatically be designated as having a rating of "3-5" and be required to post a security deposit.

Changes affecting credit risk ratings:

All approved Suppliers and Aggregators will be periodically reviewed to determine if: (1) there is a change in their credit risk rating; (2) security needs to be required on a previously unsecured account; (3) the amount of security being held should be increased or decreased to meet projected future usage, based upon historical usage data.

(C) Indicates Change

Voluntarily Suspended to April 12, 2002

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

Changes indicating that a credit review may be necessary include, but are not limited to: (1) significant changes in Dun & Bradstreet credit reports; (2) credit related information obtained from reliable sources; (3) a change in the number of end-users; (4) a change from the established payment history; as well as any other information received regarding the financial standing of the Supplier or Aggregator. Security deposits will be refunded to the Supplier or Aggregator when it is determined that the Supplier or Aggregator meets the level of creditworthiness criteria that no longer requires a security deposit.

Determination of Security Deposits:

The amount of a security deposit will be determined under the following formula:

- (1) For Natural Gas Suppliers during the winter period (C)
 - a. Using historical data, for (1) transportation service shall be the sum of the two highest months of consumption in the last twelve months. This volume will be multiplied by 60 and divided by the actual amount of billing days, and (2) the commodity volumes shall be determined by taking the highest consumption between November 1 through March 31. This volume will be multiplied by 10 and divided by the actual number of billing days. The consumption for each customer anticipated to be served by the applicant Natural Gas Supplier will be multiplied by (3) the applicable transportation rate; and (4) the corresponding cost of gas. (C)
 - b. The "corresponding cost of gas" shall be the Natural Gas Supply Charge.

Monthly reviews will be provided, based upon any changes which may affect the Company's risk exposure.

Other credit criteria for Natural Gas Suppliers is located in Rate Schedules Monthly Metered Natural Gas Supplier Service and Small Aggregation Transportation Supplier Service Section I. Supplier Qualification Criteria. (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

(2) For Natural Gas Suppliers during the summer period (C)

a. Using historical data, for (1) transportation service shall be the sum of the two highest months of consumption in the last twelve months. This volume will be multiplied by 60 and divided by the actual amount of billing days, and (2) the commodity volumes shall be determined by taking the highest consumption between April 1 through October 31. This volume will be multiplied by 10 and divided by the actual number of billing days. The consumption for each customer anticipated to be served by the applicant Natural Gas Supplier will be multiplied by (3) the applicable transportation rate; and (4) the corresponding cost of gas. (C)

b. The "corresponding cost of gas" shall be the Natural Gas Supply Charge.

Monthly reviews will be provided, based upon any changes which may affect the Company's risk exposure.

Other credit criteria for Natural Gas Suppliers is located in Rate Schedules Monthly Metered Natural Gas Supplier Service and Small Aggregation Transportation Supplier Service Section I. Supplier Qualification Criteria. (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

Payment of Security:

Payment of security deposits can be made by cash or acceptable form of security such as Letter of Credit. Interest will be paid on cash security deposits at the same rate paid on deposits for service to non-residential customers. Responsibility for and expenses incurred in the procurement of a Letter of Credit are subject to requirements and/or negotiations with the Applicant's individual bank. In addition, the Company may in its sole discretion accept an agreement setting special operating standards ("Operational Default Agreement") and/or an Escrow Account Agreement in exchange for reducing the level of security otherwise required.

(C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

28. RULES FOR TRANSPORTATION SERVICE

The following terms and conditions shall apply to Transportation Service. (C)
Additional operating procedures, protocols and business practices for (C)
transportation service can be found in the Company's Operational Procedures
Manual which is posted on the Company's web site.

A. GAS QUALITY

(a) All gas delivered by Customer into Company's facilities will:

(1) Have a total heat content of not less than nine hundred sixty seven British Thermal Units (967 BTU) per cubic foot and not more than one thousand on hundred British Thermal Units (1,100 BTU) per cubic foot, provided however, that Company shall have the option (but never the obligation) to accept Customers gas having a heat content outside of this range, when in Company's sole judgment, such different heat content does not prevent Customer's gas from being merchantable and fit for use by Company in its intended markets;

(2) Be commercially free from dust, hydrocarbon liquids, water, objectionable odors, or other gaseous, solid or liquid matter which might become separated from the gas in Company's facilities or interfere with the proper operation of the pipelines, regulators, meters or other equipment through which it flows; and Customer shall furnish, install, operate, maintain and keep in efficient operating condition, at Customer's own expense, such drips, separators, dehydrators, alcohol bottles, gas cleaners and any other devices or equipment as may be or become necessary to effect compliance with this requirement;

(3) Not contain more than twenty (20) grains of total sulfur (S), nor more than three-tenths (0.3) grain of hydrogen sulfide (H₂S) per one hundred (100) cubic feet;

(4) Not contain more than two-tenths of one percent (0.2 of 1%) by volume of oxygen (O₂), and Customer shall make every reasonable effort to keep the gas free of oxygen (O₂); (C)

(5) Not contain more than five percent (5%) by volume of a combined total of carbon dioxide (CO₂) and nitrogen (N₂) components; provided, however, that the total carbon dioxide (CO₂) content shall not exceed two percent (2%) by volume;

(6) Have a temperature of not more than one hundred twenty (120) degrees Fahrenheit; and

(7) Have been dehydrated by Customer for removal of water in a vapor state, and in no event contain more than seven (7) pounds of water vapor (H₂O) per million cubic feet, except as permissible according to the NFG Water Vapor Content Chart contained in the Company's Operational Procedures Manual, as determined by Company. In no event shall Customer deliver to Company free or entrained water (H₂O). (C)

C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

(b) In the event any of the above substances enter any of Company's facilities in quantities greater than the levels, if any, permitted above, with or without Company's knowledge, and/or cause, directly or indirectly, damage to any such facility, Company may, at Customer's expense, clean up and/or repair such facility. Further, in the event any of the above substances enter any facilities owned by retail customers of Company in quantities greater than the levels, if any, permitted above, with or without Company's knowledge, and/or cause, directly or indirectly, damage thereto, Customer shall indemnify Company against, hold it harmless from, and undertake the defense of Company with respect to any and all claims, losses, damages (including punitive damages, to the extent permitted by law), and injuries (property damage and personal injury, including death) arising therefrom and shall indemnify Company for any expenses, including attorney's fees and clean-up costs, incurred in partial or full satisfaction of any such claims, losses, damages and injuries.

(c) As to Customer's gas which does not meet the specifications stated herein, Company shall have the rights, on a continuing basis, and in addition to any other remedies provided herein, to:

(1) Continue to receive such gas; or

(2) Discontinue the flow of such gas, and, in the event Customer will not correct such deficiency within a time period acceptable to Company, to terminate the Service Agreement as to such gas; or

(3) Receive such gas and, at Customer's expense, treat or otherwise process the same so as to cause it to conform to the above quality specifications.

If the gas delivered fails to meet the 1,000 BTU standard specified in Paragraph (a)(1) above, Company shall also have the option to retain sufficient additional volumes of gas to compensate for such deficiency.

B. MEASUREMENT

(a) For all gas delivered by Customer to Company, the volumetric measurement base shall be one (1) cubic foot of gas at a pressure base of fourteen and seventy-three hundredths (14.73) pounds per square inch absolute and a temperature base of sixty (60) degrees Fahrenheit. The average absolute atmospheric (barometric) pressure shall be fourteen and four tenths (14.4) pounds per square inch. The flowing temperature shall be sixty (60) degrees Fahrenheit and may be adjusted to actual flowing conditions by Company if deemed necessary by Company. All said gas shall be measured by orifice or displacement type meter or any other approved measuring device of equal accuracy. Orifice meters shall be installed and operated, and gas volumes computed in accordance with Report No. 3 of the Gas Measurement Committee of the American Gas Association, including any revisions applying thereto.

(C) Indicates Change

(C)

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

(b) Customer shall install, or cause to be installed, at no expense to Company, measuring equipment necessary in Company's judgment to accomplish accurate measurement of the gas. Company shall operate and maintain said measuring equipment. The measuring equipment will be installed, operated and maintained in accordance with the specifications of the Gas Measurement Committee of the Natural Gas Department of the American Gas Association, as amended from time to time, or by any other mutually acceptable method commonly used in the industry. Such measuring equipment shall conform to the specifications provided by Company; shall be calibrated, as Company deems necessary, by Company; shall be inspected by Company; and must be approved by Company prior to any deliveries hereunder.

Customer recognizes that it may be necessary for Company's employees, agents, or representatives, to enter the property on which said measuring equipment is located to perform such functions upon said measuring equipment as may be necessary to effectuate the provisions of a Service Agreement, and Customer hereby expressly grants Company permission to perform such functions on said measuring equipment. Customer, to the extent it is within Customer's power to do so, will grant Company such easements as may be necessary for Company's employees to enter the property on which said measuring equipment is located. In the event that easements from other parties are necessary for Company's employees, agents or representatives to enter the property on which said measuring equipment is located, Customer will acquire such easements, and agrees that the Service Agreement will not become effective until and unless such easements are acquired.

(c) Company will read the meter(s) measuring the consumption at Customer's facility at the conclusion of each billing month. Upon the request of Company, the Customer shall read such meter(s) at reasonable intervals and provide such readings to Company. Measurement shall be governed by any applicable provisions of Company's tariff, and any applicable regulations of the Pennsylvania Public Utility Commission. The pressure base shall be fourteen and sixty-five hundredths (14.65) pounds per square inch absolute. No volumetric adjustments shall be made to compensate for the difference between this pressure base and the pressure base identified in Paragraph (a) above.

(d) Each party shall have constant access to the meters and access, upon reasonable notice and during business hours, to meter charts and records.

(e) Measurement of production gas at receipt meters shall be calculated following the recommendations of the ANSI/API 2530 "Orifice Metering of Natural Gas and Other Related Hydrocarbon Fluids" (A.G.A. Report No. 3) including the A.G.A. Manual for Determination of Supercompressibility Factors of Natural Gas or the A.G.A. Transmission Measurement Committee Report No. 8 "Compressibility and Supercompressibility for Natural Gas and Other Hydrocarbon Gases" or the ANSI B109.3 "Standard for Rotary Meters" and "Measurement by Turbine Meters - Volumetric Flow Measurement" (A.G.A. Report No. 7), as appropriate to the type of measurement installed at the receipt facility, including any revisions applying thereto. If the receipt facility gas flow characteristics are such that calculations cannot be performed consistent with the above-mentioned recommendations due to a decline in production or other operational matters, the Company shall have the right to turn off a meter until a replacement meter meeting the above specifications is installed.

(C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

(f) Prior to September 30, 2013 a producer or operator of a receipt facility with gas flow characteristics such that calculations cannot be performed consistent with paragraph (e) above may request that the Company retrofit such facility with acceptable metering equipment. The Company shall not bear any facilities or installation cost, other than purchase of replacement metering, necessary to address the conditions that resulted in the meter turn off. Such request shall be made within 60 days of notification from the Company that it will be exercising its right to turn off the meter and does not restrain the Company's right to turn off a meter until a replacement meter meeting the above specifications in paragraph (e) above is installed.

(C)

C. WARRANTY OF TITLE

Customer warrants the title to all gas delivered to Company from Customer or on behalf of Customer and shall indemnify and save harmless Company from all suits, actions, accounts, costs, losses and expenses (including attorney's fees) arising from or connected with the adverse claim of any person or persons to the gas received, transported or delivered. Customer assumes all responsibility for all royalties, licenses, taxes and charges to which the gas transported, or the transportation service, may be subject.

D. LIABILITY

(a) It is expressly agreed and understood that until gas is delivered to Company for transportation, Customer shall be deemed to be in exclusive possession and control thereof and shall be solely liable and responsible for, and shall indemnify, protect, save harmless and undertake the defense of Company, of and from all losses, claims (whether groundless or not), damages, injuries (including death), suits, actions, debts, accounts, liens, liabilities, costs and expenses including without limitation, legal fees and costs, which Company may sustain, incur, pay or lay out by reason of, arising from or occasioned by such possession and control.

(b) Customer acknowledges that Company has made no guarantees regarding the volumes of gas it will be able to receive from Customer or on behalf of Customer at the specified receipt points, and Company shall not be liable to Customer should actual receipts prove to be less than the levels expected by Customer, its supplier, or Company.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

E. MISCELLANEOUS PROVISIONS

(a) Customer or a party appointed by the customer to act on Customer's behalf shall provide Company with nominations setting forth, by source, the volume to be transported by Company following procedures set forth in the Company's Operational Procedures Manual.

(b) The Customer appoints the party(ies) identified in the NFGDC Customer Agency Agreement form as its agent(s) for purposes of making such nominations and determining the proper allocation of volumes among all affected customers. All allocation methods are subject to the prior approval of Company.

(c) Deliveries of gas by or on behalf of Customer to Company at point(s) of receipt hereunder shall be made against the line pressure existing in Company's pipeline from time to time at a maximum pressure designated by Company from time to time. Company shall not be obligated to decrease such line pressure, and Customer shall not compress the gas delivered to Company without the prior approval of Company, which shall not be unreasonably withheld.

(d) Company will retain a percentage of the total volumes received by Company for the account of Customer as a loss allowance.

29. MARKET PRICE OF NATURAL GAS

For use within rate schedules in this Tariff, the Monthly Market Index ("MMI") shall be equal to the MCF equivalent of the highest volume weighted average price during the month, at Tennessee Gas Pipeline's Zone 4 200 Line Trading Hub, referred in the SNL Natural Gas Index ("SNL") as "TGP Z 4 200L" which will serve as the Company's Market Index Point. The Daily Market Index ("DMI") shall be equal to the MCF equivalent of the volume weighted average price for the applicable date, at the Market Index Point.

Where transportation costs reflecting the cost of delivering gas to the Company's city gate are added to the MMI or the DMI to determine the market price of natural gas as applied by the Company under tariff rate schedules, such costs, unless explicitly stated otherwise, reflect the variable costs of using the associated pipeline capacity, e.g. commodity transportation rates, fuel retention and other variable usage surcharges, as applicable.

(C)

Should a price for the Market Index Point be temporarily unavailable during any period, the Company may, at its discretion, select a substitute representative price in the interim. If the Market Index Point price becomes unavailable on a permanent basis, the Company will file to change this section and may, at its discretion, select a substitute representative price in the interim, subject to refund.

30. RULES FOR MONTH END IMBALANCE RESOLUTION

The Imbalance Holder is the Customer or Supplier responsible for imbalance resolution as described in Rate Schedules MMNGS or SATS, under which the Company provides service. For the purposes herein, Imbalance Holder's gas consumption and deliveries to the Company are equivalent to the gas consumption and deliveries to the Company of the MMT or SATC Customers, respectively, for which it bears imbalance responsibility.

(C) Indicates Change

Voluntarily Suspended to May 1, 2016

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

An Imbalance Holder's Month End Imbalance is the burner tip imbalance for which the Imbalance Holder bears imbalance responsibility, pursuant to terms of Rate Schedules MMNGS or SATS. Generally, an Imbalance Holder's total receipt volumes (gas delivered to the Company) are the sum of allocated transportation receipt volumes from city gate deliveries, local production pool receipts and local production excess volumes. This sum is reduced for shrinkage (allowance for losses incurred in the process of delivery) to determine total receipts. From this quantity, Total Monthly Consumption ("TMC"), as measured or estimated, is subtracted to determine the imbalance volume.

A Deficiency Imbalance (imbalance owed to the Company) occurs when the volume of gas delivered to the Company for the Imbalance Holder during the month after adjustment for line losses is less than the total amount of gas consumed by the Imbalance Holder.

a. Month End Imbalance Calculation Process

For the month during which the Company provided service, an Imbalance Holder's imbalances are summed across all eligible Service Classifications to determine an Initial System Imbalance Volume ("ISIV") and position. If the ISIV is greater than zero, then the Imbalance Holder has a Surplus Imbalance with an initial long position. If the ISIV is less than zero, then the Imbalance Holder has a Deficiency Imbalance with an initial short position. A measure of the Imbalance Holder's imbalance position is calculated by dividing its ISIV by its TMC and converting the quotient into a percentage.

b. Cash Out of Imbalances

To resolve a Surplus Imbalance, the Company will purchase a volume of gas from the Imbalance Holder to reduce the imbalance volume to zero ("Cash Out Purchase"). To resolve a Deficiency Imbalance, the Company will sell a volume of gas to the Imbalance Holder to reduce the imbalance volume to zero ("Cash Out Sale"). The actual cash out volumes will be based upon ending imbalance volume following application of prior period adjustments and exchange of imbalances as described below.

The rate for cash out will be the Average Daily Market Index ("ADMI"), which is the average of each day's DMI, plus transportation costs reflecting the cost of delivering gas to the Company's city gate, during the month set forth in Rule 29. The cash out pricing tiers and applicable rates are as follows:

<u>Tier</u>	<u>Transaction</u>	<u>Imbalance Position</u>	<u>Rate</u>
Surplus Pricing Tier 3	Purchase	>20 % long	60 % of ADMI
Surplus Pricing Tier 2	Purchase	15% to 20 % long	85 % of ADMI
Surplus Pricing Tier 1	Purchase	5% to 15 % long	90 % of ADMI
Market Pricing Tier	Purchase or Sale	5 % long to 5% short	100% of ADMI
Deficiency Pricing Tier 1	Sale	5% to 15% short	110% of ADMI
Deficiency Pricing Tier 2	Sale	15% to 20% short	115% of ADMI
Deficiency Pricing Tier 3	Sale	>20% short	140% of ADMI

The Company will sum the ISIV and TMC for all Imbalance Holders into system totals. A System Imbalance Position ("SIP") will be computed by dividing the system total ISIV by the system total TMC and converting the quotient into a percentage. If the SIP is within the range 5% long to 5% short, then all Imbalance Holders will be assigned to the Market Pricing Tier.

(C) Indicates Change

Voluntarily Suspended to April 13, 2012

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

Based upon its initial system imbalance position, the Imbalance Holder will be assigned to an initial pricing tier. Before the start of imbalance trading, an Imbalance Holder's Pre-Trading System Imbalance Volume ("PSIV") will be calculated by applying prior period adjustments, if any, to its ISIV. The Imbalance Holder's pre-trading imbalance position is calculated by dividing its PSIV by its TMC and converting the quotient into a percentage. If the resulting imbalance percentage moves closer to zero, the Imbalance Holder will be assigned to a pre-trading pricing tier based upon the adjusted percentage. If the resulting imbalance percentage moves further from zero, the Imbalance Holder will be assigned to a pre-trading pricing tier equal to the initial pricing tier. If the direction of imbalance reverses (Surplus Imbalance to Deficiency Imbalance or Deficiency Imbalance to Surplus Imbalance), the pre-trading pricing tier assigned to the Imbalance Holder will be the Market Pricing Tier.

c. Exchange of Month End Imbalances

The Company will provide Imbalance Holders with the means to exchange Month End Imbalances. Trading sessions will be scheduled to begin on the 10th business day following the end of the month (approximately on the 15th of the month). Morning and afternoon trading sessions will be conducted over a three business day period. Notice of any delay or alteration of the trading schedule will be posted on the Company's web site. Upon request of the Imbalance Holder, the Company will provide other Imbalance Holders with information regarding the Imbalance Holder's imbalance status for the month.

Each trade must improve an Imbalance Holder's imbalance position, i.e. the resulting imbalance volume must be closer to zero. In no event will the Company process trades that worsen an Imbalance Holder's imbalance volume. The Imbalance Holder's post-trading or Final System Imbalance Volume ("FSIV") will be calculated by adding the volumes from its trades to the PSIV.

d. Post-Trading Resolution and Application of Cash Out Tiers

An Imbalance Holder's post-trading imbalance position is calculated by dividing its FSIV by its TMC and converting the quotient into a percentage. The Imbalance Holder's post-trading imbalance position will be used to determine the post-trading imbalance tier for cash out, however, the post-trading imbalance tier will not be worse than the pre-trading imbalance tier.

If the volumetric range of the Imbalance Holder's Market Pricing Tier for a month is significantly smaller or otherwise inconsistent with that occurring during the normal course of business, the Company may override the post-trading imbalance tier calculation for that month and assign the Imbalance Holder to the Market Pricing Tier. Examples of such circumstances are:

- During the initial month in which an Imbalance Holder has an imbalance resulting from service under an eligible Service Classification as described above.
- During the final month in which an Imbalance Holder has an imbalance resulting from service under an eligible Service Classification as described above.

For customer pools where the Company assigns an ADDQ, if the Imbalance Holder's total receipt volumes are within 2% of the total monthly ADDQ for each pool, the Imbalance Holder will be assigned to the Market Pricing Tier. For MMT pools where the Company does not assign an ADDQ, the TMC for each pool will be substituted

(C) Indicates Change

Voluntarily Suspended to April 13, 2012

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont')

for the ADDQ. Additionally, if an Imbalance Holder's FSIV is less than 1,000 Mcf, it will be assigned to the Market Pricing Tier. If the Imbalance Holder does not qualify for the Market Pricing Tier under either of these safe harbors, then the Imbalance Holder's FSIV will be used to determine imbalance pricing.

The Imbalance Holder will be cashed out at the tiers, beginning at the tiers furthest from the Market Pricing Tier until the imbalance volumes within all the tiers are reduced to zero. The Market Pricing Tier will be cashed out after all other tiers have been cashed out.

Cash Out Sales and Cash Out Purchases will be reflected on the next bill issued by the Company to the Imbalance Holder following the conclusion of trading sessions.

31. CHANGES OF RULES AND REGULATIONS

The Company reserves the right to modify, alter or amend the foregoing Rules and Regulations and to make such further and other rules and regulations as experience may suggest or the Company may deem necessary or convenient in the conduct of its business provided, however, that such modifications, alterations, or amendments shall not become effective unless and until included in this tariff.

32. RENEWABLE NATURAL GAS

Renewable Natural Gas or RNG is Pipeline compatible gaseous fuel derived from biogenic or other renewable sources that has lower lifecycle CO₂e emissions than geological natural gas. Examples include pipeline compatible gas derived from wastewater treatment plants, landfill gas, anaerobic digestion gas, power to gas from renewable electricity or syngas.

The operating procedures applicable to RNG are provided in the Company's Operational Procedures Manual. Parties wishing to produce RNG for delivery into Distribution's system, i.e. RNG Operators, are required to execute an RNG Interconnect Agreement as a condition of access.

RNG produced and delivered into the Company's system must meet the Company's RNG Quality Standards, as specified in the RNG Interconnect Agreement, as well as the gas quality standards specified in Rule 28 of this tariff.

33. DATA SECURITY AGREEMENT

As a condition of access to customer information via publicly available Company business systems, including but not limited to web portals, the Company will require parties requesting such access to sign a Data Security Agreement and require that parties carry and maintain Cybersecurity insurance in an amount no less than \$5,000,000 per incident. A standard form Data Security Agreement will be provided in the Company's Operational Procedures Manual.

Such requirement shall not apply to customers with usage less than 5,000 mcf per year that seek to access their own customer account information. Further, the Company may accept Cybersecurity insurance provided under another agreement, provided that such agreement is substantially identical in form and effect as the standard form Data Security Agreement.

(C) Indicates Change

RESIDENTIAL SERVICE RATE SCHEDULE

RESIDENTIAL CLASSIFICATION

This classification shall include gas supplied for residential purposes such as a private dwelling, apartment house with a single meter supplying four or less dwelling units, separately metered apartments of a multiple dwelling, accessory buildings to dwellings or apartment houses such as garages, except at residences receiving service under Rate Schedule LIRAS for Low Income Residential Assistance Service and other places of residence where gas is used for residential purposes.

Churches and missions (places of worship) shall be entitled to Service under the Residential service rate schedule.

AVAILABILITY OF SERVICE

Gas Service shall be available at one location, except as otherwise provided, for residential customers.

APPLICABILITY

Applicable in all areas served under this tariff.

MONTHLY RATE

Basic Service Charge

\$12.00 per Month

Distribution Charges

32.201¢ per 100 cubic feet for the first 5,000 cubic feet (I)
23.050¢ per 100 cubic feet for all over 5,000 cubic feet (I)

Gas Adjustment Charge

8.383¢ per 100 cubic feet Purchased Gas Cost Component (I)
(Rider A)
0.187¢ per 100 cubic feet Merchant Function Charge (I)
(Rider G)
8.570¢ Per 100 cubic feet Total Gas Adjustment Charge (I)

(D) Indicates Decrease

(I) Indicates Increase

RESIDENTIAL SERVICE RATE SCHEDULE (cont.)

Natural Gas Supply Charge			
78.998¢	per 100 cubic feet	Purchased Gas Cost Component (Rider A)	(I)
1.762¢	per 100 cubic feet	Merchant Function Charge (Rider G)	(I)
<u>1.050¢</u>	per 100 cubic feet	Gas Procurement Charge (Rider H)	
81.810¢	per 100 cubic feet Charge	Total Natural Gas Supply	(I)

The Natural Gas Supply Charge shall include a Merchant Function Charge (Rider G) to recover uncollectible costs associated with purchase gas costs of 2.2301% and the Gas Procurement Charge (Rider H) to recover costs of procuring natural gas pursuant to 52 Pa. Code §62.223. The above rates shall be subject to surcharges in accordance with the provisions of Rider B - State Tax Adjustment Surcharge and Rider F - LIRA Discount Charge as set forth in this tariff.

RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, the supply of gas service under this rate schedule.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE LIRAS
FOR LOW INCOME RESIDENTIAL ASSISTANCE SERVICE

AVAILABILITY OF SERVICE

Service under this rate schedule shall be available to residential customers. The residential customers shall be the residential heating customers who have a gross household income less than or equal to 150% of the Federal Poverty level, are payment troubled (i.e. must have an arrearage on the account at the time of application or must have at least one current, canceled, or defaulted arrangement on the account at the time of application) and execute a LIRA Service Agreement with the Company. Customers under the Company's CARES program that meet the income qualifications shall be eligible for this rate.

RESPONSIBILITY OF A LIRA CUSTOMER

1. All adult members of the household must become ratepayers, excluding children of the ratepayers who are dependents and dependents over 65 under federal tax rules.
2. All household income must be verified.
3. Monthly payments (budget) are required to avoid termination of service.
4. No extensions or arrangements (to avoid termination of service) will be offered to LIRA customers.
5. The ratepayer must agree to receive weatherization services, if qualified.
6. The ratepayer must agree to apply annually for LIHEAP, if qualified.

APPLICATION PROCESS

Prospective LIRA customers must complete the application form and agree:

1. To be enrolled in the Budget Plan.
2. To provide satisfactory verification to prove income eligibility. In addition, an applicant must provide the name and social security numbers or other verifiable form of identification of all persons residing with the applicant. Adult residents in the household (over the age of 18), excluding children of the ratepayers who are dependents and dependents over 65 under federal tax rules, will be required to become ratepayers as a condition of participation in LIRA. In addition, applicants must have their income verified periodically and advise the company if their income or household size changes. (C)
3. To receive the services of the Low Income Usage Reduction Program if they meet the eligibility requirements.
4. To apply annually for LIHEAP, if qualified.

(C) Indicates Change

MONTHLY RATE

(C)

After completion of selection of the customers to receive service under this rate schedule, the following percentage discounts shall be applied to the Residential Rate Schedule Basic Service Charge, Distribution Charge, Gas Adjustment Charge and Natural Gas Supply Charge:

Program changes associated with the Order at Docket Nos. R-00072420 and M-00072019 will be implemented the first calendar day of the month following the entry date of the Commission Order if the entry date is at least 5 days prior to the first calendar day of the month. If the entry date is within the 5-day window, program changes will become effective the first day of the subsequent calendar month.

The above rates shall be subject to surcharges in accordance with the provisions of Rider B - State Tax Adjustment Surcharge as set forth in this tariff. The above rates shall be changed to reflect changes to purchased gas cost rates. (C)

REAPPLICATION FOR LIRA AT A NEW ADDRESS

When one or more LIRA customers move to a new address, it will be necessary for each of them to be identified on a new LIRA application. Reapplication is necessary in order to verify the household income and to determine each adult household member who will become responsible for paying the bills at the new address. If a ratepayer, or any of the adult members of the household, has an overdue balance from a previous account, that balance will be reflected on the first LIRA bill at the new address. If a previous account was terminated for nonpayment, the ratepayer(s) must, in addition, pay a down payment toward an arrangement covering pre-LIRA Program unforgiven balances. A customer who moves to a new premise can continue with the arrearage forgiveness component of the program for the remaining months not used.

ARREARAGE FORGIVENESS

Holds are established for the preprogram arrearages. These arrearages will be shown on LIRA customer's bills. Each month the Budget Plan amount is paid on time, one twenty-fourth of the amount eligible for forgiveness is eliminated.

When a LIRA customer moves to a new address, the remaining months for arrearage forgiveness can be utilized at the new address. The hold would be placed on the new account indicating the original amount of the arrearage forgiveness and the current amount to be held or considered for forgiveness.

LIHEAP

All LIHEAP grants will be applied to the customers' LIRA program responsibility in accordance with applicable Department of Public Welfare vendor requirements.

(C) Indicates Change

TERMINATION PROCESS

(C)

During the period April 1 through November 30:

1. If a LIRA customer fails to pay a monthly LIRA budget billing, the Company's collection process will begin. This process includes all required regulatory notification and procedural steps. The actual termination notices mailed to LIRA customers will reflect the means for avoiding termination of service.
2. To avoid termination of service, the LIRA customer must pay the amount set forth in the termination notice prior to the scheduled termination date.
3. The delinquent LIRA participant will not be offered a payment arrangement or an extension to avoid termination of service.
4. Medical Certificates will be honored for LIRA customers.
5. When a customer contacts the Company and states that he or she is unable to pay the notice amount prior to the termination date, an extension beyond the termination date will not be granted.
6. Service will be terminated if the customer fails to pay the notice amount (and no certified medical condition exists).

Termination notices will not be sent from December 1 until the First cycle billing control that produces a proposed termination date of April 1 or later. Any customer who has missed any payments over the winter months will be sent a notice for termination for the missed payments. The number of missed payments should not exceed 5 months except in extenuating circumstances such as a medical certification or a complaint to the Bureau of Consumer Services.

RECONNECTION PROCESS

A ratepayer whose service is reconnected due to the submission of a medical certificate will not be reinstated in the LIRA program until all requirements are met equal to those that would apply for that same customer seeking reconnection without a medical certificate.

Generally, in order to have service reconnected, the LIRA customer must:

1. Pay a reconnection charge.
2. Pay the entire arrearage which accrued while a LIRA Program participant (including the current bill if after the due date).
3. If the account had a preprogram arrearage, they will be eligible for continued arrearage forgiveness opportunities if they completely pay their LIRA program arrears and if they have remaining forgiveness months remaining. If they are not eligible for arrearage forgiveness:
 - a. The customer may be required to pay part or all of the arrearage prior to reconnection in accordance with 66 Pa. C.S.A. §1407(c)(2)(i);
 - b. The Company may negotiate a payment arrangement regarding the preprogram arrearage; and
 - c. The duration of any negotiated payment arrangement will depend upon factors such as size of the unpaid LIRA balance, the ability of the ratepayer to pay, the payment history of the ratepayer, and the length of time over which the balance accumulated.

(C) Indicates Change

RECONNECTION PROCESS (Cont',)

(C)

All customers listed on the account are responsible for the balance accrued while a LIRA participant. The terms for reconnection will apply to each adult resident as a ratepayer, unless the resident can demonstrate to the Company's satisfaction extenuating circumstances including, but not limited to, divorce, abandonment, or spousal abuse, where the spouse has established a separate residence.

Should a LIRA customer be shut off after negotiating a payment arrangement as described in 3(b) and (c) above, he or she would be required to pay the entire arrearage owing to have service restored. No arrangement will be offered on either the missed LIRA payments or the pre-program arrearage.

REVERIFICATION PROCESS

Active LIRA accounts are reverified periodically to determine changes in income or household size that might affect program eligibility.

The LIRA reverification process will require participants to reverify their status every two years unless their household situation changes or they report zero income, inexplicable increased consumption and/or have not received LIHEAP. As recommended by the Universal Service evaluation, those customers would be required to reverify their status upon request.

RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, gas service under this rate schedule.

(C) Indicates Change

Issued: December 18, 2007

Effective: January 1, 2008

(C)

THIS PAGE INTENTIONALLY LEFT BLANK

COMMERCIAL AND PUBLIC AUTHORITY
SERVICE RATE SCHEDULE

COMMERCIAL CLASSIFICATION

A Commercial customer shall be defined as a customer using gas in wholesale or retail trade, agriculture, forestry, fisheries, transportation, communications, sanitary services, finance, insurance, real estate and services such as clubs, hotels, auto repair, etc.

A religious or nonprofit organization, whose support is primarily from private funds shall be classified as a Commercial customer. Churches and missions (places of worship) may choose to be classified as Commercial customers, and, upon, choosing to receive service as a Commercial customer, shall remain a Commercial customer for at least twelve months. (C) (C) (C)

The nature of the customer's primary business or economic activity at the location of service determines the customer classification.

PUBLIC AUTHORITY CLASSIFICATION

This classification shall include gas supplied to buildings, offices and institutions occupied or operated by governmental agencies whose financial support is entirely or primarily obtained from public funds.

AVAILABILITY OF SERVICE

Gas service shall be available at one location, except as otherwise provided, for any Commercial or Public Authority customers. Customers served under this rate schedule will be billed according to their annual consumption level as follows. Those customers with actual deliveries of 1,000,000 cubic feet (1,000 Mcf) or less during the twelve billing months of the calendar year preceding the next-succeeding Application Period, as defined in this rate schedule, shall be considered to be a "Small" Commercial or Public Authority customer. In addition, the Small Customer category shall be further subdivided by customers who use not more than 250,000 cubic feet per year and those whose usage is more than 250,000 cubic feet but not more than 1,000,000 cubic feet per year. Those customer with actual deliveries in excess of 1,000 Mcf during the twelve billing months of the calendar year preceding the next-succeeding Application Period, as defined in this rate schedule, shall be considered to be a "Large" Commercial or Public Authority customer. The actual deliveries of gas to the Customer shall include not only volumes of gas purchased from the Company by such Customer but also volumes of Customer-owned gas transported by the Company to such Customer.

(C) Indicates Change

COMMERCIAL AND PUBLIC AUTHORITY
SERVICE RATE SCHEDULE

AVAILABILITY OF SERVICE (Cont'd)

A proposed new Commercial or Public Authority Customer, at a premises not (C)
previously receiving any service from the Company, shall be considered a
"Small" Commercial/Public Authority Customer unless both the Company and the
Customer agree that the projected total volume of gas, including not only
volumes of gas to be purchased from the Company by such Customer but also
volumes of Customer-owned gas projected to be transported by the Company to
such Customer, measured in thousand cubic feet (Mcf), will be not less than
1,000 Mcf during the succeeding twelve months. A proposed new Commercial or
Public Authority Customer, at a premises previously receiving service from the
Company shall be classified at the same rate as the previous Commercial or (C)
Public Authority Customer at the premises unless the Company and the Customer
agree that the projected total volume of gas to be transported by or purchased
from the Company and consumed by the Customer justifies a different rate
classification. |

COMMERCIAL AND PUBLIC AUTHORITY SERVICE RATE SCHEDULE (cont.)

APPLICABILITY

Applicable in all areas served under this tariff.

MONTHLY RATE

For "Small" Commercial/Public Authority Customers using not more than 250,000 cubic feet per year:

Basic Service Charge			
\$19.89	per Month		
Distribution Charges			
27.204¢	per 100 cubic feet for the first 5,000 cubic feet		(I)
24.280¢	per 100 cubic feet for all over 5,000 cubic feet		(I)
Gas Adjustment Charge			
8.383¢	per 100 cubic feet	Purchased Gas Cost Component (Rider A)	(I)
<u>0.019¢</u>	per 100 cubic feet	Merchant Function Charge (Rider G)	(I)
8.402¢	per 100 cubic feet	Total Gas Adjustment Charge	(I)
Natural Gas Supply Charge			
78.998¢	per 100 cubic feet	Purchased Gas Cost Component (Rider A)	(I)
0.181¢	per 100 cubic feet	Merchant Function Charge (Rider G)	(I)
<u>1.050¢</u>	per 100 cubic feet	Gas Procurement Charge (Rider H)	(I)
80.229¢	per 100 cubic feet	Total Natural Gas Supply Charge	(I)

The Natural Gas Supply Charge shall include a Merchant Function Charge (Rider G) to recover uncollectible costs associated with purchase gas costs of 0.2285% and the Gas Procurement Charge (Rider H) to recover costs of procuring natural gas pursuant to 52 Pa. Code §62.223.

The above rates shall be subject to surcharges in accordance with the provisions of Rider B - State Tax Adjustment Surcharge as set forth in this tariff.

RESERVED FOR FUTURE USE

COMMERCIAL RIDER BDS
BUSINESS DEVELOPMENT SERVICE RIDER

APPLICABILITY

Throughout the territory served under this tariff.

AVAILABILITY OF SERVICE

This Rider is available to Commercial customers with regard to sales service under the Commercial and Public Authority Rate Schedule. This rider is not available with regard to service under Rate Schedule CPA-LBS.

TERM

To become effective on the first day of the next billing cycle following qualification and acceptance by the Company and to continue during the qualification period for five (5) years.

QUALIFICATIONS

1. Facility

The following shall be considered a "qualifying facility":

A. For new customers:

- (1) a newly-constructed facility; or
- (2) an existing facility that has been purchased, or leased, and has been vacant for at least six (6) months.

B. For existing customers:

- (1.) any combination of new employment or investment which is equal to at least 10 percent (10%) of the existing customer's historical level of employment at the time of application. For purposes of this subsection, an investment in plant facilities of \$15,000 shall be considered equivalent to one new employee.

2. Gas Usage

A. New Customers

The gas consumed by an applicant, at a qualifying facility, shall be eligible for this rate, if it is demonstrated that the facility will have gas consumption in excess of 2,400 Mcf per year.

B. Existing Customers

Incremental gas consumed by an applicant, at a qualifying facility, shall be eligible for this rate provided that the incremental load is 20% of the applicant's prior year's normalized load or 2,400 Mcf per year, whichever is less. However, such incremental usage will not qualify unless the incremental load will be 1,200 Mcf per year. To determine qualifying gas usage, the incremental load will be measured against the gas consumed by the applicant, normalized over the most recent twelve-month period preceding the date of application for which data are available.

3. Classification

Applicants who qualify for one of the following classifications, pursuant to the Standard Industrial Classification Manual (1972 edition, as amended) will be eligible for this rider:

Wholesale Trade Division -
major groups 50 and 51

Finance, Insurance and Real Estate Division -
major groups 60, 61, 62, 63 and 67

4. Application

Applications for the rate must be received by the Company at least ninety (90) days, but not more than eighteen (18) months, prior to start-up of the qualifying facility.

RATES

New Commercial customers who qualify for service under this Rider will receive a reduction to the otherwise applicable commodity rate, as stated below, for all gas usage. Existing Commercial customers who qualify for service under this Rider will receive a reduction to the otherwise applicable commodity rate, as stated below for the qualifying portion of gas usage as determined in Qualifications Section 2.B, above. Customer charges and penalties, if any, under the Commercial and Public Authority Rate Schedule, are not subject to reduction.

