

UMM COURNIL

Illustrated Guide to Civil Versions

Paulo Nunes, 2019

Introdução

After the purchase in 2018 of my UMM COURNIL 1984, I immediately found that the publicly available information about the serial features of the various developments of the UMM Cournil model was not organized, and it was not easy to see the differences., which have been happening over the years of production.

I then set out to draw up this graphic summary, which aims to record and group comparatively and chronologically the various versions and details (interior and exterior) of the UMM COURNIL vehicles, which were produced on a civil basis. From what you will see, the changes have been subtly and apparently somewhat disorderly, even due to parts inventory management. Due to the lack of available, organized and accessible information, it has not been possible, until now, to accurately date some of the changes, and even to understand the motivations from a technical / commercial point of view. I believe that with the dissemination of this work, new contributions will emerge, which will make this document a more complete study and knowledge tool for future and less knowledgeable generations, in assisting restoration / reconstruction work, and even certification processes.

This study was conducted solely using images from catalogs / publications of the brand, acquired by the author, and with information and photos, provided generously, by elements of the forUMM: Eduardo Filipe, Ivan Frois e Tiago Cardoso.

 **forUMM**

"(...)information and photos, provided generously, by elements of the forUMM: Eduardo Filipe, Ivan Frois e Tiago Cardoso."

UMM COURNIL

versions between 1979 and 1989

The first model produced was the UMM 490 4x4 short model, which was produced from 1976.

1977:

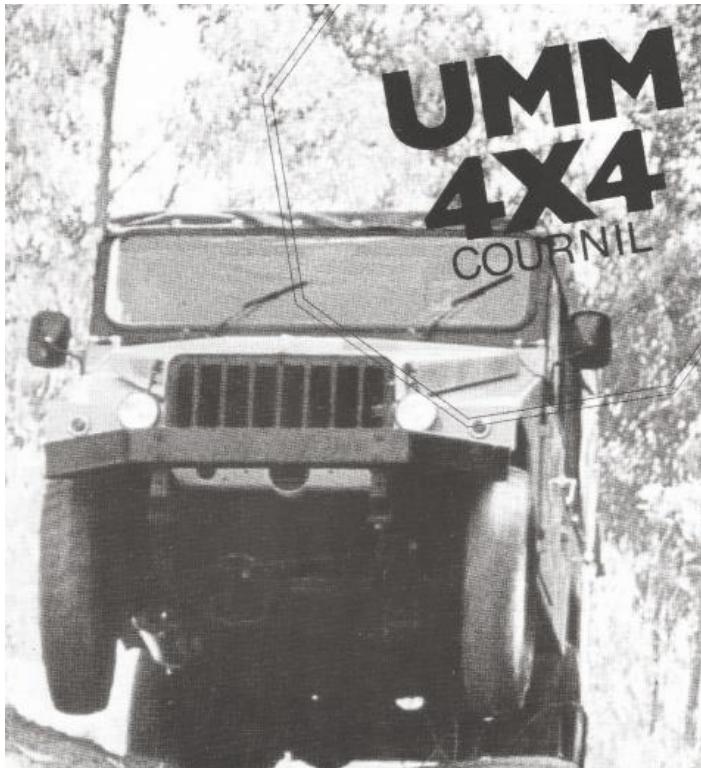

UMM - UNION METALO MECÂNICA, S.A. starts production of off-road vehicles through a French manufacturing license. The first models adopted the name of their creator, thus getting the designation UMM 4x4 Cournil available in two versions, the Tracteur and the Randonneur.

1980:

The Cournil 4x4 has undergone a change and now has built-in doors and technology, since the previous had the particularity of the exterior panel not be compliant with the body. Turning its designation into simply UMM 4x4 with a single version Entrepreneur.

