Quality by Design

Quality. It is both the mandate and the method by which all Buicks are created.

Buick: Celebrating 90 Years of Quality by Design.

Buick quality is *designed* in from the very start,

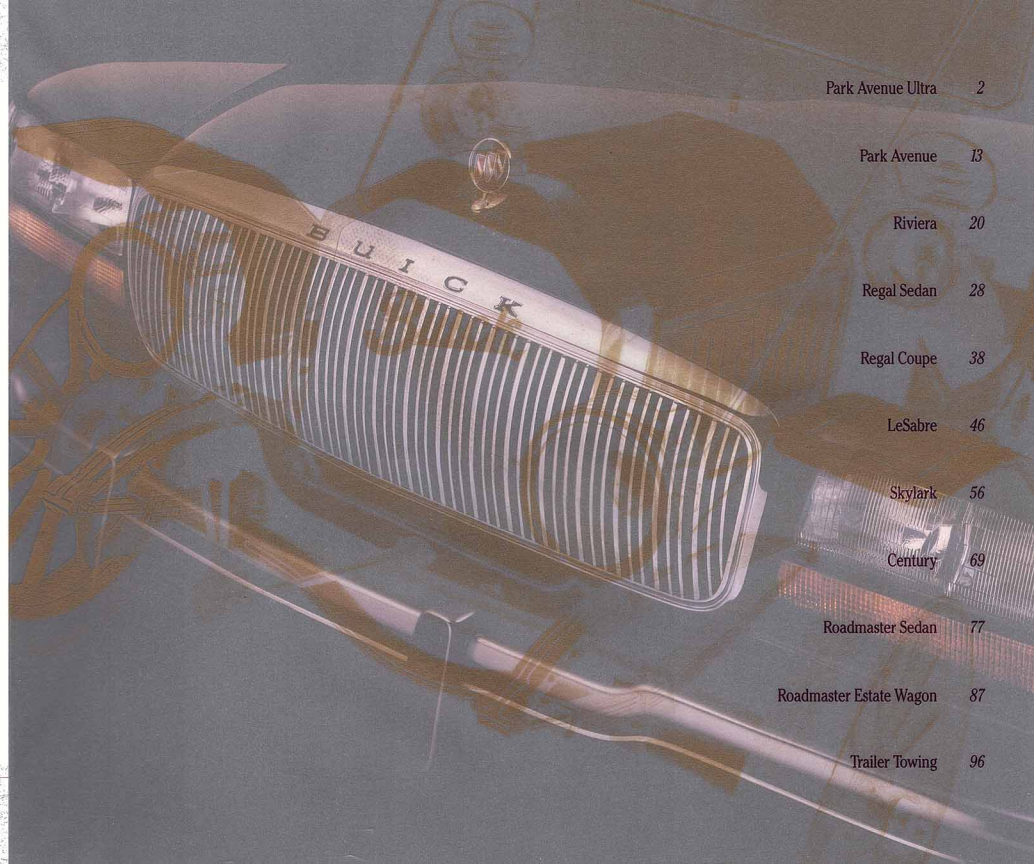

and is there in every detail that follows. You

experience it in the ride, the

library-hush of the interior, the refined response to a curve. You sense it in the quiet power of the engine. You see it in the flow of information from the gauges. You hear it in the solid sound of a closing door.

It grew out of a vision nearly a century old. Times may have changed but the vision has not. It *is* quality by design.

BUICK

Park Avenue Ultra

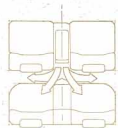

The 1993 Park Avenue Ultra is the ultimate expression of the premium American motorcar. The powerful supercharged 3800 V6 engine offers smooth, balanced performance. The muscular elegance of Park Avenue Ultra's flowing lines are as aerodynamically efficient as those of famous European sports cars. Its generous comfort and solid suspension bring civilized pleasure to your driving.

The 1993 Park Avenue Ultra: Buick's ultimate expression of quality by design.

Your environment includes easy-to-adjust 6-way power seats with seatback recliners.

Air flows to the back with rear-seat ComforTemp, which provides directionally controlled air current.

BUICK

Park Avenue Ultra

Our commitment to quality can be a real comfort on the road.

Comfort assumes many forms in Park Avenue Ultra. One-piece body sides and impact-deflecting door beams help provide the structural rigidity necessary for a composed ride. Quality fit helps isolate the interior from noise. Supple leather in the seating areas encourages longer drives. And, comfortable positions are easily selected in 6-way power driver and passenger seats, which include power recliners.

▼ Dual automatic ComforTemp climate control, located on the instrument panel, displays inside and outside temperatures.

Unreserved luxury includes conveniences like dual swing-down lighted vanity mirrors for rear-seat passengers.

Park Avenue Ultra

You are comfortably in control.

The legible analog gauges inform, quickly. The controls are grouped for easy reach and nicely weighted for sure response. Lack of compromise is evident in the many standard features. They include cruise control, power door locks, overhead console, dual cup holders in the front storage armrest and electric seatback recliners for driver and passenger.

▼ Driver air bag provides protection in addition to safety belts in the event of certain severe frontal impacts.

Dual automatic ComfortTemp climate control allows driver and front-seat passenger to adjust their individually desired temperature settings.

Six-position TILT-WHEEL™ adjustable steering column allows driver to adjust the wheel according to individual preference.

The potent 205-hp, computer-controlled supercharged 3800 V6 delivers immediate low-end torque and effortless cruising, in an uninterrupted, broad power band.

► Automatic Ride Control system adjusts for a pleasing ride over varying road surfaces. Optional.

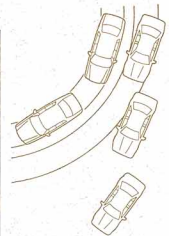

BUICK

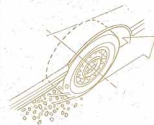

Park Avenue Ultra

Substantial. Powerful. Mature. And great fun.