A. Amount of the Reduction

For years one, two and three of the qualification period, there shall be a reduction of \$0.02 per 100 cubic feet of qualifying consumption under the Commercial and Public Authority Rate Schedule.

For years four and five of the qualification period, there shall be a reduction of \$0.01 per 100 cubic feet of qualifying consumption under the Commercial and Public Authority Rate Schedule.

OTHER PROVISIONS

Except as modified by the terms of this Rider, all provisions of the Commercial and Public Authority Rate Schedule apply to service to the customer.

Rate Schedule CPA-LBS

LOAD BALANCING SERVICE
FOR COMMERCIAL AND PUBLIC AUTHORITY CUSTOMERS

I. APPLICABILITY

Throughout the territory served under this tariff.

II. AVAILABILITY

Sales Service and Transportation Service under this rate schedule are available to Commercial and Public Authority customers that execute an agreement for one or more twelve month periods of service under this rate schedule for incremental load used in load balancing facilities, or where, in the judgment of the Company, existing load would be displaced by an alternate fuel or an alternate source of gas. For the purposes of this rate schedule, "incremental load" shall consist of the following:

- (1) Any volume of gas used at gas-consuming facilities constructed or installed after May 20, 1989, that will result in additional or expanded use of gas received from the Company; or
- (2) Any volume of gas used at existing gas-consuming facilities of Customer at which the Customer has not used gas taken from the Company for at least twelve (12) consecutive months.

For the purposes of this rate schedule, "load balancing facilities" shall consist of any facilities of a Customer which use incremental load.

The Customer, in its sole discretion, must determine whether it will be more advantageous for the Customer to receive service for incremental load under this rate schedule or under the Commercial and Public Authority Service rate schedule.

The Customer's load balancing facilities shall be constructed in a manner satisfactory to the Company so that the Company will be able to meter the volume of gas used by the Customer in the load balancing facilities separately from gas used by the Customer in other facilities.

The Customer's load balancing facilities must be served by a discrete gas service supply system beyond the Company's meter. During business hours, the Company shall have the right to inspect Customer's facilities to determine whether Customer's facilities, including Customer's gas service supply system and load balancing facilities, meet the requirements of this rate schedule.

(C) Indicates Change

┌
(C)
└

In order to qualify for Service under this rate schedule, Customers must execute an agreement for service under this rate schedule within one (1) year after either: (1) the date of the completion of the installation of new gas-consuming facilities; or (2) the date that the Customer begins taking gas from the Company at existing facilities of the Customer which have not used gas taken from the Company for at least twelve (12) consecutive months.

III. NATURE OF SERVICE

Sales Service provided under this rate schedule shall be firm service up to the level of the Customer's Gas BDU level established below, subject to the curtailment priorities of Rule 26. Sales Service in excess of the Customer's Gas BDU level will be provided only to the extent that the Company determines, from time to time, that available gas supply and available system capacity are sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

Transportation Service provided under this rate schedule shall be firm Service up to the level of the Customer's Margin BDU level established below, subject to the curtailment priorities of Rule 26. Transportation Service in excess of the Customer's Margin BDU level will be provided only to the extent that the Company determines, from time to time, that available system capacity is sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

IV. MONTHLY BILL

The monthly bill, for sales service under this rate schedule, shall be the sum of the Demand Charges, as computed in Section A hereinafter, and the Commodity Charges for sales and for transportation service, as computed in Section B hereinafter.

A. DEMAND CHARGES

The monthly Demand Charges shall be the sum of (1) the product of multiplying the rate per Gas Billing Demand Unit (Gas BDU), determined as provided below, by the number of the Customer's Gas BDUs, determined as provided below, and (2) the product of multiplying the rate per Margin Billing Demand Unit (Margin BDU), determined as provided below, by the number of Margin BDUs, determined as provided below.

1. Gas Demand Charge

a. Determination of Rate Per Gas BDU

The rate per Gas BDU shall be determined as follows:

1. The purchased gas demand costs applicable to the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial classes, the "DC", shall be obtained from Rider "A" - Section 1307(f) Purchased Gas Costs.
2. The number 12 shall be multiplied by the sum of (a) the volume of gas (expressed in Mcf) purchased from the Company by all Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial customers, during the Company peak Sales Month and (b) the volume of service (expressed in Mcf) to all customers under the "Monthly Volume" provisions of Rate Schedule SB, during the Company Peak Sales Month.
 - (a) "Company Peak Sales Month" is defined as the calendar month within which the Company experienced the System-Wide Peak Sales Day, such month being December, January or February preceding the Section 1307(f) Application Period for which the determination of the rate per Gas BDU is being made.
 - (b) "System-Wide Peak Sales Day" is defined as the day of maximum gas purchased by the Company, including all volumes of gas purchased from the Company throughout its entire system in the states of Pennsylvania and New York.
3. The amount determined in Item 1 above shall be divided by the amount determined in Item 2 above to determine the amount included in the rate for recovery of purchased gas costs.
4. The rate per Gas BDU shall be the amount for purchased gas demand costs (Item 3).

The current rate per Gas BDU is as follows:

Purchased Gas Demand Cost	\$0.7125/BDU	(D)
---------------------------	--------------	-----

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made, under Items 1, 2 and 3, above, of the component to be included in the rate for purchased gas demand costs and the rate per Gas BDU shall be changed accordingly.

(D) Indicates Decrease

(I) Indicates Increase

b. Determination of Customer's Gas BDUs

The Customer's Gas BDUs shall be determined as follows: The actual volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities during such Customer's Peak Billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Gas BDUs applicable to Customer shall be zero (0).

2. Margin Demand Charge

a. The rate per Margin BDU shall be \$.5630 per Margin BDU. (I)

b. Determination of Customer's Margin BDUs

The Customer's Margin BDU shall be determined as follows: The actual deliveries of gas to the Customer by Company, including not only volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities but also volumes of Customer-owned gas transported to the Customer's load balancing facilities through the Company's facilities, during such Customer's Peak Billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the Customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Margin BDUs applicable to Customer shall be zero (0).

(I) Indicates Increase.

B. COMMODITY CHARGES FOR SALES AND FOR TRANSPORTATION SERVICE

1. Commodity Charge for Sales Service

The monthly Commodity Charge for Sales Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas sold to the Customer by the Company during the applicable billing cycle.

The rate per Mcf shall be determined as follows and shall be \$8.0964 (I)
per Mcf, subject to revision as provided below:

The current components of the rate are as follows:

Purchased Gas Commodity Costs, set forth in Rider "A"	\$7.5398/Mcf	(I)
Non Gas Costs	\$0.5566/Mcf	

a. Determination of Rate per Mcf

The rate per Mcf shall be the sum of:

1. The net amount per Mcf for recovery of the commodity component of purchased gas costs and for recovery or refund of "E" factor amounts, the "PGCC", as determined in Rider "A" - Section 1307(f) Purchased Gas Costs of this tariff;
plus
2. The amount of \$0.5566 per Mcf for recovery of non-gas costs.

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made of the commodity component of purchased gas costs (Item 1, above) and the rate per Mcf shall be changed accordingly. The component included in the rate for recovery of non-gas costs shall remain constant until changed in accordance with a procedure, other than a proceeding pursuant to Section 1307(f) of the Public Utility Code, 66 Pa.C.S. Section 1307(f).

2. Commodity Charge for Transportation Service

The monthly Commodity Charge for Transportation Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas transported by the Company to the Customer's load balancing facilities.

The rate per Mcf for transportation of gas under this rate schedule (D)
shall be \$0.9166 per Mcf, which includes \$0.5566 for recovery of non-gas costs
and \$0.3600 for recovery of purchased gas.

(D)

(D) Indicates Decrease

(I) Indicates Increase

V. SURCHARGE

The Demand Charges and the Commodity Charge for Sales Service and the Commodity Charge for Transportation Service shall be subject to surcharges in accordance with provisions of Rider B - State Tax Adjustment Surcharge.

VI. AMOUNTS TO BE INCLUDED IN OVER/UNDERCOLLECTION OF GAS COSTS

Purchased gas cost revenues billed under this rate schedule shall be included as revenues for recovery of gas costs for purposes of computing Factor "E" of Company's 1307(f) rate in accordance with procedures set forth in Rider "A" - Section 1307(f) Purchased Gas Costs.

VII. SPECIAL PROVISIONS

Monthly metered Special Provisions A through J contained in the Company's Rate Schedule for Transportation Service shall apply to transportation service under this rate schedule.

VIII. RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, the supply of gas service under this rate schedule.

SVIS

SMALL VOLUME INDUSTRIAL SERVICE RATE SCHEDULE

INDUSTRIAL CLASSIFICATION

An Industrial customer shall be defined as a customer using gas primarily in a process which grades or changes raw material or unfinished material into another form or product including establishments in mining and manufacturing. The nature of the customer's primary business or economic activity at the location served determines the classification.

If a particular load to a manufacturing or processing plant represents gas used for plant cafeteria or a heating load, with or without processing load, whether or not separately metered, the account shall be classified as Industrial.

AVAILABILITY OF SERVICE

Gas service shall be available at one location, except as otherwise provided, for Industrial customers. All industrial customers shall receive service under this rate schedule except industrial customers eligible for service under Rate Schedule IVIS for Intermediate Volume Industrial Service, Rate Schedule LVIS for Large Volume Industrial Service or under Rate Schedule LIS for Large Industrial Service. Customers served under this rate schedule will be billed according to their annual consumption level as follows. Those customers with actual deliveries of 1,000,000 cubic feet (1,000 Mcf) or less during the twelve billing months of the calendar year preceding the next-succeeding Application Period, as defined in this rate schedule, shall be considered to be a SVIS customer. The actual deliveries of gas to the Customer shall include not only volumes of gas purchased from the Company by such Customer but also volumes of Customer-owned gas transported by the Company to such Customer.

A proposed new Industrial Customer who does not qualify for the IVIS, LVIS or LIS Rate Schedules, not previously receiving any service from the Company, shall be considered a SVIS Customer unless both the Company and the Customer agree that the projected total volume of gas, including not only volumes of gas to be purchased from the Company by such Industrial Customer but also volumes of Customer-owned gas projected to be transported by the Company to such Customer, measured in thousand cubic feet (Mcf), will be not less than 1,000 Mcf during the succeeding twelve months.

APPLICABILITY

Applicable in all areas served under this tariff.

RESERVED FOR FUTURE USE

INTERMEDIATE VOLUME INDUSTRIAL SERVICE RIDER BDS
BUSINESS DEVELOPMENT SERVICE RIDER

APPLICABILITY

Throughout the territory served under this tariff.

AVAILABILITY OF SERVICE

This Rider is available to Industrial customers with regard to sales service under the Intermediate Volume Industrial Service Rate Schedule. This rider is not available with regard to service under Rate Schedule IVI-LBS.

TERM

To become effective on the first day of the next billing cycle following qualification and acceptance by the Company and to continue during the qualification period for five (5) years.

QUALIFICATIONS

1. Facility

The following shall be considered a "qualifying facility":

A. For new customers:

- 1) a newly-constructed facility; or
- 2) an existing facility that has been purchased, or leased, and has been vacant for at least six (6) months.

B. For existing customers:

- 1) any combination of new employment or investment which is equal to at least ten percent (10%) of the existing customer's historical level of employment at the time of application. For purposes of this subsection, an investment in plant facilities of \$15,000 shall be considered equivalent to one new employee.

2. Gas Usage

A. New Customers

The gas consumed by an applicant, at a qualifying facility, shall be eligible for this rate, if it is demonstrated that the facility will have gas consumption in excess of 2,400 Mcf per year.

B. Existing Customers

Incremental gas consumed by an applicant, at a qualifying facility, shall be eligible for this rate provided that the incremental load is 20% of the applicant's prior year's normalized load or 2,400 Mcf per year, whichever is less. However, such incremental gas usage will not qualify unless the incremental load totals at least 1,200 Mcf per year. To determine qualifying gas usage, the incremental load will be measured against the gas consumed by the applicant, normalized over the most recent twelve-month period preceding the date of application for which data are available.

3. Classification

Applicants who qualify for one of the following classifications, pursuant to the Standard Industrial Classification Manual (1972 edition, as amended) will be eligible for this rider:

Manufacturing Division - major groups 20 - 39

4. Application

Applications for the rate must be received by the Company at least ninety (90) days, but not more than eighteen (18) months, prior to start-up of the qualifying facility.

RATES

New Intermediate Volume Industrial Service customers who qualify for service under this Rider will receive a reduction to the otherwise applicable commodity rate, as stated below, for all gas usage. Existing Intermediate Volume Industrial Service customers who qualify for service under this Rider will receive a reduction to the otherwise applicable commodity rate, as stated below for the qualifying portion of gas usage as determined in Qualifications Section 2.B, above. Customer charges and penalties, if any, under the Intermediate Volume Industrial Service Rate Schedule, are not subject to reduction.

A. Amount of the Reduction

For years one, two and three of the qualification period, there shall be a reduction of \$0.02 per 100 cubic feet of qualifying consumption under the Intermediate Volume Industrial Service Rate Schedule.

For years four and five of the qualification period, there shall be a reduction of \$0.01 per 100 cubic feet of qualifying consumption under the Intermediate Volume Industrial Service Rate Schedule.

OTHER PROVISIONS

Except as modified by the terms of this Rider, all provisions of the Intermediate Volume Industrial Service Rate Schedule apply to service to the customer.

Rate Schedule IVI-LBS

LOAD BALANCING SERVICE
FOR INTERMEDIATE VOLUME INDUSTRIAL CUSTOMERS

I. APPLICABILITY

Throughout the territory served under this tariff.

II. AVAILABILITY

Sales Service and Transportation Service under this rate schedule are available to Intermediate Volume Industrial customers that execute an agreement for one or more twelve-month periods of service under this rate schedule for incremental load used in load balancing facilities, or where, in the judgment of the Company, existing load would be displaced by an alternate fuel or an alternate source of gas. For purposes of the rate schedule, "incremental load" shall consist of the following:

- (1) Any volume of gas used at gas-consuming facilities constructed or installed after May 20, 1989 that will result in additional or expanded use of gas received from the Company; or
- (2) Any volume of gas used at existing gas-consuming facilities of Customer at which the Customer has not used gas taken from the Company for at least twelve (12) consecutive months.

For purposes of this rate schedule, "load balancing facilities" shall consist of any facilities of a Customer which use incremental load.

The Customer, in its sole discretion, must determine whether it will be more advantageous of the Customer to receive service for incremental load under this rate schedule or under the Intermediate Volume Industrial Service rate schedule.

The customer's load balancing facilities shall be constructed in a manner satisfactory to the Company so that the Company will be able to meter the volume of gas used by the Customer in the load balancing facilities separately from gas used by the Customer in other facilities.

The Customer's load balancing facilities must be served by a discrete gas service supply system beyond the Company's meter. During business hours, the Company shall have the right to inspect Customer's facilities to determine whether customer's facilities, including Customer's gas service supply system and load balancing facilities, meet the requirements of this rate schedule.

In order to qualify for Service under this rate schedule, Customers must execute an agreement for service under this rate schedule within one (1) year after either: (1) the date of the completion of the installation of new gas consuming facilities; or (2) the date that the Customer begins taking gas from the Company at existing facilities of the customer which have not used gas taken from the Company for at least twelve (12) consecutive months.

(C) Indicates Change

(C)

III. NATURE OF SERVICE

Sales Service provided under this rate schedule shall be firm service up to the level of the Customer's Gas BDU level established below, subject to the curtailment priorities of Rule 26. Sales Service in excess of the Customer's Gas BDU level will be provided only to the extent that the Company determines, from time to time, that available gas supplies are sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

Transportation Service provided under this rate schedule shall be firm Service up to the level of the Customer's Margin BDU level established below, subject to the curtailment priorities of Rule 26. Transportation Service in excess of the Customer's Margin BDU level will be provided only to the extent that the Company determines, from time to time, that available gas supplies are sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

IV. MONTHLY BILL

The monthly bill, for sales service under this rate schedule, shall be the sum of the Demand Charges, as computed in Section A hereinafter, and the Commodity Charges for sales and for transportation service, as computed in Section B hereinafter.

A. DEMAND CHARGES

The monthly Demand Charges shall be the sum of (1) the product of multiplying the rate per Gas Billing Demand Unit (Gas BDU), determined as provided below, by the number of the Customer's Gas BDUs, determined as provided below, and (2) the product of multiplying the rate per Margin Billing Demand Unit (Margin BDU) determined as provided below, by the number of Margin BDUs, determined as provided below.

1. Gas Demand Charge
 - a. Determination of Rate Per Gas BDU

The rate per Gas BDU shall be determined as follows:

1. The purchased gas demand costs applicable to the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial classes, the "DC", shall be obtained from Rider "A" - Section 1307(f) Purchased Gas Costs.
2. The number 12 shall be multiplied by the sum of (a) the volume of gas (expressed in Mcf) purchased from the Company by all Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume

Industrial and Large Industrial customers, during the Company peak Sales Month defined in Rate Schedule CPA-LBS and (b) the volumes of service (expressed in Mcf) to all customers under the "Monthly Volume" provisions of Rate Schedule SB, during the Company Peak Sales Month defined in Rate Schedule CPA-LBS.

3. The amount determined in Item 1 above shall be divided by the amount determined in Item 2 above to determine the amount included in the rate for recovery of purchased gas costs.
4. The rate per Gas BDU shall be the amount for purchased gas demand costs (Item 3).

The current rate per Gas BDU is as follows:

Purchased Gas Demand Cost	\$0.7125/BDU	(D)
---------------------------	--------------	-----

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made, under Items 1, 2 and 3, above, of the component to be included in the rate for purchased gas demand costs and the rate per Gas BDU shall be changed accordingly.

b. Determination of Customer's Gas BDUs

The Customer's Gas BDUs shall be determined as follows: The actual volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities during such Customer's Peak billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Gas BDUs applicable to Customer shall be zero (0).

(D) Indicates Decrease

(I) Indicates Increase

2. Margin Demand Charge

a. The rate per Margin BDU shall be \$.5122 per Margin BDU.

b. Determination of Customer's Margin BDUs

The Customer's Margin BDUs shall be determined as follows: The actual deliveries of gas to the Customer by Company, including not only volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities but also volumes of Customer-owned gas transported to the Customer's load balancing facilities through the Company's facilities, during such Customer's Peak billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Margin BDUs applicable to Customer shall be zero (0).

B. COMMODITY CHARGES FOR SALES AND FOR TRANSPORTATION SERVICE

1. Commodity Charge for Sales Service

The monthly Commodity Charge for Sales Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas sold to the Customer by the Company during the applicable billing cycle.

The rate per Mcf shall be determined as follows and shall be \$7.9206 per (I) Mcf, subject to revision as provided below:

The current components of the rate are as follows:

Purchased Gas Commodity		
Costs, set forth in Rider "A"	\$7.5398/Mcf	(I)
Non Gas Costs	\$0.3808/Mcf	

a. Determination of Rate per Mcf

The rate per Mcf shall be the sum of:

1. The net amount per Mcf for recovery of the commodity component of purchased gas costs and for recovery or refund of "E" factor amounts, the "PGCC", as determined in Rider "A" - Section 1307(f) Purchased Gas Costs of this tariff; plus

(D) Indicates Decrease

(I) Indicates Increase

2. The amount of \$0.3808 per Mcf for recovery of non-gas costs.

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made of the commodity component of purchased gas costs (Item 1, above) and the rate per Mcf shall be changed accordingly. The component included in the rate for recovery of non-gas costs shall remain constant until changed in accordance with a procedure, other than a proceeding pursuant to Section 1307(f) of the Public Utility Code, 66 Pa.C.S. Section 1307(f).

2. Commodity Charge for Transportation Service

The monthly Commodity Charge for Transportation Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas transported by the Company to the Customer's load balancing facilities.

The rate per Mcf for transportation of gas under this rate schedule shall be \$0.7408 per Mcf, which includes \$0.3808 for recovery of non-gas costs and \$0.3600 for recovery of purchased gas. (D)

V. SURCHARGE (D)

The Demand Charges and the Commodity Charge for Sales Service and the Commodity Charge for Transportation Service shall be subject to surcharges in accordance with provisions of Rider B - State Tax Adjustment Surcharge.

VI. AMOUNTS TO BE INCLUDED IN OVER/UNDERCOLLECTION OF GAS COSTS

Purchased gas cost revenues billed under this rate schedule shall be included as revenues for recovery of gas costs for purposes of computing Factor "E" of Company's 1307(f) rate in accordance with procedures set forth in Rider "A" - Section 1307(f) Purchased Gas Costs.

VII. SPECIAL PROVISIONS

Monthly metered Special Provisions A through J contained in the Company's Rate Schedule for Transportation Service shall apply to transportation service under this rate schedule.

VIII. RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, the supply of gas service under this rate schedule.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE LVIS

LARGE VOLUME INDUSTRIAL SERVICE

INDUSTRIAL CLASSIFICATION

An Industrial Customer is a customer using gas primarily in a process which grades or changes raw material or unfinished material into another form or product including establishments in mining and manufacturing. The nature of the customer's primary business or economic activity at the location served governs, irrespective of whether a particular load to a manufacturing or processing plant represents gas used for plant cafeteria or a heating load, with or without processing load, whether or not separately metered.

APPLICABILITY

Applicable in all areas served under this tariff.

(C)

AVAILABILITY OF SERVICE

I. MANDATORY SERVICE

Service under this rate schedule is available to, and is mandatory for, Industrial Customers, except customers receiving service pursuant to Rate Schedule LIS - Large Industrial Service that meet any of the following criteria:

- A. The total of the Company's actual deliveries of gas to the Industrial Customer, including not only volumes of gas purchased from the Company by such Industrial Customer but also volumes of Industrial Customer-owned gas transported by the Company to such Industrial Customer, measured in thousand cubic feet (Mcf), during the twelve billing months of the calendar year preceding the next-succeeding Application Period, as defined in this rate schedule, shall have been not less than 50,000 Mcf; or
- B. A proposed new Industrial Customer, not previously receiving any service from the Company, for which the Company and the Industrial Customer agree that the projected total volume of gas, including not only volumes of gas to be purchased from the Company by such Industrial Customer but also volumes of Industrial Customer-owned gas projected to be transported by the Company to such Industrial Customer, measured in thousand cubic feet (Mcf), will be not less than 50,000 Mcf during the succeeding twelve months; or

(C) Indicates Change

LVIS

Large Volume Industrial Service (Cont'd)

- C. An Industrial Customer, for which the Company estimates that the total volumes of gas purchased from the Company or transported by the Company during the next succeeding twelve months will be not less than 50,000 Mcf, if the Industrial Customer has used total volumes of gas in at least one billing month of not less than 4,167 Mcf, even if the Customer disagrees with the Company's estimate.
- D. An Industrial Customer for which the Company estimates that total volumes of gas to be used by the customer during the next succeeding twelve months will not be less than 50,000 Mcf of gas per year whether the gas is purchased by the Industrial Customer from the Company, delivered by the Company to the Industrial Customer, or obtained by the customer from another source.

An Industrial Customer that meets the above criteria under this rate schedule at the beginning of an Application Period is required to continue to be subject to this rate schedule during all months of such Application Period. An Industrial Customer that meets the above criteria under this rate schedule during an Application Period is required to continue to be subject to this rate schedule during all or remaining months of such Application Period.

QUALIFICATIONS

1. Facility

The following shall be considered a "qualifying facility":

A. For new customers:

- (1) a newly-constructed facility; or
- (2) an existing facility that has been purchased, or leased, and has been vacant for at least six (6) months.

B. For existing customers:

- (1) any combination of new employment or investment which is equal to at least ten percent 10% of the existing customer's historical level of employment at the time of application. For purposes of this subsection, an investment in plant facilities of \$15,000 shall be considered equivalent to one new employee.

2. Gas Usage

A. New Customers

The gas consumed by an applicant, at a qualifying facility, shall be eligible for this rate, provided there is sufficient consumption to qualify for the Large Volume Industrial Service Rate Schedule.

B. Existing Customers

Incremental gas consumed by an applicant, at a qualifying facility, shall be eligible for this rate provided that the incremental load is greater than 12,000 Mcf per year and the total annual consumption is sufficient to qualify for the Large Volume Industrial Service Rate Schedule. To determine qualifying gas usage, the incremental load will be measured against the gas consumed by the applicant over the most recent twelve-month period preceding the date of application for which data are available.

3. Classification

Applicants who qualify for one of the following classifications, pursuant to the Standard Industrial Classification Manual (1972 edition, as amended) will be eligible for this rider:

Manufacturing Division - major groups 20 - 39

4. Application

Applications for the rate must be received by the Company at least ninety (90) days, but not more than eighteen (18) months, prior to start-up of the qualifying facility.

RATES

New Large Volume Industrial Service customers who qualify for service under this Rider will receive a reduction to the otherwise applicable commodity rate, as stated below, for all gas usage. Existing Large Volume Industrial Service customers who qualify for service under this Rider will receive a reduction to the otherwise applicable commodity rate, as stated below for the qualifying portion of gas usage as determined in Qualifications Section 2.B, above. Customer charges and penalties, if any, under the Large Volume Industrial Service Rate Schedule, are not subject to reduction.

A. Amount of the Reduction

For years one, two and three of the qualification period, there shall be a reduction of \$0.02 per 100 cubic feet of qualifying consumption under the Large Volume Industrial Service Rate Schedule.

For years four and five of the qualification period, there shall be a reduction of \$0.01 per 100 cubic feet of qualifying consumption under the Large Volume Industrial Service Rate Schedule.

OTHER PROVISIONS

Except as modified by the terms of this Rider, all provisions of the Large Volume Industrial Service Rate Schedule apply to service to the customer.

Rate Schedule LVI-LBS

LOAD BALANCING SERVICE
FOR LARGE VOLUME INDUSTRIAL CUSTOMERS

I. APPLICABILITY

Throughout the territory served under this tariff.

II. AVAILABILITY

Sales Service and Transportation Service under this rate schedule are available to Large Volume Industrial customers that execute an agreement for one or more twelve-month periods of service under this rate schedule for incremental load used in load balancing facilities, or where, in the judgment of the Company, existing load would be displaced by an alternate fuel or an alternate source of gas. For the purposes of this rate schedule, "incremental load" shall consist of the following:

- (1) Any volume of gas used at gas-consuming facilities constructed or installed after May 20, 1989, that will result in additional or expanded use of gas received from the Company; or
- (2) Any volume of gas used at existing gas-consuming facilities of Customer at which the Customer has not used gas taken from the Company for at least twelve (12) consecutive months.

For purposes of this rate schedule, "load balancing facilities" shall consist of any facilities of a Customer which use incremental load.

The Customer, in its sole discretion, must determine whether it will be more advantageous for the Customer to receive service for incremental load under this rate schedule or under the Large Volume Industrial Service rate schedule.

The Customer's load balancing facilities shall be constructed in a manner satisfactory to the Company so that the Company will be able to meter the volume of gas used by the Customer in the load balancing facilities separately from gas used by the Customer in other facilities.

The Customer's load balancing facilities must be served by a discrete gas service supply system beyond the Company's meter. During business hours, the Company shall have the right to inspect Customer's facilities to determine whether Customer's facilities, including Customer's gas service supply system and load balancing facilities, meet the requirements of this rate schedule.

In order to qualify for service under this rate schedule, Customers must execute an agreement for service under this rate schedule within one (1) year after either: (1) the date of the completion of the installation of new gas-consuming facilities; or (2) the date that the Customer begins taking gas from the Company at existing facilities of the Customer which have not used gas taken from the Company for at least twelve (12) consecutive months.

Service under this rate schedule shall not be subject to Rate Schedule BP - Service for customers with Bypass facilities.

(C) Indicates Change

(C)

III. NATURE OF SERVICE

Sales Service provided under this rate schedule shall be firm service up to the level of the Customer's Gas BDU level established below, subject to the curtailment priorities of Rule 26. Sales Service in excess of the Customer's Gas BDU level will be provided only to the extent that the Company determines, from time to time, that available gas supply and available system capacity are sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

Transportation Service provided under this rate schedule shall be firm Service up to the level of the Customer's Margin BDU level established below, subject to the curtailment priorities of Rule 26. Transportation Service in excess of the Customer's Margin BDU level will be provided only to the extent that the Company determines, from time to time, that available system capacity is sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

IV. MONTHLY BILL

The monthly bill, for sales service under this rate schedule, shall be the sum of the Demand Charges, as computed in Section A hereinafter, and the Commodity Charges for sales and for transportation service, as computed in Section B hereinafter.

A. DEMAND CHARGES

The monthly Demand Charges shall be the sum of (1) the product of multiplying the rate per Gas Billing Demand Unit (Gas BDU), determined as provided below, by the number of the Customer's Gas BDUs, determined as provided below, and (2) the product of multiplying the rate per Margin Billing Demand Unit (Margin BDU) determined as provided below, by the number of Margin BDUs, determined as provided below.

1. Gas Demand Charge
 - a. Determination of Rate Per Gas BDU

The rate per Gas BDU shall be determined as follows:

1. The purchased gas demand costs applicable to the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial classes, the "DC" shall be obtained under Rider "A" - Section 1307(f) Purchased Gas Costs.
2. The number 12 shall be multiplied by the sum of (a) the volume of gas (expressed in Mcf) purchased from the Company by all Residential,

Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial customers, during the Company Peak Sales Month defined in Rate Schedule CPA-LBS and (b) the volume of service (expressed in Mcf) to all customers under the "Monthly Volume" provisions of Rate Schedule SB, during the Company Peak Sales Month defined in Rate Schedule CPA-LBS.

3. The amount determined in Item 1 above shall be divided by the amount determined in Item 2 above to determine the amount included in the rate for recovery of purchased gas costs.
4. The rate per Gas BDU shall be the amount for purchased gas demand costs (Item 3).

The current rate per Gas BDU is as follows:

Purchased Gas Demand Cost	\$0.7125/BDU	(D)
---------------------------	--------------	-----

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made, under Items 1, 2 and 3, above, of the component to be included in the rate for purchased gas demand costs and the rate per Gas BDU shall be changed accordingly.

b. Determination of Customer's Gas BDUs

The Customer's Gas BDUs shall be determined as follows: The actual volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered qualifying load balancing facilities during such Customer's Peak billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered qualifying load balancing facilities that ended during on of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Gas BDUs applicable to Customer shall be zero (0).

(D) Indicates Decrease

(I) Indicates Increase

2. Margin Demand Charge

- a. The rate per Margin BDU shall be \$.3182 per Margin BDU.
- b. Determination of Customer's Margin BDUs

The Customer's Margin BDUs shall be determined as follows: The actual deliveries of gas to the Customer by Company, including not only volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities but also volumes of Customer-owned gas transported to the Customer's load balancing facilities through the Company's facilities, during such Customer's Peak billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Margin BDUs applicable to Customer shall be zero (0).

B. COMMODITY CHARGES FOR SALES AND FOR TRANSPORTATION SERVICE

1. Commodity Charge for Sales Service

The monthly Commodity Charge for Sales Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas sold to the Customer by the Company during the applicable billing cycle.

The rate per Mcf shall be determined as follows and shall be \$7.7871 per (I) Mcf, subject to revision as provided below:

The current components of the rate are as follows:

Purchased Gas Commodity		
Costs, set forth in Rider "A"	\$7.5398/Mcf	(I)
Non Gas Costs	\$0.2473/Mcf	

a. Determination of Rate per Mcf

The rate per Mcf shall be the sum of:

- 1. The net amount per Mcf for recovery of the commodity component of purchased gas costs and for recovery or refund of "E" factor amounts, the "PGCC", as determined in Rider "A" - Section 1307(f) Purchased Gas Costs of this tariff; plus

D) Indicates Decrease

(I) Indicates Increase

2. The amount of \$0.2473 per Mcf for recovery of non-gas costs.

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made of the commodity component of purchased gas costs (Item 1, above) and the rate per Mcf shall be changed accordingly. The component included in the rate for recovery of non-gas costs shall remain constant until changed in accordance with a procedure, other than a proceeding pursuant to Section 1307(f) of the Public Utility Code, 66 Pa.C.S. Section 1307(f).

2. Commodity Charge for Transportation Service

The monthly Commodity Charge for Transportation Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas transported by the Company to the Customer's load balancing facilities.

The rate per Mcf for transportation of gas under this rate schedule shall be \$0.6073 per Mcf, which includes \$0.2473 for recovery of non-gas costs and \$0.3600 for recovery of purchased gas. (D)

V. SURCHARGE (D)

The Demand Charges and the Commodity Charge for Sales Service and the Commodity Charge for Transportation Service shall be subject to surcharges in accordance with provisions of Rider B - State Tax Adjustment Surcharge as set forth in this tariff.

VI. AMOUNTS TO BE INCLUDED IN OVER/UNDERCOLLECTION OF GAS COSTS

Purchased gas cost revenues billed under this rate schedule shall be included as revenues for recovery of gas costs for purposes of computing Factor "E" of Company's 1307(f) rate in accordance with procedures set forth in Rider "A" - Section 1307(f) Purchased Gas Costs.

VII. SPECIAL PROVISIONS

Monthly metered Special Provisions A through J contained in the Company's Rate Schedule for Transportation Service shall apply to transportation service under this rate schedule.

VIII. RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, the supply of gas service under this rate schedule.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE LIS

LARGE INDUSTRIAL SERVICE

INDUSTRIAL CLASSIFICATION

An Industrial Customer is a customer using gas primarily in a process which grades or changes raw material or unfinished material into another form or product including establishments in mining and manufacturing. The nature of the customer's primary business or economic activity at the location served governs, irrespective of whether a particular load to a manufacturing or processing plant represents gas used for plant cafeteria or a heating load, with or without processing load, whether or not separately metered.

APPLICABILITY

Applicable in all areas served under this tariff.

(C)

AVAILABILITY OF SERVICE

I. MANDATORY SERVICE

Service under this rate schedule is available to, and is mandatory for, Industrial Customers that meet any of the following criteria:

- A. The total of the Company's actual deliveries of gas to the Industrial Customer, including not only volumes of gas purchased from the Company by such Industrial Customer but also volumes of Customer-owned gas transported by the Company to such Industrial Customer, measured in thousand cubic feet (Mcf), during the twelve billing months of the calendar year preceding the next-succeeding Application Period, as defined in this rate schedule, shall have been not less than 200,000 Mcf; or
- B. A proposed new Industrial Customer, not previously receiving any service from the Company, for which the Company and the Industrial Customer agree that the projected total volume of gas, including not only volumes of gas to be purchased from the Company by such Industrial Customer but also volumes of Customer-owned gas projected to be transported by the Company to such Industrial Customer, measured in thousand cubic feet (Mcf), will be not less than 200,000 Mcf during the succeeding twelve months; or

(C) Indicates Change

LIS

Large Industrial Service (Cont'd)

- C. An Industrial Customer, for which the Company estimates that the total volumes of gas purchased from the Company or transported by the Company during the next succeeding twelve months will be not less than 200,000 Mcf, if the Industrial Customer has used total volumes of gas in at least one billing month of not less than 17,000 Mcf, even if the Customer disagrees with the Company's estimate.

An Industrial Customer that meets the above criteria under this rate schedule at the beginning of an Application Period is required to continue to be subject to this rate schedule during all months of such Application Period. An Industrial Customer that meets the above criteria under this rate schedule during an Application Period is required to continue to be subject to this rate schedule during all or remaining months of such Application Period.

LOAD BALANCING SERVICE
FOR LARGE INDUSTRIAL CUSTOMERS

I. APPLICABILITY

Throughout the territory served under this tariff.

II. AVAILABILITY

Sales Service and Transportation Service under this rate schedule are available to Large Industrial customers that execute an agreement for one or more twelve-month periods of service under this rate schedule for incremental load used in load balancing facilities, or where, in the judgment of the Company, existing load would be displaced by an alternate fuel or an alternate source of gas. For the purposes of this rate schedule, "incremental load" shall consist of the following:

- (1) Any volume of gas used at gas-consuming facilities constructed or installed after May 20, 1989, that will result in additional or expanded use of gas received from the Company; or
- (2) Any volume of gas used at existing gas-consuming facilities of Customer at which the Customer has not used gas taken from the Company for at least twelve (12) consecutive months.

For the purposes of this rate schedule, "load balancing facilities" shall consist of any facilities of a Customer which use incremental load.

The Customer, in its sole discretion, must determine whether it will be more advantageous for the Customer to receive service for incremental load under this rate schedule or under the Large Industrial Service rate schedule.

The Customer's load balancing facilities shall be constructed in a manner satisfactory to the Company so that the Company will be able to meter the volume of gas used by the Customer in the load balancing facilities separately from gas used by the Customer in other facilities.

The Customer's load balancing facilities must be served by a discrete gas service supply system beyond the Company's meter. During business hours, the Company shall have the right to inspect Customer's facilities to determine whether Customer's facilities, including Customer's gas service supply system and load balancing facilities, meet the requirements of this rate schedule.

In order to qualify for service under this rate schedule, Customers must execute an agreement for service under this rate schedule within one (1) year after either: (1) the date of the completion of the installation of new gas-consuming facilities; or (2) the date that the Customer begins taking gas from the Company at existing facilities of the Customer which have not used gas taken from the Company for at least twelve (12) consecutive months.

Service under this Rate Schedule shall not be subject to Rate Schedule BP - service for customers with bypass facilities.

(C) Indicates Change

(C)

III. NATURE OF SERVICE

Sales Service provided under this rate schedule shall be firm service up to the level of the Customer's Gas BDU level established below, subject to the curtailment priorities of Rule 26. Sales Service in excess of the Customer's Gas BDU level will be provided only to the extent that the Company determines, from time to time, that available gas supply and available system capacity are sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

Transportation Service provided under this rate schedule shall be firm Service up to the level of the Customer's Margin BDU level established below, subject to the curtailment priorities of Rule 26. Transportation Service in excess of the Customer's Margin BDU level will be provided only to the extent that the Company determines, from time to time, that available gas system capacity is sufficient to provide the level of service desired by the Customer without affecting adversely the reliability of service to the Company's existing customers receiving firm service.

IV. MONTHLY BILL

The monthly bill, for sales service under this rate schedule, shall be the sum of the Demand Charges, as computed in Section A hereinafter, and the Commodity Charges for sales and for transportation service, as computed in Section B hereinafter.

A. DEMAND CHARGES

The monthly Demand Charges shall be the sum of (1) the product of multiplying the rate per Gas Billing Demand Unit (Gas BDU), determined as provided below, by the number of the Customer's Gas BDUs, determined as provided below, and (2) the product of multiplying the rate per Margin Billing Demand Unit (Margin BDU) determined as provided below, by the number of Margin BDUs, determined as provided below.

1. Gas Demand Charge
 - a. Determination of Rate Per Gas BDU

The rate per Gas BDU shall be determined as follows:

1. The purchased gas demand costs applicable to the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial classes, the "DC", shall be obtained under Rider "A" - Section 1307(f) Purchased Gas Costs.
2. The number 12 shall be multiplied by the sum of (a) the volume of gas (expressed in Mcf) purchased from the Company by all Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial customers, during the Company Peak Sales Month defined in Rate Schedule CPA

LBS and (b) volume of service (expressed in Mcf) to all customers under the "Monthly Volume" provisions of Rate Schedule SB, during the Company Peak Sales Month defined in Rate Schedule CPA-LBS.