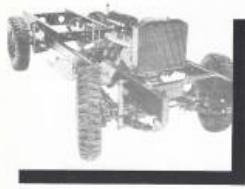

UMM Brochure

U.M.M. 4 × 4 = 16 QUALITES

1. ROBUSTE Sa carrosserie en acier traité d'une épaisseur de 1 mm et son tube de 500 mm recouvrante de 160 x 60 x 4 mm lui se complète d'un moteur PEUGEOT-INDENOR.

2. FIABLE Produit à des millions d'exemplaires et apprécié dans le monde entier, le moteur PEUGEOT-INDENOR répond à toutes les exigences des concessionnaires.

3. ECONOME De par sa conception DIESEL, le moteur INDENOR vous assure, outre ses qualités de robustesse et de durabilité, les plus grandes économies de carburant.

4. FACILE Une mécanique simple et éprouvée, des pièces détachées disponibles partout, une maintenance toujours assurée par une tradition mécanique universellement connue (PEUGEOT).

5. INTELLIGENTE L'U.M.M. 4x4 se caractérise par le positionnement idéal de ses organes mécaniques. En effet, son moteur et sa boîte de vitesses réculée au maximum assurent une répartition partiale des masses.

6. ROUTIERE Son groupe propulseur central et son pont autobloquant TRUCK LOCK, monté d'origine, lui confère des qualités routières remarquables et une tenue de route exceptionnelle en toutes circonstances.

7. AVENTUREUSE Sable, boue, crêtes, neige, rocallas, falaises, fondrières... vous pourrez faire face à toutes difficultés. Conçu pour aller partout, l'U.M.M. vous examinera les portes de l'aventure avec l'assurance de ceux qui savent où ils vont.

8. EXPERIMENTEE Vingt années d'expérience ont permis à l'U.M.M. COURNIL d'acquérir ce haut degré de fiabilité et d'efficacité qui en fait sa réputation aujourd'hui.

9. INDUSTRIEUSE C'est dans son contexte industriel que se démontre tout le potentiel de l'U.M.M. 4x4 pour assurer la réalisation d'opérations de levage et de travail. Prise de force AV-ARR, treuils, mais vous disposez aussi d'adaptations hydrauliques, de pelles, niveuseuses, épandeurs, tarafes, etc...

10. SPACIEUSE L'U.M.M. vous offre également la possibilité, en tout lieu et en toutes circonstances, de transporter 9 personnes ou de transporter un volume important pouvant atteindre un poids de 1100 Kgs.

11. MANIABLE Sa facilité de conduite est agrémentée par un bras de braquage très court et son excellente répartition des masses lui confère toute sa maniabilité.

12. SURE En plus de sa structure particulièrement résistante et de ses qualités routières, la position réculée du moteur offre, en cas d'accident, une protection supplémentaire aux organes mécaniques. Un angeau de sécurité complète cette disposition.

13. ATTRAYANTE Vous choisirez votre type d'attelage adapté à vos besoins, équipement électrique ou électronique, si vous le souhaitez, et vous tirerez partout les choses qui vous sont les plus chères... ou les plus encombrantes grâce à sa fixation directe au chassis. (5 t.)

14. SOUPLE S'adaptant à toutes les situations, en 2 ou 4 roues motrices et jouant au mieux de vos 8 vitesses AV et 2 ARR, l'U.M.M. 4 × 4 vous donnera toute la souplesse d'utilisation que vous en attendez.

15. ATTRAYANTE Son caractère, sa ligne, ses performances contribuent à rendre l'U.M.M. 4 × 4 des plus attrayants. Que ce soit pour un usage professionnel ou privée, si le naturellement vous en fera un ami fidèle, vous découvrirez aussi un service après-vente dynamique qui se pliera en 4 × 4 pour satisfaire toutes vos exigences.