With an abundance of power and smooth handling, Park Avenue Ultra can be driven with enthusiasm. Positive control is exhibited in the curves. The independent rear suspension helps provide for a comfortable ride. The variable-effort power steering is reassuringly communicative. And its anti-lock brakes help bring you to a sure, controlled stop.

The standard anti-lock brake system (ABS) helps maintain steering and braking control on a wide range of road surfaces and conditions.

Available Traction Control improves initial acceleration and helps reduce wheel spin on slippery road surfaces.

Park Avenue Ultra

SELF-SEALING TIRES
permanently seal up to 90% of all tread punctures 3/16 inch or less with a special rubber compound that flows to the leak and makes an air-tight seal. This option offers peace of mind.

BUICK

Park Avenue

The impressive 0.31 drag coefficient effectively manages the wind. And its wind tunnel design has made Park Avenue's streamlined shape exceptionally pleasing to the eye. The smooth, linear delivery of muscular V6 power is unrestrained throughout the 3800 engine's broad operating range. And DynaRide® suspension helps smooth out the road.

The graceful, distinctive exterior suggests a refined driving experience. Its looks do not deceive you.

Driver door controls group power windows, with driver-side "express-down" feature, and 6-way power driver's seat.

Wraparound instrument panel communicates beautifully through its available backlit analog cluster.

BUICK

Park Avenue

Stately room, crafted interior.

Park Avenue's generously comfortable interior features a standard 6-way power adjustable driver's seat, full instrumentation that offers available analog gauges that are readable at a glance, well-placed switches and a steering wheel with an air bag.

The roomy interior is crafted for comfort for both driver and passengers.

► Park Avenue interior in the available Sierra grain Ultra Soft leather and vinyl.

▲ Dual automatic ComforTemp climate control, located on the instrument panel, displays inside and outside temperatures.

▲ Remote keyless entry system is a reassuring security option that can be activated from up to 30 feet.

Supplemental sunshades provide expanded sun protection for both front and side at the same time.

Front-seat storage armrest with dual cup holders is a convenience for driver and passenger alike.

Park Avenue

Designed-in safety. A feature, not a luxury.

◀ *Park Avenue has an air bag built into the hub of the steering wheel. It is designed to deploy in certain severe frontal impacts and, in conjunction with seat belts, help prevent injuries.*

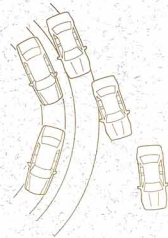

Buick's Total Safety Systems™ is a comprehensive package of reassuring features that surround Park Avenue occupants with both accident avoidance and crash protection.

Energy-absorbing crush zone initiators are located in front and back to help protect occupants. Doors have steel side-guard beams.

Fuel system safety is enhanced by a pressure relief system. And, from the dual hood latch to the

folding deck lid, features, both seen and unseen, help safeguard your driving experience.

▶ *The standard anti-lock brake system helps provide for sure stops and steering control while braking, even in slippery road conditions.*

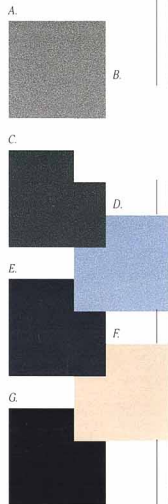

The energy-absorbing steering column in Park Avenue is designed to compress under impact.

A steel side-guard door beam is welded in the doors to help protect you from the force of a side-impact collision.

BUICK

Riviera

The stylish, gracefully aerodynamic 1993 Riviera exhibits the distinctive silhouette of a premium automobile. Certainly, the demanding driver will appreciate the response of the 3800 V6 tuned-port fuel-injected engine. The electronically controlled 4-speed automatic transmission is a model of smooth operation. The 4-wheel independent DynaRide suspension (or available Gran Touring suspension for a sportier feel) filters out harshness and handles the curves with agility. Plus, the automatic level control system keeps Riviera level, regardless of the weight being carried.

BUICK

Riviera

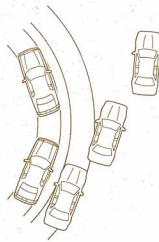

The acknowledged classic offers more than beauty.

Look beyond the distinctive lines. This powerful, mature classic fulfills the Buick quality by design mandate on many levels.

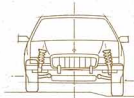

The 1993 Riviera offers the discriminating driver an abundance of premium features that are both responsive and refined. These include such Buick standards as anti-lock brakes, a long list of reassuring safety features, and 2-side-zinc-galvanized steel panels to help assure Riviera's long-lasting classic status.

▲ *Optional remote keyless entry system increases convenience and peace of mind by locking or unlocking doors, or unlatching deck lid — from a distance.*

Anti-lock brakes help provide controlled stopping under hard braking conditions, even on slippery roads.

Buick's famous DynaRide suspension smooths the way by isolating passengers from annoying bumps and vibrations.

1993

The standard driver Supplemental Inflatable Restraint (air bag) complements the shoulder/lap belt safety system and deploys in a fraction of a second in certain severe frontal impacts.

The passenger compartment is surrounded by a steel structure that forms a "safety cage" to help protect occupants in a front, rear or side impact.

BUICK

Riviera

Tailored to handle the road, and you.

The elegant Riviera interior surrounds you with premium refinements. The 6-way power driver's seat offers firmly bolstered support and quiet, easy-to-use, door-mounted controls. It even includes a manual recliner. Electronic touch climate control provides ample airflow and constant temperature. The retained accessory power feature keeps the sound system, power windows, wipers and available sunroof operational for 10 minutes, or until the door is opened. Plus, impact-deflecting side-guard door beams and substantial, unitized construction add to the feeling of solid comfort and safety.