3. The amount determined in Item 1 above shall be divided by the amount determined in Item 2 above to determine the amount included in the rate for recovery of purchased gas costs.
4. The rate per Gas BDU shall be the amount for purchased gas demand costs (Item 3).

The current rate per Gas BDU is as follows:

Purchased Gas Demand Cost	\$0.7125/BDU	(D)
---------------------------	--------------	-----

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made, under Items 1, 2 and 3, above, of the component to be included in the rate for purchased gas demand costs and the rate per Gas BDU shall be changed accordingly.

b. Determination of Customer's Gas BDUs

The Customer's Gas BDUs shall be determined as follows: The actual volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities during such Customer's Peak billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Gas BDUs applicable to Customer shall be zero (0).

(D) Indicates Decrease

(I) Indicates Increase

2. Margin Demand Charge

a. The rate per Margin BDU shall be \$.2517 per Margin BDU.

b. Determination of Customer's Margin BDUs

The Customer's Margin BDUs shall be determined as follows: The actual deliveries of gas to the Customer by Company, including not only volumes of gas purchased by the Customer from the Company and used by the Customer in the separately-metered load balancing facilities but also volumes of Customer-owned gas transported to the Customer's load balancing facilities through the Company's facilities, during such Customer's Peak billing Cycle, as defined hereinafter, shall be multiplied by a fraction. The numerator shall be the number 30. The denominator shall be the number of days of service for which such Customer was billed in such Customer's Peak Billing Cycle.

The Customer's Peak Billing Cycle shall be the single billing cycle of maximum delivery to the Customer's separately-metered load balancing facilities that ended during one of the months of December, January, February and March during the period beginning with the most recently-completed billing cycle ended in December and ending with the current billing cycle.

If the customer used no gas under this rate schedule during the most recently concluded billing cycles ended in December, January, February or March, then the level of Margin BDUs applicable to Customer shall be zero (0).

B. COMMODITY CHARGES FOR SALES AND FOR TRANSPORTATION SERVICE

1. Commodity Charge for Sales Service

The monthly Commodity Charge for Sales Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas sold to the Customer by the Company during the applicable billing cycle.

The rate per Mcf shall be determined as follows and shall be \$7.7322 per (I) Mcf, subject to revision as provided below:

The current components of the rate are as follows:

Purchased Gas Commodity		
Costs, set forth in Rider "A"	\$7.5398/Mcf	(I)
Non Gas Costs	\$0.1924/Mcf	

a. Determination of Rate per Mcf

The rate per Mcf shall be the sum of:

(D) Indicates Decrease

(I) Indicates Increase

1. The net amount per Mcf for recovery of the commodity component of purchased gas costs and for recovery or refund of "E" factor amounts, the "PGCC", as determined in Rider "A" - Section 1307(f) Purchased Gas Costs of this tariff; plus

2. The amount of \$.1924 per Mcf for recovery of non-gas costs.

Each time there is a change in the provision for recovery of purchased gas costs pursuant to Rider "A" of this tariff, a recomputation shall be made of the commodity component of purchased gas costs (Item 1, above) and the rate per Mcf shall be changed accordingly. The component included in the rate for recovery of non-gas costs shall remain constant until changed in accordance with a procedure, other than a proceeding pursuant to Section 1307(f) of the Public Utility Code, 66 Pa.C.S. Section 1307(f).

2. Commodity Charge for Transportation Service

The monthly Commodity Charge for Transportation Service shall be the product of multiplying the rate per Mcf, determined as provided below, by the volume of gas transported by the Company to the Customer's load balancing facilities.

The rate per Mcf for transportation of gas under this rate schedule shall be \$0.5524 per Mcf, which includes \$0.1924 for recovery of non-gas costs and \$0.3600 for recovery of purchased gas. (D)

V. SURCHARGE

The Demand Charges and the Commodity Charge for Sales Service and the Commodity Charge for Transportation Service shall be subject to surcharges in accordance with provisions of Rider B - State Tax Adjustment Surcharge as set forth in this tariff.

VI. AMOUNTS TO BE INCLUDED IN OVER/UNDERCOLLECTION OF GAS COSTS

Purchased gas cost revenues billed under this rate schedule shall be included as revenues for recovery of gas costs for purposes of computing Factor "E" of Company's 1307(f) rate in accordance with procedures set forth in Rider "A" - Section 1307(f) Purchased Gas Costs. (D)

VII. SPECIAL PROVISIONS

Monthly metered Special Provisions A through J contained in the Company's Rate Schedule for Transportation Service shall apply to transportation service under this rate schedule.

VIII. RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, the supply of gas service under this rate schedule.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE - NGV

NATURAL GAS VEHICLE SERVICE

I. APPLICABILITY

Throughout the territory served under this tariff.

II. AVAILABILITY

Sales Service under this rate schedule is available for use of natural gas by a customer directly in a natural gas motor vehicle ("NGV").

III. NATURE OF SERVICE

Service provided in this rate schedule shall be firm service subject to the curtailment priorities of Rule 26. For curtailment purposes, service under this rate schedule shall be defined as curtailment priority number (6), firm large noncritical commercial and industrial requirements other than requirement for boiler fuel use.

IV. RATE

Rates per 100 cu. Ft. shall be established by the Company on the first day of each calendar month for each of the categories set forth below to compete with alternative vehicle fuels. The rates shall not be less than the 100% load factor base cost of gas, plus the take-or-pay surcharge, plus the surcharge for Transition Cost, plus the incremental operating cost incurred by the Company for operating Company owned NGV compression equipment on a per Ccf basis, if any, plus \$0.01 per cu. ft., plus the state tax adjustment surcharge, and not more than the tailblock rate of the Commercial and Public Authority Service Rate Schedule, including all applicable surcharges, plus the incremental operating cost incurred by the Company for operating Company owned NGV compression equipment on a per Ccf basis, if any.

The 100% load factor base cost of gas shall be \$0.82523 per 100 cu. ft. (I)
(as calculated by adding the purchase gas components of the Load Balancing Service Rates).

Purchased Gas 100% Load Factor Demand Cost	\$0.07125/Ccf	(D)
plus		
Purchased Gas Commodity Cost	<u>\$0.75398/Ccf</u>	(I)
Equals		
100% Load Factor Base Cost of Gas	\$0.82523/Ccf	(I)

The incremental operating cost for compression shall be \$0.13436/Ccf.

(D) Indicates Decrease

(I) Indicates Increase

Natural gas vehicle customers are classified into the following categories:

NGV(1) All natural gas vehicle customers utilizing Company owned filling facilities. A uniform rate shall be established each month within the parameters set forth above, for customers utilizing Company-owned filling facilities.

The minimum NGV(1) rate shall be: \$0.96717/Ccf (I)

The current components of the minimum NGV(1) rate are as follows:

100% load factor base cost of gas:	\$0.82523/Ccf	(I)
Incremental operating cost of Company owned NGV compression equipment:	\$0.13436/Ccf	
Transition Cost Surcharge	\$0.00000/Ccf	
State Tax Adjustment Surcharge	(\$0.00242)/Ccf	(D)
Minimum allowable Non-Gas cost	\$0.01000/Ccf	

The maximum NGV(1) rate shall be: \$1.17139/Ccf (I)

The current components of the maximum NGV(1) rate are as follows:

Tailblock rate of the Commercial and Public Authority Service Rate schedule:	\$1.03997/Ccf	(I)
Incremental operating cost of Company owned NGV compression equipment:	\$0.13436/Ccf	
State Tax Adjustment Surcharge	(\$0.00294)/Ccf	(D)

NGV(2) Natural gas vehicle customers utilizing customer owned filling facilities. A uniform rate will be established each month within the parameters set forth above, to customers utilizing customer owned filling facilities.

The minimum NGV(2) rate shall be: \$0.83314/Ccf (I)

The current components of the minimum NGV(2) rate are as follows:

100% load factor base cost of gas:	\$0.82523/Ccf	(I)
Transition Cost Surcharge	\$0.00000/Ccf	
State Tax Adjustment Surcharge	(\$0.00209)/Ccf	(D)
Minimum allowable Non-Gas cost	\$0.01000/Ccf	

The maximum NGV(2) rate shall be: \$1.03737/Ccf (I)

(D) Indicates Decrease

(I) Indicates Increase

The current components of the maximum NGV(2) rate are as follows:

Tailblock rate of the Commercial and Public Authority	
Service Rate schedule:	\$1.03997 /Ccf (I)
State Tax Adjustment Surcharge	(\$0.00260)/Ccf (D)

V. SURCHARGE

All charges under this rate schedule will be subject to surcharges in accordance with provisions of Rider B - State Tax Adjustment Surcharge as set forth in this tariff.

VI. AMOUNTS TO BE INCLUDED IN OVER/UNDERCOLLECTION OF GAS COSTS

Purchased gas cost revenues billed under this rate schedule shall be included as revenues for recovery of gas costs for purposes of computing Factor "E" of Company's 1307(f) rate in accordance with procedures set forth in Rider "A" - section 1307(f) Purchased Gas Costs. Purchased gas cost revenues recovered under this rate schedule shall be the 100% load factor base cost of gas as defined above.

VII. RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, the supply of gas service under this rate schedule.

RESERVED FOR FUTURE USE

RATE SCHEDULE BP

SERVICE FOR CUSTOMERS
WITH BYPASS FACILITIES

PURPOSE

Bypass customers are required to make reasonable payments toward the recovery by the Company of its fixed costs of service in relation to their use of the Company's system during winter periods. Bypass customers are required to pay over a one-year period approximately the same amount that typical non-bypass customers using the same level of winter service would pay. These bypass customers are required to make these payments so that they pay their fair share of system costs in relationship to their usage, and so that other non-bypass customers are not burdened.

This rate schedule requires also that bypass customers operate in a manner that will not jeopardize service to other customers.

APPLICABILITY

Throughout the territory served under this tariff.

Service under this rate schedule is available to all customers served under Commercial and Public Authority ("C-PA") Service Rate Schedule, Small Volume Industrial Service ("SVIS") Rate Schedule, Intermediate Volume Industrial Service ("IVIS") Rate Schedule, Rate Schedule LVIS or Rate Schedule LIS that have installed facilities which would enable the Customer to receive volumes of gas purchased from or transported by an entity other than the Company, without using the Company's distribution system ("Bypass Facilities"); provided, however, that this Rate Schedule shall not apply to "Self-Help" gas.

"Self-Help" gas refers to gas produced by the customer from gas reserves and wells owned by the customer on a tract of land owned by the customer that is contiguous to the tract of land on which the customer's manufacturing plant is located.

SERVICE AGREEMENT

The Customer must execute a service agreement for one or more twelve-month contract terms terminating at the completion of the last billing cycle ending in November of each year. The Service Agreement shall specify the level of system service, during thirty-day periods, that the customer desires to have available on the Company's distribution system. Such level of service shall be specified in the form of a volume of gas, expressed in Mcf, that the Customer wishes to be able to have the right to purchase from the Company or transport through the Company's facilities during thirty-day periods. Such volume shall be subject to adjustment as explained in the Special Provisions section of this rate schedule.

METERING AND FLOW CONTROL EQUIPMENT

The Company may install at the premises of any customer under this rate schedule an automated meter reading device (AMD) and communications device, at customers expense, which will enable the Company to monitor and record each Bypass Customer's daily usage. In addition, if changes in levels of usage of gas from the Company by any Customer under this rate schedule would have the potential to adversely affect service to others customers, the Company may install flow control devices, at customers expense, to restrict the daily flow of gas to the Customer to approximately one-thirtieth (1/30) of the monthly Bypass nomination.

NATURE OF SERVICE

A nomination under this rate schedule shall permit the customer to use the Company's facilities on a firm basis subject to curtailment priorities of Rule 26 of this Tariff. The gas may be either customer-owned gas or Company-owned gas. If the gas is customer-owned, the customer must have contracted with the Company for transportation service under the rate schedule for Transportation Service. If the gas is Company-owned, the customer must have contracted with the Company for standby service under Rate Schedule SB. If the customer is categorized as a residential or firm critical commercial essential human needs customer, then the customer must contract with the Company under rate schedule PSB.

MONTHLY BILLS

The procedures set forth below require bypass customers to pay over a twelve-month period revenues for recovery of non-gas costs of service approximately equal to amounts paid by average non-bypass customers with similar peak month winter usage. The procedures below require a bypass customer to pay over a twelve-month period based on its peak winter monthly usage multiplied by an average monthly load factor for non-bypass customers. The applicable rate is applied to the resulting volume. The procedures also reduce volumes subject to this rate schedule to credit a bypass customer for actual throughput to which the Company's sales or transportation service rates are applied.

RATE

Customers under this rate schedule shall be subject to the applicable rate listed below to be applied to the Billing Volume, as defined below.

<u>For customers receiving service under</u>	<u>Bypass rate</u>	
Commercial/Public Authority Rate Schedule	\$1.3286 per Mcf	(I)
Rate Schedule SVIS	\$1.0440 per Mcf	(I)
Rate Schedule IVIS	\$1.0471 per Mcf	(I)
Rate Schedule LVIS	\$0.7559 per Mcf	(I)
Rate Schedule LIS	\$0.2664 per Mcf	(I)

(I) Indicates Increase

MONTHLY VOLUME

The Monthly Volume shall be the volume of gas specified in the Service Agreement under this rate schedule or as adjusted under the Special Provisions section of this rate schedule, as adjusted for the number of days in the billing cycle. In order to adjust the volume of gas specified in the Service Agreement under this rate schedule or as adjusted under the Special Provisions section of this rate schedule for the number of days in a billing cycle, such volume of gas shall be multiplied by a fraction. The numerator of the fraction shall be the number of days in the billing cycle and the denominator shall be thirty (30).

APPLICATION TERM

In this rate schedule, the phrase "Application Term" shall be each twelve-month period terminating at the completion of the last billing cycle ending in November of each year.

BILLING VOLUME

For each billing month, if the volume of gas delivered to the customer from the Company, including both gas purchased by the customer from the Company and gas transported by the Company exceeded 50.00 percent of the Monthly Volume, as adjusted in the manner explained above for the number of days in the billing cycle, then the Billing Volume for service under this rate schedule shall be zero (0) Mcf.

For each billing cycle, if the volume of gas delivered to the customer by the Company, including both gas purchased by the customer from the Company and gas transported by the Company, was less than 50.00 percent of the Monthly Volume, as adjusted in the manner explained above for the number of days in the billing cycle and if the volume determined under item 1, below, is greater than or equal to the volume determined under item 2, below, then the Billing Volume for service under this Rate Schedule shall be zero (0) Mcf.

For each billing month, if the volume of gas delivered to the customer by the Company, including both gas purchased by the customer from the Company and gas transported by the Company, was less than 50.00 percent of the Monthly Volume, as adjusted in the manner explained above for the number of days in the billing cycle and if the volume determined under item 1, below, is less than the volume determined under item 2, below, then the Billing Volume for service under this rate schedule shall be the difference between the volume determined under item 1, below, and the volume determined under item 2, below.

1. The total volume of gas delivered to the customer by the Company, including both Company-owned gas sold to the customer and customer-owned gas transported by the Company, during the period commencing at the beginning of the current Application Term through the completion of the billing cycle for which the Billing Volume is being determined

BILLING VOLUME(Cont'd)

shall be added to the total Mcf volume billed to the customer under this rate schedule for service during the period commencing at the beginning of the current Application Term through the completion of the billing cycle immediately prior to the billing cycle for which the Billing Volume is being determined.

2. a. The Monthly Volume shall be multiplied by a fraction. The numerator of the fraction shall be 365 and the denominator shall be 30.
- b. The product of item 2.a. shall be multiplied by 50.00 percent.
- c. For each billing cycle during the Application Term, the product of item 2.b., above, shall be multiplied by a fraction. The numerator of the fraction shall be the number of billing cycles during the Application Term that have completed (including the billing cycle for which the Billing Volume is being determined) and the denominator shall be twelve (12).

SPECIAL CREDIT

If the sum of: (1) the total Mcf volume of gas delivered to the Customer by the Company, including both volumes of Company-owned gas sold to the Customer and Customer-owned gas transported by the Company, during an Application Term and (2) the Mcf volume of service under this rate schedule during such Application Term, exceeds the applicable volume determined below, then the Customer shall receive a credit. Such credit will be equal to the applicable rate for service under this rate schedule multiplied by the lesser of:

1. The Mcf volume of service to the Customer under this rate schedule during the Application Term or
2. The difference between:
 - a. the sum of: (1) the total Mcf volume of gas delivered to the Customer by the Company, including both volumes of Company-owned gas sold to the Customer and Customer-owned gas transported by the Company, during the Application Term and (2) the Mcf volume of service under this rate schedule during such Application Term and
 - b. the applicable volume computed as set forth below.

For Customers under this rate schedule, the applicable volume, for each Application Term shall be determined under items 1 and 2, below:

1. The volume of gas specified in the Service Agreement under this rate schedule or as adjusted under the Special Provisions section of this

SPECIAL CREDIT (Cont'd)

rate schedule as in effect at the end of the Application Term shall be multiplied by a fraction. The numerator of the fraction shall be 365 and the denominator shall be 30.

2. The product of item 1, above, shall be multiplied by the factor of 0.5000.

ANNUAL MAXIMUM BILL

The Annual Maximum Bill for recovery of non-gas costs of service applies to any customer which provides to the Company accurate and verifiable information concerning the volume of gas taken by the Customer through bypass facilities during a twelve-month Application Term. The Annual Maximum Bill for recovery of non-gas costs of service shall be the sum of: (1) the sum of all basic service charges and administrative rates applicable for service during the Application Term and (2) the product of Distribution's rate for transportation of Pennsylvania gas applicable to the customer multiplied times the total volume of gas used by the bypass customer, including both the volume of gas actually taken from the Company and the volume of bypass gas taken during the Application Term under Rate Schedule BP.

The Annual Bill shall apply only to the portion of rates for recovery of non-gas costs of service and shall not affect the portion of rates for sales of gas by the Company or rates under Rate Schedule SB (for Standby Service) or rates under Rate Schedule PSB (for Priority Standby Service) for recovery of purchased gas costs under Rider A of this tariff.

BILLING

The Company shall include the bill for service under this rate schedule together with the bill for service under all other rate schedules. For each billing cycle, payment for service under this rate schedule shall become due simultaneously with the payment for service under all other rate schedules.

SPECIAL PROVISIONS

1. If the sum of purchases by a Customer from the Company and transportation deliveries by the Company to a Customer, during any billing cycle that ends in any December, January, February or March, exceeds the level of service, expressed in Mcf, set forth in the Service Agreement, as adjusted for the number of days in such billing cycle, then the level of service that is

SPECIAL PROVISIONS (Cont'd)

set forth in the Service Agreement shall be adjusted to equal the volume of gas actually purchased from, and transported by, the Company during such billing cycle adjusted to a 30 day billing cycle by multiplying such volume by a fraction. The numerator of the fraction shall be thirty (30) and the denominator shall be the number of days in the billing cycle.

If the level of service specified in the Service Agreement is adjusted under this Special Provision, then the Service Agreement shall continue to be effective and the Service Agreement shall be interpreted to specify the level of service as adjusted under this Special Provision, unless such volume of gas and term of the Service Agreement are further adjusted in accordance with this Special Provision. Such level of service, as adjusted under this Special Provision, shall continue to be effective for the remainder of the Service Agreement.

2. If a Customer served under the Commercial/Public Authority Rate Schedule, Rate Schedule SVIS, Rate Schedule IVIS, Rate Schedule LVIS or Rate Schedule LIS, that has Bypass Facilities installed, declines to enter into a Service Agreement for service under this rate schedule but either purchases gas from the Company or transports gas through the Company's facilities, such purchase of gas from the Company or transportation of gas by the Company shall be deemed to be the execution by the Customer of a Service Agreement under this rate schedule with a term of one Application Term and the level of service under such Service Agreement shall be the volume of gas purchased or transported for the Customer from the Company during such billing cycle, adjusted to a 30 day billing cycle. In order to adjust the level of service to a 30 day billing cycle the volume of gas actually purchased from and transported by the Company during such billing cycle shall be multiplied by a fraction. The numerator of the fraction shall be thirty (30) and the denominator shall be the number of days in the billing cycle.

MAXIMUM SAFE OPERATING VOLUME

If substantial changes by the Customer in levels of usage of gas from the Company may adversely affect service to other customers and if the Company has not installed flow control devices at the Customer's premises, the Company may establish for that Customer a Maximum Safe Operating Volume ("MSOV"). The MSOV will be the maximum daily volume that the customer can take from the Company without jeopardizing service to other customers. The MSOV will be based upon an engineering study to be performed by the Company of the Company's facilities, the Customer's actual and potential load characteristics, other customers and their respective loads and the sources of supply in the vicinity of the Customer. Upon completion of the engineering study and determination of the applicable MSOV, the Company will inform the Customer of the MSOV applicable to it. Thereafter, the Customer may not use more than the MSOV of gas from the Company during any day without giving the Company at least one complete business days notice of its increased level of usage of gas from the Company. If the Customer uses in any day more than the applicable MSOV, the Customer shall pay to the Company, in addition to all other applicable charges, a penalty of \$25 per Mcf of gas taken from the Company in excess of the MSOV.

DAY

As used in this Rate Schedule, the word "day" shall mean a consecutive twenty four hour period commencing at 10:00 a.m. on each calendar day.

(C)

LIMITATION OF SERVICE

For any commercial, public authority, SVIS, IVIS, LVIS or LIS Customer that has installed Bypass Facilities, the Company maintains no duty to allow the Customer either to purchase gas from the Company or to transport gas through the Company's facilities in excess of the level of service, expressed in Mcf in the Service Agreement under this rate schedule, as adjusted in the manner set forth hereinabove under this rate schedule.

(C) Indicates Change

CONTRACT TERM

The initial term of the Service Agreement shall be for at least one Application Term. After the initial Application or any renewal thereof, the Service Agreement shall be renewed automatically for successive one-year Application Terms thereafter unless the Customer or the Company terminates the Service Agreement by written notice thereof to the other more than sixty (60) days prior to the end of a term. If the Service Agreement is renewed automatically pursuant to the provisions of this paragraph, then the volume of gas specified in the renewed Service Agreement shall be established at the volumetric level in effect, as adjusted in accordance with Special Provision 1 or 2 of this rate schedule, immediately prior to the effective date of the renewed Service Agreement. The Company may terminate a Service Agreement at an earlier date as provided by law or by any provision of this tariff.

In addition, a Service Agreement may be terminated at the request of a Customer for a new Service Agreement specifying a greater level of service, and such request will be honored by the Company, subject to the availability of sufficient capacity for such service in those portions of the Company's system so affected. A Customer may also request, upon sixty (60) days written notice to the Company prior to the end of a contract term, a new Service Agreement specifying a reduced level of service, and such request will be honored by the Company; provided that the requested reduced level of service is not less than the level of service, if any, for the Customer under Rate Schedule SB or Rate Schedule PSB.

Irrespective of the foregoing, any request by a Customer, for a reduction in the level of service under this rate schedule or for termination of service under this rate schedule effective at the end of any contract term, shall be deemed to have been denied and of no effect if, after such request, the term of the Service Agreement is continued under the Special Provisions of this rate schedule.

RULES AND REGULATIONS

The rules and regulations set forth in this tariff shall govern, where applicable, service under this rate schedule.

RATE SCHEDULE PSB

PRIORITY STANDBY SERVICE

APPLICABILITY

Throughout the territory served under this tariff.

AVAILABILITY OF SERVICE

Service under this rate schedule is available to all customers under the Residential, Commercial and Public Authority, and SVIS Rate Schedules which enter into a contract for service under this Rate Schedule. A customer will be permitted to enter into a contract, prepared by the Company, for service under this rate schedule, however, only if the Company projects that sufficient volumes of gas will be available to the Company during the period of the customer's contract for Priority Standby Service.

Service under this rate schedule is mandatory for all customers categorized as Priority 1 under the curtailment priorities of Rule 26 who enter into contracts with the Company to receive Transportation Service and who do not have dual or alternate fuel equipment on site which is installed and operable with sufficient amounts of alternate fuel available on site during each winter period of each year commencing on December 1 and ending on March 31 of the following year. Service under this rate schedule is voluntary for all other customers.

NATURE OF SERVICE

Priority standby service shall permit the customer to purchase gas on a firm basis subject to curtailment priorities of Rule 26. The Company will take all reasonable steps to obtain or to maintain gas supplies sufficient to enable the Company to provide reasonably continuous service to each Customer receiving Priority Standby Service.

MONTHLY RATE

The monthly rate shall be \$1.1177 per Mcf, which shall be applied to the total monthly volumes transported by the customer during the month. (I)

The rate shall equal the PGDC portion of the commodity rate applicable to the corresponding sales rate classification.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE SB
STANDBY SERVICE

APPLICABILITY

Throughout the territory served under this tariff.

AVAILABILITY OF SERVICE

Service under this rate schedule is available to all customers under the Residential, Commercial & Public Authority, SVIS, IVIS, LVIS, and LIS Rate Schedules that meet the following criteria:

1. The customer has executed a service agreement for a term of at least one year. The Service Agreement shall specify the level of service during thirty-day periods that the customer desires to be able to purchase from the Company. Such level of service shall be specified in the form of a volume of gas, expressed in Mcf, that the Customer wishes to be able to purchase from the Company during thirty-day periods. Such volumes shall be subject to adjustment as explained in the Adjustment section of this rate schedule.

2. The customer either (a) receives volumes of gas transported by the Company or (b) is an LVIS or LIS Customer and has facilities which enable the customer to obtain volumes of gas without using the Company's distribution system ("Bypass Facilities"); and

3. The customer is not categorized as Priority 1 under the curtailment priorities of Rule 26.

In addition, irrespective of the foregoing, Special Provisions 3 through 5, below, shall apply to all transportation customers except those receiving service under Rate Schedule PSB.

NATURE OF SERVICE

Standby service shall permit the customer to purchase gas on a firm basis subject to curtailment priorities of Rule 26. The Company will take all reasonable steps to obtain or to maintain gas supplies sufficient to enable the Company to provide reasonably continuous service to each Customer receiving standby service at the level specified in the Service Agreement, as adjusted from time to time in accordance with the provisions of this rate schedule. Service under this Rate Schedule shall be available only if the Company projects that sufficient volumes of gas will be available to the Company during the period of the contract to provide the level of service desired by the Customer, without affecting adversely the reliability of service to the Company's existing customers receiving firm gas service.

ADJUSTMENT

For each billing cycle, the volume of gas specified in the Service Agreement shall be adjusted to reflect the number of days in such billing cycle by multiplying such volume, expressed in Mcf, by a fraction. The numerator of the fraction shall be the number of days in the billing cycle applicable to the Customer and the denominator shall be 30.

MONTHLY RATE

The monthly rate shall be \$0.5297 per Mcf, which shall be applied to the (I) Monthly Volume, as defined below.

MONTHLY VOLUME

The Mcf volume of gas to which the Monthly Rate set forth above shall be applied, shall be determined for each billing cycle, as set forth below;

1. The volume of gas specified in the Service Agreement under this rate schedule shall be adjusted for each billing cycle by, multiplying such volume, expressed in Mcf, by a fraction. The numerator of the fraction shall be the number of days in the billing cycle applicable to the customer and the denominator shall be thirty (30).
2. If the volume determined under item 1, above, is greater than the sum of the Mcf volume of gas purchased by the customer under rate schedules other than load balancing rate schedules during the billing cycle, the Monthly Rate shall be applied to the difference between: (a) the volume determined under item 1, above, and (b) the Mcf volume of gas purchased by the customer under the rate schedules other than load balancing rate schedules during such billing cycle.
3. If the volume determined under item 1, above, is equal to or less than the Mcf volume of gas purchased by the customer under rate schedules other than load balancing rate schedules during the billing cycle, then the Monthly Volume shall be zero (0) Mcf.

(D) Indicates Decrease

(I) Indicates Increase

SPECIAL PROVISIONS

1. A customer that has Bypass Facilities and that desires service under this rate schedule must enter into an Agreement for Service under Rate Schedule BP that specifies a volume of gas equal to, or greater than, the volume of gas specified in the Service Agreement under this rate schedule.
2. As used in this Rate schedule, the term "Bypass Facilities" does not include facilities that enable a customer to obtain "Self-Help" gas.

"Self-Help" gas refers to gas produced by the customer from gas reserves and wells owned by the customer on a tract of land owned by the customer that is contiguous to the tract of land in which the customer's manufacturing plant facilities are located.

3. SB customers shall be subject to a surcharge equal to 25 percent of the retail rates of the applicable sales rate schedule to volumes purchased by transportation customers (in excess of volumes contracted for under Rate Schedule SB) during the billing month ending in December, January, February or March and a surcharge equal to 10 percent of the retail rates of the applicable sales rate schedule to volumes purchased by transportation customers (in excess of volumes contracted for under Rate Schedule SB) during the remaining billing months when overruns by transportation customers are authorized by Company. The rates for sales of gas shall include the Distribution Charges, Gas Adjustment Charge, and the Natural Gas Supply Charge under the sales rate schedule that applies to the customer and the applicable surcharge percentage set forth above. In months when the sum of the Natural Gas Supply Charge and the Gas Adjustment Charge is less than the MMI, the applicable sales rate shall be equal to the sum of the Distribution Charges, the MMI plus all transportation costs to the Company's City Gate, and the applicable surcharge percentage applied to this rate.
4. SB Transportation MMT customers shall be subject to a penalty of Charges for Daily City Gate Underdeliveries applicable to MMNGS Suppliers plus the higher of \$25 per Dth or the DMI for that day plus all transportation costs to the Company's City Gate when (C)
Company has announced that overrun service is not available.

SB Transportation DMT customers shall be charged the higher of:
(1) the rate determined in item 3 above or (2) the Charges for Daily City Gate Underdeliveries applicable to MMNGS Suppliers plus (C)
the higher of \$25 per Dth or the DMI for that day plus all transportation costs to the Company's City Gate when Company has issued an OFO that includes a Restriction on Access to Daily Metered Imbalances or announced that overrun service is not available.

(C) Indicates Change

5. Revenues for recovery of purchased gas costs and surcharges under items 3 and 4 above, shall be flowed through to sales customers under Rider "A" of this tariff.

LIMITATION OF SERVICE

For any customer that either (a) has contracted with the Company for transportation service, or (b) is a customer with installed Bypass Facilities, the Company maintains no duty to provide retail service to customer in excess of the level of service, expressed in Mcf in the Service Agreement under this schedule, as adjusted in the manner set forth hereinabove under this rate schedule.

CONTRACT TERM

The initial term of the Service Agreement shall be for at least one year. After the initial term, the Service Agreement shall be renewed automatically for successive one-year terms thereafter unless the customer or the Company terminates the Service Agreement by written notice thereof to the other more than sixty (60) days prior to the end of a term. If the Service Agreement is renewed automatically pursuant to the provisions of this paragraph, then the volume of gas specified in the renewed Service Agreement shall be established at the volumetric level in effect immediately prior to the effective date of the renewed Service Agreement. The Company may terminate a Service Agreement at an earlier date as provided by law or by any provision of this tariff.

In addition, a Service Agreement may be terminated at the request of a customer for a new Service Agreement specifying a greater level of service, and such request will be honored by the Company, subject to the Availability section of this rate schedule and subject to Special Provision 1 of this rate schedule.

A customer may also request, upon sixty (60) days written notice to the Company prior to the end of a contract term, a new Service Agreement specifying a reduced level of service, and such request will be honored by the Company, subject to the Availability section of this rate schedule.

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SERVICE

DEFINITIONS

- (1) Gas Service Customer - A Gas Service Customer is an entity that is attached to the Company's lines and uses gas in its operations or in its premises;
- (2) MMT - Monthly Metered Transportation
- (3) MMT Customer - A Gas Service Customer that receives transportation service from the Company under this rate schedule and receives gas supply from a Monthly Metered Natural Gas Supplier. (C)
- (4) MMNGS Supplier - Monthly Metered Natural Gas Supplier - A customer or Natural Gas Supplier that qualifies under the Monthly Metered Natural Gas Supplier Rate Schedule and is responsible for the delivery requirements and imbalance resolution of MMT Customers. (C)

AVAILABILITY OF SERVICE

If all of the qualifications (a) through (e) set forth below are met, any entity will be considered an MMT Customer under this Rate Schedule.

- (a) The entity that will receive gas transported by the Company (1) has a volumetric requirement of at least 5,000 Mcf per year or (2) belongs to a buyer group of no more than ten customers whose combined usage is at least 5,000 Mcf per year, provided, however, that larger buyer groups shall be permitted upon the mutual agreement of the Company and the customers;
- (b) An MMT customer consent to enrollment by an MMNGS supplier shall be accepted in lieu of a transportation service agreement. (C)
- (c) The MMT Customer has obtained, or has agreed to obtain, a supply of gas from a qualified MMNGS Supplier; (C)
- (d) The MMT Customer has made, or caused to be made, arrangements by which such volumes of gas can be delivered, either directly or by displacement, on a firm basis throughout the entire route from the point of production into the Company's distribution system throughout the term of the transportation service agreement; and
- (e) If facilities are required for furnishing of MMT service, in addition to facilities that are required for furnishing of gas service to a MMT Customer, the MMT Customer shall have paid, in full, for any additional facilities required to be constructed for furnishing of MMT service, which payment shall not

(C) Indicates Change

be subject to refund under any circumstances. If additional facilities are required for furnishing of gas service, customer's payment for additional facilities required for furnishing of gas service shall be governed by Tariff Rule No. 3, "Extension of Facilities", and Tariff Rule No. 5, "Service Lines."

CHARACTER OF SERVICE

Gas, of a quality acceptable to the Company, owned by a MMT Customer and delivered, either directly or by displacement, into the Company's distribution system by a qualified MMNGS Supplier, will be transported, by the Company, to the delivery point designated by the MMT Customer. Receipt of natural gas for the customer at the Company City Gate may be limited to the customer's DDQ as established in Rate Schedule MMNGS. If the Customer meets the qualifications for service in the Availability section of this Rate Schedule, prior service under the superseded Rate Schedule for Transportation Service will be converted to service under this Rate Schedule unless the Company is notified by the Customer that it prefers service under the Rate Schedule for Daily Metered Transportation Service.

(C)

(C)

(C) Indicates Change

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SCHEDULE (cont'd)

MONTHLY RATES

Commodity Rates

The commodity rates set forth below contain a component, presently \$0.3800 per Mcf, for recovery of purchased gas costs.

For transportation of gas to Residential Customers, the monthly rate for transportation of gas both within and outside the Commonwealth of Pennsylvania shall be:

\$2.8158 Mcf (D)

For transportation of gas to Commercial and Public Authority Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$2.7256 per Mcf for Small Commercial/Public Authority using not more than 250 Mcf per year (D)

\$2.2245 per Mcf for Small Commercial/Public Authority using greater than 250 Mcf but not more than 1,000 Mcf per year (D)

\$1.7762 per Mcf for Large Commercial/Public Authority (D)

For transportation of gas to Commercial and Public Authority Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$2.7256 per Mcf for Small Commercial/Public Authority using not more than 250 Mcf per year (D)

\$2.2245 per Mcf for Small Commercial/Public Authority using greater than 250 Mcf but not more than 1,000 Mcf per year (D)

\$1.7762 per Mcf for Large Commercial/Public Authority (D)

For transportation of gas to Small Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$2.5257 per Mcf for SVIS Customers (D)

For transportation of gas to Small Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$2.5257 per Mcf for SVIS Customers (D)

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SCHEDULE (cont'd)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:
\$1.4304 per Mcf for IVIS Customers (D)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:
\$1.4304 per Mcf for IVIS Customers (D)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:
\$1.1686 per Mcf (D)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:
\$1.1686 per Mcf (D)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:
\$0.8439 per Mcf (D)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:
\$0.8439 per Mcf (D)

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that are for recovery of gas or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a MMT Customer of the Company without use of the Company's facilities or another transportation of gas. The Company may also reduce or eliminate the compensation for line losses provided for in Special Provisions paragraph B of this rate schedule in order to meet the competitive circumstances for alternate fuels or bypass situations cited above excluding competition from other Pennsylvania local distribution companies. The Company will reduce the applicable rate only if:

- (a) Either (1) the MMT Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SERVICE (cont.)

- (b) Volumes of gas that would be transported by the Company would be displaced by an alternate fuel or an alternative source of gas unless the Company reduces its transportation rate;
- (c) The Company will not reduce the rate for transportation service below the level necessary to transport gas; and
- (d) In the Company's judgment the MMT Customer has taken all reasonable steps to minimize the cost of gas supplies delivered to the Company's system in order to help meet competition.

Where the above criteria are met, the Company may, in its discretion enter into an agreement setting either: (1) a fixed transportation rate or (2) the basis for determining the transportation rate, for the period of the Service Agreement, which will specify which portion of the rate is being reduced.

If an MMT Customer is a member of a buyer group, bills for each member of a buyer group will be determined individually. Volumes of transportation service in a billing period will be allocated among members of a buyer group pursuant to the Service Agreement.

Volumes delivered as transportation service pursuant to this rate schedule shall be subject to State Tax Adjustment Surcharge

Residential rates shall be subject to surcharges in accordance with Rider F - LIRA Discount Charge as set forth in this tariff.

(C)

CHARGES FOR TRANSPORTATION BY OTHERS

If furnishing service, pursuant to this Rate Schedule, requires the use of a transportation service provided other than by the Company, any cost incurred by the Company, with regard thereto, shall be billed to MMT Customer by the Company.

CHARGES UNDER OTHER RATE SCHEDULES

The MMT Customer receiving gas transported by the Company under this Rate Schedule shall pay all charges under all other applicable rate schedules and riders, irrespective of whether such MMT Customer, in any billing period receives only gas transported by the Company, and such MMT Customer shall pay rates under all other applicable rate schedules for any service furnished to the MMT Customer in addition to transportation service under this Rate Schedule.

(C) Indicates Change

MAXIMUM DAILY QUANTITY

The "Maximum Daily Quantity" shall be the maximum volume of gas, (C)
expressed in Mcf, that is equal to a Customer's Daily Delivery Quantity as (C)
determined pursuant to Rate Schedule MMNGS, Special Provision D.1 on Page No.
118C, may be delivered into the Company's distribution system, during any
twenty-four hour period, for transportation by the Company to such Customer as
transportation service under this rate schedule. The Company, in its sole
discretion and upon request of a MMT Customer, may agree to receive and to (C)
transport, during any twenty-four hour period, a volume in excess of the (C)
Maximum Daily Quantity. During any hour of any twenty-four hour period, the (C)
Company shall not be required to receive and to transport more than 1/24 of the (C)
Maximum Daily Quantity. (C)

BILLING

Monthly charges, for transportation service pursuant to this rate schedule, are subject to the Late Payment Charges set forth in Section 16 of the Rules and Regulations of this tariff.

SPECIAL PROVISIONS

A. The volume of gas delivered into the Company's distribution system, on any day in behalf of MMT Customers for transportation service pursuant to this Rate Schedule, shall be determined by meters and as provided in B, below.

B. To compensate for line losses, the volume of gas delivered into the Company's distribution system, shall be retained by the Company as set forth in Rate Schedule MMNGS Special Provision C, Page No 118B; provided however, that, where the only facilities involved in transporting gas to the MMT Customer are meters, meter installations, house regulators, house regulator installations and industrial measuring station equipment, no amount shall be deducted as compensation for line losses.

