**ELECTRIC MOTOR
RIDERS**

ELECTRIC SOLUTIONS FOR MANY ENVIRONMENTS. INCLUDING THE ONE WE ALL SHARE.

Warehouses. Factories. Vineyards. Loading docks. Whatever the application, Toyota has the right electric forklift for the job.

Each is designed to not only save the day, but to help protect the environment, too — with quiet, lower-emission operation and rechargeable industrial batteries. Making them especially suitable for applications with food safety and ventilation concerns.

You won't have to sacrifice load capacity, travel speed or lift and lower speeds either. Our full line of electric forklifts provides the speed, power and maneuverability you need to maximize production. They can provide significant cost of operation savings, too.

Plus, with fewer moving parts, our electric forklifts are easier to maintain and less susceptible to wear and tear. That's Toyota. And that all adds up to the one advantage you'll appreciate regardless of your environment: more uptime.

A FIRST CLASS RANGE OF CLASS 1 FORKLIFTS.

We offer a full array of Class 1 forklift models, including a choice of cushion or pneumatic tires for indoor or outdoor applications.

They not only provide a range of load capacities, rider positions and specific features, each delivers the legendary

quality and engineering that only the industry's #1 forklift manufacturer can provide. Including the exclusive safety assurance of our System of Active Stability™ (SAS). Lower cost of ownership. Longer battery run time. And finely tuned ergonomics that provide more comfort, for more hours of productivity.

Bottom line, Toyota forklifts are designed better, built better and supported better than any other forklifts in the world.

Which explains why Toyota makes and sells more forklifts than anyone. And why they also maintain the industry's highest resale value.

CORE ELECTRIC

7FBCU15-18 | 8FBCU20-32-COMP

It's big on small space productivity. Carrying up to 6,500 pounds. Lifting as high as 23 feet. Providing superior cycle times and maneuverability, to move more pallets in confined aisles. Offering clean, quiet AC power that eliminates emissions, making the Core Electric a top choice for sensitive food and beverage applications, plus many other inside jobs. When the going gets tight, it gets going.

- ▶ AC Drive Motor (36- to 48-Volt)
- ▶ No-Tools-Required Floorboard

STAND-UP RIDER

8BNCU15-20

Narrow aisles, no problem. Tight trailers, taken care of. The Toyota Stand-Up Rider was built to fit in and stand out — nestling into aisles as narrow as 10 feet, carrying up to 4,000 pounds, reaching lift heights up to 23 feet. Think dock to stock. Multitasking. All-around indoor versatility. Think reliability and durability, too, from the forklift with the zero-emission AC power to work as hard and long as you do.

- ▶ 3,000 – 4,000 lb. Capacity

80V ELECTRIC PNEUMATIC

7FBJ35 | 8FBMKT20-30 | 8FBMT20-25

Never compromise. The Toyota 80V Electric Pneumatic holds its own against mid-capacity internal combustion trucks, even for rugged outdoor jobs. Tough enough for construction sites: brick, block and pipe. Concrete. Oil and gas. And the perfect pairing for wineries, orchards and other agricultural applications where diesel emissions may affect the product and guest experience. With a 4,000 - 7,000 lb. capacity, the 80V tackles them all. Delivering the performance you demand, with zero emissions.

OUR FORKLIFTS ARE SUPPORTED BY MORE THAN THEIR COUNTERWEIGHTS.

The support you receive after purchasing or leasing a Toyota forklift is as impressive as the quality that initially goes into it. With an extensive network of North American dealers, expert help is always within easy reach.

And our dealers are more than sales people, they're productivity specialists who consult with you to find the right solutions for your needs. With a focus on your uptime, they also provide factory-trained Toyota Technicians who keep your forklifts running at peak performance.

If you run a fleet, our T-Matics vehicle management system can help you track their performance, utilization rates,

maintenance schedules and more — improving your efficiency, productivity and profitability.

And every Toyota Class 1 electric forklift gives you the added peace of mind of our no-cost powertrain warranty, covering 3 years or 6,000 hours. As well as our no-cost basic warranty, covering most factory-installed options for a full year or 2,000 hours.

Additional warranty options, maintenance plans, and flexible leasing and financing packages further support our position as the world's most trusted material-handling partner.

OUR MACHINES CARRY SOMETHING NO OTHERS CAN: THE TOYOTA NAME.

As one of the most recognized and respected brands in the world, the Toyota nameplate is synonymous with quality, durability and value. It also provides a sense of confidence that few companies of any kind can match.

Every forklift that rolls out of our state-of-the-art Columbus, Indiana plant is a product of the legendary Toyota Production System — which features Just-in-Time parts delivery and quality checks at every step of the manufacturing

process. It also empowers every employee to halt production at the first sign of a quality breach.

It's all part of the Toyota philosophy of "kaizen": the dedication to always strive for improvement. Instituted by our founder more than 80 years ago, it's a principle that still guides us today.

And as long as our forklifts carry the Toyota name, we'll continue striving to improve processes and quality.