Normal model, pre military series?, Short door - 1979

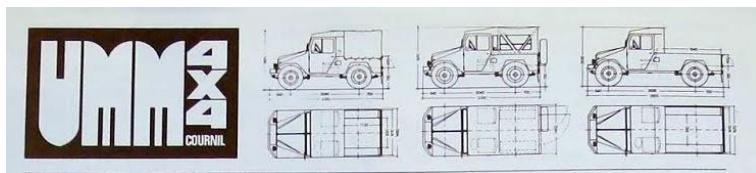

Photo of a UMM booklet, printed in 1979.

According to the information gathered, this may be a pre-series vehicle for military vehicles!

It features "flat" doors, built-in handles, small, protected headlights. Rearview mirrors with metal frame. Windscreen, sectioned, or with reinforcement profile!? It is a doubt that persists. No other photos were found to confirm this detail.

The canvas hood also features different details from the "civil" version!

Attention to detail, from the front bar grille to the cleaver! different from the newer, smaller section, and complanar ones.

Detail that can confirm the solution of the windscreen in two pieces and / or reinforced.

Normal model, short door - 1979

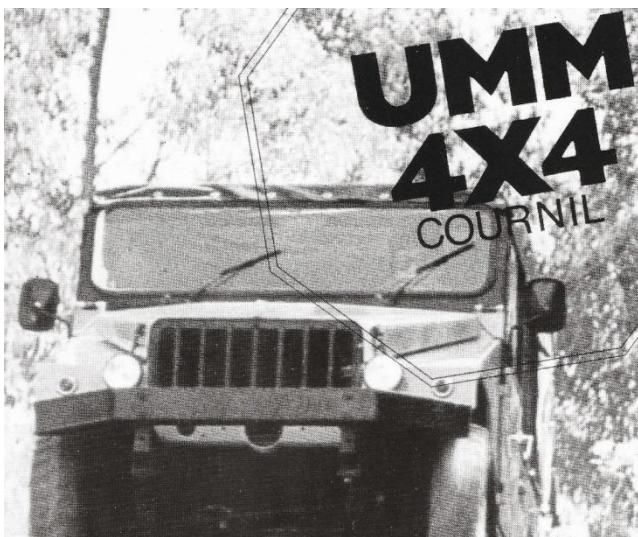

This photo, provided by IvanFrois, corresponds to a restoration from a commercial version with hard-top fibreglass and glazing.

The models of the first series, had taillights and turn signals - at par. In this model, turn signals appear in white plastic, but also appear in orange.

Photos from a UMM brochure.

The models of the first series, had taillights and turn signals - at par.

In this model, the turn signals appear in white plastic, with chrome rim!

Normal model, short door - 1979

Photo of a UMM booklet, printed in 1979.

It boasts flat doors, protruding knobs, large headlights. Rubber bonnet fasteners.

This hood also features different details from the pre-military version.

Pickup Truck, Short Door - 1979

Photo of a UMM brochure.

Pick-up version.

Normal model, short door - 1979

Photo of a UMM brochure.

Passenger version, with metallic hard top.

Normal model, short door - 1979

This photo, provided by IvanFrois, corresponds to the basis of a restoration. Hard-top fiberglass and glazing.

Normal model, short door

Photo of a UMM brochure.

It features 'recessed' doors, protruding knobs, orange turn signals, and a quadrangular shape. Rubber bonnet fasteners. Britax plastic rearview mirrors

Normal model, short door

Photos from a UMM brochure.

In civilian version, images with the 5th wheel rarely appear on the bonnet. Apparently, they are cars from the same era, short door, but with different details - see metal and plastic mirrors. Also the taillights are of a different model from other UMM assemblies.

UMM commercial photo.

English version. Metal rearview mirrors. Grill logo and fuel tank access on the right. Bonnet hinges, triangular in shape, with three screws.

UMM 4x4

Normal model, short door, english version

Normal model, short door, english version

English version. Grill logo on the left !!!!. Bonnet hinges, square in shape, with three screws. Three wiper rods !!!!!.

Normal model, wide door, 1982/85

Normal model, wide door, 1982/85

Pictures of UMM leaflets.

