## Welcome To A Style Of Driving You Won't Find Anywhere Else

Every 1992 Volkswagen is engineered to deliver handling and performance that is distinctly European...and uniquely Volkswagen.

This driving style has been described as solid, sure, nimble, precise — and enjoyable. In a word, *Fahrvergnügen*.

So find a stretch of winding road and discover a sense of satisfaction you won't find in any Japanese or domestic car. Experience the *Fahrvergnügen* that makes a car a Volkswagen.

### Our Safety Record Is Better By Design

Our commitment to safety is at the very heart of our design philosophy. We don't build responsive performance and precision handling into every Volkswagen simply for the fun of it. We do it for the kind of active safety that helps you stay out of trouble in the first place.

Of course we all know accidents do happen — and that's where safety features like front and rear crumple zones, safety cell construction, knee bars, rising ramp seats and energy absorbing steering columns come in. It all adds up to a safety story that should bring you a measure of peace of mind.

And here's more good news. In an independent study conducted by the Insurance Institute for Highway Safety, Volkswagen Cabriolet and Golf ranked first and second in terms of lowest number of fatalities

per 10,000 vehicles registered among Two-Door Small Cars. While Jetta had the second lowest fatality rate in the Four-Door Small Car group.\*

### We Became "Green" Before It Became Fashionable

At Volkswagen, our commitment to the planet goes back over 50 years, when we equipped our first factory with systems to preserve air and water quality.

Today, we continue to go to great lengths to make our factories safer for the environment. For example, we've eliminated asbestos and almost all heavy metals, lead and solvent from the production process.

We're also committed to recycling in the most responsible way — while still maintaining the structural integrity of our cars. Today, nearly 90% of the material in our Volkswagens can be recycled, if separated into component parts.

And as of this year, we've produced nearly 2.2 million "alternative" fuel vehicles — making us a world leader in the technology of engines that run on ethanol/methanol.

### Volkswagen: The Right Decision, Right From The Beginning

From your first dealership visit to picking up your new car to after-sales service, the Volkswagen experience is marked by personal attention and attention to detail.

You'll see that attention when your sales representative walks you through our 12-point Delivery Satisfaction Checklist. Then walks you over to meet a member of the service staff.

And you'll see our commitment in our warranty coverage. Every Volkswagen is protected by a comprehensive 5-year/50,000 mile powertrain warranty; a 6-year/unlimited mileage warranty against corrosion and rust perforation; and a 2-year/24,000 mile bumper-to-bumper warranty that covers virtually all components against defects in materials and workmanship, including light bulbs, adjustments, even wiper blades.\*\*

And, everyone who buys a new Volkswagen from a participating Partnership dealer will automatically be enrolled in Club *Fahrvergnügen*. This exclusive membership entitles you to low group rates on airfares, cruises and Sony® electronics. Plus, you'll be eligible for a Volkswagen/Club *Fahrvergnügen* VISA® card, sweepstakes opportunities for a new Passat and much, much more! We value your business, and we're committed to working hard so you'll have no reason to take your business anywhere else.