C. Service under this Rate Schedule may be interrupted during periods of supply shortages but only based upon the schedule of priority of curtailment set forth in section 26 of the Rules and Regulations of this tariff. (C)

D. Transportation service under this Rate Schedule may be interrupted or curtailed whenever, in the event of a sudden and unforeseen supply deficiency, the Company invokes emergency curtailment provisions under Tariff Rule 26. (C)

(C) Indicates Change

E. In the event of interruption or curtailment of transportation service, pursuant to items C and D, above, and during such period of interruption or curtailment, the MMT Customer must sell to the Company all or a portion of the MMT Customer's supply of gas at the higher of (1) the Transportation Service Customer's cost of purchased gas at the point of delivery to the Company or (2) the Company's average cost of purchased gas per Mcf, as determined based upon the Company's Section 1307(f) Rate, which is \$6.4640. (I)

F. If for any reason (including the default of an MMNGS Supplier), the MMNGS Supplier fails to provide sufficient daily deliveries of natural gas supplies to meet the MMT Customers DDQ pursuant to the terms of MMNGS supply service, and/or MMT Customer's MMNGS Supplier does not provide complete compensation to the Company for services provided under Rate Schedule MMNGS, Special Provision D.3, the Company shall charge the MMT Customer for the deficient daily deliveries under the applicable gas sales rate schedule plus applicable surcharge as set forth in Rate Schedule SB Special Provisions.

(D) Indicates Decrease

(I) Indicates Increase

G. Service under this rate schedule shall be available only to the extent that there is sufficient capacity for such service in those portions of the Company's system affected by providing of transportation service including but not limited to, that portion of the Company's system where gas is delivered to the Company and that portion of the Company's system where gas is delivered to the MMT Customer. In determining the Company's ability to provide transportation service, sufficient capacity in the Company's system shall be assumed. If service shall not be supplied, based upon insufficient capacity, the burden shall be on the Company to prove such capacity limitation. (C)

H. Where gas is received by the Company for transportation service pursuant to this Rate Schedule, title to such gas shall remain vested in the MMT Customer for which such gas was received for transportation. The Company's furnishing transportation service for a MMT Customer shall be complete upon delivery of gas received for transportation service, except as provided in E and F, above. (C)

I. The Company shall not be liable, under any circumstances or in any respect, to a Gas Service Customer, MMT Customer, Natural Gas Supplier, a producer of gas or any other person or entity for damages arising either directly or indirectly from interruption, curtailment or termination of transportation service. (C)

J. Revenue for recovery of purchased gas costs under Rider "A" shall include the product of the portions of the rates under this Rate Schedule for recovery of purchased gas costs times the volumes billed under such rates; provided, however, that any adjustment to rates under this Rate Schedule pursuant to Special Provision K., below, shall be eliminated from rates used to calculate revenues for recovery of purchased gas costs under this Rate Schedule. (C)

(C) Indicates Change

K. Rates under this Rate Schedule will be recomputed in, inter alia, each of the Company's annual proceeding under Section 1307(f) of the Public Utility Code.

L. Customers who elect transportation service under this Rate Schedule shall have the right thereafter to purchase gas from the Company only to the extent that they have contracted for firm service under Rate Schedule SB for Standby Service or under Rate Schedule PSB for Priority Standby Service. Purchases of gas from the Company by MMT Customers who have not contracted for service under Rate Schedule PSB shall be subject to both the charges under the applicable sales rate schedule and all provisions of the Rate Schedule SB, including the Special Provisions, for a period of 12 months to the extent such customers continue to purchase gas from the Company.

M. Customers who elect to schedule their own gas supplies via Company's internet accessible Transportation Scheduling System and/or wish to access and/or obtain each day meter readings of the volume of gas delivered to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day shall execute a Data Security Agreement pursuant to Tariff Rule 33. (C)

(C) Indicates Change

RATE SCHEDULE FOR DAILY METERED TRANSPORTATION SERVICE

DEFINITIONS

- (1) Gas Service Customer - A Gas Service Customer is an entity that is attached to the Company's lines and uses gas in its operations or in its premises;
- (2) DMT - Daily Metered Transportation
- (3) DMT Service Customer - Any entity that has executed a DMT Service Agreement with the Company for transportation of gas by the Company.

AVAILABILITY OF SERVICE

If all of the qualifications (a) through (e) set forth below are met, any entity will be considered a DMT Service Customer under this Rate Schedule.

- (a) The entity that will receive gas transported by the Company (1) has a volumetric requirement of at least 5,000 Mcf per year or (2) belongs to a buyer group of no more than ten customers whose combined usage is at least 5,000 Mcf per year, provided, however, that larger buyer groups shall be permitted upon the mutual agreement of the Company and the customers;
- (b) A DMT service agreement must be executed by the DMT Service Customer in the form prepared by the Company (the "Service Agreement");
- (c) The DMT Service Customer has obtained, or has agreed to obtain, a supply of gas, of a quality acceptable to the Company, from any source of gas;
- (d) The DMT Service Customer has made, or has caused to be made, arrangements by which such volumes of gas can be delivered, either directly or by displacement, on a firm or interruptible basis, into the Company's distribution system; and
- (e) If facilities are required for furnishing of DMT service, in addition to facilities that are required for furnishing of gas service, to a Gas Service Customer, the DMT Service Customer shall have paid, in full, for any additional facilities required to be constructed for furnishing of DMT service, which payment shall not

be subject to refund under any circumstances. As deemed necessary by the Company in its sole discretion, the DMT customer shall be required also to pay, in full, for costs of installing daily metering and communications equipment selected by the Company which will enable the Company to obtain each day meter readings of the volume of gas delivered to the Company or to another point or points acceptable to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day. In addition, with regard to daily metering and communications equipment, the Customer shall pay an amount of money to provide for recovery of the present value of the carrying cost of income taxes on the payment for daily metering and communications equipment. Such carrying cost arises from the delay between federal and Pennsylvania income taxation and income tax deductions over the tax life of the equipment and a further amount equal to 72.67% of the carrying cost (based on present income tax rates). If additional facilities are required for furnishing of gas service, customer's payment for additional facilities required for furnishing of gas service shall be governed by Tariff Rule No. 3, "Extension of Facilities", and Tariff Rule No. 5, "Service Lines."

(C)

CHARACTER OF SERVICE

Gas, of a quality acceptable to the Company, owned by a DMT Service Customer and delivered, either directly or by displacement, into the Company's distribution system, will be transported, by the Company, to the delivery point designated by the DMT Service Customer.

TERM OF SERVICE AGREEMENT

If the requirements of this Rate Schedule are met, the Company shall offer to enter into a Service Agreement with an initial term of at least one year and successive one-year terms thereafter. The initial term of a Service Agreement may be for less than one year only with the mutual consent of both the DMT Service Customer and the Company. If the initial term of a Service Agreement is for less than one year, successive terms thereafter shall be equal in length to the initial term. Either the DMT Service Customer or the Company may terminate the Service Agreement at the end of a term upon written notice thereof to the other more than thirty (30) days prior to the end of a term; further provided, however, that the Company may terminate a Service Agreement at an earlier date as provided by law by provisions of this Tariff.

(C) Indicates Change

RATE SCHEDULE FOR DAILY METERED TRANSPORTATION SERVICE (cont'd)

MONTHLY RATES

Commodity Rates

For transportation of gas to Residential customers, the monthly rate for transportation of gas both within and outside the Commonwealth of Pennsylvania shall be:

\$2.4558 per Mcf.

For transportation of gas to Commercial and Public Authority Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$2.3656 per Mcf	for Small Commercial/Public Authority using not more than 250 Mcf per year	(D)
\$1.8645 per Mcf	for Small Commercial/Public Authority using greater than 250 Mcf but not more than 1,000 Mcf per year	(D)
\$1.4162 per Mcf	for Large Commercial/Public Authority	(I)

For transportation of gas to Commercial and Public Authority Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$2.3656 per Mcf	for Small Commercial/Public Authority using not more than 250 Mcf per Year	(D)
\$1.8645 per Mcf	for Small Commercial/Public Authority using greater than 250 Mcf but not more than 1,000 Mcf per year	(D)
\$1.4162 per Mcf	for Large Commercial/Public Authority	(I)

For transportation of gas to Small Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$2.1657 per Mcf for SVIS Customers. (D)

For transportation of gas to Small Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$2.1657 per Mcf for SVIS Customers. (D)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$1.0704 per Mcf for IVIS Customers. (D)

(D) Indicates Decrease

(C) Indicates Change

(I) Indicates Increase

RATE SCHEDULE FOR DAILY METERED TRANSPORTATION SERVICE (cont'd)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$1.0704 per Mcf for IVIS Customers. (D)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$0.8086 per Mcf. (I)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$0.8086 per Mcf. (I)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

\$0.4839 per Mcf.

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

\$0.4839 per Mcf.

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that is for recovery of gas costs or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a Gas Service Customer of the Company without use of the Company's facilities or another transporter of gas. The Company may also reduce or eliminate the compensation for line losses provided for in Special Provisions paragraph B of this rate schedule in order to meet the competitive circumstances for alternate fuels or bypass situations cited above excluding competition from other Pennsylvania local distribution companies. The Company will reduce the applicable rate only if:

- (a) Either (1) the Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;

(D) Indicates Decrease
(I) Indicates Increase

(C) Indicates Change

RATE SCHEDULE FOR DAILY METERED TRANSPORTATION SERVICE (cont.)

- (b) Volumes of gas that would be transported by the Company would be displaced by an alternate fuel or an alternative source of gas unless the Company reduces its transportation rate;
- (c) The Company will not reduce the rate for transportation service below the level necessary to transport gas; and
- (d) In the Company's judgment the DMT Service Customer has taken all reasonable steps to minimize the cost of gas supplies delivered to the Company's system in order to help meet competition.

Where the above criteria are met, the Company may, in its discretion enter into an agreement setting either: (1) a fixed transportation rate or (2) the basis for determining the transportation rate, for the period of the Service Agreement, which will specify which portion of the rate is being reduced.

If a Gas Service Customer is a member of a buyer group, bills for each member of a buyer group will be determined individually. Volumes of transportation service in a billing period will be allocated among members of a buyer group pursuant to the Service Agreement.

Volumes delivered as transportation service pursuant to this rate schedule shall be subject to State Tax Adjustment Surcharge.

Residential rates shall be subject to surcharges in accordance with Rider F - LIRA Discount Charge as set forth in this tariff.

(C)

CHARGES FOR TRANSPORTATION BY OTHERS

If furnishing service, pursuant to this Rate Schedule, requires the use of a transportation service provided other than by the Company, any cost incurred by the Company, with regard thereto, shall be billed to DMT Service Customer by the Company.

CHARGES UNDER OTHER RATE SCHEDULES

The Gas Service Customer receiving gas transported by the Company under this rate schedule shall pay all charges under all other applicable rate schedules and riders, irrespective of whether such Customer, in any billing period, receives only gas transported by the Company, and such Customer shall pay rates under all other applicable rate schedules for any service furnished to the Customer in addition to transportation service under this Rate Schedule.

(C) Indicates Change

CHARGES FOR OVERDELIVERIES

As used in this Rate Schedule, "overdeliveries" shall mean the cumulative amount by which the volume of gas delivered to the Company for the Customer's account, since the commencement of transportation service by the Company for the Customer under any rate schedule, after adjustment for line losses and after elimination of volumes purchased from the Customer by the Company, exceeds the total amount of transportation service volumes taken by the Customer from the Company under any rate schedule since the commencement of transportation service for the Customer by the Company. Such cumulative overdelivery balance shall be computed each day, and the rates set forth below shall be applied to the maximum daily overdelivery volume occurring during the billing month. (I)

If the DMT Service Customer in any billing month has overdeliveries in excess of two percent of the volume of gas transported for the customer in the billing month, the Customer shall be subject to additional charges each billing month. For a maximum daily overdelivery volume up to 37% of the volume of DMT service gas transported to the Customer by the Company in the billing month, the charge for overdeliveries shall be \$0.6351 per Mcf in excess of two percent of the volume of gas transported for the customer in the billing month. (I)

For overdeliveries equal to or more than 37% of the volume of DMT service gas transported to the Customer by the Company during the billing month, the charge for such excess overdeliveries shall be \$0.7624 per Mcf.

OPERATIONAL FLOW ORDERS

The Company may also issue Operational Flow Orders ("OFOs") which apply to transportation customers receiving service under this rate schedule as follows:

A Restriction on Access to Daily Metered Imbalances

OFOs may be issued to customers receiving service under this rate schedule to assure that adequate supplies are delivered to the Company. During such period, DMT customers shall not be permitted to use banked gas to cover daily underdeliveries in excess of the 2% tolerance during the term of the OFO. Furthermore, in the event an OFO is issued, metered usage in excess of 102% of confirmed deliveries on behalf of the DMT customer to Distribution's city gate, less line loss, shall be deemed a sale of gas by the Company to the customer. All provisions related to the price for such sales, including charges under Rate SB-Standby Service, shall apply.

(I) Indicates Increase

B. Waiver of Overdelivery Charges

The Company may, in its discretion, waive DMT overdelivery charges during or following colder than normal periods and to waive undelivery premiums during or following warmer than normal periods.

MAXIMUM DAILY QUANTITY

The "Maximum Daily Quantity" shall be the maximum volume of gas, expressed in Mcf, as set forth in a DMT Service Customer's Service Agreement, may be delivered into the Company's distribution system, during any twenty-four hour period, for transportation by the Company to such Customer as transportation service under this rate schedule. The Company, in its sole discretion and upon request of a DMT Service Customer, may agree to receive and to transport, during any twenty-four period, a volume in excess of the Maximum Daily Quantity as set forth in a transportation Service Customer's Service Agreement. During any hour of any twenty-four hour period, the Company shall not be required to receive and to transport more than 1/24 of the Maximum Daily Quantity as set forth in a Transportation Service Customer's Service Agreement.

BILLING

Monthly charges, for transportation service pursuant to this rate schedule, are subject to the Late Payment Charges set forth in Section 16 of the Rules and Regulations of this Tariff.

SPECIAL PROVISIONS

A. The volume of gas delivered into the Company's distribution system, on any day in behalf of Transportation Service Customers for transportation service pursuant to this Rate Schedule, shall be determined by meters and as provided in B, below, at the delivery points specified in the service Agreement or to another point or points acceptable to the Company.

If any such point of delivery is also a point at which the Company buys or exchanges gas for the Company's own account through the same meter, the volume of gas delivered into the Company's distribution system, in behalf of Transportation Service Customers for transportation service, shall be deemed to be the volume scheduled by the Company and such Customers to be delivered in behalf of such Customers, at such point on such day, determined after the adjustment provided in B, below, but shall not be more than the total amount actually delivered, determined after the adjustment provided in B below, through such meter into the Company's distribution system at such point on such day.

B. To compensate for line losses, the volume of gas delivered into the Company's distribution system, shall be determined for purposes of this Rate Schedule, effective August 1, 2013 to be equal to 99.85% of the amount indicated by a meter at the point of delivery into the Company's distribution system; provided however, that, where the only Company facilities involved in transporting gas to the Gas Service Customer are meters, meter installations, house regulators, house regulator installations and industrial measuring and regulating station equipment, no amount shall be deducted as compensation for line losses. (C)
(D)

C. Service under this Rate Schedule may be interrupted during periods of supply shortages but only based upon the schedule of priority of curtailment set forth in section 26 of the Rules and Regulations of this tariff.

D. Transportation service under this Rate Schedule may be interrupted or curtailed whenever, in the event of a sudden and unforeseen supply deficiency, the Company invokes emergency curtailment provisions under Tariff Rule 26.

(C) Indicates Change
(D) Indicates Decrease

E. In the event of interruption or curtailment of transportation service, pursuant to items C and D, above, and during such period of interruption or curtailment, the DMT Service Customer must sell to the Company all or a portion of the DMT Service Customer's supply of gas at the higher of (1) the Transportation Service Customer's cost of purchased gas at the point of delivery to the Company or (2) the Company's average cost of purchased gas per Mcf, as determined based upon the Company's Section 1307(f) Rate, which is \$6.4640. (I)

F. If a Gas Service Customer receiving gas transported by the Company uses less than the amount of gas delivered into the Company's system for transportation to such Customer ("excess deliveries"), the Gas Service Customer receiving gas transported by the Company may use such gas during the banking/balancing period defined below, following which the Company shall have the right, but not the obligation, to purchase remaining excess deliveries of gas from the DMT service Customer at a rate equal to the lowest of (1) the cost at which it was acquired by the DMT Service Customer, including pipeline transportation charges, or (2) the Company's average commodity delivered cost of gas to National Fuel Gas Supply Corporation, or (3) the Company's average commodity cost of locally produced gas during the month when excess deliveries were received by the Company. The cost at which the DMT Service Customer acquired the gas will be determined from such Customer's contract with the supplier or by a sworn affidavit setting forth the Customer's cost of gas, including cost of delivery of such gas to the Company's system. Upon request by the Company, the DMT Service Customer will be required to furnish to the Company the DMT service Customer's choice of (1) a copy of this contract or (2) an affidavit. The banking/balancing period shall be the three billing months after the billing month in which the Company received excess deliveries in behalf of the Customer.

G. "Underdeliveries" are volumes of gas taken from the Company by a Gas Service Customer in excess of the sum of (1) any excess deliveries of the customer at the beginning of the day and (2) the volume of gas delivered to the Company for the customer's account, after adjustment for line losses less volumes of volumes of gas determined to be sales by the Company to the customer. Cumulative underdeliveries, as determined each day, in excess of two percent of the volume of gas delivered by the Company to the customer that day, shall be a sale of gas by the Company to the customer under the applicable rate schedule plus applicable surcharges as set forth in Rate Schedule SB Special Provisions and shall not be recharacterized as transportation service under any circumstances. Cumulative underdeliveries of not more than two percent of the volume of gas delivered to a customer by the Company on any day may be offset by volumes of gas delivered to the Company for the customer's account, after adjustment for line losses, in excess of the volume of gas taken by the customer from the Company on subsequent days within the same billing month.

(D) Indicates Decrease

(I) Indicates Increase

H. Service under this rate schedule shall be available only to the extent that there is sufficient capacity for such service in those portions of the Company's system affected by providing of transportation service including but not limited to, that portion of the Company's system where gas is delivered to the Company and that portion of the Company's system where gas is delivered to the Customer. In determining the Company's ability to provide transportation service, sufficient capacity in the Company's system shall be assumed. If service shall not be supplied, based upon insufficient capacity, the burden shall be on the Company to prove such capacity limitation.

I. Where gas is received by the Company for transportation service pursuant to this Rate Schedule, title to such gas shall remain vested in the Transportation Service Customer for which such gas was received for transportation. The Company's furnishing transportation service for a Transportation Service Customer shall be complete upon delivery of gas received for transportation service, except as provided in E and F, above.

J. The Company shall not be liable, under any circumstances or in any respect, to a Gas Service Customer, Transportation Service Customer, a producer of gas or any other person or entity for damages arising either directly or indirectly from interruption, curtailment or termination of transportation service.

K. Revenues produced by charges to DMT customers for overdeliveries of transportation gas to such customers shall be treated in accordance with Paragraph (b)(11) of Rider "A".

L. Customers who contract for transportation service under this Rate Schedule shall have the right thereafter to purchase gas from the Company only to the extent that they have contracted for firm service under Rate Schedule SB for Standby Service or under Rate Schedule PSB for Priority Standby Service. Purchases of gas from the Company by transportation service customers who have not contracted for service under Rate Schedule PSB shall be subject to both the charges under the applicable sales rate schedule and all provisions of the Rate Schedule SB, including the Special Provisions.

M. Customers who elect to schedule their own gas supplies via Company's internet accessible Transportation Scheduling System and/or wish to access and/or obtain each day meter readings of the volume of gas delivered to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day shall execute a Data Security Agreement pursuant to Tariff Rule 33. (C)

(C) Indicates Change

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE

APPLICABLE TO USE FOR

Service hereunder is available to any licensed supplier ("MMNGS Supplier" or "Supplier") which has obtained the consent and appointment of MMT customer(s) whose volumes total at least 5,000 Mcf on an annual basis ("MMT Customer(s)" or "MMT Pool"), and agrees to assume the primary responsibility for the gas supply obligations for that group of MMT Customers.

CHARACTER OF SERVICE

Through the procedures and provisions of this Monthly Metered Natural Gas Supplier rate schedule qualified MMNGS Suppliers will contract for service with qualified MMT Customers and shall serve such MMT Customers for an established term lasting at least one month or one billing cycle.

The Company will bill the Supplier for aggregation services (including any purchases of Company gas) provided to the Supplier.

RATES AND CHARGES

A. Supplier Aggregation Charges

The MMNGS Supplier shall be billed the charges for services rendered for it as provided herein. A MMNGS Service Agreement will allow Suppliers under this service classification to aggregate supplies to serve individual qualified MMT Customers. When necessary to accommodate changes in customer supply and delivery requirements during the month, the Company will permit deliveries of interstate supplies into intrastate market pools. In order to accommodate such deliveries of interstate supplies into intrastate market pools, the MMNGS Supplier will be billed for the amount of interstate deliveries to intrastate pools at a rate of \$0.000/Mcf.

B. Administrative Charges

(D)

The Company will charge the MMNGS Supplier an administrative fee of \$100.00 per month for each MMNGS Service Agreement executed with the Company. This charge shall be waived for individual MMT Customers that will be their own MMNGS supplier and have a single account in their MMT Pool.

C. Exchange Fee

The Company will charge the Supplier an exchange fee of \$0.05 per Mcf for each Mcf transferred from and \$0.05 per Mcf transferred to a MMT Pool.

D. Billing Service Charges

An MMNGS Supplier may elect to have the Company bill gas supply charges to the Supplier's MMT customers. The rate to be charged by the Company to the Supplier for Standard Billing Service shall be \$0.20 for each bill rendered to an MMT Customer for the Supplier.

(D) Indicates Decrease

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

The Company shall provide the Supplier receiving standard Billing Service with meter reading information and other reports in the Company's standard electronic format on a basis corresponding to the MMT Customer's billing cycles. The Supplier shall provide the Company with all required Supplier billing and rate information necessary for customer billing as determined by the Company. The Supplier shall provide such billing information in the Company's required format. The Supplier shall provide its billing information no later than three business days before the last day of the month.

The Company will bill the MMT Customer for gas supplies sold by the Supplier to the Customer subject to the Supplier entering into a billing service contract with the Company. Payments made by the MMT Customer under the billing service will be applied first to amounts to past service due under an amortization agreement with the Company, next to current bills due to the Company, next to gas supply charges owed to the Supplier, next to charges for other non-regulated service charges, and lastly to any "neighbor for neighbor" contribution. The terms and charges for the Supplier billing services other than Standard Billing Services may be negotiated between the Company and the Supplier. The Company shall be under no obligation to provide the Supplier billing services other than Standard billing Services if mutually agreeable terms and charges cannot be negotiated.

SPECIAL PROVISIONS

A. Gas Quality

Gas delivered by the Supplier must satisfy the quality specifications included in the Rules for Transportation Service section of this tariff. For deliveries to the Company, such deliveries must be made at an appropriate Company facility located within the Territory, as described in this tariff, or at another point or points acceptable to the Company.

B. Allocation Priority

If any such point of delivery is also a point at which the Company buys or exchanges gas for the Company's own account though the same meter, the volume of gas delivered into the Company's distribution system, in behalf of MMT customers, shall be deemed in behalf of such MMT Customers, at such point on such day, determined after the adjustment provided in C, below, but shall not be more than the total amount actually delivered, determined after the adjustment provided in C below, through such meter into the Company's distribution system at such point on such day.

C. Allowance for Losses

As allowance for losses incurred in the process of delivery except as provided in Special Provision B under the MMT Rate schedule, Leaf No. 105, the Supplier shall provide the Company with a volume of gas equal to 0.15% of the amount delivered to the Company. (D)

(D) Indicates Decrease

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

D. City Gate Balancing

1. Determination of Daily Delivery Quantities and Aggregate Daily Delivery Quantities

The Company, based upon each MMT Customer's historical load profile and/or estimates of consumption as applied to any forecasted weather, shall determine a MMNGS Supplier's MMT Customer's projected weather normalized consumption for a given period; either monthly, weekly, or daily. Based upon this projected consumption, actual consumption readings as available and based on the system requirement to manage storage capacity retained by the Company to meet MMT Customer's daily balancing requirements, the Company will determine each MMT Customer's Daily Delivery Quantity (DDQ) and the Company will also determine the Supplier's MMT Pool's Aggregate Daily Delivery Quantity (ADDQ) by summing all DDQs of the MMT Customers in the Supplier's MMT Pool. The DDQs established under this rate schedule shall be calculated so as to minimize month end burner tip imbalances. In determining the DDQ of the customer group the maximum heating degree day ("HDD") amount utilized in the DDQ calculation shall be 52 HDDs. The DDQs and ADDQ so calculated will be used to determine the Supplier's daily delivery obligations at the Company City Gate. (C)

A MMNGS Supplier taking service under this rate schedule accepts the Company's calculation of the DDQ and/or ADDQ. The Company shall not be liable for the difference between the projected consumption and the consumption determination by the Company.

2. Delivery Requirements

Deliveries of natural gas at the City Gate under this rate schedule shall be made to meet the DDQs for all customers in a MMNGS Supplier's MMT Pool (the ADDQ) within a tolerance band described below. The Company will deliver to each individual MMT Customer its requirements.

With respect to Appalachian production sources connected directly to the Company's system, 100% of the historical average daily production for the month will be accepted as delivered to the system for meeting the DDQ delivery requirements of the MMNGS Supplier. While 100% of the historical daily average shall be made available, gas must be scheduled on a daily basis to be delivered to an MMT Pool in order for volumes to be allocated that day. In no event shall volumes that are not scheduled for delivery to MMNGS Pools be made available as a carryover for nominations to MMT pools on a subsequent day during the month.

To the extent the Supplier's City Gate deliveries differ from the ADDQ provided to the Supplier by the Company then a City Gate Imbalance shall occur ("Imbalance") and charges for such Imbalance will be incurred as described below.

The Company is not obligated to accept any quantities nominated by Supplier in excess of its MMT Pool's ADDQ.

(C) Indicates Change

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

3. City Gate Imbalance Charges

For City Gate deliveries by the MMNGS Supplier that differ from the applicable ADDQ, the Supplier will incur the following charges:

a. Charges for Daily City Gate Underdeliveries

i. For daily City Gate underdeliveries up to or equal to five (5) percent of the applicable ADDQ, there will be no charge.

ii. For Daily City Gate underdeliveries in excess of five (5) percent of the applicable ADDQ during the Summer Period (April through October), the charge for the gas supplied by the Company to make up for the underdeliveries shall be equal to the higher of \$7.00 per Dth or 110% of the DMI for that day plus all transportation costs to the Company's City Gate. (C)

iii. For Daily City Gate underdeliveries in excess of five (5) percent of the applicable ADDQ during the Winter Period (November through March), the charge for the gas supplied by the Company to make up for the underdeliveries shall be equal to the higher of \$10.00 per Dth or 110% of the DMI for that day plus all transportation costs to the Company's City Gate. (C)

iv. During OFO periods, the charges described in Section G herein shall apply in addition to those charges specified in this Section D.3.

b. Charges for Daily City Gate Overdeliveries

There shall be no charges for Daily City Gate overdeliveries of up to five (5) percent of the applicable ADDQ, however, any such overdeliveries in excess of five (5) percent of the applicable ADDQ may be rejected by the Company in its sole discretion.

E. MMNGS Burner Tip Imbalances

1. Aggregation of MMNGS Burner Tip Imbalance

For the MMT customers included in the MMNGS Supplier's MMT Pool, the Company will net all the month end burner tip imbalances for which the Supplier is responsible pursuant to this rate schedule into a single monthly burner tip imbalance ("MMNGS Burner Tip Imbalance").

(C) Indicates Charge

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER (Cont.)

2. Resolution of MMNGS Burner Tip Imbalances

The Company will resolve MMNGS Burner Tip Imbalances through either a rollover to subsequent months or a cash out pursuant to Rule 30. The default method of MMNGS Burner Tip Imbalance resolution will be the cash out. Should the Company determine that circumstances render resolution of imbalances via cash out operationally infeasible, the Company may, in discretion and upon reasonable notice, suspend the cash out and resolve imbalances through rollover.

|
(C)
|

a. Rollover Procedure

(C)

At the close of the billing month, the Company will calculate the MMNGS Burner Tip Imbalance, as described above, for each MMT Pool. The Company shall adjust the applicable ADDQ for the next following month that operating conditions permit, upward to reconcile a net deficiency in the billing month, or downward to reconcile a net surplus in the billing month.

b. Cash Out Procedure

(C)

i. MMNGS Burner Tip Imbalances Resulting in Net Overdelivery

For MMNGS Burner Tip Imbalances which result in a net overdelivery of volumes of gas for a MMT Pool during the month, the Company shall resolve the imbalance pursuant to Rule 30.

(C)

ii. MMNGS Burner Tip Imbalances Resulting in Net Underdelivery

For MMNGS Burner Tip Imbalances which result in a net underdelivery of volume of gas for a MMT Pool during the month, the Company shall resolve the imbalances pursuant to Rule 30.

(C)

3. Exchange of Net Burner Tip Imbalances

A Supplier may exchange a Burner Tip Imbalance due the Company under its MMNGS Service Agreement with a Burner Tip Imbalance due from another Supplier under another MMNGS Service Agreement or a Supplier under a SATS Service Agreement. Exchange of imbalances shall be accomplished pursuant to Rule 30.

(C)

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

F. System Maintenance Order ("SMO")

1. Issuance of SMOs

The Company shall issue System Maintenance Orders from time to time which assure that gas is flowing to the City Gate where and when needed. Such SMOs shall include but not be limited to orders to deliver gas at any or all of the points obtained by Suppliers to deliver gas at particular primary points into National Fuel Gas Supply Corporation. Should MMNGS Suppliers fail to comply with such SMOs then the Company shall issue OFOs as described below.

2. Communication of SMOs

SMOs will be communicated to the Supplier through the Company's website with four hours advanced notice. Such notice will be supplemented by the use of internet E-mail notification to a Supplier's Internet address.

3. Access to Upstream Pipeline Information

To monitor compliance with SMOs, the Supplier shall be required to provide the Company with the permission to access nomination information.

┌
(C)
└

G. Operational Flow Order ("OFO")

1. Issuance of OFOs

The Company reserves the right to issue Operational Flow Orders as necessary to preserve the operational integrity of its system. Such OFOs may include, but shall not be limited to the following: a requirement to flow gas to the citygate, a reduction in Daily City Gate delivery tolerance and a requirement to flow gas to the Supplier's primary receipt points on NFGSC.

2. Charges for Violation of OFOs

In addition to all other charges due the Company, any gas not delivered by MMNGS Supplier in violation of any OFO issued under this Section G may be assessed a charge of the higher of \$25 per Dth or the DMI for that day plus all transportation costs to the Company's City Gate.

3. Communication of OFOs

OFOs will be communicated to the Supplier through the Company's website with four hours advanced notice. Such notice will be supplemented by the use of internet E-mail notification to a Supplier's Internet address.

4. Access to Upstream Pipeline Information

To monitor compliance with OFOs, the Supplier shall be required to provide the Company with the permission to access nomination information.

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

H. Termination of Service for Failure to Deliver Daily Quantity

1. The Company shall have the right to terminate service under this rate schedule to any Supplier that fails for any three (3) days to deliver at least ninety-five (95) percent of the applicable ADDQ for the Supplier's MMNGS Pool, measured during a single thirty day period ("Terminated Supplier") or one day of zero delivery. The terminated Supplier, at the Company's option, may be prohibited from receiving service under this rate schedule for 6 months if the MMT Customer does not take service from another qualified MMNGS Supplier. Such Terminated Supplier's MMT Customers will be served by the Company pursuant to the terms of the Standby Rate Schedule.

2. Supplier's MMT customers may be notified by the Company as to the impending transfer to Company service, together with a statement that the transfer is the result of the Supplier's failure to perform as required. The Company shall recover the cost of such notice from the Supplier by drawing down the Supplier's security deposit or other security instrument.

I. Supplier Qualification Criteria

1. Pursuant to 52 Pa. Code Chapter 62, Company may request and adjust security from Supplier and service under this Rate Schedule is contingent upon the MMNGS Supplier meeting and maintaining the creditworthiness standards. (C)

Applicants for service hereunder will be required to complete a Credit Application for evaluation by the Company based on the criteria set forth in this tariff. The results of the creditworthiness checks performed by the Company will be communicated to the applicant within two weeks of the Company's receipt of the properly completed application.

2. The MMNGS Supplier's application shall include a description of the MMNGS Supplier's operational capability for meeting the requirements of its MMT Pool. The Company shall then make a determination as to whether this capability is sufficient.

(C) Indicates Change

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

3. MMNGS Suppliers shall include with their application payment of a non-refundable \$500 fee. For natural gas suppliers serving MMT Customers on August 1, 2006, and all individual MMT Customers that will be their own MMNGS Supplier, the application fee shall be waived by the Company.

J. MMNGS Supplier Obligations

1. Suppliers may enroll customers for service commencing with the MMT Customer's meter reading in any month. Service to the MMT Customer shall begin at the start of the customer's billing cycle after enrollment confirmation has been provided by the Company.

2. Enrollments/drops shall occur electronically, however, each MMNGS Supplier will be obligated to keep on file either oral or written evidence of each customer's enrollment with that Supplier, which evidence shall be available for Company review at any time, upon 24 hours' notice. The Company will provide the MMT Customer with a letter confirming enrollment, if the Customer notifies the Company within 5 days (through October 25, 2018, thereafter as per 52 Pa. Code §59.93 - §59.94) of issuance of the confirmation letter that the Customer does not wish to be served by the MMNGS Supplier, the enrollment of the Customer will be rescinded. (C)

3. To the extent of MMNGS Supplier's MMT Customer at any time is not served any longer by that MMNGS Supplier and is then the responsibility of the Company, effective upon the transfer of that customer to the Company, the Company shall charge the customer for all Company provided natural gas under the terms of the Standby rate schedule.

4. MMNGS Suppliers agree to abide by any other specific requirements in the Company's Operational Procedures Manual.

(C) Indicates Change

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

K. MMNGS Service Agreement

The initial term of the MMNGS Service Agreement between the Company and the MMNGS Supplier shall be for an annual period and renewable annually for successive one-year terms unless canceled by default of any terms or conditions hereof, or by the Company or the Supplier on sixty (60) days written notice prior to the end of a term, or otherwise by mutual agreement.

L. Force Majeure

MMNGS Supplier will be excused from delivering the required daily quantity of supply on any given day for Force Majeure events which directly and substantially affect a MMNGS Supplier's natural gas deliveries to the Company and for which alternate supply arrangements cannot be obtained by MMNGS Supplier or, if the MMNGS Supplier is unsuccessful in obtaining alternate supplies, for which the Company cannot obtain supplies on behalf of the MMNGS Supplier. For supplies provided by the Company, the MMNGS Supplier shall be charged the higher of 125% of the Residential purchased gas cost (commodity and demand) identified in Rider A or the highest DMI during the month plus all transportation costs to the Company's City Gate for each day such alternate supplies are delivered on behalf of MMNGS Supplier. For purposes of this rate schedule, a Force Majeure event will be any failure of the final pipeline delivering gas to the Company or an upstream pipeline feeding such pipeline, with such failure having been classified as a Force Majeure event pursuant to the terms of that pipeline's Federal Energy Regulatory Commission approved tariff. A Force Majeure event that curtails the MMNGS Supplier's assigned firm transportation service on an upstream pipeline that ultimately feeds a downstream pipeline, which directly and substantially affects a MMNGS Supplier's natural gas deliveries to the Company, and for which no alternative supplies are available from the Company or other sources will excuse a MMNGS Supplier from performing pursuant to this rate schedule to the extent of such curtailment. If at such time the MMNGS Supplier is delivering gas to other customers on the same interstate pipeline system, the volume excused from performance on the Company's system will be no more than a proportionate amount of the affected deliveries curtailed by the Force Majeure event. The MMNGS supplier is responsible for supplying complete information and verifiable proof of all the particulars requested by the Company related to any such Force Majeure exclusion.

(C)

(C) Indicates Change

RATE SCHEDULE MMNGS
MONTHLY METERED NATURAL GAS SUPPLIER SERVICE (Cont.)

In order to validate a claim of Force Majeure, the MMNGS Supplier must have a firm, non-interruptible service with the affected pipeline that is covered by the Force Majeure event and must be willing to present such agreements to the Company.

Volumes not delivered pursuant to this Special Provision must be made up by MMNGS Supplier as soon as possible at a delivery rate to be established by the Company. Any curtailed volumes which are not made-up within thirty (30) days will be sold to MMNGS Supplier at a rate of \$10.00 per Mcf.

M. Title to Gas

Supplier warrants that, at the time of delivery of gas to the Company's City Gate, Supplier or Customer shall have good title to deliver all volumes made available.

N. Control and Possession

After Supplier delivers gas or causes gas to be delivered to the Company, the Company shall be deemed to be in control and possession of the gas until it is redelivered to the Customer at Customer's meter.

O. 24 Hour Availability

Supplier shall include on the MMNGS Service Agreement a phone number by which Supplier can be reached on a twenty-four (24) hour basis.

P. Data Security Agreement

Supplier shall execute a Data Security Agreement pursuant to Tariff Rule 33.

(C)

(C) Indicates Change

RATE SCHEDULE SATC
SMALL AGGREGATION TRANSPORTATION CUSTOMER SERVICE

APPLICABLE TO USE FOR

Service hereunder is available on or after October 30, 2001 to any qualified customer ("SATC Customer" or "Customer") that has enrolled to receive gas supply service from a qualified supplier under the Company's Small Aggregation Transportation Supplier Service ("SATS Supplier" or "Supplier").

The Purchase of Receivable Program (Docket No. P-2009-2099182) will be implemented upon Commission Order and the completion of the necessary system changes.

CHARACTER OF SERVICE

Through the procedures and provisions of this Small aggregation Transportation rate schedule SATC Customers will contract for service with a SATS Supplier and be served by such Supplier for an established term ending at the SATC Customer's meter reading in April (April billing cycle). The enrollment period and service starting dates will be as specified in Rate Schedule SATS.

The Company will maintain a list of SATS Suppliers including appropriate contact information as provided by the SATS Supplier. This list will be made available to customers upon request.

There are two (2) billing options. The default option is utility consolidated billing under which the Company renders a single bill, including NGDC and NGS charges to the SATC customer, and remits payment to the Supplier. The Company will buy the SATC NGS receivable at a discount of those customer groups eligible for the POR program. Suppliers using consolidated billing for eligible POR customer groups must participate in the POR program. Suppliers participating in the POR program must use the consolidated billing option and enter into the Billing Services Agreement. The second option is the dual bill model, where the Company bills the SATC customer for regulated service only. The POR program is not available for Suppliers utilizing the dual billing option.

Customers shall not participate in both the LIRA pilot and the Small Aggregation Transportation Customer Service program.

RATE SCHEDULE SATC
SMALL AGGREGATION TRANSPORTATION CUSTOMER SERVICE (Cont'd)

RATES AND CHARGES

A. Customer Transportation Service Rates

The Company will provide transportation services to deliver gas supplies to the SATC Customer(s). The Customer shall be billed the charges for the transportation services rendered for it at the appropriate charges provided herein for which service the SATC Customer qualifies.