It has wide doors, protruding knobs, orange turn signals, and a quadrangular shape. Metal bonnet fasteners

This photo, provided by IvanFrois, corresponds to a restoration. Features Bakelite starter steering wheel, "flat doors", seats with hydraulic damping frames.

Photo of a UMM brochure.

Short door version. Anti-perspiration seat cover texture.

Photo of a UMM brochure.

*Wide port version.
Surrounding seats, with
headrest. Seat belts.*

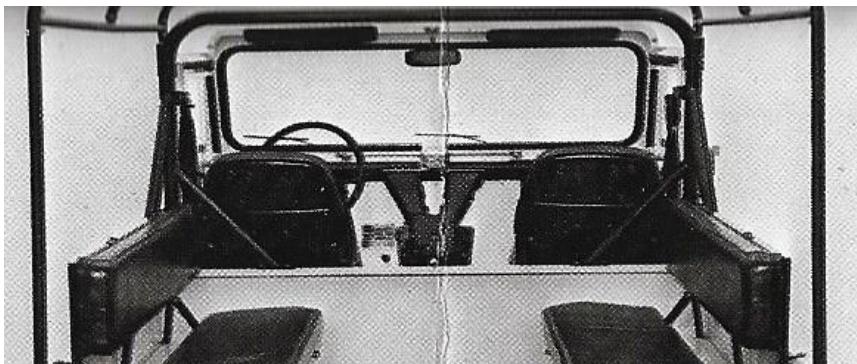

Photo of a UMM brochure.

Dashboard with wiper motor and rods in sight.

Photo of a UMM brochure.

Dashboard with built-in wiper and rod wiper motor. Chrome rimmed ashtray.

Upper rear door handle, metal.

Pedals detail, and hand throttle.

UMM COURNIL 1984

Tool set and hydraulic jack.

UMM COURNIL 1984

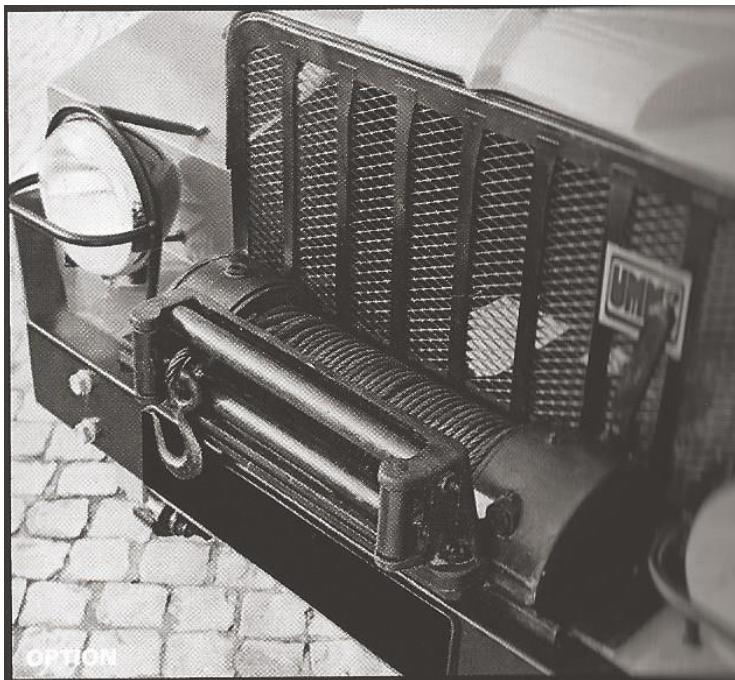

Photo of a UMM brochure.

Headlamps with metal protection. Optional mechanical winch.

Photo of a UMM brochure.

Frontal tubular protection, commonly known as cow killer

*Photo from a UMM Cournil
1984.*

*Orange turn signals. They also
appeared in white.*

Bonnet fasteners, metal

*Photo from a UMM Cournil
1984.*

Metallic towing hook !!

Photo of a UMM booklet, printed in 1979.