◀ Riviera offers available Ultra Soft leather in seating areas.

Electronic, easy-to-read instrumentation includes a tachometer, low-oil level, low-fuel pressure and low-fuel indicators, plus a trip odometer.

▼ Available white leather in the seating areas can be combined with the handsome blue, red or tan interior trim.

BUICK

Regal Sedan

Regal is attracting an important following, including a number of former import owners. Some of the reasons why: the commanding power of the 3.1-litre V6 with multi-port fuel injection, 4-speed electronically controlled automatic transmission with overdrive, 4-wheel power disc brakes, 4-wheel independent DynaRide suspension, power steering, air conditioning, TILT-WHEEL™ adjustable steering column, and ETR® AM-FM stereo radio with seek and scan. All standard.

Regal Sedan: all the reasons in the world for passing up an import.

► *Regal Limited Sedan.*

BUICK

Regal Sedan

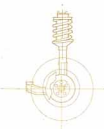

Why Regal is attracting a new generation.

Independent thinkers attach a high value to freedom of choice, and they are choosing the Regals — Limited, Custom and Gran Sport — with increasing enthusiasm.

Gran Sport exemplifies this Regal attraction. Behind its new grille is a powerful 3800 V6 with tuned-port injection. The Gran Touring Package includes a sporty, responsive suspension and wide-surfaced touring tires on 16-inch aluminum wheels, and more. Custom and Limited feature DynaRide suspension and the 3.1-litre V6 engine.

▼ *Foreground: Regal Gran Sport Sedan with standard 16-inch aluminum wheels. Background: Regal Custom Sedan with optional 15-inch aluminum wheels.*

▼ *The lively 3.1-litre V6 offers the efficiency of fast-burn combustion chambers and electronic sensors that precisely meter fuel to fit the pace of the engine.*

Buick's famous DynaRide 4-wheel independent suspension delivers smoothness, vibration-isolation and crisp handling.

Available dual ComforTemp climate control allows different temperature settings for driver and passenger.

Comfortable Regal Custom Sedan interior.

BUICK

Regal Sedan

A Regal choice is a comfortable one.

A generous assortment of standard features includes plush carpeting, rich cloth upholstery, and a premium sound system with ETR® AM-FM stereo radio, seek and scan, and a clock. The 55/45 front seat design incorporates a center armrest for storing personal items.

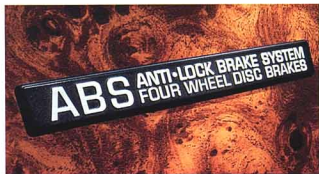

1993 Regal Sedan: a comfortable choice.

Driver-operated power door locks with automatic locking feature, and available power window controls, add a welcome touch of convenience.

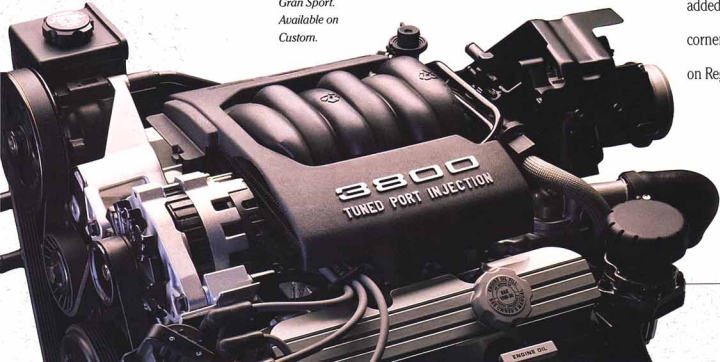

The energy-absorbing instrument panel is designed for ease and control with logically grouped switches and legible gauges. Features include convenient TILT-WHEEL™ adjustable steering column for the most comfortable angle, and ETR® AM-FM stereo with seek/scan, clock.

▲ The anti-lock brake system helps provide confident stopping power and steering control during hard-braking situations. Standard on Limited and Gran Sport. Available on Custom.

Strong, unstrained power without peaks and valleys characterizes the optional 3800 V6 tuned-port fuel-injected engine.

One sitting gives you a lot of reasons to own a Regal.

The Regal Gran Sport, shown right with optional red leather in the seating area, includes front adjustable headrests, reclining bucket seats, a sporty leather-wrapped steering wheel, and full-length operating console with storage in the armrest. The comfortable bucket seats are contoured to give added support to driver and passenger while cornering. This optional interior is also available on Regal Limited.

▲ Sporty, versatile full-length operating console fits neatly between available front bucket seats.

BUICK

Regal Coupe

There are no sacrifices here: this lively coupe is a driver's car with balance, style, power, comfort and utility.

The 1993 Regal Gran Sport features a Gran Touring suspension that offers crisp response, and a firm, precise ride. The sporty look of large tires on 16-inch aluminum wheels completes the picture. And behind the matching body-colored grille is a 3800 V6 engine with tuned-port fuel injection.

Regal Gran Sport Coupe: it sacrifices nothing.

► *Regal Gran Sport Coupe.*

BUICK

Regal Coupe

There's nothing basic about Regal Coupe.

That's another good reason it's so popular. Standard features include power steering, 4-wheel disc brakes for confident stopping power, or anti-lock brakes that are standard on Limited and Gran Sport, optional on Custom.

DynaRide 4-wheel independent suspension brings everything that's right to a sporty coupe. It is supple and cushioned over bumps, and smooth and precise on curves. The V6 serves up ample power for all performance needs. And even the trunk contributes 15.6 cu ft of cargo space.

▲ The 3.1-litre V6 with multi-port fuel injection, standard on Custom and Limited, generates 140 horsepower at 4400 rpm, 185 lbs-ft of torque at 3200 rpm.

Optional remote keyless entry system increases convenience and peace of mind by locking or unlocking doors, or unlatching deck lid — from a distance.

