Peugeot PureTech: Compact engine – huge spirit

Peugeot PureTech is advanced 3-cylinder petrol engine technology that offers a drive and performance normally associated with much bigger engines but with significantly improved fuel consumption and CO₂ emissionsⁱ. It's a product of Peugeot's 100 years of intelligent, innovative engineering and combines reduced weight materials with the efficiency of applying direct fuel injection to three cylinders. On some versions we've even added Turbo power, optimising torque at all revs and delivering an engine with a unique personality and one which is ultimately designed to give you maximum driving pleasure and responsiveness, at any speed, for less.

(*comparison based on New 308 1.2L PureTech110 S&S vs New 308 1.6 THP 125)

Peugeot BlueHDi : Pioneering on MPG and CO₂

BlueHDi is the name given to Peugeot's latest generation of diesel engines. The result of a world-famous diesel heritage plus innovation and engineering excellence developed on the race track of Le Mans, BlueHDi complies with Euro 6* emission standards, to deliver exceptional fuel economy and CO₂ emissions alongside a driving experience rich in power and performance.

A three stage cleansing process specifically targets the pollutants of diesel combustion, removing hydrocarbons and carbon monoxide, reducing nitrogen oxides by up to 90% and eliminating 99.9%ⁱⁱ of particulates. BlueHDi delivers the cleanest diesel engine possible and exceptional fuel economy of up to 91mpg with CO₂ as low as 82g/kmⁱⁱⁱ.
