Docket Nos. 50-348  
50-364

U. S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, D. C. 20555

Gentlemen:

Joseph M. Farley Nuclear Plant  
Reschedule of Supplemental Report For LER 89-004-00

On October 17, 1989, Alabama Power Company voluntarily submitted Licensee Event Report No. LER 89-004-00 to notify the NRC of a potential design inadequacy in the service water system at Farley Nuclear Plant. This LER noted that a flow balance model was being prepared to address the potential design inadequacy and that a supplemental report would be submitted upon completion of the flow balance model. The expected date of the supplemental report was identified as March 30, 1990.

On March 28, 1990, Mr. J. E. Garlington of Alabama Power Company requested, and was granted, an extension for submittal of the supplemental report to April 26, 1990 in a teleconference with Mr. D. M. Verrelli of the NRC Region II staff. This letter confirms the conversation with Mr. Verrelli.

If you have any questions, please advise.

Sincerely,

  
W. G. Hairston, III