According to the information gathered, this may be a pre-series vehicle for military vehicles!

These photos, courtesy of IvanFrois, correspond to a restoration. It is the same car, which appears in the following photo and others, with hard-top fiberglass and glass.

Photo of a UMM brochure.

Images of a promotional stand.

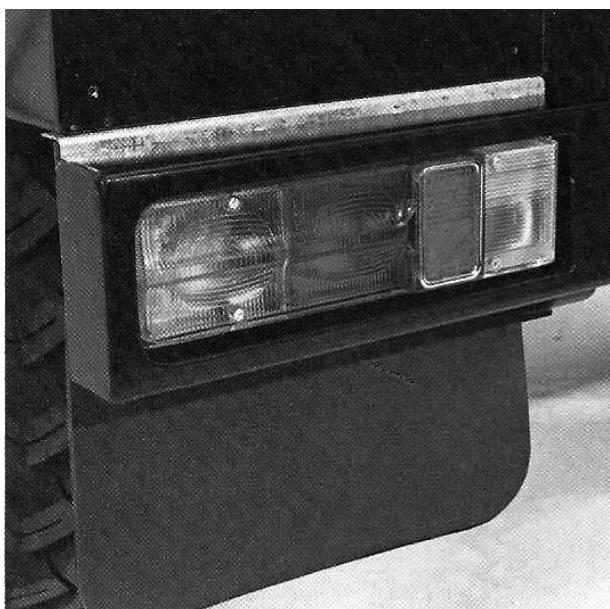

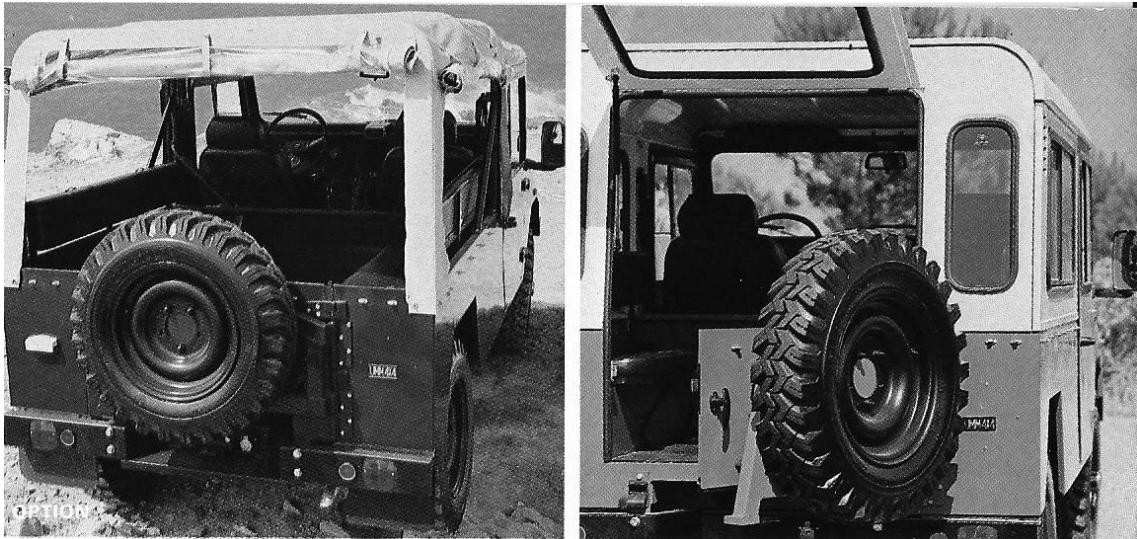

Photo of a UMM brochure.

According to the information collected, this may be a pre-series car / prototype!

Note the off-center placement of the spare wheel. The large integrated rear taillights.

No other photos found about this vehicle.

Photos from a UMM brochure.