▼ Regal Custom Coupe.

▲ Regal Limited Coupe.

BUICK

Regal Coupe

The driving experience: how it measures up to the rest of the car.

The outer beauty and inner comforts of Regal Coupe make certain promises. They are paid in full when you settle into the comfortable interior.

Full instrumentation is standard in all Regals, and the seating is rich, with contoured support.

DynaRide suspension (Gran Touring suspension on Gran Sport) offers remarkable rough-road poise and refined grace on highways. The power of the standard 3.1-litre V6, or the optional 3800 engine, is transferred to pavement by the smooth 4-speed electronically controlled automatic transmission with overdrive.

► Handsome Regal Limited Coupe interior.

Legible instrumentation and rich trim add to the pleasure of an optional CD player and Concert Sound II speaker system. Convenient steering wheel radio controls are also available.

▼ Dual ComfortTemp climate control is an option that shows consideration for your passenger's inclinations.

Front seatbacks feature handy map pockets in the Limited Coupe.

BUICK

LeSabre

Buick LeSabre for 1993 offers the quiet, impressive power of a tuned-port fuel-injected 3800 V6 engine. How the power is translated to movement is just as impressive: LeSabre glides through the gears in a smooth arc, thanks to the computerized shifting of its sophisticated, electronically controlled 4-speed automatic transmission with overdrive.

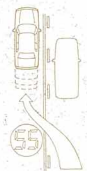

DynaRide suspension provides the responsive, fluid ride that has become a Buick trademark.

LeSabre: America's best-selling, 6-passenger, full-size automobile.*

**Based on 1992 model sales, October 1, 1991, through June 10, 1992.*

► *LeSabre Limited Sedan.*

Variable-effort steering delivers a measured amount of power assist at higher speeds for impressive road feel. At low speeds and parking, more power assist is provided. Standard on Limited.

BUICK

LeSabre

Two ways to hit the best seller list.

LeSabre Limited and LeSabre Custom share admirable traits: the refined ride and the deep well of power on demand join the generous list of features LeSabre owners have come to expect.

Safety is simplified by a brake/transmission interlock that prevents shifting out of PARK unless the brakes are applied. Anti-lock brakes, large brake rotors, steel side-guard door beams and one-piece body sides help form the assuringly solid feel of LeSabre, Buick's best-selling full-size car.

◀ Foreground: LeSabre Limited Sedan.
Background: LeSabre Custom Sedan.

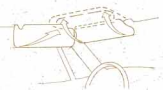

▲ PASS-Key® theft-deterrent system activates the ignition sensor in a second. Without it, the ignition system is inoperable.

Driver air bag (standard) provides protection in addition to safety belts, in event of certain severe frontal impacts.

The large, 17.1-cu-ft trunk is both easy to load and unload, thanks to its low liftover height.

Extendable and supplemental front sunshades shield driver and passenger from unwanted sun rays.

Standard plush 55/45 cloth seats feature manual recliners, to ease the journey of the driver and a front-seat passenger.

BUICK

LeSabre

Exceptional performance.

Six-passenger, full-size LeSabre offers impressive performance in the cabin, as well as the engine compartment. 108.3 cu ft of interior space provides plenty of front legroom (42 inches), and shoulder room that allows real freedom (59.1 inches).

Plush, comfortable seating is contoured. The roomy cabin is hushed at highway speeds, and that benefits yet another sort of performance: the concert sound of the premium audio system with optional CD player. However one measures performance, LeSabre is exceptional.

◀ LeSabre Limited with standard cloth interior.

▼ The front-seat storage armrest features dual cup holders within convenient reach of passenger and driver. Standard on Limited.

Wraparound instrument panel includes backlit analog cluster with trip odometer, optional remote trunk release, ETR® AM-FM stereo radio with seek and scan, four speakers and analog clock. Optional gage cluster shown.

BUICK

LeSabre

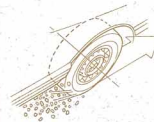

It took us 90 years to get here. Your trips will be considerably quicker.

You'll feel the full 90 years of solid Buick heritage in the 1993 LeSabre. Wind tunnel testing assures you acoustic calm in a sealed cabin at highway speeds. Those speeds are reached quickly and smoothly, with the 170-horsepower 3800 V6 and the precision of a computerized automatic transmission with overdrive. And to help you arrive safely, LeSabre comes standard with Buick's anti-lock brake system. It allows confident steering for more controlled stops under hard braking conditions.

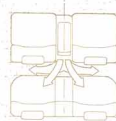

LeSabre: a powerful expression of Buick quality.

Advanced 170-hp 3800 V6 with tuned-port fuel injection features one injector at each intake port to help optimize power.

Optional traction control helps reduce wheel spin during initial acceleration on slick surfaces. Available only on Limited.

Air flows to the back with optional rear-seat ComfortTemp, which provides directionally controlled air current. Available only on Limited.

