The new **Škoda**Superb

Recommended Retail Price List
and Technical Specification

Effective 1st July 2009

Škoda. Manufacturer of happy drivers.

Scrappage

Do you have a car that's 10 years old that you've owned for a minimum of 12 months? If the answer's yes, then you could be eligible for the Government's scrappage scheme - which could get you great savings off the price of a new Škoda. Why not take a look at our website (www.skoda.co.uk/scrappage) for further details and terms and conditions.

Welcome to the new Superb

If you've ever wondered what luxury looks and feels like, without breaking the bank, then here it is; the Superb. Why not take a minute to understand exactly how the Superb can make you a happy driver?

A car with history

The new Superb was launched in September 2008. However, this is a model with history. Since the 1930s, on and off, there's been a Superb in the Škoda range providing a high quality and outstanding drive. So with that much history, it's no wonder that the new Superb has built upon the experiences of its predecessors to deliver a rewarding ownership and driving experience and ensure that Škoda really is the manufacturer of happy drivers.

Safety

The Superb offers a raft of active and passive safety features to help keep you safe. Active safety includes ESP across the range, activation of warning lights during heavy braking, and disc breaks on all wheels ensuring stopping distance is minimised. Passive features include the use of high-strength materials ensuring high body rigidity, strengthening of the side doors to maximise occupant safety, two Isofix child seats in the rear, and 7 airbags as standard.

Twindoor

Twindoor is Škoda's revolutionary boot opening mechanism which allows the boot to be opened in two different ways; as a hatch or as a saloon at the simplest touch of a button. This gives you great versatility and more practicality compared to a standard hatchback or saloon car.

Škoda Assistance

Every Škoda is covered by Škoda Roadside Assistance. So if you break down, even if you're on holiday or on business in Europe, you can use the freephone number to call someone to come and help you. Best of all it's completely free for 3 years.

Incredible space

The Superb has an enormous 565 litres of usable space in the boot. With the seats down, the Superb offers an astonishing 1,670 litres of space. Passengers benefit from enormous amounts of legroom, more than even an S Class Mercedes.

Park assist

Optional on all Superbs, park assist is an innovative system that uses a set of ultrasonic sensors placed at various points around the car to judge the suitability of parking space before assisting in the parking manoeuvre itself.

So you've read a little about some of the new Superb's features, but what else do you need to know about the new Superb?

The Superb is a car with history dating from the 1930s. The original Superb's design was luxurious and elegant both inside and out, built to appeal to the world's leaders and royalty. New Superb takes its sumptuous design cues from its earliest predecessor and builds on these strengths.

The Škoda design philosophy is to produce cars offering the best of both worlds – world class engines, smooth transmissions and high specifications, wrapped in distinctive, elegant and practical bodies.

The new Superb takes this philosophy and develops it. It's the first car ever to have a boot which can be opened as a hatch or a saloon. It has more rear legroom than many prestige chauffeur cars, and some nifty technological advances such as AFS (adaptive front light system), touch screen technology and park assist.

The new Superb range is also joined by the frugal Superb GreenLine, with emissions of just 136g/km meaning that luxury needn't cost the earth.

So now the introduction's over, why not have a look at the new Superb in a little more detail?

Škoda really does manufacture happy drivers.

What does being a happy driver mean to you? Here at Škoda, our goal is to ensure that anyone who experiences a Škoda has a happy experience. Right from the design stage, through the buying experience, to the after sales service, we want our customers to be happy with their Škoda vehicle.

The happiness of our customers is central to all we do here at Škoda, and that's no empty claim - we've been in the top 5 of the JD Power customer satisfaction survey for the last 14 years! Don't take our word for it though, come into a showroom and experience this for yourself.

Škoda. Manufacturer of happy drivers.

OTR (Recommended On The Road)

* Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.

VED (Vehicle Excise Duty)

** All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO₂) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO₂ figures may differ on these vehicles if taken from current Škoda UK stock. The VED bands are shown in the table opposite.

Please confirm figures with your Škoda retailer. Edition: UK May 2009. VAT is calculated at 15%. For fuel consumption data, please refer to page 14.

Band	CO ₂ Emission figure (g/km)	VED charge

Technical glossary

ABS: the Anti-lock Braking System prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

AFM: records and assesses all available data about the journey and uses them to optimize the ESP system's reactions, which can thus be adapted to any driving style and the current vehicle payload.

ASR: Anti-Slip Regulation traction control ensures the Superb's stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road-holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

CAN Bus: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

DSR: Driver Steering Recommendation – in a crisis situation it helps the driver stabilize a skid by making a slight intervention in the steering.

EBV: Electronic Brake Variator – ensures optimal brake force distribution between the front and rear axles.