The SATC Customer shall pay the following transportation charges for the transportation of gas. The commodity rates set forth below contain a component, presently \$0.02836 per Ccf, for the recovery of purchased gas demand costs and shall be adjusted pursuant to Rider A of the tariff. Such purchased gas costs collected through these rates shall be included as revenues for the recovery of purchased gas costs as specified in Rider A of this tariff. (I)

SMALL AGGREGATION TRANSPORTATION CUSTOMER SERVICE (Cont.)

SPECIAL PROVISIONS

(C)

A. Qualified Suppliers

Customers under this service classification may only receive service from qualified SATS Suppliers. Such qualified SATS Suppliers are required, among other things, to meet the Consumer Protections requirements of the SATS Rate Schedule.

B. Termination of SATS Supplier

If the SATS Supplier serving the SATC Customer is terminated the SATC Customer shall be served by the Company under the appropriate sales service rate schedule for all services provided after the termination of the Supplier. The Company is the Supplier of Last Resort ("SOLR"). As such, it will sell gas supplies to customers who have not chosen an alternative National Gas Supplier, choose to be supplied by the Company or whom Natural Gas Suppliers have declined to serve, provided that the customer has met all of the terms and conditions for receiving service set forth in this tariff.

C. Restriction of Customer Information Provided to Suppliers

The Company may not release customer information to a third party unless the customer has been notified of such intent and has been provided a method to restrict the release of private information. Customers may restrict the provision of information by returning a signed form, orally or electronically.

The customer may choose to restrict the release of customer information according to one of the following two restriction options:

1. Restrict the release of only the customer's historical billing data.
2. Restrict the release of all private customer information including name, billing address, service address, rate class, rate sub-class, account number and historical billing data.

Telephone numbers may not be released to third parties under any circumstances.

(C) Indicate Change

D. Customer Rights as to the Handling of Complaints

Inquires and complaints from any customer will be received and processed in a timely manner. Residential customer inquiries and complaints will be handled in conformance with Chapter 56 of the Commission's Rules. When a customer inquiry or complaint relates to services provided by an SATS Supplier, the Company will refer the customer to the SATS Supplier for a response. If a customer inquiry or complaint involves issues or services provided by both the Company and the customer's SATS Supplier, the Company will develop and then maintain a system of tracking and coordinating the response to the customer inquiry or complaint from both parties. If a customer is dissatisfied with the Company's response, or indicates dissatisfaction with the SATS Supplier response to the customer with respect to the NGS services, the Company will inform the customer of the right to file an informal appeal with the Bureau of Consumer Services at the Commission and provide the customer with the toll-free telephone number and mailing address of the Commission.

E. Billing in the Event of a SATS Supplier Default

In the event of a default or discontinuance by a SATS Supplier, the Company will charge the customer the rate agreed to by the SATS Supplier and the customer for the remainder of the billing period, provided that the Company either has available or is provided the agreed upon rate by the Supplier or the Commission, and the Company will recover any difference between its costs and the SATS Supplier rate charged to the customer solely from the SATS Supplier or its bond or other security.

F. Termination of Service due to Non-Payment

(C)

In addition to any right to terminate service under the Pennsylvania Public Utility Code, Commission regulations or this tariff, the Company may also terminate service for nonpayment of a billing or billings for natural gas supply charges provided by a SATS Supplier when the receivable is purchased by the Company. Such termination of service shall be in accordance with general regulations of the Pennsylvania P.U.C. applicable thereto and in accordance with the Pennsylvania Utility Code. Such termination shall be applicable to the SATC Residential, SATC Small Commercial and Public Authority under 250 Mcf/year, SATC Small Commercial and Public Authority between 250 and 1,000 Mcf/year and the SATC Small Volume Industrial less than 1,000 Mcf/year classifications under the Purchase of Receivable Program.

SATC customers under the POR program may avoid termination if such customer pays the termination notice amount. The termination notice amount will be the lower of the past due charges actually billed or the past due charges that would have been due had the customer received service at Distribution's otherwise applicable sales rate during the time the customer accrued the unpaid balance("Lesser of Calculation").

Terminated residential SATC customers under the POR program may be reconnected if such residential customer pays the termination notice amount.

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE

APPLICABLE TO USE FOR

Service hereunder is available on or after October 30, 2001 to any supplier ("SATS Supplier" or "Supplier") which has obtained the consent and appointment of a group of at least 50 relevant customers or a group of relevant customers whose volumes total at least 5,000 Mcf on an annual basis ("SATC Customer(s)" or "SATC Customer Group"), and agrees to assume the primary responsibility for the gas supply obligations for that group of SATC Customers. (C)

CHARACTER OF SERVICE

Through the procedures and provisions of this Small Aggregation Transportation Supplier rate schedule qualified SATS Suppliers will contract for service with qualified SATC Customers and shall serve such SATC Customers for an established term ending at the conclusion of the SATC Customer's meter reading in April (April billing cycle).

The Company will bill the Supplier for aggregation services (including any purchases of Company gas) provided to the Supplier.

RATES AND CHARGES

A. Supplier Aggregation Charges

The SATS Supplier shall be billed the charges for the aggregation services rendered for it at the appropriate Supplier aggregation charges provided herein.

A SATS Service Agreement will allow Suppliers under this service classification to aggregate supplies to serve individual qualified SATC residential customers and qualified SATC non-residential customers.

(C)

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

1. Billing Service Charges

For a pilot period of three years, terminable by the Company at the end of the third year following 12 months prior notice to participating Suppliers, the Company will purchase amounts receivable for SATC customers with annual consumption less than 1,000 Mcf/year as described herein and further detailed in the billing agreement. (C)

The rate to be charged by the Company to the Supplier for Standard Billing Service shall be \$0.20 for each bill rendered to an SATC Customer for the Supplier.

The Company shall provide the Supplier receiving Standard Billing Service with meter reading information and other reports in the Company's standard electronic format on a basis corresponding to the SATC Customer's billing cycles. The Supplier shall provide the Company with all required Supplier billing and rate information necessary for customer billing as determined by the Company. The Supplier shall provide such billing information in the Company's required format. The Supplier shall provide Supplier billing information no later than three business days before the last day of the month.

The Company will bill the SATC Customer for gas supplies sold by the Supplier to the Customer subject to the Supplier entering into a billing service contract with the Company. For Consolidated billing service where the Company does not purchase the Supplier's receivable payments made by the Customer under the billing service will be applied first to amounts to past service due under an amortization agreement with the Company, next to current bills due to the Company, next to gas supply charges owed to the Supplier, next to charges for other non-regulated service charges, and lastly to any "neighbor for neighbor" contribution. The terms and charges for the Supplier billing services other than Standard Billing Services may be negotiated between the Company and the Supplier. The Company shall be under no obligation to provide the Supplier billing services other than Standard Billing Services if mutually agreeable terms and charges cannot be negotiated. (C)

The Company will purchase the accounts receivable from POR Suppliers servicing SATC Residential, SATC Small Commercial and Public Authority customers less than 250 Mcf/year, SATC Small Commercial and Public Authority customers between 250 and 1,000 Mcf/year and SATC Small Volume Industrial customers less than 1,000 Mcf/year at a discount where the Company is providing a Utility Consolidated Bill to the customer. The residential discount is 2.2930% and the non-residential discount is 0.2914%. (C)

To the extent that a POR customer account has an unpaid balance on its final bill's late payment date or at the time the unpaid account balance is transferred to another active account, the Company will deduct from the payment to the POR SATS Supplier for the purchase of its receivable the unpaid billed amounts in excess of the amount that would have been due had the customer received service at Distribution's otherwise applicable sales rate during the time the customer received service from the SATS Supplier (pursuant to Rate Schedule SATC Section F "Lesser of Calculation"). (C)

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

SPECIAL PROVISION

A. Gas Quality

Gas delivered by the Supplier must satisfy the quality specification of the pipelines used to transport Supplier's gas. For deliveries to the Company, such deliveries must be made at an appropriate Company facility located within the Territory, as described in this tariff, or at another point or points acceptable to the Company.

B. Allowance for Losses

As allowance for losses incurred in the process of delivery, the Supplier shall provide the Company with a volume of gas equal to 0.15% of the amount delivered to the Company. In addition, for deliveries into Company capacity retained pursuant to Sections C.3. and C.5., Suppliers shall provide incremental quantities of gas equal to the amount of retainage required to transport gas from the receipt point into such Company retained capacity to the entry point to the Company's system ("City Gate"). (D)

(D) Indicates Decrease

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

C. Total Upstream Capacity Requirements for SATS Suppliers

SATS Suppliers shall be required to provide sufficient firm pipeline transportation and storage capacity to meet the estimated extreme day requirements of their SATC Customer groups as further described below. The SATS Suppliers' estimated extreme day requirements of their SATC Customer Group used for Supplier capacity allocations and requirements shall be based on a sixty-two (62) degree day extreme peak day calculation. The Company shall utilize peaking and temperature swing storage capacity retained by the Company and recovered through SATC rates to provide for any variances between actual and forecasted usage and for any peak delivery requirements for days colder than sixty-two (62) degree days.

Such sufficient pipeline transportation and storage capacity shall be provided through the following means:

1. Released ESS Storage Capacity and Associated EFT Capacity

a. Requirements To Be Met Through ESS Storage

54% of extreme peak day requirements shall be provided through the Company's ESS storage and associated EFT transportation capacity on NFGSC. Such NFGSC Storage and transmission capacity shall be released to SATS Suppliers at the maximum rate under the pipeline's FERC gas tariff. (I)

b. Initial Assignment of ESS Storage Capacity

In a month a SATS Supplier begins to serve SATC customers, it shall be provided with an initial assignment of storage capacity, based on the percentage set forth at C.1.a. above, to meet the Supplier's requirements for the upcoming winter period. Approximately fifteen days prior to the close of nominations for the month, the Company will calculate the quantity of storage capacity released to match the SATS Supplier's winter requirements based on the number of SATC Customers aggregated by the Supplier. If the initial assignment takes place in a month other than April, the Company will transfer storage gas to the Supplier pursuant to C.1.c below. The SATS Supplier shall be responsible for all taxes and pipeline fees associated with moving or transferring the storage gas to the Company.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

c. Additional Assignments of ESS Storage Capacity

Approximately fifteen days prior to the close of nominations for each month, the Company will recalculate the quantity of storage capacity released to match the SATS Supplier's revised winter requirements based on the number of SATC Customers aggregated by the Supplier. If additional SATC Customers join a SATS Supplier's SATC Customer Group, the Company will release additional capacity as required, based on the percentage set forth at C.1.a. above. In addition, the SATS Supplier will be required to pay the Company for storage gas transferred and all taxes and pipeline fees associated with moving or transferring the storage gas to the Supplier. The storage gas transfer rate shall be the sum of (1) the higher of the Company's average cost of gas based upon the Company's Section 1307f rate, or the DMI for the first day of month in which gas is transferred plus all transportation costs to the Company's City Gate, plus (2) the demand Transfer Recovery Rate ("DTR Rate"). The DTR rate shall equal the per Mcf System Average Unrecovered Demand Charge revenue beginning in the month of April through the initial month that storage capacity is released to the Supplier. The System Average Unrecovered demand Charge Revenue shall equal the sum of the differences between the average demand charge revenues and the average fixed demand costs beginning the month of April through the initial month that storage capacity is released to the Supplier.

The DTR by month shall be as follows:

Capacity Transfer <u>Month</u>	DTR <u>\$/Mcf</u>	
April	\$0.00	
May	\$0.00	
June	\$0.00	
July	\$0.00	
August	\$0.00	
September	\$0.02	(I)

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

d. Return of ESS Storage Capacity

In a month when the quantity of storage capacity released to match the SATS Supplier's revised winter requirements decreases, the SATS Supplier shall return storage capacity to the Company. The Supplier may either (1) transfer the remaining storage gas to a third party, subject to applicable pipeline requirements and charges; (2) retain the storage gas in the Supplier's remaining storage capacity or (3) transfer the storage gas to the Company at the lesser of (a) 95% of the injection period weighted DMI for the first day of the month during the previous storage injection period (April through October), plus all transportation costs to the Company's City gate; or (b) 95% of the DMI for the first day of the month plus all transportation costs to the Company's City Gate. With respect to (a) above, a weighting factor shall be applied to the DMI plus all transportation costs to the Company's City gate for each month as follows: 6% for the months April and May, 17% for the months June through September and 20% to October. The SATS Supplier shall be responsible for all taxes and pipeline fees associated with moving or transferring the storage gas to the Company. (C)

If a Supplier's SATS Agreement is canceled or terminated, the Company will recall ESS storage and associated EFT transmission capacity that has been released to the Supplier unless either: (1) the Company no longer requires the ESS storage and associated EFT transmission capacity to serve sales and SATC customers or (2) the Company can obtain or has obtained satisfactory substitute storage and related transmission capacity at a lower cost. The Company shall have the right but not the obligation to purchase the remaining storage gas at the lesser of (a) 95% of the injection period weighted DMI for the first day of the month during the previous injection period (April through October), plus all transportation costs to the Company's City Gate and a proportionate share of storage demand capacity charges on such volumes since April 1; or (b) 95% of the DMI for the first day of the month plus all transportation costs to the Company's City Gate and proportionate storage demand capacity charges on such volumes since April 1. With respect to (a) above, a weighting factor shall be applied to the DMI plus all transportation costs to the Company's City gate for each month as follows: 6% for the months April and May, 17% for the months June through September and 20% to October. The SATS Supplier shall be responsible for all taxes and pipeline fees associated with moving or transferring the storage gas to the Company. (C)

e. Required ESS Storage Inventory Levels

Suppliers will be required to follow a schedule set out by the Company such that the particular storage levels are obtained throughout the year, to assure the Supplier's SATC customers' needs are met by the Supplier.

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

e. Required ESS Storage Inventory Levels (Cont.)

In addition to meeting the City Gate balancing requirements set forth below, Suppliers must meet a minimum storage inventory level of:

12% on May 31,
29% on June 30,
46% on July 31,
63% on August 31,
80% on September 30,
95% on October 31,
86% on November 30,
68% on December 31,
45% on January 31,
28% on February 28 (February 29 in a leap year)

┌
(C)
└

Any deficiency more than 2% below the required monthly minimum storage inventory level will be automatically adjusted by the Company to meet the required level. The supplier will be charged per Mcf for such automatic adjustment at the higher of \$7.00 per MCF or the DMI for that day plus all transportation costs to the Company's City Gate. For any deficiency within 2% of the required monthly minimum storage inventory level, the Supplier will be charged per Mcf for such adjustment at the DMI for that day plus all transportation costs to the Company's City Gate, unless the Company, subject to operating conditions, determines that such deficiencies need not be adjusted.

The Supplier shall be required to provide the Company with the permission necessary to allow the Company to obtain access to the supplier's storage balance information to provide assurance of compliance with the monthly storage inventory requirements.

The Company may elect to relax the monthly minimum storage inventory level applicable to all Suppliers by posting notice on its web site at least 5 business days prior to the last day of the first month to which a relaxed limit would apply.

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

2. Released Transmission Capacity Not Included in SATC
Transportation Rates

46% of extreme peak day requirements is to be provided by the release of pipeline capacity upstream of NFGSC and the release of associated EFT transportation capacity on NFGSC which is not included in transportation rates. All such capacity shall be released to SATS Suppliers, and SATS Suppliers shall take such released capacity, at the maximum rate under the pipeline's FERC gas tariff. The actual pipeline capacity path upstream of NFGSC to be released to the Supplier by the Company shall be designated by the Company from its available capacity. The Company will attempt to accommodate a Supplier's request for particular capacity on a first-come first-serve basis. (D)

As an alternative to the above, the Company may designate an alternative capacity path(s) from its available capacity. The capacity release rate for the pipeline capacity path released to the Supplier shall be \$8.1745/Dth which equals the weighted average demand cost of upstream capacity, however, capacity released on NFGSC will be released at the maximum rate under NFGSC's FERC gas tariff. The Company will post a listing of the alternative capacity path(s) designated, including the associated quantity of capacity, on its web site. (I)

For capacity termination notices, prior to the termination notice date of any capacity contract in this Section C.2., the Company will issue a request for proposals to qualified Suppliers under this tariff to determine if the Company should terminate, renew, or replace such contract, in whole or in part. The Company will terminate a proportionate share of the capacity contract if: (1) Suppliers demonstrate that they will provide comparable firm capacity to serve the Company's core customers, (2) the Suppliers agree to assign such comparable capacity at the contracted price to the Company upon Company request if such capacity is required to meet supply requirements of SATC Customers due to the termination of the SATS Supplier pursuant to Section H.1. or if the Supplier has reduced the level of delivery requirements from the previous periods requirements, and 3) the Commission approves such comparable capacity. Comparable capacity must have firm rights for at least the seven (7) winter months, and such capacity must have primary delivery rights into available primary receipt rights on NFGSC held by the Company. Comparable capacity must have firm capacity rights sufficient in volume and duration (with renewal rights) to serve the customers to be served by the SATS Supplier. The Company will post a listing of capacity contracts, including the associated quantity of capacity, that it determines to be of critical status on its web site.

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

If the Company terminates capacity included in this Section C.2., the requirement to take released capacity pursuant to this Section C.2. shall be adjusted downward for the Supplier that replaces the terminated capacity to reflect such termination. Corresponding changes will be made in Section C.4.

3. Capacity Upstream of NFGSC Included in Transportation Rates

0% of extreme peak day requirements is to be provided by a SATS Supplier's maximum daily delivery into allocated upstream pipeline receipt points which the Company has retained ("Company Retained Upstream Capacity") and the cost of which capacity is included in transportation rates. The actual pipeline point upstream of NFGSC to be made available to the Supplier by the Company shall be designated by the Company. The Company will respond to requests for particular capacity and receipt points on a first-come first-serve basis and will reallocate capacity each April.

4. SATS Supplier Provided Capacity

0% of the extreme peak day requirements is to be provided by a SATS Supplier's own firm capacity upstream of NFGSC. The percentage provided by SATS Supplier's own firm capacity upstream of NFGSC is subject to increases if the Company terminates capacity as specified in Section C.2. The Supplier shall assign such SATS Supplier capacity to the Company upon Company request if such capacity is required to meet supply requirements of SATC Customers due to the termination of the SATS Supplier pursuant to Section H.1 or if the Supplier has reduced the level of delivery requirements from the previous period requirements. The Company will release to the SATS supplier EFT capacity on NFGSC at the maximum rate under NFGSC's FERC gas tariff equivalent to the peak day requirements to be provided by the SATS Supplier's own firm capacity.

5. NFGSC Capacity Included in Transportation Rates

The Company will deliver all upstream pipeline deliveries associated with Special Provisions Sections C.3 above through the NFGSC EFT capacity retained by the Company and included in transportation rates.

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

D. City Gate Balancing

1. Determination of Daily Delivery Quantities and Aggregate Daily Delivery Quantities

The Company, based upon each SATC Customer's historical load profile and/or estimates of consumption as applied to any forecasted weather, shall determine a SATS Supplier's SATC Customer's projected weather normalized consumption for a given period; either monthly, weekly, or daily. Based upon this projected consumption, actual consumption readings as available and based on the system requirement to manage storage capacity retained by the Company to meet temperature swings, the Company will determine each SATC Customer's Daily Delivery Quantity (DDQ) and the Company will also determine the Supplier's SATC Customer Group's Aggregate Daily Delivery Quantities (ADDQ) by summing all DDQs of the SATC Customers in the Supplier's SATC Customer Group. The DDQs and ADDQ so calculated will be used to determine the Supplier's daily delivery obligations at the Company City Gate. Such ADDQ shall not exceed the capacity available to the SATS Supplier as determined under Special Provisions Sections C1, C2, C3 and C4. The DDQs and ADDQs shall also be used to determine the specific rates and charges as outlined in this rate schedule.

A SATS Supplier taking service under this rate schedule accepts the Company's calculation of the DDQ and/or ADDQ. The Company shall not be liable for the difference between the projected consumption and the consumption determination by the Company.

2. Delivery Requirements

Deliveries of natural gas at the City Gate under this rate schedule both from direct deliveries at the City Gate under Special Provisions Section C.1. and as a result of deliveries to upstream pipeline transfer points made under Special Provisions Sections C.2., C.3., and C.4. shall be made to meet the DDQs for all customers in a SATS Supplier's SATC Customer Group (the ADDQ) within a tolerance band described below. The Company will deliver to each individual SATC Customer the Customer's requirements.

With respect to Appalachian production sources connected directly to the Company's system, 100% of the historical average daily production for the month will be accepted as delivered to the system for meeting DDQ delivery requirements of the SATS Supplier provided that such nominations are prioritized higher than nominations for transportation service under other Rate Schedules. While 100% of the historical daily average shall be made available, gas must be scheduled on a daily basis to be delivered to a SATC Pool in order for volumes to be allocated that day. In no event shall volumes that are not scheduled for delivery to SATS pools be made available as a carryover for nominations to SATC pools on a subsequent day during the month.

(C)

(C) Indicates Change

Voluntarily Suspended to April 13, 2012

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

2. Delivery Requirements (cont'd)

To the extent the Supplier's City Gate deliveries differ from the ADDQ provided to the Supplier by the Company, then a City Gate Imbalance shall occur ("Imbalance") and charges for such Imbalance will be incurred as described below. The Company is not obligated to accept any quantities nominated by Supplier in excess of its SATC Customer Group's ADDQ.

3. City Gate Imbalance Charges

For City gate deliveries by the SATS Supplier that differ from the applicable ADDQ, the Supplier will incur the following charges:

A. Charges for Daily City Gate Underdeliveries

i. For Daily City Gate underdeliveries up to or equal to two (2) percent of the applicable ADDQ, there will be no charge.

ii. For Daily City Gate underdeliveries in excess of two (2) percent of the applicable ADDQ during the Summer Period (April through October), the charge for the gas supplied by the Company to make up for the underdeliveries shall be equal to the higher of \$7.00 per Dth or 110% of the DMI for that day plus all transportation costs to the Company's City Gate.

iii. For daily City Gate underdeliveries in excess of two (2) percent of the applicable ADDQ during the Winter Period (November through March), the charge for the gas supplied by the Company to make up for the underdeliveries shall be equal to the higher of \$10.00 per Dth or 110% of the DMI for that day plus all transportation costs to the Company's City Gate.

iv. During OFO periods, the charges described in Section G herein shall apply in addition to those charges specified in this Section D.3.

b. Charges for Daily City Gate Overdeliveries

There shall be no charges for Daily City Gate overdeliveries of up to two (2) percent of the applicable ADDQ, however, any such overdeliveries in excess of two (2) percent of the applicable ADDQ may be rejected by the Company in its sole discretion.

E. Burner Tip Imbalances

1. Aggregation of Customer Burner Tip Imbalance

For SATC customers included in the SATS Supplier's SATC Customer Group, the Company will net all the imbalances for which the Supplier is responsible pursuant to this rate schedule into a single monthly imbalance ("SATS Burner Tip Imbalance").

(C)

(C) Indicates Change

Voluntarily Suspended to April 13, 2012

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

2. Resolution of Burner Tip Imbalances

The Company will resolve SATS Burner Tip Imbalances through either a rollover to subsequent months or a cash out pursuant to Rule 30. The default method of Burner Tip imbalance resolution will be the cash out. Should the Company determine that circumstances render resolution of imbalances via cash out operationally infeasible, the Company may, in discretion and upon reasonable notice, suspend the cash out and resolve imbalances through rollover.

|
(C)
|

a. Rollover Procedure

(C)

At the close of the billing month, the Company will calculate the SATS Burner Tip Imbalance, as described above, for each SATC Customer Group. The Company shall adjust the applicable ADDQ for the next following month that operating conditions permit, upward to reconcile a net deficiency in the billing month, or downward to reconcile a net surplus in the billing month.

(C)

b. Cash Out Procedure

(C)

i. Burner Tip Imbalances Resulting in Net Overdelivery

For SATS Burner Tip Imbalances which result in a net overdelivery of volumes of gas for a SATC Customer Group during the month, the Company shall resolve the imbalance pursuant to Rule 30.

(C)
(C)

ii. Burner Tip Imbalances Resulting in Net Underdelivery

For SATS Burner Tip Imbalances which result in a net underdelivery of volumes of gas for a SATC Customer Group during the month, the Company shall resolve the imbalance pursuant to Rule 30.

(C)
(C)

iii. Exchange of Net Burner Tip Imbalances

A Supplier may exchange a SATS Burner Tip Imbalance due the Company under its SATS Service Agreement with a SATS Burner Tip Imbalance due from another Supplier under another SATS Service Agreement or a Supplier under a MMNGS Service Agreement. Exchange of imbalances shall be accomplished pursuant to Rule 30.

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

F. System Maintenance Order ("SMO") (C)

1. Issuance of SMOs

The Company shall issue System Maintenance Orders from time to time which assure that gas is flowing to the City Gate where and when needed. Such SMOs shall include but not be limited to orders to deliver gas at any or all of the points obtained by or allocated to Suppliers in Special Provisions Section C.3 above, to deliver gas at particular primary points into NFGSC, or into the particular primary points of the Company Retained Upstream Capacity, as well as orders to deliver additional gas to or from storage. Should SATS Suppliers fail to comply with such SMOs then the Company shall issue OFOs as described below.

Voluntarily Suspended to April 13, 2012

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

2. Communication of SMOs

SMOs will be communicated to the Supplier through the Company's website with four hours advanced notice. Such notice will be supplemented by the use of internet E-mail notification to a Supplier's Internet address.

3. Access to Upstream Pipeline Information (C)

To monitor compliance with SMOs, the Supplier shall provide the Company (C) with permission to access nomination information.

G. Operational Flow Order ("OFO")

1. Issuance of OFOs

The Company reserves the right to issue Operational Flow Orders as necessary to preserve the operational integrity of its system. Such OFOs may include, but shall not be limited to the following: a requirement to flow gas to or from storage on NFGSC, a reduction in Daily City gate delivery tolerance and a requirement to flow gas to the Supplier's primary receipt points on NFGSC.

2. Charges for Violation of OFOs

In addition to all other charges due the Company, any gas not delivered by SATS Supplier in violation of any OFO issued under this Section G may be assessed a charge of the higher of \$25 per Dth or the DMI for that day plus all transportation costs to the Company's City Gate.

3. Communication of OFOs

OFOs will be communicated to the Supplier through the Company's website with four hours advanced notice. Such notice will be supplemented by the use of internet E-mail notification to a Supplier's Internet address.

4. Access to Upstream Pipeline Information (C)

To monitor compliance with OFOs, the Supplier shall provide the Company (C) with permission to access nomination information.

(C) Indicates Change

Voluntarily Suspended to April 13, 2012

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

H. Termination of Service for Failure to Deliver Daily Quantity

1. The Company shall have the right to terminate service under this rate schedule to any Supplier that fails for any three (3) days to deliver at least ninety (90) percent of the applicable ADDQ for the Supplier's SATC Customer Group, measured during a single thirty day period ("Terminated Supplier"). The Terminated Supplier, at the Company's option, may be prohibited from receiving service under this rate schedule for the greater of 6 months or until such time as another Enrollment Period as defined in Section J.1. is established by the Company. Such Terminated Supplier's SATC Customers will be served by the Company with the obligation that the gas supplies in storage and the capacity reserved for those customers shall be transferred to the Company through sale and recall as follows:

Voluntarily Suspended to April 13, 2012

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

a. Upon notice by the Company to the Terminated Supplier, the Company at its option may recall the capacity that it has released to the Terminated Supplier; and or require release of the Supplier's capacity as provided under section C.4.

b. Inventory remaining in storage shall be sold to the Company at a price equal to the Company's lowest monthly weighted average commodity cost experienced over the last twelve months.

c. The Terminated Supplier shall be responsible for any and all fees and taxes associated with moving or transferring the storage inventory to the Company.

d. Any failure to comply with the provisions under Sections H.1.a., H.1.b., H.1.c., and C.4. will result in the permanent ineligibility to receive service under this Rate Schedule.

e. Supplier's SATC customers may be notified by the Company as to the impending transfer to Company service, together with a statement that the transfer is the result of the Supplier's failure to perform as required. The Company shall recover the cost of such notice from the Supplier by either, (1) adjusting the inventory sales price described in Section H.1.b., or (2) drawing down the Supplier's security deposit (or other security instrument).

I. Supplier Qualification Criteria

1. Pursuant to 52 Pa. Code Chapter 62, Company may request and adjust security from Supplier and service under this rate schedule is contingent upon the SATS Supplier meeting and maintaining the creditworthiness standards. (C)

Applicants for service hereunder will be required to complete a Credit application for evaluation by the Company based on the criteria set forth in this tariff. The results of the creditworthiness checks performed by the Company will be communicated to the applicant within two weeks of the Company's receipt of the properly completed application.

2. The SATS Supplier's application shall include a description of the SATS Supplier's operational capability for meeting the requirement of its SATC Customer Group. The company shall then make a determination as to whether this capability is sufficient.

3. SATS Suppliers shall also describe in the application the means by which they will handle marketing and billing for 50 or more customers. Alternatively, SATS Suppliers may identify a third party, including the Company, in the case of the NGS' use of POR billing, and describe how such party will handle such tasks. Suppliers or their third party representative included in the Company's Purchase of Receivable Program must abide by the Company's Marketing Standards. The Company shall then make a determination as to whether this capacity is sufficient.

Suppliers serving customers with annual consumption less than 1,000 Mcf/year participating in the Company's POR program will be required to use the Company's Utility Consolidated Billing System and enter into the Billing Services Agreement.

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

4. SATS Suppliers shall include with their application payment of a non-refundable \$500 fee.

5. SATS Suppliers shall also include with their application a copy of their intended pro forma contract for their prospective SATC Customers (minus confidential pricing provisions) demonstrating inclusion of the provisions set out in Section K herein.

J. SATS Supplier Obligations

1. Suppliers may enroll customers for service commencing with the SATC Customer's meter reading in any month. Service to the SATC Customer shall begin at the start of the customer's billing cycle after enrollment confirmation has been provided by the Company.

2. Once qualified, SATS Suppliers will be obligated to notify the Company on a weekly basis during the Enrollment Period of those customers enrolled in the Suppliers' SATC Customer Groups.

3. When a customer requests to change its SATS Supplier, upon receiving direct oral confirmation or written authorization to change the SATS Supplier, the customer's new SATS Supplier shall notify the Company by the end of the next business day following completion of the application process.

4. Enrollment shall occur electronically, however, each SATS Supplier will be obligated to keep on file either oral or written evidence of each customer's enrollment with that Supplier, which evidence shall be available for Company review at any time, upon 24 hours' notice. The Company will provide the SATC Customer with a letter confirming enrollment, if the Customer notifies the Company within the time period prescribed by Order of the Commission or, in the same absence of same, as specified per 52 Pa. Code §59.93 - §59.94) of issuance of the confirmation letter that the Customer does not wish to be served by the SATS Supplier, the enrollment for the Customer will be rescinded. (C)

5. To the extent a SATS Supplier's SATC Customer at any time is not served any longer by that SATS Supplier and is then the responsibility of the Company, effective upon the transfer of that customer to the Company, the Company shall have the option to recall capacity released to the Supplier under Special Provisions Section C.1 and C.2 or require assignment of capacity under Special Provisions Section C.4.

6. Any customer may identify persons authorized to make changes to the customer's account. To accomplish this, the customer provides the Company with a signed document identifying by name those persons who have the authority to initiate a change of the customer's SATS Supplier. A document signed by the customer whose sole purpose is to obtain the customer's consent to change natural gas suppliers shall be accepted as valid and result in the initiation of the customer's request. Documents not considered as valid include, but are not limited to, canceled checks, signed entries into contests and documents used to claim prizes won in contests.

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

7. SATS Suppliers agree to abide by any other specific requirements in the Company's Aggregation Application as such is approved by the Public Utility Commission.

K. Consumer Protections

In addition to satisfying the criteria set out in Sections I and J above, SATS Suppliers seeking to obtain service hereunder to sell gas to customers must demonstrate to the Company that they will meet the following requirements:

1. Contracts between SATS Suppliers and residential SATC Customers will contain specific language advising customers that the following consumer protections (Sections K.2-5.) will be provided by the Supplier.

2. The SATS Supplier has established a dispute resolution process satisfactory to the Company. Questions or complaints received by the Company will be processed to determine the nature of the dispute, and then forwarded as appropriate to the SATS Supplier. The Company shall provide the Commission's Competition Hotline phone number to each SATC Customer who has submitted a question or complaint concerning the SATS Supplier.

3. Suppliers serving customers with annual consumption less than 1,000 Mcf/year participating in the Company's POR program will be required to use the company's Utility Consolidated Billing System and enter into the Billing Services Agreement. For SATS Suppliers not using the company's Utility Consolidated Billing System, the bills rendered by the SATS Supplier will be clear and in plain language and shall meet the billing information requirements of Chapter 56 of the Commission's regulations, including the requirement that bills contain a statement directing the customer to "register any question or complaint about the bill prior to the due date," with the Company telephone number where the customer may initiate the inquiry or complaint. The Supplier shall submit a sample bill to the Company. (C)

4. The SATS Supplier performing its own billing shall provide SATC Customers with minimum payment periods required by the Commission's regulations; i.e. residential customers shall have 20 days to pay and commercial customers shall have 15 days. If a customer fails to pay by the due date, the Supplier shall notify the SATC Customer by mail that failure to pay will result in transfer to the Company upon a minimum of 15 days, whereupon the Company has the ability to terminate service for non-payment in accordance with the Commission's regulations. (C)

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

5. Procedures are in place to ensure residential SATC Customers receive adequate prior notice of termination of gas supply services. The procedures must provide that notifications be sent to the residential SATC Customer(s) and to the Company at least 15 days before discontinuation of supply service to allow residential SATC Customers the opportunity to pay the overdue bill. Customers will only be transferred from a Supplier to the Company upon the "Control Date" for such customer, as such is established by the Company. The Company will be allowed to terminate customers participating in the Company's POR program for non-payment of SATC supplies pursuant to Rate Schedule SATC Section F ("Lesser Of" calculation). (C)

6. For SATS Suppliers exiting the program ("Exiting Suppliers") and who intend to no longer serve SATC Customers, in addition to those protections noted in Section K.5, such Exiting Suppliers shall provide written notice to its SATC Customers and the Company sixty (60) days before it exits. The notice shall include information regarding the SATC Customers' ability to choose another SATS Supplier or return to the Company's sales service, assurances service will be provided by the Company and information regarding payment of their first bill. (C)

7. SATS Suppliers will abide by the Company's Marketing Standards specifically involving marketing efforts that involve uninvited personal visits to customers' homes or places of business, also known as door-to-door sales. (C)

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

L. SATS Service Agreement

The initial term of the SATS Service Agreement between the Company and the SATS Supplier shall be for an annual period ending March 31 and renewable annually for successive one-year terms unless canceled by default of any terms or conditions hereof, or by the Company or the Supplier on sixty (60) days written notice prior to the end of a term, or otherwise by mutual agreement. A SATC Customer shall be obligated to contract with Suppliers for terms ending with the customer's April billing cycle. Notice for termination of such contracts shall be a matter to be determined by the SATS Supplier and SATC Customer.

M. Force Majeure

SATS Supplier will be excused from delivering the required daily quantity of supply on any given day for Force Majeure events which directly and substantially affect a SATS Supplier's natural gas deliveries to the Company and for which alternate supply arrangements cannot be obtained by SATS Supplier or, if the SATS Supplier is unsuccessful in obtaining alternate supplies, for which the Company cannot obtain supplies on behalf of the SATS Supplier. For supplies provided by the Company, the SATS Supplier shall be charged the higher of 125% of the Residential purchased gas cost (commodity and demand) identified in Rider A or the highest DMI during the month plus all transportation costs to the Company's City Gate for each day such alternate supplies are delivered on behalf of SATS Supplier. For purposes of this rate schedule, a Force Majeure event will be any failure of the final pipeline delivering gas to the Company or an upstream pipeline feeding such pipeline, with such failure having been classified as a Force Majeure event pursuant to the terms of that pipeline's Federal Energy Regulatory Commission approved tariff. A Force Majeure event that curtails the SATS Supplier's assigned firm transportation service on an upstream pipeline that ultimately feeds a downstream pipeline, which directly and substantially affects a SATS Supplier's natural gas deliveries to the Company, and for which no alternative supplies are available from the Company or other sources will excuse a SATS Supplier from performing pursuant to this rate schedule to the extent of such curtailment. If at such time the SATS Supplier is delivering gas to other customers on the same interstate pipeline system, the volume excused from performance on the Company's system will be no more than a proportionate amount of the affected deliveries curtailed by the Force Majeure event. The SATS supplier is responsible for supplying complete information and verifiable proof of all the particulars requested by the Company related to any such Force Majeure exclusion.

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

In order to validate a claim of Force Majeure, the SATS Supplier must have a firm, non-interruptible service with the affected pipeline that is covered by the Force Majeure event and must be willing to present such agreements to the Company.

Volumes not delivered pursuant to this Special Provision must be made up by SATS Supplier as soon as possible at a delivery rate to be established by the Company. Any curtailed volumes which are not made-up within thirty (30) days will be sold to SATS Supplier at a rate of \$10.00 per Mcf.

N. Title to Gas

Supplier warrants that, at the time of delivery of gas to the Company's City Gate or at the receipt point in to the Company Retained Upstream Capacity pursuant to Special Provisions Section C.3., Supplier or Customer shall have good title to deliver all volumes made available.

O. Control and Possession

After Supplier delivers gas or causes gas to be delivered to the Company, the Company shall be deemed to be in control and possession of the gas until it is redelivered to the Customer at Customer's meter.

P. 24 Hour Availability

Supplier shall include on the SATS Service Agreement a phone number by which Supplier can be reached on a twenty-four (24) hour basis.

Q. Nominations of Supplies

For deliveries into Company Retained Upstream Pipeline Capacity pursuant to Section C.3., Supplier shall notify the Company through the Company's web site one hour in advance of the deadline the Company has to submit nominations to upstream transporters of any and all information required by upstream transporters to nominate, confirm and schedule gas on their facilities. (C)

R. Service Quality Guidelines

Suppliers shall adhere to the Public Utility Commission standards for credit determination, deposits, initiation and discontinuation of service as specified in the Public Utility Commission's Maintaining Service Quality Guidelines at Docket No. M-00991249F0003.

S. Customer Information Disclosure Guidelines

Suppliers shall adhere to the Public Utility Commission standards related to disclosure of terms of service, marketing, advertising and sales practices, and privacy of customer information as specified in the Public Utility Commission's Customer Information Disclosure Guidelines at Docket No. M-00991249F0005.

(C) Indicates Change

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

T. Billing in the Event of a SATS Supplier Default

In the event of a default or discontinuance by a SATS Supplier, the Company will charge the customer the rate agreed to by the SATS Supplier and the customer for the remainder of the billing period, provided that the Company either has available or is provided the agreed upon rate by the Supplier or the Commission, and the Company will recover any difference between its costs and the SATS Supplier rate charged to the customer solely from the SATS Supplier or its bond or other security.

U. Standards of Conduct

The Company and Suppliers shall comply with the following requirements.

1. The Company shall apply its tariffs in a nondiscriminatory manner to its affiliated Supplier and any nonaffiliated Supplier.