BUICK

Skylark

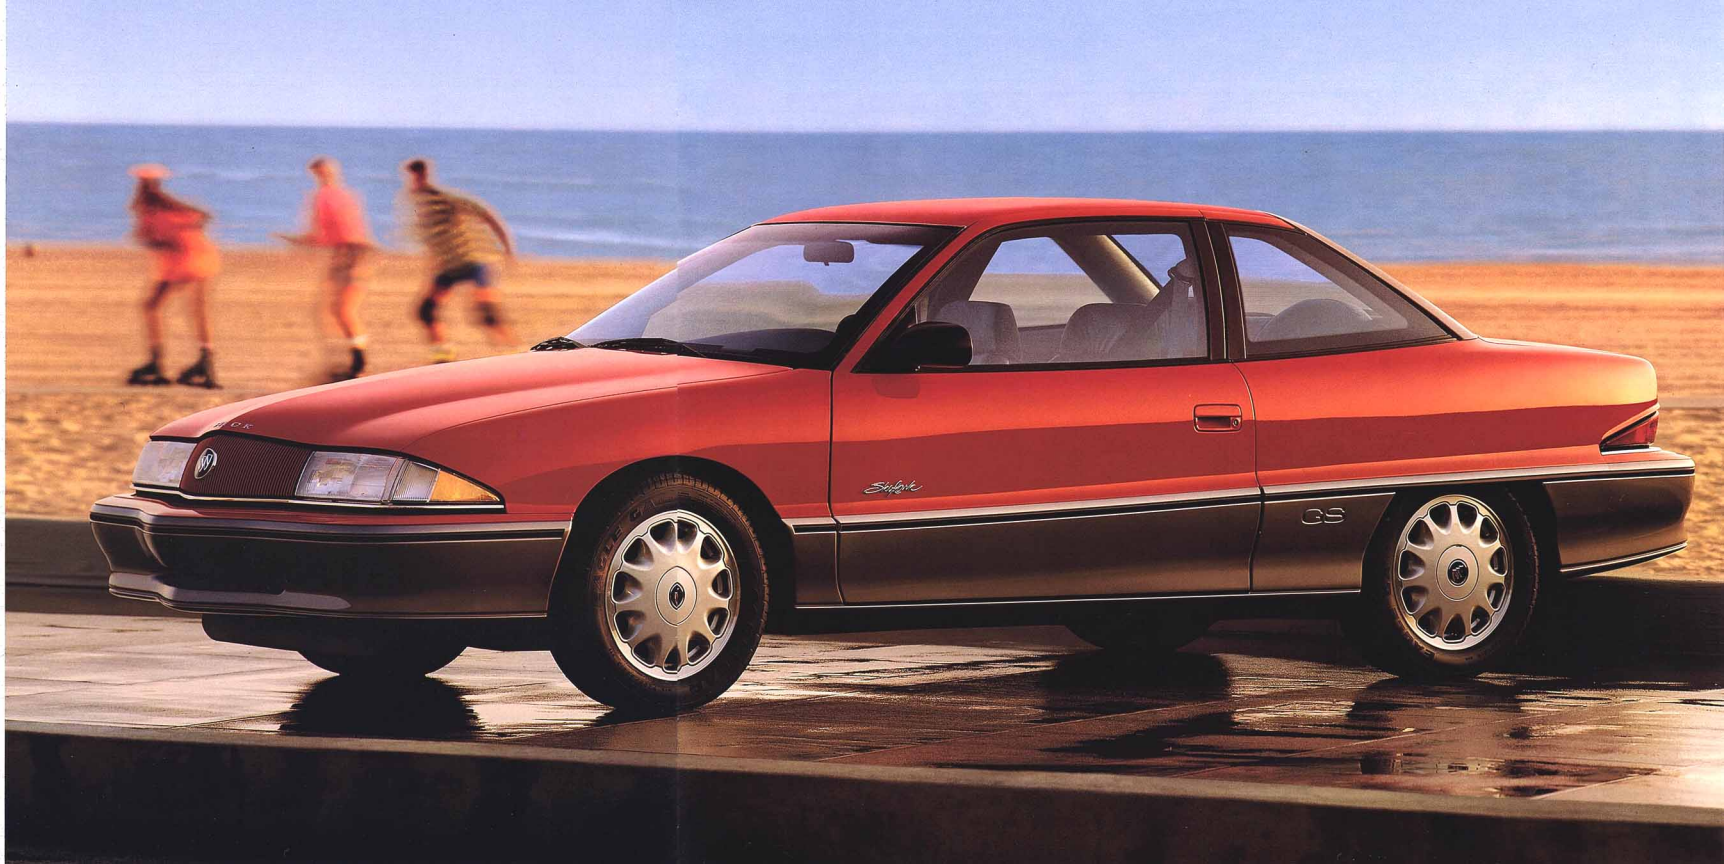

This bold, dramatically styled Gran Sport cannot escape notice. It is quality and convenience matched with powerful performance.

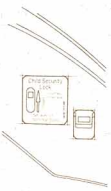

A 3300 V6 with multi-port fuel injection is its powerplant: an outstanding performer that develops 160 horsepower, with a torque peak of 185 lbs-ft.

Skylark Gran Sport also boasts a grand assortment of features like standard anti-lock brakes, and the optional Adjustable Ride Control suspension system with SOFT, AUTO and SPORT settings.

1993 Skylark: its lasting impression is by design.

► *Skylark Gran Sport Coupe.*

Rear-door child security locks, when activated, prevent opening the rear doors with the interior handles.

Standard remote releases for trunk lid and fuel filler door provide a touch of security and convenience.

BUICK

Skylark

It might be easier to tell you what it doesn't have.

Skylark sports freedom of choice and a wide array of standard equipment. For instance, the Gran Sport features supple leather and soft cloth in the seating area. Other Gran Sport features include a full-length operating console between the bucket seats, adjustable headrests, rear-seat headrests, manual driver and passenger recliners and, of course, power rack-and-pinion steering.

Standard Gran Sport trim with cloth and leather in the seating areas.

The split folding rear seat is convenient for carrying long or bulky items. Standard on Gran Sport, available on Limited.

This Gran Sport design includes full instrumentation with analog gauges, ETR® AM-FM stereo with seek and scan, clock. All controls are within easy reach and logically grouped.

BUICK

Skylark

Anonymity is one of the few things you don't get with Skylark.

But look what you do get. Buick quality. Buick safety. Buick comfort. Buick convenience. The contemporary aerodynamic design will allow you to evade the effects of wind, but not the notice of an admiring public. You can handle it. With DynaRide suspension (standard on Custom and Limited), the

control, and the ride, are superb. The power behind the fun: a spirited 2.3-litre Quad OHC (Custom, Limited) and the 3300 V6 with multi-port fuel injection in the Gran Sport (available in Custom and Limited).

