

The Passat Wagon

It might confuse people who've known you all your life.

Getting the Passat Wagon to look this elegant may seem simple, but it's a tricky business.

Side Mirrors. In the automotive world, there are side mirrors and then there are the Passat's power, heatable, fully-folding side mirrors. As if that weren't enough, they even do double duty with their integrated blinkers. How's that for a pair of overachievers?

16" Alloys¹. More rim and less tire provide better cornering and more accurate turns. This five spoke design evokes strength and momentum even when the car's at a red light. So you're moving when you're standing still. Kind of.

EXTERIOR

Power Sunroof². When you're looking for inspiration from above, the Passat asks, "How much?" With 14 position settings on the power sunroof, the perfect amount of sunlight (or moonlight, for that matter) is just a turn of the knob away.

Pick a color, any color.

Black Blue Graphite Shadow Blue United Gray

Reflex Silver Silverstone Gray Stonehenge Gray

¹Standard on the GLX. Alloys shown only available on the GLX.

²Standard on the GLX and optional with package on the GLS.

Drivers wanted.®

We'd never hold back on style,
but we won't smother you with it either.

The Monsoon® Sound System¹.

200 watts and an eight-channel amplifier will make your earlobes shimmy and shake. To make it as cool-looking as possible, we made it match the blue and red instrumentation panel, too. Now isn't that just like us?

Eight-Way Programmable Seats¹.

These ergonomically designed buttons let you move higher, lower, further up, down, in, or out. You can program your three favorite seat positions, too. (Suggestion: save one for your mother-in-law.)

INTERIOR

Walnut Trim¹. We scrupulously inspect the wood we use. If it makes the cut, it's meticulously shaped and treated with round after round of delicate hand-polishing. That's how it gets its elegance and luster. And why you can't take your eyes off it.

Some fabrics² to choose from.

Beige Leatherette Anthracite Leatherette

Beige Leather Anthracite Leather

GLX interior shown. Some features may not be available on some trim levels.
¹Standard on GLX and not available on GLS. ²Leatherette is standard on the GLS. Leather seating surfaces are optional with package on GLS and standard on GLX.

Performance

For us, it's unlikely the thrill of making great engines will ever wear off.

170 hp

1.8T

Light in weight, compact in design, this engine has five valves per cylinder. That means better breathing for enhanced performance. Coupled with a Turbo, you get high torque starting at low rpm so you're quicker off the line. And high horsepower at high rpm provides exceptional passing power. Your fuel economy¹ is improved, and there are lowered emissions, too.

134 hp

TDI[®]

What does TDI[®] stand for? Well, fuel-efficiency and power about cover it. The new TDI[®]'s diesel engine is turbocharged to save you serious money at the pump and deliver serious performance. the line. Talk about the best of both worlds.

190 hp

V6

Six-cylinder smoothness is the big story here. With a total of 30 valves, the air-flow paves the way for dynamic performance. Variable valve timing and variable intake manifold give this V6 engine lots of torque over mid-range rpm here for quick acceleration. Not to mention improved fuel economy and reduced emissions.

¹Transport Canada fuel kilometres are estimates only. Your fuel consumption may vary.

Drivers wanted.[®]

Here's something special for those rainy days. The sunny ones, too.

The better you balance traction and gravity, the easier it is to stay on your feet, right? Well, it's the same for a car. Enter 4MOTION®, a special kind of all-wheel drive that steps your driving experience up a notch. Like a superhero that never rests, **it's there whenever duty calls**, distributing power to your wheels and providing traction wherever it's needed most. Say a tire momentarily loses grip and starts to slip. 4MOTION® will sense something's wrong and let the other tires know a friend's in need. In a flash they'll jump in, employing their own traction to help keep the car steady. How's that for teamwork? Not to mention added safety and control, rain or shine. Take a look at some of the engineering that makes it all possible.

EDL – ELECTRONIC DIFFERENTIAL LOCK

Operating independently on each axle, EDL controls how power is distributed between either side of the car. When ABS detects unnecessary wheel spin, EDL selectively applies brakes to that wheel only, causing the differential to "lock" and transferring power to the other wheels.

ABS – ANTI-LOCK BRAKING SYSTEM

ABS sensors basically act as lookouts for 4MOTION®. They pick up on unnecessary wheel spin then prod the ABS/EDL Control Unit to go to work. It does so by making sure that each and every wheel's power is individually maximized.

TORSEN® DIFFERENTIAL

This torque-sensing mechanical device is designed to distribute power from front to back. Its gears rotate in opposite directions so it can direct more power to whichever axle has more grip. Think it's massive, right? Actually, it's about the size of a melon.

ALL-AROUND
SAFETY

Safety.

Our most important standard feature.

Front Crush Zone. Helps to divert impact energy away from occupants in case there's a collision.

Anti-Theft Alarm System. Scares away uninvited guests. (Otherwise known as burglars.)

Immobilizer. Prevents the Passat from being started up if an unauthorized key is used.

Electronic Stability Program¹. For better handling and control. (Why skid if you don't have to?)

Brake Assist System. Working with ABS, it quickly maximizes brake pressure to support you in critical braking situations.

Rear Crush Zone. Helps to divert impact energy away from passengers in case there's a collision.

LATCH System. Lower Anchors and Tethers for CHildren. A standardized child seat attachment system for vehicles.

Anti-Theft Wheel Locks². We didn't make the wheels pretty so that just anyone could walk away with them.

Reinforced Body Panels. Contributing to the structural integrity of the Passat.

Track-Correcting Torsion Beam Rear Axle³. Angled mounts help increase vehicle control as turns are completed.

Side Curtain Protection™ Airbags⁴. These extend down the roofline, helping to minimize head and upper torso injury.

Dual Front and Front Side Impact Airbags⁵. Deploying within a tenth of a second if needed.

Remote Central Locking System. Don't fumble for keys when you're in a rush to get in.

Anti-Intrusion Side Door Beams. Buying precious time for the side impact airbags to deploy.

Steering Column and Wheel. Telescoping, height-adjustable, and collapsible on impact. (Not bad for a steering wheel.)

Safety Cell Construction. A rigid cell of reinforced steel is built into every Passat.

WARRANTY

Basic Warranty: Every Passat comes with a bumper-to-bumper New Vehicle Limited Warranty for 4 years or 80,000 kilometers, whichever comes first.

Powertrain Warranty: The Volkswagen Powertrain Limited Warranty provides 5 years or 100,000 kilometers of protection, whichever comes first.

Anti-Corrosion Warranty: A fully galvanized steel body means we can offer you a 12-year unlimited mileage Limited Warranty Against Corrosion Perforation.

Roadside Assistance: The Passat has a 24-hour-a-day Roadside Assistance package⁶, for 4 years or 80,000 kilometers, whichever comes first.

¹ Optional on the GLS and standard on GLX.

² Optional with package on the GLS and standard on the GLX.

³ On vehicles not equipped with 4MOTION®.

⁴ Airbags are supplemental restraints only and will not deploy under all accident scenarios.

Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

⁵ Side Curtain Protection™ is optional on the GLS and standard on the GLX.

⁶ Roadside Assistance is provided by Professional Dispatch Group, Welland Ontario. See dealer for details.