2. The Company shall not apply a tariff provision in any manner that would give its affiliated Supplier an unreasonable preference over other Suppliers with regard to matters such as scheduling, balancing, transportation, storage, curtailment, capacity release and assignment, or nondelivery, and all other services provided to its affiliated Supplier.

3. Mandatory tariff provisions shall not be waived by the Company for any Suppliers absent prior approval of the Commission.

4. If a tariff provision is not mandatory or provides for waivers, the Company shall grant the waivers without preference to its affiliated Supplier or non-affiliated Supplier.

5. The Company shall maintain a chronological log of tariff provisions for which it has granted waivers. Entries shall include the name of the party receiving the waiver, the date and time of the request, the specific tariff provision waived and the reason for the waiver. The chronological log shall be open for public inspection during normal business hours.

6. The Company shall process requests for distribution services promptly and in a nondiscriminatory fashion with respect to other requests received in the same or a similar period. The Company shall maintain a chronological log showing the processing of requests for transportation services. The chronological log shall be open for public inspection during normal business hours.

7. If the Company provides a distribution service discount, fee waiver or rebate to its favored customers, or to the favored customers of its affiliated Supplier, the Company shall offer the same distribution service discount, fee waiver or rebate to other similarly situated customers. Offers shall not be tied to any unrelated service, incentive or offer on behalf of either the Company or its affiliated Supplier. A chronological log shall be maintained showing the date, party, time and rationale for the action. The chronological log shall be open for public inspection during normal business hours.

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

8. Subject to customer privacy or confidentiality constraints, the Company shall not disclose, directly or indirectly, any customer proprietary information to its affiliated Supplier unless authorized by the customer. To the extent that the Company does disclose customer information without customer authorization, it shall contemporaneously provide this same information to other similarly situated Suppliers in a similar fashion so as not to selectively disclose, delay disclosure, or give itself or its affiliated Supplier any advantage related to the disclosure. A chronological log shall be maintained showing the date, time and rationale for the disclosure. The chronological log shall be open for public inspection during normal business hours.

9. The Company shall justly and reasonably allocate to its affiliated Supplier the costs or expenses for general administration or support services provided to its affiliated Supplier.

10. The Company shall not condition or tie the provision of any product, service or price agreement by the Company (including release of interstate pipeline capacity) to the provision of any product or service by its affiliated Supplier.

11. The Company shall not give its affiliated Supplier preference over a non-affiliated Supplier in the provision of goods and services including processing requests for information, complaints and responses to service interruptions. The Company shall provide comparable treatment in its provision of such goods and services without regard to a customer's chosen Supplier.

12. The Company and its affiliated Supplier shall maintain separate books and records. Further, transactions between the Company and its affiliated Supplier shall not involve cross-subsidies. Any shared facilities shall be fully and transparently allocated between the Company function and the affiliated Supplier function. The Company accounts and records shall be maintained such that the costs incurred on behalf of an affiliated Supplier may be clearly identified.

13. The Company employees who have responsibility for operating the distribution system, including natural gas delivery or billing and metering, shall not be shared with an affiliated Supplier, and their offices shall be physically separated from the office(s) used by those working for the affiliated Supplier. Such the Company employees may transfer to an affiliated Supplier provided such transfer is not used as a means to circumvent these interim standards of conduct.

14. Neither the Company nor its affiliated Supplier shall directly or by implication, falsely and unfairly represent to any customer, Supplier or third party that an advantage may accrue to any party through use of the Company's affiliates or subsidiary, such as:

a. That the Commission regulated services provided by the Company are of a superior quality when services is purchased from its affiliated Supplier; or

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

b. That the merchant services (for natural gas) are being provided by the Company when they are in fact being provided by an affiliated Supplier;

c. That the natural gas purchased from a non-affiliated Supplier may not be reliably delivered;

d. That natural gas must be purchased from an affiliated Supplier to receive Commission regulated services.

15. When the affiliated Supplier markets or communicates to the public using the Company name or logo, it shall include a legible disclaimer that states:

a. That the affiliated Supplier is not the same company as the Company;

b. That the prices of the affiliated Supplier are not regulated by the Commission; and

c. That a customer does not have to buy natural gas or other products from the affiliated Supplier in order to receive the same quality service from the Company.

When an affiliated Supplier advertises or communicates verbally through radio or television to the public using the Company name or logo, the affiliated Supplier shall include at the conclusion of any such communication a legible disclaimer that includes all of the disclaimers listed in this paragraph.

16. Except in competitive bid situations the Company shall not (a) jointly market or jointly package its Commission regulated services with the services of an affiliated Supplier or (b) offer or provide to its affiliated Supplier products or services, including bill inserts in the Company bills promoting an affiliated Supplier's services or a link from the Company's website, unless the Company offers or provides the products or service to all non-affiliated Suppliers on the same terms and conditions.

17. The Company shall not offer or sell natural gas commodity or capacity to its affiliated Supplier without simultaneously posting the offering electronically on a source generally available to the market or otherwise making a sufficient offer to the market. The Company shall maintain a chronological log of these public disseminations. The chronological log shall be open for public inspection during normal business hours.

18. The Company shall keep a chronological log of any complaints, excepting paragraph 9, regarding discriminatory treatment of Suppliers. This chronological log shall include the date and nature of the complaint and the resolution of the complaint. The chronological log shall be open for inspection during normal business hours.

19. Dispute Resolution Procedures (with the exception of paragraph 9, which are exclusively under the purview of the Commission):

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

a. Any dispute between a Supplier, and/or an affiliated Supplier, and a non-affiliated Supplier alleging a violation of any of these Standards of Conduct provisions, the Supplier must provide the Company and/or affiliated Supplier, as applicable, a written Notice of Dispute that includes the names of the parties and customer(s), if any, involved and a brief description of the matters in dispute.

b. Within five (5) days of the Company's and/or affiliated Supplier's receipt of a Notice of Dispute, a designated senior representative of each of the parties shall attempt to resolve the dispute on an informal basis.

c. In the event the designated representatives are unable to resolve the dispute by mutual agreement within thirty (30) days of said referral, the dispute shall be referred for mediation through the Commission's Office of Administrative Law Judge. A party may request mediation prior to that time if it appears that informal resolution is not productive.

d. If mediation is not successful, then the matter shall be converted to a formal proceeding before a Commission Administrative Law Judge.

e. Any Party may file a complaint concerning the dispute with the Commission under relevant provisions of the Public Utility Code.

f. Parties alleging violations of these standards may pursue their allegations through the Commission's established complaint procedures. A complainant bears the burden of proof consistent with 66 Pa. C.S. §332 (relating to Public Utility Code) in regard to the allegations and may impose penalties for such violations pursuant to 66 Pa.C.S. § 3301.

V. Customer Dispute Procedures Relating to Unauthorized Changes of Suppliers.

1. When a customer contacts Company or a Supplier and alleges that his/her Supplier has been changed without consent, the party contacted shall:

a. Consider the matter a customer registered dispute.

b. Investigate and respond to the dispute consistent with the requirements found in §§56.151 and 56.152 (relating to utility company dispute procedures).

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

2. When the customer's dispute has been filed within the first two billing periods since the customer should reasonably have known of a change of Suppliers and the dispute investigation establishes that the change occurred without the customer's consent, the customer shall not be responsible for any Supplier charges rendered during that period. If the customer has made payments during this period, the Supplier responsible for initiating the change of supplier shall issue a complete refund within 30 days of the close of the dispute. The refund or credit provision applies only to the natural gas supply charges.

3. A customer who has had a Supplier changed without having consented to that change shall be switched back to the original Supplier for no additional fee. Any charges involved in the switch back to the prior Supplier shall be the responsibility of the Supplier that initiated the change without the customer's consent.

4. Should a customer file an informal complaint with the Commission alleging that the customer's Supplier was changed without the customer's consent, the Bureau of Consumer Services will issue an informal decision that includes a determination of customer liability for any Supplier bills or administrative charges that might otherwise apply, rendered since the change of the Supplier.

5. The provisions of this section do not apply in instances when the customer's service is discontinued by the Supplier and subsequently provided by the Company because no other Supplier is willing to provide service to the customer.

6. Company and Suppliers shall preserve all records relating to unauthorized change of Supplier disputes for a period of three years from the date the customers filed the dispute. These records shall be made available to the Commission or its staff upon request.

W. Data Security Agreement

Supplier shall execute a Data Security Agreement pursuant to Tariff Rule 33. (C)

RATE SCHEDULE FOR DAILY METERED LARGE MANUFACTURING TRANSPORTATION SERVICE

DEFINITIONS

- (1) Gas Service Customer - A Gas Service Customer is an entity that is attached to the Company's lines and uses gas in its operations or in its premises;
- (2) DMLMT - Daily Metered Large Manufacturing Transportation
- (3) DMLMT Service Customer - Any entity that has executed a DMLMT Service Agreement with the Company for transportation of gas by the Company.

AVAILABILITY OF SERVICE

If all of the qualifications (a) through (e) set forth below are met, any entity will be considered a DMLMT Service Customer under this Rate Schedule.

- (a) The entity that will receive gas transported by the Company has a volumetric requirement of at least 2 Bcf per year
- (b) A DMLMT service agreement must be executed by the DMLMT Service Customer in the form prepared by the Company (the "Service Agreement");
- (c) The DMLMT Service Customer has obtained, or has agreed to obtain, a supply of gas, of a quality acceptable to the Company, from any source of gas;
- (d) The DMLMT Service Customer has made, or has caused to be made, arrangements by which such volumes of gas can be delivered, either directly or by displacement, on a firm or interruptible basis, into the Company's distribution system; and
- (e) If facilities are required for furnishing of DMLMT service, in addition to facilities that are required for furnishing of gas service, to a Gas Service Customer, the DMLMT Service Customer shall have paid, in full, for any additional facilities required to be constructed for furnishing of DMLMT service, which payment shall not

be subject to refund under any circumstances. As deemed necessary by the Company in its sole discretion, the DMLMT customer shall be required also to pay, in full, for costs of installing daily metering and communications equipment selected by the Company which will enable the Company to obtain each day meter readings of the volume of gas delivered to the Company or to another point or points acceptable to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day. In addition, with regard to daily metering and communications equipment, the Customer shall pay an amount of money to provide for recovery of the present value of the carrying cost of income taxes on the payment for daily metering and communications equipment. Such carrying cost arises from the delay between federal and Pennsylvania income taxation and income tax deductions over the tax life of the equipment and a further amount equal to 72.67% of the carrying cost (based on present income tax rates). If additional facilities are required for furnishing of gas service, Customer's payment for additional facilities required for furnishing of gas service shall be governed by Tariff Rule No. 3, "Extension of Facilities", and Tariff Rule No. 5, "Service Lines."

CHARACTER OF SERVICE

Gas, of a quality acceptable to the Company, owned by a DMLMT Service Customer and delivered, either directly or by displacement, into the Company's distribution system, will be transported, by the Company, to the delivery point designated by the DMLMT Service Customer.

TERM OF SERVICE AGREEMENT

If the requirements of this Rate Schedule are met, the Company shall enter into a Service Agreement with the customer for a term that will be established in the Service Agreement. However, the Company may terminate a Service Agreement at an earlier date as provided by law or the provisions of this Tariff.

RATE SCHEDULE FOR DAILY METERED LARGE MANUFACTURING TRANSPORTATION SERVICE (C)
(cont'd)

MONTHLY RATES

For transportation of gas to Large Industrial Manufacturing Customers,
the monthly rate for transportation shall be:

\$0.4839 per Mcf. (D)

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that is for recovery of gas costs or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a Gas Service Customer of the Company without use of the Company's facilities or another transportation of gas. The Company will reduce the applicable rate only if:

- (a) Either (1) the Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;
- (b) Volumes of gas that would be transported by the Company would be displaced by an alternate fuel or an alternative source of gas unless the Company reduces its transportation rate;
- (c) The Company will not reduce the rate for transportation service below the level necessary to transport gas; and
- (d) In the Company's judgment the DMLMT Service Customer has taken all reasonable steps to minimize the cost of gas supplies delivered to the Company's system in order to help meet competition.

Where the above criteria are met, the Company may, in its discretion enter into an agreement setting either: (1) a fixed transportation rate or (2) the basis for determining the transportation rate, for the period of the Service Agreement, which will specify which portion of the rate is being reduced.

Volumes delivered as transportation service pursuant to this rate schedule shall be subject to State Tax Adjustment Surcharge

CHARGES FOR TRANSPORTATION BY OTHERS

If furnishing service, pursuant to this Rate Schedule, requires the use of a transportation service provided other than by the Company, any cost incurred by the Company, with regard thereto, shall be billed to DMLMT Service Customer by the Company.

(D) Indicates Decrease
(I) Indicates Increase

(C) Indicates Change

CHARGES UNDER OTHER RATE SCHEDULES

The Gas Service Customer receiving gas transported by the Company under this rate schedule shall pay all charges under all other applicable rate schedules and riders, irrespective of whether such Customer, in any billing period, receives only gas transported by the Company, and such Customer shall pay rates under all other applicable rate schedules for any service furnished to the Customer in addition to transportation service under this Rate Schedule. The DMLMT Customer shall be charged the customer charge under Rate Schedule LIS. The Customer may receive service under Rate Schedule LIS if the Customer so requests and the Company has sufficient gas supply available, and other customers or the Company would not be harmed by the Company providing this service to the Customer.

CHARGES FOR OVERDELIVERIES

As used in this Rate Schedule, "overdeliveries" shall mean the cumulative amount by which the volume of gas delivered to the Company for the Customer's account, since the commencement of transportation service by the Company for the Customer under any rate schedule, after adjustment for line losses and after elimination of volumes purchased from the Customer by the Company, exceeds the total amount of transportation service volumes taken by the Customer from the Company under any rate schedule since the commencement of transportation service for the Customer by the Company. Such cumulative overdelivery balance shall be computed each day, and the rates set forth below shall be applied to the maximum daily overdelivery volume occurring during the billing month.

If the DMLMT Service Customer in any billing month has overdeliveries in excess of two percent of the volume of gas transported for the customer in the billing month, the Customer shall be subject to additional charges each billing month. For a maximum daily overdelivery volume up to 37% of the volume of DMLMT service gas transported to the Customer by the Company in the billing month, the charge for overdeliveries shall be \$0.6351 per Mcf in excess of two percent of the volume of gas transported for the customer in the billing month.

For overdeliveries equal to or more than 37% of the volume of DMLMT service gas transported to the Customer by the Company during the billing month, the charge for such excess overdeliveries shall be \$0.7624 per Mcf.

The Company may reduce or eliminate the overdelivery charges and may modify the operational flow order's and daily delivery quantity ("DDQ") requirements of customers receiving service under this rate schedule in order to meet the competitive circumstances for alternative fuels or bypass situations as set forth in this Service Classification.

OPERATIONAL FLOW ORDERS

The Company may also issue OFOs which apply to transportation customers receiving service under this rate schedule as follows:

A Restriction on Access to Daily Metered Imbalances

OFOs may be issued to customers receiving service under this rate schedule to assure that adequate supplies are delivered to the Company. During such period, DMLMT customers shall not be permitted to use banked gas to cover daily underdeliveries in excess of the 2% tolerance during the term of the OFO. Furthermore, in the event an OFO is issued, metered usage in excess of 102% of confirmed deliveries on behalf of the DMLMT customer to Distribution's city gate, less line loss, shall be deemed a sale of gas by the Company to the customer. All provisions related to the price for such sales, including charges under Rate SB-Standby Service, shall apply.

B. Waiver of Overdelivery Charges

The Company may, in its discretion, waive DMLMT overdelivery charges during or following colder than normal periods and to waive undelivery premiums during or following warmer than normal periods.

MAXIMUM DAILY QUANTITY

The "Maximum Daily Quantity" shall be the maximum volume of gas, expressed in Mcf, as set forth in a DMLMT Service Customer's Service Agreement, may be delivered into the Company's distribution system, during any twenty-four hour period, for transportation by the Company to such Customer as transportation service under this rate schedule. The Company, in its sole discretion and upon request of a DMLMT Service Customer, may agree to receive and to transport, during any twenty-four period, a volume in excess of the Maximum Daily Quantity as set forth in a transportation Service Customer's Service Agreement. During any hour of any twenty-four hour period, the Company shall not be required to receive and to transport more than 1/24 of the Maximum Daily Quantity as set forth in a Transportation Service Customer's Service Agreement.

BILLING

Monthly charges, for transportation service pursuant to this rate schedule, are subject to the Late Payment Charges set forth in Section 16 of the Rules and Regulations of this Tariff.

SPECIAL PROVISIONS

A. The volume of gas delivered into the Company's distribution system, on any day in behalf of Transportation Service Customers for transportation service pursuant to this Rate Schedule, shall be determined by meters and as provided in B, below, at the delivery points specified in the Service Agreement or to another point or points acceptable to the Company.

If any such point of delivery is also a point at which the Company buys or exchanges gas for the Company's own account through the same meter, the volume of gas delivered into the Company's distribution system, in behalf of Transportation Service Customers for transportation service, shall be deemed to be the volume scheduled by the Company and such Customers to be delivered in behalf of such Customers, at such point on such day, determined after the adjustment provided in B, below, but shall not be more than the total amount actually delivered, determined after the adjustment provided in B below, through such meter into the Company's distribution system at such point on such day.

B. To compensate for line losses, the volume of gas delivered into the Company's distribution system, shall be determined for purposes of this Rate Schedule to be equal to the greater of 99.5% of the amount indicated by a meter at the point of delivery into the Company's distribution system or the rate as set forth in Rate Schedule DMT Special Provisions B, Page No.116; provided however, that, where the only Company facilities involved in transporting gas to the Gas Service Customer are meters, meter installations, house regulators, house regulator installations and industrial measuring and regulating station equipment, no amount shall be deducted as compensation for line losses. (C)

C. Service under this Rate Schedule may be interrupted during periods of supply shortages but only based upon the schedule of priority of curtailment set forth in section 26 of the Rules and Regulations of this tariff.

D. Transportation service under this Rate Schedule may be interrupted or curtailed whenever, in the event of a sudden and unforeseen supply deficiency, the Company invokes emergency curtailment provisions under Tariff Rule 26.

(C) Indicates Change

E. In the event of interruption or curtailment of transportation service, pursuant to items C and D, above, and during such period of interruption or curtailment, the DMLMT Service customer must sell to the Company all or a portion of the DMLMT Service Customer's supply of gas at the higher of (1) the Transportation Service Customer's cost of purchased gas at the point of delivery to the Company or (2) the Company's average cost of purchased gas per Mcf, as determined based upon the Company's Section 1307(f) Rate which is \$8.1835.

(I)

F. If a Gas Service Customer receiving gas transported by the Company uses less than the amount of gas delivered into the Company's system for transportation to such Customer ("excess deliveries"), the Gas Service Customer receiving gas transported by the Company may use such gas during the banking/balancing period defined below, following which the Company shall have the right, but not the obligation, to purchase remaining excess deliveries of gas from the DMLMT Service Customer at a rate equal to the lowest of (1) the cost at which it was acquired by the DMLMT Service Customer, including pipeline transportation charges, or (2) the Company's average commodity delivered cost of gas to National Fuel Gas Supply Corporation, or (3) the Company's average commodity cost of locally-produced gas during the month when excess deliveries were received by the Company. The cost at which the DMLMT Service Customer acquired the gas will be determined from such Customer's contract with the supplier or by a sworn affidavit setting forth the Customer's cost of gas, including cost of delivery of such gas to the Company's system. Upon request by the Company, the DMLMT service Customer will be required to furnish to the Company the DMLMT Service Customer's choice of (1) a copy of this contract or (2) an affidavit. The banking/balancing period shall be the three billing months after the billing month in which the Company received excess deliveries in behalf of the Customer.

G. "Underdeliveries" are volumes of gas taken from the Company by a Gas Service Customer in excess of the sum of (1) any excess deliveries of the customer at the beginning of the day and (2) the volume of gas delivered to the Company for the customer's account, after adjustment for line losses less volumes of gas determined to be sales by the Company to the customer. Cumulative underdeliveries, as determined each day, in excess of two percent of the volume of gas delivered by the Company to the customer that day, shall be a sale of gas by the Company to the customer under the applicable rate schedule plus applicable surcharges as set forth in Rate Schedule SB Special Provisions and shall not be recharacterized as transportation service under any circumstances. Cumulative underdeliveries of not more than two percent of the volume of gas delivered to a customer by the Company on any day may be offset by volumes of gas delivered to the Company for the customer's account, after adjustment for line losses, in excess of the volume of gas taken by the customer from the Company on subsequent days within the same billing month.

(D) Indicates Decrease

(I) Indicates Increase

H. Service under this rate schedule shall be available only to the extent that there is sufficient capacity for such service in those portions of the Company's system affected by providing of transportation service including but not limited to, that portion of the Company's system where gas is delivered to the Company and that portion of the Company's system where gas is delivered to the Customer. In determining the Company's ability to provide transportation service, sufficient capacity in the Company's system shall be assumed. If service shall not be supplied, based upon insufficient capacity, the burden shall be on the Company to prove the capacity limitation.

I. Where gas is received by the Company for transportation service pursuant to this Rate Schedule, title to such gas shall remain vested in the Transportation Service Customer for which such gas was received for transportation. The Company's furnishing transportation service for a Transportation Service Customer shall be complete upon delivery of gas received for transportation service, except as provided in E and F, above.

J. The Company shall not be liable, under any circumstances or in any respect, to a Gas Service Customer, Transportation Service Customer, a producer of gas or any other person or entity for damages arising either directly or indirectly from interruption, curtailment or termination of transportation service.

K. Revenues produced by charges to DMLMT customers for overdeliveries of transportation gas to such customers shall be treated in accordance with Paragraph (b)(11) of Rider "A".

L. Customers who contract for transportation service under this Rate Schedule shall have the right thereafter to purchase gas from the Company only to the extent that they have contracted for firm service under Rate Schedule SB for Standby Service. Purchases of gas from the Company by transportation service customers under this rate schedule shall be subject to both the charges under the applicable sales rate schedule and all provisions of the Rate Schedule SB, including the Special Provisions.

M. The Company may establish a BTU conversion factor in the DMLMT service agreement for volumes of gas to be received by the Customer at a factor different from the system average BTU conversion factor applied to other transportation customers.

N. Customers who elect to schedule their own gas supplies via Company's internet accessible Transportation Scheduling System and/or wish to access and/or obtain each day meter readings of the volume of gas delivered to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day shall execute a Data Security Agreement pursuant to Tariff Rule 33. (C)

(C) Indicates Change

RIDER A
SECTION 1307(F) PURCHASED GAS COSTS
PROVISION FOR RECOVERY OF PURCHASED GAS COSTS

Rates for each Mcf (1,000 cubic feet) of gas supplied under Residential, Low Income Residential Assistance Service, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial, Large Volume Industrial LBS and Natural Gas Vehicle Service rate schedules of this tariff, shall include \$7.5398 per Mcf for recovery of purchased gas commodity costs, calculated in the manner set forth below, pursuant to Section 1307(f) of the Public Utility Code. (I)

Rates for each Mcf (1,000 cubic feet) of gas supplied under Residential, Commercial and Public Authority, Small Volume Industrial Service, Intermediate Volume Industrial, Large Volume Industrial Service, Large Industrial Service and Standby Service rate schedules of this tariff, shall include \$1.1983 per Mcf for recovery of purchased gas demand costs, calculated in the manner set forth below, pursuant to Section 1307(f) of the Public Utility Code. (D)

Rates for each Mcf (1,000 cubic feet) of gas transported under the Small Aggregation Transportation Customer Rate Schedule shall include \$0.3055 per Mcf for the recovery of purchased gas demand costs. (I)

Such rates for gas service shall be increased or decreased, from time to time, as provided by Section 1307(f) of the Public Utility Code and the Commission's regulations, to reflect changes in the level of purchased gas costs.

The amounts per Mcf for recovery of purchased gas costs (commodity and demand) included in rates under each rate schedule of the tariff are as follows:

	Distribution		Gas Adjustment	Natural Gas	
	<u>Total</u>	<u>Charges</u>	<u>Charge</u>	<u>Supply Charge</u>	
Residential	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Low Income Residential Assistance Service	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Commercial/Public Authority	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Small Volume Industrial	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Intermediate Volume Industrial	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Large Volume Industrial	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Large Industrial	\$9.0436	\$0.3055	\$0.8383	\$7.8998	(I)
Standby	\$0.5297				(I)
Priority Standby	\$1.1177				(I)
Small Aggregation Transportation Customer Rate Schedule	\$0.3055	\$0.3055			(I)

COMPUTATION OF PURCHASED GAS COMMODITY COSTS PER MCF INCLUDED IN NATURAL GAS
SUPPLY CHARGES

Purchased gas commodity costs, per Mcf, shall be computed to the nearest one-hundredth cent (0.01¢) in accordance with the formula set forth below:

$$PGCC = \frac{(CC)}{(S)}$$

Purchased gas commodity costs, so computed, shall be included in Natural Gas Supply Charge rates charged to customers for gas service under the Residential, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial and Large Volume Industrial LBS Service rate schedules for an initial period determined by the Commission and for consecutive twelve month periods beginning August 1 of each year thereafter, unless such period is revised by the Commission. The amount of purchased gas commodity costs, per Mcf, will vary, if appropriate, based upon annual filings, by the Company, pursuant to Section 1307(f) of the Public Utility Code and such supplemental filings as may be required or be appropriate under Section 1307(f) or the Commission's regulations adopted pursuant thereto.

In computing purchased gas commodity costs, per Mcf, pursuant to the formula, above, the following definitions shall apply:

"PGCC" - purchased gas commodity costs determined to the nearest one-hundredth cent (0.01¢) to be included in rates for each Mcf of gas supplied under Residential, Low Income Residential Assistance Service, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial, Large Volume Industrial LBS and Natural Gas Vehicle Service rate schedules of this tariff.

"CC" - the estimated current commodity cost of gas including all associated hedging costs and deferrals, shall be determined as follows: (a) for all type of purchased gas, project the commodity cost for each purchase (adjusted for net current gas stored) for the projected period when rates will be in effect plus (b) the arithmetical sum of (1) the projected book value of noncurrent gas at the beginning of the computation year minus (2) the projected book value of noncurrent gas at the end of the computation year. This factor shall include no amount for purchased gas demand or winter requirement charges of an interstate pipeline company.

(C) Indicates Change

"S" - projected Mcf of gas to be billed to customers under the commodity charges of the Residential, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial and Large Volume Industrial LBS Service rate schedules of this tariff during the period when rates will be in effect.

COMPUTATION OF PURCHASED GAS DEMAND COSTS PER MCF OF GAS INCLUDED IN NATURAL GAS SUPPLY CHARGES UNDER THE RESIDENTIAL, COMMERCIAL AND PUBLIC AUTHORITY, SMALL VOLUME INDUSTRIAL, INTERMEDIATE VOLUME INDUSTRIAL, LARGE VOLUME INDUSTRIAL, LARGE INDUSTRIAL AND STANDBY SERVICE RATE SCHEDULES

Purchased gas demand costs, per Mcf, to be included in Natural Gas Supply Charge rates under Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial, Large Industrial and Standby rate schedules shall be computed to the nearest one-hundredth cent (0.01c), in accordance with the formula set forth below:

$$PGDC = \left(\frac{(DC)}{(S - (SBS))} \right)$$

Purchased gas demand costs, so computed, shall be included in the rates charged to customers for gas service, pursuant to the Residential, Commercial and Public Authority, Small Volume Industrial Service, Intermediate Volume Industrial Service, Large Volume Industrial Service, Large Industrial Service and Standby Service rate schedules, for an initial period determined by the Commission and for consecutive twelve-month periods beginning August 1 of each year thereafter unless such period is revised by the Commission. The amount of purchased gas demand costs, per Mcf, will vary, if appropriate, based upon annual filings, by the Company, pursuant to Section 1307(f) of the Public Utility Code and such supplemental filings as may be required or be appropriate under Section 1307(f) or the Commission's regulations adopted pursuant thereto.

In computing purchased gas demand costs, per Mcf, pursuant to the formula, above, the following definitions shall apply:

"PGDC" - purchased gas demand costs determined to the nearest one-hundredth cent (0.01c) to be included in rates for each Mcf of gas supplied under Residential, Commercial and Public Authority, Small Volume Industrial Service, Intermediate Volume Industrial Service, Large Volume Industrial Service, Large Industrial Service and Standby Service rate schedules of this tariff.

"DC" - the estimated current demand cost of gas, determined by projecting, for all types of purchased gas, the total demand and winter-requirement charges from any interstate pipeline company or any other source of gas supply purchased by the Company for the projected period when rates will be in effect less projected current purchased gas demand cost revenue recovered through Distribution charges.

"S" - projected Mcf to be billed to customers during the projected period under the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Industrial and Large Volume Industrial Service rate schedules.

"SBS" - projected Mcf volume to be billed to customers during the projected period under the Standby Service rate schedule.

COMPUTATION OF PURCHASED GAS DEMAND COSTS PER MCF OF GAS INCLUDED IN THE DISTRIBUTION CHARGES UNDER THE SALES RATE SCHEDULES AND THE RATE SCHEDULE SMALL AGGREGATION TRANSPORTATION CUSTOMER SERVICE

Purchased gas demand costs transportation, per Mcf, to be included in Distribution Charges under the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Industrial and Large Volume Industrial Service rate schedules and the Rate Schedule Small Aggregation Transportation Customer Service shall be computed to the nearest one-hundredth cent (0.01c), in accordance with the formula set forth below:

$$\text{PGDCT} = \frac{(\text{DCT} + \text{DEDC})}{(\text{S} + \text{SATCV}) - (\text{SBS})}$$

"PGDCT" - Purchased gas demand costs transportation, per Mcf, to be included in Distribution Charges under the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Industrial and Large Volume Industrial Service rate schedules and the Rate Schedule Small Aggregation Transportation Customer Service.

"DCT" - the estimated current demand cost of gas, determined by projecting, for all types of demand purchased gas capacity costs included in the Distribution Charges for Sales Service Rate Schedules and the Small Aggregation Transportation Customer Service Rates, the total usage, demand and winter-requirement charges from any interstate pipeline company or any other source of gas supply purchased by the Company for the projected period when rates will be in effect.

"DEDC" - experienced net overcollection or undercollection of purchased gas demand costs included in the Distribution Charges. Such experienced net overcollection or undercollection shall be determined for the most recent period permitted under law which shall begin with the month following the last month which was included in the previous over-under collection calculation reflected in rates.

The annual filing date shall be the date specified by the Company's Section 1307(f) tariff filing and not the date established by the Commission for pre-filing of certain information pursuant to 52 Pa. Code Sections 53.64(b)(1) and 53.65.

Supplier demand refunds received for capacity associated with the SATS capacity release provisions will be included in the calculation of the "DEDC" with interest added at the annual rate of six percent (6%) calculated from the month received to the effective month such refund is refunded. All other Supplier demand refunds received will be included in the calculation of the "DE" with interest added at the annual rate of six percent (6%) calculated from the month received to the effective month such refund is refunded.

"S" - projected Mcf to be billed to customers during the projected period under the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Industrial and Large Volume Industrial Service rate schedules.

"SATCV" - projected Mcf to be transported to customers during the projected period under the Small Aggregation and Transportation Rate Schedule.

"SBS" - projected Mcf volume to be billed to customers during the projected period under the Standby Service rate schedule.

COMPUTATION OF OVER AND UNDER COLLECTED PURCHASED GAS COSTS PER MCF OF GAS TO BE INCLUDED IN THE GAS ADJUSTMENT CHARGE UNDER THE RESIDENTIAL, COMMERCIAL AND PUBLIC AUTHORITY, SMALL VOLUME INDUSTRIAL, INTERMEDIATE VOLUME INDUSTRIAL, LARGE VOLUME INDUSTRIAL, LARGE INDUSTRIAL, AND STANDBY SERVICE RATE SCHEDULES

Over and under collected gas costs, per Mcf, to be included in the Gas Adjustment Charge included in rates under Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial, Large Industrial, Small Aggregation Transportation Customer, and Standby rate schedules shall be computed to the nearest one-hundredth cent (0.01c), in accordance with the formula set forth below:

$$\text{GAC} = \frac{(\text{CE} + \text{DE})}{(\text{S1})} \quad (\text{C})$$

In computing the gas adjustment charge, per Mcf, pursuant to the formula above, the following definitions will apply:

"GAC" - gas adjustment charge determined to the nearest one-hundredth cent (0.01¢) to be included in rates for each Mcf of gas supplied under Residential, Low Income Residential Assistance Service, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial, Large Volume Industrial LBS and Natural Gas Vehicle Service rate schedules of this tariff. (C)

"CE" - experienced net overcollection or undercollection of purchased gas commodity costs. For the initial filing, pursuant to 1307(f) of the Public Utility Code, in order to achieve an orderly transition from Gas Cost Rate procedures to Section 1307(f) procedures, such experienced net overcollection or undercollection, to be reflected in rates effective September 1, 1985, shall be the net overcollection or undercollection arising under the Gas Cost Rate procedure. The amount of such net overcollection or undercollection shall include the historic net amount as of March 31, 1985 together with the projected net overcollection or undercollection for the five-month period ending August 31, 1985.

After the transition from the Gas Cost Rate procedures, established pursuant to the Commission's order of October 1, 1978 at M-78050055, (52 Pa P.U.C. 217) as amended, to procedures established pursuant to Section 1307(f) of the Public Utility Code, such experienced net overcollection or undercollection shall be determined for the most recent period permitted under law which shall begin with the month following the last month which was included in the previous over-under collection calculation reflected in rates.

(C) Indicates Change

The annual filing date shall be the date specified by the Company's Section 1307(f) tariff filing and not the date established by the Commission for pre-filing of certain information pursuant to 52 Pa. Code Sections 53.64(b) (1) and 53.65.

Supplier commodity refunds received will be included in the calculation of "CE" with interest added at the annual rate of six percent (6%) calculated from the month received to the effective month such refund is refunded. Supplier commodity refunds will be included in the next quarterly filing after refunds are received pursuant to Case R-2013-2341534.

Pipeline penalty credits will be included in the calculation of "CE" as a credit to purchased gas costs from the month they are received to the effective month "CE" is refunded or collected. (C)

"DE" - experienced net overcollection or undercollection of purchased gas demand costs. For the initial filing, pursuant to 1307(f) of the Public Utility Code, in order to achieve an orderly transition from Gas Cost Rate procedures to Section 1307(f) procedures, such experienced net overcollection or undercollection, to be reflected in rates effective September 1, 1985, shall be the net overcollection or undercollection arising under the Gas Cost Rate procedure. The amount of such net overcollection or undercollection shall include the historic net amount as of March 31, 1985 together with the projected net overcollection or undercollection for the five-month period ending August 31, 1985.

After the transition from the Gas Cost Rate procedures, established pursuant to the Commission's order of October 1, 1978 at M-78050055, (52 Pa P.U.C. 217) as amended, to procedures established pursuant to Section 1307(f) of the Public Utility Code, such experienced net overcollection or undercollection shall be determined for the most recent period permitted under law which shall begin with the month following the last month which was included in the previous over-under collection calculation reflected in rates.

The annual filing date shall be the date specified by the Company's Section 1307(f) tariff filing and not the date established by the Commission for pre-filing of certain information pursuant to 52 Pa. Code Sections 53.64(b) (1) and 53.65.

Supplier demand refunds received will be included in the calculation of "DE" with interest added at the annual rate of six percent (6%) calculated from the month received to the effective month such refund is refunded. Supplier demand refunds will be included in the next quarterly filing after refunds are received pursuant to Case R-2013-2341534.

"S1" - projected Mcf of gas to be billed to customers under the natural gas supply charges of the Residential, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial and Large Volume Industrial LBS Service rate schedules of this tariff during the period when rates will be in effect.

(C) Indicates Change

DETERMINATION OF OVER/UNDERCOLLECTION OF GAS COSTS

The Company shall determine separate commodity cost and demand cost over/undercollections. In computing the experienced over/undercollection of purchased gas demand and commodity costs for a period defined by the Commission, the following procedure shall be used:

- (a) All experienced purchased gas costs, actually incurred by the Company to serve customers pursuant to all rate schedules of this tariff shall be included as costs of purchased gas and shall be identified as demand or commodity costs;
- (b) The following amount shall be included as purchased gas commodity or purchased gas demand revenues for recovery of gas costs:
 - (1) An amount determined by multiplying commodity volumes billed under the Residential, Low Income Residential Assistance Service, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial, Large Volume Industrial LBS and Natural Gas Vehicle rate schedules, for the applicable over/undercollection period, times the PGCC component excluding E Factor; plus
 - (2) An amount determined by multiplying commodity volumes billed under the Residential, Commercial and Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial and Large Industrial rate schedules for the applicable over/undercollection period, times the PGDC charge as determined under this rider; plus
 - (3) An amount determined by multiplying demand volumes billed under Rate Schedule SB to LVIS and LIS customers times the PGDC charge; plus

- (4) An amount determined by multiplying gas billing demand units ("Gas BDU") billed under the Commercial and Public Authority Load Balancing Service ("LBS"), Intermediate Volume Industrial LBS, Large Industrial LBS and Large Volume Industrial LBS rate schedules, for the applicable over/undercollection period, times the Rate Per Gas BDU applicable to customers under the LBS rate schedules.
- (5) An amount determined by multiplying commodity volumes billed under the rate schedule for Natural Gas Vehicle Service for the applicable over/under collection period, times the applicable rate applicable to customers under the new Rate Schedule.
- (6) An amount equal to all actual purchased gas costs recovered under the rate schedule Monthly Metered Transportation Service. In computing revenues for recovery of purchased gas costs under this item (6), any adjustment to rates under Special Provision L. of the Rate Schedule for Monthly Metered Transportation Service will be eliminated from the calculation. (C)
- (7) An amount determined by multiplying the volume expressed in Mcf of gas transported under any Load Balancing Service rate schedule times the portion of the Commodity Rate for recovery of purchased gas costs.
- (8) An amount equal to seventy-five percent of the revenues before income taxes from off-system sales over the monthly average commodity cost of gas plus variable transportation costs to deliver the gas to the off-system customer. The monthly average commodity cost of gas shall be defined as the monthly average commodity cost of gas purchases for all supplies scheduled at the beginning of the month; provided, however, that, if an additional unscheduled purchase is made during the month specifically for an off-system sale, such purchase shall be considered to be the gas used to make the off-system sale and the commodity cost of such purchase will be assigned to off-system sales up to the volume of the purchase. Off-system sales for 30-day nonrefundable sales commencing on the first of the month shall be treated as specific purchase sales for determining the cost of gas assigned to the sale. Gas will not be withdrawn from storage to make off-system sales, and the prices charged for off-system sales will not reflect the price attributable to gas withdrawn from storage. Any remaining off-system sale not covered by such unscheduled purchase(s) shall be assigned a gas cost equal to the monthly average commodity cost of scheduled purchases. The Company shall retain the remaining 25%.

(C) Indicates Change

- (9) An amount determined by multiplying volumes billed under the Small Aggregation Transportation Service rate schedule times the PGDCT charge recovered through rates under rate schedule Small Aggregation Transportation Customer Service.
- (10) An amount equal to the revenues from Daily Metered Transportation customers produced by charges for overdeliveries of transportation gas to such customers.
- (11) An amount equal to 75% of the revenues generated from the release of pipeline transmission and storage capacity other than releases for SATS customers. The Company shall retain the remaining 25%.
- (12) An amount equal to 75% of the savings from gas storage fill contracts as established in Case R-0016789. The Company shall retain the remaining 25%.
- (13) An amount equal to 75% of asset management arrangements under FERC Order 712 for capacity releases associated with identified capacity contracts. The Company shall retain the remaining 25%.