The dramatic silhouette of Skylark, whether coupe or sedan, houses a lot of convenience — except the privilege of getting away unnoticed.

► *Foreground:*

All exterior body panels except the roof are protected with 2-side-galvanized steel for corrosion resistance. On top of that, a basecoat-clearcoat paint process provides luster and durability.

The power of comfort, and vice-versa.

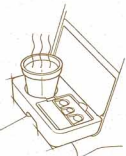

The comforting reserves of Skylark powerplants are there for passing a truck or smooth cruising. But that is not all there is to driving a Skylark. The smart, inviting interior features stylish, cloth seating with an armrest in front, and manual recliners for both driver and front passenger.

There is comfort in safety, too: standard 4-wheel anti-lock brakes help bring you to a sure, controlled

stop. A safety cage surrounds occupants with reinforced steel, and side-guard door beams help absorb impact energy in side collisions and reduce the amount of force transmitted to the passenger compartment. Add to that the energy-absorbing crush zones, front and rear, and an energy-absorbing steering column, and the feeling of comfort is powerfully reassuring.

► The lively fuel-injected 2.3-litre Quad OHC engine needs only oil, spark plugs and filters for its low-maintenance schedule during the first 100,000 miles. Standard on Limited and Custom.

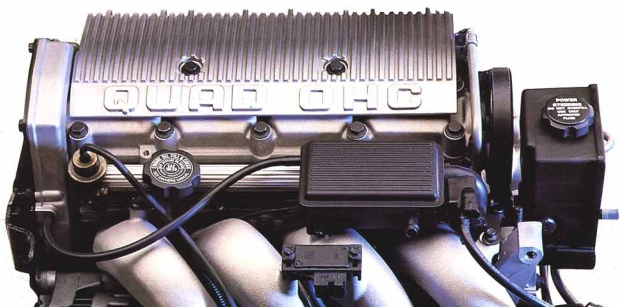

► Skylark Custom interior features handsome cloth-covered seating.

Convenient available center console provides a driver-side cup holder, coin-keeper and ashtray that removes for storage and even more room. Standard on Gran Sport.

Standard power door locks with automatic feature engage when you shift out of PARK or NEUTRAL.

Skylark

Another big reason to follow Skylark's progress:

Skylark is designed to move ahead, with an extremely healthy 3300 V6 that develops 160 horsepower and 185 lbs-ft of torque. The immediacy of lower-end torque may cause an irrepressible smile — and the broad power band guarantees smooth, predictable power delivery throughout the engine's range.

This multi-port fuel-injected engine will continue to delight, thanks to roller lifters that reduce valve train friction, and lightweight pistons that reduce drag on cylinder walls. Standard on Gran Sport and optional on Custom and Limited.

1993 Skylark: you're being followed.

► Adjustable Ride Control allows you to adjust the suspension for varying road conditions, or your personal preference. This option can be set on SOFT, SPORT or AUTO.

Front to back, Skylark is loaded with satisfaction.

The large 13.3-cu-ft trunk space features the low liftover design for easy loading and unloading.

Other conveniences include a smooth-shifting automatic transmission, front-seat center storage armrest, front and side window defoggers, power door locks with automatic locking feature, rear-seat headrests, power steering and anti-lock brakes.

1993 Skylark: out to satisfy America. Again.

► Roomy trunk features a low liftover height for easy loading and unloading.

4-wheel anti-lock brakes help provide controlled stopping on most surfaces.

Computer technology helps you maintain steering direction while braking by adjusting brake pressure rapidly to control wheel lock.

Century

This classic Buick transforms the road into something special. Advancing surefootedly on DynaRide suspension, it draws confident power from a new standard 2.2-litre port-fuel-injected engine — or the 3300 V6 option.

New colors and body-side moldings enhance the stylish 6-passenger Century's appearance. The long list of standard features includes air conditioning, power steering, power brakes, automatic transmission, variable-rate rear springs and much more.

1993 Century: a prime example of quality by design.

BUICK

Century

Silent comfort. Sound principles.

Surrounding the solid, hushed comfort in Century's 6-passenger interior are single-piece body framing and latches which hold the doors rigid for a quiet ride.

Another sound principle, generously applied to the well-crafted interior, is that of value. Century owners have come to expect plenty of standard features and they won't be disappointed in 1993. Included are rich cloth seating, Soft-Ray tinted glass, power rack-and-pinion steering, and ETR® AM-FM stereo radio.

◀ *Century Limited Sedan comes with rich, comfortable cloth seating.*

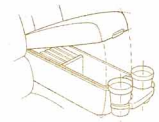

▼ *Driver air bag works with safety belts to help protect driver in certain severe frontal impacts. Standard on Limited and Custom, optional on Special.*

Easy-to-read gages communicate information quickly on Century Limited.

1993

Storage armrest with new dual cup holders is standard on Custom and Limited.

Available 6-way power driver's seat adjusts with fingertip controls — up, down, forward, back and two tilt directions. Power seatback recliners are standard.

Century

Presenting an expanded view.

Century's standard form of power is the transverse-mounted 2.2-litre 2200 L4 engine with port fuel injection. Another way to go is the available 3300 V6 with an even more expansive power band. Either engine provides smooth, unlabored delivery of ample power for effortless highway cruising.

Options abound. Century Wagon provides lots of comfort with loads of usable cargo space and

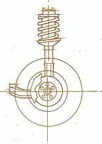

crowd-pleasing room. And available options like a CD player and remote keyless entry complete the bigger picture.

▲ Steel camshaft and lightweight high-strength pistons help reduce friction and produce optimum power in the optional 3300 V6 with multi-port fuel injection.