*Rear views, and detail of the
spare wheel support structure.*

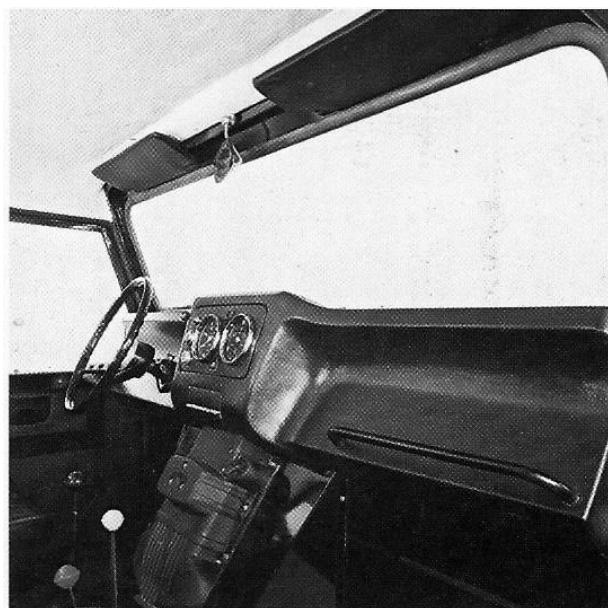

Photo of a UMM brochure.

According to the information gathered, this may be a pre-series car / prototype! Possibly the same car, with two different dashboard solutions !!

No other photos found about this vehicle.

Photo of a UMM brochure.

Possibly one of the latest interior configurations of UMM COURNIL.

It is also known that the last mounts have even included the dashboard that appears with the Alter I.

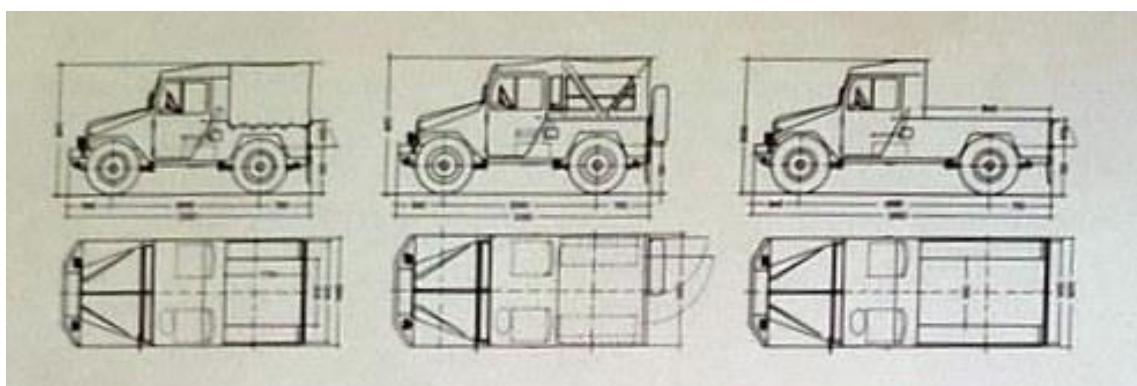

Photo from a UMM Cournil 1984.