EDL: the Electronic Differential Lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

ESBS: Electronic Stability Brake System – targeted interventions in the braking process improve the handling of a car as it brakes when passing round a bend and keeps it from veering.

ESP: Electronic Stability Programme is designed to stabilise the dynamic handling response of the vehicle by counteracting any tendency towards oversteer or understeer. The ESP constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESP reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine's output.

Fuel cut-out: should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

HBA: Hydraulic Brake Assistant – speeds up the brake effect in cases of hard braking.

MBA: the Mechanical Brake Assist system increases brake effort under emergency braking conditions through a dual rate servo.

MSR: the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface. MSR is a constituent part of the ASR system.

Trip Computer: the trip computer not only features an impressive range of data displays, operating it is simplicity itself. A multifunction touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.

Xenon lights: the Xenon lights produce about 2.5 times the light of standard Halogen lights with 35% less energy consumption.

DPF: diesel particulate filter is part of the exhaust system responsible for cleaning the engine exhaust gases before they enter the atmosphere. The DPF catches soot particles emitted in the exhaust gas and it works in conjunction with the catalytic converter, which reduces the amount of harmful gases entering the atmosphere. The DPF must periodically be emptied of the soot particles, a process known as regeneration. This involves elevated exhaust system temperatures. A driving style is required during regeneration, where a constant vehicle speed above 37 mph must be maintained. This does not always suit customers who make frequent short journeys or experience stop/start driving or drive within inner-city or urban areas.

Mobile phones on the '3' network are incompatible with the Bluetooth® phone preparation on Superb. The phones on '3' are unable to switch to rSAP mode and will therefore not work on this system.

Customer services

Talk to us on 08457 745 745

No matter what the query, our dedicated call centre is always ready to listen. No matter how big or small the request, speak to one of customer care advisors to see if they can help. The call centre is open from 8.30am-5.30pm. If you're calling out of hours, then a message can be left and you'll be contacted back.

Peace of mind with a Škoda warranty

In the first two years of owning your car, you'll get the peace of mind of a two year unlimited mileage warranty. In addition, you'll also get a further warranty on new vehicles supplied through the appointed dealer network until the vehicle has completed 60,000 miles or the end of the third year, whichever is sooner.

Your Superb also benefits from a 3 year paint warranty and 12 year anti-perforation warranty.

A network that's here to help

With 14 years in the top 5 of JD Power's customer satisfaction survey, our network of approximately 125 retailers knows how to treat a customer. You can be sure that as a Škoda customer, your retailer will look after you from the moment you walk through the door, throughout the life of your Škoda. Your Superb will be serviced and maintained to the highest standards by specially trained Škoda technicians. And when you need a spare part you'll be happy to know that most are held in stock, or can be ordered within 24 hours. So if top class customer satisfaction is what you're after, the Škoda network will be there for you.

Motability

People in receipt of the Higher Mobility Component of the Disability Living Allowance receive special help from Škoda. Preferential prices on low cost Contract Hire are available through your local approved Motability retailer. For full details, contact your retailer.

If your Škoda's in trouble, rely on Škoda Assistance

Completely free of charge, every new Škoda is covered by Škoda Assistance, provided by the RAC through a dedicated team. This cover lasts for 3 years. So if you ever break down, you can use the freephone number to call out someone who really knows about Škoda cars to help. This service is even available in Europe, so you don't need additional breakdown cover when you're driving on the continent.

Financing your Škoda

We all know that times are hard, so Škoda Finance specialises in providing funding solutions for Škoda drivers. Regardless of whether you're a private or business user, you can choose from a range of funding options

Finance products available are:

- Solution – a personal contract plan
- Hire purchase
- Lease purchase
- Finance lease
- Contract hire

With all Škoda Finance products you can choose a fixed-cost maintenance plan designed to help you budget accurately. No matter what finance product you choose, your local Škoda retailer will be able to provide you with a personalised quote that could meet your budget and vehicle needs. Škoda Finance is a trading name of Volkswagen Financial Services (UK) Limited, Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR. Registered in England number 2835230.

Adding that little extra to your car

If the standard specification and factory fitted options aren't enough for you, then why not take a look at our range of retailer fitted accessories? A separate accessories brochure can be found at your local retailer, or can be ordered by phoning our call centre, or by going on-line at www.skoda.co.uk.

Insuring your car through Škoda motor insurance

When you pick up your car for the first time, there's no need to worry about insurance, because each new Škoda comes with complimentary seven-day cover upon request – we'll email a cover note directly to your Škoda retailer, enabling them to tax your car easily. Taking out an annual policy is easy and it can start when the seven-day cover expires.

For more information contact your local Škoda retailer or call 0800 051 3145 to get a quote or to arrange your complimentary cover for your Škoda.

Škoda Insurance is underwritten and administered by Zurich Insurance Company.