BUICK

Roadmaster Sedan

It is easy to imagine the classic heritage reflected in the highly lustrous sides of the 1993 Roadmaster Sedan, even while loading groceries at the corner store. This is an automobile that brings a high level of dignity and style to everything it does, everywhere it appears.

This classic premium Buick is a full-frame rear-wheel-drive sedan with solid, civilized V8 power and a thoroughly disciplined, fluid ride.

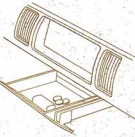

1993 Roadmaster: a distinctive blend of power, prestige and substance.

◀ *Roadmaster Limited Sedan.*

The elegant steering wheel is a masterful dual-purpose design, containing an air bag for added driver safety.

Instrument panel storage drawer. Just the place for pens, coins and keys.

Luxurious Roadmaster Limited interior with available leather in the seating areas.

BUICK

Roadmaster Sedan

This interior is to comfort what a symphony orchestra is to music.

There is an expected level of luxury in a classic like Roadmaster. No one will be disappointed. Classical values blend with ergonomic advancements and an abundance of features. Everything is orchestrated with comfort in mind.

For instance, variable-effort steering (standard on Limited) makes low-speed maneuvers easy, while allowing "road feel" to come through at higher speeds. Other features include anti-lock brakes, power windows, air conditioning, cruise control and TILT-WHEEL™ adjustable steering column.

And, of course, a premium-quality music system.

Standard front-seat storage armrest features dual cup holders.

Analog instrumentation provides quick and easy-to-read information. Also includes tachometer, voltmeter and trip odometer.

BUICK

Roadmaster Sedan

Blending a little past and a lot of future.

True to Buick heritage, the 1993 Roadmaster embodies luxury on a grand scale.

Classic power blended with a remarkably fluid DynaRide suspension brings pleasure to the road.

And it would not be a Roadmaster without a list of standard features as substantial as the car itself. These include a 4-speed automatic transmission with overdrive, variable-effort steering (Limited), electronic cruise control, driver air bag and power anti-lock brakes.

Roadmaster Sedan: a proud past, a bright future.

◀ Foreground: Roadmaster Limited Sedan. Background: Roadmaster with available Landau vinyl top.

▶ Outside remote left and right mirrors heat electronically for frosty climates. Standard on Limited.

▼ Luxuriously large trunk: 21.0 cu ft of trunk capacity for golf clubs, luggage, or lots of groceries.

Lock or unlock doors, unlatch deck lid or turn on interior lights from a distance with remote keyless entry option.

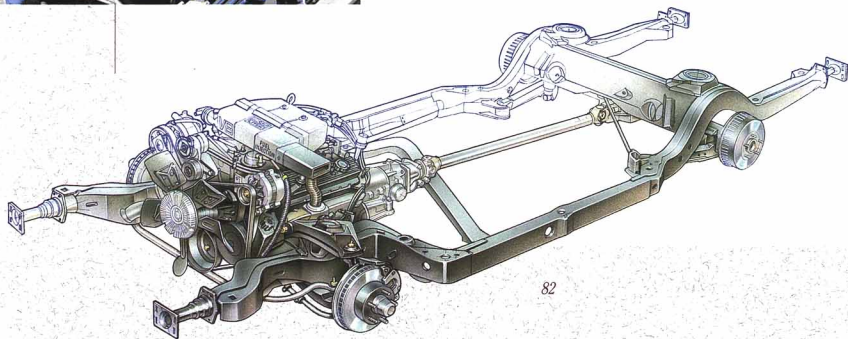

The powerful fuel-injected 5.7-litre V8 engine develops 180 horsepower, 300 lbs-ft of torque — plenty of power for towing, highway cruising or accelerating on the entrance ramp.

Roadmaster Sedan

Every masterpiece should have an impressive frame.

The famous Roadmaster attributes of smooth ride, comfort and quietness — and an unmistakable "solid feeling" — are even better than ever, thanks to its full-frame construction. You see, a full-perimeter frame provides superb structural integrity. That is quality to the core. And Roadmaster delivers it beautifully.

BUICK

Roadmaster Estate Wagon

This legendary 8-passenger Buick station wagon rolls powerfully and smoothly into 1993.

Roadmaster Estate Wagon blends the utility and versatility of a station wagon with the comfort, beauty and solidity of a true Buick luxury car.

Inside the large cabin is space to carry several full-size sedan-loads of cargo. Still, that does not alter the fact that the rich interior rivals that of any luxury car.

1993 Roadmaster: for a station wagon, it is quite a luxury car.

Roadmaster Estate Wagon

The length of luxury.

Our engineers took the best of everything Roadmaster offered and stretched it and expanded it. The result is the 1993 Roadmaster Estate Wagon. It may be the most luxurious wagon in the world.

This aerodynamic, premium American classic offers a lengthy list of standard features. Power windows with the driver-side "express-down" feature are to be expected. Power steering eases the wagon into tight spaces and air conditioning is there, of course. The list also includes reclining 55/45 front seats and rear-door child security locks. Plus, a passenger window lockout feature is added to the power windows.

1993 Roadmaster Estate Wagon: a solid measure of Buick excellence.

An uncluttered panoramic view of the world is enjoyed through the non-glare, tinted Vista roof. Dual Vista shades are available.

▲ *A powerful 5.7-litre fuel-injected V8 develops 180 horsepower and plenty of torque for pulling power and solid acceleration.*

Driver air bag is neatly packaged into the handsome steering wheel design.

Available front-seat center storage armrest adds even more usable space with dual cup holders, coin holder and plenty of storage.

Available Sierra grain leather in the seating areas.

BUICK

Roadmaster Estate Wagon

The logical extension of luxury.