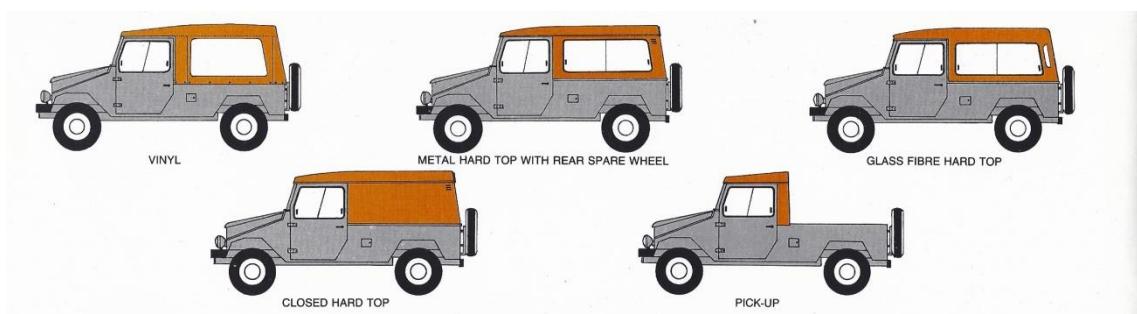

MOMO steering wheel

Various versions of utility vehicles, 1976/1982

Body models, short door, 1976/1982

Body models, wide door, 1982/85

SPECIFICATIONS

1. Châssis-Carrosserie: Châssis en tube rectangulaire de 120 x 60 mm en 4 mm épaisseur renforcé par 4 traverses, plus pare chocs AV et AR, boulonnés directement sur le châssis.
Carrosserie en tôle de 2 mm épaisseur, entièrement soudée au châssis.

2. Moteur: Diesel 4 cylindres, type INDENOR

	XDP 4.90	XD2P 4.94
Puissance Fiscale:	11 CV	12 CV
Cylindrée:	2112 cc	2304 cc
Alésage x Course:	90 x 83 mm	94 x 83 mm
Taux de compression:	22,4/1	22,2/1
Puissance (CH DIN):	62 à 4.500 tr/mn	67 à 4.500 tr/mn
Couple:	12,3 mkg à 2.000 tr/mn	13,7 mkg à 2.000 tr/mn
Alimentation électrique:	12 volts — 95 amp/h	12 volts — 95 amp/h
Alternateur:	500 W	500 W
Contenance carter d'huile:	5 litres (env.)	5 litres (env.)
Capacité réservoir:	67 litres	67 litres
Autonomie:	± 700 km	± 700 km

3. Embayage: Type monodisc à sec / Diamètre 250 mm
Surface de garniture : 560 cm²

4. Boîte de vitesses: Boîte de 4 vitesses M.A.

- Rapports:** 1ère 3,841/1; 2ème 1,934/1; 3ème 1,343/1; 4ème 1/1; M.A. 5,041/1
- Boîtes de transfer:** Transmission à deux rapports : route et réduite. Rapport réduit : 1/2,026

5. Ponts: Couple conique : 43,8/5,38 : 1 AV et 1 AR.
Capacité AV : 1.135 kg
Capacité AR : 1.590 kg
Système : TRACK LOCK auto-bloquant AR

6. Suspensions AV et AR: Ressorts : à lames semi-elliptiques.
Amortisseurs : télescopiques double effet à gaz AV et AR.

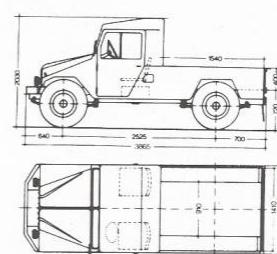

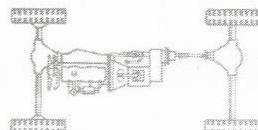

7. Freins: Hydrauliques à tambour AV et AR. Double circuit.
Diamètre des tambours : 280 mm
Surface de freinage : 1.160 cm²
Frein à main : agissant sur les roues AR

8. Direction: Type GEMMER à vis et galet à pas variable
Démultiplication : 20,4/1
Rayon de braquage : 5,26 m

A. Equipements en série: Portes acier avec vitres coulissantes
Traitement antirouille
Chauffage
Lave-glaces/Essuie-glaces
Warning
Pneus renforcés 700 x 16 ou 650 x 16
Crochet et prise fixe remorque
Sièges latéraux
Bâches

B. Equipements en option: Phare de manœuvre

- Hard-top tolé
- Hard-top plastique
- Treuil AV et AR 3 tonnes
- Prise de force
- Equipement incendie
- Equipement «Break»
- Remorque 1.000 kg
- Dispositif hydraulique permettant le montage AR des équipements suivants :
- lame niveuseuse, pelle excavatrice, tarière, etc...
- Moyeux libre
