60-megawatt participation agreement
9. **Grande Prairie Wind Farm**
400-megawatt participation agreement
(completion 2017)

About OPPD

On the cover

Customers can count on OPPD employees, including Ashley Liston, employment specialist; John Cordova, meter technician; Jeff Richey, working line crew leader; Tevi Lawson, engineer; and Angela Carter, HR business partner.

Omaha Public Power District is a publicly owned electric utility that serves a population of 799,000 people, more than any other electric utility in the state.

Operating since 1946, the public utility is governed by an elected board of eight directors. While its headquarters is located in Omaha, Neb., OPPD has several other locations in its 13-county, 5,000-square-mile service area in southeast Nebraska.

The majority of OPPD's power comes from three baseload power facilities: North Omaha Station and Nebraska City Station, both coal-fired, and Fort Calhoun Station, a nuclear power unit. Additional energy comes from three peaking units and renewable energy resources, including wind turbines and a landfill-gas unit.