Solid V8 power and full-frame security are well matched with the warm, rich interior. Eight passengers are afforded luxurious comfort. The generous list of standard features includes TILT-WHEEL™ adjustable steering column, power steering, power brakes, power windows, and the power to pull 5,000 lbs.*

An ETR® AM-FM radio with seek and scan, and extended-range front and rear speakers, is standard as well. This superb system fills the large area with clarity and fidelity.

1993 Roadmaster Estate Wagon: more of a very good thing.

**When properly equipped. Includes weight of trailer, cargo, passengers and equipment.*

Driver-side controls with power door locks and window controls offer handy "express-down" and "lockout" features.

Easy-to-read analog gauges are displayed. Easy-to-reach controls are where one would expect and grouped by function.

Child security locks, when activated, prevent the inside handles from unlocking or opening the door inadvertently.

Standard locking storage compartment keeps precious cargo from prying eyes.

Roadmaster Estate Wagon

The luxury wagon that leaves nothing behind...and nothing to be desired.

With Roadmaster Estate Wagon, you have the luxury of taking more with you than you'll actually need. Just look at the carrying capabilities. Fold down the rear seats and open up the possibilities: a full 92.4 cu ft of cargo space.

The tailgate opens two ways for easy loading. And the rear window is cleared by another standard feature — a rear wiper/washer.

So, if being more at home on the road means taking more of home with you, feel free. This is the wagon that does it all. The eminently desirable Roadmaster Estate Wagon.

Seating configurations are a study in versatility:

Rear seat flush with floor to provide quick-access rear cargo bay.

All seats up accommodate up to eight passengers.

All but front seats down: for large hauling needs.

Middle seats down: allow passengers to sit in back and have the luxury of side-door access for luggage.

Clearly, a desirable convenience — the standard rear-window wiper/washer.

Roadmaster Estate Wagon

CORNERING LAMPS brighten turning or parking maneuvers with peripheral illumination. This option also alerts other drivers, as the lamps are automatically activated with the turn signals.

Buick quality pulls a lot of weight.

What is behind Buick quality? Plenty of power. Look behind you; quality pulls a lot of weight with Buick. Depending on the model you choose, the availability of smooth, uninterrupted power is deep enough to accommodate up to 5,000 lbs* of trailering. No wonder Buicks have acquired such a satisfied following.

Skylark and Regal

Capacity: 1,000 lbs*
All Skylarks with the 3300 V6, and Regals, can easily handle lightweight-class trailer loads when properly equipped. You'll come to appreciate their muscle even more when hauling a trailer.

Century

Capacity: 2,000 lbs*
Muscular grace: The term becomes all the more descriptive when hitched to the trailering capacity of Century. All Buick Centurys will pull 1,000 lbs and specially equipped models with the 3300 V6 will tow up to 2,000 lbs.

Park Avenue and LeSabre
Capacity: 3,000 lbs* (2,000 lbs* on Ultra)

How do these 6-passenger sedans haul? Luxuriously, with ease and a great deal of comfort. Standard 3800 V6 power and automatic load-leveling (optional on LeSabre) coupled with a smooth-

operating transmission make a big load seem lighter.

(6) Trailer towing in mountainous, high-temperature areas requires the installation of the Dunham-Bush Auxiliary Cooler (dealer installed).

off your mind: You're hauling 5,000 lbs with a 700-lb tongue weight, and instead of wrestling with the load, you're enjoying the smooth flow of the countryside passing by.

Heavy-duty cooling and components

Trailering, especially in hot climates, calls for a heavy-duty cooling system which includes a radiator with higher cooling capacity for both engine and transmission coolants. Available on Park Avenue, LeSabre and Roadmaster, the trailer towing option features powertrain cooling plus suspension and performance enhancements that handle loads up to 3,000 lbs (2,000 lbs on Ultra, 5,000 lbs on Roadmaster).

Increased acceleration demands are met through a high-performance axle ratio. A heavy-duty battery is included to take care of trailer lighting requirements. Roadmaster Estate Wagon and Sedan, when equipped with the Trailer Towing Package, can tow 5,000 lbs.

Important: A word about this catalog.

We have tried to make this catalog as comprehensive and factual as possible. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Since some information may have been updated since the time of printing, please check with your Buick dealer for complete details.

A word about engines.

Buicks are equipped with engines produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

A word about assembly of Buicks.

Buicks are assembled by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. Buicks incorporate thousands of components produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Buicks with different or differently sourced components than originally scheduled. All such components have been approved for use in Buicks and will provide the quality performance associated with the Buick name. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered, or if there are changes, that they are acceptable to you.

A word about updated service information.

Buick regularly sends its dealers useful service bulletins about Buick products. Buick monitors product performance in the field. We then prepare bulletins for servicing our products better. Now you can get these bulletins, too. Ask your dealer. To get ordering information, call toll-free 1-800-551-4123.

A word about corrosion protection.

Buicks are designed and built to resist corrosion. All body sheet metal components are warranted against rust-through corrosion for 6 years/100,000 miles. Application of additional rust-inhibiting materials is not required under the corrosion coverage.

The GM Protection Plan.

It offers service protection in addition to that provided by GM's new-vehicle limited warranty. Coverage is currently available only in the U.S.A. and Canada for the 1993 model year. See your Buick dealer for details.

A word about warranty.

The GM 3-year/36,000-mile Bumper to Bumper Plus warranty covers repairs for any new Buick, including labor and parts, to correct any defects in material or workmanship occurring during the warranty period. The complete vehicle (except tires, which are covered by their manufacturer) will be covered for 3 years or 36,000 miles, whichever comes first. Body sheet metal rust-through from corrosion is covered for 6 years or 100,000 miles, whichever comes first. See your Buick dealer for terms of this limited warranty. Supplemental Inflatable Restraint coverage is 3 years regardless of mileage.

SmartLease.™