Interest shall be computed monthly at the appropriate rate provided for in Section 1307(f)(5) of the Public Utility Code from the month that the over or under-collection occurs to the effective month such over-under collection is refunded or recouped as appropriate.

QUARTERLY UPDATES

The Company's rates for recovery of purchased gas costs will be subject to quarterly adjustments under procedures set forth in the Commission's regulations at 52.Pa. Code § 53.64(i)(5). Such updates will reflect, in addition to data specified in the regulation, changes in the projected commodity cost of purchased gas based upon the NYMEX source of data and method used in projecting the commodity cost of purchased gas approved by the Commission in the Company's most recent annual proceeding for recovery of purchased gas costs under Section 1307(f) of the Public Utility Code. In addition, the Company will calculate rates in the November, February and May quarterly filings using annual sales volumes to determine the purchased gas cost rates as ordered at Docket R-2017-2582461.

The Company's rate for the recovery of purchased gas costs for Monthly Metered Transportation Service will be subject to a quarterly adjustment to reflect changes in the rates of National Fuel Gas Supply Corporation when final rates are approved by the Federal Energy Regulatory Commission.

(C) Indicates Change

ADJUSTMENT OF "CE" and "DE" FACTOR AMOUNTS

Each 1307(f) rate shall also provide for refund or recovery of amounts necessary to adjust for over or underrecoveries of "CE" and "DE" factor amounts included in prior 1307(f) rates. In computing the amount to be included for over or undercollection of "CE" and "DE" factor amounts, the amount recovered for "CE" and "DE" factor amounts under the prior 1307(f) rate shall be determined by multiplying the commodity volumes billed under the Residential, Low Income Residential Assistance Service, Commercial and Public Authority, Commercial and Public Authority Load Balancing Service ("LBS"), Small Volume Industrial, Intermediate Volume Industrial, Intermediate Volume Industrial LBS, Large Industrial, Large Industrial LBS, Large Volume Industrial, Large Volume Industrial LBS, and Natural Gas Vehicle Service rate schedules during the applicable 1307(f) period times the portions of the PGCC and PGDC component that provide for recovery of "CE" and "DE" factor amounts, and adding to that product, the amount recovered from Small Aggregation Transportation Customer Service customers for "DE" factor amounts under the prior 1307(f) rate which shall be determined by multiplying the commodity volumes billed under the Small Aggregation Transportation Customer Service rate schedules during the applicable 1307(f) period times the PGDC component that provides for recovery of "DE" factor amounts under the Small Aggregation Transportation Customer Service.

RIDER B

STATE TAX ADJUSTMENT SURCHARGE

In addition to the charges provided in this tariff, a surcharge of (0.25%) will apply to all charges for service rendered on or after August 1, 2022. (I)

The above surcharge will be recomputed using the same elements prescribed by the Commission.

- a. Whenever any of the tax rates used in calculation of the surcharge are changed;
- b. Whenever the utility makes effective any increased or decreased rates, and
- c. On March 31, 1971, and each year thereafter.

The above recalculation will be submitted to the Commission within one (1) day after the occurrence of the event or date which occasions such recomputation; and, if the recomputed surcharge is less than the one in effect, the Company will, and if the recomputed surcharge is more than the one then in effect, the Company may submit with such recomputation a tariff or supplement to reflect such recomputed surcharge, the effective date of which shall be one (1) day after filing.

In Compliance with P-2017-2591001 Order entered October 5, 2017, the Company shall file its State Tax Adjustment Surcharge filings on one day's notice.

RIDER E
CUSTOMER EDUCATION CHARGE

Effective April 1, 2000, a charge will be included in the rates subject to this Rider to provide for recovery of costs of providing consumer education to inform customers of the changes in the Natural Gas Utility Industry.

The charge will be designed to recover the following customer education costs ("CED costs"):

1. Costs associated with providing information necessary to assist customers in making appropriate choices as to their natural gas service; and
2. Costs associated with any and all consumer education programs as a result of restructuring under the Natural Gas Choice and Competition Act.

APPLICABILITY

In addition to the charges provided in this tariff, a charge calculated in the manner explained below shall be added to the otherwise applicable charge for each Mcf of sales and transportation volumes delivered by the Company to customers receiving service under the Residential, Commercial and Public Authority, SVIS, IVIS, and SATC rate schedules, or successor rate schedules.

CALCULATION OF RATE

A charge will be recalculated annually based upon deferred and annually projected CED costs.

Effective January 1, 2001, the rate will be calculated to produce a levelized rate reflecting all deferred CED costs, and any actual and expected CED costs for the period from January 1 through December 31 and continue annually thereafter, divided by the total projected volumes of Residential, Commercial and Public Authority, SVIS, IVIS, and SATC rate schedules, for each twelve (12) month period over which this charge will be in effect.

The charge to be included in rates shall be \$0.0001/Mcf through December 31, 2022. (I)

Effective September 29, 2004 per M-00001326 Secretarial letter Issued June 21, 2004, the rate will be recalculated to remove the third year assessment for state-wide gas consumer education costs. The filing effective September 29, 2004 will not be a reconciled filing.

- (I) Indicates Increase
- (D) Indicates Decrease
- (C) Indicates Change

ANNUAL RECONCILIATION

Commencing January 1, 2002, and annually thereafter, the levelized rate will be adjusted for over/undercollections for the prior twelve (12) month period by comparing projections of CED costs and revenues under this Rider to actual amounts experienced. The annual reconciliation filing to be effective January 1, 2002, and thereafter shall include a reconciliation of actual experienced expenses for the preceding twelve (12) month period ended December 31. All reconciliations shall be based upon actual amounts through October 31 and estimates for November and December. Estimates for November and December shall be reconciled in the following reconciliation period. The rate will be designed to recover or refund the applicable under or over recovery over the twelve (12) month period beginning January 1. Each annual reconciliation shall also provide for refund or recovery of amounts necessary to adjust for over or under recoveries of amounts also included in prior reconciliations. Annual reconciliations for the appropriate periods will be filed in accordance with 66 Pa.C.S. §1307(e) by January 30. (C)

1. Annual Filing

The annual reconciliation and projected annual CED costs shall be filed thirty (30) days prior to January 1 and the recalculated rate shall become effective for service on or after January 1 and annually thereafter. (C)

Effective:

RIDER F
LIRA DISCOUNT CHARGE

CURRENT LIRA RATE DISCOUNT

Effective April 1, 2002, a charge will be included in the rates subject to this Rider to provide for recovery of costs of the projected LIRA rate discounts for the upcoming 12 months.

Such charge shall be updated quarterly and effective each February 1, May 1, August 1, and November 1 of the year. The charge will also be updated whenever there is a change to the Residential Sales Service Rate Customer Charge, Distribution Charge, Natural Gas Supply Charge, or Gas Adjustment Charge.

APPLICABILITY

In addition to the charges provided in this tariff, a charge calculated in the manner explained below shall be added to the otherwise applicable charge for each Mcf of sales and transportation volumes delivered by the Company to customers receiving service under the Residential Sales Service Rate Schedule and the Residential rates of the SATC, MMT, and DMT transportation rate schedules.

CALCULATION OF RATE

The charge will be recalculated as specified above.

The charge shall be equal to the total annual projected discounts for LIRA customers for the upcoming 12 month period divided by the annual normalized throughput volumes of the qualified rate classes. The total annual projected discounts for the LIRA customers for the upcoming 12 month period shall equal the sum of the individual monthly total projected discounts for LIRA customers for the upcoming 12 months. The total monthly projected discounts for LIRA customers shall equal the residential bill for the average LIRA customer consumption for the month multiplied by the average discount percentage for LIRA service multiplied by the projected number of LIRA customers for the month.

The currently effective charge for the current LIRA Rate Discount to be included in rates is \$0.1452/Mcf.

(D) Indicates Decrease

(I) Indicates Increase

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE

A charge will be included in the rates subject to this Rider to provide for the full recovery of costs in conjunction with the Company's LIRA rate discounts, program costs, forgiven pre-program arrearages as provided for in Docket No. M-00051923 and an incremental customer credit per Settlement of Docket Nos. R-00072420 and M-000721019. The first 12 month reconciliation period will commence October 1, 2007 through September 30, 2008 with the reconciliation charge or credit to be effective for the one year period commencing February 1, 2009. Annual reconciliations for the appropriate periods will be filed in accordance with 66 Pa.C.S. §1307(e) by October 30. (C)

Such charge shall be updated annually and effective each February 1 of the year. A review of the CAP Funding Reconciliation mechanism will be conducted in conjunction with the Triennial Filing to be made in 2010.

CALCULATION OF RECONCILIATION COMPONENT OF RATE

The charge will have five components; the first associated with the LIRA rate discount, the second with the LIRA program costs, the third with the LIRA forgiven pre-program arrearages, the fourth with the incremental customer credit and a fifth with the adjustment for over/under recovery of the prior period charge. The charge will be recalculated as specified above.

The charge associated with the LIRA rate discount will contain the following calculation;

Effective February 1, 2009, and thereafter, the annual reconciliation charge associated with the LIRA rate discounts will be based on the previous fiscal year (October through September) actual over/(under) collection determined by comparing discounts provided in bills to LIRA customers as compared to discounts billed to Residential customers under this Rider.

Effective:

RIDER F
LIRA DISCOUNT CHARGE

(C)

CAP FUNDING RECONCILIATION CHARGE (con't.)

CALCULATION OF RECONCILIATION COMPONENT OF RATE (con't)

The charge associated with the LIRA program costs will contain the following calculation;

Effective February 1, 2009 and thereafter, the annual reconciliation charge associated with the LIRA program costs will be calculated based on the previous annual fiscal year costs (October through September) to administer the LIRA program excluding company labor and benefits less \$82,924 of net LIRA program costs embedded in base rates that became effective January 1, 2007 (Docket No. R-00061493). The calculation will recognize these LIRA administrative costs until new base rates become effective.

The charge associated with the LIRA forgiven pre-program arrearages will contain the following calculation;

Effective February 1, 2009 and thereafter, the annual reconciliation charge associated with the LIRA forgiven pre-program arrearages will be based on the previous annual fiscal year pre-program forgiven arrearages (October through September) associated with the LIRA program less \$755,591 of LIRA forgiven pre-program arrearages embedded in base rates that became effective on January 1, 2007 (Docket No. R-00061493). The calculation will recognize these LIRA pre-program forgiven arrearages until new base rates become effective.

(C) Indicates Change

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE (con't)
CALCULATION OF RECONCILIATION COMPONENT OF RATE (con't)

The charge associated with the incremental customer credit will contain the following calculation:

Effective February 1, 2009 and thereafter, an annual credit of \$35 per customer will be provided associated with the LIRA incremental customers. The credit will be based on the average number of LIRA customers billed during the previous fiscal period (October - September) less 11,411. The annual credit will continue until new base rates become effective as a result of a general rate proceeding. If the average number of LIRA customers billed during the previous fiscal period is 11,411 or less, the credit will be \$0.

The CAP Funding Reconciliation Charge will be the summation of the charges calculated above divided by the projected February 1 through January 31 volumes.

CAP Funding Reconciliation Charge Calculation		
	LIRA Rate Discount	\$149,855
+	LIRA Program Costs	\$(52,946)
+	LIRA Forgiven Pre-Program Arrearages	\$(238,424)
+	LIRA Incremental Customer Credit	\$0

Rider G
Merchant Function Charge (MFC) Rider

Applicability:

The Merchant Function Charge (MFC) shall be added to the Natural Gas Supply Charge and Gas Adjustment Charge of Residential, LIRAS, Commercial and Public Authority, SVIS, IVIS, LVIS and LIS rate schedules.

Such charges shall be updated quarterly and effective each February 1, May 1, August 1, and November 1 of the year. The charge will also be updated whenever there is a change to the Sales Service Rate Customer Charge, Distribution Charge, Natural Gas Supply Charge or Gas Adjustment Charge.

Calculation of Rate:

For customers receiving service in the Residential classification, the MFC shall equal 2.2301% times the Natural Gas Supply Charge and the Gas Adjustment Clause as calculated for Rider A.

The current Residential MFC Charge is:

Natural Gas Supply Charge per Mcf	\$0.1762	(I)
Gas Adjustment clause (E-Factor) per Mcf	\$0.0187	(I)
Total Residential MFC per Mcf	\$0.1949	(I)

For customers receiving service in the Non-Residential classifications, the MFC shall equal 0.2285% times the Natural Gas Supply Charge and Gas Adjustment Clause as calculated for Rider A.

The current Non-Residential MFC Charge is:

Natural Gas Supply Charge per Mcf	\$0.0181	(I)
Gas Adjustment clause (E-Factor) per Mcf	\$0.0019	(I)
Total Non-Residential MFC per Mcf	\$0.0200	(I)

(D) Indicates Decrease

Rider H
Gas Procurement Charge (GPC)

APPLICABILITY

Effective June 1, 2013, the Gas Procurement Charge will be included in the Natural Gas Supply Charge of Residential, LIRAS, Commercial and Public Authority, SVIS, IVIS, LVIS and LIS rate schedules.

The charge is designed to recover the costs of procuring natural gas pursuant to 52 Pa. Code §62.223. The natural gas procurement costs included in the GPC charge will only be updated in a base rate case.

The GPC to be included in the Natural Gas Supply Charge shall be \$0.1050 / Mcf and is not reconcilable.

TCJA TEMPORARY SURCHARGE

To implement the effects of the Tax Cuts and Jobs Act (TCJA), on March 15, 2018 the Pennsylvania Public Utility Commission (Commission) issued a Temporary Rates Order at Docket No. M-2018-2641242 directing the utility to file its current base rates and riders as temporary rates, pursuant to Section 1310(d) of the Public Utility Code. 66 Pa. C.S. § 1310(d). Subsequently, on May 17, 2018, the Commission entered Orders in the above case and at Docket No. R-2018-3000527 superseding the March 15, 2018 Temporary Rates Order directing the utility to establish temporary rates as follows:

A negative surcharge will apply as a credit to all customer bills at an equal percentage of non-gas revenue among the various customer classes, exclusive of STAS and automatic adjustment clause revenues, for bills rendered for intrastate service on and after October 1, 2022. The credit will be applied on a per Mcf basis, by service class, as indicated in the table below. The total credits provided to customers through this negative surcharge will be reconciled with actual differences in federal income tax expense of a pre- and post-TCJA basis and will remain in place until the Company files and the Commission approves new base rates for the utility pursuant to Section 1308(d) that include the effects of the TCJA tax rate changes. Interest on over or under collections shall be computed monthly at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41 P.S. §§ 101, et seq.) from the month that the over or under collection occurs to the mid-point of the recovery period. Upon determination that the negative surcharge, if left unchanged, would result in a material over or under collection, the Company may file with the Commission, on at least 10 days' notice, for an interim revision of the TCJA Temporary Surcharge. The TCJA Temporary Surcharge will be filed with the Commission by September 1 of each year to become effective the following October 1, reflecting estimated TCJA savings for the fiscal year.

Service Class	Refund Rate Effective 10/1/22	12ME 9/2021 Recon. Rate Effective 10/1/22	Total Rate

Large Industrial Service	(\$0.01541)	\$0.00103	(\$0.01438)

RIDER I OPEB TEMPORARY SURCREDIT

Effective October 1, 2021, a one-time bill credit will be applied and a surcredit will be included in the rates subject to this Rider to provide for the pass back of funds collected previously for Other Post Retirement Benefits ("OPEB") expenses that have been deferred for the benefit of ratepayers as a regulatory liability in accordance with the settlement order in Docket # R-00061493.

\$25,000,000 of the OPEB regulatory liability has been reserved to pass back to customers as a one-time bill credit. The bill credit will be applied to customers' bills for active accounts as of October 1, 2021 and in the following amounts per class:

Residential	\$100
C/PA	\$250
Industrial	\$1,500

An additional \$29,000,000 of the OPEB regulatory liability has been reserved to pass back via a surcredit over 5-years (\$5,800,000 per year). The surcredit will apply as a credit to all customer bills at a set allocation percentage equal to the allocation percentage of the Company's base rate increase in Docket # R-00061493 among the various customer classes, exclusive of STAS and automatic adjustment clause revenues, for bills rendered for intrastate service on and after October 1, 2021. The surcredit will be applied on a per Mcf basis, by service class, as indicated in the table below. The surcredit will continue for a period of 5 years without reconciliation. Interest is not applicable to the OPEB balance. The OPEB Temporary Surcredit will be filed with the Commission by October 1 of each year and will be recalculated annually during the 5-year period.

Service Class	Refund Rate Effective 10/1/22	
Sales & SATC		
Residential (RSS & LIRA)	(\$0.21054)	(D)
Small Comm./Public Authority < 250	(\$0.10607)	(D)
Small Comm./Public Authority > 250	(\$0.11915)	(D)
Large Comm./Public Authority	(\$0.09118)	(I)
Small Volume Industrial Service	(\$0.06873)	(D)
Intermediate Vol. Industrial Service	(\$0.13281)	(D)
MMT & DMT		
Residential	(\$0.12704)	(I)
Small Comm./Public Authority < 250	(\$0.08691)	(I)
Small Comm./Public Authority > 250	(\$0.11348)	(D)
Large Comm./Public Authority	(\$0.11376)	(D)
Small Volume Industrial Service	(\$0.02399)	(I)
Intermediate Vol. Industrial Service	(\$0.06678)	(D)
Large Volume Industrial Service	(\$0.06846)	(D)
Large Industrial Service	(\$0.01794)	(I)

A total of \$54,000,000 held in a grantor trust will be used for the passback of funds described above. At the conclusion of the 5-year period, the Company will terminate the grantor trust. (C)

The Company is suspending regulatory accounting associated OPEB expense because such costs are \$0 and base delivery rates have been reduced to eliminate the recovery of OPEB expenses. The \$54,000,000 passed back to ratepayers through the one-time bill credit and surcredit mechanisms described above will reduce the regulatory liability due to ratepayers. The remaining regulatory liability balance due to ratepayers will be addressed in the next base rate proceeding.

Of the regulatory liability balance that is not attributed to ratepayers, the Company will immediately record any portion of the balance attributed to the O&M component of any SFAS 106 income that has accumulated since the last base rate proceeding as a reduction to OPEB expense. The remaining regulatory liability balance not attributed to ratepayers is to be transferred into an account separate from the regulatory liability due to ratepayers and be used to reduce the cost of labor charged to capital projects and affiliates over a period of 5 years. Any remaining portion of the regulatory liability after the expiration of the 5-year period will be addressed in the next base rate proceeding.

NATIONAL FUEL EXHIBIT F

Section 2 - Proposed Tariff

**NATIONAL FUEL GAS DISTRIBUTION CORPORATION
BUFFALO, NEW YORK**

RATES, RULES AND REGULATIONS

GOVERNING THE FURNISHING

OF

NATURAL GAS SERVICE

IN

TERRITORY DESCRIBED HEREIN

Issued: October 28, 2022

Effective: December 27, 2022

D. L. DeCAROLIS, PRESIDENT
BUFFALO, NEW YORK

This Supplement includes changes to existing requirements.

See page 2.

LIST OF CHANGES MADE BY THIS TARIFF

CHANGE:

1. Language and rates removed for declining blocks for all services.
Pages 36, 41, 41A, 42, 55, 65, 76, 120, and 121
2. Rider C - Weather Normalization Adjustment Rider, is being proposed.
Pages 158 and 159
3. Rider D - Energy Efficiency Pilot Cost Recovery, is being proposed.
Pages 165 and 166
4. Rider F - LIRA Discount Charge, change in effective date.
Page 164
5. Rider F - LIRA Discount Charge, update of rate language to include pre-program arrearage forgiveness and program costs, exclusive of company labor.
Page 164
6. Rider F - LIRA Discount Charge, removal of timing for first reconciliation.
Page 165
7. Rider F - LIRA Discount Charge, update of reconciliation calculation.
Page 166
8. Rider F - LIRA Discount Charge, update of average number of customers.
Page 167
9. Rider F - LIRA Discount Charge, update of calculation for CAP Funding Reconciliation Charge.
Page 167

DECREASE:

10. Rider B - State Tax Adjustment Surcharge, reduced to 0.00% for all services.
Page 157
11. Distribution Charge decreased for Residential, "Small" Commercial/Public Authority < 25,000 CCf, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial, Large Industrial, SATC - Residential, SATC - Small Commercial/Public Authority < 25,000, SATC - Small Volume Industrial and SATC - Intermediate Volume Industrial Services.
Pages 36, 41, 53, 55, 65, 76, 120, and 121

LIST OF CHANGES MADE BY THIS TARIFF (continued)

DECREASE (continued)

12. MMT Service Rates decreased for "Small" Commercial/Public Authority <25,000 and Small Volume Industrial Service Classes.
Page 100

13. DMT Service Rates decreased for "Small" Commercial/Public Authority <25,000 and Small Volume Industrial Service Classes.
Page 111

INCREASE:

14. Justified Company Investment increases for Residential, Commercial, Public Authority and Industrial.
Page 12

15. Basic Service Charge increases for Residential, Small Commercial/Public Authority, Large Commercial/Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial, and Large Industrial Service Classes.
Pages 36, 41, 41A, 42, 53, 55, 65, and 76

16. Natural Gas Supply Charge increases for Residential, Small Commercial/Public Authority, Large Commercial/Public Authority, Small Volume Industrial, Intermediate Volume Industrial, Large Volume Industrial, and Large Industrial Service Classes.
Pages 36, 41, 41A, 42, 53, 55, 65, and 76

17. Minimum NGV, Maximum NGV and Distribution Charge rates increase for Natural Gas Vehicle Service Classes.
Page 83

18. MMT Service Rates increased for Residential, "Small" Commercial/Public Authority >25,000, "Large" Commercial/Public Authority, Intermediate Volume Industrial, Large Volume Industrial, and Large Industrial Service Classes.
Page 100 and 101

19. DMT Service Rates increased for Residential, "Small" Commercial/Public Authority >25,000, "Large" Commercial/Public Authority, Intermediate Volume Industrial, Large Volume Industrial, and Large Industrial Service Classes.
Page 100 and 101

LIST OF CHANGES MADE BY THIS TARIFF (continued)

INCREASES (continued)

20. SATC Basic Service Charge increases for Residential, Small Commercial/Public Authority, Large Commercial/Public Authority, Small Volume Industrial, and Intermediate Volume Industrial Service Classes Pages 120, and 121.

21. POR Discounts increase for Residential and Non-Residential.
Page 125

22. DMLMT Service Distribution charge increases.
Page 146C

23. Rider F - LIRA Discount Charge, increase in Current LIRA
Page 164 and 167

24. Rider G - Merchant Function Charge Rider, increase in Residential Service and Non-residential Service rates.
Page 168

25. Rider H - Gas Procurement Charge, increase in Natural Gas Supply Charge and Total Price to Compare.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES
(Cont'd)

C. Determination of Justified Company Investment Per Dollar of
Additional Annual Revenue

(1) Residential

The Justified Company Investment Per Dollar of Additional Annual Revenue for residential customers is \$6.45. (I)

(2) Commercial and Public Authority; Industrial

The Justified Company Investment Per Dollar of Additional Annual Revenue for commercial, public authority or industrial customers shall be selected from the table below based upon the projected term of use by the customer of the new or upgraded facilities.

<u>Projected Term of Use of New/Upgraded Facilities (Years)</u>	<u>Justified Company Investment Per Dollar of Additional Annual Revenue</u>
1	\$0.63
2	1.21
3	1.74
4	2.23
5	2.69
6	3.11
7	3.49
8	3.85
9	4.17
10	4.47
Greater than 10	6.45

(I)

(I)

Because the term of use has a substantial effect on the determination of the Justified Company Investment Per Dollar of Additional Annual Revenue, the Company may require a letter of intent from commercial, public authority and industrial customers projecting the term of use of the new or upgraded extension of facilities being requested.

The Company reserves the right to require a guaranteed revenue contract if the customer projects a term of use of the new or upgraded facilities in excess of 10 years or if the customer does not demonstrate that the customer's term of use is reasonable.

(I) Indicates Increase

RESIDENTIAL SERVICE RATE SCHEDULE

RESIDENTIAL CLASSIFICATION

This classification shall include gas supplied for residential purposes such as a private dwelling, apartment house with a single meter supplying four or less dwelling units, separately metered apartments of a multiple dwelling, accessory buildings to dwellings or apartment houses such as garages, except at residences receiving service under Rate Schedule LIRAS for Low Income Residential Assistance Service and other places of residence where gas is used for residential purposes.

Churches and missions (places of worship) shall be entitled to Service under the Residential service rate schedule.

AVAILABILITY OF SERVICE

Gas Service shall be available at one location, except as otherwise provided, for residential customers.

APPLICABILITY

Applicable in all areas served under this tariff.

MONTHLY RATE

Basic Service Charge			
\$18.00	per Month		(I)
Distribution Charges			
30.014¢	per 100 cubic feet		(D) (C)
Gas Adjustment Charge

Natural gas vehicle customers are classified into the following categories:

NGV(1) All natural gas vehicle customers utilizing Company owned filling facilities. A uniform rate shall be established each month within the parameters set forth above, for customers utilizing Company-owned filling facilities.

The minimum NGV(1) rate shall be: \$0.96959/Ccf (I)

The current components of the minimum NGV(1) rate are as follows:

100% load factor base cost of gas:	\$0.82523/Ccf	
Incremental operating cost of Company owned NGV compression equipment:	\$0.13436/Ccf	
Transition Cost Surcharge	\$0.00000/Ccf	
State Tax Adjustment Surcharge	(\$0.00000)/Ccf	(D)
Minimum allowable Non-Gas cost	\$0.01000/Ccf	

The maximum NGV(1) rate shall be: \$1.20931/Ccf (I)

The current components of the maximum NGV(1) rate are as follows:

Distribution Charge of Large Commercial and Public Authority Service Rate schedule:	\$1.07495/Ccf	(I)
Incremental operating cost of Company owned NGV compression equipment:	\$0.13436/Ccf	
State Tax Adjustment Surcharge	(\$0.00000)/Ccf	(D)

NGV(2) Natural gas vehicle customers utilizing customer owned filling facilities. A uniform rate will be established each month within the parameters set forth above, to customers utilizing customer owned filling facilities.

The minimum NGV(2) rate shall be: \$0.83523/Ccf (I)

The current components of the minimum NGV(2) rate are as follows:

100% load factor base cost of gas:	\$0.82523/Ccf	
Transition Cost Surcharge	\$0.00000/Ccf	
State Tax Adjustment Surcharge	(\$0.00000)/Ccf	(D)

RATE SCHEDULE PSB

PRIORITY STANDBY SERVICE

APPLICABILITY

Throughout the territory served under this tariff.

AVAILABILITY OF SERVICE

Service under this rate schedule is available to all customers under the Residential, Commercial and Public Authority, and SVIS Rate Schedules which enter into a contract for service under this Rate Schedule. A customer will be permitted to enter into a contract, prepared by the Company, for service under this rate schedule, however, only if the Company projects that sufficient volumes of gas will be available to the Company during the period of the customer's contract for Priority Standby Service.

Service under this rate schedule is mandatory for all customers categorized as Priority 1 under the curtailment priorities of Rule 26 who enter into contracts with the Company to receive Transportation Service and who do not have dual or alternate fuel equipment on site which is installed and operable with sufficient amounts of alternate fuel available on site during each winter period of each year commencing on December 1 and ending on March 31 of the following year. Service under this rate schedule is voluntary for all other customers.

NATURE OF SERVICE

Priority standby service shall permit the customer to purchase gas on a firm basis subject to curtailment priorities of Rule 26. The Company will take all reasonable steps to obtain or to maintain gas supplies sufficient to enable the Company to provide reasonably continuous service to each Customer receiving Priority Standby Service.

MONTHLY RATE

The monthly rate shall be \$1.1177 per Mcf, which shall be applied to the total monthly volumes transported by the customer during the month. (I)

The rate shall equal the PGDC portion of the commodity rate applicable to the corresponding sales rate classification.

(D) Indicates Decrease

(I) Indicates Increase

MONTHLY RATE

The monthly rate shall be \$0.5297 per Mcf, which shall be applied to the (I) Monthly Volume, as defined below.

MONTHLY VOLUME

The Mcf volume of gas to which the Monthly Rate set forth above shall be applied, shall be determined for each billing cycle, as set forth below;

1. The volume of gas specified in the Service Agreement under this rate schedule shall be adjusted for each billing cycle by, multiplying such volume, expressed in Mcf, by a fraction. The numerator of the fraction shall be the number of days in the billing cycle applicable to the customer and the denominator shall be thirty (30).
2. If the volume determined under item 1, above, is greater than the sum of the Mcf volume of gas purchased by the customer under rate schedules other than load balancing rate schedules during the billing cycle, the Monthly Rate shall be applied to the difference between: (a) the volume determined under item 1, above, and (b) the Mcf volume of gas purchased by the customer under the rate schedules other than load balancing rate schedules during such billing cycle.
3. If the volume determined under item 1, above, is equal to or less than the Mcf volume of gas purchased by the customer under rate schedules other than load balancing rate schedules during the billing cycle, then the Monthly Volume shall be zero (0) Mcf.

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SCHEDULE (cont'd)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:
\$1.5475 per Mcf for IVIS Customers (I)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:
\$1.5475 per Mcf for IVIS Customers (I)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:
\$1.2855 per Mcf (I)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:
\$1.2855 per Mcf (I)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:
\$0.9341 per Mcf (I)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:
\$0.9341 per Mcf (I)

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that are for recovery of gas or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a MMT Customer of the Company without use of the Company's facilities or another transportation of gas. The Company may also reduce or eliminate the compensation for line losses provided for in Special Provisions paragraph B of this rate schedule in order to meet the competitive circumstances for alternate fuels or bypass situations cited above excluding competition from other Pennsylvania local distribution companies. The Company will reduce the applicable rate only if:

- (a) Either (1) the MMT Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;

(D) Indicates Decrease

(I) Indicates Increase

be subject to refund under any circumstances. As deemed necessary by the Company in its sole discretion, the DMT customer shall be required also to pay, in full, for costs of installing daily metering and communications equipment selected by the Company which will enable the Company to obtain each day meter readings of the volume of gas delivered to the Company or to another point or points acceptable to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day. In addition, with regard to daily metering and communications equipment, the Customer shall pay an amount of money to provide for recovery of the present value of the carrying cost of income taxes on the payment for daily metering and communications equipment. Such carrying cost arises from the delay between federal and Pennsylvania income taxation and income tax deductions over the tax life of the equipment and a further amount equal to 72.67% of the carrying cost (based on present income tax rates). If additional facilities are required for furnishing of gas service, customer's payment for additional facilities required for furnishing of gas service shall be governed by Tariff Rule No. 3, "Extension of Facilities", and Tariff Rule No. 5, "Service Lines."

(C)

CHARACTER OF SERVICE

Gas, of a quality acceptable to the Company, owned by a DMT Service Customer and delivered, either directly or by displacement, into the Company's distribution system, will be transported, by the Company, to the delivery point designated by the DMT Service Customer.

TERM OF SERVICE AGREEMENT

If the requirements of this Rate Schedule are met, the Company shall offer to enter into a Service Agreement with an initial term of at least one year and successive one-year terms thereafter. The initial term of a Service Agreement may be for less than one year only with the mutual consent of both the DMT Service Customer and the Company. If the initial term of a Service Agreement is for less than one year, successive terms thereafter shall be equal in length to the initial term. Either the DMT Service Customer or the Company may terminate the Service Agreement at the end of a term upon written notice thereof to the other more than thirty (30) days prior to the end of a term; further provided, however, that the Company may terminate a Service Agreement at an earlier date as provided by law by provisions of this Tariff.

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

1. Billing Service Charges

For a pilot period of three years, terminable by the Company at the end of the third year following 12 months prior notice to participating Suppliers, the Company will purchase amounts receivable for SATC customers with annual consumption less than 1,000 Mcf/year as described herein and further detailed in the billing agreement.

The rate to be charged by the Company to the Supplier for Standard Billing Service shall be \$0.20 for each bill rendered to an SATC Customer for the Supplier.

The Company shall provide the Supplier receiving Standard Billing Service with meter reading information and other reports in the Company's standard electronic format on a basis corresponding to the SATC Customer's billing cycles. The Supplier shall provide the Company with all required Supplier billing and rate information necessary for customer billing as determined by the Company. The Supplier shall provide such billing information in the Company's required format. The Supplier shall provide Supplier billing information no later than three business days before the last day of the month.

The Company will bill the SATC Customer for gas supplies sold by the Supplier to the Customer subject to the Supplier entering into a billing service contract with the Company. For Consolidated billing service where the Company does not purchase the Supplier's receivable payments made by the Customer under the billing service will be applied first to amounts to past service due under an amortization agreement with the Company, next to current bills due to the Company, next to gas supply charges owed to the Supplier, next to charges for other non-regulated service charges, and lastly to any "neighbor for neighbor" contribution. The terms and charges for the Supplier billing services other than Standard Billing Services may be negotiated between the Company and the Supplier. The Company shall be under no obligation to provide the Supplier billing services other than Standard Billing Services if mutually agreeable terms and charges cannot be negotiated.

The Company will purchase the accounts receivable from POR Suppliers servicing SATC Residential, SATC Small Commercial and Public Authority customers less than 250 Mcf/year, SATC Small Commercial and Public Authority customers between 250 and 1,000 Mcf/year and SATC Small Volume Industrial customers less than 1,000 Mcf/year at a discount where the Company is providing a Utility Consolidated Bill to the customer. The residential discount is 2.7508% and the non-residential discount is 0.5726%.

(C)

To the extent that a POR customer account has an unpaid balance on its final bill's late payment date or at the time the unpaid account balance is transferred to another active account, the Company will deduct from the payment to the POR SATS Supplier for the purchase of its receivable the unpaid billed amounts in excess of the amount that would have been due had the customer received service at Distribution's otherwise applicable sales rate during the time the customer received service from the SATS Supplier (pursuant to Rate Schedule SATC Section F "Lesser of Calculation").

(C) Indicates Change

RATE SCHEDULE FOR DAILY METERED LARGE MANUFACTURING TRANSPORTATION SERVICE
(cont'd)
MONTHLY RATES

For transportation of gas to Large Industrial Manufacturing Customers,
the monthly rate for transportation shall be:

\$0.5541 per Mcf.

(I)

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that is for recovery of gas costs or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a Gas Service Customer of the Company without use of the Company's facilities or another transportation of gas. The Company will reduce the applicable rate only if:

- (a) Either (1) the Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;
- (b) Volumes of gas that would be transported by the Company would be displaced by an alternate fuel or an alternative source of gas unless the Company reduces its transportation rate;
- (c) The Company will not reduce the rate for transportation service below the level necessary to transport gas; and
- (d) In the Company's judgment the DMLMT Service Customer has taken all reasonable steps to minimize the cost of gas supplies delivered to the Company's system in order to help meet competition.

Where the above criteria are met, the Company may, in its discretion enter into an agreement setting either: (1) a fixed transportation rate or (2) the basis for determining the transportation rate, for the period of the Service Agreement, which will specify which portion of the rate is being reduced.

Volumes delivered as transportation service pursuant to this rate schedule shall be subject to State Tax Adjustment Surcharge

CHARGES FOR TRANSPORTATION BY OTHERS

If furnishing service, pursuant to this Rate Schedule, requires the use of a transportation service provided other than by the Company, any cost incurred by the Company, with regard thereto, shall be billed to DMLMT Service Customer by the Company.

RIDER B

STATE TAX ADJUSTMENT SURCHARGE

In addition to the charges provided in this tariff, a surcharge of (0.00%) will apply to all charges for service rendered on or after August 1, 2023. (D)

The above surcharge will be recomputed using the same elements prescribed by the Commission.

- a. Whenever any of the tax rates used in calculation of the surcharge are changed;
- b. Whenever the utility makes effective any increased or decreased rates, and
- c. On March 31, 1971, and each year thereafter.

The above recalculation will be submitted to the Commission within one (1) day after the occurrence of the event or date which occasions such recomputation; and, if the recomputed surcharge is less than the one in effect, the Company will, and if the recomputed surcharge is more than the one then in effect, the Company may submit with such recomputation a tariff or supplement to reflect such recomputed surcharge, the effective date of which shall be one (1) day after filing.

In Compliance with P-2017-2591001 Order entered October 5, 2017, the Company shall file its State Tax Adjustment Surcharge filings on one day's notice.

(C) Indicates Change

(D) Indicates Decrease

RIDER C
WEATHER NORMALIZATION ADJUSTMENT

Applicability and Purpose:

A Weather Normalization Adjustment ("WNA") shall be applied to bills of customers served under Residential, LIRA, and Commercial and Public Authority Rate Schedules, for any bills rendered during the heating season October through May.

Calculation of Adjustment Amount:

The WNA will be applied to October through May billing cycles and shall be calculated on a customer account specific basis in accordance with the formula below:

$$\begin{aligned} \text{WNBC} &= \text{BLMC} + [(\text{NHDD} / \text{AHDD}) \times (\text{AMC} - \text{BLMC})] \\ \text{WNAC} &= \text{WNBC} - \text{AMC} \\ \text{WNA} &= \text{WNAC} \times \text{Distribution Charge} \end{aligned}$$

- (a) Weather Normalized Billing Ccfs ("WNBC") will be calculated as the Base Load Monthly Ccfs ("BLMC") added to the product of the Normal Heating Degree Days ("NHDD"), divided by the Actual Heating Degree Days ("AHDD") and the Actual Monthly Ccfs ("AMC") less the BLMC. Weather Normalized Billing Ccfs (WNBC) will only be calculated if the AMC exceeds the BLMC. WNA will not be applicable for the billing period if AMC is less than the BLMC.
- (b) BLMC shall be established for each customer using the customer's actual consumption from the billing system, measured in Ccfs. (C)
- (c) AMC shall be measured for each customer and billing cycle and will be based on actual or estimated meter readings.
- (d) NHDD shall be based upon the 15-year average for the given day, as reported by the National Oceanic and Atmospheric Administration (NOAA) for the Erie International Airport weather station. NHDD shall be updated every 5 years with the next scheduled update of the NHDD to be effective on October 1, 2027, and thereafter every five years.
- (e) AHDD shall be the actual experienced heating degree days during the billing cycle. AHDD shall be based upon experienced actual Gas Day temperatures as reported by the NOAA for the Erie International Airport weather station.
- (f) AMC will be subtracted from the WNBC to compute the Weather Normalized Adjustment Ccfs ("WNAC").
- (g) The WNAC shall then be multiplied by the applicable Rate Schedule Distribution Charge based on service rendered to compute the WNA amount that will be charged or credited to each customer.

(C) Indicates Change

RIDER C
WEATHER NORMALIZATION ADJUSTMENT (Cont.)

- (h) In the event a customer's bill needs to be canceled and rebilled at any time, the WNA will be recalculated using the most recently available data for the billing period. In some cases, updates in data used in the calculation, may result in a different WNA for the billing period.
- (i) The WNA shall be subject to surcharges in accordance with the provisions of Rider B - State Tax Adjustment Surcharge as set forth in this tariff.
- (j) The Company will file reports detailing weather normalization information with the Commission as outlined in the Final Order at the Company's Base Rate Proceeding at Docket No. R-2022-3035730.

(C)

(C) Indicates Change

RIDER D
ENERGY EFFICIENCY PILOT COST RECOVERY

Program Description

National Fuel's Energy Efficiency Pilot ("EE Pilot") is an equipment replacement program to encourage customers to install high efficiency space heating appliances by offering rebate incentives. The eligible market for these rebates will be all residential customers, existing and new converting, who are replacing space heating equipment. This Energy Efficiency Cost Recovery Program ("Program") shall recover costs related to the Company's EE Pilot.

EE Pilot Charge

The EE Pilot Charge will be added to the delivery rates of the Residential customer class served under the Residential Service, Low-Income Residential Assistance, Monthly Metered Transportation, Daily Metered Transportation, and Small Aggregation Transportation Customer Service (SATC) Rate Schedules as follows:

EE Pilot Charge: \$0.0619/Mcf

Determination of EE Pilot Charge

The EE Pilot Charge shall be determined as follows:

1. Costs to be recovered shall include Company incurred costs to implement its Commission approved EE Pilot during each plan year (January 1 - December 31), including all costs incurred to develop and administer the EE Pilot.
2. The EE Pilot Charge shall be calculated in accordance with the formula below and shall be rounded to the fourth decimal:

EE Pilot Charge = Projected EE Costs / Projected Residential Class Usage (Mcf)

3. Net over or under collection of the EE Pilot Charge will result from the difference between the EE Pilot revenues received and the EE Pilot costs incurred. This reconciliation will be completed at the end of the 3-year pilot.

(C) Indicates Change

RIDER F
LIRA DISCOUNT CHARGE

CURRENT LIRA RATE DISCOUNT

Effective August 1, 2023, a charge will be included in the rates subject to this Rider to provide for recovery of costs of the projected LIRA rate discounts, pre-program arrearage forgiveness, and program costs exclusive of company labor for the upcoming 12 months. (C)

Such charge shall be updated quarterly and effective each February 1, May 1, August 1, and November 1 of the year. The charge will also be updated whenever there is a change to the Residential Sales Service Rate Customer Charge, Distribution Charge, Natural Gas Supply Charge, or Gas Adjustment Charge.

APPLICABILITY

In addition to the charges provided in this tariff, a charge calculated in the manner explained below shall be added to the otherwise applicable charge for each Mcf of sales and transportation volumes delivered by the Company to customers receiving service under the Residential Sales Service Rate Schedule and the Residential rates of the SATC, MMT, and DMT transportation rate schedules.

CALCULATION OF RATE

The charge will be recalculated as specified above.

The charge shall be equal to the total annual projected discounts, pre-program arrearage forgiveness and program cost exclusive of company labor for LIRA customers for the upcoming 12 month period divided by the annual normalized throughput volumes of the qualified rate classes. The total annual projected discounts for the LIRA customers for the upcoming 12 month period shall equal the sum of the individual monthly total projected discounts, pre-program arrearage forgiveness, and program cost exclusive of company labor for LIRA customers for the upcoming 12 months. The total monthly projected discounts for LIRA customers shall equal the residential bill for the average LIRA customer consumption for the month multiplied by the average discount percentage for LIRA service multiplied by the projected number of LIRA customers for the month. (C)

The currently effective charge for the current LIRA Rate Discount to be included in rates is \$0.2033/Mcf. (I)

(D) Indicates Decrease

(I) Indicates Increase

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE

A charge will be included in the rates subject to this Rider to provide for the full recovery of costs in conjunction with the Company's LIRA rate discounts, program costs, forgiven pre-program arrearages. Annual reconciliations for the appropriate periods will be filed in accordance with 66 Pa.C.S. §1307(e) by October 30. (C)

Such charge shall be updated annually and effective each February 1 of the year. (C)

CALCULATION OF RECONCILIATION COMPONENT OF RATE

The charge will have five components; the first associated with the LIRA rate discount, the second with the LIRA program costs, the third with the LIRA forgiven pre-program arrearages, the fourth with the incremental customer credit and a fifth with the adjustment for over/under recovery of the prior period charge. The charge will be recalculated as specified above.

The charge associated with the LIRA rate discount will contain the following calculation;

The annual reconciliation charge associated with the lira rate discounts will be based on the previous fiscal year (October through September) actual over/(under) collection determined by comparing discounts provided in bills to LIRA customers as compared to discounts billed to Residential customers under this Rider. (C)

(C) Indicates Change

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE (con't.)

CALCULATION OF RECONCILIATION COMPONENT OF RATE (con't)

The charge associated with the LIRA program costs will contain the following calculation;

The annual reconciliation charge associated with the LIRA program costs will be calculated based on the previous annual fiscal year costs (October through September) to administer the LIRA program excluding company labor and benefits less the projected amount included in the rider for the previous fiscal year. (C)

The charge associated with the LIRA forgiven pre-program arrearages will contain the following calculation;

The annual reconciliation charge associated with the LIRA forgiven pre-program arrearages will be based on the previous annual fiscal year pre-program forgiven arrearages (October through September) associated with the LIRA program less the projected amount included in the rider for the previous fiscal year. (C)

(C) Indicates Change

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE (con't)
CALCULATION OF RECONCILIATION COMPONENT OF RATE (con't)

The charge associated with the incremental customer credit will contain the following calculation:

Effective February 1, an annual credit of \$35 per customer will be provided associated with the LIRA incremental customers. The credit will be based on the average number of LIRA customers billed during the previous fiscal period (October - September) less 9,702. The annual credit will continue until new base rates become effective as a result of a general rate proceeding. If the average number of LIRA customers billed during the previous fiscal period is 9,702 or less, the credit will be \$0. (C)

The CAP Funding Reconciliation Charge will be the summation of the charges calculated above divided by the projected February 1 through January 31 volumes. (C)

ADJUSTMENT FOR OVER / UNDER RECOVERY OF PRIOR PERIOD CHARGE

The filing to be effective every February 1 shall include a levelized rate for over/under collections for the prior (12) month period by comparing projected revenues under this Rider to actual revenue amounts experienced. The annual reconciliation shall be based upon actual revenues through December 31 and estimated revenues for January. Estimates for January shall be included in the following reconciliation period. The rate will be designed to recover or refund the applicable under or over recovery over the twelve (12) month period beginning February. (C)

RIDER F LIRA Discount Charge Component	\$/Mcf	
Current LIRA Rate Discount	\$0.2103	(I)
Cap Funding Reconciliation Charge	\$(0.0071)	
Adjustment for Over/Under Recovery of Prior Period Charge	\$0.0001	
Total RIDER F	\$0.2033	(I)

The currently effective charge to be included in rates is \$0.2033/Mcf. (I)

(D) Indicates Decrease

(I) Indicates Increase

Rider G
Merchant Function Charge (MFC) Rider

Applicability:

The Merchant Function Charge (MFC) shall be added to the Natural Gas Supply Charge and Gas Adjustment Charge of Residential, LIRAS, Commercial and Public Authority, SVIS, IVIS, LVIS and LIS rate schedules.

Such charges shall be updated quarterly and effective each February 1, May 1, August 1, and November 1 of the year. The charge will also be updated whenever there is a change to the Sales Service Rate Customer Charge, Distribution Charge, Natural Gas Supply Charge or Gas Adjustment Charge.

Calculation of Rate:

For customers receiving service in the Residential classification, the MFC shall equal 2.6879% times the Natural Gas Supply Charge and the Gas Adjustment Clause as calculated for Rider A. (I)

The current Residential MFC Charge is:

Natural Gas Supply Charge per Mcf	\$0.2124	(I)
Gas Adjustment clause (E-Factor) per Mcf	\$0.0225	(I)
Total Residential MFC per Mcf	\$0.2349	(I)

For customers receiving service in the Non-Residential classifications, the MFC shall equal 0.5097% times the Natural Gas Supply Charge and Gas Adjustment Clause as calculated for Rider A. (I)

The current Non-Residential MFC Charge is:

Natural Gas Supply Charge per Mcf	\$0.0402	(I)
Gas Adjustment clause (E-Factor) per Mcf	\$0.0043	(I)
Total Non-Residential MFC per Mcf	\$0.0445	(I)

Rider H
Gas Procurement Charge (GPC)

APPLICABILITY

Effective June 1, 2013, the Gas Procurement Charge will be included in the Natural Gas Supply Charge of Residential, LIRAS, Commercial and Public Authority, SVIS, IVIS, LVIS and LIS rate schedules.

The charge is designed to recover the costs of procuring natural gas pursuant to 52 Pa. Code §62.223. The natural gas procurement costs included in the GPC charge will only be updated in a base rate case.

The GPC to be included in the Natural Gas Supply Charge shall (I) be \$0.1149 / Mcf and is not reconcilable.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES
 (Cont'd)

C. Determination of Justified Company Investment Per Dollar of
 Additional Annual Revenue

(1) Residential

The Justified Company Investment Per Dollar of Additional Annual Revenue for residential customers is \$~~64.4558~~. (DI)

(2) Commercial and Public Authority; Industrial

The Justified Company Investment Per Dollar of Additional Annual Revenue for commercial, public authority or industrial customers shall be selected from the table below based upon the projected term of use by the customer of the new or upgraded facilities.

<u>Projected Term of Use of New/Upgraded Facilities (Years)</u>	<u>Justified Company Investment Per Dollar of Additional Annual Revenue</u>
1	\$.470.63
2	.91 <u>1.21</u>
3	1.30 <u>1.74</u>
4	1.66 <u>2.23</u>
5	1.99 <u>2.69</u>
6	2.29 <u>3.11</u>
7	2.57 <u>3.49</u>
8	2.82 <u>3.85</u>
9	3.05 <u>4.17</u>
10	3.26 <u>4.47</u>
Greater than 10	4.58 <u>6.45</u>

Because the term of use has a substantial effect on the determination of the Justified Company Investment Per Dollar of Additional Annual Revenue, the Company may require a letter of intent from commercial, public authority and industrial customers projecting the term of use of the new or upgraded extension of facilities being requested.

The Company reserves the right to require a guaranteed revenue contract if the customer projects a term of use of the new or upgraded facilities in excess of 10 years or if the customer does not demonstrate that the customer's term of use is reasonable.

RATE SCHEDULE - NGV

NATURAL GAS VEHICLE SERVICE

I. APPLICABILITY

Throughout the territory served under this tariff.

II. AVAILABILITY

Sales Service under this rate schedule is available for use of natural gas by a customer directly in a natural gas motor vehicle ("NGV").

III. NATURE OF SERVICE

Service provided in this rate schedule shall be firm service subject to the curtailment priorities of Rule 26. For curtailment purposes, service under this rate schedule shall be defined as curtailment priority number (6), firm large noncritical commercial and industrial requirements other than requirement for boiler fuel use.

IV. RATE

Rates per 100 cu. Ft. shall be established by the Company on the first day of each calendar month for each of the categories set forth below to compete with alternative vehicle fuels. The rates shall not be less than the 100% load factor base cost of gas, plus the take-or-pay surcharge, plus the surcharge for Transition Cost, plus the incremental operating cost incurred by the Company for operating Company owned NGV compression equipment on a per Ccf basis, if any, plus \$0.01 per cu. ft., plus the state tax adjustment surcharge, and not more than the tailblock rate of the Commercial and Public Authority Service Rate Schedule, including all applicable surcharges, plus the incremental operating cost incurred by the Company for operating Company owned NGV compression equipment on a per Ccf basis, if any.

The 100% load factor base cost of gas shall be \$0.82523 per 100 cu. ft. ~~(I)~~
(as calculated by adding the purchase gas components of the Load Balancing Service Rates).

Purchased Gas 100% Load Factor Demand Cost	\$0.07125/Ccf	(D)
plus Purchased Gas Commodity Cost Equals	<u>\$0.75398/Ccf</u>	(I)
100% Load Factor Base Cost of Gas	\$0.82523/Ccf	(I)

The incremental operating cost for compression shall be \$0.13436/Ccf.

(D) Indicates Decrease

(I) Indicates Increase

Natural gas vehicle customers are classified into the following categories:

NGV(1) All natural gas vehicle customers utilizing Company owned filling facilities. A uniform rate shall be established each month within the parameters set forth above, for customers utilizing Company-owned filling facilities.

The minimum NGV(1) rate shall be: \$~~0.967170~~0.96959/Ccf (I)

The current components of the minimum NGV(1) rate are as follows:

100% load factor base cost of gas:	\$0.82523/Ccf	(I)
Incremental operating cost of Company owned NGV compression equipment:	\$0.13436/Ccf	
Transition Cost Surcharge	\$0.00000/Ccf	
State Tax Adjustment Surcharge	(\$ 0.0024200000)/Ccf	(D)
Minimum allowable Non-Gas cost	\$0.01000/Ccf	

The maximum NGV(1) rate shall be: \$~~1.171391~~1.20931/Ccf (I)

The current components of the maximum NGV(1) rate are as follows:

Tailblock rate <u>Distribution Charge</u> of the Large Commercial and Public Authority Service Rate schedule:	1.039971<u>1.07495</u> /Ccf	(C) (I)
Incremental operating cost of Company owned NGV compression equipment:	\$0.13436/Ccf	
State Tax Adjustment Surcharge	(\$ 0.0029400000)/Ccf	(D)

NGV(2) Natural gas vehicle customers utilizing customer owned filling facilities. A uniform rate will be established each month within the parameters set forth above, to customers utilizing customer owned filling facilities.

The minimum NGV(2) rate shall be: \$0.~~8331483523~~0.07495/Ccf (I)

The current components of the minimum NGV(2) rate are as follows:

100% load factor base cost of gas:	\$0.82523/Ccf	(I)
Transition Cost Surcharge	\$0.00000/Ccf	
State Tax Adjustment Surcharge	(\$ 0.0020900000)/Ccf	(D)
Minimum allowable Non-Gas cost	\$0.01000/Ccf	

The maximum NGV(2) rate shall be: \$~~1.037371~~1.07495/Ccf (I)

Issued: ~~July 29~~October 28, 2022

Effective: ~~August 1~~December 27, 2022

RATE SCHEDULE PSB

PRIORITY STANDBY SERVICE

APPLICABILITY

Throughout the territory served under this tariff.

AVAILABILITY OF SERVICE

Service under this rate schedule is available to all customers under the Residential, Commercial and Public Authority, and SVIS Rate Schedules which enter into a contract for service under this Rate Schedule. A customer will be permitted to enter into a contract, prepared by the Company, for service under this rate schedule, however, only if the Company projects that sufficient volumes of gas will be available to the Company during the period of the customer's contract for Priority Standby Service.

Service under this rate schedule is mandatory for all customers categorized as Priority 1 under the curtailment priorities of Rule 26 who enter into contracts with the Company to receive Transportation Service and who do not have dual or alternate fuel equipment on site which is installed and operable with sufficient amounts of alternate fuel available on site during each winter period of each year commencing on December 1 and ending on March 31 of the following year. Service under this rate schedule is voluntary for all other customers.

NATURE OF SERVICE

Priority standby service shall permit the customer to purchase gas on a firm basis subject to curtailment priorities of Rule 26. The Company will take all reasonable steps to obtain or to maintain gas supplies sufficient to enable the Company to provide reasonably continuous service to each Customer receiving Priority Standby Service.

MONTHLY RATE

The monthly rate shall be \$1.1177 per Mcf, which shall be applied to the total monthly volumes transported by the customer during the month. (I)

The rate shall equal the PGDC portion of the commodity rate applicable to the corresponding sales rate classification.

(D) Indicates Decrease

(I) Indicates Increase

MONTHLY RATE

The monthly rate shall be \$0.5297 per Mcf, which shall be applied to the (I)
Monthly Volume, as defined below.

MONTHLY VOLUME

The Mcf volume of gas to which the Monthly Rate set forth above shall be
applied, shall be determined for each billing cycle, as set forth below;

1. The volume of gas specified in the Service Agreement under this rate schedule shall be adjusted for each billing cycle by, multiplying such volume, expressed in Mcf, by a fraction. The numerator of the fraction shall be the number of days in the billing cycle applicable to the customer and the denominator shall be thirty (30).
2. If the volume determined under item 1, above, is greater than the sum of the Mcf volume of gas purchased by the customer under rate schedules other than load balancing rate schedules during the billing cycle, the Monthly Rate shall be applied to the difference between: (a) the volume determined under item 1, above, and (b) the Mcf volume of gas purchased by the customer under the rate schedules other than load balancing rate schedules during such billing cycle.
3. If the volume determined under item 1, above, is equal to or less than the Mcf volume of gas purchased by the customer under rate schedules other than load balancing rate schedules during the billing cycle, then the Monthly Volume shall be zero (0) Mcf.

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SCHEDULE (cont'd)

MONTHLY RATES

Commodity Rates

The commodity rates set forth below contain a component, presently \$0.3800 per Mcf, for recovery of purchased gas costs.

For transportation of gas to Residential Customers, the monthly rate for transportation of gas both within and outside the Commonwealth of Pennsylvania shall be:

~~\$2.8158~~3.0759 Mcf (D) ~~(I)~~

For transportation of gas to Commercial and Public Authority Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

~~\$2.7256~~2.6074 per Mcf for Small Commercial/Public Authority using not more than 250 Mcf per year (D)

~~\$2.2245~~2.3650 per Mcf for Small Commercial/Public Authority using greater than 250 Mcf but not more than 1,000 Mcf per year (D) ~~(I)~~

~~\$1.7762~~1.9265 per Mcf for Large Commercial/Public Authority (D) ~~(I)~~

For transportation of gas to Commercial and Public Authority Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

~~\$2.7256~~2.6074 per Mcf for Small Commercial/Public Authority using not more than 250 Mcf per year (D)

~~\$2.2245~~2.3650 per Mcf for Small Commercial/Public Authority using greater than 250 Mcf but not more than 1,000 Mcf per year (D) ~~(I)~~

~~\$1.7762~~1.9265 per Mcf for Large Commercial/Public Authority (D) ~~(I)~~

For transportation of gas to Small Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

~~\$2.5257~~2.2542 per Mcf for SVIS Customers (D)

For transportation of gas to Small Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

~~\$2.5257~~2.2542 per Mcf for SVIS Customers (D)

(D) Indicates Decrease

(I) Indicates Increase

RATE SCHEDULE FOR MONTHLY METERED TRANSPORTATION SCHEDULE (cont'd)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

~~\$1.43041.5475~~ per Mcf for IVIS Customers (D I)

For transportation of gas to Intermediate Volume Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

~~\$1.43041.5475~~ per Mcf for IVIS Customers (D I)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

~~\$1.16861.2855~~ per Mcf (D I)

For transportation of gas to Large Volume Industrial Customers and any entity that is not a Gas Service Customer, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

~~\$1.16861.2855~~ per Mcf (D I)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced within the Commonwealth of Pennsylvania shall be:

~~\$0.84390.9341~~ per Mcf (D I)

For transportation of gas to Large Industrial Customers, the monthly rate for transportation of gas produced outside the Commonwealth of Pennsylvania shall be:

~~\$0.84390.9341~~ per Mcf (D I)

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that are for recovery of gas or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a MMT Customer of the Company without use of the Company's facilities or another transportation of gas. The Company may also reduce or eliminate the compensation for line losses provided for in Special Provisions paragraph B of this rate schedule in order to meet the competitive circumstances for alternate fuels or bypass situations cited above excluding competition from other Pennsylvania local distribution companies. The Company will reduce the applicable rate only if:

- (a) Either (1) the MMT Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;

(D) Indicates Decrease

(I) Indicates Increase

be subject to refund under any circumstances. As deemed necessary by the Company in its sole discretion, the DMT customer shall be required also to pay, in full, for costs of installing daily metering and communications equipment selected by the Company which will enable the Company to obtain each day meter readings of the volume of gas delivered to the Company or to another point or points acceptable to the Company for the Customer's account and the volume of gas from the Company used by the Customer each day. In addition, with regard to daily metering and communications equipment, the Customer shall pay an amount of money to provide for recovery of the present value of the carrying cost of income taxes on the payment for daily metering and communications equipment. Such carrying cost arises from the delay between federal and Pennsylvania income taxation and income tax deductions over the tax life of the equipment and a further amount equal to 72.67% of the carrying cost (based on present income tax rates). If additional facilities are required for furnishing of gas service, customer's payment for additional facilities required for furnishing of gas service shall be governed by Tariff Rule No. 3, "Extension of Facilities", and Tariff Rule No. 5, "Service Lines."

(C)

CHARACTER OF SERVICE

Gas, of a quality acceptable to the Company, owned by a DMT Service Customer and delivered, either directly or by displacement, into the Company's distribution system, will be transported, by the Company, to the delivery point designated by the DMT Service Customer.

TERM OF SERVICE AGREEMENT

If the requirements of this Rate Schedule are met, the Company shall offer to enter into a Service Agreement with an initial term of at least one year and successive one-year terms thereafter. The initial term of a Service Agreement may be for less than one year only with the mutual consent of both the DMT Service Customer and the Company. If the initial term of a Service Agreement is for less than one year, successive terms thereafter shall be equal in length to the initial term. Either the DMT Service Customer or the Company may terminate the Service Agreement at the end of a term upon written notice thereof to the other more than thirty (30) days prior to the end of a term; further provided, however, that the Company may terminate a Service Agreement at an earlier date as provided by law by provisions of this Tariff.

RATE SCHEDULE SATS
SMALL AGGREGATION TRANSPORTATION SUPPLIER SERVICE (Cont.)

1. Billing Service Charges

For a pilot period of three years, terminable by the Company at the end of the third year following 12 months prior notice to participating Suppliers, the Company will purchase amounts receivable for SATC customers with annual consumption less than 1,000 Mcf/year as described herein and further detailed in the billing agreement. (C)

The rate to be charged by the Company to the Supplier for Standard Billing Service shall be \$0.20 for each bill rendered to an SATC Customer for the Supplier.

The Company shall provide the Supplier receiving Standard Billing Service with meter reading information and other reports in the Company's standard electronic format on a basis corresponding to the SATC Customer's billing cycles. The Supplier shall provide the Company with all required Supplier billing and rate information necessary for customer billing as determined by the Company. The Supplier shall provide such billing information in the Company's required format. The Supplier shall provide Supplier billing information no later than three business days before the last day of the month.

The Company will bill the SATC Customer for gas supplies sold by the Supplier to the Customer subject to the Supplier entering into a billing service contract with the Company. For Consolidated billing service where the Company does not purchase the Supplier's receivable payments made by the Customer under the billing service will be applied first to amounts to past service due under an amortization agreement with the Company, next to current bills due to the Company, next to gas supply charges owed to the Supplier, next to charges for other non-regulated service charges, and lastly to any "neighbor for neighbor" contribution. The terms and charges for the Supplier billing services other than Standard Billing Services may be negotiated between the Company and the Supplier. The Company shall be under no obligation to provide the Supplier billing services other than Standard Billing Services if mutually agreeable terms and charges cannot be negotiated. (C)

The Company will purchase the accounts receivable from POR Suppliers servicing SATC Residential, SATC Small Commercial and Public Authority customers less than 250 Mcf/year, SATC Small Commercial and Public Authority customers between 250 and 1,000 Mcf/year and SATC Small Volume Industrial customers less than 1,000 Mcf/year at a discount where the Company is providing a Utility Consolidated Bill to the customer. The residential discount is ~~2.29302.7508~~% and the non-residential discount is ~~0.29140.5726~~%. (C)

To the extent that a POR customer account has an unpaid balance on its final bill's late payment date or at the time the unpaid account balance is transferred to another active account, the Company will deduct from the payment to the POR SATS Supplier for the purchase of its receivable the unpaid billed amounts in excess of the amount that would have been due had the customer received service at Distribution's otherwise applicable sales rate during the time the customer received service from the SATS Supplier (pursuant to Rate Schedule SATC Section F "Lesser of Calculation"). (C)

(C) Indicates Change

RATE SCHEDULE FOR DAILY METERED LARGE MANUFACTURING TRANSPORTATION SERVICE ~~(C)~~
(cont'd)
MONTHLY RATES

For transportation of gas to Large Industrial Manufacturing Customers,
the monthly rate for transportation shall be:

~~\$0.4839-0.5541~~ per Mcf. ~~(I)~~

Provided, however, that the Company, in its sole discretion, may reduce by contract the portion of the above rates applicable to the Customer that is for recovery of gas costs or the portion of the rate for recovery of non-gas costs of service if it is reasonably necessary to do so to meet competition from another supplier of energy including gas from another supplier of gas that has constructed, or could construct, facilities to deliver supplies of gas to a Gas Service Customer of the Company without use of the Company's facilities or another transportation of gas. The Company will reduce the applicable rate only if:

- (a) Either (1) the Customer has facilities in place and operable to use an alternative fuel or obtain gas from an alternative supplier or (2) in the Company's judgment, such facilities would be constructed;
- (b) Volumes of gas that would be transported by the Company would be displaced by an alternate fuel or an alternative source of gas unless the Company reduces its transportation rate;
- (c) The Company will not reduce the rate for transportation service below the level necessary to transport gas; and
- (d) In the Company's judgment the DMLMT Service Customer has taken all reasonable steps to minimize the cost of gas supplies delivered to the Company's system in order to help meet competition.

Where the above criteria are met, the Company may, in its discretion enter into an agreement setting either: (1) a fixed transportation rate or (2) the basis for determining the transportation rate, for the period of the Service Agreement, which will specify which portion of the rate is being reduced.

Volumes delivered as transportation service pursuant to this rate schedule shall be subject to State Tax Adjustment Surcharge

CHARGES FOR TRANSPORTATION BY OTHERS

If furnishing service, pursuant to this Rate Schedule, requires the use of a transportation service provided other than by the Company, any cost incurred by the Company, with regard thereto, shall be billed to DMLMT Service Customer by the Company.

STATE TAX ADJUSTMENT SURCHARGE

In addition to the charges provided in this tariff, a surcharge of
(0.~~2500~~%) will apply to all charges for service rendered on or after August 1, ~~(D)~~
~~2022~~2023.

The above surcharge will be recomputed using the same elements
prescribed by the Commission.

- a. Whenever any of the tax rates used in calculation of the surcharge
are changed;
- b. Whenever the utility makes effective any increased or decreased
rates, and
- c. On March 31, 1971, and each year thereafter.

The above recalculation will be submitted to the Commission within one
(1) day after the occurrence of the event or date which occasions such
recomputation; and, if the recomputed surcharge is less than the one in
effect, the Company will, and if the recomputed surcharge is more than the one
then in effect, the Company may submit with such recomputation a tariff or
supplement to reflect such recomputed surcharge, the effective date of which
shall be one (1) day after filing.

In Compliance with P-2017-2591001 Order entered October 5, 2017, the
Company shall file its State Tax Adjustment Surcharge filings on one day's
notice.

RIDER C

WEATHER NORMALIZATION ADJUSTMENT

~~THIS PAGE LEFT BLANK INTENTIONALLY~~

Applicability and Purpose:

A Weather Normalization Adjustment ("WNA") shall be applied to bills of customers served under Residential, LIRA, and Commercial and Public Authority Rate Schedules, for any bills rendered during the heating season October through May.

Calculation of Adjustment Amount:

The WNA will be applied to October through May billing cycles and shall be calculated on a customer account specific basis in accordance with the formula below:

$$\text{WNBC} = \text{BLMC} + [(\text{NHDD} / \text{AHDD}) \times (\text{AMC} - \text{BLMC})]$$

$$\text{WNAC} = \text{WNBC} - \text{AMC}$$

$$\text{WNA} = \text{WNAC} \times \text{Distribution Charge}$$

- (a) Weather Normalized Billing Ccfs ("WNBC") will be calculated as the Base Load Monthly Ccfs ("BLMC") added to the product of the Normal Heating Degree Days ("NHDD"), divided by the Actual Heating Degree Days ("AHDD") and the Actual Monthly Ccfs ("AMC") less the BLMC. Weather Normalized Billing Ccfs (WNBC) will only be calculated if the AMC exceeds the BLMC. WNA will not be applicable for the billing period if AMC is less than the BLMC.
- (b) BLMC shall be established for each customer using the customer's actual consumption from the billing system, measured in Ccfs.
- (c) AMC shall be measured for each customer and billing cycle and will be based on actual or estimated meter readings.
- (d) NHDD shall be based upon the 15-year average for the given day, as reported by the National Oceanic and Atmospheric Administration (NOAA) for the Erie International Airport weather station. NHDD shall be updated every 5 years with the next scheduled update of the NHDD to be effective on October 1, 2027, and thereafter every five years.
- (e) AHDD shall be the actual experienced heating degree days during the billing cycle. AHDD shall be based upon experienced actual Gas Day temperatures as reported by the NOAA for the Erie International Airport weather station.
- (f) AMC will be subtracted from the WNBC to compute the Weather Normalized Adjustment Ccfs ("WNAC").

chedule Distribution Charge based on service rendered to compute the WNA amount that will be charged or credited to each customer.

RIDER D
ENERGY EFFICIENCY PILOT COST RECOVERY

~~RESERVED FOR FUTURE USE~~ Program Description

National Fuel's Energy Efficiency Pilot ("EE Pilot") is an equipment replacement program to encourage customers to install high efficiency space heating appliances by offering rebate incentives. The eligible market for these rebates will be all residential customers, existing and new converting, who are replacing space heating equipment. This Energy Efficiency Cost Recovery Program ("Program") shall recover costs related to the Company's EE Pilot.

EE Pilot Charge

The EE Pilot Charge will be added to the delivery rates of the Residential customer class served under the Residential Service, Low-Income Residential Assistance, Monthly Metered Transportation, Daily Metered Transportation, and Small Aggregation Transportation Customer Service (SATC) Rate Schedules as follows:

EE Pilot Charge: \$0.0619/Mcf

Determination of EE Pilot Charge

The EE Pilot Charge shall be determined as follows:

1. Costs to be recovered shall include Company incurred costs to implement its Commission approved EE Pilot during each plan year (January 1 - December 31), including all costs incurred to develop and administer the EE Pilot.
2. The EE Pilot Charge shall be calculated in accordance with the formula below and shall be rounded to the fourth decimal:

EE Pilot Charge = Projected EE Costs / Projected Residential Class Usage (Mcf)

3. Net over or under collection of the EE Pilot Charge will result from the difference between the EE Pilot revenues received and the EE Pilot costs incurred. This reconciliation will be completed at the end of the 3-year pilot.

RIDER F
LIRA DISCOUNT CHARGE

CURRENT LIRA RATE DISCOUNT

Effective ~~April 1, 2002~~ August 1, 2023, a charge will be included in the rates subject to this Rider to provide for recovery of costs of the projected LIRA rate discounts, pre-program arrearage forgiveness, and program costs exclusive of company labor for the upcoming 12 months. (C)

Such charge shall be updated quarterly and effective each February 1, May 1, August 1, and November 1 of the year. The charge will also be updated whenever there is a change to the Residential Sales Service Rate Customer Charge, Distribution Charge, Natural Gas Supply Charge, or Gas Adjustment Charge.

APPLICABILITY

In addition to the charges provided in this tariff, a charge calculated in the manner explained below shall be added to the otherwise applicable charge for each Mcf of sales and transportation volumes delivered by the Company to customers receiving service under the Residential Sales Service Rate Schedule and the Residential rates of the SATC, MMT, and DMT transportation rate schedules.

CALCULATION OF RATE

The charge will be recalculated as specified above.

The charge shall be equal to the total annual projected discounts, pre-program arrearage forgiveness and program cost exclusive of company labor for LIRA customers for the upcoming 12 month period divided by the annual normalized throughput volumes of the qualified rate classes. The total annual projected discounts for the LIRA customers for the upcoming 12 month period shall equal the sum of the individual monthly total projected discounts, pre-program arrearage forgiveness, and program cost exclusive of company labor for LIRA customers for the upcoming 12 months. The total monthly projected discounts for LIRA customers shall equal the residential bill for the average LIRA customer consumption for the month multiplied by the average discount percentage for LIRA service multiplied by the projected number of LIRA customers for the month. (C)

The currently effective charge for the current LIRA Rate Discount to be included in rates is \$0.20330.1452/Mcf. (I)

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE

A charge will be included in the rates subject to this Rider to provide for the full recovery of costs in conjunction with the Company's LIRA rate discounts, program costs, forgiven pre-program arrearages. ~~as provided for in Docket No. M-00051923 and an incremental customer credit per Settlement of Docket Nos. R-00072420 and M-000721019. The first 12 month reconciliation period will commence October 1, 2007 through September 30, 2008 with the reconciliation charge or credit to be effective for the one year period commencing February 1, 2009.~~ Annual reconciliations for the appropriate periods will be filed in accordance with 66 Pa.C.S. §1307(e) by October 30. (C)

Such charge shall be updated annually and effective each February 1 of the year. ~~A review of the CAP Funding Reconciliation mechanism will be conducted in conjunction with the Triennial Filing to be made in 2010.~~ (C)

CALCULATION OF RECONCILIATION COMPONENT OF RATE

The charge will have five components; the first associated with the LIRA rate discount, the second with the LIRA program costs, the third with the LIRA forgiven pre-program arrearages, the fourth with the incremental customer credit and a fifth with the adjustment for over/under recovery of the prior period charge. The charge will be recalculated as specified above.

The charge associated with the LIRA rate discount will contain the following calculation;

~~Effective February 1, 2009, and thereafter, t~~The annual reconciliation charge associated with the LIRA rate discounts will be based on the previous fiscal year (October through September) actual over/(under) collection determined by comparing discounts provided in bills to LIRA customers as compared to discounts billed to Residential customers under this Rider. 2007

The charge associated with the LIRA program costs will contain the following calculation;

~~Effective February 1, 2009 and thereafter, t~~The annual reconciliation charge associated with the LIRA program costs will be calculated based on the previous annual fiscal year costs (October through September) to administer the LIRA program excluding company labor and benefits less the projected amount included in the rider for the previous fiscal year ~~\$82,924 of net LIRA program costs embedded in base rates that became effective January 1, 2007 (Docket No. R-00061493). The calculation will recognize these LIRA administrative costs until new base rates become effective.~~ (C)

The charge associated with the LIRA forgiven pre-program arrearages will contain the following calculation;

~~Effective February 1, 2009 and thereafter, t~~The annual reconciliation charge associated with the LIRA forgiven pre-program arrearages will be based on the previous annual fiscal year pre-program forgiven arrearages (October through September) associated with the LIRA program less the projected amount included in the rider for the previous fiscal year. ~~\$755,591 of LIRA forgiven pre-program arrearages embedded in base rates that became effective on January 1, 2007 (Docket No. R-00061493). The calculation will recognize these LIRA pre-program forgiven arrearages until new base rates become effective.~~ (C)

RIDER F
LIRA DISCOUNT CHARGE

CAP FUNDING RECONCILIATION CHARGE (con't)
CALCULATION OF RECONCILIATION COMPONENT OF RATE (con't)

The charge associated with the incremental customer credit will contain the following calculation:

Effective February 1, ~~2009 and thereafter~~, an annual credit of \$35 per customer will be provided associated with the LIRA incremental customers. The credit will be based on the average number of LIRA customers billed during the previous fiscal period (October - September) less 9,702~~11,411~~. The annual credit will continue until new base rates become effective as a result of a general rate proceeding. If the average number of LIRA customers billed during the previous fiscal period is 11,411~~9,702~~ or less, the credit will be \$0. (C)

The CAP Funding Reconciliation Charge will be the summation of the charges calculated above divided by the projected February 1 through January 31 volumes. (C)

CAP Funding Reconciliation Charge Calculation		
	LIRA Rate Discount	\$149,855
+	LIRA Program Costs	\$(52,946)
+	LIRA Forgiven Pre-Program Arrearages	\$(238,424)
+	LIRA Incremental Customer Credit	\$0
Equals	Total	\$(141,515)
Divided by	Projected Feb - Jan Volumes	19,865,799 Mcf
	Cap Funding Reconciliation Charge / Mcf	———\$(0.0071) / Mcf

ADJUSTMENT FOR OVER / UNDER RECOVERY OF PRIOR PERIOD CHARGE

The filing to be effective ~~February 1, 2010 and~~ every February 1 ~~thereafter~~ shall include a levelized rate for over/under collections for the prior (12) month period by comparing projected revenues under this Rider to actual revenue amounts experienced. The annual reconciliation shall be based upon actual revenues through December 31 and estimated revenues for January. Estimates for January shall be included in the following reconciliation period. The rate will be designed to recover or refund the applicable under or over recovery over the twelve (12) month period beginning February. (C)

RIDER F LIRA Discount Charge Component		\$/Mcf	
	Current LIRA Rate Discount	\$0. <u>2103</u> 1522	(I)
	Cap Funding Reconciliation Charge	\$(0.0071)	
	Adjustment for Over/Under Recovery of Prior Period Charge	\$0.0001	
	Total RIDER F	\$0. <u>2033</u> 0.1452	(I)

The currently effective charge to be included in rates is \$0.2033~~1452~~/Mcf. (I)

Issued: October 28~~July 29~~, 2022

Effective: December 27~~August 1~~, 2022

Rider G
Merchant Function Charge (MFC) Rider

Applicability:

The Merchant Function Charge (MFC) shall be added to the Natural Gas Supply Charge and Gas Adjustment Charge of Residential, LIRAS, Commercial and Public Authority, SVIS, IVIS, LVIS and LIS rate schedules.

Such charges shall be updated quarterly and effective each February 1, May 1, August 1, and November 1 of the year. The charge will also be updated whenever there is a change to the Sales Service Rate Customer Charge, Distribution Charge, Natural Gas Supply Charge or Gas Adjustment Charge.

Calculation of Rate:

For customers receiving service in the Residential classification, the MFC shall equal 2.23012.6879% times the Natural Gas Supply Charge and the Gas Adjustment Clause as calculated for Rider A. (I)

The current Residential MFC Charge is:

Natural Gas Supply Charge per Mcf	<u>\$0.17620.2124</u>	(I)
Gas Adjustment clause (E-Factor) per Mcf	<u>\$0.01870.0225</u>	(I)
Total Residential MFC per Mcf	<u>\$0.19490.2349</u>	(I)

For customers receiving service in the Non-Residential classifications, the MFC shall equal 0.22850.5097% times the Natural Gas Supply Charge and Gas Adjustment Clause as calculated for Rider A. (I)

The current Non-Residential MFC Charge is:

Natural Gas Supply Charge per Mcf	<u>\$0.01810.0402</u>	(I)
Gas Adjustment clause (E-Factor) per Mcf	<u>\$0.00190.0043</u>	(I)
Total Non-Residential MFC per Mcf	<u>\$0.02000.0445</u>	(I)

Issued: ~~July 29, 2022~~October 28, 2022

Effective: ~~August 1, 2022~~December 27,
2022

Rider H
Gas Procurement Charge (GPC)

APPLICABILITY

Effective June 1, 2013, the Gas Procurement Charge will be included in the Natural Gas Supply Charge of Residential, LIRAS, Commercial and Public Authority, SVIS, IVIS, LVIS and LIS rate schedules.

The charge is designed to recover the costs of procuring natural gas pursuant to 52 Pa. Code §62.223. The natural gas procurement costs included in the GPC charge will only be updated in a base rate case.

The GPC to be included in the Natural Gas Supply Charge shall (I) be ~~\$0.10500~~.1149 / Mcf and is not reconcilable.
